ELEVENTH VOLUME

(FOR PREVIOUS REPORTS PLEASE CONSULT VOLUMES I - X, JULY 1, 1931 - DECEMBER 31, 1956)

A. NORTH ATLANTIC TREATY ORGANIZATION. — Meeting of North Atlantic Council. - Reaffirmation of Atlantic Alliance. - Adoption of Committee of Three's Report on Political Consultation and Settlement of Inter-NATO Disputes. - American Reservations. - British Representations on Support Costs in Germany. - Mr. Dulles on Principles of U.S. Foreign Policy. - U.S. Atomic Weapons for European NATO Countries. - M. Spaak appointed Secretary-General of NATO. - Forthcoming Resignation of Lord Ismay.

A meeting of the North Atlantic Council, attended by the Foreign, Defence, and Finance Ministers of the 15 member-countries of NATO, was held in Paris from Dec. 11-14 under the chairmanship of Professor Martino, the Italian Foreign Minister. The Council's principal decisions were: (1) the adoption of the recommendations of the "three wise men" on closer co-operation of member-countries in non-political matters, including advance consultation on policies or major pronouncements "significantly affecting the alliance or any of its members."; (2) the adoption of a prodecure for the internal settlement of disputes and differences between member-countries within the NATO; (3) the reaffirmation of the Atlantic alliance, in spite of recent disagreements between members in connexion with the Anglo-French intervention in Egypt; (4) the appointment of M. Spaak, the Belgian Foreign Minister, as Secretary-General of NATO in succession to Lord Ismay. The following communiqué was issued at the end of the meeting:

"(1) The North Atlantic Council . . . took decisions that will strengthen the military and non-military co-operation of the alliance.

"(2) The Ministers drew from the experience of past divergencies in the policies of NATO members . . . the necessity for all members to develop effective political consultation and co-operation. They reaffirmed their determination to work together in unity and friendship to achieve the aims of the alliance, and to strengthen the alliance in all its aspects as an indispensable agency for security and peace.

"(3) As a major forward step in the development of NATO in the non-military field, the Council approved the recommendations of the Committee of Three in their report to the Council. In doing so, the Council approved wider and more intimate consultation among the member-States on political matters.

"The Council also approved arrangements to aid in the settlement of disputes among members, and adopted measures for strengthening the organization of NATO internally and for further co-operation between members in certain economic and cultural fields. The report has been released by the Committee of Three.

"(4) The Council reviewed the international situation, discussing frankly the problems which confront the Atlantic Alliance. In the course of this discussion, Ministers, realizing that their ideas were in general agreement, decided that they should be worked out in fuller detail by continuous consultation in the months ahead.

"(5) The Atlantic Alliance is primarily concerned with the threat to the security of the NATO area. The Council discussed the threat which Soviet penetration into the Middle East would present for NATO. In view of the fact that the security, stability, and well-being of this area are essential to world peace, the Council agreed to keep developments in this area under close and continuing observation.

"(6) Council members emphasized in particular the need for rapid progress in clearing the Suez Canal, in conformity with the resolution of the U.N. General Assembly of Nov. 2 last [see page 15186]. The Ministers further stressed the urgent need for initiating and pressing to a conclusion negotiations through the good offices of the United Nations with a view to restoring the Canal to full and free operation. They endorsed, as the basis on which a lasting settlement should be worked out, the six principles agreed on by the U.N. Security Council on Oct. 13 [see page 15254].

"They also agreed on the urgent need to bring about, through the U.N., a permanent political settlement between Israel and the Arab States, including an equitable solution of the Arab refugee problem. The need for adequate support for economic development of the area was recognized.

"(7) The Council have followed the course of events in Hungary with shock and revulsion. The brutal suppression of the heroic Hungarian people stands in stark contrast with Soviet public professions. The Council reaffirmed the conviction of its member-Governments that the U.N. should continue its efforts, through the pressure of world opinion, to induce the Soviets to withdraw their forces from Hungary and to right the wrongs done to the Hungarian people.

"The peoples of Eastern Europe should have the right to choose their own Governments freely, unaffected by external pressure and the use or threat of force, and to decide for themselves the political and social order they prefer.

"(8) The Ministers examined the implications for NATO of Soviet policy and actions in Europe and elsewhere. In the light of their assessment of Soviet policy they were in full agreement on the need to face up to any threat which would endanger the security and freedom of the Atlantic community.

"In this connexion the Council approved a directive for future military plans, taking into account the continued rise in Soviet capabilities and the various types of new weapons available for NATO defence. The concept of 'forward defence' in NATO strategy will remain. The Council considered the report on the 1956 annual review and approved the goals for 1957, 1958, and 1959.

"(9) The Council expressed their deep regret at the decision of Lord Ismay to retire this spring as Secretary-General of the Organization, and paid tribute to his distinguished services to the alliance. M. Spaak, Foreign Minister of Belgium, was appointed as Lord Ismay's successor."

The Cyprus situation, though not specifically mentioned in the communiqué, was also discussed.

Agreement on Continuous Political Consultation and Procedure for Settlement of Members' Disputes.

The report of the Committee of Three (Professor Martino, Dr. Lange, and Mr. Lester Pearson, the Italian, Norwegian, and Canadian Foreign Ministers respectively) on ways of improving and extending NATO co-operation in non-military fields was submitted to the Council on Dec. 12, and adopted on Dec. 13 after discussion during which all members expressed their general approval. The Council also adopted a special resolution embodying the procedure for the exercise of NATO good offices in the event of disputes between member-countries, as recommended by the Committee of Three (see below).

The report of the Committee of Three was published on Dec. 14 and is summarized below under cross-headings:

Introduction. The deterrent role of NATO could be effective only if the political and economic relations between its members were co-operative and close. The crisis in the Atlantic alliance caused by the Anglo-French intervention in Egypt emphasized the fact that the Atlantic community could develop greater unity only by working constantly to achieve common policies, by full and timely consultation on issues of common concern. Any changes in national strategy or policy which would affect the coalition should be made only after collective consideration. "An alliance in which the members ignore each other's interests, or engage in political or economic conflict, or harbour suspicions of each other, cannot be effective either for deterrence or defence. Recent experience makes this clearer than ever before."

Referring to certain changes in Soviet tactics, and to the present troubles in Eastern Europe, the report said that NATO was now faced with an additional challenge in which the emphasis was largely non-military in character. The Soviet Union was adopting policies apparently designed to ensnare under-developed countries by economic means and by political subversion. NATO members should maintain their vigilance in dealing with this form of penetration, and a review was needed of NATO's ability to meet the new challenge. NATO's military strength should not be reduced, but the strengthening of the political and economic side was an essential complement to continuous co-operation in defence. NATO should be used by its members, far more than it had been used in the past, for sincere and genuine consultation and co-operation on questions of common concern.

Falsehoods about NATO were accepted at their face value, even in the non-Communist world, where it was said that NATO was tending to become an agency for the pooling of the strength and resources of the "colonial" Powers. NATO and the Governments of its member-countries ought to correct and counteract these views, and it was important for NATO members to harmonize their policies in relation to other areas, taking into account the broader interests of the whole international community. Nations were becoming increas[illegible] Inter-dependent, and no State, however powerful, could gu[illegible]ntee its security and welfare by national action alone.

"It has not been difficult to make these recommendations," the report went on. "It will be far more difficult for the member-Governments to carry them into effect. This will require on their part the firm conviction that the transformation of the political Community into a vital and vigorous political reality is as important as any purely national purpose. It will require, above all, the will to carry this conviction into the realm of practical governmental policy."

Political Consultation. The report recommended the following principles and practices in the field of political consultation :

(1) Members should inform the Council of any development which significantly affected the alliance. They should do this not merely as a formality but as a preliminary to effective political consultation.

(2) Both individual member-Governments and the Secretary-General should have the right to raise for discussion in the Council any subject which was of common NATO interest, and not of a purely domestic character.

(3) A member-Government should not, without adequate advance consultation, adopt firm policies or make major political announcements on matters which significantly affected the alliance or any of its members, unless circumstances made such prior consultation obviously and demonstrably impossible.

(4) In developing their national policies, members should take into consideration the interests and views of other Governments—particularly those most directly concerned—as expressed in NATO consultation, even where no community of view or consensus of opinion had been reached in the Council.

(5) Where consensus had been reached, it should be reflected in the formation of national policies When for national reasons the consensus was not followed, the Government concerned should offer an explanation to the Council. It was even more important that, where an agreed and formal recommendation had emerged from the Council's discussions, Governments should give it full weight in any national actions or policies related to the subject of that recommendation.

(6) To strengthen the process of consultation it was recommended that at each spring meeting the Foreign Ministers should make an appraisal of the political progress of the alliance and consider the lines along which it should advance.

(7) To prepare for this discussion, the Secretary-General should submit an annual report analyzing the major political problems of the alliance ; reviewing the extent to which member-Governments had consulted and co-operated in such problems, and indicating the problems and the possible developments which might require consultation, so that difficulties might be resolved and positive and constructive initiative taken.

(8) To assist the permanent representatives [of member-countries] and the Secretary-General in discharging their responsibilities for political consultation, a committee of political advisers from each delegation should be constituted under the Council, aided when necessary by specialists.

Settlement of Members' Disputes. It was further recommended that NATO members should submit any dispute between them which had not proved capable of direct settlement to "good offices" procedures under NATO before resorting to any other international agency. Exceptions to this procedure would be legal questions which could be dealt with more appropriately by a judicial tribunal, or economic questions which could more appropriately be dealt with in the specialized economic organizations.

All member-countries, as well as the Secretary-General, had the right and the duty to bring to the Council's attention matters which in their opinion might threaten the solidarity or effectiveness of the Alliance. The Secretary-General should be empowered to offer his good offices informally to the parties to a dispute and, with their consent, "to initiate or facilitate procedures of inquiry, mediation, conciliation, or arbitration." For this purpose, he should be able to use the assistance of not more than three permanent representatives chosen by him in each instance.

Economic Co-operation. The report recognized that it would serve no useful purpose for NATO to duplicate the functions of other international organizations concerned with various forms of economic co-operation. There seemed to be no significant new areas for collective economic action by NATO, but there could be a substantial expansion of exchanges of information and views in NATO, in the economic as well as the political field. Members, and the Secretary-General, should be able to raise any NATO economic issues which they felt were not making adequate progress in other and more technically qualified organizations. The report did not consider NATO to be an appropriate agency for administering programmes of assistance for economic development in the under-developed areas. It recommended, however, that a committee of economic advisers should be established under the Council.

Scientific and Technical Co-operation. The report suggested that a conference might be convened, with one or two outstanding authorities from each country, to discuss the recruitment, training, and utilization of scientists, engineers, and technicians.

NATO Organization. The report considered that no changes were needed in the structure of NATO to facilitate closer co-operation in non-military fields. The machine, it said, was basically satisfactory, and it was for Governments to make use of it.

It was, however, recommended that more time should be allowed for Ministerial meetings ; that meetings of Foreign Ministers should be held whenever required, and occasionally at places other than NATO headquarters ; and that Ministers might participate more frequently in regular Council meetings. In order that the permanent Council representatives should be able to speak more authoritatively on behalf of their Governments, the report suggested that the Secretary-General should preside over Ministerial meetings, that he should be encouraged to propose items for NATO consultation in the fields covered by the report, and that he should be responsible for promoting and directing the process of consultation.

During the discussion on the report certain reservations were expressed by Mr. Dulles and M. Pineau.

Mr. Dulles informed the North Atlantic Council that the United States could not subject its policies or actions throughout the world to prior consultations within NATO. He favoured such consultation on foreign policies in times of relative tranquillity, but rejected the implication that the U.S.A. could take no action in any part of the world without first securing the North Atlantic Council's approval for its plans.

Constitutional processes, he pointed out, would not permit the U.S.A. to give literal application to the recommendations of the "three wise men" for consultation in advance of new policies. In this connexion he recalled that the U.S. National Security Council took decisions ; that the President consulted Congress, which controlled the finances affecting foreign policy ; and that sometimes what seemed to be new foreign policies, or reiterations of policies, were announced at press conferences. The U.S.A. also had world-wide responsibilities by virtue of collective agreements with other countries, e.g., of the 44 countries to which she was linked by such agreements, only 14 were members of NATO.

Therefore, it would in practice be impossible for the United States to have consultations within NATO before making any decision whatever, and the U.S. Government must reserve the right to take political or military initiatives to defend its interests and those of its numerous allies. As an example, Mr. Dulles quoted Formosa. If Communist China attacked Formosa, the U.S.A. would not be able to consult NATO before going to the aid of Nationalist China.

Subject to such exceptions, however, the U.S. Government was ready to discuss within the NATO framework any situation which could be foreseen. It welcomed that part of the report which urged the creation of a "watch-dog" committee of three, to be named by the Secretary-General, to try to settle disputes among members of the alliance. In conclusion he expressed the hope that the adoption of the report would not create an obstacle to political, economic, and military co-ordination between the European members of NATO.

In reply to various criticisms of his statement, Mr. Dulles later explained that, while the U.S.A. was always in favour of consultation among NATO members and felt that such consultations ought to take place before a crisis occurred, there could be cases where sheer urgency might compel her to undertake immediate action. **Mr. Lange** (one of the "three wise men") and **Mr. Selwyn Lloyd** expressed agreement with Mr. Dulles's attitude.

M. Pineau considered that the report should be amended in three respects : (1) he did not believe that the Foreign Ministers themselves need take part in frequent NATO meetings, as the report proposed, but thought each country should have its own Minister for NATO Affairs ; (2) NATO should be developed in such a way as to compete with other existing organizations ; and (3) there would have to be clarification of the character of consultations within the Organization about events outside the NATO area.

Mr. Selwyn Lloyd outlined the future development of an Atlantic community within which there would function a strong European community. This should be based on three foundations : (1) the high political and military direction given by NATO, with W.E.U. functioning within its framework ; (2) economic co-operation under and in association with the O.E.E.C. and such groups as the E.P.U., the European Coal and Steel Community, and the Common Market and free trade area ; and (3) a North Atlantic Assembly on parliamentary lines, with powers and functions to be assigned to it.

Discussions on Military Position of NATO Alliance. - Mr. Macmillan on Need for Continued German Payment of Support Costs.

On Dec. 13 the North Atlantic Council examined the military position of the alliance in Europe, and discussed the ultimate objective of a complete reappraisal of NATO forces, arms, and methods. The main points which emerged from the discussions were (1) an estimated increase in Russian military strength ; (2) the use of tactical atomic weapons by NATO defence forces to compensate their deficiencies in manpower, and (3) a more equitable sharing of defence burdens, particularly with regard to Britain's foreign exchange costs in Germany.

The discussion was opened with an intelligence briefing from **General Johnson,** chairman of the Military Standing Group, who indicated that there was no evidence to confirm or deny the reality of Soviet arms reductions. Soviet capabilities had "significantly" increased in recent months with the arrival in Eastern Germany of "thousands" of newer and more powerful tanks, while the much publicized reduction of Soviet forces in that country had meant a reduction of under ten per cent in manpower. Apart from Eastern Germany, Russian military power had "significantly" increased in all fields, and "in particular in nuclear capabilities."

Mr. Macmillan informed the Council that there would be "severe consequences for Britain and NATO" unless some new arrangement was made about the financing of British troops in Europe. Speaking of the bilateral talks on this subject which had been going on with the German delegation (see below), Mr. Macmillan expressed the hope that a short-term solution would soon be reached. He said that Britain was prepared to pay the budgetary (i.e. home) cost of maintaining her troops on the Continent, but could not accept responsibility for payment across the exchanges. He suggested that there might be an equalization fund or some other multilateral arrangement.

Local British costs in Germany were at present between £60,000,000 and £70,000,000 annually. Britain's military budget was between £1,500,000,000 and £1,600,000,000 a year, or nine per cent of her gross national product—the highest European contribution to NATO, both absolutely and proportionately to income. In addition, two-thirds of Britain's research and 15 per cent of her metal-goods production were devoted to defence. Contributions by way of aid and investment toward the development of the under-developed areas were over £140,000,000, and these were a powerful influence in containing Communist advances on the flank.

This "considerable defence effort" had had a "profound effect" on Britain's ability to invest at home and on her power to export. Britain had the lowest rate of internal investment of the NATO countries, and therefore welcomed the directive to the NATO military leaders [see below] which said that a revision of defence planning was required in order to determine how, with the resources likely to be available, each individual member could achieve the most effective pattern of its forces. The size and form of Britain's defence effort had led to almost perpetual balance-of-payments difficulties, which was neither in the interest of Britain nor of the Atlantic Pact and "cannot be allowed to continue." Gross inequalities in defence contributions were liable to damage the prospects of increased economic co-operation in Europe, with which the British Government had said it would be increasingly associated.

Mr. Macmillan referred to the financial and exchange problems inherent in the concept of a long-term alliance under which troops were stationed outside their own country. While Britain had troops in Germany, involving high local costs, Western Germany, the host country, "had for one reason and another a low defence effort."

In conclusion, Mr. Macmillan nevertheless emphasized that Britain intended to continue her large defence programme, although its composition would be affected by the introduction of new weapons, and that she would continue to make her "fair contribution" to NATO, provided that equitable exchange arrangements could be made.

Mr. Head (U.K. Defence Minister) stressed the high cost of new weapons, and suggested that there should be an adjustment towards fewer men equipped with the latest tactical atomic weapons. No country could afford to maintain their present numbers and arm them on the new scales, and within these limitations Britain would continue to provide a powerful contingent for NATO defence.

Dr. von Brentano said that Anglo-German negotiations would start immediately on the financing of British forces stationed in Germany, and expressed the hope that the problems would be resolved in a "friendly and helpful way."

Mr. Dulles shared Mr. Macmillan's view that a review of NATO defence planning was necessary. Retaliatory power was a major deterrent, and the greatest source of that power was in the United States a heavy burden for her, involving the maintainance of bases in foreign countries. The U.S.A. intended to keep its troops in Europe and to respect the spirit of the assurances under which they were there in particular, those made by President Eisenhower in March 1955 [see 14114 A]. Outlining the American defence effort, Mr. Dulles recalled that one-third of the ground forces in Central Europe were American; as regards the future, the U.S.A. was already streamlining its divisions, and there would be further manpower reductions. In this connexion he expressed the hope that the task of providing conventional military manpower would be progressively taken over by the European members of the alliance, and that German rearmament would be an important step in this direction.

The Council also examined a draft political directive which assumed the existence of a fully effective nuclear retaliatory force, and which stressed the need for a review of NATO defence planning to determine how the defence effort of the alliance and of each of its members could achieve the most effective pattern of forces with the resources available. As regards the allocation of total resources, the Governments were asked to take account of the rising cost of new weapons and the need to meet the Soviet threat in all its aspects, without endangering the economic stability of member-countries. The draft directive ended with a warning that the continuing need for money, men, and material for NATO defence remained a real one.

Mr. Dulles on Principles of U.S. Foreign Policy.

At the North Atlantic Council's opening session on Dec. 11, Mr. Dulles criticized the Anglo-French intervention in Egypt and outlined the U.S. policy of supporting the United Nations and opposing the use of force as an instrument of national policy.

Mr. Dulles said that the Western world had to-day its greatest opportunity since the war of seizing the moral leadership of the world and of helping in the liberation of Eastern Europe. Russia's present difficulties in Eastern Europe presented a great opportunity and challenge to NATO to strengthen its unity and co-operation. The internal pressures in Eastern Europe might well bring about the end of Soviet Communism, and with it the end of the division of Europe. Every moral support should be given to the forces in Eastern Europe which were undermining the Soviet system. A further indication of the waning of Soviet influence was the disintegration of the Communist parties of the free world.

This situation, however, had potential dangers, as the Russian leaders might take risks and thus create greater chances of war. In the face of this danger the free nations should maintain their moral pressure, and thus help to undermine the Soviet and Chinese Communist systems.

Mr. Dulles then enunciated seven basic principles underlying U.S foreign policy, as follows:

(1) At the present juncture it was more important than ever before to conform to the ideals of the United Nations and of the NATO treaty, and to ensure that international disputes should be settled by peaceful means. There were admittedly grave injustices in many parts of the world, and in Europe, Asia, and the Middle East there were situations in which nations might be tempted to use force to redress injustice.

(2) The concept could not, however, be accepted that each nation subject to injustice should attempt to remedy that injustice by force. This would unleash forces which might lead to a third World War, particularly by reason of the present predicament and power of the Soviet rulers. In the past the idea of "just" wars had been deeply rooted, even in religious belief, but now there was doubt whether war suppressed more injustice than it created.

(3) Morality and expediency rejected deliberate resort to war as an instrument of national policy. Restraint, exercised often under great provocation, was proof not of cowardice or irresolution but of moral strength, and created a moral climate which stimulated and encouraged the forces which were disrupting the Soviet system. The Anglo-French acceptance of the U.N. resolution calling upon them to withdraw from Suez had been an example of such restraint It was often hard for European and Asian peoples who were subject to serious injustice and danger to accept a "double standard"—to respect as free nations the opinion of mankind, while at the same time the Russians disregarded that opinion The U.S.A. was, however, convinced that this "double standard" would not exist forever.

(4) If the free nations continued to conform to the high standards of conduct prescribed by the U.N. Charter, the U.S.A. believed that the impact of such conduct would become steadily greater, and that the Soviet despotism would be unable to continue in a manner which honest people despised. If this course were pursued with resolution it could be expected to prevail, and the danger of divisions of the world would end. The United Nations had grown greatly in stature during recent weeks; nations had conformed to its recommendations, and the General Assembly had been able to organize an emergency military force at short notice. In the matter of Hungary the U.N. had been disregarded, but Hungary had "forced world attention on the dramatic strength of the captive peoples in the struggle to regain freedom."

(5) The destruction of the U.N. and of the basic principles of its Charter would be a disaster, as it would mean that each nation would follow its liberty to try to remedy injustices by force, rather than to correct them peacefully. This was all the more unacceptable because the peaceful correction of injustices in the free world was now a possibility. A change in the character of the Communist world was also within the realm of possibility.

(6) It was necessary to rely on moral pressures to disrupt the power of Soviet despotism, but at the same time it was most important that NATO strength should be maintained, since the events in Hungary had shattered the illusion that the builders of the Soviet military machine would never think of using it. The principal preventive available to the West against Soviet aggression was nuclear power. This, however, would not solve all military problems, and there must be diversity and flexibility.

(7) So far as the U.S.A. was concerned, the differences of the past needed to be examined only in so far as they would help to construct a wider and more solid policy for the future. That future was full of possibilities and of dangers, but the dangers could be surmounted. At previous NATO meetings nothing had been done to seek a common policy for certain problems, such as the Middle East.

M. Pineau pointed out that Suez was not part of the NATO area. He thought that consultations between members of NATO should be made obligatory and should apply to areas of the world which had yet to be defined but which extended beyond the present NATO responsibilities. In these areas the policy of members of the alliance should be co-ordinated. This did not mean that the Atlantic treaty should be rewritten, or that the NATO area should be extended, but simply that the range of political discussions between members should be enlarged.

Mr. Luns (Netherlands Foreign Minister) strongly criticized the U.S. concept that the United Nations, as at present constituted, was an organization in which much confidence could be placed, while **Mr. Selwyn Lloyd** [details of whose statement were not published] was said to have defended the Anglo-French action in Egypt on the grounds previously stated in the House of Commons.

U.S. Atomic Weapons for European NATO Countries.

Mr. Wilson, the U.S. Secretary of Defence, informed the North Atlantic Council on Dec. 14 that the U.S.A. was prepared to supply non-American NATO forces in Europe with tactical atomic weapons.

The U.S. atomic energy legislation, he explained, prohibited the transfer of nuclear elements, but not their shipment abroad under American control. In the event of a war involving NATO countries, the U.S.A. would immediately make nuclear warheads available for use in the dual-purpose weapons already provided. He stated also

5917181

that the U.S.A. would assist all NATO countries which were themselves able and willing to develop their own modern weapons. The manner and extent to which modern weapons would be incorporated into the NATO forces would be determined in conjunction with the Organization's military authorities, and in the light of what the countries could themselves afford. The ability of the U.S.A. to assist in modernizing the European forces, however, was largely dependent on the willingness and increasing capability of the other NATO countries to provide most of the maintenance and support for their own forces.

Tactical atomic weapons would be supplied to the West German forces, and the German Federal Republic would also undertake the manufacture of such dual-purpose weapons. [Under the Paris Agreements, Western Germany was prohibited from manufacturing atomic weapons and would therefore be unable to make the atomic warheads for the new weapons].

Dr. von Brentano on Principles of NATO Policy towards East European Peoples.

Dr. von Brentano, the West German Foreign Minister, made a statement to the Council on Dec. 13 on the situation in Eastern Europe and its possible effects on Eastern Germany.

He said that the peoples of the countries in Eastern Europe which were under Soviet domination had a right to know the position taken by the free world in regard to their struggle for freedom. But the whole question of the satellite States should be treated with "great caution," and care should be taken in particular not to encourage "dramatic action" by the peoples of Eastern Europe which might have disastrous consequences for them.

Dr. von Brentano then presented a draft statement suggesting the following points as a basis for a NATO declaration:

(1) All peace-loving peoples should support the right of the nations of Eastern Europe to self-determination and self-government in full freedom.

(2) The political order in the countries of Eastern Europe should be based on national independence, sovereignty, and the banning of any imperialistic subjugation of small nations.

(3) All nations in Eastern Europe should have the right to decide for themselves, and in full freedom, on the social order in their territories.

(4) The internal development of the countries of Eastern Europe should not be influenced by military force or threats, or by economic and political pressure.

(5) The human rights of the populations of the countries of Eastern Europe should be inviolable.

The draft statement was referred to the committee which drew up the final statement issued at the conclusion of the North Atlantic Council's meeting.

Inter-Ministerial Discussions.

Mr. Dulles, the U.S. Secretary of State, had separate meetings on Dec. 10 with Mr. Selwyn Lloyd, the U.K. Foreign Secretary, and M. Pineau, the French Foreign Minister. It was reported in the Press that they had discussed the problems of reopening the Suez Canal and ensuring that it would remain open at all times to the shipping of all countries without discrimination, as well as the prospects for a meeting with the Egyptian Government to discuss this longer-term aspect. Contrary to the practice at previous Council sessions, however, no joint private discussions between the three Foreign Ministers took place on this occasion.

On the following day Mr. Dulles had a further meeting with Mr. Selwyn Lloyd, which was also attended on the British side by Mr. Macmillan (Chancellor of the Exchequer), Mr. Head (Minister of Defence), and Marshal of the R.A.F. Sir William Dickson (Chairman of the Chiefs of Staff Committee), and on the American side by Mr. Humphrey (Secretary of the Treasury) Mr. Wilson (Secretary of Defence), and Admiral Radford (Chairman of the Joint Chiefs of Staff).

A communiqué stated that they had "discussed principally military affairs which will come up later during the week in NATO," and that "the discussion as a whole was limited to NATO matters." It was officially stated that neither the Middle East crisis nor U.S. financial aid to Britain had been discussed.

Mr. Dulles had further talks on Dec. 14 about reopening the Suez Canal, again having separate meetings with Mr. Selwyn Lloyd and M. Pineau. Hr. Bartels, the Administrator of the Suez Canal Users' Association, also had meetings in Paris on the same day with Mr. Dulles and Mr. Selwyn Lloyd.

It was reported in the Press that, as a result of Mr. Dulles's meetings with the British and French Foreign Ministers during the North Atlantic Council session, the U.S.A. was firmly pledged to the reopening of the Suez Canal by the quickest possible means available, without regard to political considerations.

On Dec. 12 Mr. Selwyn Lloyd, Mr. Macmillan, and Mr. Head had a private meeting with the West German Foreign, Defence, and Finance Ministers (Dr. von Brentano, Herr Preuss, and Dr. Schäffer respectively). A communiqué said:

"The principal topics of discussion were those of military co-operation during the build-up of the new German Army and the financial questions arising out of the continued stationing of British troops in Germany [i.e. the question of support costs]. There was general agreement on the principles governing co-operation in these fields, and arrangements were initiated to reinforce the machinery already existing for dealing with the various problems."

The German "Support Costs" Question.

Under the Financial Convention which formed part of the London and Paris Agreements, Western Germany agreed to pay a total of 3,200,000,000 DM. on a sliding scale as support costs for the 12-month period after the Federal Republic had achieved sovereignty [this period ended on May 5, 1956]. As regards the period after that date, Article 4 of the convention provided that the Federal Government would "negotiate with other member-Governments of the NATO who have forces stationed in the Federal territory in respect of questions relating to the support [e.g. goods and services] of those forces, having regard to the requirements of the forces of the Federal Republic."

Basing themselves on Articles 2 and 4 of the Convention, the British, French, and U.S. Governments officially requested the Federal Government, in *aides-mémoires* delivered in January 1956, to continue its contributions towards the cost of stationing U.K., French and American forces in Germany after the expiry of the agreement for 1955-56.

When this matter was first discussed at the North Atlantic Council meeting in Paris in December 1955, the Federal Minister of Finance (Dr Schäffer) refused to make any further payments, maintaining (*a*) that continued payment of support costs by the Federal Republic would completely upset his defence budget; (*b*) that Article 4 of the Finance Convention had limited any further support to goods and services; and (*c*) that the British, French, and U.S. request constituted a "discrimination" against Western Germany, compared with the arrangements for financing Allied troops stationed in other Allied countries -e.g. the U.S. forces in Britain and France.

Against this, the British, French, and U.S. Governments maintained that Western Germany herself was far behind with the setting-up of her armed forces, could therefore not yet make the contribution envisaged to the defence of NATO, and was only spending a small proportion of the amounts which she had set aside for defence expenditure. The Western Powers also maintained that Article 4 of the Finance Convention did not exclude cash contributions, and refuted the argument that neither Britain nor France made any such contributions to the cost of maintaining U.S. forces in those countries. In this connexion they based their request for a German contribution on Article 3 of the North Atlantic Treaty, which lays down that the members of NATO shall "separately and jointly, by means of continued and effective self-help and mutual aid, maintain and develop their individual and collective capacity to resist armed attack."

Although a spokesman of the Federal Ministry of Finance reiterated on Feb. 6, 1956, that German payments towards the cost of British, French, and U.S. forces stationed in the Federal Republic would cease on May 5, 1956, and that no further payments would be made, Dr. von Brentano informed the three Western Governments on Feb. 22, 1956, that the Federal Government was prepared to negotiate on the question. The negotiations, which started in Bonn on March 1 and included a personal visit to London by Dr. von Brentano from April 30 - May 2, only ended in June 1956, being particularly protracted and difficult in the case of Britain and France. The following table shows the amounts of support costs eventually agreed with the Western Allies for 1956-57 in respect of their forces stationed on Federal territory, the equivalent in sterling, and the date on which the individual agreements were concluded:

	DM.		£	Date
U.S.A.	650,000,000	approx.	55,000,000*	June 7
Britain ..	400,000,000	"	33,000,000	June 29
France ..	278,000,000	"	23,000,000	June 29
Denmark ..	2,275,000	"	190,000	July 6
Netherlands ..	773,000	"	65,000	July 10
Belgium ..	118,000,000	"	10,000,000	July 20
Canada ..	6,585,000†	"	550,000	July 20

*$154,760,000. †"Once-for-all" contribution in connexion with the enlargement of military installations in Western Germany at present being used by the Royal Canadian Air Force.

Altogether Western Germany thus undertook to pay in cash a total of 1,455,633,000 DM., or about £121,000,000, to the seven Allied countries, as compared with the original Allied request for the payment of 2,400,000,000 DM. (£200,000,000). In addition, it was stated that the Federal Republic would pay about 600,000,000 DM. for certain services provided for the Allied forces, including electricity, gas, transport, etc.

The British decision to accept a German contribution equivalent to only about £34,000,000 was announced by Sir Walter Monckton, then Minister of Defence, who told the House of Commons on June 29, 1956, that the agreement had

been reached "after prolonged and difficult negotiations in Bonn," and that the German contribution fell short by some £30,000,000 of Britain's local costs in Germany. It also fell short of the amount of £50,000,000 included in the 1956-57 Service Estimates, which was the annual rate of support prevailing before May 6, 1956. "In all the circumstances," however, H.M. Government had "felt it necessary to accept this offer." The agreement was strongly criticized in the ensuing debate.

Mr. Gaitskell (Leader of the Opposition), said that the announcement would be received "with great regret in all parts of the House." He asked whether, in view of the difference between the £50,000,000 allowed for in the Service Estimates and the £34,000,000 agreed upon, the balance would have to be paid in gold under the E.P.U. agreement, and what future arrangements were likely to be. **Sir Walter Monckton** replied that the right to negotiate for the future, had been kept open, and confirmed that a large proportion of the deficiency as compared with the original estimate would have to be paid in gold.

In reply to **Lieut.-Cdr. Maydon** (C.), who asked about the possibility of German arms purchases in Britain, **Sir Walter Monckton** said there had been discussions about the possibility of the Federal Government meeting certain of their armament requirements from Britain, and that H.M. Government had "reason to believe that as a result substantial orders will be placed here."

When **Mr. Clement Davies** (Liberal) asked the Minister to explain what circumstances had led to the acceptance of the German offer, **Sir Walter Monckton** replied that the Government had felt it right to press for the larger figure, particularly in view of the relative size of the British and German defence burdens in 1956-57, but that in the end they had accepted the settlement "in the interests of European solidarity."

Lord Hinchingbrooke (C.) said that it was "deplorable" that the British bargaining position had been so weak, and asked whether the German attitude did not call in question the whole spirit of the Western European Union agreements. He also asked whether Britain could now afford to keep four of her best divisions in Germany.

Mr. Harold Wilson (Lab.) reminded the Minister that the U.S. Government, in contrast to the British attitude, had pressed for £54,000,000 and got it, and that the French had pressed for £22,000,000 and would receive £23,000,000. **Sir Walter Monckton**, in reply, pointed out that economies already achieved in respect of the British forces in Germany would account for a saving of £6,000,000, and promised that "we shall go on doing that."

In Bonn, Dr. von Brentano spoke on the question of German support costs during a foreign policy statement in the *Bundestag* on June 28, 1956.

Dr. von Brentano said that the Federal Government had not been able to reject the request of some Governments for a German contribution to the stationing of their troops on Federal territory, since these contingents guaranteed the security of the Federal Republic. Moreover, there were undoubtedly mutual rights and duties arising from Germany's contractual relations with the Western Allies. It was wrong to talk of discrimination against Germany, as it could not seriously be denied that the protection and defence of the Federal Republic was for the time being entirely undertaken by foreign forces a position which could not be compared with that of other Western countries. The Federal Government, however, had made it quite clear that the agreements concluded should not be regarded as a precedent for future negotiations. Nevertheless it had not insisted on any formal pledge by the Allies that they should renounce any future "support cost" claims, for two reasons: (1) it would have necessitated a similar German renunciation, and (2) any such renunciation amongst the Allies would have destroyed the basis of the alliance and would have deprived the Federal Government "for all time" of the possibility of itself asking for material or financial aid. The Federal Government, however, had put it beyond doubt that it regarded the payments now agreed as the last such contribution.

Dr. von Brentano's statement was regarded as an official reply to the attitude of Dr. Schäffer, who had maintained his view that no further support costs should be paid.

The Social Democratic Opposition in the *Bundestag* had announced on June 15 that it would reject the payment of any support costs to the Western Powers and would oppose all such agreements in Parliament.

It was, however, made known in Bonn on Nov. 22, 1956, that the Western allies would request Germany to continue to pay support costs after the expiration of the present agreement in May 1957, and that the matter would be raised at the forthcoming North Atlantic Council meeting.

The main reasons given in the British, French and U.S. press were the West German failure to make an adequate contribution to NATO defence, and the mounting unspent expenditure on the Federal Government's Defence Vote. In this connexion it was pointed out that the Federal Government had already announced that it would be able to raise only 120,000 men in 1957, instead of the 270,000 promised. The unspent surplus on the Defence Vote in 1956-57 was estimated at 2,200,000,000 DM., whilst it was anticipated that of the 1957-58 Vote of 9,000,000,000 DM., only 7,500,000,000 DM. would be spent.

Moreover, it was recalled that during the negotiations for the current agreement Dr. Schäffer had repeatedly emphasized that large arms orders would be placed in Allied countries, especially in Britain, as a partial compensation for the cost of maintaining Allied forces in Western Germany. This promise had not been fulfilled, however, and only small orders had been placed in Britain so far. As regards the future, Herr Strauss (the new Defence Minister) had recently announced that no heavy arms purchases (e.g. tanks) would be made abroad before April 1958, and that the new German forces would meanwhile be supplied entirely with free arms deliveries from the United States.

In reply to the Allied request, it was announced in Bonn on Dec. 12, 1956, that no funds would be available for the payment of support costs for NATO forces in the coming financial year, and that the whole of the estimated defence expenditure of 9,000,000,000 DM. would be earmarked for the new German armed forces.—(NATO Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Die Welt, Hamburg - New York Times - New York Herald Tribune) **(Prev. rep. NATO, 15094 A; 14861 A; Finance Convention on Support Costs, 13869 A.)**

A. NEW ZEALAND. — Lord Cobham appointed Governor-General. - Appointment of New U.K. High Commissioner in Wellington.

It was announced from Buckingham Palace on Jan. 2 that the Queen had approved the appointment of Lord Cobham (47) as Governor-General of New Zealand in succession to Lieut.-General Sir Willoughby Norrie.

Lord Cobham (formerly the Hon. Charles Lyttelton) is a member of a family which has been closely associated with New Zealand for more than a century. His grandfather played an important part in the founding of Canterbury Province and the city of Christchurch, and gave his name to the port of Lyttelton.

The new Governor-General comes of a line of famous cricketers—the Lytteltons of Worcestershire—and was vice-captain of the M.C.C. team which toured New Zealand in 1935-36. He was captain of Worcestershire C.C.C. from 1936-39, and president of the M.C.C.—a position which his father and grandfather also held—in 1956. He became the tenth Viscount Cobham in 1949, on the death of his father.

On Dec. 13, 1956, it had been announced that Mr. George Mallaby (54), of the University Grants Committee, would become U.K. High Commissioner in New Zealand in succession to General Sir Geoffrey Scoones, retiring. Mr. Mallaby, Headmaster of St. Bees School (Cumberland) from 1935-38, joined the military secretariat of the War Cabinet in 1942, and subsequently served in the Ministry of Defence as secretary-general of the defence organization set up under the Brussels Treaty. He became deputy secretary to the University Grants Committee in 1955.—(N.Z. High Commissioner's Office, London) **(Prev. rep. 12072 C; 12670 A.)**

B. AVIATION. — World Air Traffic in 1956.

Figures of air traffic published by the International Civil Aviation Organization (ICAO) on Dec. 28, 1956, showed that the number of passengers carried by international and domestic scheduled airline companies during 1956 had reached the record total of 78,000,000, an increase of 15 per cent over the previous record of 68,000,000 in 1955. Cargo carried also reached a record figure of 1,030,000,000 ton-miles in 1956, against 907,000,000 in 1955 and 760,000,000 in 1954. Comparative figures for the years 1954-56 are given below:

	Miles flown	Passengers carried	Passenger miles	Cargo ton-miles	Mail ton-miles
		(all figures represent millions)			
1954	1,290	58	33,000	770	230
1955	1,440	68	39,000	910	260
1956	1,630	78	45,000	1,030	280

In issuing these figures, Dr. Edward Warner (president of the ICAO Council) predicted that the world's airlines would be carrying 100,000,000 passengers annually by 1958.

It was announced on Dec. 13, 1956, that Morocco had become a member of the I.C.A.O., bringing the Organization's membership up to 70.—(International Civil Aviation Organization) **(Prev. rep. 15122 A.)**

C. DIAMONDS. — World Sales in 1956.

Sales of rough diamonds effected through the Central Selling Organization on behalf of South African and other producers reached the record figure of £74,546,010 in 1956, of which £50,542,240 came from the sale of gems and £24,003,770 from the sale of industrial diamonds. Total diamond sales in 1955 amounted to £74,288,695. The Central Selling Organization handles an estimated 95 per cent of world diamond production. (Financial Times) **(Prev. rep. 14629 D.)**

A. NORTHERN IRELAND - IRISH REPUBLIC. — Widespread I.R.A. Terrorist Activities in Northern Ireland. - Emergency Measures by N.I. Government. - Special Powers to combat Terrorism. - Statements by Sir Anthony Eden, Lord Brookeborough and Mr. Topping. - Eire Government Action against Terrorists.

The biggest and most widespread raids carried out by terrorists of the Irish Republican Army since the early 1920's occurred in Northern Ireland in the early hours of Dec. 12, involving 11 separate incidents in five of the six counties. Apart from a deep penetration into Northern Irish territory near Torr Head, on the north coast of County Antrim, nearly all the raids took place near the border between Northern Ireland and the Irish Republic. Two members of the Royal Ulster Constabulary were injured in gun battles, and damage amounting to over £80,000 was caused by attacks on military barracks, police stations, bridges, and the B.B.C. radio station at Londonderry. It was believed that about 100 terrorists took part in the raids, the men being armed with sub-machine guns, Sten guns, carbines, revolvers, and home-made bombs. Five arrests were made.

The incidents occurring on Dec. 12 are listed below:

(1) About 20 raiders attacked a police patrol near Torr Head, in the vicinity of an R.A.F radar station. They made off after an exchange of fire, abandoning a lorry in which the police found a sub-machine gun and a quantity of ammunition. Three of the raiders were arrested, all of whom gave addresses in County Cork.

(2) Extensive damage—estimated at over £20,000—was caused by a bomb explosion at the B.B.C. station at Londonderry, the control room being wrecked and the building suffering severe structural damage. Hundreds of windows were smashed in the surrounding area by the violence of the explosion. There were no casualties, the radio station being unoccupied at the time.

(3) A lorry-load of terrorists attacked the Gough Barracks at Armagh, the regimental headquarters of the Royal Irish Fusiliers. Petrol bombs were thrown at the building and fire exchanged with the sentries before the raiders made off, no casualties occurring. After the raid an unexploded heavy bomb or land-mine was found beside the wall of the barracks.

(4) Twelve terrorists dressed in police uniforms broke into the courthouse at Magherafelt (Co. Londonderry), removed the caretaker and his wife, and set fire to the building by sprinkling petrol on the floors. The fire was subsequently brought under control after the raiders had escaped, but the building was severely damaged.

(5) Two constables on night duty intercepted a lorry-load of terrorists on a road in County Armagh, the raiders making off after an exchange of fire. One of the policemen was wounded and taken to hospital.

(6) In Armagh City, a police patrol foiled an attempt by terrorists to wreck communications at the telephone exchange. Two of the raiders were captured after an exchange of fire in which a policeman was injured. The arrested men gave addresses in County Armagh.

(7) Damage estimated at £30,000 was caused at Enniskillen (Co. Fermanagh) by the blowing-up of a Territorial Army building which was in course of construction. The building was practically destroyed, but there were no casualties. Shortly before the raid 300 lb. of gelignite had been stolen from a quarry near Enniskillen.

(8) A Special Constabulary hut was burned down near Newry (Co. Down), no-one being injured.

(9)-(11) Bridges were damaged by bomb explosions near Newtown Butler (Co. Fermanagh), at Innismore Island, Lough Erne (Co. Fermanagh), and at Toomebridge (Co. Antrim). The Toomebridge attack temporarily put out of action the main telephone lines between Magherafelt and Belfast.

In addition to the above-mentioned incidents, an unexploded time-bomb was found on the following day at Belfast docks, which were temporarily cordoned off.

Further incidents occurred during the last fortnight of December and at the beginning of January, in which a policeman of the Royal Ulster Constabulary and two terrorists were killed.

On Dec. 14 armed terrorists attacked the police stations at Lisnaskea and Derrylin (Co. Fermanagh) and cut telephone lines in the area; several policemen received slight injuries before the terrorists—some of whom were believed seriously wounded—broke off the attack. On Dec. 17 another terrorist group ambushed a police car near Lisnaskea, close to the home of Lord Brookeborough (Prime Minister of Northern Ireland), a policeman being wounded by machine-gun fire and taken to hospital. Two police stations in County Londonderry (at Dungiven and Swatragh) were attacked with machine-guns and small arms in the early hours of Dec. 23, the raiders making off after exchanges of fire. No casualties were suffered by R.U.C. personnel.

A further night attack on the Derrylin police station was made on Dec. 30, the front door being shattered by a bomb and raiders attacking the building with small-arms fire. Constable John Scally, of the R.U.C., was killed during the engagement, which the raiders broke off after police reinforcements had been rushed to the area. On the same day police and tracker dogs captured three armed terrorists in a disused house at Dunnamore (Co. Tyrone), two of the men giving addresses in County Cork and the other an address in County Armagh. Seven rifles, three Sten guns, two Bren guns, and a quantity of ammunition were found in the house.

About 20 terrorists—two of whom were killed - attacked a police station at Brookeborough (Co. Fermanagh) on Jan. 1 with machine-guns and small arms. The police returned the fire and the terrorists broke off the attack, apparently fleeing across the border into Eire. The bodies of two of the terrorists both of whom had been severely wounded—were discovered in an unused house during subsequent police searches of the area, together with an abandoned lorry bearing the marks of bloodstains. There were no police casualties.

Anti-Terrorist Measures in Northern Ireland. - Reinforcement of Northern Irish Border. - Special Powers to curb Terrorism.

As a result of the wave of terrorism, the N.I. Ministry of Home Affairs issued an Order on Dec. 14, under the Civil Authorities (Special Powers) Act, providing for the arrest without warrant of any person suspected of acting, or having acted, in a manner prejudicial to the preservation of peace or the maintenance of order. [The Order, which came into immediate effect, was on the lines of the emergency regulations abolished in 1949 but re-introduced in 1950-51]. On Dec. 21 the Minister of Home Affairs, Mr. Topping, issued a number of other regulations under the Special Powers Act to check terrorism, as described below:

(1) The civil authorities were empowered to impose a curfew in specified areas should necessity arise.

(2) Persons entering Northern Ireland from outside the United Kingdom would be required to satisfy the police, if asked to do so, as to their reasons for being in the area.

(3) Publication of information about the movements, numbers, and disposition of the police forces was prohibited.

(4) It was made an offence (*a*) to interfere or tamper with telephonic and telegraphic communications; (*b*) to be in possession of secret cyphers or codes for the purpose of communicating information which might be prejudicial to the preservation of peace or maintenance of order; (*c*) to cause any damage to roads, bridges, police stations, and public buildings; (*d*) to be in unauthorized possession of firearms or other offensive weapons.

(5) Any person, if required by the police or a member of H.M. Forces, would have to produce any information, article, document, etc., which the civil authorities considered it necessary to obtain and examine.

(6) The Minister was given powers to order the immobilization of vehicles within any specified area.

Following conferences between Lord Brookeborough, Sir Richard Pim (Inspector-General of the Royal Ulster Constabulary), and General Sir Brian Kimmins (G.O.C., Northern Ireland), units of the British Army were sent to the border to reinforce the Royal Ulster Constabulary and to assist the civilian authorities in combating terrorist activities and checking the infiltration of terrorists from the Irish Republic. A company of the Royal Warwickshire Regiment was sent to Enniskillen and a detachment of the Royal Northumberland Fusiliers to Armagh, while units of the Royal Air Force Regiment were flown from Britain to safeguard R.A.F. stations and installations in Northern Ireland.

Under an Order signed by Mr. Topping on Dec. 21, the Royal Ulster Constabulary and British troops carried out extensive demolitions on subsequent days on many minor roads and unfrequented lanes crossing the frontier, with the object of making these routes difficult or impassable for terrorists attempting to enter Northern Ireland. Bridges were blown up, trenches dug, obstructions erected, and roads made impassable by explosive charges in many border areas of Counties Fermanagh and Armagh.

Thirty-two suspects—including, it was understood, a number of prominent Sinn Feiners—were arrested by the police on Dec. 22 in Londonderry, Counties Tyrone and Armagh, and nationalist areas of Belfast, and interned in Belfast goal. Four were subsequently released after two Nationalist M.P.s in the N.I. Parliament (Mr. McAteer and Mr. Gormley) had interceded with Mr. Topping on their behalf, leaving 28 in custody. On Dec. 29 Mr. Topping issued Orders under the Special Powers Act outlawing the two Republican political parties—Sinn Fein and *Fianna Uladh*—and banning the Sinn Fein publication *Glor Uladh*. [The *Fianna Uladh* ("Warriors of Ulster") is an extremist Republican organization connected with the militant *Saor Uladh*, which attacked the police station at Roslea (Co. Fermanagh) in November 1955 —see 14596 A.]

The three terrorists (W. P. Gough, J. J. Linehan, and A. Cooney) arrested during the raid at Torr Head appeared at Ballymoney (Co.Antrim) court on Dec. 19, charged with shooting at a police constable with intent to murder him. On the same day the two terrorists (J. O. Smith and J. Henston) arrested in Armagh appeared

before the magistrates in that city, charged with wounding a police constable with intent to murder. The five men—all of whom described themselves as "soldiers of the Irish Republic," and who refused to recognize the jurisdiction of the courts—were remanded in custody.

Statements by Sir Anthony Eden and Lord Brookeborough.

A statement on the terrorist outbreaks in Northern Ireland was made to the British House of Commons on Dec. 19 by Sir Anthony Eden.

After expressing the sympathy of H.M. Government for the people of Northern Ireland "in face of the recent outbreaks of violence to which they have been exposed," and paying tribute to "the courage and resource of the Royal Ulster Constabulary and the Special Constabulary, who have borne the brunt of these attacks," the Prime Minister continued:

"Immediately after the outbreak of violence on Dec. 12, H.M. Ambassador in Dublin [Sir Alexander Clutterbuck] arranged to see the Republican Minister of External Affairs to obtain further information from him, and to express the serious view which H.M. Government would be bound to take of these events. On Dec. 14 the Republican Government issued a statement [see below] on their own initiative, in which they said that they had determined to take, in conjunction with the police and defence forces of the Republic, such steps as they deemed necessary and appropriate to prevent activities which, if allowed to continue, would inevitably cause loss of life.

"In the light of this, H.M. Government decided to direct the Ambassador to deliver a communication expressing their very great concern at the incidents in Northern Ireland, and the hope that the important objective which the Republican Government had proclaimed in their statement would be effectively and successfully secured.

"In the Ireland Act, 1949, the Parliament at Westminster declared Northern Ireland to be an integral part of the United Kingdom. This is a declaration which all parties in this House are pledged to support. The safety of Northern Ireland and of its inhabitants is therefore a direct responsibility of H.M. Government, which they will of course discharge."

Sir Anthony Eden's declaration was warmly welcomed by Lord Brookeborough and Mr. Topping, both of whom had previously issued statements emphasizing that all necessary measures would be taken to combat and suppress terrorist activities. In a statement to the N.I. Parliament on Dec. 18, Lord Brookeborough announced that he had received a telephone message from Sir Anthony Eden assuring him that "the defence of Northern Ireland is just as dear to the hearts of H.M. Government at Westminster as that of any other part of the United Kingdom."

In a televised interview in London on Dec. 17, Lord Brookeborough had pointed out that the I.R.A., "the militant side of Sinn Fein," had been banned in both Northern and Southern Ireland, and gave an assurance that the people of Ulster would not give way before a body of men who sought to accomplish their ends "by murder and threats." He emphasized that the people of Northern Ireland were "Queen's men," that "nothing whatsoever is going to shift us from this position," and that Ulster, while desiring good-neighbourly relations with the Irish Republic on the same lines as existed between Canada and the United States, was just as much part of the United Kingdom as "Sussex, Devon, Yorkshire, or any county in Scotland or Wales."

Mr. Topping also made a statement to the N.I. Parliament on Dec. 18 in which he stressed that the N.I. Government was "absolutely determined to put an end to these outrages, and to use all the forces and powers at its disposal to achieve this objective." After calling upon the Republican authorities in Dublin to "eradicate at their source" the organizations responsible for the outrages, Mr. Topping declared: "Every bullet fired, every bomb thrown, every act of violence which takes place, hammers home another nail in the coffin of Republican hopes. It is astonishing that those who are responsible for these acts have not yet learned that bullets cannot shoot beliefs. We believe in Britain and the British way of life. We are British, and British we will remain."

In a further statement on Dec. 31, Mr. Topping said that the murder of Constable Scally at Derrylin (see above) was "the inevitable outcome of the kind of outrages which have been taking place during the last few years . . . So long as the raiders are permitted to organize in the Republic and to retire there when they flee, the main responsibility must rest with the Government of the Republic."

Prior to Sir Anthony Eden's declaration, a deputation of Ulster Unionist M.P.s at Westminster, headed by Sir David Campbell, had had two meetings with the British Home Secretary (Major Lloyd-George) to express their concern and anxiety at the renewed outbreaks of I.R.A. terrorism, and to ask that H.M. Government should use all its influence to get the Republican Government to take "more stringent measures" against the terrorist organizations. The deputation also pointed out that a continuance of terrorist attacks might endanger the plans to attract industries to Northern Ireland, and might thus have adverse economic effects in the area. Four Ulster Unionist M.P.s at Westminster—Mr. Phelim O'Neill, Mrs. Patricia McLaughlin, Mr. R. W. Armstrong, and Mr. R. Chichester-Constable—visited Belfast on Dec. 15 to discuss the situation with Lord Brookeborough and other members of the N.I. Government.

Statement by Irish Republican Government. - Army and Police Measures to combat Terrorism.

Following a six-hour Cabinet meeting in Dublin, the Government of the Irish Republic announced on Dec. 14 that it would take measures, in conjunction with the Civic Guard and the Defence Forces, to prevent illegal armed activities which, if continued, "would inevitably cause loss of life and involve the danger that civil war might ensue." The announcement was worded as follows:

"In the statement which he made on Nov. 30, 1955 [see 14596 A], the *Taoiseach* [Mr. Costello, the Prime Minister] pointed out that the right to raise and maintain military or armed forces is vested, by the Constitution, exclusively in the *Oireachtas* [Parliament], and that the Constitution expressly forbids the raising or maintaining . . . of any military or armed force other than the forces raised and maintained by the *Oireachtas*. He stated that unlawful military activities are a challenge of the gravest kind to the democratic rights of the Irish people and to the rightful authority of the *Oireachtas* and the Government, and that the duty of ending such activities devolved upon the whole nation.

"In concluding his statement, the *Taoiseach* said that if his appeal to the members of the organizations concerned met with no response, it would be the clear duty of the Government to assert and vindicate the people's right to determine national policy, and the right of the *Oireachtas* and the Government to maintain and uphold the authority that reposes in them.

"For some time it appeared that the *Taoiseach's* appeal and warning had been heeded by the organizations concerned. Since, however, that is evidently no longer the position, and since those organizations have again arrogated themselves powers and functions that belong to the duly elected representatives of the people, and to those representatives alone, the Government have determined to take, in conjunction with the *Garda Siochana* (Civic Guard) and the Defence Forces, such steps as they deem necessary and appropriate to prevent activities which, if they were allowed to continue, would inevitably cause loss of life and involve the danger that civil war might ensue."

In conformity with the Government's statement, detachments of the armed forces and the Civic Guard were moved to border areas in Counties Monaghan, Louth, and Cavan, and widespread searches made for suspected terrorists. On Dec. 19 eight young men were arrested in a raid on a disused cottage at Dungooley (Co. Louth), near the Armagh border, where Eire troops and police found four rifles, two sub-machine guns, an automatic pistol, and hand grenades. The eight men concerned, who described themselves as members of the "Irish resistance movement," were taken to Dublin and were each sentenced to six months imprisonment on Dec. 31 for possessing firearms without a licence. On the same day (Dec. 21) a force of 100 Eire troops and police arrested seven suspected persons in County Cavan, close to the Fermanagh border and only a mile or two from the R.U.C. barracks at Derrylin.

Two statements had been issued in Dublin on Dec. 18 by the "I.R.A. Army Council" admitting responsibility for the attacks carried out in Northern Ireland on the previous day, and declaring that "Irishmen have risen again in armed revolt against British aggression in Ireland."

Mr. Costello on the Partition Question.

The following statement by Mr. Costello was issued by the Government Information Bureau in Dublin on Dec. 28, in reply to Sir Anthony Eden's statement of Dec. 19:

". . . Sir Anthony Eden's references to the Ireland Act, 1949, are particularly regrettable . . . The claim that the Six Counties are an integral part of the United Kingdom is one that could never in any circumstances be accepted by an Irish Government . . . The Six Counties are part of the national territory of Ireland, and it is obvious that the evils attendant on partition can be eradicated only by the removal of their basic cause—that is, by the restoration of the territorial unity of Ireland, in accordance with the desire of the great majority of the people of this island . . ."

In a Christmas Eve sermon in St. Patrick's Cathedral, Armagh, Cardinal d'Alton (Archbishop of Armagh and Primate of All Ireland) recalled that the Irish Hierarchy had "clearly and definitely" condemned the use of unauthorized armed force (see 14645 A). "Though the injustice of partition should be manifest to all," the Archbishop declared, "I wish to remind our young men that acts of violence will not advance the cause they have at heart."—(Belfast Telegraph - Irish Times, Dublin)

A. UNITED KINGDOM. — The Rent Bill. - Proposals for Progressive Abolition of Rent Control. - House of Commons Second Reading.

The House of Commons gave a second reading on Nov. 21-22 to the Rent Bill, implementing the Government's proposals for the progressive abolition of rent control as forecast in the Speech from the Throne (see 15199 A). The Bill provided that over half of the 11,500,000 houses in Great Britain affected by rent restriction legislation would be freed from control, while most of the rent limits of the houses remaining subject to control (nearly 5,000,000) would be raised to twice the gross rateable value. Its provisions are summarized below:

(1) About 4,750,000 owner-occupied houses which, if let unfurnished, would at present be subject to rent restriction, would be freed from control.

(2) Other rent-controlled houses, now let to tenants, would be freed from control as soon as they became vacant.

(3) The limits of rateable value below which the Rent Acts operated would be reduced from £100 to £40 in the London Metropolitan Police district, from £75 to £30 in the rest of England and Wales, and from £90 to £45 in Scotland.

[It was estimated that about 800,000 houses now let at controlled rents would be freed by this provision, including 190,000 in the Metropolitan Police district, 560,000 in other parts of England and Wales, and 60,000 in Scotland.]

(4) The Minister of Housing and Local Government might from time to time make Orders decontrolling further categories of rent-controlled houses.

(5) The existing procedure by which rent tribunals fixed rents for houses let furnished would cease to apply to any house which, if let unfurnished, would be outside the scope of the Rent Acts.

(6) Decontrol would not apply to (*a*) houses of which the landlord had gained vacant possession as a result of statutory action to reduce overcrowding; (*b*) houses subject to a statutory tenancy created at the end of a long lease by the Landlord and Tenant Act. No increase in rent would be permitted for houses in slum-clearance areas.

(7) The provisions of the Bill would not come into force until one month after its enactment. Thereafter, landlords of decontrolled property would be obliged to give six months' notice of an increase in rent or of ending the tenancy. [When that time-limit has expired, landlords will thus be free to get as much rent as they can for their property.]

(8) For houses in England and Wales remaining controlled, the new rent limits (excluding rates and service charges) would be as follows: (*a*) in the normal case where the landlord was responsible for all repairs except interior decorations, twice the gross rateable value; (*b*) in cases where the landlord was not responsible for any repairs at all, 1½ times the gross rateable value; (*c*) where the landlord was responsible for interior decorations as well as all other repairs, 2½ times the gross rateable value.

(9) Landlords would be required to give three months' notice of rent increases; these increases would be limited to 7s. 6d. weekly, for six months after the notices had expired, and the new rent ceilings would come into force only afterwards.

[It was pointed out in the Press that since, for administrative reasons, the Bill would not come into operation for a month after it had received the Royal Assent, the total permitted increase in rents would not be imposed until 10 months after its enactment. It was estimated that the average total increase might be rather less than 10s. weekly.]

(10) In England and Wales the new rent limits would be reduced where houses had fallen into disrepair, and tenants would be protected against rent increases unless (*a*) their houses were in good repair, or (*b*) the landlords agreed to make them so.

A tenant receiving a demand for an increase in rent would be entitled to serve a notice on the landlord specifying repairs which he considered necessary and asking that they should be carried out. If, after giving an undertaking to do so, the landlord failed to complete the repairs within six months, any rent increase which might meanwhile have taken effect would be suspended until the repairs had been completed. In addition, the tenant would be entitled to make deductions from the rent until the extra amount charged had been refunded or the repairs had been completed.

(11) If the landlord and tenant failed to agree as to what repairs were necessary, the tenant might apply to the local authority for a "certificate of disrepair." The issue of such a certificate (if it had been applied for within six months of a demand for increased rent) would have the effect of suspending the rent increase until the repairs were completed, or, if the increase had already come into operation, of annulling it with retrospective effect.

A certificate of disrepair might be annulled in whole or part by the County Court.

(12) The decontrol provisions of the Bill would apply to Scotland as well as to England and Wales. [It was explained in the Press that the new rent limits for Scotland differed from those for the rest of Great Britain because the new valuations which would be used as a basis for rent structure would not be ready until 1961.]

The debate was opened by Mr. Enoch Powell (Parliamentary Secretary, Ministry of Housing and Local Government), who moved the second reading of the Bill.

Mr. Powell said that between December 1954 and the coming into force of the Bill in December, 1957, there would have been a net addition of about 750,000 homes throughout Britain, and housing demand and supply would have come "within sight of balancing." Rent control would therefore have outlived its usefulness, whilst the evils to which it gave rise would have become even more apparent. These evils included: (1) a great waste of accommodation, since there was often no relationship between the size of a house and its rent, and therefore no inducement to small families to seek smaller houses; (2) a lack of inducement to sublet unwanted accommodation, since the person letting would have to reckon with his sub-tenant becoming a protected person; (3) a constant erosion of the stock of houses available for letting, because owners at present tended to put their houses up for sale whenever protected tenants vacated them; (4) the restriction of the natural movement of the population, since a tenant vacating a controlled house could not be sure of getting other accommodation; (5) landlords' inability at controlled rents to keep their houses in repair; (6) the injustice caused when tenants of identical properties frequently paid different rents owing to rent control vagaries.

All parties were therefore agreed (Mr. Powell continued) that rent control must gradually be abolished, and the difference between the Government and the Opposition lay mainly in the method by which this was to be done. Any form of decontrol was bound to cause a substantial rise in the general rent level, since at the present time, when both building costs and average earnings were about 3½ times their 1939 levels, controlled rents were completely out of line with current values.

Dealing with the provisions of the Bill in detail, Mr. Powell claimed that the decontrol of owner-occupied houses would make many of these available for renting, whilst the decontrol of rented houses as soon as the present tenants vacated them (expected to free about 125,000 houses annually) would mean that they would no longer be held vacant for months awaiting buyers because letting was uneconomic, but would be let at once at fair rents. The Government believed that through these provisions a considerable initial reservoir of houses would be made available for letting, and that this, taken with the large number of houses which would be decontrolled as the result of the lowering of the "controlled" rental limits, would be enough to provide "ample consumer resistance" and make certain that the demand was not concentrated on a comparatively small number of decontrolled houses. They saw no reason to doubt, therefore, that the rents that could be obtained for the large number of decontrolled houses coming into the market would not greatly exceed the new rents permitted by the Bill for houses still controlled.

There would remain in England and Wales over 4,250,000 rent-controlled houses at present let to tenants, and these would remain controlled (except where the tenancies expired) until the pattern emerging from the rest of the Bill could clearly be seen. All the provisions of the Rent Acts would continue to apply to them, although rents could be raised to the new prescribed limits. These increases, however, would not exceed 7s. 6d. a week for about 2,000,000 houses, whilst for over 1,000,000 more they would not be above 10s. Altogether they would affect at most 4,000,000 of the 13,500,000 houses in England and Wales, would be spread over many months, and for the great majority of households affected would bring the new maximum rents to less than 8½ per cent of current adult male earnings.

Mr. Powell concluded by stressing that the only alternative to the Government's proposals was decontrol by 100 per cent public ownership of all accommodation at present subject to rent control. This would mean that all except owner-occupiers would become council tenants, and that persons wanting houses would have no alternative to the local authorities' waiting lists. The Government did not believe that this was a solution of which the people of Britain would approve, or that in present circumstances they would either desire to remain subsidized by their fellow citizens through rent control, or be unwilling or unable to pay the current value of the accommodation they occupied.

Mr. Mitchison (Lab.), the principal Opposition spokesman in the ensuing debate, described the Bill as "iniquitous" and "the first step towards the complete abolition of rent control." He asserted that it would "put £100,000,000 a year into the landlords' pockets" and deprive tenants of their security of occupation without giving them anything in return. Declaring that it was "wicked nonsense" to say that the housing shortage could be met in a year or two, he estimated that 50 per cent of the houses affected by the Bill were occupied by manual workers, 18 per cent by "white collar" workers, and 25 per cent by retired or unemployed persons. The average household income of the last group was only £330 a year, of which nearly 12 per cent went in rent and rates; hence it was clear that these people—"already not far from the starvation line"—would either have to obtain National Assistance help with their rents or cut down their expenditure on necessary food.

After contending that there was "no justification for allowing landlords to double rents in order to correct a few anomalies," and that the Bill contained no effective guarantees that repairs would be carried out before rents were raised, Mr. Mitchison stressed that the Labour Party believed that all houses not owned by their occupiers should be owned by local authorities. In this connexion he contrasted their view of housing as "a public service" with the attitude of private landlords, who, he maintained, were bound to regard their

houses primarily as sources of revenue. Mr. Mitchison concluded by describing the Bill as "ill-timed," since it had been introduced at a moment when the Government's "credit squeeze" was making it harder than ever for people to raise money to buy their houses instead of renting them.

After debate, during which **Mr. James Stuart** (Secretary of State for Scotland) stated that the Bill would affect only about 8½ per cent of controlled houses in Scotland, **Mr. Sandys** (Minister of Housing and Local Government) stressed that the proposals for rent increases would apply to less than one-third of all households, and that the rent increases would raise the cost-of-living index by about two per cent at the outside.

The second reading was thereupon given by 314 votes to 250, the Liberal members voting with the Government. An Opposition motion that the Bill should be considered by a Committee of the whole House was subsequently defeated by 307 votes to 250.

Statistics published by the Ministry of Housing and Local Government on Nov. 16 showed that, of the 4,250,000 rented homes in England and Wales which would remain controlled under the Bill, nearly 1,000,000 were let at 5s. a week (excluding recent repairs increases); over 2,000,000 at between 5s. and 10s. a week; and only about 43,000 at over 20s. a week. It was estimated that under the Government's proposals 963,000 tenants would have their weekly rents increased by up to 5s.; 954,000 by 5s.-7s. 6d.; 1,109,000 by 7s. 6d.-10s.; 897,000 by 10s.-15s., and 327,000 by over 15s. These figures would, however, be affected by the provision in the Bill that where a "repairs increase" had already been obtained by the landlord under the Housing Rents and Repairs Act, the increase under the Bill would be lessened by a similar amount. (Ministry of Housing and Local Government - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 13251 A; Housing Rents and Repairs Act, 13791 A; Queen's Speech, 15199 A.)**

A. SINGAPORE. — Chief Minister's Statement on Renewal of Constitutional Discussions with Britain. - Government Policy on Malayanization of Civil Service.

The Governor of Singapore (Sir Robert Black), opening the second session of the Legislative Assembly on Aug. 29, 1956, stated that the Government regarded the breakdown of the London Conference in May as a temporary setback and was bent on seeing that its "legitimate aspirations are attained in the very near future." The Government would also continue to strengthen the links already forged with the Federation of Malaya, until the two territories were fused into a single nation. When the Governor's address was debated by the Assembly on Sept. 5-6, the Chief Minister, Mr. Lim Yew Hock, announced that the Government proposed to reopen the constitutional discussions with Britain at an early date.

Mr. Lim Yew Hock moved a vote of thanks to the Governor for his address, which, he stated, would be treated as a vote of confidence by the Government. He (the Chief Minister) had deliberately been silent about the Government's plans for independence because he felt that a new strategy was called for as a result of experience gained over the failure of the last talks. "This time we must plan well," Mr. Lim declared, "so that we can negotiate from a position of strength. In this planning there will be consultations with the Opposition, with a view to united action . . . I am strongly convinced that if the Singapore Government has the fullest support of the Opposition there can be no failure when the next delegation goes to London. I have set April 1957 as the latest date for the re-opening of talks with the Colonial Office, but this date can be advanced by two or three months if our plans are ready by then."

Mr. Lee Kuan Yew, leader of the left-wing People's Action Party, announced that his party would vote with the Government if it accepted certain conditions. These were that the Chief Minister should organize a national convention of all the "anti-colonial" parties, that it should draw up a tactical plan for the constitutional negotiations, and that it should plan concerted constitutional action if these negotiations failed. In reply, **Mr. Lim Yew Hock** claimed that these conditions had already been met by his promise of all-party consultations and a plan for united action, and gave an assurance that an all-party conference would be called. The Government received a unanimous vote of confidence on Sept. 6.

Mr. Lim Yew Hock left for London on Dec. 9 for preliminary talks with Colonial Office officials in preparation for the proposed conference, and while in London had a series of meetings with the Colonial Secretary, Mr. Lennox-Boyd. A statement issued by the Colonial Office on Dec. 21 announced that the conference would begin on March 11, 1957, and that the following agenda had been agreed upon: (1) Constitutional proposals already agreed to in principle; (2) internal security; (3) designation of the Queen's representative in Singapore; (4) external relations and defence; (5) the date of the entry into force of the new Constitution; (6) the position of civilian employees in the armed forces; (7) any other matters.

On his return to Singapore (Dec. 29) Mr. Lim Yew Hock expressed confidence that, "provided there is complete unity," Singapore would achieve full self-government in 1957. While in London, he had suggested that the office of the Queen's representative in Singapore (who would be a Malayan nominated by the Singapore Government) should be distinct from that of the British Government's representative.

Malayanization of Civil Service.

A commission appointed by the Government to make recommendations on the Malayanization of the Civil Service issued on March 7, 1956, an interim report recommending the Malayanization of the administrative service in two years, and of other departments in not more than five years.

The report excluded from consideration the posts of Chief Secretary and Financial Secretary, which were expected to be eventually filled by Ministers. It recommended the immediate selection of a local officer for the post of Permanent Secretary-designate to the Treasury, the holder of which would be head of the Civil Service and responsible for its Malayanization. The police force should be Malayanized within three years, but the Commissioner of Police should be asked to remain for a further year. When no serving officer was suitable for a post, the commission proposed that contracts should be offered to serving expatriate officers or other non-Malayans, who need not necessarily be citizens of the United Kingdom, for a period not exceeding three years. Requests should also be made for officers from Commonwealth countries to be seconded for two-year periods, and non-Commonwealth citizens should be considered for posts as engineers, scientists, and possibly doctors. Expatriate officers who had served in Singapore or the Malayan Federation for 10 years should be given the opportunity of remaining in the Public Service, provided they signed a statutory declaration that they intended making Malaya their permanent home.

On Dec. 2, 1956, the Government issued a statement of its policy on this question which differed in some respects from the commission's recommendations. Details of its compensation scheme for British officials were issued on Dec. 4.

The Government proposed that all the posts of principal Civil Service advisers to Ministers should be handed over to Malayans as soon as the Public Service Commission was in a position to recommend suitable officers. Permanent officers of the administrative service would be retained for at least five years, and other expatriate officers for terms ranging from one year to continued full careers. In the Police Department the most senior officers would be retained for six years, and others for three. Of the present 500 expatriate officers, it was expected that 68 would remain at the end of 1962 and 30 at the end of 1966. Officials replaced by Malayans would receive their earned pensions and lump sums (which would in no case exceed £11,900) proportionate to their salary, age, and length of service.

The Legislative Assembly unanimously approved the Government's proposals on Dec. 5, 1956.

Local Government.

An official Committee on Local Government recommended on Feb. 6, 1956, that, in addition to the Central Government, a City Council and four District Councils should be created.

The Rendel Commission's report of 1954 had recommended that the existing City Council and Rural Board should be replaced by a single local authority, to be called the City and Island Council. The committee, however, rejected this proposal on the ground that "the democratic opportunities offered by the existence of five elected local authorities significantly outweigh the advantages of centralization." "We are, moreover, in greater doubt than the Commission," the report added, "about the political advisability of constituting an island-wide authority in addition to the Central Government, and investing it with wide powers and financial resources which might well at some future time weigh more heavily than those of the Government itself."

Official Languages.

The Legislative Assembly decided on Feb. 9, 1956, that Malay, Mandarin Chinese, and Tamil, as well as English, might be used in its debates. This decision—which was unanimous—ended the position whereby English had been recognized as the sole official language.

Proposals for Urban Development.

A "master plan" for the development of Singapore, prepared by a commission headed by Sir George Pepler (the authority on town-planning), was published in January 1956.

The report pointed out that the population of Singapore, at present 1,200,000, would increase by 1972 to 2,000,000, and that 46 per cent of the three main ethnic groups—Chinese, Malays, and Indians—would by then be under 14 years of age. The plan proposed a redistribution of the population to reduce the numbers living in the centre of the city; the establishment of three self-supporting satellite towns, to contain a total population of 200,000; and the formation of a green belt around the city centre and suburbs.

The Legislative Assembly had previously passed a Bill empowering the Government to acquire land for public purposes and freeing the value of such land at the level at which it stood on April 22, 1955.—(Times - Daily Telegraph - Manchester Guardian - New Commonwealth) **(Prev. rep. 14909 A.)**

A. WESTERN EUROPEAN UNION. — Assembly Sessions. - Recommendations on European Defence and Increased Political Co-operation. - Armaments Control Regulations. - Unified Health Control for Sea and Air Traffic. - Cultural Co-operation.

The second ordinary session of the Assembly of the Western European Union was held in Strasbourg in two parts from April 23-25, 1956, and from Oct. 11-13. It was attended by the representatives in the Council of Europe's Consultative Assembly of the seven W.E.U. member-countries—Belgium, France, the German Federal Republic, Italy, Luxemburg, the Netherlands, and the United Kingdom.

The Assembly had held its inaugural meeting at Strasbourg from July 5-8, 1955, Mr. John Maclay (U.K., Liberal-Conservative) being elected President. The second part of this session was held from Oct. 24-28, 1955, when the Draft Charter and Rules of Procedure were adopted.

Dr. Beyen (then Netherlands Foreign Minister) presented to the Assembly on Oct 28 the first annual report of the Council, which dealt with the cultural and social work of W.E.U., the Standing Armaments Committee, the Armaments Control Agency, the European Commission for the Saar Referendum, the Assembly, the Council, and the Secretariat-General.

The principal decisions taken during the second ordinary session, and other recent developments since the establishment of the Assembly, are summarized below:

President of W.E.U. Assembly. Mr. Maclay was re-elected President of the Assembly on April 23, 1956, but after the conclusion of the second part of the session it was announced that he had resigned, following his appointment as British Minister of State for Colonial Affairs (see 15152 B). Until the election of a successor, the Assembly would be presided over by the senior Vice-President, M. Ernest Pezet (France).

Atomic Energy. Signor Lodovico Benvenuti (Italy), on behalf of the Defence Committee, presented a report on atomic energy (Oct. 12) which stressed the need for closer links between the W.E.U. control of atomic weapons and the control of fissile materials envisaged by Euratom. Signor Benvenuti warned that there might be a dangerous gap between the two control systems as long as countries such as Britain, which had independent sources of supply of fissile material, did not submit this material to the control of a European body.

After debate, the Assembly adopted a recommendation calling upon the Council of W.E.U. to conclude an agreement between its members governing the control of fissile material, and laying down the forms of co-operation between the Armaments Control Agency and Euratom. The Council was also requested to examine the question of the possession, manufacture, and use of atomic weapons, and to report to the Assembly on these matters.

An *ad hoc* Committee, established by the Public Health Committee to study problems of protection of the civilian population and of persons engaged in processes connected with the peaceful use of atomic energy, held its first meeting in London from June 13-16 under the chairmanship of Sir Ernest Carling (U.K.). One of the principal questions on the agenda was the harmonization of legislative and administrative arrangements for protection against radiation dangers.

European Defence and Political Co-operation. During a debate in the Assembly on the "state of European defence" (Oct. 12), complaints were made that the W.E.U. Council had failed to provide the Assembly with adequate information on defence matters. The W.E.U. Treaty had stipulated that the Ministerial Council should be responsible to the national Governments, but many deputies expressed the view that the Council should also be to a large extent responsible to the Assembly for decisions, as in the European Coal and Steel Community. In the light of the Suez crisis it was also urged that the seven member-countries should make more use of the Council for co-ordinating their foreign policies, and should try to present a more unified policy within other organizations such as NATO, the Council of Europe, and the United Nations.

The Assembly accordingly recommended (*a*) that the Council should determine immediately the nature of the reorganization of Western defence forces, giving "a clear lead to public opinion in this matter"; (*b*) that "substantial conventional forces should be retained in order to meet all eventualities"; (*c*) that the West German contribution to European defence should be made effective as soon as possible; and (*d*) that the Council should "urgently review their present interpretation of the amended Treaty of Brussels" as regards W.E.U.'s functions in the sphere of defence.

At the request of the German Federal Republic (see 15094 A), the Foreign Ministers of the seven member-countries had met in Paris on Sept. 15. A communiqué published after the meeting stated that the Council had examined certain political aspects of Western defence and had agreed that this examination should be further pursued before the next meeting of the North Atlantic Council, to which final conclusions would be submitted.

A meeting of the Council of the W.E.U., held in Paris on Dec. 10 under the chairmanship of Dr. Luns (Netherlands Foreign Minister), discussed suggestions for a real political association within the W.E.U. framework put forward by Signor Martino (the Italian Foreign Minister), one of the "three wise men" appointed by the North Atlantic Council to study the question of closer non-military co-operation between NATO members (see 15285 A, 14861 A).

Signor Martino felt that the time had come to give the W.E.U. Assembly greater authority and more real power, and suggested that its members might be elected directly by the peoples of the member-countries. This Assembly would then have the power to issue recommendations and formulate suggestions, which would be put into effect after approval by the national Parliaments. This increased power and activity on the part of the Assembly would enable the Council of W.E.U. to develop more actively in the direction of constant and useful political consultation. Signor Martino also stressed the need to overcome, with the maximum of goodwill, the last technical obstacles to the achievement of complete economic integration between member-countries, including the setting-up of a free trade area with Britain.

Mr. Selwyn Lloyd indicated the British Government's willingness to discuss the proposals, and emphasized the need of establishing links between the W.E.U. and O.E.E.C. M. Pineau proposed that the W.E.U. should become the normal framework for an effective association between the European communities of the "Six" (Coal and Steel, Euratom and the Common Market) and the United Kingdom.

It was decided that a group of experts, working under the direction of M. Coffin (Secretary-General of the W.E.U.) should examine within three months the possibility of using, within the W.E.U. framework, part of the plans drawn up at Strasbourg in 1953 for a European Political Community (see 13021 A.)

It was also announced that the seven Foreign Ministers had signed a Protocol on the adherence of Italy and Western Germany to two Social Security Conventions concluded in 1950 by the former signatories of the Brussels Treaty (see 10668 D), relating to the employment of workers and the part-time employment of students in member-countries other than their own.

The Council appointed Herr Heinrich Böx (Western Germany) as Deputy Secretary-General of the W.E.U.

Armaments Control Agency. The Secretariat of the W.E.U. published on Oct. 11 regulations for the Armaments Control Agency provided for in the Paris Agreements of 1954 (see 13809 A). The duties of this Agency were to ensure that the undertakings not to manufacture certain types of armaments mentioned in the Protocols to the Paris Agreements were being observed, and to control the level of stocks of certain types of armaments held by each member-country on the mainland of Europe. To this end the Agency would scrutinize statistical and budgetary information and would carry out, on the mainland of Europe, test checks, visits, and inspections at production plants, and at depots and military units not under NATO authority.

The main provisions of the Regulations referring to such measures were as follows:

(1) **Inspections, visits, and test checks would be ordered by the Director of the Agency,** who would in each case decide the scope, object, and methods of such control measures.

(2) At least five days' notice should normally be given to the authorities of the member-country on whose territory the control measures were to be carried out, but in special cases this period might be reduced to the minimum necessary to enable the national authorities to take part. The notification would be transmitted through the NATO delegation of the country concerned.

(3) The Agency's officials would co-operate with the national authorities when carrying out control measures. Their duties would include inspection of military establishments, depots, and production plants, survey of stocks, and checking of the production of end-items.

In the execution of these duties they would have the right to (*a*) question the management or those in charge of the plant or establishment inspected; (*b*) examine all parts of the premises concerned; and (*c*) inspect any relevant documents and accounts. They would be bound by the NATO and W.E.U. codes of security, and would perform their duties with minimum interference to the normal running of the unit subject to control.

The regulations would not apply to inspections of private firms until certain legal guarantees had been drafted.

Health Control of Sea and Air Traffic. New administrative arrangements came into force on June 22 whereby the seven member-countries formed a single territory for health control of sea and air traffic. Within this newly-created special area, the seven countries undertook to afford each other health control facilities for air and sea traffic, thus extending the scheme operated by the five-Power Brussels Treaty Organization.

Under the new arrangements, health control regulations would no longer apply to aircraft coming from airports of any of the seven countries, and the Maritime Declaration of Health would not be required from vessels of member-countries travelling only between their ports. An exchange information service would be organized to enable health authorities to keep in constant touch and supply each other with particulars of all diseases covered by International health regulations, or of any epidemiological incident of interest to the others. Information would also be supplied on the origin and progress of outbreaks, and on the steps being taken to deal with them.

Cultural Questions. A conference of University Rectors and Vice-Chancellors from W.E.U. member-countries was held at Cambridge from July 20-27, 1955, under the auspices of the Western European Union, being attended also by representatives of the other members of the Council of Europe.

A series of resolutions was adopted which recommended (*a*) the achievement and maintenance of a balance between general culture and specialized teaching and research; (*b*) the preservation of the administrative and cultural autonomy of universities; (*c*) the provision of adequate financial assistance by Governments; (*d*) the abolition of all racial, religious, and political discrimination in the selection of students; (*e*) the provision of financial grants to students; (*f*) the protection of the social and moral welfare of students; (*g*) the encouragement of study abroad; and (*h*) the development of international exchanges between university staffs.

These recommendations were subsequently endorsed by the W.E.U. Assembly.

The W.E.U. Commission for the Saar Referendum was dissolved on Jan. 10, 1956. The International Court set up by W.E.U. to prevent any victimization of persons for political sentiments expressed by them during the campaign before the plebiscite of Oct. 23, 1955, held its first sittings in July 1956. (Western European Union Secretariat, London - Council of Europe Directorate of Information, Strasbourg - Times - Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. W.E.U., 14237 A.)**

A. MALDIVE ISLANDS. — Reactivation of British Airfield. - Anglo-Maldivian Agreement.

The British Commonwealth Relations Office announced on Jan. 3 that the U.K. Government, in agreement with the Maldivian Government, would re-establish the wartime airfield on Addu Atoll and operate it as a staging post. A spokesman of the C.R.O. explained that the expected entry into R.A.F. service of long-range aircraft such as the *Britannia* would make possible a shorter and more direct route from Britain to Australia, New Zealand, and the Far East by flying directly across the Indian Ocean. Moreover, the development of a major airfield in the Cocos Islands by the Royal Australian Air Force (see 14557 B) had already contributed to making this "great circle" flying route practicable. The spokesman said that there was no intention of developing a base at the Addu Atoll, which would be used purely as a staging and refuelling post.

The following comment was brought by the Defence Correspondent of *The Times*:

"The decision to re-establish the airfield in the Maldives is the culmination of months of doubt about the future of facilities at the bases Britain at present has in Ceylon—the R.A.F. station at Katunayake and the Royal Naval yard at Trincomalee—the command of which is due to be handed over to Ceylon this year. The object is to safeguard British air communications with Australia, New Zealand, and her territories in the Far East.

"At present British air communications with the Far East depend entirely on the good will of two Commonwealth countries, India and Ceylon, both of which have demonstrated their determination to remain neutral in events which do not directly concern them. The only two existing air routes from the farthest points in the Middle East—Bahrein, Aden, and Masira [Oman, S.E. Arabia]—to the nearest point in the Far East—Penang—are *via* India or Ceylon. Unless British aircraft can fly over and re-fuel in these countries, the air link with Australasia and the Far East is severed. . . .

"There are only two conceivable alternatives to the use of India and Ceylon as links in the air chain between Britain and the Far East. The first is a westward air link with the Far East *via* North America. This has been rejected because of the dollar expense, the tremendous distances involved, and weather difficulties. . . . The alternative, which the British Government are now adopting, is the setting-up of a new staging post in the Indian Ocean, on the Maldive Islands. The building of an airfield there will enable aircraft to fly from the Middle East to the Far East without flying over or refuelling in any other country."

The Maldive Islands, a chain of coral atolls about 400 miles south-west of Ceylon, are an independent Sultanate within the British Commonwealth and have a population of about 93,000. [See 13475 A, 13416 A.] The airfield to be re-established in Addu Atoll (a group of 27 islets) is on the island of Gan, which is nearly two miles long and three-quarters of a mile wide. It was built during the Second World War but abandoned after the ending of hostilities. Under an agreement between the British and Maldivian Governments, signed on Jan. 1, 1953, Britain retained the right to establish and maintain in the Maldive Islands such facilities as she might decide, after consultation with the Maldivian Government, were required for the defence of the Maldives or for any part of the Commonwealth. The decision to reactivate the airfield in Addu Atoll was taken under this agreement.—(Times - Daily Telegraph)

B. MALAYA. — City Status for George Town.

George Town, Penang, was raised to the status of a city on Jan. 1, in accordance with a decision announced by the Federation Government on Dec. 21, 1956.—(Times)
(Prev. rep. 11727 B.)

C. BRITISH WEST INDIES. — Barbados recommended as Capital of Caribbean Federation.

The three-man commission appointed by the Colonial Secretary to consider the most suitable site for the capital of the Caribbean Federation issued its report on Jan. 2, 1957, after having visited all the federated West Indian colonies from June to September, 1956. The choice was narrowed down to Barbados, Jamaica, and Trinidad, in that order of preference, and eventually fell on Barbados for the reasons stated below.

The Commission gave the following reasons for putting Trinidad last on the list of the three "possibles" as the site for the Federation capital: "There are widespread reports of corruption in the public life of Trinidad. This is a matter on which we would hesitate to comment, were it not for the almost universal belief in the other islands that the accusation is true. The state of affairs in the Port of Spain municipality was a few years ago the subject of a public inquiry. Grave suspicion was thrown on the financial and other integrity of persons now prominent in the public life of the colony. Financial scandals may occur anywhere, however high the tone of public life. What is significant in the case of Trinidad is that these practices appear to be tolerated. This tolerance in public life would be a disquieting augury for the future of a capital located there. Trinidad is wealthy and go-ahead and has good communications and a good Press, and Port of Spain would be suitable from the material point of view as a base town. Nevertheless, we consider it would be better to put the capital either in Jamaica or Barbados. Our reasons are the instability of that island's politics and the low standard accepted in public life."

With regard to Jamaica and Barbados, the report said that the Commission had found it difficult to choose between these two islands. Both were "politically healthy" and the amenities of their respective capitals—Kingston and Bridgetown—were satisfactory. Kingston was regarded as having the better Press, better communications with countries outside the Federation, and greater freedom from colour prejudice than other islands. Nevertheless, it had been put second on the list, mainly because the Commission felt that the capital should be on a small island and because Jamaica, being separated by 1,000 miles from the other islands of the Federation, was inconveniently placed for inter-island communications. Owing to Jamaica's geographical "aloofness," the siting of the Federation capital in that island might be a "psychological mistake" leading to serious consequences. Moreover, "Jamaica is so large and its potential development so great that the fears of the other islands that it would dominate the Federation if it were chosen for the capital would be real."

For the above-mentioned reasons the choice fell upon Barbados, which was more conveniently placed for inter-island communications and, moreover, was regarded as having a keener intellectual atmosphere and a higher general level of education than Jamaica. After considering whether the Federation capital should be based on an existing town [i.e. Bridgetown] or developed on an entirely new site, the Commission came to the conclusions (*a*) that it should be situated near an existing town, so that it would not have to exist "in a social and intellectual vacuum," and (*b*) that it should be built on a site between three and seven miles from that town. As a result, the Federation capital would develop into a "twin town" to Bridgetown and would not be a mere suburb of that city.

The Commission calculated that a site of not less than 10,000 acres would be needed for the Federation capital, which might have to accommodate 10,000 people after ten years. The total cost of building would be about £12,000,000, of which the Federal Government would be required to provide about £10,000,000 in the first decade, and private enterprise the remainder. It was recommended that the Federation capital should be sited in a Federal District, 15-25 square miles in area, administered by the Federal Government.

The commission—officially known as the British Caribbean Federal Capital Commission—consisted of Sir Francis Mudie (chairman), Professor H. Myles Wright, and Mr. A. E. Cook. (Times - Daily Telegraph) **(Prev. rep. 15024 C.)**

D. RUMANIA. — National Minorities.

A report recently issued by the Rumanian Government's Central Statistical Board gave the following details of national and linguistic minorities in Rumania:

	According to Nationality	According to Language
Hungarian	1,589,443	1,651,953
German	382,400	391,388
Jewish	144,198	34,263
Ukrainian	58,112	—
Serb, Croat and Slovene	46,464	43,454
Russian	38,833	44,602
Tartar	20,718	20,595
Turkish	13,909	—
Bulgarian	11,943	12,573
Others	182,584	204,043

National and linguistic minorities thus constituted over 14 per cent of the total population of Rumania, which is 17,500,000.—(Agerpres, Bucharest) **(Prev. rep. 14918 F.)**

A. ADEN. — Elected Members admitted to Legislative Council. - Lord Lloyd's Statement on Constitutional Development of Colony. - Government Statement on Federation Proposals for Protectorates. - Incidents on Yemeni and Saudi Arabian Frontiers.

Four elected members were admitted for the first time in January 1956 to the Legislative Council of the Colony of Aden, which consists of 18 members in all. In the elections, which were held in the previous month, three of the four elected seats were won by the Aden Association, a moderate nationalist organization advocating home rule for Aden within the British Commonwealth. As a protest against the small number of elected seats, the elections were boycotted by the two other leading nationalist parties—the United National Front and the South Arabia League, both of which demand the union of the Colony and the Aden Protectorates, and their immediate independence.

During a 10-day visit to Aden, the Under-Secretary for the Colonies (Lord Lloyd) made a statement to the Legislative Council on May 19 on the constitutional development of the Colony, the text of which had previously been approved by the British Cabinet.

Lord Lloyd said that H.M. Government welcomed the admission of elected members to the Council, but this advance needed to be tested and "there could be no question of any further radical change in the Constitution during the life of the present Council" [i.e. before December 1958]. "There is no reason," he added, "why you cannot expect to achieve further constitutional development in due course . . . But I should like you to understand that for the foreseeable future it would not be reasonable or sensible, or indeed in the interests of the Colony's inhabitants, for them to aspire to any aim beyond that of a considerable degree of internal self-government . . . H.M. Government wish to make it clear that the importance of Aden, both strategically and economically, within the Commonwealth is such that they cannot foresee the possibility of any fundamental relaxation of their responsibilities for the Colony."

During Lord Lloyd's visit the Aden Association submitted to him proposals for a Legislative Council with a majority of elected members, a Ministry responsible to the Council, a reduction in the number of British officers in senior posts, the replacement of English by Arabic as the official language, and greater attention to education. Anti-British demonstrations, in which several hundred Arabs took part, were organized by the other nationalist parties to mark both Lord Lloyd's arrival on May 11 and his departure on May 20.

Lord Lloyd's statement was criticized in the House of Lords on June 13 by **Lord Listowel** (a Labour peer), who said that the policy outlined in it appeared to be a "flat denial" of eventual self-government for Aden, and was contrary to the long-accepted principle of all political parties in Britain that full self-government within a reasonable time was the goal of every British dependency.

In reply, **Lord Lloyd** said that Lord Listowel's dislike of the phrase "a considerable degree of internal self-government" was based on the assumption that it was wise in all places and in all circumstances to draw a clear distinction between internal and external affairs. Because of the close connexion between defence and internal security that was not always possible, and for that reason he did not think it would be wise for the Government to be more specific on the point at the present stage; when the time came, however, the matter would not be interpreted with any undue rigidity.

Federation Proposals for Protectorates.

A conference of rulers of the Aden Protectorate States, presided over by the Governor (Sir Tom Hickinbotham), took place on March 31, at which the proposals for federation of the States of the Western Protectorate were discussed. A communiqué issued by the Governor on the same day emphasized that "the rulers and peoples of these States are entirely free to negotiate among themselves, with such advice of H.M. Government as they may require, such form of closer association as may suit them best," and would have "complete freedom among themselves to choose or reject any proposals that may be made." The rulers who had taken part in the conference subsequently informed Sir Tom Hickinbotham that they appreciated the "fine spirit" of this statement, which would increase their confidence in the British Government.

Disturbances and Border Incidents in the Protectorates.

Although the raids across the Yemeni border which had led to disturbances in the past died down during 1955, serious unrest flared up among tribesmen in both the Western and Eastern Protectorates during June of that year.

In the Western Protectorate two British officers and 10 native soldiers were killed on June 15, 1955, when Rabizi tribesmen ambushed a convoy, while in the Eastern Protectorate native troops of Qualiti State were cut off for a week in the hills during a revolt arising from disputes over the rights of camel-drivers. On July 1 it was announced that a battalion of the Seaforth Highlanders and a motorized squadron of the Life Guards had been flown to Aden from the Suez Canal zone to reinforce the R.A.F. and the local levies normally responsible for the security of the Protectorates. Local operations against the rebellious tribes in the Western Protectorates continued during July and August.

The Colonial Secretary, Mr. Lennox-Boyd, stated in the House of Commons in August 1955 that there was no evidence that the disturbances in the Eastern Protectorate had been instigated from outside. In the Western Protectorate, he alleged, the disturbances had been "very considerably fomented," though not solely caused, by instigation and material assistance from the authorities in the Yemen, who had also provided refuge for the dissidents.

After an interval of some months, the situation again deteriorated in May 1956, owing partly to border raids from the Yemen and partly to the arming of tribesmen from the Protectorates by Saudi Arabia.

On May 6 six tribesmen were reported to have been killed when R.A.F. planes machine-gunned raiders from the Yemen, after an isolated fort had been fired on. Three large lorries carrying 119 tribesmen and a number of rifles were intercepted on May 20 after entering the Eastern Protectorate from Saudi Arabia, and surrendered without resistance; the arms were impounded and over 50 of the tribesmen imprisoned. On May 26 R.A.F. jet fighters fired on some 60 tribesmen who were believed to have entered the Eastern Protectorate after being supplied with arms by the Saudi Arabian Government. The Earl of Munster (Minister without Portfolio) told the House of Lords on May 30 that no casualties had been proved, and that a truce had been arranged at the request of the headman of the tribe to enable him to negotiate the surrender of the arms consignment.

Further raids across the frontier by Yemeni tribesmen occurred during June and July, 1956, leading to a British protest to the Yemen after an incident on July 14 in which tribesmen (two of whom were killed) attacked villages in the Western Protectorate.

On Dec. 28, 1956, the Yemeni Chargé d'Affaires in London alleged that British forces had carried out a raid on Qataba (a Yemeni frontier town) on Dec. 24, and protested to the British Government. The Foreign Office, however, refuted the Yemeni statement and said that on Christmas Day armed tribesmen from the Yemen had entered the Aden Protectorate and directed heavy fire on the houses of the Amir and the British adviser at Dhala before being driven off by local levies. A British protest was lodged with the Yemeni authorities.

B. PAKISTAN. — National Economic Council.

It was announced in Karachi in November that President Mirza had reconstituted the National Economic Council of Pakistan (see 14664 C) in accordance with Article 199 of the Pakistani Constitution.

The Prime Minister, Mr. Suhrawardy, will be *ex officio* chairman of the Council, the other ten members being: Mr. Abulmansur Ahmad (Minister of Commerce and Industries); Syed Amjad Ali (Minister of Finance); Mr. A. H. Dildar Ahmed (Minister of Food and Agriculture); Mian Jaffar Shah (Minister of Communications); Mr. Ataur Rahman (Chief Minister, East Pakistan); Sheikh Mujibur Rahman (Minister of Commerce, Labour and Industries, East Pakistan); Mr. Dhirandra Nath Dutt (Minister of Health and Local Self-Government, East Pakistan); Dr. Khan Sahib (Chief Minister, West Pakistan); Sardar Abdur Rashid Khan (Minister of Finance, West Pakistan); Pirzada Abdus Sattar (Minister of Law, West Pakistan).

Article 199 of the Constitution provides that the Council "shall review the overall economic position of the country and . . . formulate plans in respect of financial, commercial, and economic policies; in formulating such plans, the Council shall aim at ensuring that uniform standards are attained in the economic development of all parts of the country."

The Council will report annually on the results obtained and the progress made by it in the achievement of its objects.
(Pakistan High Commissioner's Office, London) **(14664 C.)**

C. NORTHERN IRELAND. — Cabinet Changes.

Mr. William Topping, Q.C., the Government Chief Whip, was appointed Minister of Home Affairs in the N.I. Government on Oct. 23, 1956, in succession to Mr. G. B. Hanna, who had resigned a month earlier on his appointment as a County Court judge (see 15093 B). Since Mr. Hanna's resignation the Home Affairs portfolio had been held *ad interim* by the new Minister of Finance, Mr. Terence O'Neill, who retained the Finance portfolio. Mr. Brian Faulkner succeeded Mr. Topping as Government Chief Whip.

Mr. Hanna, previously Minister of Home Affairs, had taken over the Finance portfolio from Mr. W. B. Maginess in April 1956, when Mr. Maginess succeeded Mr. J. E. Warnock as Attorney-General. Mr. Warnock had resigned owing to his opposition to Government legislation to increase the rents of certain houses.—(Belfast Telegraph) **(Prev. rep. 15093 B.)**

A. UNITED STATES. — Vice-President Nixon on U.S. Foreign Policy. - The Middle East and Hungarian Crises. - Reaffirmation of U.S. Friendship and Alliance with Britain and France.

An important speech on American foreign policy, with special reference to the Middle East and Hungarian crises, was made by Vice-President Richard M. Nixon in New York on Dec. 6, 1956. In the course of his speech the Vice-President emphasized, with reference to the Middle East, that "neither we nor our allies were without fault in our handling of the events which led to the crisis"; that "recriminations and fault-finding will serve no purpose whatever"; and that it was in the interest of the United States to give financial support to Britain "in this hour of difficulty."

The Vice-President's speech (which was made to leaders of the U.S. automobile industry) is brought below under cross-headings. The extracts in square brackets were included in Mr. Nixon's prepared text but omitted from the speech because of pressure of time.

"I believe it appropriate to discuss the great events of the last forty days, which will have such a tremendous impact upon our future. There have been some depressing and alarming comments on those events by some observers of world affairs. The critics of despair and the prophets of doom are telling us that all is lost. Among the dreary conclusions we have recently heard are these:

(1) The cause of freedom in Hungary has been crushed forever by Soviet power.

(2) Dictatorial forces are stronger than ever in the Middle East, and the Soviet Union has won a massive victory in that area.

(3) The Atlantic Alliance has been irreparably shattered, and the breach between the U.S.A. and its European allies and friends may never be healed.

(4) Finally, U.S. policy is primarily at fault for these disastrous developments . . .

"In this complex and imperfect world we must be prepared for difficulties and even short-run failures. The most we can hope for is that our basic position is fundamentally right and that it will ultimately prevail. I suggest that we analyze the events of the last few weeks in this spirit.

The Middle East Crisis. "Six weeks ago we were at a turning-point in history. At U.N. headquarters in New York the eyes of the world were focused upon the spokesman of the United States. I ask you to visualize the high drama of the scene. We, who only 60 years ago were boasting of our manifest destiny in Asia and Latin America, had renounced colonialism and pledged our support to nations formerly held as colonies by major Powers. We had changed, but there were many in the world who doubted the reality of the change. [Many nations in Asia and Africa preferred to wait on the sidelines as neutrals in the 'cold war' until they were sure that we were more sincere than the Soviet Union in our profession of friendship and respect for all peoples and nations, regardless of their size or strength. Our friends in Latin America, while trusting us today, had disturbing memories of the gunboat diplomacy of yesterday.]

"Then we were put to the test. Our friends and allies had by-passed the United Nations and had taken direct military action to settle a dispute. Certainly their provocation was great. By the international standards which were generally accepted 50 years ago, the action they took would have been defended, if not justified. But a new force had come into being, the moral force of the United Nations, all of whose members were pledged to settle their differences peacefully.

"In delegation after delegation, the question was asked: Would the United States live up to its announced principles, or would it conveniently look the other way? At this turning-point in history, Secretary Dulles personally appeared before the U.N. General Assembly and announced our position—a position which was supported by an overwhelming majority of the nations of the world.

"Our stand was direct and simple. We denounced the use of force not sanctioned by self-defence or U.N. mandate. In the debate that followed, our friends used the veto and stopped action by the Security Council. We did not hesitate. We asked for an emergency meeting of the General Assembly, not subject to veto. At that meeting, our position was endorsed by practically every country in the world. The United States had met the test of history. The United Nations had been saved. The rule of law had been upheld—the same law for the powerful and strong as for the weak and defenceless.

"It is claimed that we took the wrong course of action because the position of a dictator was strengthened, the danger of Soviet influence in the Near East increased, and our alliance with our closest friends weakened. But let us see what our alternative was. If we had failed at this point to stand for the principles which guided our course of action, the usefulness of the U.N. would have been at an end. The standards of conduct of international affairs would have reverted to those in effect before World War I and World War II. Our own moral position before the world would have been hopelessly compromised. Our position in the eyes of most of the world would have been little better than that of the Communist nations who, in their conduct of international affairs, have consistently followed the principles that the end justifies the means, that the use of force is justified if it is expedient, and that the mandates of the U.N. are to be followed only where the nation affected concludes that its national interests will be served thereby. The bright hope that nations might find a better way than force to settle international disputes would have been destroyed, and the world would have disintegrated into cynical and suspicious power blocs to be wooed and won by a triumphant Soviet using the carrot or club techniques as the occasion warranted.

"If we had supported our friends and allies, Britain and France, in Egypt, they might have won a military victory in that area. But they and we would have lost the moral support of the whole world. Because we took the position we did, the peoples of Africa and Asia know now that we walk with them as moral equals, that we do not have one standard of law for the West and another for the East. They know, too, that the United States has no illusions about the 'white man's burden' or 'white supremacy.' . . .

"It is easy to condemn your enemies when they are wrong. It takes courage to condemn your friends. It is tempting to overlook a little wrong in order to get what appears to be a greater good, but high standards of morality do not sanction the principle that the end justifies the means. We knew that our friends acted under great provocation and that their patience had been strained almost beyond endurance. It would have been easy to look the other way and delay action until it was too late. But the easy way is not always the right way.

"The military victory our friends might have won in the Near East would not have solved the problem. Lasting solutions are rarely forged in the ruins of war, and the peace we seek in the Middle East must be lasting. History will give eternal credit to our President and Secretary of State for choosing the hard road of principle and not the easy way of expediency. Now, we as members of a newly invigorated United Nations are free to pursue a sound and permanent peace in that area.

The Hungarian Crisis. "Let us examine now the events which have occurred in Hungary. Because we stood firmly against the use of force in Egypt, we were in a moral position to condemn the ruthless and barbarous Soviet conquest of that courageous country. We could, without hesitation or cynicism, mobilize the moral force of the world against this monstrous injustice. The United Nations has no armies that it could send to rescue the heroic freedom fighters of Hungary. There were no treaties which would invoke the armed assistance of the free nations. Our only weapon here was moral condemnation, since the alternative was action on our part which might initiate the third and ultimate World War.

"There are those who say that moral force without military action to back it up means nothing. But we should never underestimate the force of the moral judgment of the world. Even the Soviet Union has been compelled to recognize this. It is unable to go before the world standing for the slavery, colonialism, and reliance on force which are basic features of Communist doctrine. No matter how dark its deeds, it sees the need of speaking in terms of freedom for individuals, independence for nations, and peace for the world. The fact that the men in the Kremlin are writhing in the spotlight of world criticism may have saved the equally heroic people of Poland from Hungary's fate. Poland at least has a limited measure of independence today.

"What effects will the events in Hungary have on the world struggle? The short-sighted judgment of many observers is that the Communists have won a great victory in Hungary. But a more sober, realistic appraisal is that while the Communists may have won the battle for control of Hungary, they have in the process lost the war for domination of the world which they are so fanatically trying to win. I am convinced that the events in Hungary will prove to be a major turning-point in the struggle to defeat world Communism without war . . .

"As we examine, then, the events of the last 40 days in both the Middle East and Hungary, I think we can reach one inescapable conclusion. We do not and should not for one moment underestimate the tragedy of Hungary, the precarious situation which still exists in the Middle East, or the great strain which has been placed on our alliance with our friends in Europe. But while we have suffered some losses, a sound foundation has been laid in the process for building a world order based on law rather than force, and for the defeat of Communism without war. We shall realize those objectives, however, only if we do not let things drift and if our leadership is wise, mature, and enlightened . . .

The Alliances with Britain and France. "First, with regard to our alliances, it is essential that we recognize that history may record that neither we nor our allies were without fault in our handling of the events which led to the crisis in which we now find ourselves. [Our friends believe that we did not appreciate adequately the provocation which brought about their action, and that we did not assume our proper responsibility in working out a settlement of the basic problems existing in that area. We, on the other hand, felt that we had some legitimate criticisms to make of their policies during this period.]

"Now is the time for us all to recognize that recriminations and fault-finding will serve no purpose whatever. The cause of freedom could suffer no greater disaster than to allow this or any other incident to drive a wedge between us and our allies. As mature peoples, we know that we will not always agree even with our closest friends. The test of the strength of an alliance or a friendship is what happens in times of adversity, rather than in times of good fortune. Inevitably, if a friendship or alliance survives a period of adversity, it is stronger in the end than it would have been otherwise.

"We are proud of our association with Britain and France, and of our common dedication to the principles of freedom and justice which joined us together as allies in World War I and World War II.

We recognize that they were confronted with a series of aggressive acts short of the use of force, in addition to an ominous military build-up in a nation which they believed threatened their vital interests. In that no-man's-land between war and peace it is difficult to decide which is the best course of action.

"It is to their eternal credit that they accepted the decision of the United Nations when they agreed to a cease-fire and to a withdrawal of their forces, even when they believed that this decision was not in their best interests. They refrained from using their overwhelmingly superior force to reach their objective at a time when they thought complete victory was within their grasp. They have entrusted the future peace of the Middle East to the International Police Force provided by the United Nations.

"Contrast their action with that of another member of the United Nations, the Soviet Union, whose leaders flouted the U.N. decision condemning its aggression in Hungary. When confronted with a real crisis, the Communists reverted to type and showed all who cared to see the unlimited cruelty and the cynical rejection of basic human rights which is inherent in their system.

"Now that our allies have subordinated what they consider to be their national interests to the verdict of the United Nations, we have a solemn obligation to give leadership and support to a U.N. programme which will assure the solution by peaceful means of the problems which brought about the armed conflict in that area . . .

The Future of the Middle East. "In addition to the immediate problem of expediting the reopening of the Suez Canal on a basis under which this international lifeline will not be subject to arbitrary closing in the future, the moral, diplomatic, economic, and military strength of the U.S.A. and the United Nations must be mobilized toward the realization of these long-range objectives in the Near East. There must be a firm guarantee of the sovereignty of the States in the area, and a just solution of outstanding disputes. There should be progressive limitation of the armaments of the nations in this area. There must be generous aid in solving their economic problems so that their peoples may rise from the depths of poverty and disease . . . We do not want to go back to the armed truce of the last eight years. We want genuine and solid peace as a foundation for a new era of prosperity for these proud and respected nations.

"An immediate problem which confronts us as a result of the crisis in the Near East is the financial plight our friends in Britain now face. It is in our interest as well as theirs to assist them in this hour of difficulty, and I am confident that there will be strong bi-partisan support in Congress for granting such assistance . . .

America's Role in World Affairs. "It is commonplace today to say that America is in a position of world leadership. Our military and economic strength has given us this fearful responsibility, whether we want it or not. But our power and the corresponding responsibility have been enhanced by the events of recent days. Now our leadership is moral as well as military and economic. And the challenge to this generation is that we measure up to the expectation of history in this decisive hour . . .

"Whether we like it or not, the diplomacy of the 19th century is as outmoded today as are the automobiles of 50 years ago. In an atomic age there is no place for military aggression, colonial exploitation, or power materialism. These methods never were morally right, but today they are far more dangerous than they were at other times. The nation that starts a little war today may set off a chain reaction that could destroy our civilization.

"For the security of the world, and for the security of our children and their children, we must strive as never before for peace based on justice and law. A code of law and moral principles that apply equally to all nations of the world must be the foundation of this peace. Its superstructure must be military and economic strength. And the architect of this peace must be the United Nations, fully supported by this nation, in their effort to make the rule of law and justice supreme on this earth . . ."

In the concluding section of his speech, Vice-President Nixon said that "the struggle for the world will be finally determined by what happens to the millions of people now neutral who are trying to decide whether they will align themselves with the Communist nations or with the free nations."

C. INDIA. — Development of Iron and Steel Industry.

A review is given below of the latest developments in connexion with the construction of the proposed three Government-owned iron and steel works at Rourkela, Bhilai, and Durgapur, which are being built with German, Russian, and British help respectively

The Rourkela Steel Plant.

Following the fixing of the steel target for India's Second Five-Year Plan at 6,000,000 tons of ingots, it was decided to raise the initial capacity of the proposed Rourkela plant (Orissa) from 500,000 to 1,000,000 tons of steel ingots a year. After the submission of a revised project report in November 1955, orders were placed in July 1956 with West German firms for the blast furnaces, coke-ovens, and other items required. The development of the site and the construction of the works themselves had been taken over by the Indian Government.

On Dec. 2, 1956, it was announced that the Government of India had decided to dispense with German investment in the project; that it would itself assume responsibility for the entire financing of the plant; and that the Hindustan Steel Company (which will construct and operate the point) had become a fully Government-owned company.

It was reported in the Indian Press that the Government had taken this step because it felt that the terms of the German investment were no longer advantageous to India. Under the original scheme, the Krupp-Demag combine would have invested about Rs.95,000,000 (over £7,000,000) and would have received a return in the form of a fixed fee of 3 per cent of the total cost of the scheme. As the German supplying firms could not obtain the necessary credits at less than 6 per cent, however, they tried to compensate themselves by raising the prices of their quotations; in consequence, the German financial participation would have amounted to a short-term credit scheme at a high rate of interest (12 per cent). As a result of the Government now taking over the entire financing of the scheme, it had obtained substantial reductions in the price of the equipment to be supplied by West German concerns.

On the other hand, it was stated that the total cost of the Rourkela project would be 30 per cent more than the original estimate of Rs.1,280,000,000 (£96,000,000), because (*a*) a large number of small items had been omitted from the original estimates; (*b*) the German consultants had underestimated costs in their original estimates; (*c*) world prices of equipment had increased.

The Minister of Iron and Steel (Mr. Krishnamachari) had announced on Sept. 5 that it would be possible to produce pig-iron at Rourkela by October 1958 and steel in 1959.

The Bhilai Steel Plant.

The detailed report of Soviet experts on the Soviet-Indian project at Bhilai (Madhya Pradesh), which was accepted by the Government of India in March 1956, estimated the total cost of the plant, excluding the townships and mines, at Rs.1,100,000,000 (£82,500,000). Of this sum, Rs.470,000,000 (£35,250,000) represented Indian expenditure on materials and construction, and Rs.630,000,000 (£47,250,000) represented expenditure on Soviet equipment.

Mr. Krishnamachari announced on Sept. 5 that the first consignment of Russian equipment had already been received and that, in spite of "teething troubles" resulting from differences in Indian and Russian construction methods, it would be possible to produce pig-iron at Bhilai by the end of 1958 and steel by the end of 1959.

The Durgapur Steel Plant.

The final agreement with the Indian Steel Works Construction Company (ISCON) - the British group of firms co-operating in the construction of the Durgapur iron and steel plant (West Bengal) — was signed in New Delhi on Oct. 31, 1956.

Under the agreement the capacity of the plant (which will have three blast furnaces and eight open-hearth furnaces) was increased to 1,250 tons of pig-iron a day, 1,250,000 tons of ingot steel a year, and 790,000 tons of finished products a year.

The total cost of the plant was raised by £17,250,000 to about £97,000,000, the increase being designed "to improve the smooth and efficient operation of the plant and to facilitate its speedy expansion." The initial cost of the plant, equipment, and materials to be supplied by British firms was accordingly increased from £50,000,000 to £63,000,000.

A new clause was inserted aimed at providing ISCON with a strong incentive to keep down costs. Under this, an expenditure target of £15,600,000 (Rs.208,300,000) was fixed for plant, equipment and material manufactured or procured in India, as well as for labour and erection costs. If actual expenditure was lower, the first £375,000 of savings would accrue to the Government, whereas if the target were exceeded, the first £375,000 would be borne by ISCON. Any savings or excesses beyond these limits would be shared equally by ISCON and the Government of India.

It was stated that iron production at Durgapur would begin in June 1959 and steel production in December 1960.

A. SOVIET UNION. — Changes in State Economic Commission. - M. Pervukhin succeeds M. Saburov as Chairman. - New Directives for Economic Policy. - Revision of Five-Year Plan.

Following a five-day meeting of the Central Committee of the Soviet Communist Party (Dec. 20-24), which was devoted entirely to a discussion of economic problems, important new directives for Soviet economic policy were announced for 1957, involving certain changes in the new Five-Year Plan. In addition, important changes were announced in the membership of the State Economic Commission, which, with the State Planning Commission, is one of the two principal organizations dealing with economic planning in the U.S.S.R. [The State Economic Commission is the agency for current planning, while the State Planning Commission is responsible for long-term planning—see 14315 C.]

The changes in the State Economic Commission involved (*a*) the appointment of M. Mikhail Pervukhin as chairman of the Commission in place of M. Maxim Saburov, who was relieved of his duties, and (*b*) the appointment of six vice-chairmen - M. Kosygin, M. Malyshev, M. Khrunichev, M. Kucherenko, M. Matskevich (Minister of Agriculture) and M. Benediktov (Minister of State Farms). MM. Kosygin and Malyshev were appointed First Vice-Chairmen of the State Economic Commission, and both they and MM. Khrunichev and Kucherenko were given ministerial rank.

M. Pervukhin (52), an engineer, has been a member of the Central Committee of the Soviet Communist Party since 1939, a Deputy Premier since 1950, and a First Deputy Premier (a post he retains) since 1955. He had been appointed Minister for Power Plants and the Electrical Industry in 1953, and had previously served as Minister for the Chemical Industry. M. Saburov, though replaced in the chairmanship of the State Economic Commission, remained a First Deputy Premier and a member of the Central Committee's presidium.

Most of the six vice-chairmen have been associated with M. Khrushchev in various economic projects. M. Alexei Kosygin has been specially concerned with the production of consumer goods, and M. Vyacheslav Malyshev with the engineering industry and, it is believed, with Soviet atomic development.

The Central Committee issued a lengthy report which admitted the existence of "substantial weaknesses in State planning" and made detailed recommendations for remedial action. Special emphasis was placed on the need for modifications of the capital investment programme, for a greater housing drive, and for the increasing devolution of economic functions to the Union Republics. The report was divided into two sections, summarized below, dealing with (1) the current Five-Year Plan, and (2) "methods of improving economic leadership."

Modification of Five-Year Plan.

Confirming the general overall success of the first year (i.e. 1956) of the current Five-Year Plan, the report stated that Soviet industrial production had risen by 11 per cent over 1955; that similar successes had been obtained in agriculture, notably in bringing nearly 90,000,000 acres of virgin land under the plough in the last two or three years; and that there had been a nine per cent increase in consumer goods during the year. Moreover, substantial increases had been made in the wages of lower-paid workers under legislation introduced during the past year (see 15086 A).

The report admitted, nevertheless, that there had been many shortcomings in the first year of the Plan; e.g. the output of coal, metal, cement, and timber was not increasing as quickly as had been anticipated, new factories in these and other branches of the economy were not being completed with sufficient rapidity, and the housing programme was not being fulfilled. These weaknesses were attributed to "serious shortcomings in the planning of the national economy, and also to unsatisfactory management of enterprises and new projects in certain Ministries"; to the fact that planning bodies, in drawing up their programmes, had not taken sufficient account of "the real possibilities of providing the necessary material and financial resources for the targets they lay down"; and to the adoption of "unnecessarily big construction programmes" which gave rise to excessive strain in fulfilling them. Moreover, funds had been "scattered" over too many new projects, with resultant increases in costs and in the time required to complete the projects.

In adopting decisions "aimed at correcting these mistakes and weaknesses," the Central Committee announced that the draft of the current (sixth) Five-Year Plan, covering the years 1956-60, would be re-submitted to the Supreme Soviet during 1957. In conformity with the decisions of the 20th Party Congress, the major emphasis would continue to be placed on priority for heavy industry, uninterrupted technical progress, higher labour productivity, and a steep rise in agricultural production. Some of the original targets of the Five-Year Plan, however, would have to be amended to end the unnecessary strains on the economy mentioned above, and to bring the targets into line with available material resources. In particular, "materials and money must be used in the most rational and effective way."

To achieve these aims, capital investment in construction projects would be cut and material and financial resources concentrated primarily on major construction projects, and on those which were nearing completion. Special emphasis would be placed on speeding-up the "already vast housing programme," and it was essential in this connexion to carry out housing projects with the utmost economy, "cutting out all unnecessary elaborations which increase costs and slow down work."

The report emphasized that the Union Republics should play an increasingly greater role in economic construction, making the utmost possible use of their local resources. This meant that the economic organizations in the Republics should "accept increased responsibility for the fulfilment of the plans and a greater role in mobilizing the people to solve the tasks raised." It was also emphasized that "red tape and bureaucracy must be combated, criticism and self-criticism developed, and the creative activity and initiative of the working people supported in every way."

Rectification of Weaknesses in Economic Structure.

This section of the report said that a number of important measures were being carried out "aimed at improving State planning, abolishing excessive centralization in economic leadership, increasing the economic role of the Union Republics, expanding the rights of individual Ministries and economic organizations, and reducing and simplifying the administrative apparatus." "These measures," the report declared, "conform to the principles of socialist management, the basis of which is democratic centralism in economic leadership. Democratic centralism calls for all-round improvement of planning and for the consolidation of the planning principle in all economic activity. At the same time it implies the most careful and comprehensive consideration of local experience and local conditions, and active support for and encouragement of the creative initiative of local party, government, economic, and trade union organizations."

The "existing substantial weaknesses in State planning" (the report continued) were to be found "first and foremost" in the sphere of short-term planning [i.e. those planning activities falling within the responsibility of the State Economic Commission.] The planning bodies concerned were "not studying sufficiently the conditions of the various branches of production"; were "poorly connected with the Union and Autonomous Republics and with enterprises and scientific institutions"; were "making serious mistakes and omissions in drawing up plans for capital construction and supplies"; and were "coping poorly with their duties of checking up on the fulfilment of State plans."

After calling for a radical improvement in the work of the State Economic Commission, and in its short-term planning in particular, the report emphasized that the Commission and the Ministries concerned "must ensure the most rational and effective utilization of facilities, labour, raw materials, and financial resources." The State Economic Commission was called upon (1) to ensure that the necessary material resources were available for the fulfilment of planning targets; (2) to give special attention to the "systematic introduction into production on a wide scale of the latest scientific and technological developments, achievements, workers' innovations, suggestions and inventions"; and (3) to give "serious attention to specialization and co-operation among enterprises, to industrial contacts, and to the co-ordination of the economic activities of different areas."

The Central Committee's report said that the principal economic task of the U.S.S.R. was "to overtake and outstrip the most developed capitalist countries in production per head of population."—(Soviet Weekly - Times - Manchester Guardian)

A. UNITED KINGDOM. — Political Broadcasts. - Experimental Suspension of "14-Day Rule." - Report of Select Committee.

Sir Anthony Eden announced in the House of Commons on Dec. 18, 1956, that the Government had decided to suspend the "14-day rule" [i.e. the rule precluding broadcast discussions of matters awaiting Parliamentary debate within a period of 14 days before the debate takes place] for an experimental period of "about six months"

The Prime Minister explained that in view of the recommendations contained in the report of the Select Committee appointed in 1955 to inquire into the desirability of amending the rule (see below), the Government had considered whether some other method of upholding the primacy of Parliament could be found. Assurances had been received from the B.B.C., the Independent Television Authority, and the I.T.A. programme contractors that if the rule were suspended, they would continue to act "in a way which does not derogate from the primacy of Parliament as the forum for debating the nation's affairs," and in the spirit of the resolution approved by the House of Commons on Nov. 30, 1955 (see 14607 A). After consulting the Opposition, the Government had therefore decided to suspend the 14-day rule for an experimental period of about six months—possibly until the end of the present session—and to give further consideration to the Select Committee's recommendations when that period had elapsed. The Postmaster-General was withdrawing the rule accordingly.

A summary of the Select Committee's report—which had been published on June 22, 1956—is given below.

The report stated that after considering various reasons advanced to justify limitations upon the anticipation of Parliamentary debates by broadcasting—notably the possibility of unfair influence by Ministers, and the danger of undue pressure on M.P.s from outside—the Select Committee had reached the conclusion that "the only justification for a policy of limitation at the present time is the necessity for upholding the primacy of Parliament in debating the nation's affairs." The report continued: "Particular concern has been expressed about the advent of competition in the television field and the likelihood of a rapid increase in the number of alternative programmes. The committee are doubtful whether even this ground of objection can be regarded as providing anything more than a temporary justification for a special rule not applicable to other organs of publicity. Indeed the committee realize that the development of radio and television in Britain and the broadcast discussion of public affairs . . . have done much to encourage an intelligent interest in the work of Parliament."

With regard to the possibility of an arrangement under which the extent of the limitation, as well as its administration, would be left to the broadcasting organizations concerned, the report stated that the B.B.C. appeared to desire this, but that the I.T.A. had expressed a clear preference—if there had to be any limitation—for Parliamentary guidance. It added: "The committee have no doubt that the view of the I.T.A. is the soundor of the two, and recommend that the Government should take the responsibility of laying down and enforcing any restriction which Parliament may deem necessary."

The report also dealt with representations made to the committee alleging that, as a result of pressure brought to bear on the B.B.C. by Government and Opposition Whips or by party organizations, certain M.P.s had been unfairly or improperly excluded from certain regular programmes. After hearing evidence from the B.B.C., the Whips of the Conservative, Labour, and Liberal parties, representatives of party organizations, and one of the M.P.s concerned, the committee were satisfied (*a*) that the B.B.C. had "not been subjected to any improper pressure" and could "safely be relied on to defend itself from political interference; (*b*) that pressure exercised by the Whips and party organizations had been "directed only towards ensuring a reasonable balance of political views." The committee considered, however, that suspicions might have been needlessly aroused by the atmosphere of secrecy which had surrounded discussions, and that such suspicions would be largely removed if the considerations governing the selection of speakers on political subjects were more generally known. The committee also expressed the view that the effort to obtain strict impartiality had "resulted in certain cases in somewhat narrow decisions, notably where M.P.s had been invited to undertake wholly non-political broadcasts."

The Select Committee's principal recommendations were as follows:

(1) The ban on broadcast discussions should not begin to operate until seven days before the date arranged for the debate [i.e. a "seven-day rule" should be substituted for the "14-day rule"].

(2) Restrictions on broadcast discussions should not apply after a Bill had passed its second reading. [The Select Committee stressed that it was "undesirable and unnecessary" to apply the ban to the later stages of Bills.]

(3) The proposed seven-day restriction should be embodied in a prescription issued by the Postmaster-General. This prescription should be so drafted as to allow for relaxation at the Postmaster-General's discretion in individual instances, and should not apply to overseas broadcasts.

(4) The House of Commons should appoint a small committee or panel of M.P.s to advise the Postmaster-General on applications for relaxation of the rule.

(5) M.P.s should be treated in exactly the same way as other persons in the administration of restrictions on broadcasting in sound or television.

[The report explained that the B.B.C. had suggested that the restriction on broadcast discussions should be confined to M.P.s., but the Select Committee could see no justification for any such differentiation.]

(6) On the "difficult question" of the regular series of party political broadcasts and the annual Budget broadcasts, which "appeared to have caused uncertainty and confusion in the past," the Select Committee found it impossible in principle to justify the treatment of these broadcasts on a different basis from any others. It considered, however, that the deferment of Budget broadcasts until the debate on the Budget resolutions had been concluded "might well be found in practice to be more convenient and agreeable to the Chancellor of the Exchequer and the Opposition representatives."

The Select Committee consisted of 13 M.P.s drawn from the three parties (seven Conservatives, five Labour, one Liberal), with Sir Lionel Heald (C.), a former Attorney-General, as chairman. —(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. 14-Day Rule, 14607 A.)

B. ICELAND.—Agreement on Retention of U.S. Forces.

The U.S. State Department announced on Dec. 6, 1956, that Iceland would permit U.S. forces to remain at the Keflavik air base; that she had withdrawn her request for the withdrawal of the U.S. forces and the revision of the 1951 agreement; and that Notes had been exchanged providing that the 1951 agreement would remain substantially unchanged.

The new agreement, it was announced, provided for the setting-up of a "standing group," consisting of three "senior representatives" of each Government, which would be responsible for studying problems arising out of the agreement. The functions of this group would be:

"(1) To consult on the defence needs of Iceland and NATO in general, and to make recommendations for meeting them.

(2) To prepare plans for employing Icelandic nationals at the U.S. air base "insofar as qualified personnel are available," and to begin training programmes to qualify them for such work.

(3) To "resolve general problems of policy with regard to the relations between the Icelandic people and the U.S. defence force."

The State Department explained that the purpose of setting up this group was "to review and dispose of future problems as they develop," and thus to avoid the need for formal negotiations under the 1951 agreement.

It was also provided that 18 months would have to elapse between the time Iceland might in future notify the U.S.A. to withdraw her forces and the completion of such a withdrawal. The U.S.A. retained the right to ask the North Atlantic Council to review any such request in the light of the military situation then prevailing, although the Council's views, even if it should find Keflavik still vital to North Atlantic defence, would not necessarily compel Iceland to retain it as a U.S. base. The State Department indicated that the North Atlantic Council had been satisfied with this arrangement.

The State Department spokesman explained that "recent developments in world affairs," including the continuing threat to the security of Iceland and the North Atlantic community, had contributed to the Icelandic Government's decision to retain the U.S. forces at Keflavik; the Soviet intervention in Hungary had been one of the factors which had persuaded Iceland to withdraw her earlier demands.

About 4,000 U.S. troops are stationed at the Keflavik base, on which the U.S. Government has spent to date about $12,000,000 annually.

The new agreement was welcomed by all the Icelandic parties except the Communists. (New York Herald Tribune)

(Prev. rep. 15094 A; 14804 A.)

C. EGYPT. — Abrogation of Anglo-Egyptian Treaty.

Cairo Radio announced on Jan. 1 that President Nasser had abrogated the Anglo-Egyptian treaty of 1954 with retroactive effect from Oct. 31, 1956—i.e. the date on which the Anglo-French intervention was launched. The statement said that the British Government had "violated this treaty by its aggression against Egypt."

The 1954 treaty provided for the evacuation of all British forces from the Canal zone within 20 months; allowed Britain to maintain 4,000 technicians at the Suez base; and provided for the reactivation of the base in the event of an armed attack on Turkey or on any member of the Arab League. It was intended to run for seven years from the date of signature—i.e. until Oct. 19, 1961.

A British Foreign Office spokesman said that H.M. Government did not recognize the Egyptian Government's right to abrogate the treaty by unilateral action. (Times)

(Prev. rep. 1954 Treaty, 13833 A.)

JANUARY 5—12, 1957

A. UNITED KINGDOM. — Resignation of Sir Anthony Eden. - Mr. Macmillan becomes Prime Minister.

It was announced from Buckingham Palace in the evening of Jan. 9 that Sir Anthony Eden had tendered his resignation as Prime Minister to H.M. the Queen, who had accepted it.

The following statement was issued by Sir Anthony himself: "When I returned to this country a month ago [see 15263 C] I hoped that my health had been sufficiently restored to enable me to carry out my duties effectively for some considerable time. That hope has not been realized. I do not feel that it is right for me to continue in office as the Queen's First Minister knowing that I shall be unable to do my full duty by my Sovereign and the country. I have therefore decided, with the utmost regret, that I must tender my resignation to the Queen, which her Majesty has been graciously pleased to accept."

A medical bulletin, dated Jan. 8, was issued in the evening of Jan. 9 by Sir Horace Evans and three other doctors (Sir Gordon Gordon-Taylor, Dr. Thomas Hunt and Dr. Ralph Southward) stating that Sir Anthony Eden's health "gives cause for anxiety." It added: "In spite of the improvement which followed his rest before Christmas there has been a recurrence of abdominal symptoms. This gives us much concern because of the serious operations in 1953 and some subsequent attacks of fever. In our opinion his health will no longer enable him to sustain the heavy burdens inseparable from the office of Prime Minister."

After receiving his doctors' report on the unsatisfactory state of his health, Sir Anthony Eden had travelled to Sandringham in the evening of Jan. 8 for an audience with H.M. the Queen. He returned to London the following afternoon, summoned a Cabinet meeting for 5 p.m., and informed his colleagues that the state of his health made it impossible for him to remain head of the Government. At 6 p.m. Sir Anthony visited Buckingham Palace to tender his formal resignation to the Queen, who had meanwhile returned to the capital from Sandringham.

Sir Anthony Eden succeeded Sir Winston Churchill in the Premiership on April 6, 1955, and had thus been Prime Minister for a year and nine months—the shortest tenure of the Premiership since that of Mr. Bonar Law, who was Prime Minister for seven months in 1922-23.

Sir Anthony Eden's political career began in 1923, when he was elected M.P. for Warwick and Leamington—a constituency he had represented ever since. Before entering politics he fought with distinction in the First World War (being commissioned at 18, serving at Ypres, and gaining the M.C.) and had a brilliant academic career at Oxford, where he took a first in Oriental Languages.

His long connexion with foreign affairs began in 1926, when he became Parliamentary Private Secretary to the then Foreign Secretary, Sir Austen Chamberlain. In 1931 he became Under-Secretary at the Foreign Office when the National Government was formed. One of the strongest supporters of the League of Nations in the years before the Second World War, he became Minister for League of Nations Affairs in Mr. Baldwin's Cabinet, taking part in the Stresa conference and in the discussions aimed at setting up an "eastern Locarno."

Mr. Eden (as he then was) first became Foreign Secretary in 1935, following the resignation of Sir Samuel Hoare (now Lord Templewood) after the publication of the Hoare-Laval proposals on Abyssinia. His three-year tenure of that office coincided with a series of international crises caused by the actions of the European dictators—Hitler's reoccupation of the Rhineland, Mussolini's invasion of Abyssinia, and the Italo-German intervention in the Spanish Civil War. In February, 1938, he resigned from the Government in protest at Mr. Neville Chamberlain's "appeasement" policy.

On the outbreak of the Second World War he re-entered the Chamberlain Cabinet as Secretary for the Dominions, and in May, 1940 became Secretary for War in the Churchill Cabinet—in which capacity he formed the Local Defence Volunteers (the forerunners of the Home Guard) at a time of threatened German invasion. In December 1940 he succeeded Lord Halifax as Foreign Secretary, remaining at the Foreign Office until the end of the war. He took part in all the important inter-Allied war conferences, and played a leading role in establishing the United Nations as the successor organization to the pre-war League of Nations.

After the Labour victory in the 1945 general elections Mr. Eden served for six years as Deputy Leader of the Opposition in the House of Commons. He returned to the Foreign Office in 1951, after the Conservative electoral victory of that year, and served as Foreign Secretary until April 1955, when he succeeded Sir Winston Churchill as Prime Minister. Among the international problems with which he had to deal during this period were the wars in Korea and Indo-China, the Anglo-Persian oil dispute, the Anglo-Egyptian dispute on the Suez Canal Zone, the Austrian State treaty negotiations, the efforts to establish a European Defence Community, and the problem of German reunification.

Two outstanding diplomatic successes were achieved by Mr. Eden in 1954—firstly, in helping to end the war in Indo-China, and secondly, in bringing about the London and Paris Agreements after the E.D.C. project had been rejected by the French National Assembly. After participating in the Four-Power Berlin conference (February 1954) on the German problem, he took part in the Geneva conference at which, largely due to his diplomatic skill, agreement was reached on Indo-China and the war in that area ended (July 1954). In September of the same year, after the French rejection of the E.D.C., he made a rapid tour of a number of European capitals and subsequently convened the Nine-Power conference in London at which the London and Paris Agreements were worked out, and which included a British guarantee to keep four divisions and a tactical air force on the Continent for 50 years. In 1954, also, agreement was reached with Egypt on the revision of the 1936 treaty (which Mr. Eden had negotiated) and on the withdrawal of British forces from the Canal Zone to Cyprus.

Sir Anthony, who had been made a Knight of the Garter in October 1954, succeeded Sir Winston Churchill as Prime Minister in April 1955. He also succeeded Sir Winston as leader of the Conservative Party, and was returned to office with an increased majority in the elections of May 1955. Later in the year he took part in the Geneva meeting of Heads of Government, and in the spring of 1956 had discussions with Marshal Bulganin and M. Khrushchev during their visit to Britain.

Following the Egyptian nationalization of the Suez Canal in July 1956, and the threatened disintegration of the Government's policy in the Middle East, the last few months of Sir Anthony Eden's Premiership were dominated by attempts to restore the Middle East situation—firstly by the London conferences on the Suez Canal, and subsequently by the military intervention in Egypt following Israel's attack in the Sinai peninsula.

In 1953 Sir Anthony had had to undergo three operations—two in London and one in Boston, U.S.A.—for inflammation of the gall-bladder, followed by several months of convalescence [see 13057 C]. Though he subsequently made a good recovery and resumed public life, he had two feverish attacks in the autumn of 1956, and throughout the Middle East crisis was known to have been working under great physical strain. In November he had to cancel all his engagements because of severe overstrain, and on the advice of his doctors spent a three-weeks' holiday in Jamaica for complete rest.

Mr. Harold Macmillan becomes Prime Minister.

After consultations during the morning of Jan. 10 with Sir Winston Churchill and Lord Salisbury, who paid separate visits to Buckingham Palace, the Queen sent for Mr. Harold Macmillan, the Chancellor of the Exchequer, and invited him to become Prime Minister and to form a new Government. Mr. Macmillan accepted this invitation, was received in audience by the Queen during the afternoon, and kissed hands on taking up his appointment.

Mr. Harold Macmillan (62), the son of Maurice Crawford Macmillan—a founder of the well-known publishing firm—was born in 1894 and educated at Eton and Balliol College, Oxford, where he took a first in Classics. In the First World War he served in the Grenadier Guards, being wounded three times and winning the M.C. He entered Parliament as Unionist M.P. for Stockton-on-Tees in 1924, lost the seat in 1929, but regained it in 1931 and held it until 1945, when he was returned for Bromley, his present constituency.

Like Sir Anthony Eden, he was strongly critical of the pre-war "appeasement" policy, and in 1936 voted against the National Government's decision to abandon the policy of sanctions against Italy. He afterwards refused the party whip and for more than a year sat in the House as an Independent Conservative. A member of Mr. Churchill's Coalition Government throughout the Second World War, he was Parliamentary Secretary to the Ministry of Supply and Under-Secretary for the Colonies (1940-42) before his appointment as Resident Minister at Allied H.Q. in North Africa, a post he held until 1945. For a short period in the latter year he was Secretary for Air in the "caretaker" Government.

As Minister of Housing and Local Government from 1951-54, in Mr. Churchill's Conservative Cabinet, Mr. Macmillan achieved a notable personal success in fulfilling his party's election pledge to build 300,000 houses a year—a task he achieved within two years. He also piloted through Parliament the Housing Repairs and Rents Bill, an important slum-clearance measure. He was Minister of Defence from October 1954 to April 1955, when he succeeded Sir Anthony Eden as Foreign Secretary after Sir Anthony took over the Premiership from Mr. Churchill. After seven months at the Foreign Office Mr. Macmillan succeeded Mr. Butler as Chancellor of the Exchequer (December 1954), in which capacity he took a number of measures to tighten the "credit squeeze"—e.g. by raising the Bank rate to 5½ per cent (its highest point since 1931), intensifying the hire-purchase restrictions, reducing capital investment, reducing the bread and milk subsidies, and imposing severe restraint on loans to local authorities. An innovation in his last Budget (April 1956) was the introduction of the Premium Bonds scheme.

Mr. Macmillan, who is half-American by descent (his mother having been the daughter of an Indiana doctor), married in 1920 Lady Dorothy Cavendish, daughter of the ninth Duke of Devonshire. He has one son—Mr. Maurice Macmillan, Conservative M.P. for Halifax—and three daughters. He is the author of a number of

publications on economic and industrial organization—*Planning for Employment* (1935), *The Middle Way* (1938), *Economic Aspects of Defence* (1939), etc.—and played an important part in drafting the Conservative Party's *Industrial Charter* and its policy statement *The Right Road for Britain.*

Mr. Macmillan spoke as follows in a short broadcast in the evening of Jan. 10:

"This afternoon the Queen did me the great honour to ask me to form a Government. I accepted this duty. The occasion is a sad one for me, brought about as it is by the retirement of my old and very dear friend Anthony Eden. Sir Anthony first attained one of the highest offices of State, the Secretaryship at the Foreign Office, 21 years ago. For many of the intervening years, in office and out of office, he has given himself to the service of the people of this country. Now the years of hard work and endeavour have taken their toll of his health and strength. He has felt unable to continue. I am sure there is not one of you who would not join with me in wishing him good health and a speedy recovery.

"I am now engaged in forming a Government which I shall present for the Queen's approval in a few days. We have a difficult task before us. All of us will need all our courage and strength, and we shall need the sympathy, goodwill and understanding of everyone in the country, whatever their party or beliefs. I believe we shall have that sympathy and I am certain that, with the efforts of all, we can succeed."

It was announced on Jan. 11 that Sir Anthony Eden had resigned as M.P. for Warwick and Leamington owing to the state of his health. It was also reported in the Press that Sir Anthony was understood to have been offered an earldom by H.M. the Queen, but had sought her permission to decline the honour for the time being.

Sir Anthony wrote as follows on Jan. 10 to Mr. E. L. Claridge, chairman of the Warwick and Leamington Divisional Conservative Association: "I have been M.P. for Warwick and Leamington for more than 33 years. During that time . . . a close personal connexion has grown between the Member and his constituency. After so long a period our relationship has become that of true friends, nor is this confined, I believe, to members of one political party . . . You will imagine, therefore, with what regret I have to write this letter. I do not feel that this important constituency . . . should be represented by anyone who is not fit and able to give his full time to the task. The life at Westminster in these days is a strenuous one for which I clearly have not the present health. In those circumstances I have no doubt where my duty lies. With real sorrow I am taking the necessary official steps to give up my representation in the constituency."

The Parliamentary Committee of the Labour Party (the "Shadow Cabinet"), after a meeting on Jan. 11, said that it had discussed "the situation arising from the resignation of the Rt. Hon. Sir Anthony Eden and the appointment of the Rt. Hon. Harold Macmillan as his successor"; that it was "examing further the constitutional implications of the way in which this change was brought about"; and that it would meet again in the following week.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15263 C; 14129 A.)**

A. INDIA. — Decisions on Calendar Reform.

It was announced in New Delhi on Oct. 24, 1956, that the Government of India had taken the following decisions in the matter of calendar reform, following the report of the Calendar Reform Committee:

(1) The Gregorian Calendar should continue to be used, as hitherto, for official and similar purposes.

(2) The Uniform National Calendar proposed by the Committee should be adopted with effect from March 22, 1957 (corresponding to First Chaitra, 1879 of the Saka Era) for certain official purposes in conjunction with the Gregorian Calendar. The official purposes would be: (*a*) the publication date of the *Gazette of India* should bear the Saka Era date in addition to the Gregorian date; (*b*) in opening news broadcasts in various languages by All-India Radio, the Saka Era date should be announced in addition to the Gregorian date; (*c*) calendars issued by the Government should progressively give Saka Era dates in addition to Gregorian dates.

(3) There should be no deviation from prevailing custom in the observance of holidays connected with religious festivals, but the dates suggested by the Committee would be followed as far as possible.

The Government did not, therefore, accept the Committee's recommendation that the Gregorian Calendar should be altogether superseded by the new national calendar.
(The Hindu, Madras) **(Prev. rep. 14809 A.)**

B. CZECHOSLOVAKIA. — Dropping of Soviet Anthem by Prague Radio.

Under an Order which became effective on Dec. 25, 1956, the Czechoslovak State Radio ended the practice of playing the Soviet National Anthem at midnight each night. The anthem had been played since the Communist seizure of power in 1948, as a tribute to the Soviet "liberation" of Czechoslovakia at the end of the Second World War and to the friendship between Czechoslovakia and the U.S.S.R.—(Times)

C. INTERNATIONAL BANK. — Recent Loans.

Recent loans by the World Bank are summarized below:

Australia. (*a*) $9,230,000 on Nov. 23 to the Commonwealth Government. Together with a further loan of $17,770,000 from private institutional investors, this will be used to purchase Boeing and Lockheed aircraft and spare parts for Qantas Empire Airways Ltd. Terms for the International Bank's loan were 4½ per cent per annum, repayable semi-annually between June 1964 and December 1966.

(*b*) $50,000,000 on Dec. 5 for purchasing equipment from the dollar area for developing agriculture and forestry, road and rail transport, and industry and mining. Terms: 4½ per cent p.a. interest including 1 per cent commission, repayable in 15 years beginning July 15, 1959.

The loan will be allocated as follows: (i) $17,200,000 to agriculture and forestry for purchasing heavy tractors, agricultural machinery and implements, and components which will enable agricultural machinery to be manufactured in Australia; (ii) $12,800,000 to road transport for the purchase of trucks, tractors, components for truck manufacture in Australia, and equipment for building and maintaining roads; (iii) $4,000,000 to the railways for purchasing components for manufacturing diesel-electric locomotives and other rolling stock, and equipment for track control and goods-wagon maintenance; (iv) $16,000,000 to industry and mining for purchasing specialized equipment for the iron and steel, engineering, and food processing industries, and for lead, zinc, copper, and coal mining.

India. $20,000,000 on Dec. 20 to the (privately-owned) Indian Iron and Steel Company, India's second largest steel producer, to expand semi-finished and finished steel production at the Burnpur works (West Bengal) to 800,000 tons a year. The First National City Bank, the Irving Trust Company, and the Philadelphia National Bank participated in the loan without the World Bank's guarantee to a total of $1,032,000. Terms: 5 per cent p.a. interest including 1 per cent commission, repayable in 11 years commencing April 15, 1960. The loan was guaranteed by the Indian Government.

This was the second loan to the IISCO, which, together with a loan of $75,000,000 to the Tata Iron and Steel Co. Ltd. in June 1956 (see 15019 B), brought India's total borrowings from the World Bank for iron and steel production to $126,500,000. Production of these two privately-owned companies is planned to reach a total of 2,300,000 tons of finished steel per annum.

Japan. (*a*) $20,000,000 on Dec. 19 to the Japan Development Bank (a government agency), to be re-lent to the privately-owned Kawasaki Steel Corporation to help finance the construction, at its Chiba (Tokio Bay) plant, of a modern strip mill, additional soaking pits, and iron-ore pelletizing equipment, producing 390,000 tons of hot strip p.a., the bulk to be processed into 300,000 tons of cold strip. The First National City Bank of New York participated in the loan without the World Bank's guarantee to the extent of $1,252,000. Terms: 5 per cent p.a. interest including 1 per cent commission, repayable in 15 years commencing May 15, 1960.

(*b*) $4,300,000 on Dec. 19 to the Agricultural Land Development Machinery Public Corporation (set up by the Government in 1955) for establishing three pilot projects covering 54,000 acres of waste land to test the feasibility of large-scale mechanical reclamation, and for purchasing 5,000 head of dairy-breeding cattle from Australia. Land reclamation will take place in three different areas in Northern Japan—Kamikita (Northern Honshu), the Konsen plain (Eastern Hokkaido), and the Ishikari River Valley (Western Hokkaido)—and if successful will be extended on a larger scale to other areas. Terms: 5 per cent p.a. interest including 1 per cent commission, repayable in 15 years commencing Nov. 1, 1959.

Both loans were guaranteed by the Japanese Government. They brought total World Bank loans to Japan to $76,077,000.

Nicaragua. $1,600,000 on Nov. 15 to the *Empresa Nacional de Luz y Fuerza* of Managua (an autonomous government corporation) for power development. The loan, in which the Grace National Bank of New York participated to the extent of $101,000 without the World Bank's guarantee, was supplementary to that made in July 1955 (see 14420 A). Terms: 4½ per cent p.a. interest including 1 per cent commission, repayable in 15 years commencing Oct. 1, 1959. The loan was guaranteed by the Nicaraguan Government, and brought total loans by the International Bank to Nicaragua to $23,000,000.

On Jan. 10 the World Bank offered an issue of $100,000,000 4½ per cent 20-year bonds, for sale in the United States. (International Bank, Washington - Financial Times)
(Prev. rep. World Bank Loans, 15200 B.)

D. ALBANIA. — Expulsion of Yugoslav Diplomat.

It was announced in Belgrade on Jan. 11 that the Albanian Government had declared the First Secretary of the Yugoslav Legation in Tirana (Mr. Vucich) to be *persona non grata*, and had asked him to leave the country as soon as possible. No official reason was given by the Albanian Government for the expulsion of Mr. Vucich. In recent weeks the Yugoslav Government and President Tito had been bitterly attacked in Albania, particularly since Marshal Tito's speech at Pula (see 15258 A) in which he strongly criticized the Albanian Prime Minister, Enver Hoxha.—(Tanjug Agency, Belgrade - Times)

A. SAAR TERRITORY. — Merger with German Federal Republic. - French and German Ratification of Treaties on the Saar, Moselle Canalization, and Upper Rhine Waters. - Luxemburg Ratification of Moselle Agreement. - German Financial Aid for the Saar. - Withdrawal of Democrats from Saar Government.

The Saar territory was incorporated in the German Federal Republic at midnight on Dec. 31, 1956, thereby becoming the tenth *Land* of the Republic. Dr. Adenauer, the Federal Chancellor, visited Saarbrücken on Jan. 1, a formal "Act of State" taking place at the Saarbrücken municipal theatre to mark the Saar's reunion with Germany. Both Dr. Schneider, who had previously resigned as President of the Saar *Landtag* (see below), and Dr. Hoffmann (leader of the Saar Christian People's Party), were absent from the ceremony.

Press correspondents stated that while Dr. Adenauer was given a warm welcome, there was a complete absence of enthusiastic celebrations such as had marked the merger of the Saarland with the former German Reich during the Hitler régime in 1935. It was explained that this was due to a number of factors—a conscious official attempt to avoid hurting French feelings; the threatened loss of some of the high social security benefits which the Saarlanders had enjoyed under French legislation; and concern on the part of smaller businessmen at the danger of big German concerns establishing themselves in the Saar and putting them out of business.

The final stages leading up to the incorporation of the Saar in the German Federal Republic are summarized below.

French Ratification of Saar, Moselle Canalization, and Upper Rhine Treaties and Conventions.

A Bill authorizing the ratification of the treaties, conventions, and protocols in connexion with the settlement of the Saar question was passed by the French National Assembly on Dec. 12 by 320 votes to 216. The agreements in question were (*a*) the Franco-German treaty on the Saar; (*b*) the convention between France, Western Germany, and Luxemburg on the canalization of the Moselle, and the supplementary Franco-Luxemburg protocol; (*c*) the Franco-German convention on the utilization of the waters of the Upper Rhine between Basle and Strasbourg; (*d*) the treaty modifying the membership of the Assembly of the European Coal and Steel Community.

The Bill also permitted Saarlanders to apply for French nationality without having fulfilled the residence conditions normally laid down, and authorized Saarlanders to carry on in France the professions of doctor, dentist, midwife, pharmaceutical chemist, and veterinary surgeon, provided they had the necessary qualifications as well as French nationality at the time of the entry into force of the Franco-German treaty.

The debate was opened on Dec. 11 by **M. Mutter** (Independent), *rapporteur* of the Foreign Affairs Commission. M. Mutter recommended ratification of the various treaties and conventions, though describing the provisions for the closing of the Vuillemin pit [on the French side of the Warndt mines] as an "economic aberration" which would involve the abandonment of a modern pit and the "expenditure of millions," both by France and the Saar, for constructing new facilities to exploit the area's coal deposits. **M. de Bailliencourt** (Radical), *rapporteur* of the Industrial Production Commission, also spoke in support of ratification, pointing out that during the next 25 years France would receive a total of 127,000,000 tons of coal from the Saar, or an average of 5,000,000 tons annually, representing nearly one-tenth of her own production. The canalization of the Moselle, he pointed out, would reduce transport costs for iron-ore and coal between Lorraine and the Ruhr by 46 to 65 per cent.

M. Caillavet (Radical) stated that the Finance Commission had also favourably reported on the agreements, but expressed his own disapproval, asserting that only Germany would derive advantages from the treaty and that France would be the loser. **M. Engel** (M.R.P.), a deputy for the Moselle department, and **M. Bouhey** (Socialist), though supporting the agreements, were highly critical of the proposed closing of the Vuillemin pit, which the former denounced as "technical, economic, and financial heresy" due solely to "Saar nationalism."

The agreements were strongly opposed by **M. Naudet** (Radical), who maintained that they constituted "a setback for France and for Europe," involved a threat to the French balance of payments and French cultural influence, and upset the equilibrium within the European Coal and Steel Community; by **M. Dronne** (Social Republican *apparenté*), who declared that the abandonment of the Saar would "only whet the appetite of German nationalism"; and by **M. Kriegel-Valrimont** (Communist), who alleged that "the real beneficiaries of the whole transaction" would be "the Ruhr magnates" and "the Röchling family."

M. Klock (M.R.P.), who supported ratification on behalf of the Economic Affairs Commission, said that the agreements were "not a unilateral renunciation by France but an honourable compromise between two great countries on the road towards frank and loyal collaboration." **M. Louvel** (M.R.P.) agreed with this view but suggested that the French mines in Lorraine should be indemnified for the extra expense connected with the closing-down of the Vuillemin pit and the necessary measures of readjustment. **M. Lapie** (Socialist deputy for the Meurthe-et-Moselle department) called on the Government to extend the canalization of the Moselle up-river to Nancy, and also to widen the southern section of the *Canal de l'Est* so as to link Lorraine with Strasbourg.

M. Maurice Faure (Radical), State Secretary for Foreign Affairs, replied to the debate. He pointed out that the difficulties concerning the Vuillemin pit had been due to "Saar nationalism and not to German nationalism," and that the German Federal Government had undertaken to pay for the loss of the Warndt coal to France by promising to make extra coal supplies of the same quality available at such a price that the financial equilibrium of the Lorraine mines would not be affected.

As regards the Moselle canalization, M. Faure stated that after the setting-up of the new company, two sections would be started in 1957—one in Germany south of Trier, the other in France between Thionville and the frontier. He repeated a statement made the previous day that if Germany did not fulfil her engagement in this respect, France would consider herself free from all obligations.

Dealing with the return of the Völklingen steel works to the Röchling family, M. Faure said this was the only instance where one could justifiably speak of a "lost opportunity." He expressed regret that the French Government had not decided after 1947 to buy the works outright, and recalled that when it had later asked French steel industrialists and finance groups associated with the steel industry to buy the works, no satisfactory offer had been made.

Appealing for ratification, M. Faure emphasized that the agreements "seal the reconciliation of the two countries, help in the construction of Europe, and reinforce the Atlantic Alliance."

M. Guy Mollet (the Prime Minister), in a strong appeal for ratification, emphasized that France and Western Germany, though defending their respective national interests in working out the agreements, had never lost sight of joint Franco-German interests nor of the common European interest. Although a "Europeanized Saar" would have constituted a link between France and Germany, the present agreement—if accepted without mental reservation—would achieve the same result and become the basis of a Franco-German *entente* and solidarity, which was the first condition of any European union. France's true interests were "not to maintain a permanent quarrel with her German neighbour but rather to join with Germany in establishing a growing solidarity between all European countries, and to build an integrated Europe which may be able tomorrow to dominate the atomic revolution, and which will constitute an economic whole in the modern world."

Four amendments were accepted by the Government for insertion in the Bill:

(1) Adding the professions of lawyer, notary public, and architect to those which Saarlanders could exercise in France on the above-mentioned conditions;

(2) Authorizing the transfer of Saarlanders who had held positions in the Saar public administration to the French public services, even if they should acquire French nationality less than five years before they entered the French service;

(3) Providing for compensation for certain Saarlanders who would incur losses as a result of the Saar's integration with Germany;

(4) A new clause (*a*) laying down that the French Government would investigate with the German Federal Government, before Dec. 31, 1966, "the possibilities of an economic exploitation of the Vuillemin pit, after consultation with the High Authority of the European Coal and Steel Community," and (*b*) committing the Government to negotiate a settlement with the German Federal Republic which would guarantee the most economic way of exploiting the Warndt mines in conformity with the treaty setting up the E.C.S.C.

Amendments (1)—(3) were moved by M. Dorey (M.R.P.), and the fourth amendment by M. Mondon (Independent) and M. Engel (M.R.P.).

The 320 deputies voting for ratification consisted of 99 Socialists (out of 100); 75 Independents (out of 85); 71 M.R.P. members (out of 74); 19 U.D.S.R. deputies (out of 20); 18 Radicals (out of 46); 12 Dissident Radicals (out of 14); 10 *paysans* (out of 14); eight Social Republicans (out of 21); all seven Overseas Independents; and one *non-inscrit*.

The 216 deputies voting against the Government were 142 Communists (out of 143) and the six *progressistes*; 37 Poujadists (out of 39); 19 Radicals (including M. Mendès-France and M. Daladier); five Independents; five *non-inscrits*; one U.D.S.R. deputy; and one dissident Radical.

The 28 deputies who did not take part in the vote consisted of 11 R.G.R., six Radicals, six *non-inscrits*, three Social Republicans (including M. Dronne), one dissident Radical, and one *paysan*. Another 18 deputies were absent.

After the vote, however, the R.G.R. group [i.e. the Radicals supporting M. Edgar Faure and opposing M. Mendès-France] announced that the fact that its deputies had been recorded as not having taken part in the vote had been due to an error, since they had in reality voted for ratification, as had previously been announced by their spokesman, General Corniglion-Molinier.

The Council of the Republic approved ratification of the agreements on Dec. 27 by 209 votes to 66.

The Council added a resolution, however, asking the Government to set up a Customs control between the Saar and France; to ensure the financing of the conversion measures to be undertaken by the Lorraine mines (because of the closing down of the Vuillemin pit), and to negotiate a protocol with Western Germany providing for the completion of the Moselle canalization in less than five years.

German Ratification of Agreements. - The Saar Integration Bill.

Four Bills authorizing ratification of the Saar treaty, the Moselle canalization convention, the convention for the exploitation of the waters of the Upper Rhine, and the amendments to the European Coal and Steel Community treaty, were given an unopposed first reading in the West German *Bundestag* on Nov. 29, and sent to the competent committees. The *Bundestag* also gave a first reading to the Saar Integration Bill, whose principal provisions were as follows:

(1) The Saar would become a *Land* of the Federal Republic, and, subject to the provisions of the Franco-German treaty, the Basic Law of the Federal Republic would apply to the Saar as from the Bill's entry into force. The one-year period within which a territorial re-organization of a *Land* could be demanded by popular initiative, in accordance with Article 29 of the Basic Law [see page 10163], would start for the Saar on Jan. 1, 1960. German nationality law would also apply to the Saar.

(2) The Saar would be represented in the present *Bundestag* by 10 members, who would be chosen by the Saar *Landtag* from among its membership and in proportion to party strengths as at Jan. 1, 1957. The Saar representatives would have full voting powers.

(3) Saar legislation would remain in force unless it was in conflict with the Basic Law.

(4) The Saar *Landtag*, during the transitional period to Dec. 31, 1959, would be empowered to amend or rescind legislation regulating Saar monopolies, and also to amend or rescind Federal law in all matters subject to concurrent legislative competence, unless such Federal legislation had been specifically extended to the Saar. Legislation issued by the former Occupation authorities would not be affected.

(5) In order to protect the Saar economy, it was provided that during the transitional period, and for six months thereafter, any person or company not normally resident or trading in the Saar on Jan. 1, 1957, would require permission from the Saar Government for starting commercial or industrial activities. This permission could be refused if such activities were considered to endanger the legitimate interests of the Saar economy or any of its branches.

(6) In accordance with the Saar treaty, the Saar would retain until the end of the transitional period all taxes levied in its territory, including Federal taxes; correspondingly, it would be responsible for all expenditure within its territory, even where such expenditure was borne in the other *Länder* by the Federal Government. Provision was made for special grants by the Federal or *Länder* Governments to help the Saar to meet a deficit not otherwise covered, and to "further the adjustment of the Saar economy to the economic structure and development in the rest of the Federal territory."

(7) The Saar railways and postal services would be merged with the German Federal railways and posts administration as from Jan. 1, 1957. All civil servants, employees, and workers on the railways and in the postal services would be taken into Federal service.

(8) For electoral purposes the Saar would be divided into five constituencies.

(9) The Federal Government was authorized to issue decrees for the introduction of the Deutschemark as the currency in the Saar; for the conversion of claims and debts; and for exempting the Saar population from certain taxes and duties "with a view to achieving a fair balance of the economic advantages and burdens connected with the territory's merger in the Federal Republic." Such decrees would require prior consultation with the Saar Government.

During the first reading debate, Dr. von Brentano (Foreign Minister) appealed on behalf of the Federal Government for the ratification of the agreements with France.

Dr. von Brentano described the Saar treaty as "a first decisive step towards reunification in peace and freedom"; said that it represented a "convincing proof of the correctness and necessity of the policy of European understanding and co-operation"; and welcomed it as "a contribution to the relaxation of world tension." The Federal Government had never doubted that a satisfactory settlement of the Saar question could only be found on the basis of a Franco-German understanding, and the conclusion of the treaties represented "a truly historic event" in Franco-German relations.

The ratification Bills and the Saar Integration Bill were finally passed by the *Bundestag* on Dec. 14, by unanimous vote. The *Bundesrat*, which had given the Bills a first reading on Nov. 23, finally passed them on Dec. 21, all the agreements being signed by President Heuss on the following day.

Luxemburg Ratification of Moselle Canalization Agreement.

The Luxemburg Parliament approved on Dec. 27 the treaty on the canalization of the Moselle River and the supplementary Franco-Luxemburg protocol on certain compensation to be made by France. The voting was 41 to three (one Socialist and two Communists), with one Socialist abstaining. All the other Socialist deputies, as well as the Christian Socials (Catholics) and the Liberals, supported ratification.

Saar Adherence to Federal Republic - Democrats' Withdrawal from Saar Government. - Dr. Schneider's Resignation as President of Saar Landtag.

The Saar *Landtag* approved on Dec. 13 a declaration of adherence to the German Federal Republic by 35 votes to two (Communists), with 13 abstentions (Democrats). The declaration was worded as follows:

"The *Landtag* of the Saar Territory, implementing the wish of the Saar population as expressed by the plebiscite of Oct. 23, 1955, and after noting the treaty signed on Oct. 27, 1956, between the German Federal Republic and the French Republic for the regulation of the Saar question, declares the adherence of the Saar Territory to the Federal Republic in accordance with Article 23 of the Basic Law."

Immediately after the vote Dr. Schneider (the leader of the Democratic Party) announced his resignation as President of the *Landtag*, while the two Democratic Ministers -Herr Schuster (Interior) and Herr Schwertner (Reconstruction) resigned from Dr. Ney's coalition government.

The Democrats' attitude was explained in a statement by Dr. Schneider, who said that his party was not opposing the Saar's integration in Western Germany but objected to the decision having been taken without sufficient guarantees on the part of the Federal Government to maintain the existing social security benefits in the Saar (see below). The withdrawal of the Democratic Ministers ended the coalition of the three parties grouped in the *Heimatbund*, and left Dr. Ney's Government with only the support of the Christian Democrats and Social Democrats, together commanding no more than 22 seats of the *Landtag's* total membership of 50.

German Financial Aid to the Saar. - Social Security Benefits.

The Federal Government decided on Dec. 12 to allocate 350,000,000 DM. (nearly £30,000,000) in 1957 to cover the deficiency in the Saar budget and help to modernize the Saar economy. It was stated that this sum included 50,000,000 DM. of Marshall Plan counterpart funds.

Of the total Federal contribution, 100,000,000 DM. will be used to increase the capital of the Saar mines, which became Federal property upon the integration of the Saar; between 80,000,000 and 100,000,000 DM. will be spent on the modernization of economic enterprises; about 30,000,000 DM. will be a first instalment for road construction, including the extension of the *Autobahn* from Mannheim to the Saar border; 54,000,000 DM. will be used to cover a tax deficiency in the Saar caused by tax allowances to be granted to the Saar economy; and part of the balance will be spent on the electrification of the Saar railways.

As a result of differences which had arisen between the Saar Labour Minister (Herr Conrad) and the Federal Labour Minister (Herr Storch), during which Herr Conrad alleged that the Federal Government had failed to keep its earlier promise to maintain the existing social security benefits in the Saar, the Federal Cabinet issued a statement on Dec. 12 pointing out that during the transitional period it would be necessary to adjust the French system at present applying in the Saar to the German social security system. An assurance was given that this would "neither cause a reduction in overall benefits, nor was it intended to bring about such a reduction."

Völklingen Steelworks returned to Röchling Family.

Following the Franco-German agreements, the French Government decided on Nov. 14, after negotiations with the Röchling family, to return the iron and steel works at Völklingen to the Röchling family against a payment of 3,000,000,000 francs (over £3,000,000) as reparations in return for France's renunciation of her dismantling rights after the war. French control of the works was accordingly ended, and the works were handed back to the Röchling family on Nov. 28, 1956.

The Völklingen works, the biggest in the Saar, produced over 1,000,000 tons of steel in 1955. They will now become part of an important new heavy industrial combine in Western Germany, since the Röchling family had a few months earlier acquired a majority share in the Berlin firm of Rheinmetall-Borsig and its subsidiary company in Düsseldorf, an important steel-refining and engineering concern.—(Le Monde, Paris - Le Figaro, Paris - Frankfurter Allgemeine Zeitung - Die Welt, Hamburg) **(Prev. rep. 15165 A.)**

Note. The International Moselle Canalization Company, a private company to be incorporated in Germany with headquarters at Trier, will have a capital of 102,000,000 DM., of which France and Germany will each hold 50,000,000 DM. and Luxemburg 2,000,000 DM., in return for her taking over 2,000,000 DM. of the French share of 250,000,000 DM. of the building costs. A Moselle Commission consisting of representatives of the three countries, with its seat at Trier, will deal with the navigation régime and shipping dues on the river. (Ed. K.C.A.)

A. UNITED STATES. — President Eisenhower's New Middle East Policy. - Request for Congressional Authority to protect Middle East Countries from Communist Aggression. - Proposals for U.S. Military and Economic Aid to Threatened Countries.

President Eisenhower delivered a special message to the U.S. Congress on Jan. 5 in which he set out the Administration's proposals for a new Middle Eastern policy, including (1) a programme of U.S. economic and/or military aid to any nation or group of nations in the area desiring such aid; (2) the employment of U.S. armed forces "to secure and protect the territorial integrity and political independence of nations requesting such aid against overt armed aggression from any nation controlled by international Communism." These measures "would have to be consonant with the treaty obligations of the United States, including the U.N. Charter, and with any action or recommendations of the United Nations." In the event of an armed attack, such aid would be "subject to the overriding authority of the Security Council."

The Presidential message was worded as follows:

"In my forthcoming State of the Union Message I shall review the international situation generally. There are world-wide hopes which we can reasonably entertain, and there are world-wide responsibilities which we must carry to make certain that freedom -including our own—may be secure. There is, however, a special situation in the Middle East which I feel I should, even now, lay before you.

"Before doing so it is well to remind ourselves that our basic national objective in international affairs remains peace—a world peace based on justice. Such a peace must include all areas, all peoples of the world, if it is to be enduring. There is no nation, great or small, with which we would refuse to negotiate, in mutual good faith, with patience and in the determination to secure a better understanding between us.

"Out of such understandings must, and eventually will, grow confidence and trust -indispensable ingredients to a programme of peace and to plans for lifting from us all the burdens of expensive armaments. To promote these objectives our Government works tirelessly . . . But until a degree of success crowns our efforts . . . we must, in the interests of peace itself, remain vigilant, alert and strong.

"The Middle East has reached a new and critical stage in its long and important history. In past decades many of the countries in that area were not fully self-governing. Other nations exercised considerable authority in the area and the security of the region was largely built around their power. But since the First World War there has been a steady evolution towards self-government and independence. This development the U.S.A. has welcomed and encouraged. Our country supports without reservation the full sovereignty and independence of each and every nation of the Middle East.

"The evolution to independence has in the main been a peaceful process. But the area has often been troubled. Persistent cross-currents of distrust and fear, with raids back and forth across national borders, have brought about a high degree of instability in much of the Middle East. Recently there have been hostilities involving Western European nations that once exercised much influence in the area. Also the relatively large attack by Israel in October has intensified the basic differences between that nation and its Arab neighbours. All this instability has been heightened and, at times, manipulated by international Communism.

"Russia's rulers have long sought to dominate the Middle East. That was true of the Tsars and it is true of the Bolsheviks. The reasons are not hard to find. They do not affect Russia's security, for no-one plans to use the Middle East as a base for aggression against Russia. Never for a moment has the U.S.A. entertained such a thought. The Soviet Union has nothing whatever to fear from the United States in the Middle East, or anywhere else in the world, so long as its rulers do not themselves first resort to aggression. That statement I make solemnly and emphatically.

"Neither does Russia's desire to dominate the Middle East spring from its own economic interests in the area. Russia does not appreciably use or depend upon the Suez Canal. In 1955 Soviet traffic through the Canal represented only about three-fourths of one per cent of the total. The Soviets have no need for, and could provide no market for, the petroleum resources which constitute the principal natural wealth of the area. Indeed, the Soviet Union is a substantial exporter of petroleum products.

"The reason for Russia's interest in the Middle East is solely that of power politics. Considering her announced purpose of communizing the world, it is easy to understand her hope of dominating the Middle East. This region has always been the cross-roads of the continents of the Eastern hemisphere. The Suez Canal enables the nations of Asia and Europe to carry on the commerce that is essential if those countries are to maintain well-rounded and prosperous economies.

"The Middle East provides a gateway between Eurasia and Africa. It contains about two-thirds of the presently known oil deposits of the world, and it normally supplies the petroleum needs of many nations of Europe, Asia, and Africa. The nations of Europe are peculiarly dependent upon this supply, and this dependency relates to transportation as well as to production. This has been vividly demonstrated since the closing of the Suez Canal and some of the pipelines. Alternate ways of transportation and, indeed, alternate sources of power can, if necessary, be developed. But these cannot be considered as early prospects.

"These things stress the immense importance of the Middle East. If the nations of that area should lose their independence, if they were dominated by alien forces hostile to freedom, that would be both a tragedy for the area and for many other free nations whose economic life would be subject to near strangulation. Western Europe would be endangered just as though there had been no Marshall Plan, no North Atlantic Treaty Organization. The free nations of Asia and Africa, too, would be placed in serious jeopardy. And the countries of the Middle East would lose the markets upon which their economies depend. All this would have the most adverse, if not disastrous, effect upon our own nation's economic life and political prospects.

"Then there are other factors which transcend the material. The Middle East is the birthplace of three great religions—Moslem, Christian, and Hebrew. Mecca and Jerusalem are more than places on the map. They symbolize religions which teach that the spirit has supremacy over matter and that the individual has a dignity and rights of which no despotic government can rightfully deprive him. It would be intolerable if the Holy Places of the Middle East should be subjected to a rule that glorifies atheistic materialism.

"International Communism, of course, seeks to mask its purposes of domination by expressions of good will and by superficially attractive offers of political, economic, and military aid. But any free nation which is the subject of Soviet enticement ought, in elementary wisdom, to look behind the mask.

"Remember Estonia, Latvia, and Lithuania. In 1939 the Soviet Union entered into mutual assistance pacts with these then independent countries; and the Soviet Foreign Minister, addressing the Supreme Soviet in October 1939, solemnly and publicly declared that 'we stand for the scrupulous and punctilious observance of the pacts on the basis of complete reciprocity, and we declare that all the nonsensical talk about the Sovietization of the Baltic countries is only to the interest of our common enemies and of all anti-Soviet provocateurs.' Yet in 1940 Estonia, Latvia, and Lithuania were forcibly incorporated into the Soviet Union. Soviet control of the satellite nations of Eastern Europe has been forcibly maintained in spite of solemn promises of a contrary intent made during World War II.

"Stalin's death brought hope that this pattern would change. We read the pledge of the Warsaw Treaty of 1955 that the Soviet Union would follow in satellite countries 'the principles of mutual respect for their independence and sovereignty and non-interference in domestic affairs.' But we have just seen the subjugation of Hungary by naked armed force. In the aftermath of this Hungarian tragedy, world respect for and belief in Soviet promises have sunk to a new low. International Communism needs and seeks a recognizable success.

"Thus we have these simple and indisputable facts:—

(1) The Middle East, which has always been coveted by Russia, would to-day be prized more than ever by international Communism.

(2) The Soviet rulers continue to show that they do not scruple to use any means to gain their ends.

(3) The free nations of the Middle East need, and for the most part want, added strength to assure their continued independence.

"Our thoughts naturally turn to the United Nations as a protector of small nations. Its Charter gives it primary responsibility for the maintenance of international peace and security. Our country has given the U.N. its full support in relation to the hostilities in Hungary and Egypt. The U.N. was able to bring about a cease-fire and the withdrawal of hostile forces from Egypt because it was dealing with Governments and peoples who had decent respect for the opinions of mankind as reflected in the U.N. General Assembly.

"But in the case of Hungary the situation was different. The Soviet Union vetoed action by the Security Council to require the withdrawal of Soviet armed forces from Hungary. And it has shown callous indifference to the recommendations, even the censure, of the General Assembly. The U.N. can always be helpful, but it cannot be a wholly dependable protector of freedom when the ambitions of the Soviet Union are involved.

"Under all the circumstances I have laid before you, a greater responsibility now devolves upon the United States. We have shown, so that none can doubt, our dedication to the principle that force shall not be used internationally for any aggressive purpose and that the integrity and independence of the nations of the Middle East should be inviolate. Seldom in history has a nation's dedication to principle been tested as heavily as ours during recent weeks.

"There is general recognition in the Middle East, as elsewhere, that the U.S.A. does not seek either political or economic domination over any other people. Our desire is a world environment of freedom, not servitude. On the other hand many, if not all, of the nations of the Middle East are aware of the danger that stems from international Communism, and welcome closer co-operation with the United States to realize for themselves the U.N. goals of independence, economic well-being, and spiritual growth.

"If the Middle East is to continue its geographic role of uniting rather than separating East and West; if its vast economic resources are to serve the well-being of the peoples there, as well as that of others; and if its cultures and religions and their shrines are to be preserved for the uplifting of the spirit of the peoples, then the United States must make more evident its willingness to support the independence of the freedom-loving nations of the area.

"Under these circumstances, I deem it necessary to seek the co-operation of Congress. Only with that co-operation can we give the reassurance needed to deter aggression, to give courage and confidence to those who are dedicated to freedom, and thus prevent a chain of events which would gravely endanger all the free world.

"There have been several Executive declarations made by the U.S.A. in relation to the Middle East. There is the Tripartite declaration of May 25, 1950, followed by the Presidential assurance of Oct. 31, 1950, to the King of Saudi Arabia. There is the Presidential declaration of April 9, 1956, that the U.S.A. will within constitutional means oppose any aggression in the area. There is our declaration of Nov. 29, 1956, that a threat to the territorial integrity or political independence of Persia, Iraq, Pakistan, or Turkey would be viewed by the United States with the utmost gravity.

"Nevertheless, weaknesses in the present situation and the increased danger from international Communism, convince me that basic U.S. policy should now find expression in joint action by Congress and the Executive. Furthermore, our joint resolve should be so couched as to make it apparent that, if need be, our words will be backed by actions.

"It is nothing new for the President and Congress to join to recognize that the national integrity of other free nations is directly related to our own security. We have joined to create and support the security system of the United Nations. We have reinforced the collective security system of the U.N. by a series of collective defence arrangements. To-day we have security treaties with 42 other nations which recognize that their, and our, peace and security are intertwined. We have joined to take decisive action in relation to Greece and Turkey, and in relation to Taiwan [Formosa].

"Thus the United States . . . has manifested in many endangered areas its purpose to support free and independent governments—and peace—against external menace, notably the menace of international Communism. Thereby we have helped to maintain peace and security during a period of great danger. It is now essential that the U.S.A. should manifest, through joint action of the President and Congress, our determination to assist those nations of the Middle East area which desire that assistance.

"The action which I propose would have the following features:

"It would, first of all, authorize the U.S.A. to co-operate with and assist any nation or group in the general area of the Middle East in the development of economic strengths dedicated to the maintenance of national independence.

"It would, in the second place, authorize the Executive to undertake in the same region programmes of military assistance and co-operation with any nation or group of nations which desire such aid.

"It would, in the third place, authorize such assistance and co-operation to include the employment of the U.S. armed forces to secure and protect the territorial integrity and political independence of such nations, requesting such aid, against overt armed aggression from any nation controlled by international Communism. These measures would have to be consonant with the treaty conditions of the U.S.A., including the U.N. Charter, and with any action or recommendations of the United Nations. They would also, if armed attack occurs, be subject to the overriding authority of the U.N. Security Council in accordance with the Charter.

"The present proposal would, in the fourth place, authorize the President to employ, for economic and defensive military purposes, sums available under the Mutual Security Act of 1954, as amended, without regard to existing limitations.

"The legislation now requested should not include the authorization or appropriation of funds, because I believe that, under the conditions I suggest, presently appropriated funds will be adequate for the balance of the present fiscal year ending June 30. I shall, however, seek in subsequent legislation the authorization of $200,000,000 to be available during each of the fiscal years 1958 and 1959 for discretionary use in the area, in addition to the other Mutual Security programmes for the area hereafter provided for by Congress.

"This programme will not solve all the problems of the Middle East. Neither does it represent the totality of our policies for the area. There are the problems of Palestine—relations between Israel and the Arab States, and the future of the Arab refugees. There is the problem of the future status of the Suez Canal. These difficulties are aggravated by international Communism, but they would exist quite apart from that threat.

"It is not the purpose of the legislation I propose to deal directly with these problems. The U.N. is actively concerning itself with all these matters, and we are supporting the United Nations. The United States has made clear . . . that we are willing to do much to assist the U.N. in solving the basic problems of Palestine.

"The proposed legislation is primarily designed to deal with the possibility of Communist aggression, direct and indirect. There is imperative need that any lack of power in the area should be made good, not by external or alien force but by the increased vigour and security of the independent nations of the area. Experience shows that indirect aggression rarely if ever succeeds where there is reasonable security against direct aggression; where the Government possesses local security forces, and where economic conditions are such as not to make Communism seem an attractive alternative. The programme I suggest deals with all three aspects of this matter, and thus with the problem of indirect aggression.

"It is my hope and belief that if our purpose be proclaimed, as proposed by the requested legislation, that very fact will serve to halt any contemplated aggression. We shall have heartened the patriots who are dedicated to the independence of their nations . . . And I should add that patriotism is, throughout this area, a powerful sentiment. It is true that fear sometimes perverts true patriotism into fanaticism and to the acceptance of dangerous enticements from without. But if that fear can be allayed, then the climate will be more favourable to the attainment of worthy national ambitions.

"As I have indicated, it will also be necessary for us to contribute economically to strengthen those countries, or groups of countries, which have governments manifestly dedicated to the preservation of independence and resistance to subversion. Such measures will provide the greatest insurance against Communist inroads. Words alone are not enough.

"Let me refer again to the requested authority to employ U.S. armed forces to assist in defending the territorial integrity and political independence of any nation in the area against Communist armed aggression. Such authority would not be exercised except at the desire of the nation attacked. Beyond this it is my profound hope that this authority would never have to be exercised at all.

"Nothing is more necessary to assure this than that our policy with respect to the defence of the area be promptly and clearly determined and declared. Thus the U.N. and all friendly Governments, and indeed Governments which are not friendly, will know where we stand. If, contrary to my hope and expectation, a situation arose which called for the military application of the policy which I ask Congress to join me in proclaiming, I would of course maintain hour-by-hour contact with Congress if it were in session. And if Congress were not in session, and if the situation had grave implications, I would at once call Congress into special session.

"In the situation now existing, the greatest risk is that ambitious despots may miscalculate. If power-hungry Communists should either falsely or correctly estimate that the Middle East is inadequately defended, they might be tempted to use open measures of armed attack. If so, that would start a chain of circumstances which would almost surely involve the United States in military action. I am convinced that the best insurance against this dangerous contingency is to make clear now our readiness to co-operate fully and freely with our friends of the Middle East in ways consonant with the purposes and principles of the United Nations. I intend promptly to send a special mission to the Middle East to explain the co-operation we are prepared to give.

"The policy which I outline involves certain burdens and, indeed, risks for the United States. Those who covet the area will not like what is proposed. However, before this, Americans have seen our nation's vital interest and human freedom in jeopardy, and their fortitude and resolution have been equal to the crisis, regardless of hostile distortion of our words, motives and actions.

"The sacrifices of the American people in the cause of freedom have, ever since the close of World War II, been measured in many billions of dollars and in thousands of the precious lives of our youth. These sacrifices, by which great areas of the world have been preserved to freedom, must not be thrown away.

"In those momentous periods of the past the President and Congress have united, without partisanship, to serve the vital interests of the United States and of the free world. The occasion has come for us to manifest again our national unity in support of freedom and to show our deep respect for the rights and independence of every nation, however great, however small. We seek not violence, but peace. To this purpose we must now devote our energies, our determination, ourselves."

The "Eisenhower plan" was welcomed by spokesmen of the British and French Foreign Offices and also by the Australian Minister for External Affairs (Mr. Casey), who described it as "the next best thing to the U.S.A. joining the Baghdad Pact." The Persian Foreign Minister (Dr. Ardalan) expressed "delight" at President Eisenhower's statement, while Turkish spokesmen said that the U.S. proposals had "vindicated Sir Anthony Eden's policy and the Anglo-French Suez action."

Among the Arab countries, the new U.S. Middle Eastern policy was warmly welcomed in the Lebanon, while Iraqi spokesmen also described it as "most welcome" provided the promised aid was offered unconditionally. No official statement was issued in Cairo, the Egyptian Government maintaining an attitude of reserve and the semi-official *Al Goumhouria* asking for "clarification of certain points" of the President's declaration. A spokesman in Amman said that Jordan would generally welcome any aid which made no demands on her sovereignty. In Syria, however, Damascus Radio attacked the "Eisenhower plan" and denied the existence of any Communist threat to the Middle East. President Kuwatly, then on a visit to Pakistan, said on Jan. 8 that Syria would "refuse to be a political or military satellite of any power bloc, whether in the West or the East," and would not accept "intervention or domination" from any quarter. No official statement was issued in Israel, where the Press expressed fears lest the "Eisenhower plan" might result in an American attempt to "appease" Colonel Nasser.

In India, Mr. Nehru said that if a "political vacuum" existed in the Middle East "it must be filled by the countries of that region" and not by any "outside Power."

President Eisenhower's declaration was bitterly attacked in the Soviet Union, a Moscow broadcast declaring that "the colonialist nature of U.S. policy has now been revealed in its true light." An official statement issued in Moscow on Jan. 7 said that Soviet, Rumanian, Hungarian, and Bulgarian party leaders, who had met in Budapest some days earlier, regarded the "Eisenhower doctrine" as "a measure to enslave the countries of the Middle East" and as "crude interference by American monopolist capital and its militaristic circles in the affairs of the Middle East, involving a new and serious deterioration of the situation in that region."

It was announced in Washington on Jan. 7 that President Eisenhower had appointed Mr. James P. Richards, formerly chairman of the House Foreign Affairs Commission, as Special Assistant to the President on Middle Eastern problems. It was stated that Mr. Richards would head a U.S. mission to the Middle East to explain the new policy to the countries of that area, and that he would have the personal rank of ambassador. Mr. Richards, formerly a Democratic Representative for South Carolina, did not seek re-election to the new Congress.

The proposed revision of American policy in the Middle East—referred to in the U.S. and British press as the "Eisenhower doctrine"—had been explained to the U.N. Secretary-General (Dr. Hammarskjöld) by Mr. Dulles on Dec. 31, before the President issued his message.—(New York Times - New York Herald Tribune - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. President Eisenhower on Middle East Crisis, 15201 A, page 15210.)**

A. UNITED KINGDOM. — Gold and Dollar Reserves. - Rise in December 1956. - End-Year Figures.

The Treasury announced on Jan. 3 that the sterling area's gold and dollar reserves had risen by $168,000,000 during December, 1956, after taking into account (*a*) the receipt of $561,000,000 from the International Monetary Fund under the recent arrangements (see 15260 A); (*b*) the receipt of $6,000,000 in U.S. defence aid; (*c*) the payment of $49,000,000 to the E.P.U. in respect of the November settlement; (*d*) the payment of $3,000,000 to the creditors of E.P.U. in bilateral settlements; (*e*) the payment on Dec. 31 of $189,000,000 in respect of interest and principal on the U.S. and Canadian debts. As a result, the sterling area's gold and dollar reserves stood at $2,138,000,000 on Dec. 31, 1956, compared with $1,965,000,000 on Nov. 30, 1956, and with $2,120,000,000 on Dec. 31, 1955.

The payment of $189,000,000 included $104,000,000 interest on the U.S. and Canadian lines of credit and the U.S. Lend-Lease settlement, which, it was stated, would be returned to the reserves if the interest waiver for which the U.K. had applied (see 15239 A) was granted. The principal repaid on these U.S. and Canadian loans amounted to about $71,648,000, this being the sixth instalment. The total also included a quarterly payment of $7,500,000 on the Canadian interest-free loan, and payments on certain smaller loans from the U.S.A.

It was pointed out that, if the above receipts and payments were left out of account, normal dollar transactions other than those with the E.P.U. had resulted in a net loss of $158,000,000 during December, compared with a similar loss of $252,000,000 in November. These residual dollar deficits were an indication of the pressure exerted on sterling after the Anglo-French intervention in Egypt. It was stated by Treasury spokesmen, however, that almost all the December loss had been incurred before Dec. 10, when the support action by the International Monetary Fund was announced, and that the "acute speculative pressure" had ceased shortly afterwards.

Provisional figures for the E.P.U. December settlement showed that the U.K. had a deficit of £8,000,000, including the half-yearly interest payment of £2,000,000 on the U.K.'s debt to the Union; three-quarters of the deficit will be settled in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.

The announcement led to a fresh rise in sterling, the sterling-dollar rate rising on Jan. 4 beyond the $2.79 level for the first time since July and reaching $2.79⅛ on Jan. 7.

B. AUSTRALIA. — The Eildon Dam.

The Eildon Dam in Central Victoria, the largest water storage reservoir in the Southern Hemisphere, was opened on Oct. 19 by Mr. Bolte, the State Premier. Built at a cost of £A20,000,000 by a U.S. firm in just under five years, it will irrigate nearly 900,000 acres of land in the Goulburn Valley—an area equal to all the irrigated land in the rest of Australia. The capacity of the power station connected with the dam will be increased from the present 15,000 kw. to 185,000 kw.
(Australian News and Information Bureau)

C. JAPAN. — Formation of Ishibashi Cabinet.

The new Japanese Prime Minister, Mr. Ishibashi, announced the composition of his Cabinet on Dec. 23, 1956, as follows:

Mr. Tanzan Ishibashi	Prime Minister, Postal Services, and Minister of State in charge of the Defence Agency and the Hokkaido Development Agency.
Mr. Nobusuke Kishi	Foreign Minister.
Mr. Umekichi Nakamura	Justice.
Mr. Hayato Ikeda	Finance.
Mr. Hirokichi Nadao	Education.
Mr. Hiroshi Kanda	Welfare.
Mr. Ichitaro Ide	Agriculture and Forestry.
Mr. Mikio Mizuta	International Trade and Industry.
Mr. Taneo Miyazawa	Transport.
Mr. Shutaro Matsuura	Labour.
Mr. Tokuo Nanjo	Construction.
Mr. Koichi Uda Mr. Tomejiro Okubo Mr. Isaji Tanaka	Ministers of State.
Mr. Hirohide Ishida	Chief Cabinet Secretary.

Mr. Uda will be Director-General of the Economic Planning Board and of the Science and Technological Agency, as well as Chairman of the Atomic Energy Commission, while Mr. Tanaka will be Director of the Autonomy Agency. Provision was made for two more Ministers of State—one holding the function of Director-General of the Defence Agency and the other as Director of the Hokkaido Development Agency. These two posts were temporarily taken over by Mr. Ishibashi and will be filled later.

Mr. Kishi (60), the new Foreign Minister, is a lawyer by profession, and was Minister of Commerce and Industry in 1941. In 1952 he organized the Japan Reconstruction League (a political party with Conservative tendencies), of which he became president, but in March 1953 joined the Liberal Party. In November 1954 he became secretary-general of the newly-formed Democratic Party, and assumed the secretary-generalship of the Liberal-Democratic Party when the two parties were merged in October 1955. He has always advocated close ties between Japan and the United States.

Mr. Ikeda, chairman of the former Liberal Party, was Finance Minister in the third Yoshida Cabinet and held the portfolio of Trade in the fourth Yoshida Cabinet. Of the other Ministers, **Mr. Nakamura** is chairman of the Liberal-Democratic Party's Diet Policy Committee; **Mr. Mizuta** was a Minister of State in the fourth Yoshida Cabinet, Director-General of the Economic Advisory Board, and chairman of the Policy Research Committee in both the Liberal and Liberal-Democratic parties; and **Mr. Nanjo** was chairman of the party's executive board. All the other Ministers hold leading positions in the Liberal-Democratic Party.

The only member of the Hatoyama Cabinet included in the new Government was Mr. Ishibashi himself (for biography see 15284 C).—(Japanese Embassy Press Office, London) **(15284 C.)**

D. PHILIPPINES. — Suspension of U.S.-Philippine Talks on Status of American Bases.

It was disclosed in Washington on Dec. 5, 1956, that U.S.-Philippine negotiations in Manila on the status of American bases in the Philippines had been suspended indefinitely as a result of disagreement between the two sides. No details were officially made public, but the *New York Times* stated that a "major point of difference was the Philippine insistence on the right to control the use of the U.S. bases in the event of war." In Manila it was stated that the talks had broken down on the question of legal jurisdiction over U.S. military personnel for offences committed against Filipinos within U.S. base areas. The U.S. negotiators, headed by Mr. Karl R. Bendetsen, left Manila for Washington on Dec. 6.—(New York Times)
(Prev. rep. 14987 A.)

E. SOVIET UNION. — Ratification of Soviet-Japanese Agreements. - Repatriation of Prisoners.

The Bulganin-Hatoyama agreement ending the state of war between Japan and the U.S.S.R. was ratified by the Presidium of the Supreme Soviet on Dec. 9, together with the related trade and fisheries conventions. On Dec. 13 the Tass Agency announced that the Presidium had also approved a decree for the release and repatriation of all Japanese prisoners in the U.S.S.R. A vessel with 1,025 repatriates on board arrived at the Japanese port of Maizuru on Dec. 26, 1956.
(Times - New York Times) **(Prev. rep. 15260 E; 15195 A.)**

F. CANADA. — New Conservative Party Leader.

Mr. John Diefenbaker (61) was elected leader of the Progressive Conservative party on Dec. 14, 1956, at the end of a three-day national party convention held in Ottawa. He succeeded Mr. George Drew, who had resigned in September owing to ill-health. Mr. Diefenbaker, a lawyer, is member for Prince Albert (Saskatchewan) in the Canadian Parliament.
(Montreal Star) **(Prev. rep. 15152 D.)**

A. INDIA. — Press and Opposition Allegations of "Double Standard" in International Politics. - Mr. Nehru on the Suez Crisis and Hungary. - Criticisms of Soviet Intervention in Hungary. - Defence of India's Membership of British Commonwealth.

The Government of India's attitude in condemning the Anglo-French intervention in Egypt, while at the same time refraining from denouncing the Soviet intervention in Hungary, was strongly criticized by several leading Indian newspapers, including the *Hindustan Times* (Delhi), the *Times of India* (Bombay), and *The Statesman* (Calcutta), as well as by the leader of the Praja Socialist party, Mr. Narayan. Allegations that the Government of India were pursuing a "double standard" in international affairs, according as to whether aggression took place in the East or the West, were combined with demands for the recall of Mr. Krishna Menon, India's representative at the United Nations. Critics of the Government took particular exception to the fact that India, alone of the non-Communist countries, had voted with the Soviet bloc at the United Nations against the resolution calling for free elections in Hungary under U.N. supervision.

Strong exception was also taken to a statement on the Hungarian situation made by Mr. Nehru at a meeting of the All-India Congress Committee, held in Calcutta on Nov. 9. Although the A.I.C.C. met in closed session, and no details of the proceedings were officially made public, it was alleged in Indian newspapers that Mr. Nehru had admitted that he had been unable to follow the "very confusing situation" in Hungary until Marshal Bulganin had been "good enough to send a fairly long account." Mr. Nehru was also alleged to have described the events in Hungary as a "civil conflict" in which the Hungarian Government had split into two factions, one of which, after ousting the other, had "invited Soviet forces to quell the disturbances."

The *Hindustan Times* criticized the Government's "maladroit handling" of the Hungarian situation and its "curious reluctance, amounting almost to embarrassment," in its "official reactions to Soviet behaviour"; *The Statesman* called for an explanation of India's "odd" vote at the United Nations; while the *Times of India*, in an editorial on Nov. 12, condemned the Government's "over-cautious, almost apologetic reaction to Soviet imperialism." The last-named paper also said that it was an "indefensible understatement" to describe pitched battles between the Hungarian people and Soviet troops as a "civil conflict," particularly as "the people's freedom is being more seriously threatened than was ever the case during any stage of the Anglo-French aggression against Egypt."

Bitter attacks on Mr. Krishna Menon were made by Mr. Narayan, in a speech to the Press Guild of India on Nov. 15; by Mr. Frank Moraes (the biographer of Mr. Nehru), editor of the *Times of India*; and by Raja Huthee Singh (brother-in-law of Mr. Nehru), in a letter to that paper.

Mr. Narayan, who demanded "the removal of Mr. Krishna Menon from the political scene," attacked both Mr. Nehru and Mr. Menon for "jeopardizing India's moral stature in the world by applying double standards to aggression according to who commits it and where." He also said that he was "ashamed" of Mr. Nehru's description of the Hungarian revolt as a "civil conflict."

Mr. Moraes, in an article written after his return from U.N. Headquarters in New York (Nov 27), said that Mr. Krishna Menon had done "nothing to enhance India's reputation at the United Nations," and suggested that Mr. Menon's talents "might more profitably be utilized elsewhere than in the United States, where temperatures rise and tempers bristle at the mere mention of his name."

In his letter to the *Times of India*, Raja Huthee Singh described Mr. Menon's speech at the U.N. as "an affront to human decency and moral principles."

Mr. Nehru's Foreign Policy Speech. - Criticism of Soviet Intervention in Hungary. - Defence of Indian Attitude at United Nations.

At the opening of a two-day debate in the *Lok Sabha* (House of the People) on Nov. 19, Mr. Nehru made a major speech on foreign policy, a large part of which was devoted to the Hungarian situation. In this speech (summarized below under cross-headings) Mr. Nehru for the first time openly criticized the Soviet Government's actions in Hungary, declaring *inter alia* that the present Hungarian regime was not a free but an imposed Government, and that events in Hungary had "powerfully affected the prestige of the Soviet Union." Mr. Nehru also spoke of the "gross and brutal exercise of armed might against weaker nations" both in Hungary and Egypt; called for the withdrawal of foreign troops from both countries; and said that the Anglo-French action in Egypt and the Soviet action in Hungary had created a "crisis of conscience" in people's minds, which, he hoped, would result in the ending of military pacts and the "fashioning of new lines of approach to international co-operation."

The Situation in Hungary. After stressing that it had been extremely difficult at first to find out what was actually happening in Hungary, Mr. Nehru continued: "There was the difficulty that the broad facts were not clear to us, and also the fact that the events in Hungary took place at a moment when the international situation suddenly became very much worse [i.e. as a result of the Anglo-French intervention in Egypt]. We had to be sure and clear as to what had actually happened and what the real position was. Therefore we were a little cautious in expressing our opinion in regard to the facts.

"We were not cautious in expressing our opinion in regard to principles. Right from the very beginning we made it perfectly clear that in regard to Hungary, or Egypt, or anywhere else, any violent suppression of the people's freedom was an outrage against liberty. I made it perfectly clear, firstly, that foreign forces should be removed both from Egypt and Hungary, and secondly, that the people of Hungary should be given an opportunity to determine their future . . .

"In Hungary, as I said, conditions were for some time not at all clear to us. I am not quite sure if they are completely clear even now, but the broad facts are clear enough. There is little doubt that the national uprising there . . . was ultimately suppressed by the Soviet armed forces . . . There was a major conflict in which many Hungarians suffered. They fought very bravely, and it is possible that the Hungarian Army itself was on the side of the Hungarian people . . . The major fact stands out that the majority of the people of Hungary wanted political and economic changes, rose in insurrection to achieve them, but were suppressed.

"I think it is true that there were some elements on the side of the Hungarians which might be called by a word which is rather misused sometimes—'fascist' elements. I think it is true that outsiders also came in because the border forces were not functioning, and that arms came from outside to some extent. But the major fact is that a very large part of the people of Hungary claimed freedom from outside control, objected to the presence of Soviet forces, wanted them to withdraw, and desired changes in their government. That is a basic fact which nobody can deny.

"Perhaps even more significant than the fighting is the fact that when fighting stopped, there was an extraordinary demonstration of passive resistance. The people of Budapest refused to go back to work, or to take part in normal activities at a time when the city was suffering very greatly. This passive resistance by the people seems to me more significant of the wishes of their country than an armed revolt which might be raised by groups here and there.

"The history of Hungary has been a tragic one, marked by frequent attempts to gain freedom, frequently suppressed. There were such attempts during the Austro-Hungarian Empire . . . Five weeks before the end of the First World War, when Austria-Hungary was breaking up, there was an upheaval in Hungary more or less on the lines of the upheaval in Russia at the time. Its leader, Bela Kun, an associate of Lenin, established the Republic of Hungary . . . The Rumanian Army marched into Hungary and suppressed the new Hungarian Republic in an exceedingly ruthless manner . . . As a result, the Republic ceased to exist and a kind of feudal regime was established under Admiral Horthy . . .

"There are many names connected with Hungary which are famous in the fight for freedom. Anyhow, there is little doubt that the present movement in Hungary was a popular one. It was a movement with great masses of people behind it—workers, young people. And this, as I said, became even more potent by the passive resistance of the people in spite of the powerful armed strength opposed to them . . .

Denunciation of Military Pacts. "During the last year or two there have been certain tendencies in Eastern Europe, in the Soviet Union itself, which have to some extent liberalized the regimes there, and which in Poland went perhaps farther than in other countries. What must always be borne in mind, not only by us but by other countries, is that if anything is done which impedes this organic process of change, it may well have the opposite effect to that intended. It then becomes tied up with larger issues of war and peace.

"What do we see behind these issues? In the final analysis, fear—fear of the Western Powers, fear of the armed might of the Soviet Union, fear by the Soviet Union of the possible armed might of a rearmed Germany. All over Eastern Europe in Poland, Hungary, Czechoslovakia, and all those countries which have suffered from invasion—there is this fear of a rearmed Germany . . . The Western countries' fears of the armed might of the Soviet Union brought into existence NATO, and later other pacts and military alliances like SEATO and the Baghdad Pact. The Warsaw Treaty came into existence as a counterblast. Each claims to be a peaceful association based solely on defence against aggression. Each has the effect of frightening the other party, making it more apprehensive of danger, and therefore helping in the armaments race . . .

Plea for Abandonment of Force. "I should like to put before the House a few other considerations—to look behind the surface of things into the deeper changes that are coming about. First of all we see this brutal exercise of violence and armed might against weaker countries. *Prima facie*, this appears to be a triumph of violence and armed might which puts every militarily weaker country in peril and its independence in danger—more particularly, the countries of Asia and Africa. But there is another aspect, and that is that this exhibition of violence and armed might has failed, or is going to fail. It has created great damage, great suffering, and great bitterness, but in the final analysis it has failed to achieve anything.

"Take the aggression in Egypt. I think it is fairly clear that the United Kingdom and France have not gained anything and are not going to gain anything. They will lose much. Apart from the fact

that Egypt has suffered tremendously, the U.K. and France have also suffered, not so much in human lives as in the heavy financial losses which will affect the whole pattern of trade and everything in those countries. The results of this adventure in Egypt are going to be very serious and will probably last a long time . . .

"It is said that this operation prevented the Russians from coming into the Middle East. I confess I do not see how it has prevented the Russians coming in. It has in fact possibly opened a door through which they might come in future, just as the Baghdad Pact has resulted in the Soviet Union taking a far greater interest in the Middle East than it had done previously.

"Now take Hungary and the Soviet Union . . . I am not concerned with the legal implications of the Warsaw Pact. Some lawyers may say that, strictly in terms of the Warsaw Pact, the Soviet Army had the right to be there. But the fact is that subsequent events have shown that the Soviet armies were there against the wishes of the Hungarian people. That is clear. It is true that the Soviet forces triumphed militarily in Hungary. But at what cost? And what will be the final outcome? I have no doubt in my mind that sooner or later the Hungarian people, who have demonstrated so visibly their desire for freedom, for separate identity, for not being overshadowed by any other country, are bound to triumph . . . But apart from that, we must realize that these events have powerfully affected the prestige of the Soviet Union - not only in many countries which are supposed to be 'uncommitted,' but in European countries which supported the U.S.S.R. . . .

"All these systems of pacts and alliances, where have they led? Not to peace or security, but to trouble. What is the present position of the Baghdad Pact? Everyone knows that it is dead and lifeless. What the SEATO alliance is doing I do not know, but we have not heard of it for a long time. It may be in a dormant condition. The Warsaw Treaty—we have seen the reaction to it in East European countries. It may continue in form, but it has lost its content. We have seen differences between Powers included in NATO. It has ceased to be, if it was so earlier, a kind of spiritual crusade . . . All these pacts have become paper arrangements behind which there are certainly armed forces, but which lack on either side the quality or spirit which gave them some meaning previously . . .

". . . The fact remains that in the people's minds violence has been shown up, and this ferment is bound to continue working. I earnestly hope that we may survive this crisis and take further steps toward disarmament, toward putting an end to all these military alliances which have proved so worthless and in fact so dangerous, and try to fashion some new line of approach. We have often been told that technology has greatly advanced; that it has got us the atom bomb and hydrogen bomb . . . But you cannot have an advanced technology and an out-of-date system of international relations. The difficulty is that while technology has advanced to the hydrogen bomb, our international relations are still very backward. So long as they do not catch up, all these frictions will continue . . .

The Weaknesses of Communism. "There is no doubt that the appeal of Communism affected large numbers of young men 30 years ago, and has continued to do so in varying degrees. All kinds of organizations were formed - Cominform, Comintern, and so on and so forth. Even though Communism gradually became somewhat more 'respectable' in people's eyes, in the sense that Communist governments functioned as other governments, it had the aspect of a kind of religion often spread by intervention - whether it was armed intervention or other intervention depended on circumstances. Gradually that has become less and less, but it is there . . . and . . . has created apprehension about intervention in other countries . . .

"The most recent instance is the fact that the Government in Hungary was undoubtedly not a free government but an imposed government, and that the people of Hungary were not satisfied. Ten years have passed since the last war, and if in the course of ten years the people of Hungary could not be converted to that particular doctrine [Communism], it shows failure—far greater, it seems to me, than the failure of a military coup . . .

The "Crisis of Conscience." "All of us, whether Communists, non-Communists, or anti-Communists, have to think afresh . . . Apart from the outward features of the present crisis, there is a crisis of conscience, a spiritual crisis almost, in people's minds. I hope that mere reactions to events will not smother this spiritual crisis, this attempt to find a better way of international co-operation. That way, it has been shown, cannot be based on the use of armed forces to suppress peoples, wherever they may be and however they may exist. If that fact is accepted, let us have full freedom, whether it is a Communist society or an anti-Communist society. Once the ways of violence and suppression are removed, then all these theories have a free field. They can be experimented upon, and we can learn by the experience of others, adopt such things as we like, and not adopt things that we do not like . . ."

In the ensuing debate the Government's policy was criticized by leaders of the Praja Socialist party, notably by Mr. J. B. Kripalani and Mr. Ashoka Menon.

Mr. Kripalani accused Mr. Nehru of being more considerate toward the Communists than toward the Western countries, and criticized him for putting the Soviet forces in Eastern Europe in the same category as the NATO forces in Western Europe. On the one hand, neither Britain nor America would invade a country which wanted to leave NATO, as the Russians had invaded Hungary because she wished to leave the Warsaw Pact; moreover, there was no question of the U.S.A. establishing bases in a country against its will. On the other hand, the East European countries had puppet Governments with little or no independence, and Soviet troops were stationed in those countries against the declared wishes of the people. He hoped that India would not recognize the Kadar regime and would give every encouragement to the forces of freedom in Hungary.

After recalling that Mr. Nehru had described Stalin as a "man of peace" at the time of the latter's death, but had subsequently welcomed the "de-Stalinization" policy of the Soviet Government, Mr. Kripalani suggested that Mr. Nehru's second judgment was proving as mistaken as his first. He also attacked Mr. Krishna Menon for equating the revolt in Hungary with "some riots in Ahmedabad" in his speeches at the United Nations. While criticizing the "arrogant and perfidious" Anglo-French action in Egypt, Mr. Kripalani asked Mr. Nehru if India had ever taken advantage of her close relations with Egypt to advise against the barring of Israeli shipping from the Suez Canal, or to bring about a peaceful settlement of the Arab-Israel dispute.

Mr. Ashoka Mehta denounced Mr. Krishna Menon as unrepresentative of the Indian people, demanded that the Government should refuse to recognize the Kadar regime, and urged it to press for the restoration of Mr. Nagy and for a U.N. guarantee of Hungarian neutrality.

Replying to the debate on Nov. 20, Mr. Nehru defended India's attitude at the United Nations on the Hungarian question, and announced that the Indian Ambassador in Moscow, Mr. K. P. S. Menon, would visit Hungary (to which he was concurrently accredited) to give a first-hand report on the situation there. Mr. Nehru also emphasized the closeness of the links between India and Yugoslavia.

India and Yugoslavia. After pointing out that Yugoslavia had considerable influence in Eastern Europe, and had helped in the liberalization processes in Poland and Hungary, Mr. Nehru continued: "In recent years India's contacts with Yugoslavia have been very close both at governmental and personal levels. In fact it has become a country with which India exchanges appraisals of the world situation, especially of the European situation, more frequently almost than with any other country. Yugoslavia is geographically so situated as to be in intimate touch with developments in Central, Eastern and Southern Europe. Her leaders during the past 30 or 40 years have had the closest contacts with the leaders of Russia and other East European countries." After saying that India had to some extent been guided by President Tito's appraisal of the European situation, Mr. Nehru referred appreciatively to his recent speech at Pula [see 15258 A.].

Indian Attitude at U.N. After announcing that the Indian Ambassador in Moscow would visit Budapest and submit a report to the Government, Mr. Nehru spoke of India's attitude to the various U.N. resolutions on Hungary. As regards India's vote against the Five-Power resolution [see page 15222, second column] Mr. Nehru asked critics to "see the context in which it was moved and the objective behind it—because unfortunately these incidents that have arisen in Egypt and Hungary have both been an intensification of the cold war; that is, the Soviet Union forgets about Hungary, puts a cover on, and talks only about Egypt and Anglo-French aggression, while other countries forget about Egypt and talk only about Hungary." After saying that when the Hungarian question arose "it was viewed almost with relief" by people who wished to divert attention from Egypt to Hungary, Mr. Nehru added: "The Hungarian question became a pawn on the chessboard of international politics. Similarly, others were thinking of the Egyptian question as a pawn on the chessboard . . ."

Criticizing what he described as "all this propaganda over the Indian vote," Mr. Nehru declared: "It is obvious that the whole thing had a political motive behind it—to run down India because India had taken a strong line in the U.N. about various matters. Most people did not know all the facts and one cannot blame them for their reaction; but the object of it all was to try to put the Indian delegation in the wrong." Mr. Nehru expressed high appreciation of Mr. Krishna Menon's work at the U.N., and maintained that India's vote against the Five-Power resolution was "absolutely correct."

The Arab-Israel Dispute. Explaining why India had no direct diplomatic relations with Israel, although she had recognized that country, Mr. Nehru said that his Government wished to help in lessening the gap between Israel and the Arab States. In view of "existing passions," however, he thought that this task would be more difficult if diplomatic missions were exchanged, and he had made this view known to President Nasser. After saying that he had been "surprised at the aggressive tactics of Israel," Mr. Nehru added:

"I know there has been plenty of aggression on the other side, and many wild speeches also. But if members look at the record they will find that the number of aggressions from Israel's side has exceeded those from the Egyptian. Finally, this last action of Israel [i.e. the Sinai attack] has amazed me. It was the most foolish gamble that any country could play . . . Some months back I had hoped that some kind of settlement might emerge, but at the present moment my mind is completely blank in regard to a settlement between the Arab countries and Israel. Such tremendous passions have been aroused that it will take a great deal of time for people to forget about what has happened."

China and the U.N. In conclusion, Mr. Nehru emphasized India's intention of doing all in her power to seat Communist China in the United Nations. He said that this matter was "of the utmost significance for world peace" and that India considered it "utterly and absolutely wrong to go on keeping China outside the U.N."

The Bulganin-Nehru Correspondence.

Prior to the debate in the *Lok Sabha*, the text of letters exchanged between Marshal Bulganin and Mr. Nehru had been released in New Delhi on Nov. 8, 1956.

Marshal Bulganin to Mr. Nehru. In his letter to the Indian Prime Minister (dated Nov. 5), Marshal Bulganin informed Mr. Nehru of the Soviet Government's intention (*a*) to raise at the United Nations "the question of measures for ending the Anglo-French aggression" in Egypt, and (*b*) to propose that the U.S.A., the U.S.S.R., and other U.N. member-countries should take joint military action "in order to stop aggression" [see page 15219, second column.] He also recalled that he had sent letters to the Prime Ministers of Britain and France "containing a resolute warning about the dangerous consequences of aggression by those countries."

Marshal Bulganin added: "We believe that at the present moment . . . the voice of India in support of immediate effective measures against aggression, and your personal prestige, could play an outstanding part . . . So far as the situation in Hungary is concerned, we intend to inform you in detail."

Mr. Nehru to Marshal Bulganin. Mr. Nehru's reply (Nov. 6) was worded as follows: "You are aware that we have been deeply distressed at the Israeli invasion of Egypt and the aggression of the U.K. and France against Egypt. We have expressed in the United Nations and elsewhere our views about this aggression in unequivocal language . . . All our sympathy has been with Egypt in her hour of crisis . . .

"One relieving feature of this deplorable situation is that the U.N. General Assembly and world opinion generally have condemned the aggression and have earnestly sought a way to end it. Some progress has been made to that end, and it may well be that recent resolutions of the General Assembly may lead not only to a cease-fire but also to the withdrawal of the forces that have committed aggression on Egyptian territory . . .

"I thank you for telling me that you will be good enough to send me information about Hungary. As you know, developments there have caused us much concern."

Mr. Nehru's Support for Continued Indian Membership of British Commonwealth

In a speech to the Upper House (*Rajya Sabha*) on Dec. 2, 1956, Mr. Nehru spoke in support of India's continued membership of the British Commonwealth.

Mr. Nehru began by recalling that after the Anglo-French intervention in Egypt a number of Indians, prominent among whom was Mr. Rajagopalachari, had urged that India should leave the Commonwealth. He continued: "Anything that Mr. Rajagopalachari says deserves our closest attention. He is one of our wise men . . . Nevertheless, even the wisdom of wise men is likely to go astray when they are no longer connected with public affairs and do not bear all the aspects of a particular problem in mind . . .

"Let us consider this matter in its larger perspective . . . What helps our main objective of world peace? What helps our objective of co-operation between the nations of the world? There is the negative aspect of it—that of avoiding or preventing war. But there is the positive aspect, too—of trying to root out the causes of war and gradually bringing nations to co-operate together, even though they disagree a great deal. It is absurd to imagine that every country in the wide world will adopt a single policy and agree with every other. That is totally unrealistic. Therefore we aim at countries carrying on their different policies and yet co-operating with other countries and finding a large measure of agreement, even though in some matters they may differ . . . Those are the principles embodied in what is called *Panch Sila* [the "five principles" of peaceful co-existence]. . .

"There are 101 ways of association between countries . . . When in 1947 we became independent, a certain period passed during which we were what is called a Dominion, until we formed our Constitution. To have accepted Dominion status as a more or less permanent basis would have been in contravention of what the National Movement stood for. We stood for independence—for the Republic of India. But that has nothing to do with what associations the Republic of India has with any other country, whether it is Britain or Russia or China or Burma. Probably we are one of the countries of the world which have the fewest legal associations with any other nation. Apart from trade and cultural treaties, we have no political associations which bind us in the slightest with any country. I cannot think of any other nation of which the same is true—perhaps Switzerland is such another. Almost every other country has treaties, political or military, tying itself up with some other country—NATO, SEATO, the Baghdad Pact, the Warsaw Pact, the Balkan Pact, and so on . . .

"We are thus less entangled, less committed, than almost any other country. But at the same time, curiously enough, we have the closest associations with many countries. Our relations with our neighbour Burma are closer than with many of the Commonwealth countries . . . Then there is Russia and China. We do not agree with much that they do; but our relations with them are friendly. The Prime Minister of China is at present in India, and he is receiving a warm welcome not only in his personal capacity but as the representative of a great and friendly people. In a week from today I am going to the U.S.A., one of the most powerful and influential countries in the world, to meet the President . . . I am happy that our relations with the United States are friendly. That does not mean that we agree with everything in U.S. policy, or that they agree with our policy. This idea that you can only be friendly with a person or country whose policy is completely in line with yours is a bad and dangerous conception. The opposite of that conception is that you must be in conflict with countries which differ from you . . . It has been India's privilege and honour to help in joining countries to be a bridge between them, and not to break bridges that already exist . . .

"Sometimes people say that we in India presume to moralize too much, presume to be holier and purer than others. Well, I do not think we are holier or purer or more moral than anybody else in the world. I dislike this kind of egregious, unctuous talk . . . But we have one important virtue which is due to a number of factors geography, for which we are not responsible; history, the past history of our national movement which conditioned our thinking; and Mahatma Gandhi, who also conditioned our thinking. The virtue that we possess is this that not being in immediate danger so far, we have a sense of security; not a perfect sense, but a greater sense of security than many countries of Europe or the Middle East or the Far East . . .

"It is our thinking that has prevented us from joining up with any country, or hating any country, or considering any country as our enemy. I know we are not on good terms with Pakistan. But even with Pakistan we do not think of her in that way. We may get angry at something they do, but we do not think of them like that. As a people, we are not good at hating. . .

"A remarkable example of that is how, after the long period of British domination in India, we came to terms with them after we became independent. We did not get angry; we were not moved by passion against the British we became friendly with them. I think it was a unique example in history; and, apart from our past traditions, the person most responsible for developing that outlook in the Indian people was Gandhi.

"The point is that we are not hostile to any particular country and are not moved by those passions which afflict other countries; the passion of fear, for example, of some countries in Western Europe who are terribly afraid of the Soviet Union's strength. The Soviet Union itself is afraid; I tell you it is afraid terribly of a rearmed Germany possessing atomic weapons . . . So you have the fear complex on either side.

"India has not got that fear complex. India is not hostile to any country. Therefore, when any event occurs we are not swept away by passions as other countries are. That is no virtue in us. For geographical and other causes we get angry, we disapprove, but we are not suddenly obsessed by that fever of fear as other countries are. Therefore, we can judge world events a little more objectively. We may judge wrongly; that is a different matter. I do not say that we are cleverer or more intelligent, but we are not swept away by passions so much, and therefore we can often make suggestions which are helpful. We can to some extent act as a bridge to bring countries together. That, I suggest, is the sole virtue we have. And it is not a real virtue—it is a result of the circumstances I have mentioned . . .

"In everything we do we keep this one end in view: Are we helping the cause of peace or not? . . . I am quite sure that every kind of contact we have with other countries whether it is the Commonwealth or any other contact- helps the cause of peace and brings us together. I am for everything that brings us together without tying us up in any way . . . The Commonwealth is no tying-up of any kind. What is a tying-up is all this array of alliances from the Warsaw Treaty to NATO, the Baghdad Pact to SEATO. The whole world is full of these knots. We want to unravel them, to open them out so that people may live their lives without fear . . ."

Mr. Nehru's speech was in reply to a resolution presented by Mr. Mazumdar (Communist) declaring India's membership of the Commonwealth to be "inconsistent with the principles of *Panch Sila*." In ending his speech, Mr. Nehru declared that "while normally I would have opposed such a resolution as I have done in the past, in the present circumstances I would oppose it still more."—(The Statesman, Calcutta - The Hindu, Madras - Times of India, Bombay - Hindustan Times, New Delhi - Indian High Commissioner's Office, London) **(Prev. rep. Mr. Nehru on Suez Crisis, 15201 A, page 15209 A; Hungary, General Assembly Session, U.N. Resolutions, 15221 A.)**

A. TURKEY. — New Minister of Finance.

It was announced in Ankara at the end of November that Mr. Hasan Polatkan had been appointed Minister of Finance, a post he had previously held from December 1950 to November 1955. Since the resignation in August last of Mr. Ökman, the Finance portfolio had been held *ad interim* by Mr. Adnan Menderes, the Prime Minister.—(Turkish Embassy, London) **(Prev. rep. 15235 B.)**

B. AUSTRALIA. — Coastal Shipping Commission.

The Coastal Shipping Commission, set up under recently-enacted Federal legislation, began operations on Jan. 2. It will control 48 ships owned by the Commonwealth Government which had hitherto been under the control of the Federal Shipping Board. The Commission's headquarters are in Melbourne. (Australian News and Information Bureau) **(Prev. rep. 15066A.)**

A. UNITED KINGDOM. — White Paper on Reorganization of Electricity Industry. - Implementing Legislation. - Contracts for Bradwell, Berkeley, and Hunterston Nuclear Power Stations. - Proposed New Stations in Somerset and Ayrshire.

A White Paper setting out the Government's proposals for the reorganization of the electricity supply industry, based largely on the recommendations of the Herbert Committee (see 14860 A) but going further than these in the direction of decentralization, was published on Nov. 28, 1956. The White Paper explained that the Government believed that the committee had established the existence of a defect in the structure of the industry, and that a reorganization in the light of their findings was made all the more necessary by the industry's new responsibility for the nuclear power programme. A summary of the Government's proposals is given under cross-headings below:

Replacement of Central Electricity Authority by Central Electricity Generating Board and Electricity Council. The Government accepted the Herbert Committee's recommendation that the function of generating and delivering electricity on the one hand, and of controlling and co-ordinating the whole electricity system on the other, should be separated. It was therefore proposed to dissolve the present Central Electricity Board and set up instead (1) a Central Electricity Generating Board, to be appointed directly by the Minister of Fuel and Power and to be responsible for the generation and supply of electricity in bulk; and (2) an Electricity Council, to co-ordinate the activities of the Central Generating Board and the Area Boards and deal with common services (e.g. major research projects and the raising of finance), and also to advise the Minister on questions affecting the electricity supply industry as a whole.

The Electricity Council would consist of a chairman and one or two vice-chairmen appointed by the Minister of Fuel and Power, the chairman and one other representative of the Central Electricity Generating Board, and the chairmen of the twelve Area Boards.

Greater Autonomy for Area Boards. The Government also accepted the Herbert Committee's recommendations that Area Boards should be given greater autonomy, and that the Minister of Fuel and Power should no longer be statutorily required to consult the Central Electricity Authority or its successors before making appointments to those Boards.

The White Paper recalled that the Electricity Act stipulated that the combined revenues of the Central Electricity Authority and the Area Boards must be sufficient to meet their combined outgoings on revenue account, taking one year with another. The Government believed, however, that the new Central Electricity Generating Board and each Area Board should be required to balance their accounts individually, so as to encourage financial responsibility and a critical attitude toward costs. The industry's central reserves would therefore be wound up and distributed to the individual Area Boards, each of which would be required in future to maintain a reserve fund of its own.

Co-ordination between Area Boards. The White Paper explained that the Government had come to the conclusion that, if individual Area Boards were to be ultimately responsible for their own well-being, co-ordination between them could best be secured, not, as in the past, by a central authority with powers of direction and control, but through such a body as the new Electricity Council, in which the generation and distributing sides of the industry could resolve their common problems under independent guidance.

Financial Arrangements. Provision would be made in the proposed new arrangements for the Electricity Council to raise capital on behalf of the industry by the issue of British Electricity Stock, when finance was no longer provided by means of Treasury advances. The Electricity Council would manage a central guarantee fund maintained by contributions from the Area Boards, to support the Generating Board's borrowings and the Treasury guarantee. The maximum amount in the guarantee fund would be limited to £20,000,000, with annual aggregate contributions limited to £4,000,000.

Capital Programmes. The Government agreed with the Herbert Committee that the capital programmes of the Area Boards needed more careful scrutiny. Each Board would therefore be required to submit its capital proposals to the Electricity Council before placing them before the Minister of Fuel and Power, though ultimate responsibility for the proposals would be borne by the Board itself.

Functions of the Minister of Fuel and Power. The Minister's most important functions would be (*a*) the appointment of the chairman and deputy chairmen of the Electricity Council, and the members of the Central Electricity Generating Board and the Area Boards; (*b*) approval of the development plans of the Generating and Area Boards, and of the industry's research programme. He would also have power to issue general directions to the Electricity Council and the Generating and Area Boards if he considered such direction to be necessary in the national interest.

The Consultative Committees. The Government accepted the Herbert Committee's recommendation for the strengthening of the consultative committees.

Methods of Charging. The Government, did not, however, accept the Committee's proposal for the abolition of the requirement in the 1947 Act that methods of charging should be simplified.

The terms of the Government's Electricity Bill, implementing those of the White Paper proposals which required legislation, were also published on Nov. 28, the principal provisions being set out below:

(1) From April 1, 1958, the Central Electricity Authority would be dissolved and its property, rights, liabilities, and obligations vested in the Central Electricity Generating Board or in the Electricity Council, as might be agreed between them; or, failing agreement, as the Minister of Fuel and Power might decide.

(2) As from April 1, 1958, the compensation payable to local authorities for their former undertakings nationalized in 1948 would be payable by the Central Electricity Generating Board and the Area Boards, instead of by the Central Electricity Authority.

(3) The Electricity Council would pay compensation to members and officers of the Central Electricity Authority suffering loss as a result of the Bill, and provision would be made to safeguard their pension rights.

(4) Tariffs for bulk electricity supplies would be fixed by the Central Electricity Generating Board after consultation with the Electricity Council. Where different prices were charged to different Area Boards, the Generating Board would as far as possible ensure that the differences in price corresponded to differences in costs of supply.

Atomic Power Stations.

The Central Electricity Authority announced on Dec. 13 that contracts for the building of the atomic power stations at Bradwell (Essex) and Berkeley (Glos.) had been awarded respectively to the Nuclear Power Plant Co. Ltd., and the A.E.I.-John Thompson Nuclear Energy Co. Ltd. The Authority was also negotiating with the English Electric—Babcock and Wilcox—Taylor Woodrow group (which had joined forces for the exploitation of nuclear energy) regarding a third atomic power station at Inkley Point, near the mouth of the River Parrett (Somerset); it was intended to proceed with construction at this site after planning approval and consent for the project had been given.

On Dec. 13 it was also announced that the contract for the South of Scotland Electricity Board's atomic power station at Hunterston (Ayrshire) had been awarded to the General Electric Company. The total value of the three contracts definitely awarded (Bradwell, Berkeley, and Hunterston) was stated to be "well over £100,000,000."

The largest of the stations will be that at Hunterston, with a total generating capacity of 360,000 kilowatts, as compared with 300,000 k.w. at Bradwell and 275,000 k.w. at Berkeley. Work will start on the Bradwell and Berkeley stations early in 1957.

The Central Electricity Authority stated on the same day (Dec. 13) that the output capacity of its first three nuclear power stations would aggregate about 850,000 k.w., and that the capital investment would not be less than £120,000,000. It was clear that the capital cost of each station would not be less than 2½ to 3 times that of a comparable coal- or oil-burning station, and that nuclear generation costs would at first probably be higher than from the Authority's advanced types of thermal plant. It was hoped, however, that construction costs of future nuclear power stations would progressively be reduced, and that, when more experience had been gained on such important factors as the working lives of the reactors and the cost and life of the fuel, nuclear generation would become competitive with thermal generation and might even be cheaper.

The South of Scotland Electricity Board stated on Dec. 13 that it had applied to the Secretary of State for Scotland for consent to build a further nuclear power station on the Ayrshire coast, and for confirmation of an Order for the compulsory purchase of the site. The station, which would provide about one-quarter of the total energy required for Scotland, would cost nearly £40,000,000, but the overall cost per unit generated would be "competitive with that of a corresponding coal-fired station." A spokesman for the Authority said that the station would have "no cooling towers, no smoke stacks, no water towers, railway sidings, or coal dumps"; moreover, the buildings would be "of an elegant design" and every care would be taken to preserve local amenities.

The formation of a further British industrial group to tender for the design and supply of atomic power stations was announced on Dec. 13. The group, which will operate through a joint company—Atomic Power Construction Ltd.—with an authorized capital of £1,000,000, will consist of Richardsons Westgarth and Company Ltd. (suppliers of generating plant); International Combustion (Holdings) Ltd. (steam generating equipment, including the reactor, heat exchangers, and pressure vessels); and Crompton Parkinson Ltd. (switchgear, transformers, cables, and motors).—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Herbert Committee Report, 14860 A; Nuclear Power Stations, 14928 A; 15135 A; Construction Groups, 14360 A.)**

A. POLAND. — Agreement on Relations between Church and State. - Restoration of Religious Education.

An agreement on the future relations between Church and State, worked out by the Joint Commission set up in November [see page 15244, first column], was announced in Warsaw on Dec. 8, 1956.

The announcement said that the Government representatives had "emphasized their readiness to remove those obstacles to the realization of the principle of full religious freedom which had existed in the past." The representatives of the Episcopate, on their side, had stated that "as a result of the transformations in public life aimed at the consolidation of legality, peaceful co-existence, the raising of social morality, and the righting of wrongs, the Government and the State authorities will find full understanding for these aims in the Church hierarchy and the clergy." Moreover, the Episcopate had expressed "full support for the work undertaken by the Government aiming at the strengthening and development of People's Poland through the harmonious co-operation of all citizens for the good of the country."

The Joint Commission reached agreement on six principles governing Church-State relations, as summarized below:

(1) The Government would annul the decree of Feb. 9, 1955, dealing with appointments to ecclesiastical posts. A new Bill, which would be submitted to the Joint Commission for approval, would provide for the appointment of archbishops, diocesan bishops, coadjutors, and parish priests with the approval of both Church and State authorities. [The 1955 decree had given the Government sole control over appointments to ecclesiastical posts.]

(2) The following principles were agreed upon with regard to religious instruction in schools:

(*a*) Religious instruction would be provided in all primary and secondary schools as an extra-curricular subject.

(*b*) Such instruction would be voluntary, and would be provided for all children whose parents expressed a wish for it.

(*c*) Teachers of religion would be appointed by the education authorities in agreement with the Church, and would be paid by the Ministry of Education. Syllabuses and manuals of religious instruction would be approved both by the Church and the education authorities.

(*d*) Inspection of religious instruction would be carried out by both Church and State authorities, and the school authorities would "endeavour to enable children and young people to participate freely in religious practices outside school."

(*e*) The school authorities and the clergy would co-operate to ensure "complete freedom and tolerance both to believers and non-believers," and would "counteract all manifestations violating freedom of conscience."

(3) The Ministry of Health would issue directives for the religious care of the sick.

(4) There would also be religious care for prisoners, including the appointment of prison chaplains.

(5) Nuns removed in 1953 from the Opole, Wroclaw, and Katowice voivodships would be allowed to return there, while those who wished to leave Poland would be allowed to do so. Parish priests who had been removed from their parishes in the Western voivodships would also be allowed to return.

(6) The Episcopate and the Government had reached agreement on the appointment of five new Bishops, nominated by the Holy See, to dioceses in Western Poland.

The Bishops referred to above were appointed to the dioceses of Wroclaw (Breslau), Opole (Oppeln), Gorzow, Gdansk (Danzig), and Olsztyn (Allenstein). As stated, they had been nominated by the Holy See, the appointments being confirmed both by the Polish Government and the Roman Catholic Church in Poland. (Polish Embassy, London)

(Prev. rep. 15242 A.)

B. INDONESIA. — Vice-President Hatta resigns.

Dr. Mohammed Hatta, the Vice-President of Indonesia, formally resigned that office on Dec. 1, 1956.

Although no official statement was issued on the reasons for his decision, it was reported in the Press that it was due to the fact that important Government decisions had been taken without his knowledge and against his advice. Vice-President Hatta's resignation was deplored by the leaders of all parties except the Communists, the Indonesian Parliament adopting a resolution expressing its gratitude for his services to the nation.

Dr. Hatta (54), one of the leaders of the Nationalist movement under Dutch rule, was kept under detention by the Netherlands Government from 1931 until the Japanese occupation. After Japan's surrender he proclaimed with President Sukarno the independence of Indonesia in 1945, and was chairman of the Indonesian delegation at The Hague Round-Table Conference of 1949. On the transfer of sovereignty he became Prime Minister of the then United States of Indonesia, and after the formation of a unitary State was appointed Vice-President in 1950. (Indonesian Embassy, London)

(Prev. rep. Dr. Hatta, 11002 A.)

C. GREECE - YUGOSLAVIA. — Greek Ministerial Visit to Yugoslavia. - Tito-Karamanlis Discussions. - Yugoslav support for Greece on Cyprus Question.

M. Karamanlis and M. Averoff, the Greek Prime Minister and Foreign Minister, visited Belgrade from Dec. 4-7, 1956, for discussions with President Tito and members of the Yugoslav Government.

A communiqué issued at the end of the talks said that they had been held "in a friendly and cordial atmosphere" and had shown "complete unanimity in considering various international problems and the mutual relations between the two countries." It continued:

"Both sides noted that important results have been achieved in the development of Yugoslav-Greek co-operation, which, based on the principle of mutual respect and non-interference in each other's affairs . . . is a strong factor for stability and peace in this region . . ." After stressing the desire of both countries to intensify their friendship and co-operation, the communiqué went on:

"Both sides emphasized the need for a peaceful solution of the Cyprus question in accordance with the aspirations of the Cypriot population and in the interests of peace and peaceful co-operation. The Yugoslav Government, basing its views on the principle of the right of peoples to self-determination, expresses sincere sympathy with the population of Cyprus, as well as its readiness to lend moral and political support to all constructive efforts aimed at a just settlement of this question."

The statement added: "The two Governments, conscious of the use of the Balkan Pact as a factor for peace, are agreed on the need for further efforts to be made by all three partners [Greece, Turkey, and Yugoslavia] with the aim of giving full efficacy to three-Power co-operation. They consider that the most effective method of achieving this aim is to remove the causes which have brought about present difficulties.

"Both sides regard as serious the events which have recently resulted in the deterioration of international relations, and agree on the condemnation of the use of force as a means of solving international disputes. They also consider that these events have once again demonstrated the important role which the U.N. can play as an effective instrument of peace in solving international disputes."

During a luncheon given to the Greek Ministers, both M. Kardelj (Vice-President of the Yugoslav Federal Executive Council) and M. Karamanlis referred to the Greco-Turkish difficulties over Cyprus as having "deadlocked" the Balkan Pact and rendered it "inactive." They expressed the hope, however, that a solution would be found, M. Karamanlis declaring that "whatever happens to the tripartite alliance, co-operation between Greece and Yugoslavia will certainly remain firm and untroubled." M. Kardelj expressed Yugoslavia's "sincere sympathy and moral political support for the just demands of the population of Cyprus."

President Tito and Mme. Broz-Tito had visited Corfu from July 24-28, 1956, as the guests of King Paul and Queen Frederika of the Hellenes. (Tanjug Agency, Belgrade)

(Prev. rep. 14459 A.)

D. NEW ZEALAND. — Inauguration of Roxburgh Power Station. - Investigation into Inter-Island Power Cable across Cook Strait.

The first unit of New Zealand's largest new hydro-electric scheme, at Roxburgh, on the Clutha River (South Island), was put into operation on July 28, 1956. Two out of the eight generators planned for the scheme were in operation by the end of 1956, providing 80,000 kilowatts of electric power. When completed, Roxburgh will be one of the largest hydro-electric stations in the Southern Hemisphere, with a capacity of 320,000 kw., and will more than double the amount of power available in the whole of the South Island. The station lies 102 miles inland from Dunedin.

On March 6, 1956, it had been announced by Mr. Goosman (the Minister in charge of the State Hydro-electric Department) that a survey of Cook Strait had been begun by British Insulated Callender's Cables Ltd., in conjunction with the Royal New Zealand Navy and the N.Z. Department of Scientific and Industrial Research, as the first step in investigating a proposal for a submarine power cable between the North and South Islands. (N.Z. Directorate of Information, Wellington)

E. ARCHITECTURE. — British Royal Gold Medal conferred on Finnish Architect.

It was announced by the Royal Institute of British Architects on Jan. 7 that H.M. the Queen had awarded the Royal Gold Medal for Architecture for 1957 to the Finnish architect, Hr. Alvar Aalto. A pioneer of the modern school of architecture, Hr. Aalto (58) is Finland's leading architect and is internationally known for his housing, industrial and civic buildings in that country—notably the Paimio sanatorium, an outstanding example in the use of reinforced concrete. (Times)

(Prev. rep. 12762 A.)

JANUARY 12—19, 1957

A. UNITED KINGDOM.—The Macmillan Government.

The new Cabinet appointed by Mr. Macmillan was approved by the Queen on Jan. 13, its membership being as follows:

Mr. Harold Macmillan	Prime Minister.
*Lord Salisbury	Lord President of the Council.
Mr. R. A. Butler	Home Secretary and Lord Privy Seal.
*Viscount Kilmuir	Lord Chancellor.
Mr. Peter Thorneycroft	Chancellor of the Exchequer.
*Mr. Selwyn Lloyd	Foreign Secretary.
*Lord Home	Secretary of State for Commonwealth Relations.
*Mr. Alan Lennox-Boyd	Secretary of State for the Colonies.
Mr. J. S. Maclay	Secretary of State for Scotland.
Mr. Duncan Sandys	Minister of Defence.
Sir David Eccles	President of the Board of Trade.
*Mr. Derek Heathcoat Amory	Minister of Agriculture, Fisheries, and Food.
*Mr. Iain Macleod	Minister of Labour and National Service.
Mr. Henry Brooke	Minister of Housing and Local Government and Minister for Welsh Affairs.
Lord Hailsham	Minister of Education.
Sir Percy Mills	Minister of Power.
*Mr. Harold Watkinson	Minister of Transport and Civil Aviation.
*Dr. Charles Hill	Chancellor of the Duchy of Lancaster.

* Held same portfolio in the Eden Government.

An official announcement was issued at the same time stating that:

(1) Lord Salisbury would remain Leader of the House of Lords, and Mr. Butler Leader of the House of Commons.

(2) Mr. Henry Brooke, the new Minister of Housing and Local Government, would also have special responsibility for Welsh affairs.

(3) Dr. Hill, in addition to his duties as Chancellor of the Duchy of Lancaster, would be responsible for the co-ordination of Government information services at home and abroad.

(4) Sir Percy Mills (see below) would be responsible for Government policy in relation to power resources generally. He would (*a*) assume the existing functions of the Ministry of Fuel and Power in respect of coal, gas, electricity, and oil; (*b*) be responsible for extending the use of atomic energy as a source of industrial power; and (*c*) take over from the President of the Board of Trade the latter's responsibilities for iron and steel. It was announced that Sir Percy Mills would receive a barony and would be appointed a Privy Councillor, and that the title of his office would be changed from Minister of Fuel and Power to Minister of Power.

(5) The inclusion in the Cabinet of Sir Percy Mills and Mr. Watkinson (Minister of Transport) "reflects the importance attached to the expansion and development of the basic materials and services which are vital to the efficiency of British industry."

It was also announced that viscounties would be conferred upon Major Gwilym Lloyd-George (62), formerly Home Secretary and Minister for Welsh Affairs, and Sir Walter Monckton (66), the former Paymaster-General; that a barony would be conferred upon Mr. Patrick Buchan-Hepburn (55), formerly Minister of Works; and that the Order of the Companions of Honour would be conferred upon Mr. James Stuart (59), formerly Secretary of State for Scotland.

Outstanding features of the new Cabinet were the retention of Mr. Selwyn Lloyd at the Foreign Office; the appointment of Mr. Butler as Home Secretary, of Mr. Peter Thorneycroft as Chancellor of the Exchequer, and of Mr. Duncan Sandys as Minister of Defence; and the inclusion of Sir Percy Mills—an industrialist who has never held political office—as Minister of Power. Eight members of the Cabinet retained the portfolios they held under Sir Anthony Eden (Lord Salisbury, Viscount Kilmuir, Lord Home, Mr. Selwyn Lloyd, Mr. Lennox-Boyd, Mr. Heathcoat Amory, Mr. Macleod, and Mr. Watkinson), while six former Ministers left the Cabinet—Major Lloyd-George, Sir Walter Monckton, Mr. James Stuart, Mr. Antony Head (Minister of Defence), Lord Selkirk (Chancellor of the Duchy of Lancaster), and Mr. Buchan-Hepburn. Four of these—Major Lloyd-George, Mr. Stuart, Mr. Buchan-Hepburn, and Sir Walter Monckton—had informed Mr. Macmillan of their willingness to make way for younger men.

The new members of the Cabinet were Mr. Maclay, Mr. Henry Brooke, Lord Hailsham, Sir Percy Mills, Mr. Watkinson (who, although Minister of Transport in the Eden Government, did not have Cabinet rank), and Dr. Hill. The new appointments reduced the number of Cabinet Ministers from 19 to 18 (as a result of Mr. Butler combining the posts of Lord Privy Seal and Home Secretary), and also reduced the average age of Cabinet Ministers from 55 to 53. The oldest member of the new Cabinet is Sir Percy Mills (67), and the youngest is Mr. Macleod (43).

Mr. Butler (54) became Home Secretary in succession to Major Lloyd-George (who had been at the Home Office since 1954), while remaining Lord Privy Seal and Leader of the House of Commons. He had been Chancellor of the Exchequer from October 1951 to December 1955. [For biographical details see page 11795, first column].

Mr. Thorneycroft (47), who succeeded Mr. Macmillan as Chancellor of the Exchequer, had been President of the Board of Trade for over five years, and had proved himself one of the ablest of the younger members of the Government—particularly by his skilful handling of the controversial Monopolies Bill, which he piloted through Parliament. As a back-bencher before 1951 he was chairman of the Tory Reform Group, and played a leading part in drafting *Design for Freedom* and similar documents which helped to mould Conservative policy during the years in Opposition.

Mr. Duncan Sandys (48), son-in-law of Sir Winston Churchill, succeeded Mr. Macmillan in 1954 as Minister of Housing and Local Government, in which capacity he had to deal with the Government's rating and rents legislation. He had previously been Minister of Supply (1951-54), a post in which he was responsible for piloting through Parliament the legislation denationalizing the iron and steel industry. Mr. Sandys became the tenth holder of the Defence portfolio in 11 years, and the fifth in under 2½ years, his predecessors having included Mr. Head, Sir Walter Monckton, Mr. Selwyn Lloyd, Mr. Macmillan, and Field-Marshal Alexander.

Mr. Maclay (51), who succeeded Mr. James Stuart at the Scottish Office, had been Minister of State at the Colonial Office since October 1956. **Sir David Eccles** (52), formerly Minister of Education, succeeded Mr. Thorneycroft at the Board of Trade, while **Viscount Hailsham**, who had been First Lord of the Admiralty for only four months, succeeded Sir David at the Ministry of Education and entered the Cabinet for the first time.

[Biographies of Mr. Maclay and Lord Hailsham are given in 15152 B and 15072 D respectively, and of Sir David Eccles on page 11796, first column].

Mr. Henry Brooke (53), formerly Conservative leader on the London County Council, took over the Ministry of Housing and Local Government from Mr. Duncan Sandys, and also became Minister for Welsh Affairs in succession to Major Lloyd-George, who had combined it with the Home Secretaryship. It was explained that responsibility for Welsh affairs had been transferred to the Ministry of Housing and Local Government since most Welsh problems were concerned with local government matters. Mr. Brooke was Financial Secretary to the Treasury in the Eden Government.

Dr. Charles Hill (52)—the "radio doctor," and formerly secretary to the British Medical Association—succeeded Lord Selkirk as Chancellor of the Duchy of Lancaster, with special responsibility for co-ordinating Government information services at home and abroad. [Prior to Sir Anthony Eden's resignation, it had been announced on Nov. 30, 1956, that Dr. Hill—then Postmaster-General—would have responsibility for co-ordinating Government publicity and public relations, with the exception of the information services of the Foreign Office. These duties had previously devolved upon Sir Walter Monckton, then Paymaster-General.]

Sir Percy Mills (67), chairman of the Birmingham firm of W. & T. Avery Ltd. (makers of scales and balances), is an industrialist with long experience of working with Government departments, though he had never previously taken part in public life. In 1951 he was called in by Mr. Macmillan (then Minister of Housing and Local Government) as honorary adviser on housing, and played an important part in helping Mr. Macmillan achieve the Conservative Party's target of 300,000 houses a year. A past president of the Birmingham Chamber of Commerce (1947-48), he had held the wartime and post-war posts of Controller-General of Machine Tools (1940-44), head of the Production Division of the Ministry of Production (1943-44), and president of the Economic Sub-Commission of the British element of the Control Commission for Germany (1944-46). More recently (until 1954) he was chairman of the National Research Development Corporation. A self-made man, he was educated at an elementary school at Barnard Castle, County Durham.

Other Ministerial Appointments.

The following appointments of Ministers not in the Cabinet were announced on Jan. 16:

Lord Selkirk	First Lord of the Admiralty.
*Mr. John Hare	Secretary for War.
Mr. George Ward	Secretary for Air.
*Mr. J. A. Boyd-Carpenter	Minister of Pensions and National Insurance.
Mr. Aubrey Jones	Minister of Supply.
Mr. Dennis Vosper	Minister of Health.
Mr. Hugh Molson	Minister of Works.
Mr. Ernest Marples	Postmaster-General.

Mr. Reginald Maudling	..	Paymaster-General.
*Lord Munster ..	..	Minister without portfolio.
*Lord Strathclyde ..	..	Minister of State, Scottish Office.
*Commander Percy Noble ..	)	Ministers of State for Foreign
Mr. David Ormsby-Gore ..	)	Affairs.
Mr. Derek Walker-Smith	..	Minister of State, Board of Trade.
Lord Perth	..	Minister of State for Colonial Affairs.
*Sir Reginald Manningham-Buller	..	Attorney-General.
*Mr. W. R. Milligan ..	..	Lord Advocate.
*Sir Harry Hylton-Foster	..	Solicitor-General.
*Mr. William Grant ..	..	Solicitor-General for Scotland.
*Mr. Edward Heath	..	Parliamentary Secretary to the Treasury.
Mr. Enoch Powell ..	..	Financial Secretary to the Treasury.
Mr. Nigel Birch ..	..	Economic Secretary to the Treasury.

*Held same portfolios in the Eden Government.

It was also announced that Mr. Ward, Mr. Vosper, Mr. Marples, Mr. Ormsby-Gore, Mr. Walker-Smith, and Lord Perth would become Privy Councillors; that Mr. Maudling, as Paymaster-General, would represent the Minister of Power in the House of Commons; and that Mr. Heath would remain Government Chief Whip.

Ten Ministers, including the Law officers and Mr. Heath, retained the offices they held in the previous Government. The only new Ministers were Lord Perth, who became Minister of State for Colonial Affairs, and Mr. Marples, who returned to the Government after being a back-bencher for just over a year.

All the other Ministers were members of the Eden Government but were allotted different portfolios in the new Government. Two of them accepted less senior posts than they held in the Eden Administration—Mr. Reginald Maudling, who was Minister of Supply with a salary of £5,000 a year, became Paymaster-General with a salary of £3,000; and Mr. Nigel Birch, who was Secretary of State for Air (£5,000), accepted the post of Economic Secretary to the Treasury (£2,000).

Mr. Turton (formerly Minister of Health), Mr. Austin Low (formerly Minister of State, Board of Trade), and Lord Reading (formerly Minister of State for Foreign Affairs) left the Government. It was stated that Mr. Turton had expressed his readiness to become a back-bencher, whilst Mr. Low had asked the Prime Minister to exclude him from consideration for personal reasons. The K.C.M.G. was conferred on Lord Reading.

Lord Selkirk (51), who succeeded Lord Hailsham at the Admiralty, is a Scottish representative peer and a brother of the Duke of Hamilton. He was Chancellor of the Duchy of Lancaster in the Eden Government. **Mr. Ward** (49), who succeeded Mr. Nigel Birch as Secretary for Air, served as a regular officer in the R.A.F. before and during the war, was Under-Secretary for Air in 1951-52, and since then had been Parliamentary and Financial Secretary to the Admiralty. **Mr. Aubrey Jones** (45), formerly Minister of Fuel and Power, became Minister of Supply in succession to **Mr. Maudling** (39), who succeeded Sir Walter Monckton as Paymaster-General and who, as stated above, will act as spokesman for the new Minister of Power (Sir Percy Mills) in the House of Commons.

Mr. Vosper (41), Mr. Turton's successor as Minister of Health, was Parliamentary Secretary to the Ministry of Education in the Eden Government. **Mr. Molson** (53), appointed Minister of Works *vice* Mr. Buchan-Hepburn, is a former chairman of the Tory Reform Group, and was Joint Parliamentary Secretary to the Ministry of Transport and Civil Aviation in the last Government. **Mr. Marples** (49), who succeeded Dr. Hill as Postmaster-General, was Parliamentary Secretary to the Ministry of Pensions and National Insurance in 1954-55, but was not included in the Government formed by Sir Anthony Eden in April 1955. A former Parliamentary Secretary to the Ministry of Housing and Local Government, he was Mr. Macmillan's principal lieutenant in the drive to build 300,000 houses a year.

Mr. Ormsby-Gore (38), who succeeded Lord Reading as one of the two Ministers of State at the Foreign Office, is the son of Lord Harlech, a former Colonial Secretary. He was formerly Joint Under-Secretary of State for Foreign Affairs. It was announced that Mr. Ormsby-Gore would deal mainly with European affairs, and the other Minister of State (Commander Noble) with United Nations affairs. **Lord Perth** (49), successor to Mr. Maclay as Minister of State at the Colonial Office, is a banker, and a director of the Atlas Assurance Company. He served during the war in the Intelligence Corps and at the Ministry of Production.

Mr. Walker-Smith (46), who succeeded Mr. Austin Low as Minister of State at the Board of Trade, is a barrister, and a former chairman of the Conservative 1922 Committee. He was Parliamentary Secretary to the Board of Trade in 1955-56, and in November 1956 became Economic Secretary to the Treasury—a post in which he succeeded Sir Edward Boyle after the latter's resignation from the Government on the Suez question. **Mr. Enoch Powell** (44), successor to Mr. Henry Brooke as Financial Secretary to the Treasury, was formerly Parliamentary Secretary to the Ministry of Housing and Local Government. **Mr. Nigel Birch** (51), the former Secretary of State for Air, became Economic Secretary to the Treasury in succession to Mr. Walker-Smith.

An Order was issued on Jan. 16 changing the "style and title" of the Minister of Fuel and Power (Sir Percy Mills) to Minister of Power. The Ministry of Fuel and Power—now renamed the Ministry of Power—was set up under the wartime Coalition Government in 1942.

Mr. Macmillan's Broadcast on Government Policy.

Mr. Harold Macmillan's first policy statement as Prime Minister was made in a B.B.C. party political broadcast in the evening of Jan. 17. The Prime Minister spoke as follows:

"It is with a mixture of sorrow and pride that I speak to you as Prime Minister to-night. Sorrow, because my friend and leader has had to lay down his burden because of grievous illness. A man of character and courage. I am sure there is not one of you in this country who does not join with me in wishing him a speedy restoration to health and a safe voyage. But apart from that, it is a matter of very great pride to be called to the great office of Prime Minister.

"Every now and again since the war I have heard people say: "Isn't Britain only a second or third class power now? Isn't she on the way out?' What nonsense! This is a great country, and do not let us be ashamed to say so. It has a superb record of achievement of every kind. The country that produced men such as James Watt and his steam-engine, the men who first mastered the atom, the country that built the first atomic power station, has no reason to quiver before temporary difficulties. After all, in this year that has just passed we have had all-time record exports and the best savings for years. Twice in my lifetime I have heard the same old tale about our being a second-rate power, and I have lived to see the answer.

"It is true that in a material sense—population, the tonnage of steel made, or supplies of metals and raw materials—this island cannot match the vast resources either of the United States or of Russia. All the same, Britain is not alone. Think of the Commonwealth and all that it means. Then there are the peoples of Europe. With these countries, with France perhaps particularly, we already have close ties. I firmly believe it is our destiny to work more and more closely with them. The total of the strength and wealth in all these communities, Commonwealth and Europe, is no less than that of the two giant powers. But of course it is not just material resources that make a nation great. It is character and leadership, not only in Government but in industry, in the trade unions, in the home, everywhere.

"There are certainly some problems ahead of us. We are all pretty conscious of what they are. The shortage of petrol and oil, for instance. I do not intend to-night to go into all the pros and cons of recent events in the Middle East. I believe history will justify what we did. The difficulties we are up against are the price of paying for action. But remember the price of inaction, the price we would have had to pay for letting things slide—that might have been very high indeed.

"When we think of the future of our country—and it is the future I want to talk about to-night—there is a lot to be thankful for. When I first went into politics as a very young man as the Member for Stockton, all Tees-side was suffering from the great depression that followed the First World War. The older ones among you will remember those years. I have never forgotten them. Like so many other young men I was struck with the inequalities of wealth, and especially the poverty caused by large-scale unemployment, and I rather rebelled against it. But a lot has been done since then. The great inequalities of wealth have disappeared. There is poverty and suffering still, particularly among retired folk and others with fixed incomes. But, broadly speaking, the standard of living, the level of employment, and the enjoyment of life have steadily risen. We have built our defences against want and sickness, and we are proud of it. Of course, however well it is managed, it costs, and must cost, a great deal of money. Then there is defence. That costs money too. How are we going to pay for it all? There is only one way. By our work, our skill, our brains, our know-how—in a word, our character.

"Now I must frankly come to a point on which people do differ. There is the old picture of the cake which is our national wealth. I am sorry to drag in this old friend, but it does help to illustrate the point. There are some who are most anxious to see that the cake should be cut into slices of absolutely equal size, however thin. They do not seem to bother about the size of the cake itself. They are thinking of the so-called 'Equality State.' But I do not believe that is what our people want. Ample opportunity, not drab equality, is what they want. No-one should be allowed to sink below a decent level, but everyone should be free to rise according to his gifts, his work, and his worth. There is nothing to be ashamed of in getting to the top, whether it is your department, your profession, your business, your trade, or whatever it is, or being paid in proportion to the size of job you do.

"The success of a country is the success of the men and women who make it up. This is the kind of thought behind the things we are going to try to do. Let me give you three examples, although you will not expect me here to announce a new policy; the place for that is Parliament.

"First, power: the old sources of power—coal, gas, oil, and electricity—and the new sources as well. We lead the world in the production of atomic energy for peaceful and industrial purposes, and we are going to stay in the lead. That is why I appointed as Minister of Power—not Fuel and Power—Sir Percy Mills. He has tremendous experience of business and also of working for the Government in the war and after the war—in fact, he was my right-hand man in reaching the target of 300,000 houses, and I believe we went beyond it. His job is to take over the direction of all our power resources. Mind you, atomic energy is not going to solve all our problems, at least for a long time. It is not the atom yet, it is coal, and the men who get it from the ground, on whom our future will depend for many years to come. And, of course, oil. But power from all its sources is the key to the future.

"Now a word on defence. We certainly cannot do without our defences. We have obligations to ourselves and to our partners. We must carry our fair share, but not more than our fair share. We are going to make sure that we are not spending money on things we do not need or commitments we cannot sustain. There must be no waste of money. No vested interests, however strong, and no traditions, however good, must stand in our way.

"Then there is education. It is in the schools and universities where our characters are shaped. It is there, too, that we must look for the scientists, the technologists, and the technicians we shall need in such growing numbers; and that is why we are building so many new schools and why we are making it possible for more boys and girls every year to go on to the universities. That is why we are expanding our technical colleges.

"There is one more thing to which I want to make reference. A lot of people are worried about our relations with the United States. The life of the free world depends upon the partnership between us. Any partners are bound to have their differences now and then. I have always found it so. But true partnership is based upon respect. We do not intend to part from the Americans and we do not intend to be satellites. I am sure they would not want us to be so. The stronger we are, the better partners we shall be; and I feel certain that as the months pass we shall draw continually closer together with mutual confidence and respect.

"I have a fine body of colleagues—that is why I chose them—to get on with the Government job. That is why there is not going to be an election. I am grateful to the old colleagues who stay with me, particularly to Mr. Butler, my chief partner in this new enterprise. I am grateful to the old colleagues who thought it right to make way for others, and to those who care about what they do, not what they are called; and I am bringing in some new men. I have a strong and united team. I am not bothered by this business of calculating whether we are on the left or the right of the Conservative Party. We all believe in progressive Conservatism, and we are going forward together with confidence.

"Just one word more. The country expects leadership, and I shall do my best to give it. As for courage and character, I know the British people have this in full measure. All we need is confidence in our country and in ourselves. So do not let us have any more defeatist talk of second-class Powers and of dreadful things to come. Britain has been great, is great, and will stay great, provided we close our ranks and get on with the job."

President Eisenhower's Message to Mr. Macmillan.

The text of messages exchanged between President Eisenhower and Mr. Macmillan was issued on Jan. 15.

President Eisenhower's letter (dated Jan. 14) was worded as follows:

"Dear Harold,—I send my warmest congratulations to you on becoming Prime Minister of the United Kingdom. Your distinguished career is well known on this side of the Atlantic, and has earned our widespread respect. My own warm admiration stems, as you know, from our association in North Africa and through the succeeding years. For me that association has been as agreeable as it has been productive.

"I feel confident you will bring to your new task the same vision, determination, and sympathetic understanding you have shown in the past. For myself, and for the people of the United States, let me wish you every success in carrying out the great responsibilities which now devolve upon you as Prime Minister.

With warm regards,
Sincerely,
Dwight D. Eisenhower."

The Prime Minister replied:

"My Dear Friend,—Thank you for your kind message. I too have warm and vivid memories of the time when we worked together in North Africa, and of our association since then. You know how much importance I attach to the friendship between the peoples of Britain and the United States, not least because of my own personal links with your country. I look forward to working with you once again to further this friendship.

With all good wishes,
Harold Macmillan."

Mr. Dulles sent a letter to Mr. Selwyn Lloyd saying that he was "extremely happy" that Mr. Lloyd was continuing as Foreign Secretary, and extending his "good wishes and a warm hope that our common effort on behalf of the free world may make steady progress in the important times ahead."

A. UNITED KINGDOM - UNITED STATES - CANADA. — Release of Secret Atomic Information. - U.S. and Canadian Uranium Reserves.

It was simultaneously announced on Dec. 12, 1956, in London, Washington and Ottawa that the U.K., U.S., and Canadian Governments had agreed to release a large volume of information on atomic developments which had hitherto remained secret under security restrictions. The information released applied solely to the peaceful uses of atomic energy and not to its military applications.

The U.K. Atomic Energy Authority explained that a considerable volume of material to assist in the peaceful development of atomic energy would become available as reports, drawings, and other material were declassified. Such material would be of particular value to British industrial organizations engaged on the nuclear power programme; e.g. information not only of the Calder Hall type of reactor but also of other types under consideration would be freed from security restrictions. Moreover, it would become possible for the first time to release detailed production figures of uranium ore and concentrates.

The chairman of the U.S. Atomic Energy Commission (Rear-Admiral Lewis Strauss) said that the information released would be "of great assistance to other nations in fulfilling the aims of President Eisenhower's atoms-for-peace programme."

On the same date statistics were issued in Washington and Ottawa giving, for the first time, detailed figures of the uranium reserves of the U.S.A. and Canada. The U.S. Atomic Commission announced that domestic ore reserves in the U.S.A. (i.e. uranium still in the ground) were estimated at 60,000,000 tons as at Nov. 1, 1956, of which 41,000,000 tons (over 68 per cent) were in New Mexico, 7,500,000 tons in Utah, 4,100,000 tons in Colorado, 2,600,000 tons in Arizona, 2,300,000 tons in Wyoming, 1,500,000 tons in Washington State, and 1,000,000 tons in other areas.

The U.S. Atomic Energy Commission also disclosed the following information: (1) production of uranium concentrate (uranium oxide) had doubled during 1956 and now stood at an annual rate of 8,000 tons [uranium concentrate represents about 0.25 per cent of any given amount of crude ore]; (2) 7,600 tons of concentrate had been produced between July 1955 and December 1956; (3) 840,000 tons of crude ore had been mined from July to December, 1955, compared with an estimated total of 3,000,000 tons for 1956; (4) the daily capacity of the 12 uranium mills in the U.S.A. totalled 8,960 tons of uranium ore.

The Canadian Government stated that Canada's known reserves of uranium ore were estimated at 225,000,000 tons, with a uranium content of 237,000 tons. Eldorado Mining and Refining Ltd. (the Crown company responsible for the Canadian uranium programme) said that Canada's uranium production, now running at a rate of 3,300 tons a year, was expected to rise sharply in 1957 and to reach 14,000-15,000 tons a year by mid-1958. Only a few hundred tons a year would be required for the Canadian atomic energy programme over the next five years, and the remainder would be available for sale to other countries or for stockpiling. The president of the Eldorado company (Mr. W. J. Bennett) said that the estimate of Canada's uranium ore deposits at 225,000,000 tons was "on the conservative side."—(Times - New York Times - Montreal Star)

B. CEYLON. — United National Party Victory in Colombo Municipal Elections.

Elections to the Colombo Municipal Council on Dec. 15, 1956, resulted in a victory for the United National Party, which won 18 out of the 31 seats and secured an overall majority on the council for the first time in ten years.

The People's United Front (*Mahajana Eksath Peramuna*), the Government party led by Mr. Bandaranaike, obtained only five seats; the left-wing ("Trotskyist") *Lanka SamaSamaja* party three seats; the Communists two seats; and Independent candidates three seats. Among United National Party members, the Mayor of Colombo (Mr. A. V. Sugathadasa) was returned with an increased majority. The leader of the *Lanka Sama Samaja* party, Dr. Perera, (Leader of the Opposition in the House of Representatives), was among those defeated, while Mr. Pieter Keuneman, the Communist leader, had his majority halved.

Results of local elections held on the same date in other parts of Ceylon also showed that the United National Party had gained ground at the expense of the People's United Front. Of the 88 candidates put forward by the U.N.P. for 14 local bodies, including the Colombo Municipal Council, 51 were successful, whereas of the 181 candidates put up by the P.U.F. for 25 local bodies, only 65 secured election. Mr. Bandaranaike issued a post-election statement claiming that the principal support for his party came from the rural, and not from the urban areas. (Ceylon Government Information Department)

A. MIDDLE EAST. — Dr. Hammarskjöld's Reports to U.N. General Assembly. - Afro-Asian Resolution on Anglo-French Withdrawal from Egypt. - Announcement of British and French Withdrawal. - Mr. Selwyn Lloyd's Statement to House of Commons. - Repudiation of "Collusion" Allegations. - Arrival and Build-up of U.N. Emergency Force in Egypt. - Allied Evacuation of Port Said. - Egyptian Breaches of Cease-fire. - Fedayeen Attacks on Allied and U.N. Troops. - Abduction and Death of Lieutenant Moorhouse. - Report on Port Said Casualties. - Allied Casualties in Port Said Operations.

Three documents on the Middle East situation were presented by the U.N. Secretary-General (Dr. Hammarskjöld) on Nov. 20, 1956, to the regular (eleventh) session of the U.N. General Assembly, which had opened in New York on Nov. 12. As explained on page 15202, the Middle East question had been transferred to the agenda of the regular session as a matter of priority.

The documents presented by Dr. Hammarskjöld, summarized below, comprised (1) a report on "basic points for the presence and functioning in Egypt of the U.N. Emergency Force"; (2) an *aide-mémoire* on this matter; and (3) a report on "arrangements for clearing the Suez Canal."

The U.N. Emergency Force.

Dr. Hammarskjöld pointed out that the Egyptian Government, though accepting the creation of a U.N. Emergency Force (UNEF) in principle, had asked for clarification of certain points in connexion with the U.N. resolution setting up this force. He had therefore had exchanges of views with the Egyptian Government, and had given his "interpretations of the relevant General Assembly resolutions in respect of the character and functions of the Force." The Egyptian Government had accepted these "interpretations" and had agreed that U.N. troops should be sent to Egypt. The first transport of U.N. troops had accordingly taken place on Nov. 15, 1956.

Though this exchange of views was "sufficient as a basis for the despatch of the first units," he had nevertheless felt that "a firmer foundation has to be laid for the presence and functioning of the Force in Egypt, and for the continued co-operation of the Egyptian authorities." For these reasons he had visited Cairo on Nov. 16-18 and had discussed with President Nasser and Dr. Fawzi (the Egyptian Foreign Minister) "basic points for the presence and functioning of UNEF in Egypt." The results of these discussions were included in the *aide-mémoire* accompanying the present report [see below], which had the approval of the Egyptian Government.

Dr. Hammarskjöld also informed the Assembly that he had visited the UNEF staging areas at Capodichino (near Naples) and Abu Sueir (Egypt), and gave the following "indications as to the numerical development of the Force": (*a*) as at Nov. 20, 1956, 696 U.N. troops had arrived at Abu Sueir, with a further 282 at Capodichino; (*b*) a total of 2,240 U.N. troops would proceed to Egypt "in the immediate future"; (*c*) a further 1,260 would be "transferred to Naples or directly to Egypt at times still to be determined."

The Secretary-General added: "The initial activities of the Force are determined by the fact that, as yet, no withdrawals have taken place in compliance with the General Assembly's resolutions of Nov. 2 and Nov. 7, 1956. In pursuance of these resolutions, I shall report to the Assembly on this matter as soon as I receive clarifications from the Governments concerned [i.e. Britain, France and Israel]."

Aide-Mémoire on U.N. Force in Egypt.

Dr. Hammarskjöld said in his *aide-mémoire* that "the Government of Egypt and the U.N. Secretary-General have stated their understanding on the basic points for the presence and functioning of UNEF, as follows:

"(1) The Government of Egypt declares that, when exercising its sovereign rights on any matter concerning the presence and functioning of UNEF, it will be guided, in good faith, by its acceptance of the General Assembly resolution of Nov. 5, 1956.

"(2) The U.N. takes note of this declaration . . . and declares that the activities of UNEF will be guided, in good faith, by the task established for the Force in the aforementioned resolution; in particular, the United Nations, understanding this to correspond to the wishes of the Government of Egypt, reaffirms its willingness to maintain UNEF until its task is completed.

"(3) The Government of Egypt and the Secretary-General declare that it is their intention to proceed forthwith, in the light of (1) and (2) above, to explore jointly concrete aspects of the functioning of UNEF, including its stationing and the question of its lines of communication and supply. The Government of Egypt, confirming its intention to facilitate the functioning of UNEF, and the United Nations are agreed to expedite, in co-operation, the implementation of guiding principles arrived at as a result of that joint exploration on the basis of the Resolutions of the General Assembly."

Clearance of Suez Canal.

Dr. Hammarskjöld reported on this matter as follows: "In the course of the recent hostilities in Egypt, great damage was done to the Suez Canal. The Canal is now out of function, and considerable efforts of a most urgent character are needed to clear it from obstructions. In its resolution of Nov. 2, 1956, the General Assembly urged that steps be taken to reopen the Canal. Immediately upon the adoption of the resolution, the Secretary-General proceeded to explore the technical possibilities of engaging the services of private firms for assistance in the clearing operations. For that purpose he addressed himself to the Governments of Denmark and the Netherlands. On the basis of replies received, contacts were made with a number of private firms.

"During the Secretary-General's visit to Cairo on Nov. 16-18, he had an opportunity to discuss the matter directly with the Government of Egypt. In view of the urgency of clearing the obstructions in the Canal, and the scope of the task, the Government of Egypt addressed to him a request for U.N. assistance in arrangements for this purpose, as a matter of high priority. The Government of Egypt considered that the work should be started immediately upon the withdrawal of non-Egyptian forces from Port Said and the Canal area. . . . The Secretary-General gave his assurance, in principle, that the U.N. would seek to provide such assistance. In pursuance of this assurance, he now wishes to submit the question to the General Assembly.

"The exploration undertaken has indicated that various private enterprises, with important resources, might agree to co-operate in clearing the Canal. The Secretary-General proposes that the General Assembly . . . should authorize him to proceed with his exploration of existing possibilities, and to negotiate agreements with such firms as might speedily and effectively undertake the clearing operations. As indicated above, he would given the approval of the General Assembly - address himself to firms in countries outside the present conflict. In his contacts with the firms approached, he would try to clarify to what extent they, in turn, may need assistance from enterprises not directly approached by the United Nations.

"At the present stage the Secretary-General is not prepared to indicate how the costs should be shared. He intends to revert to this question when the approximate costs have been estimated. He will, at the proper stage of the negotiations, request the necessary authority to conclude agreements concerning the operation.

"In the course of its discussions with the Secretary-General, the Government of Egypt expressed its wish to see the operation completed with the utmost speed. In view of the interest of the Government of Egypt, as well as of all users of the Canal, the Secretary-General feels that the most expeditious procedure to achieve the desired results should be followed in this matter. That is why he suggests that the General Assembly should authorize him, in consultation with the Advisory Committee set up under the Assembly's resolution of Nov. 2, 1956, to enter into the financial commitments that are unavoidable, although he is not now in a position to indicate the size of those initial commitments.

". . . The Secretary-General anticipates that experts would have to be sent in order to survey the work to be undertaken. It would be his intention to use the experts now employed in the U.N. Technical Assistance Programme, assisted by representatives of the firms approached. Although it is not proposed to begin the work until after the withdrawal of non-Egyptian forces from Port Said and the Canal area, the Secretary-General considers it possible to pursue negotiations, and, in agreement with the Government of Egypt, to arrange for the necessary survey of the Canal without delay."

The ensuing debate (Nov. 23-24) was on similar lines to the earlier debates in the Assembly's emergency sessions.

Mr. Selwyn Lloyd (U.K.) repeated Britain's pledge to withdraw her forces from Egypt as soon as UNEF was "effective and competent to discharge its functions." He strongly denied that there had been any collusion between Britain, France and Israel; emphasized that the U.N. had failed over the past years "either to keep the peace [in the Middle East] or to secure compliance with its own resolutions"; and reiterated that Britain and France had intervened to prevent the spread of hostilities and to place a "shield" between the combatants. Out of these actions, whatever might be thought of them, had come the concept of a U.N. Force to keep the peace in the area an idea first put forward by Sir Anthony Eden and strongly supported by Britain.

Mr. Cabot Lodge (U.S.A.) said that his Government understood that the Anglo-French withdrawal would be "phased with the speedy arrival of the UNEF." He expressed the hope that "this phased operation will begin as soon as possible."

The General Assembly adopted two resolutions on Nov. 24, dealing with the withdrawal of U.K., French, and Israeli forces from Egypt and with the clearance of the Suez Canal.

Resolution on Withdrawal of Forces. This resolution, sponsored by 21 nations (including all the Arab and Asian countries), recalled that the Assembly's resolutions of Nov. 2 and Nov. 7 had called upon Britain and France to withdraw their forces from Egypt, and upon Israel to withdraw her forces behind the armistice lines. It:

(1) Noted "with regret" that two-thirds of the French forces and all the U.K. forces remained in Egypt (though it had been announced that one British battalion was being withdrawn), and that no Israeli forces had been withdrawn behind the armistice lines;

(2) Called upon Britain, France and Israel "to comply forthwith" with the resolutions of Nov. 2 and Nov. 7;

(3) Requested the Secretary-General "urgently to communicate this resolution to the parties concerned and to report without delay to the General Assembly on its implementation."

The resolution was carried by 63 votes to five (Australia, France, Israel, New Zealand, and the U.K.), with 10 abstentions and one country (Nicaragua) absent. The supporters included all the Com-

munist and Asian-Arab countries, the Scandinavian nations, nearly all the Latin American countries, and the United States. The abstentions were Belgium, Canada, Nationalist China, Cuba, the Dominican Republic, Italy, Luxemburg, the Netherlands, Portugal, and South Africa.

A Belgian amendment (moved by M. Spaak), designed to eliminate criticism of Britain, France, and Israel, was defeated by 37 votes to 23, with 18 abstentions (including the U.S.A.). It proposed to delete paragraphs (1) and (2) of the 21-nation resolution and to substitute the following text. "Notes that . . . one-third of the French forces have been withdrawn, the U.K. Government has decided to withdraw one infantry battalion immediately, and Israel has withdrawn part of its troops, and considers that France, the U.K. and Israel should expedite the application of the resolutions of Nov. 2 and 7 in the spirit in which they were adopted, particularly with regard to the functions vested in the UNEF."

Resolution on Clearance of Canal. This resolution (sponsored by Canada, Colombia, India, Norway, the U.S.A., and Yugoslavia) was adopted by 65 votes to nil, with nine abstentions. It:

(1) Noted "with approval" the contents of the Secretary-General's *aide-mémoire* "on the basis for the presence and functioning of UNEF in Egypt."

(2) Noted "with approval" the progress so far made by the Secretary-General "in connexion with arrangements for clearing the Suez Canal as set forth in his report";

(3) Authorized the Secretary-General "to proceed with the exploration of practical arrangements and the negotiation of agreements so that the clearing operations may speedily and effectively be undertaken."

Expenses of U.N. Emergency Force.

An initial sum of $10,000,000 for the expenses of the U.N. Emergency Force was approved by the General Assembly on Nov. 26 by 59 votes to nine (the Communist countries), with 18 abstentions and five countries absent. The 18 countries abstaining on the resolution were Cambodia, Costa Rica, Cuba, Ecuador, El Salvador, Guatemala, Israel, Luxemburg, Mexico, Nicaragua, Paraguay, Turkey, and South Africa, while the five absentees were Honduras, Laos, Lebanon, the Philippines, and Portugal.

The resolution authorized the Secretary-General to set up a Special UNEF Account to which would be credited "funds received by the U.N., outside the regular budget, for the purpose of meeting the expenses of the Force and from which payments for this purpose shall be made." The Secretary-General was requested to establish "such rules and procedures for the Special Account and to make such administrative arrangements as he may consider necessary to ensure effective financial administration and control of the Account." In addition, the General Assembly's Administrative and Budgetary Committee was requested to report as soon as possible on "further arrangements that need to be adopted regarding the costs of maintaining the Force."

Dr. Hammarskjöld had originally proposed that the expenses of UNEF should be allocated between member-States on the basis of their assessments for the U.N.'s Budget for 1957; this provision, however, was omitted from the revised version of the resolution as subsequently adopted by the Assembly. In a statement before the vote, the Secretary-General said that he assumed that U.N. member-Governments, "while recognizing the need for taking certain decisions without delay, will nevertheless wish to follow established procedures to the fullest extent practicable." Accordingly, he "felt it wise to suggest that such problems as allocation of costs among member-States should be deferred temporarily, pending an opportunity of their being properly and adequately discussed in the Administrative and Budgetary Committee."

The Soviet delegate (M. Kuznetsov) demanded that the costs of clearing the Suez Canal should be borne by the "aggressor nations"—Britain, France and Israel—and not by the United Nations. He emphasized that the U.S.S.R. had "undertaken no financial commitments" under the resolution adopted. Reservations were also expressed by several Latin American countries, the delegates of Guatemala, El Salvador, Costa Rica, and Paraguay stressing that their Governments could not bind themselves to assume financial commitments with regard to the Canal.

The Assembly's Administrative and Budgetary Committee decided on Dec. 20 that the first $10,000,000 for the costs of the UNEF should be borne by all member-States on the basis of their normal scale of assessments under the U.N. Budget. The resolution also set up a nine-nation sub-committee (the U.S.A., Soviet Union, Canada, India, Ceylon, Sweden, Chile, Liberia, and El Salvador) to examine the question of apportioning expenses in excess of $10,000,000. The recommendation was subsequently approved by the Assembly, the Soviet group opposing.

Anglo-French Announcement of Withdrawal from Egypt. - Notes to U.N. Secretary-General.

The British and French Governments sent identical *notes verbales* to the U.N. Secretary-General on Dec. 3, 1956, confirming their intention "to continue the withdrawal of their forces now in the Port Said area without delay." The two Governments added that they had accordingly instructed the Allied Commander, General Sir Charles Keightley, to seek agreement with the Commander of the U.N. Force (Major-General Burns) "on a timetable for the complete withdrawal, taking account of the military and practical questions involved."

In announcing their decision, the British and French Governments made four points: (1) that "an effective U.N. Force is now arriving in Egypt charged with the tasks assigned to it" in the General Assembly's resolutions; (2) that the Secretary-General "accepts the responsibility for organizing the task of clearing the Suez Canal as expeditiously as possible"; (3) that, in accordance with the Assembly's decision, "free and secure transit will be re-established through the Canal when it is clear"; and (4) that the Secretary-General "will promote as quickly as possible negotiations with regard to the future regime of the Canal on the basis of the six requirements set out in the Security Council's resolution of Oct. 13, 1956" [see 15252 A]. The U.K. and French Governments asked that General Burns "should make himself responsible for the safety of any French and British salvage resources left at the disposition of the U.N. salvage organization."

In addition, the two Governments recalled "the strong representations they have made regarding the treatment of their nationals in Egypt"; drew attention to the humane treatment accorded to Egyptian nationals in Britain and France; and said that they felt "entitled to demand that the position of British and French nationals in Egypt should be fully guaranteed."

The text of the *notes verbales* was communicated to the General Assembly by Dr. Hammarskjöld on the same day. At the same time the Secretary-General announced (1) that he had instructed General Burns to get into immediate touch with the Anglo-French Commanders in Egypt "with a view to working out arrangements for the complete withdrawal of Anglo-French forces without delay"; and (2) that the attention of General Burns had also been drawn "to the need to ensure that UNEF should be in a position to assume its responsibilities in the Port Said area by the middle of December."

The U.S. State Department issued a statement on the same day welcoming the decision of the British and French Governments to withdraw from Egypt, and saying that "its implementation will strengthen the capacity of the U.N. to deal with the other aspects of Middle Eastern problems which are still unfinished business." The statement emphasized the "imperative need" to clear the Suez Canal at the earliest possible moment, and declared that the U.S.A. was "determined, through the U.N. and in other ways, to assist in bringing about a permanent settlement of other persistent conflicts which have plagued the Middle East over recent years."

Prior to the Anglo-French announcement of Dec. 3 on the forthcoming complete withdrawal of their forces, the British, French, and Israeli Governments had informed Dr. Hammarskjöld on Nov. 21 (*a*) that one British battalion had already been withdrawn from Egypt "as a token of good faith"; (*b*) that one-third of the French naval personnel in Egypt, together with two-thirds of the French naval vessels, had been withdrawn from Egyptian territory and Egyptian waters; and (*c*) that the Israeli forces in Sinai had withdrawn "for varying distances" along the entire front. This information was given to Dr. Hammarskjold in reply to several questions put by him to the U.K. and French Governments as to the steps they were taking to implement the U.N. resolutions on the withdrawal of their forces from Egypt. [The detailed replies of the two Governments were described by Mr. R. A. Butler in a statement to the British House of Commons on Nov. 22—see below.]

The U.N. Emergency Force. - Arrival and Build-up in Egypt. - National Contingents.

As stated by the Secretary-General in his report to the General Assembly (see above), Dr. Hammarskjöld had visited Cairo on Nov. 16-18 for discussions with Colonel Nasser. He broke his journey at Naples (Nov. 15) for talks with General Burns, who had himself visited Cairo on Nov. 8 and Nov. 12 for discussions with the Egyptian President. Dr. Hammarskjöld also had discussions in Italy with Admiral Boone, the U.S. Naval C.-in-C. in the Eastern Atlantic, Mediterranean and Indian Ocean.

Before leaving New York for Cairo, Dr. Hammarskjöld announced on Nov. 12 that he had reached agreement with the Egyptian Government on the stationing of U.N. forces in Egypt, and that the first UNEF contingents would arrive in that country within a week. The Secretary-General's statement was confirmed in Cairo by Colonel Hatem (Director-General of the Egyptian Information Department), who said that agreement had been reached "on all questions" concerning the stationing of UNEF in Egyptian territory. Colonel Hatem also said that it had been agreed that UNEF should be immediately withdrawn from Egypt whenever the Egyptian Government requested its withdrawal.

Cairo Press and radio statements said that Egypt had laid down three conditions for the stationing of the U.N. Force in Egypt: (1) that the Egyptian Government's consent would be necessary for the participation of any country's troops in UNEF; (2) that the U.N. should agree to withdraw the Force when the Egyptian Government demanded; (3) that UNEF would not remain in Egypt after the evacuation of Anglo-French forces from Port Said, but would move eastward to the Egyptian-Israeli armistice lines.

Following the agreement between Dr. Hammarskjöld and the Egyptian Government, as announced by the Secretary-General before his visit to Cairo, General Burns received instructions from U.N. Headquarters on Nov. 14 to begin moving the U.N. Forces from the staging area in Italy (Capodichino airport) to the Abu Sueir airfield in the Canal zone, which had been designated as the staging area in Egypt by agreement with the Egyptian authorities. The Danish, Norwegian, and Colombian troops already assembled at Capodichino [see page 15202, second column] were accordingly flown to Abu Sueir on Nov. 14-15 as the advance-guard of further UNEF contingents. For several weeks thereafter a regular "shuttle service" was maintained between Capodichino and Abu Sueir, in which U.N. troops were flown to Egypt. The U.N. troops were initially flown out by Swiss civil planes, under a contract between the U.N. and *Swissair* (Swiss Airlines), while their equipment was flown out by the Italian Air Force. As from Nov. 26, the airlift from Capodichino to Abu Sueir was taken over by the Royal Canadian Air Force, the contract between the U.N. and *Swissair* having expired. In addition, several national contingents—e.g. the Indian and Swedish—were flown direct to Egypt by U.S. planes, which had been placed at the disposal of the U.N. Command; the bulk of the Yugoslav contingent came by sea in Yugoslav ships; and the Canadian contingent was transported in the aircraft carrier H.M.C.S. *Magnificent*.

In a statement on Nov. 18, Dr. Hammarskjöld announced that the provisional target for UNEF was two combat brigades totalling about 6,000 men, of whom about 4,000 were expected to be in Egypt by the beginning of December. These forces, "well armed and equipped," would constitute an organized military force with headquarters and staff, armoured car companies, and supporting engineer, transport, supply, signals, and medical units.

A further statement was issued from U.N. Headquarters on Dec. 13 (the completion of the fourth week of the international airlift from Capodichino to Abu Sueir) giving the following official information: (1) the U.N. Emergency Force totalled approximately 5,000 men as at that date, comprising over 3,700 already in Egypt, other contingents awaiting transport from their home countries, and personnel at Capodichino, including over 300 Canadian personnel operating the airlift; (2) General Burns had established his headquarters on the previous day at El Ballah, north of Ismailia; (3) the UNEF troops in Egypt were recruited from eight countries out of the 23 which had offered to send troops—Norway, Sweden, Denmark, Finland, Colombia, Canada, India, and Yugoslavia; (4) over 1,500 U.N. troops—Danish, Norwegian, Swedish, and Colombian infantry—were stationed in the Port Said and Port Fuad areas, where they were patrolling port districts, guarding power stations, and protecting factories; (5) two companies of Indian paratroops had taken over positions in the El Cap area, between the Anglo-French and Egyptian cease-fire lines; (6) Yugoslav armoured car companies had been stationed along three routes in the Sinai peninsula, their duties including the clearance of minefields and the repair of highways.

On Jan. 7, 1957, U.N. Headquarters announced that UNEF would be brought up to its target of two combat brigades by the arrival of a Brazilian infantry battalion and an Indonesian contingent of 550 men. Both contingents were *en route* by sea.

The U.N. Emergency Force comprised over 1,000 troops from Norway, Sweden, and Denmark, of whom the Norwegian and Danish troops were formed into a joint Dano-Norwegian battalion; a Colombian battalion of 560 men; two Yugoslav armoured car companies totalling about 750 men; a battalion of the Kumaon Rifles (an Indian parachute regiment), comprising 800 men, which was flown direct to Egypt from its headquarters at Agra; some 250 Finnish troops; and Canadian personnel. It was announced in Ottawa on Dec. 22 that the Canadian contingent would ultimately total 1,500 men, including personnel operating the airlift from Capodichino.

All members of the U.N. Emergency Force wore light-blue helmets (the colour of the U.N. flag) and U.N. armbands, though retaining the uniforms of their national forces. Their equipment included rifles, machine-guns, sub-machine guns, anti-tank rockets, and (in the case of the Yugoslav contingent) armoured cars.

Of the Scandinavian contingent, 410 soldiers were sent by Denmark, 300 by Sweden, and 280 by Norway, in addition to a Norwegian field ambulance and medical unit of over 200 men.

At the beginning of January, 1957, the U.N. Emergency Force in Egypt included contingents of eight countries, as stated above, with contingents from two other countries (Brazil and Indonesia) *en route*. In all, 23 countries had offered contingents to UNEF, but not all were acceptable to the Egyptian authorities notably Australia, New Zealand, and Pakistan. The 23 countries offering troops were Australia, Brazil, Burma, Canada, Ceylon, Colombia, Czechoslovakia, Denmark, Ecuador, Ethiopia, Finland, India, Indonesia, Laos, New Zealand, Norway, Pakistan, Persia, Peru, the Philippines, Rumania, Sweden, and Yugoslavia.

The Prime Minister of Australia, Mr. Menzies, stated on Nov. 9 that Australia was ready to contribute troops to UNEF, but pointed out that it was unlikely that such a contribution would be accepted because Egypt had broken off diplomatic relations with Australia. He urged that the U.N. Force should be adequate for its task in maintaining peace in the Middle East, and said that it would be "strange if the properly constituted forces of Britain and France should be replaced by a force of no military consequence, without adequate supplies and backing." In a speech on Nov. 11 to the Australian Liberal Party, Mr. Menzies deplored the exclusion of Britain and France from the International Force; expressed the view that a U.N. Force possessing "power and authority" could have been built up around the forces of Britain and France already in the area; and criticized the present composition of UNEF as consisting of "little groups of bits and pieces."

In New Zealand, the Chief of General Staff (Major-General Weir) was authorized on Nov. 8 to draw up plans for a New Zealand contingent of 300 men for UNEF, to be recruited voluntarily. On Nov. 26, however, the Prime Minister (Mr. Holland) announced that recruiting would be suspended, as it was unlikely that the N.Z. contribution would be accepted. Mr. Holland explained that this decision had been taken after hearing a report from the Minister of External Affairs (Mr. Macdonald), who had had discussions with Dr. Hammarskjöld in New York. In an earlier statement, Mr. Holland had commented that it would be "a remarkable thing if the composition of the U.N Force should be dictated by President Nasser."

A statement by the Egyptian Embassy in Karachi to the effect that Pakistan's name had not been "suggested" by Dr. Hammarskjöld to President Nasser [for inclusion in the countries offering contingents to UNEF] was denied on Nov. 22 by a spokesman of the Pakistani Foreign Office. The spokesman said that Pakistani troops had been offered for the U.N. Force; that Pakistan's name had appeared on the list submitted by the Secretary-General to President Nasser; but that the Egyptian President had chosen from this list India, Indonesia, and Yugoslavia, and had asked for contingents from those countries but not from Pakistan.

Major-General Martola, a retired Finnish Army officer, was appointed by General Burns on Nov. 10 as his personal adviser on matters relating to the U.N. Emergency Force. General Martola was a divisional commander in the Russo-Finnish "winter war" of 1939-40, and later became deputy Foreign Minister in the Finnish Government.

Ten U.N. observers, drawn from the U.N. Truce Supervisory Organization in Palestine, arrived at Port Said from Haifa on Nov. 13 to observe the implementation of the cease-fire and to maintain liaison with the Allied and U.N. Commanders in Egypt.

British Parliamentary Debates. - Statements by Mr. Butler and Mr. Selwyn Lloyd. - Refutation of Allegations of Anglo-French Collusion with Israel.

Mr. R. A. Butler (speaking on behalf of Sir Anthony Eden, then on holiday in Jamaica) gave an "interim report" on the Middle East situation to the House of Commons on Nov. 22, 1956. Pointing out that a debate was taking place in the U.N. General Assembly, and that the Foreign Secretary (Mr. Selwyn Lloyd) had not returned, he gave an account of the replies which were being sent to certain questions put to the British Government by Dr. Hammarskjöld. Mr. Butler said:

"His [Dr. Hammarskjöld's] first question was: 'Has any withdrawal taken place, and if so to what extent?' The Government, as an earnest of their intention to withdraw from Egypt as soon as the conditions they have specified are completed, have welcomed the arrival of U.N. troops in Port Said and have stated that they are prepared to withdraw a British battalion.

"The Government are assisting and co-operating with the U.N. Command in the discharge of its task. In particular they have arranged for the main body of the Yugoslav contingent to disembark at Port Said and to be assisted in transit. They are undertaking to provide the necessary vehicles for a Norwegian medical company, and military transport for the Indian battalion . . .

"The Secretary-General's second question is: 'Can anything be said concerning the plans for the withdrawal?' On this point I would recall the statement made by the Prime Minister on Nov. 6, in which he said: 'If the Secretary-General can confirm that the Egyptian and Israeli Governments have accepted an unconditional cease-fire and that the International Force to be set up will be competent to secure and supervise the attainment of the objectives set out in the resolution passed by the General Assembly on Nov. 2, H.M. Government will agree to stop further military operations.'

"As a consequence of the steps taken to establish the U.N. Force in pursuance of the Assembly's resolution of Nov. 7, the Government ordered the cessation of military operations. We have made it clear that we are ready to hand over to a U.N. Force which will be competent to discharge effectively the tasks assigned to it by the Assembly. On a number of issues progress had been and will be made. But the unsatisfactory element in the Secretary-General's reports, which were published last night, related to the clearance of the Suez Canal—that is outside the area of our control.

"As the House is aware, the Egyptians deliberately and systematically sabotaged the Canal, sinking 47 ships and destroying two bridges. Colonel Nasser has suggested that this was because of the military action we took. This is obviously a fabrication. There can be no excuse for this act of wanton folly.

"I am glad to report that we have made excellent progress in clearing that part of the Canal which is under our control. Clearance vessels were attached to the Allied naval task force, and they began work as soon as we occupied Port Said. We are also moving up or preparing a large fleet of salvage reinforcements amounting to some 28 vessels. We expect that by the end of this week we shall have cleared a channel of 25 feet draught and 65 feet beam, which will allow the passage of ships of 10,000 tons. The way is now clear for salvage forces to go forward beyond the limit of Allied occupation.

"The Secretary-General's report does not seem to take full account of the Assembly's resolution of Nov. 2 urging that, on the cease-fire being effective, steps be taken to reopen the Suez Canal and to restore secure freedom of navigation; although he does, it is true, envisage assistance from sources not directly approached by the United Nations. For all concerned, the clearance of the Canal is vital and urgent. . . . The Foreign Secretary has been asked to urge most strongly that in view of world interest in expediting the clearance of the Canal, in view of our undertaking to begin the withdrawal of our troops, and in view of the fact that the stretch of the Canal under our control will very shortly be cleared, there should be no unnecessary delay in starting the work in the Egyptian-held area.

"Finally, the Secretary-General asked: 'What in your view is the state of affairs as to compliance with the cease-fire?' The cease-fire has been and is being strictly observed by the Anglo-French forces. Egyptian troops and civilians have on several occasions opened fire without provocation on Anglo-French units. The House will have heard with indignation that the Egyptian Government has seen fit to publish the most reckless charges against the conduct of British troops. It should give no credence to them. Last week, for example, the Egyptian Government formally complained to the U.N. Secretary-General that British armoured cars, in violation of the cease-fire agreement, had driven south of the demarcation line. It was established and confirmed by the U.N. observers that not only was the allegation untrue, but that no armoured cars whatsoever had been disembarked at Port Said.

"We are witnessing an attempt by the U.N. to organize an effective intervention in an area which has long threatened the peace of the world. This intervention has been made possible by Franco-British action. If this U.N. intervention succeeds, and we intend to sustain the efforts of the Foreign Secretary to make it succeed, a precedent will have been set which will give mankind hope for the future."

Mr. Gaitskell (Leader of the Opposition) pointed to the fact that several resolutions had been passed by the Assembly by overwhelming majorities calling on Britain to withdraw from Egypt unconditionally, and that they did not specify any condition about clearance of the Canal before France and Britain withdrew their forces. It was "perfectly clear" that the major obstacle to the clearance of the Canal was the presence of Anglo-French forces in Egypt, "in clear defiance of the U.N." "In those circumstances," he said, "may I ask whether Mr. Butler will swallow his pride and withdraw British troops?"

Mr. Butler said that he would have thought that the Government's replies to the Secretary-General's questions showed that they had done their utmost, and were intending to work with the United Nations. The Government understood that the clearance of the rest of the Canal must be done under U.N. auspices, though Britain had perhaps the best gear and kit, and excellent personnel available for this task. It was important, however, that the task should be carried out with "as little quibbling about it as possible."

Mr. Bevan (Lab.) expressed the view that the Government should not claim the right of deciding what was an effective U.N. force, because that cast doubt upon the authority of the U.N. **Mr. Butler** replied: "... The decision about our own forces must be taken in company with the French Government, to begin with. This decision must be taken by us as sovereign States in company with the U.N., because it is our desire to work with the United Nations. There is no question of flaunting the United Nations."

Earlier the same day Mr. Butler had answered questions by Mr. Swingler (Lab.) and Mr. Arthur Henderson (Lab.), who asked for information about the allegations of British and French collusion with Israel.

Mr. Swingler asked if Mr. Butler had studied "evidence in *The Times*, *Manchester Guardian*, *New York Times* and *Washington Post* alleging collusion in military operations between the British, French, and Israeli Governments, and, in particular, that the Foreign Office deceived the U.S. Government about the nature of the meeting of Oct. 16." In view of the fact that "these allegations were widely accepted by responsible people—at any rate, according to *The Times*, by high officials in the State Department in Washington," did he not think that there should be an impartial inquiry into the origin of the military operation?

Mr. Butler. "The answer to the latter part of the question is definitely 'No.' The Government do not believe an inquiry should take place into a matter that is primarily the responsibility of the Government. The Government do not propose to publish the confidential exchanges between heads of States. They would lose their value if published."

In reply to **Mr. James Griffiths** (Lab.), who asserted that "evidence of collusion" was being brought forward in other countries as well as in Britain, **Mr. Butler** referred to the categorical denial made by the Foreign Secretary on Oct. 31, viz.: "It is quite wrong that Israel was incited to this action by the Government. There was no prior agreement with us about it."

Asked by **Mr. Grimond** (Liberal) to give a "categorical and detailed denial of the very detailed charges now appearing," **Mr. Butler** said: "In this particular series of questions I am being asked about certain interchanges. I am not prepared to publish confidential exchanges between heads of Governments. I am determined to reaffirm the statement made by the Foreign Secretary."

Mr. Gaitskell said: "Since the statement made by the Foreign Secretary, much information has been published on this matter in the Press of the world. It is not only a question of whether the Government incited Israel to attack Egypt. What we want to know is whether the Government, either directly or through the medium of the French Government, were informed in advance of the intentions of the Israeli Government; whether they conveyed any information on this subject to the U.S.A.; why they did not, if they received that information, immediately do their best to restrain the Israeli Government; and whether there was any arrangement between the French and Israeli Governments which was communicated to the British Government for an intervention by Britain and France against Egypt?"

Mr. Butler pointed out that Mr. Arthur Henderson had put down a question on this matter [see below], and said that his answer would meet all the points raised by Mr. Gaitskell.

Mr. Henderson asked "what prior information had been received by H.M. Government of the intention of the Government of Israel to enter Egyptian territory on Oct. 29."

Mr. Butler replied: "The Prime Minister said on Oct. 30: 'Five days ago, information was received that the Israeli Government were taking certain measures of mobilization. H.M. Government at once instructed H.M. Ambassador at Tel-Aviv to make inquiries of the Israeli Minister for Foreign Affairs and to urge restraint.' That is the action we took, and that is the information we received.

Mr. Henderson then asked if the House was to assume that no information had been received from other sources about the intentions of the Israeli Government. **Mr. Butler** replied that when the Ambassador was assured on Oct. 29 that no hostile move was contemplated against Jordan, he was told that Israel was not seeking military adventures. The Israeli Foreign Minister explained the mobilization on the ground that Israel had to be prepared. When **Mr. Philip Noel-Baker** (Lab.), asked why the Ambassador had not asked for an assurance that no attack was intended on Egypt, **Mr. Butler** replied that the Ambassador had been instructed to urge restraint, "and that was precisely what he did."

A further statement was made to the House by Mr. Selwyn Lloyd on Nov. 29, after his return from the U.N. General Assembly in New York.

The Foreign Secretary pointed out that his statement could only be of an interim character because important questions had to be decided, and M. Pineau was coming to London the following day for discussions. He continued: "I found the general atmosphere in the U.N. considerably improved, and a wider understanding of our position in certain sections of American opinion. The debate on the Afro-Asian resolution [Nov. 23-24] indicated a change in the atmosphere in the United Nations. I pointed out that we could not accept that resolution, because it implied a measure of censure which we could not accept and because it demanded that we should withdraw forthwith. Also the resolution was unrealistic as it made no reference to an International Force. I indicated our desire to co-operate with the U.N. in these matters and I hoped for a resolution which we could accept. After I expressed these views, M. Spaak put forward an amendment to the Afro-Asian resolution calling on us to expedite the application of the resolutions of Nov. 2 and 7 . . . in the spirit in which they were adopted, particularly in regard to the functions vested in the U.N. Force I stated that if that amendment was accepted, the U.K would vote for the resolution. That also was the position of France. On the Belgian amendment the vote was 23 in favour, 37 against, and 18 abstentions, including the U.S.A. In other words, the majority of the Assembly either voted with us or abstained. That constitutes a considerable shift of opinion. The original resolution was then put to a vote and carried by a very large majority. I should point out that the vote on this resolution was affected, in my view, by the fact that Mr. Cabot Lodge . . . had stated that he interpreted the word 'forthwith' to mean 'a phased operation.'"

Reiterating the Government's opposition to an immediate withdrawal, the Foreign Secretary went on: "We have repeatedly indicated our willingness to withdraw our forces from Egypt when an International Force was effectively constituted and competent to carry out its functions. The House will recall the suggestion originally made by the Prime Minister on Nov. 1 about the U.N. undertaking the task of keeping the peace in the area. From that date the conception of an International Force rapidly gained support. The U.N. Force has now been constituted and is growing in numbers . . . There are already some 1,400 men in Egypt. By Dec. 1 there will be about

2,700. Within about 14 days the Force should number 4,100, apart from some air personnel, approximately 300, stationed at Naples. The 4,100 will be in Egypt. Among them will be some 700 Canadians. Within a fortnight there should be an organized military force with a headquarters and staff under the command of General Burns . . . The provisional target of the Secretary-General is to increase that force to two combat brigades . . . I mention these facts because obviously the build-up of this force must have an important relationship to a phased withdrawal of our own and the French troops.

"There are however other important matters to be considered, such as the speedy clearance of the Canal and the negotiation of a final settlement about the future operation of the Canal. Decisions on these matters must be discussed with our French allies, and I also await certain clarifications about the implementation of the resolution passed [on Nov. 24] by the General Assembly. This resolution authorized the Secretary-General to proceed with arrangements for clearance as a U.N. operation."

Mr. Selwyn Lloyd concluded by saying that he had received a report from the Swiss Foreign Ministry about the treatment of British subjects in Egypt, and had made known to the Secretary-General the "very serious view" which the Government took of it. He was awaiting further reports from the Swiss Minister in Cairo.

Mr. Bevan, after associating the Opposition with the Foreign Secretary's protest against the treatment of British and French subjects in Egypt, asked whether the Government's "insistence on having a clear declaration from Egypt about the future of the Canal" was not one of the chief causes of the differences between Britain and the U.S.A. He also asked whether the Government's decision to associate the build-up of the U.N. Force in Egypt and the phased withdrawal of British troops with "exacting from Egypt some declaration about the future of the Canal" was not the "chief stumbling-block between ourselves, the U.N., and the U.S.A."

Mr. Lloyd replied: "We have never said that we sought to impose a settlement of the future of the Canal by force . . . I do not think that it is unreasonable that we should receive some indication of the future course of negotiations. The clearance of the Canal is a practical matter, and all we want to see is the U.N. getting on with the job as quickly as possible and with all the resources available."

After the discussions with M. Pineau (mentioned in Mr. Lloyd's statement) had taken place on Dec. 1, the Foreign Secretary informed the House on Dec. 3 that the British and French Governments had decided that the withdrawal of their forces in the Port Said area could now be carried out without delay; that they had instructed the Allied C.-in-C. (General Sir Charles Keightley) to seek agreement with the U.N. Commander (General Burns) on a timetable for the withdrawal; and that the withdrawal was expected to be completed by Dec. 15. A similar announcement was made by M. Mollet to the French National Assembly on the same day.

After saying that since his last statement the Government had received "further clarifications of the position from New York," and had also been in touch with the Commonwealth Governments, **Mr. Selwyn Lloyd** continued:

"H.M. Government and the French Government have now taken certain decisions. We are in complete agreement about them. These decisions follow on the two resolutions passed by the U.N. General Assembly on Nov. 24. The first called for the withdrawal of the Anglo-French forces forthwith. But, as I told the House, Mr. Cabot Lodge interpreted 'forthwith' to mean 'a phased withdrawal.' That was exactly the expression we had used ourselves.

"The second resolution was equally important. It called for the early clearance of the Canal and the restoration of its use to international shipping, and entrusted the Secretary-General with the task of making the necessary arrangements.

"Before commenting on these two resolutions I think it right to remind the House of the broad framework within which the events of the last few months must be considered . . . For the last 10 years we have been living with a world-wide struggle going on between Communism and the free world. The introduction of nuclear weapons has made global war unattractive to an aggressor. The Soviet has therefore used the methods of political subversion from within and military pressure from without. The existence of NATO has halted the direct advance of Russia across Europe to the sea. But all the time there has been an open flank in the Middle East which Russia has been making a determined effort to turn.

"Certain factors have developed there to her advantage. There have been hostilities smouldering between Israel and the Arab States. The U.N. has so far not been able to solve that problem at all. The situation has been deteriorating rather than improving. At the same time, Colonel Nasser has come to power with his plans for the aggrandizement of Egypt and the subjection to his domination of the material resources of the Arab countries. The seizure of the Suez Canal was part of that design.

"The Arab-Israel tension has afforded opportunity for Soviet mischief-making. The large supply of Soviet arms to Colonel Nasser put him very much under Soviet influence. The Baghdad Pact gave a measure of security against direct Soviet penetration from the north, but the arming of Syria and Egypt was no doubt intended to turn its flank also. Let there be no misunderstanding. The situation was deteriorating. It was one which sooner or later was likely to lead to war. The only doubtful question was the scope or extent of that war. A general conflagration in the Middle East would have been disastrous for many countries, not least for our own. It was against this background that on Oct. 29 major hostilities began between Israel and Egypt.

"The French and British Governments decided immediately to intervene. We are quite sure that by our action we not only rapidly halted local hostilities, but forestalled the development of a general war throughout the whole Middle East and perhaps far beyond . . . As soon as the two parties agreed to a cease-fire, we also gave orders to cease our military action.

"Our second purpose was to interpose a force to prevent the resumption of fighting. That is why we made the request to station detachments in Port Said, Ismailia, and Suez for a temporary period. The Prime Minister made it clear at the time that this would only be for a temporary period. Then on Nov. 1 he stated that we should be glad if the U.N. would take over the physical task of preserving peace. The conception of an International Force came into being and gained rapid support.

"We believe that the character and composition of the Force will shortly make it capable of carrying out these obligations. We have to remember that the strength of the U.N. Force depends not only on its actual size but on the sanction that lies behind it. It is worth recalling that the position in Berlin has been held for 10 years by a small force because behind it lay the whole organized strength of the Atlantic Alliance . . . So far as the composition of the United Nations Emergency Force is concerned, the Secretary-General has made it clear that he decides it. Its functions, are in accordance with the Assembly resolutions of Nov. 2, 5 and 7. The Secretary-General has also made it clear that it is for him and the Assembly to decide when its tasks have been discharged.

"Another vitally important result of our actions has been that the Russian designs have been exposed and dislocated. It is to be hoped that the free world will use the breathing-space that we have provided to frustrate them altogether. But there are serious dangers ahead in the Middle East. Although Russia has suffered a reverse, she is seeking to tighten her grip on Syria to restore her position. I believe that the whole free world will welcome the statement by President Eisenhower warning the Soviet Union of the dangers of intervention in the area of the Baghdad Pact Powers [see 15230 A]. We must also be watchful to see that Russia does not violate the Assembly resolution of Nov. 2 enjoining a ban on the delivery of military goods to the area of hostilities.

"Two important objectives have therefore been achieved. The war has been stopped, and an International Force has been put into position to prevent its resumption.

"There are other important matters to which I must refer. The first and most urgent need for us and the whole world is that the Canal should be re-opened and freedom of navigation restored. Under the resolution to which I have referred, these duties have been clearly placed upon and accepted by the United Nations. The Secretary-General has entrusted executive responsibility to a team which includes men of the very highest calibre and world-wide reputation, such as Mr McCloy and General Wheeler. This shows that technical considerations have been uppermost in his mind. We have made it clear, for our part, that all the resources which we have been able to assemble will be made available to this team, to be used as and how they may decide.

"I am satisfied from the discussions with the Secretary-General that he will press on with his task with the utmost speed, and that every effort will be made to proceed without delay with the clearance of obstructions below Port Said . . . I am satisfied, from the assurances which I have received from him . . . that work will begin as soon as technically possible and that its progress will not be dependent on other considerations.

"The French and British Governments have come to the conclusion that the withdrawal of their forces in the Port Said area can now be carried out without delay. They have instructed General Keightley to seek agreement with General Burns on a time-table for complete withdrawal, taking account of the military and practical problems involved. This time-table will be reported as quickly as possible to the U.N. Secretary-General. Given good faith on all sides, it can be carried out in a short time . . .

"Another matter of great importance is the long-term future of the Canal. The Secretary-General will promote as rapidly as possible negotiations on the basis of the following matters: (1) The six requirements set out in the Security's Council resolution of Oct. 13; (2) the conversations between the Secretary-General and the Foreign Ministers of France, Egypt, and myself in New York; (3) the Secretary-General's letter to the Egyptian Foreign Minister of Oct. 24, setting out a basis for the negotiation of a system to conform to the six principles, and the Egyptian acceptance thereof of Nov. 2.

"I believe we shall reach an agreement providing adequate guarantees that the six requirements will be met. H.M. Government of course adhere to their view, as expressed in the resolution voted on by the Security Council on Oct. 13, with regard to the 18-Power proposals.

"Lastly, there is the question of a long-term settlement of all the problems in the area. I believe that our action has done a great deal to produce conditions in which progress can now be made. Israel should withdraw from Egyptian territory. We have said this repeatedly. It is our view that Israel should withdraw from the Gaza strip also, and that the strip should be made a U.N. responsibility. I am sure that would be the best solution of a difficult problem. A just settlement of the refugees is an essential condition of a final settlement, together with agreement about frontiers, water schemes, and other matters.

" All this, I know, has been said before, but at the present time we have the knowledge that there is being stationed in the area a substantial U.N. Force charged with the duty of keeping the peace. That, I am certain, will contribute to the final settlement, which is the pre-requisite of stability in the area.

" Therefore I claim that we have stopped a local war. We have prevented it spreading. The extent of Soviet penetration has been revealed. We have caused the United Nations to take action by the creation of an International Force. We have alerted the whole world to a situation of great peril. We have created conditions under which there can be hope of wider settlements. Of course there will be heavy costs to bear, but they would have been far greater if our action had not been taken. It is now for the United Nations to see that this opportunity is turned to good account."

Mr. Bevan, on behalf of the Opposition, spoke as follows : " We, the entire country, and the world will be glad to hear that the French and British Governments have at last decided to pull their troops out of Egypt. It has been done with great reluctance and under great pressure, but at least the decision has been taken. We are also glad to hear that the Government are no longer attempting to dictate conditions to the United Nations, and that they have retreated from their former position of attempting to make the future of the Canal dependent on their decision to withdraw. We sympathize with the Foreign Secretary in having to sound the bugles of advance to cover his retreat.

" The Opposition are also glad to hear that the British and French Governments are prepared to take up the discussions about the future of the Canal at the point they had reached before the action was taken.

" We have paid special regard to the Foreign Secretary's explanation that they have uncovered a Soviet threat in the area. We would have thought, if they had had this information, they might have shared it with the U.S. and Commonwealth Governments. I am bound to say that in view of the obvious embarrassment of the Government, I feel I would be a bully if I proceeded any further."

Mr. Selwyn Lloyd said there were " one or two inaccuracies " in Mr. Bevan's remarks. " It is untrue that we ever said we intended to impose a settlement of the Canal by force. Mr. Bevan should verify his quotations and examine the records. Both the Prime Minister and I said specifically that we had no intention of seeking to impose by force a settlement of the Canal. The second inaccuracy related to the taking-up of discussions about the future of the Canal where they had been left off. The letter of Oct. 24 had not been replied to by the Egyptian Government, but since the action was taken it has accepted that letter. So far as Soviet penetration is concerned, a good deal more information has been discovered after this operation than existed before it."

Replying to comments made by Captain Waterhouse (C.), Mr. Grimond (Liberal), and Mr. Bevan, Mr. Lloyd declared : " I believe the action we took has achieved the results I set out, and I will only add that the arguments of certain right hon. gentlemen opposite are very present on the lips of the enemies of this country."

Mr. Gaitskell protested against this remark, asking what the Foreign Secretary meant by " the enemies of this country." **Mr. Lloyd** replied : " I certainly did not include the United States or Canada. But the fact is that the most fertile quarry for quotations against the Government used by the enemies of this country are the speeches of members of the Opposition."

Mr. Gaitskell again asked what the Foreign Secretary meant by the phrase used by him, and also asked what was the exact position of Britain's relations with Egypt, and whether Britain was still in armed conflict with her. **Mr. Lloyd** replied : " Relations are certainly not normal with Egypt. We have no diplomatic relations. I should have thought that Mr. Gaitskell would have been expected to make up his mind who the enemies of this country were."

Mr. Julian Amery (C.), one of the leaders of the Conservative " Suez group," declared that " whatever differences there may be on Middle Eastern policy on this side of the House, all condemn wholeheartedly the part played by the United States, by the Opposition, and by a small handful of Members on this side of the House in bringing us to the humiliating withdrawal which the Foreign Secretary has just announced."

Mr. Lloyd replied : " I do not accept for a moment that this withdrawal is humiliating. If Mr. Amery will study the statement I have made, he will come to the same conclusion.

Mr. Gresham Cooke (C.) asked whether the Foreign Secretary would give an assurance that British troops would not be finally withdrawn until the 680 British subjects interned and the 30 more imprisoned by the Egyptians had been released, or until an absolute guarantee about their release had been satisfactorily given. **Mr. Lloyd** replied that he could not give that guarantee at the moment, but stressed that he had made " very strong representations " to Dr. Hammarskjöld, which had been passed on to Cairo.

Mr. Denis Healey (Lab.) said that the Foreign Secretary's " ridiculous and degrading apologia will do nothing to disguise the fact that this country has suffered its most serious diplomatic reverse since Munich."

Mr. Lloyd replied : " One would almost gather that Members opposite would have liked the war between Israel and Egypt to have continued ; that they would have liked it to spread to other countries in the Middle East. We do not take that view."

Replying to questions by Labour members, both Mr. Lloyd and Mr. Butler confirmed that Sir Anthony Eden was " in full agreement with the policy just announced" and had given it " his firm support."

Anglo-French Withdrawal from Egypt. - Evacuation of Port Said. - U.N. Force takes over from Allies.

In conformity with the Anglo-French declaration of Dec. 3 (see above), the British and French forces began a progressive withdrawal from the Port Said and Port Fuad areas, the evacuation of all Allied forces in Egypt being completed by Dec. 22, 1956. The withdrawal was " phased " with the progressive take-over by troops of the U.N. Emergency Force, which moved into areas as they were evacuated by the British and French forces.

A first U.N contingent—a company of Norwegian troops—had arrived in Port Said on Nov. 21 to take over from a battalion of the Royal West Kent Regt., which was withdrawn to Cyprus on the following day. Two French units—a marine commando and a battalion of colonial infantry—were also withdrawn from the Port Said area on Nov. 25.

General Burns announced on Nov. 27 that U.N. troops would be moved into the no-man's-land between the Anglo-French and Egyptian lines at El Cap (just south of Port Said) as a " buffer " between the opposing forces. A Danish infantry company was accordingly moved into the El Cap area on Nov. 30, taking over front-line trenches vacated by units of the York and Lancaster Regt. and the French Foreign Legion. While holding these positions several bursts of machine-gun fire were directed against the Danes from the Egyptian lines, but all the bullets flew high and there were no casualties. On Dec. 2 the Danes were moved into Port Said to reinforce the Norwegian troops already there, the " buffer " zone at El Cap being taken over by the Indian parachute battalion.

On Dec. 3, immediately after the U.K. and French Governments had announced the speedy withdrawal of their forces from Egypt, General Burns got into touch with General Sir Charles Keightley (the Allied C.-in-C.) to work out the necessary arrangements for synchronizing the Allied evacuation with the take-over by U.N. Forces. General Keightley had previously visited Port Said on Nov. 25 for discussions with General Burns, the conference being attended by Admiral Barjot (Deputy Allied C.-in-C.), Generals Stockwell and Beaufré (the respective Commanders of the British and French troops in Egypt), and Sir Walter Monckton (then Paymaster-General in the U.K. Government), who had flown to Port Said from London.

Over 11,000 British troops—more than half the total number in Egypt—sailed from Port Said between Dec. 5-8 in the troopship *Ascania* and *Dilwara* and the aircraft carrier H.M.S. *Theseus*, bound for Britain, Malta or Cyprus. As the evacuation continued during the next fortnight, the area controlled by the Anglo-French forces was restricted to an ever-shrinking perimeter round the dockside area, until by Dec. 16 the UNEF had taken over control of the whole of Port Said except for the wired-off British withdrawal beach-head round the harbour. The U.N. Force in Port Said had grown by the latter date to a joint Danish-Norwegian battalion, a Colombian battalion, and Swedish and Indian units. The Anglo-French evacuation reached its final stage on Dec. 21, when 2,000 men—mostly headquarters staff and administrative units—sailed from Port Said in the British and French troopships *New Australia* and *Pasteur*. The last British and French troops left Port Said and Port Fuad on Dec. 22—47 days after the first Allied paratroop landings in Egypt.

Units of the Egyptian Army entered Port Said after the completion of the Anglo-French withdrawal, amidst vociferous enthusiasm from the population, while the U.N. Forces were moved to the Sinai peninsula to take over from the Israeli forces falling back towards the armistice lines. [Yugoslav armoured car detachments were already in Sinai, as stated above, and had made contact with the Israeli Army.] A UNEF communiqué of Jan. 8, 1957, stated that three U.N. columns were advancing eastward into Sinai—one in the north, which had advanced from El Kantara to within a few miles of El Arish ; a column in the centre, which had covered 75 miles eastward from the Suez Canal along the Suez-Elath road ; and a third column in the south, which had reached a point about 135 miles south-east of Suez.

A number of serious infringements of the cease-fire by the Egyptians occurred before and during the Allied withdrawal, as well as attacks on British and French soldiers in Port Said in which several lives were lost. The various incidents are summarized below :

Nov. 8.—The cease-fire was temporarily broken when an Egyptian patrol by-passed British forward troops near El Kantara and opened fire on men of a tank unit, one of whom was wounded ; the British troops returned fire in self-defence, two of the Egyptians being killed and a third wounded and taken prisoner. In reporting this incident, Allied H.Q. pointed out that the patrol had made its way back to the Egyptian lines without molestation from the British forward positions, who could easily have wiped the patrol out but had refrained from doing so.

Nov. 10.—British positions at El Cap were subjected to Egyptian machine-gun fire for two hours. No retaliation was made until a British soldier was wounded, when fire was returned.

Two press photographers with the Allied forces, one American (Mr. David Seymour) and one French (M. Jean Roy), were killed on the same day when the jeep in which they were driving through the British lines came under Egyptian machine-gun fire. The jeep swerved and crashed into the Sweet Water Canal.

Nov. 16.—The "jamming" of Cairo Radio was ordered by General Stockwell with the aim of controlling "wild statements which unsettle the population of Port Said." [Incessant anti-British and anti-French propaganda, directed particularly at the population of Port Said, had been broadcast from Cairo since the cease-fire came into operation.]

Nov. 18.—A proclamation was issued by Allied H.Q. announcing that penalties would be imposed on anyone who intimated Egyptian civilians. It was explained that many shopkeepers had been intimidated by Egyptian extremists into closing their premises or keeping them open for brief periods only, involving a threat of hardship to the city's inhabitants.

Nov. 19.—General Stockwell informed Allied H.Q. in Cyprus that 35 Egyptian soldiers had attacked a French forward company at El Cap with machine-gun and automatic fire the previous evening, no retaliation being made and no casualties resulting. He said that the attack constituted an "obvious attempt" by the Egyptians to draw Allied fire, and asked that the incident should be brought to the attention of the U.N. Secretary-General.

Dec. 6.—A patrol of the Argyll and Sutherland Highlanders seized a large quantity of arms and explosives at the fishing village of El Qabuti, on the shores of Lake Manzala near Port Said. Searches of two fishing-boats being unloaded resulted in the finding of a sub-machine gun, 800 detonators, 200 sticks of gelignite, 110 hand-grenades, 21 bazooka rockets, 10,000 small-arms cartridges, 11,000 rounds of other ammunition, and 20 knives, all of which were concealed in fish baskets. Six men were arrested. The explosives and ammunition were apparently intended for guerrilla operations against the Allied forces in Port Said.

Dec. 10.—A mobile patrol of the Royal Scots was ambushed in the "Arab town" of Port Said, one British soldier being wounded by a hand-grenade.

Dec. 13.—Major James Williams, a British civil affairs officer, was wounded when an Egyptian threw a bomb under his vehicle as it was passing through the Place de Lesseps, on the edge of the "Arab town."

Elsewhere in Port Said, a Norwegian patrol was attacked with grenades and small-arms fire while travelling in a vehicle clearly marked with the U.N. insignia, the Norwegians suffered no casualties and returned the fire.

Dec. 14.—Three grenade attacks were made on British Army vehicles in the main streets of Port Said, no casualties being caused. A Swedish patrol was also attacked without any casualties being caused.

Dec. 15.—General Stockwell sent a letter to General Burns asking him to make a strong protest to the Egyptian authorities against the attacks on British and U.N. troops, pointing out that he (General Stockwell) would be forced to take "really violent action" if these attacks continued. The letter said that the many violations of the cease-fire and the attacks on Allied troops "prove conclusively that a co-ordinated and sustained campaign of violence is being directed against the forces under my command." General Burns announced that he would make the strongest possible protest to Cairo against these incidents.

Dec. 16.—A patrol of the Royal Scots combing an area of the "Arab town" in search of Lieutenant Moorhouse, who had been abducted on Dec. 11 (see below), was fired on by Egyptian *fedayeen*, the commanding officer—Major David Pinkerton—being killed. A three-hour action ensued between a large group of strongly-armed *fedayeen* and patrols of the Royal Scots and the Argyll and Sutherland Highlanders, who surrounded a house in which the terrorists were holding out. Strong resistance was encountered, the terrorists being finally overwhelmed after fighting from room to room. A British Army statement said that many of the terrorists had been killed and wounded before resistance ceased; Cairo radio said that 30 Egyptians were killed in the fighting, while the U.N. authorities in Port Said reported that the bodies of 27 Egyptians had been counted.

Dec. 17.—A soldier of the French Foreign Legion was shot dead by an Egyptian sniper, the area being subsequently searched by Colombian troops.

The departure of the Anglo-French forces from Port Said took place amidst frenzied nationalist demonstrations, the main streets being decorated with portraits of Colonel Nasser, Egyptian flags, and streamers bearing nationalist slogans in Arabic. During the demonstrations the mob pulled down the statue of Ferdinand de Lesseps, the French engineer who built the Suez Canal.

The Abduction and Death of Lieutenant Moorhouse.

A young British officer, Second Lieutenant Anthony Moorhouse of the West Yorkshire Regiment, was kidnapped in the Arab town of Port Said on Dec. 11 when returning alone in his Land Rover from an inspection.

Lieut. Moorhouse had commanded a platoon of the regiment which on the previous day had raided a flat in that part of the city and had arrested eight men, including seven suspected to be Egyptian Army officers hiding there. An Arab boy told British security officers that Lieut. Moorhouse had stopped his vehicle and alighted to question an Egyptian cyclist, when another Egyptian had approached him from behind, seized his pistol, and, together with two other men, forced him to enter a waiting car with no number-plate. The car drove off immediately and was later found abandoned.

General Stockwell immediately informed Major-General Burns of the incident, but in spite of widespread investigations by British troops, including a house-to-house search in the Arab town on Dec. 15, no trace of Lieut. Moorhouse could be found. On Dec. 22, however, a few hours before the final British withdrawal, General Stockwell announced that a U.N. intelligence officer, Captain Wilk (a Norwegian), had reported to him that he had seen Lieut. Moorhouse the day before and that the Egyptians had agreed to hand him over.

Meanwhile Colonel Banks, M.P. for Pudsey and a personal friend of President Nasser (see 15198 A), had flown to Cairo, at the request of Lieut. Moorhouse's parents, to see the President and try to find their son. After visiting President Nasser on Dec. 24, Colonel Banks stated on Dec. 26, when he stopped at Beirut on his return flight, that, according to what he had heard from the President Lieut. Moorhouse was "dead and buried" and that President Nasser had ordered an Army inquiry into the kidnapping and killing of the officer.

The War Office announced on Dec. 29 that two of its staff officers had visited Colonel Banks the previous day "to obtain all the information which Colonel Banks had obtained from President Nasser," and that, according to this information, Lieut. Moorhouse had died from suffocation while hidden by his captors in a steel box during the British search for him in Port Said. The statement said:

"Colonel Banks described the arrangements he had made, through personal friends in Beirut, for contacting Colonel Nasser. A meeting was arranged for the evening of Dec. 24, when he spent about two hours with Colonel Nasser, in the course of which the latter said that he had sent a personal staff officer to Port Said to investigate and report on the circumstances of Lieutenant Moorhouse's capture and subsequent fate.

"The staff officer returned on December 24 with a report that Moorhouse had died at the hands of his captors on or about Dec. 15, the date on which the search for him had been carried out by the British forces. During the search Moorhouse had been bound by his captors and concealed in a large steel box in a house in which he had been held prisoner. On returning to the house later, the gang found that Moorhouse had died from suffocation. His body had been buried in the house in which he met his death.

"Colonel Nasser did not disclose the source from which this report emanated, nor was there any proof that his staff officer had seen the body or the place where the murder was alleged to have been committed."

An account agreeing essentially with the official Egyptian version was published in the Cairo newspaper *Al Ahram*, whilst on Jan. 1, 1957, a Foreign Office spokesman in London said that the Egyptian authorities had given the following account of Lieut. Moorhouse's death to Dr. Hammarskjöld:

"After his capture in Port Said Lieut. Moorhouse was tied to a bed, his captors intending to exchange him for some Egyptian 'resistance' prisoners. When British troops began combing the area he was locked in a small metal cupboard. His captors returned once to feed him but, as the search intensified, they felt it unsafe to return and he was left for two days. He is believed to have died of suffocation. He was buried in the house where he was held."

The spokesman added that Dr. Hammarskjöld had asked General Burns to make the earliest possible arrangements with the Egyptian authorities to ensure that the body of Lieut. Moorhouse was handed over to the U.N. authorities.

The body of Lieut. Moorhouse, which had been found on Dec. 30, was handed over by the Egyptian authorities to the U.N. Command in Port Said on Dec. 31. It was flown on Jan. 4 to Naples, where a party of British pathologists, doctors, and Scotland Yard officers identified it, and on Jan. 6 was flown to Britain in an R.A.F. aircraft for burial at Leeds.

Sir Edwin Herbert's Report on Civilian Casualties in Port Said.

The U.K. Minister of Defence (then Mr. Head) informed the House of Commons on Dec. 20 that, in view of the conflicting estimates of the extent of the casualties in Port Said during the Anglo-French operations, an independent inquiry had been carried out by Sir Edwin Herbert, the president of the Law Society, who had visited the Middle East from Dec. 8-15 and had made careful and detailed investigations at Port Said. [Sir Edwin Herbert has headed a number of departmental committees, including the committee which reported on the electricity supply industry—see 15811 A, 14860 A.]

The original estimate of civilian casualties at Port Said, given to the House by Mr. Butler on Nov. 13, was approximately 100 killed and 540 wounded. Mr. Head, in a statement on Nov. 21, said that there seemed no reason to modify this estimate, and criticized the "gross exaggerations" and "lurid propaganda" spread by Cairo as to the extent of civilian casualties in Port Said. [The Egyptian authorities had given a figure of 12,000 civilian casualties in Port Said, of which a large proportion, it was alleged, had been caused by "machine-gun fire from helicopters"—an allegation described by Mr. Head as "pure invention."]

In a further statement to the House on Dec. 5 by Sir Walter Monckton, following his 24-hour visit to Port Said on Nov. 24 (see above), Sir Walter had endorsed the estimate of 540 wounded but had suggested that the number of dead might have been 300, and not about 100 as originally estimated. Many Labour members, however—notably Dr. Edith Summerskill (who subsequently visited Port Said in January and also saw Colonel Nasser in Cairo) and Mr. Wigg—suggested that the figures were higher than those mentioned by Government spokesmen. In view of these conflicting estimates, Sir Edwin Herbert was sent to Port Said to carry out an official investigation.

Sir Edwin Herbert's report, published on Dec. 21 as a White Paper (Cmd. 47), put the estimated number of casualties in Port Said, after the most careful inquiries, at approximately 650 killed, 900 injured and detained in hospital, and 1,200 slightly wounded—a total of 2,750. The figure excluded about 100 casualties at Port Fuad, which was occupied by the French forces.

Sir Edwin pointed out that he had inspected all the areas in which fighting took place, visited hospitals and cemeteries, and interviewed Egyptian officials (including the Police Commandant, the Director of the Municipality, and the Chief Sanitary Inspector), as well as senior Allied officers and independent witnesses. As regards the military operations in Port Said, Sir Edwin laid stress on the following points:

(1) Not one bomb was dropped on Port Said or its environs, all air strikes being low-level attacks—by rocket, machine-gun, and cannon—which were "of great accuracy and very localized."

(2) The naval bombardment had been confined to the beaches and had been "reduced in intensity to one-tenth of the level which would normally be used to support a landing."

(3) Every possible warning had been given by radio to the civil population, in which connexion Sir Edwin commented: "To one like myself, with a long experience of security in wartime, it came as a shock to find that the two overriding considerations in the minds of all concerned were, first, to inform the enemy of our plans, and secondly, to do him as little damage as possible in the execution of those plans."

(4) The steps taken to protect the interests of civilians "in my opinion jeopardized British lives and increased British casualties."

As regards the earlier estimates of civilian casualties, Sir Edwin stated: "Most of the officers concerned would, I think, now admit that the original estimate of 100 killed was too low. If my figures are higher than those put forward by the military authorities, I am sure that this is not due to any attempt by them to mislead or to any carelessness on their part. It is mainly due to the fact that I was able to give my undivided attention to the matter, whereas the work they did was done in time snatched from other most urgent duties." Sir Edwin said that it was impossible to obtain a reliable figure of the proportion of Egyptian casualties as between military and paramilitary and civilians, but he thought it improbable that civilian casualties exceeded 25 per cent of the whole.

As regards the damage in Port Said, the report stated: "The only damage to Arab town [the densely populated district in the centre of Port Said] is the destruction by fire of part of the shanty section at the westerly end, and superficial damage by small-arms fire for 100 yards down the streets debouching on Mohammed Ali Street. The casualties in Arab town, including the damaged section, must, in my opinion, have been negligible. The military are much to be congratulated on their policy of sealing off Arab town instead of attacking it, although it became a haven of refuge for the great bulk of the defenders of Port Said and has been a source of danger and difficulty ever since. Had Arab town been taken, or even accidentally damaged by rocket or shell, the number of casualties must have been much greater." Apart from superficial damage, Sir Edwin was satisfied that the only substantial damage in Port Said was in eight areas, marked on photographs accompanying the report, together with "the destruction, under circumstances which I cannot determine, of one oil tank."

The report gave summaries of evidence given to Sir Edwin by Allied senior officers, Egyptian officials, and six independent witnesses—M. Thudikum, of the Swiss Red Cross; Signor Mareri, the Italian Consul; M. Scarpalasos, the Greek Consul; Mr. Coe, the British Consul; Commander Gilette, U.S. Naval Attaché in Cairo; and Colonel Easter, a British shipping agent, who was the last British civilian left in Port Said and who was present throughout the operations. On the basis of all this evidence, and of figures by the Port Said hospitals, he had come to the conclusion that the casualty figures given in his report were substantially correct. The figure of about 650 killed was obtained after a close and thorough inspection of the cemetery, and discussions with Egyptian municipal and public health officials; the Port Said hospitals had reported that 896 civilians were wounded and detained in hospital; and the figure of 1,200 slightly wounded was the estimate of the Egyptian authorities themselves.

Sir Edwin stated in his report: "Mathematical certainty supported by unambiguous evidence is not possible, but I am satisfied that as to the course of operations and the resulting physical damage, my account is strictly accurate. With regard to casualties, I cannot be wide of the mark. Indeed, where in doubt I have thought it wise to err on the side of using a higher rather than a lower figure."

Allied Casualties in Port Said Operations.

Final figures of British and French casualties sustained in the Port Said landings were given on Nov. 14, 1956, by Allied H.Q. in Nicosia—viz., 32 killed, 129 wounded, and one missing, divided among the respective Allied services as follows:

Royal Navy—one officer killed; missing and wounded, nil.

Royal Marines—two officers and seven other ranks killed; five officers and 55 other ranks wounded.

British Army—one officer and seven other ranks killed; four officers and 32 other ranks wounded.

Royal Air Force—three officers and one other rank killed; wounded and missing, nil.

French Navy—one officer missing; killed and wounded, nil.

French Army—killed, 10 all ranks; wounded, 33 all ranks.

French Air Force—None killed, wounded or missing.

Aircraft losses were as follows: Royal Navy—six planes lost, four by enemy action and two in accidents; R.A.F.—two planes lost, one by enemy action and one by accident; French Navy and Air Force—two planes lost, one missing and one by accident.

Captures of Egyptian Military Equipment.

A list of Egyptian equipment—from Russian, Czechoslovak, and British sources—captured by the British and French forces during the Port Said operations was given by Mr. Head on Nov. 21, and included the following:

Czechoslovak—three SU-100 (self-propelled) guns, five rocket launchers with 390 rockets, two light machine-guns, 20 rifles, 40 anti-tank magnetic mines, and three Praga 10-ton vehicles.

Russian—500 anti-personnel mines, 50 light machine-guns, over 500 rifles, 10 machine-gun carbines, and large quantities of ammunition.

British—four 6-pdr. guns; two 3.7 mm. guns; 420 Lee-Enfield rifles; 40 Bedford and Fordson three-ton vehicles; smaller vehicles and gun-carriers; and quantities of ammunition.

The Soviet and Czechoslovak equipment captured included a Soviet light machine-gun of very recent design; a Soviet self-loading carbine; a Czech light machine-gun of new type; a Czech recoilless 83 mm. anti-tank gun; and 32-barrelled rocket-launchers. Some of the captured arms and equipment was taken to Britain for testing and evaluation.

Note. Other developments in the Middle East crisis will be described in subsequent articles. (Ed. K.C.A.)

A. BENELUX. — First Joint Trade Agreement.

The first joint trade agreement between Benelux (Belgium, Netherlands, and Luxemburg) and another country was signed in Copenhagen on Dec. 28, when a 12-month trade agreement was concluded between Denmark and the Benelux area.

Under the agreement Denmark will export to the Benelux countries mainly agricultural produce to a value of 300,000,000 kroner, whilst Benelux exports to Denmark will consist mainly of machinery, textiles, metals, and fuel worth 930,000,000 kroner.

The negotiations leading to the agreement were particularly difficult because both Denmark and the Netherlands have considerable export interests in farm produce.

(Netherlands News Agency) **(Prev. rep. Benelux, 14933 D.)**

B. UNITED KINGDOM. — Trade Figures for November, December, and Year 1956.

Imports into the United Kingdom in November totalled £319,600,000, exports £291,900,000, and re-exports £14,800,000, the adverse visible balance thus amounting to £12,900,000. The corresponding figures for December were: imports £307,800,000, exports £253,700,000, and re-exports £11,200,000, the adverse visible balance amounting to £42,900,000.

Provisional figures for the year 1956 showed that imports totalled £3,890,000,000, exports £3,172,600,000, and re-exports £146,200,000. The adverse visible balance for the year was thus £571,500,000, compared with a revised figure of £859,400,000 for 1955.—(Board of Trade Journal) **(15260 F.)**

C. LIBYA. — Expulsion of Egyptian Military Attaché.

It was officially announced in Tripoli on Nov. 7, 1956, that the Libyan Government had demanded the immediate recall of the Egyptian military attaché, Colonel Ismail Sadek, who had been ordered to leave the country. It was stated that Colonel Sadek had ignored a number of previous warnings to refrain from "activities prejudicial to Libya."—(Le Monde, Paris) **(Prev. rep. 15233 B.)**

A. RHODESIA AND NYASALAND FEDERATION. — Sir Roy Welensky on Need for Commonwealth Unity and Advancement of Federation's Status. - Criticisms of African Leaders and Colonial Office Policy.

In a speech at Sinoia on Dec. 1, 1956, Sir Roy Welensky, the new Prime Minister of the Federation of Rhodesia and Nyasaland, stressed the need for unity within the Commonwealth, particularly since the Suez crisis, and for the further political advancement of the Federation. In the course of his speech he strongly criticized the British Labour Party's attitude both to the Suez crisis and towards the concept of federation in Rhodesia and Nyasaland.

Sir Roy spoke as follows: "The Commonwealth has its faults, of course, and among these is the fact that only relatively recently was the development of several colonies undertaken in the interests of those colonies themselves, rather than in the interests of Great Britain. But the strength of the Commonwealth remains, and it is important that we should realize how great is that strength if combined, and how weak, in modern terms, is any one member of the Commonwealth community when standing alone. There is little doubt that an attempt has been made, before and during the Suez crisis, to re-shape national interests in the Middle East, and this is proving to be no less than a gamble with world peace itself. To us in Africa, the cost of the loss of the Middle East to the Western world might be the price of disaster. Who can fail to realize that in these times of swift transport, in which distances measured in thousands of miles mean nothing in terms of political influence and modern arms, Communism established in the Middle East—for this is what is being gambled—will mean disruption in Africa as a whole? And who doubts that this is the aim of the new imperialism of Russia?

"Therefore it is particularly tragic that in Britain, to which we are looking for a lead in this crisis, there is serious division on foreign policy in the face of national danger and of danger to the Commonwealth. The responsibility which falls on the shoulders of the leaders of both main parties in Britain is great. It is a responsibility not only to themselves but to the Commonwealth as a whole; and they, too, must now close their ranks. As Prime Minister it is my privilege to say, on behalf of the whole Federation, that whatever the course of events may prove to be, our loyalty to the Crown is unquestioned. As a people, whether white or black, we are British—and we are determined that this will not change, whatever our status within the Commonwealth may become.

"A political clique in the United Kingdom, a clique which dominates the Colonial thinking of the Labour Party, must not be allowed to set at naught all that the Federation is striving for and achieving. In this clique are many who are willing to allow a damaging mixture of idealism, ignorance, and perhaps something even more evil, to influence their own thinking. If for this reason alone, we must move towards greater responsibility and enhanced status within the Commonwealth without delay."

After declaring that he would lose no time in using the machinery provided in the Constitution to bring about an essential advance in the Federation's status, Sir Roy continued: "What is the criterion in the minds of the British Government and the Opposition at the present time? Is it stability and good government, or is it political expediency? If it is the latter, do they expect us to stomach it? If it is neither of the two, let them tell us exactly what is expected of us. Ours is a federal Constitution and it will remain federal; let that be quite clear. . . ."

Emphasizing that there would be "no departure from established principles, no compromise with the real requirements of advancement, and, above all, no truck whatsoever with extremism," Sir Roy said that there were "some, not only here but also abroad, whose whole purpose seems to be to damage the cause of federation." He added in this connexion: "I am referring to those who have seen fit to denounce this country, on one pretext or another, ever since its inception, and whose noise has become more strident in recent months. In their determination to sell the Empire at whatever cost, they do not stop to think of what that cost might be. Sell they must, whether the result be the perpetuation of poverty and inefficiency, or the sacrifice of the standards for which, paradoxically, they will fight so hard at home. We believe that our record of good government, stability and moderation, and our insistence on civilized standards in our social and political life, speak for themselves and can be matched with the best in the Commonwealth."

In a further speech at Salisbury on Jan. 3, 1957, Sir Roy Welensky asserted that the British Government were paying more attention to the complaints and demands of the Africans than to the attempts of the Federation Government "to preserve the very standards which Britain sets herself at home." As a result, African leaders in the Federation were looking to Britain, rather than to the Federal Government, for the realization of their political aims. After deploring this tendency, and emphasizing its dangers both to the Federation and to Britain herself, he called upon H.M. Government to make it clear that Federation had "come to stay," and declared that the Federation might well become "the last bastion of British interests in Africa."

Referring to the present tendency of Africans in the Federation to look to London for the achievement of their aims, Sir Roy declared: "Unless it is remedied, we shall reap the folly of a belief that it is the policy of the Colonial Office to emancipate Africans from Europeans. I have watched the impact of this policy on British possessions in Africa, and I have no hesitation in saying that it is a disastrous one. I have no hesitation, too, in saying that it is their belief in this policy that is encouraging certain African leaders in plans for African self-government. If Mr. Lennox-Boyd has seen this, as I believe he has, it is to the good, for there is only one body that can put right this state of affairs, and that is H.M. Government in the United Kingdom.

"But they must act without delay. They must say that Federation is here to stay, and they must say it again and again. As we stand at present, we can never build up a common loyalty to the Federal State in the minds of our African population; and no matter how liberal our approach may be to the many problems which face us, the Africans in the two northern States [i.e. Northern Rhodesia and Nyasaland] will look upon the U.K. Government as a sort of opposition to the Federal Government, and not as a partner. . . .

"The issue must be faced before events get out of hand. I know that in Britain the decision will not be an easy one. Traditionally the so-called under-dog has her sympathy, but there is another point of view, and it is that the Europeans of the Federation are striving to preserve the very standards which Britain sets herself at home and would, I believe, like to see perpetuated in her colonies. . . . Let Britain recognize that fact, and let her realize that we may well become the last bastion of British interests in Africa.

"Under our Constitution the Federal Government has virtually no control over African affairs; in fact, in no way can the Federal Government directly influence African thought. At the same time, whatever we do in the economic field over which we do have some control—to further the interests of the African goes unacknowledged by the African leaders—of whom we have learnt to expect nothing better—and also, tragically enough, by Britain herself.

"This is because the African, with his close ties with the Colonial Office and his facile form of propaganda, has many ways of making himself heard in the United Kingdom. He speaks and complains, and his complaints are relayed to us from London in a form more often than not of verbal chastisement. We, on the other hand, are charged with getting on with the hard economic job, and we have relatively few spokesmen in Britain. Consequently we are not so often heard or listened to.

"That is irritating, but what is dangerous to the future of our country is that the state of affairs in which we find ourselves encourages the African leader to turn his eyes outward to Britain, and to engender a state of mind wherein the British Government is considered as a sort of super-Government to which he need only turn to achieve his aims. We have now arrived at the position in which the African is not only inclined to disregard the Federal Government, but also to disregard the territorial Governments of Northern Rhodesia and Nyasaland. This is a dangerous state of affairs, and wholly unjustified.

"All four Governments of the Federation are serving the African people well, and the African has scant cause to complain of any of them. But it goes much further. The British Government, as much as the four Governments of the Federation, were a party to the Constitution, and written into the Constitution is the policy of partnership, which is the policy of the Federation. Therefore any support given to the Africans in their present demands, or in countenancing their present attitude, is a denial of support to the policy of partnership—a denial of support by Britain in the same way that the partnership is not receiving the support of many African leaders.

"African leaders have never attempted to support the partnership, not because they cannot envisage its success, but because they realize that, if carried through logically, it stands in the way of their aspirations toward African domination. . . . This can only mean that when he has achieved what he wants -which is no more and no less than full African self-government—he will in turn reject the British Government's authority. Then this will be another part of Africa lost to progress. . . ."

Mr. Lennox-Boyd arrived at Lusaka (Northern Rhodesia) on Dec. 29 on a three-week visit to the Federation, during which he had discussions with the Federal and Territorial Governments on such questions as the franchise, citizenship, and other matters of current interest. In a statement at Kitwe on Jan. 3, the Colonial Secretary emphasized that H.M. Government were fully committed to the Federal system and would never agree to the amalgamation of the Rhodesias and Nyasaland. He expressed the hope that "the Government of this great Federation shall for all time be in the hands of civilized and responsible people, whatever their race, whose homes are here."—(Federal Information Department, Salisbury)

B. AUSTRALIA. — New Chief of Air Staff.

It was announced in Canberra on Dec. 18, 1956, that Air Vice-Marshal F. R. W. Scherger had been appointed Chief of Staff of the Royal Australian Air Force in succession to Air Marshal Sir John McCauley, retiring in March 1957.

(Australian News and Information Bureau)

C. NEW ZEALAND.—Railways Commission abolished.

Under legislation passed by the New Zealand Parliament in October, the New Zealand Railways Commission set up in October 1952 will be abolished on April 1, 1957.

(The Dominion, Wellington) (Prev. rep. 12530 D.)

A. UNITED KINGDOM. — Steel Industry. - Record Production in 1956. - Further Resales of Steel Companies.

Figures issued by the Iron and Steel Board on Jan. 7, 1957, showed that U.K. steel production in 1956 reached the record figure of 20,659,000 tons, compared with 19,791,000 tons in 1955. Production of pig-iron in 1956 was also a record, amounting to 13,170,000 tons as compared with 12,470,000 tons in 1955.

Detailed figures for the last nine months of 1956 are given below, with 1955 figures for comparison:

	1956		1955	
	Weekly Average Tons	Annual Rate Tons	Weekly Average Tons	Annual Rate Tons
Steel Ingots and Castings.				
April	421,100	21,896,000	393,300	20,455,000
May	396,400	20,612,000	401,600	20,884,000
June	379,700	19,744,000	364,200	18,939,000
July	326,400	16,971,000	307,700	16,002,000
August	340,600	17,712,000	345,100	17,946,000
September ..	417,000	21,686,000	397,800	20,683,000
October ..	419,100	21,791,000	399,500	20,773,000
November ..	426,400	22,172,000	408,600	21,246,000
December ..	395,900	20,587,000	381,900	19,860,000
Pig-Iron.				
April	254,300	13,225,000	238,500	12,401,000
May	246,500	12,820,000	241,800	12,574,000
June	239,600	12,459,000	216,800	11,274,000
July	240,400	12,498,000	230,800	12,000,000
August	235,900	12,265,000	236,200	12,282,000
September ..	252,500	13,131,000	246,200	12,804,000
October ..	260,700	13,558,000	249,200	12,957,000
November ..	262,700	13,660,000	252,600	13,135,000
December ..	262,300	13,637,000	250,100	13,004,000

Steel production in May, June, July, and August was adversely affected by the ban on overtime and week-end working imposed by steelworks maintenance workers in April (see below).

Developments in the iron and steel industry in recent months are summarized below:

Productivity. The British Iron and Steel Federation, in a survey published in the October issue of the Federation's quarterly *Steel Review*, stated that output per man-year in the industry had increased by 46 per cent since 1946 and by 66 per cent since 1938, the output of steel having more than doubled since the war.

Price Increases. The Iron and Steel Board increased maximum prices of most iron and steel products from May 7 by an average of five per cent. The Board explained that since the last increase in steel prices in July, 1955, the cost of imported iron-ore had risen by 11s. a ton, of imported scrap by £7 10s. a ton, of pig-iron by £5 a ton, and of imported semi-finished steel by £6 a ton. No allowance had been made in the new prices for increased costs arising out of higher wages and railway freight charges, which would be borne for the present by the industry itself.

Maximum prices of home-produced iron and steel scrap had been raised by the Board of Trade by an average of £2 a ton from May 4.

Maximum prices of iron and steel products were again increased from Dec. 17 by an average of about six per cent, the Iron and Steel Board explaining that further rises, in some cases "substantial," had taken place since the spring in the cost of imported materials, coal, wages, and inland transport. The new prices took no account of cost increases which might result from the Middle East situation and the continued hardening of ocean freight rates. The statement added that steel prices in most steel-producing countries had risen during 1956 and that the new U.K. prices would still, on the average, be about eight per cent below prices in Western Europe.

Development Schemes and Plant Expansion. The chairman of the Steel Company of Wales (Mr. H. Peake) announced on May 1 that, at the request of the Iron and Steel Board, his company had prepared a third development plan providing for (*a*) the raising by 1960 of annual production of steel ingots at the Abbey works at Margam (Port Talbot) from 2,400,000 tons to 3,000,000 tons; (*b*) the conversion of steel ingots into steel sheets, plates, and tinplate, increasing the output of these products by about 435,000 tons annually. Work on the scheme, which had been approved by the Iron and Steel Holding and Realization Agency, would start at once and take about 3½ years to complete.

Mr. Peake explained that the object was to effect a reduction in the amount spent by Britain on importing steel sheets and tinplate, of which 456,000 tons and 88,200 tons respectively had been imported in 1955 at a total cost of over £33,000,000.

It was announced on May 26 that Stewart and Lloyds Ltd., manufacturers of steel tubes, would spend about £6,250,000 over the next 10 years on a development scheme at their Corby (Northants) works.

Import Duties. It was announced on Dec. 1 that, after consulting the Iron and Steel Board about the supply position, the Government had decided to prolong until Sept. 18, 1957, the suspension of import duty on a wide range of iron and steel products (with the exception of tinplate and terneplate, on which duty would be restored from March 18, 1957).

Overtime Ban by Steelworks Maintenance Men. - Acceptance of Recommendations of Court of Inquiry. A substantial loss of production was caused during the summer months by a ban on overtime working by about 14,000 steelworks maintenance workers, as a result of their dissatisfaction with a 10s. wage increase for all steelworkers which had been granted in March. When the employers used emergency teams to do the work which would have normally been done by the maintenance men during overtime, strikes, involving about 3,750 maintenance men, broke out in Scotland, South Yorkshire, and South Wales in June. Because of the employers' refusal to discuss the question of supplementary wage increases until full normal working had been resumed, the executives of the 10 unions involved recommended on July 4 a national strike to begin on July 14, but on July 9 the Minister of Labour announced that he would appoint a Court of Inquiry into the dispute; the proposed national strike was thereupon called off on July 11, the ban on overtime work continuing. By then the loss of production caused by the ban and the various local stoppages was estimated at nearly 300,000 tons.

On July 13 the Minister of Labour announced that the Court of Inquiry would consist of Sir John Stewart (a Glasgow solicitor, and chairman of several wage councils), as chairman, Brigadier L. C. Mandelberg (a former chairman of the employers' association in the rayon yarn industry), and Mr. C. J. Geddes (general secretary, Union of Post Office Workers). The Court announced its findings on Aug. 23, as follows:

(1) Maintenance craftsmen should accept, without prejudice to future claims, the 10s. increase offered by the employers in March, and this should be paid retrospectively from March 18, 1956.

(2) Craftsmen should consider whether they wished to submit a claim for a new wages structure in the industry.

(3) New arbitration arrangements for wage disputes should be negotiated to meet the special needs of the industry, including a tribunal from the craftsmen's side having two assessors intimately connected with the industry's technical processes.

[The unions had refused to refer the dispute to arbitration on the ground that they had no confidence either in the Industrial Court or in the Industrial Disputes Tribunal, because these bodies did not include members with a direct interest in the industry. They maintained that the steel industry was too complex to be judged by a court which did not contain experts from the industry itself.]

The court's findings were accepted by the unions on Sept. 14, and resumption of full working—including overtime and week-end working—took place immediately.

Further Resale Transactions. The following sales by the Iron and Steel Holding and Realization Agency were announced in October:

(1) The entire share capital of Burnell and Co. Ltd., to John Summers and Co. Ltd., Hawarden Bridge (Cheshire) for £350,000 (announced Oct 29).

It was stated that, in addition, the Agency had received a special distribution from Burnells of £250,000, bringing the total proceeds accruing to it up to £600,000, compared with its investment—represented by compensation paid under the 1949 Iron and Steel Act—of £541,562).

(2) The entire issued share capital of Kettering Iron and Coal Ltd., and the New Cranley Iron and Steel Company Ltd., to Stewart & Lloyds Ltd., which also bought 25 per cent of the issued share capital of the Loddington Ironstone Company. The total purchase price was £260,000 (announced Oct. 31).

[It was explained that, in addition, the Agency had received a special distribution of £240,000 from the Kettering company's reserves, the total proceeds accruing to it therefore amounting to £500,000, compared with an investment of £465,925.]

Steel Realization Agency's Accounts for 1954-55. The accounts of the Iron and Steel Holding and Realization Agency for 1955, published on June 22, showed that it had paid into the realization account sums totalling £91,630,552 from the sale of iron and steel undertakings, and had withdrawn £45,100,000. Since the close of the financial year £25,000,000 had been transferred from the account to the Exchequer.

Licensing Control of Steel Exports. It was announced on Jan. 16, 1957, that the Board of Trade had decided to license exports of a wide range of iron and steel products so as to safeguard supplies of steel for domestic constructional purposes and the engineering and shipbuilding industries. Licences will be required for the export to any destination of pig-iron, steel rails, and alloy and non-alloy steel sections, bars, and rods.

Ending of Tinplate Control. Control of tinplate, terneplate, and blackplate was ended on Dec. 31.

It was announced on Oct. 29 that the President of the Board of Trade had appointed Mr. A. J. Stewart, chairman and general managing director of Stewart and Lloyds Ltd., as a part-time member of the Iron and Steel Board in succession to Sir Andrew McLane, who had retired.

On Dec. 18 it was announced that Sir Andrew McCance, chairman and managing director of Colvilles Ltd., would succeed Sir Ernest Lever (chairman of Richard Thomas and Baldwins Ltd.,) as president of the British Iron and Steel Federation as from Jan. 1, 1957.—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 14814 C.)**

A. CANADA. — Parliamentary Debate on Middle East Crisis and Hungary. - Opposition Criticisms of Canadian Attitude in Middle East Crisis. - Statements by Mr. St. Laurent and Mr. Lester Pearson. - Appropriations for Hungarian Relief. - Canadian Contribution to U.N. Emergency Force in Middle East.

A special session of the Canadian Parliament opened on Nov. 26 to consider the Government's request, outlined in the Speech from the Throne, that Canada's contribution to the U.N. Emergency Force in the Middle East (UNEF) should be financed from defence appropriations, and that Can.$1,000,000 should be provided for the relief of Hungarian refugees.

The debate developed into a general discussion on the Canadian Government's attitude in the Middle East crisis and the Anglo-French intervention in Egypt.

Mr. Rowe (Progressive Conservative, and Acting Leader of the Opposition) opened the debate by moving a motion of no confidence in the Government. He accused the Government of having :

" (1) followed a course of gratuitous condemnation of the action of the United Kingdom, which was designed to prevent a major war in the Suez area ;

" (2) meekly followed the unrealistic policies of the U.S.A. and thereby encouraged a truculent and defiant attitude on the part of the Egyptian dictator ;

" (3) placed Canada in the humiliating position of accepting dictation from President Nasser as to the composition of Canada's contribution to the U.N. Emergency Force ;

" (4) failed to take swift and adequate action to extend refuge to the patriots of Hungary and other lands under the Russian yoke."

Mr. St. Laurent (Prime Minister) denied that there had been any " gratuitous condemnation of the action of the United Kingdom." He pointed out that Canada had abstained from the first resolution introduced in the emergency session of the U.N. General Assembly because it was an insufficient resolution, calling merely for a cease-fire and nothing more. After saying that Canada had expressed regret " that certain members of the U.N. had felt it necessary to take the law into their own hands when the matter was before the Security Council," the Prime Minister added that there was " regret that what took place in the Middle East was used as a screen to obscure the horrible international crimes that were being committed in mid-Europe at the same time." Events in the Middle East made it more difficult to marshal world opinion in unanimous and vigourous condemnation of what was taking place in Hungary.

Recalling that Israel, France, and Britain, with other nations, had signed the U.N. Charter and thereby undertaken to use peaceful means to settle disputes and not to resort to the use of force, Mr. St. Laurent said that he had been " scandalized more than once by the attitude of the larger Powers . . . who have all too frequently treated the U.N. Charter as an instrument with which to regiment smaller nations, but which did not have to be considered when their so-called vital interests were at stake."

Mr. St. Laurent denied that Canada had " meekly followed the unrealistic policies of the United States," and pointed out that on two occasions, for example, resolutions supported by the U.S. delegation at the U.N. had failed to get Canadian support.

Replying to the charge that Canada had accepted dictation from President Nasser, the Prime Minister said that Canada had had no dealings whatsoever with the Egyptian President. " Canada has dealt with the United Nations," he declared, " and the U.N. in this instance have been represented by the Secretary-General and by another gentleman who is a very distinguished Canadian, in whose patriotism as well as in whose wisdom this Government has practically unlimited confidence. I refer to General Burns." The Canadian forces for the Middle East had been decided upon with the advice of General Burns, and, ultimately, of the United Nations.

In replying to the charge that Canada had failed to take swift humanitarian action in the face of events in Hungary, Mr. St. Laurent disclosed that he had written to Marshal Bulganin on Nov. 13, appealing to the Soviet Union to comply with the U.N. resolutions on Hungary and to display moderation towards the victims of the events in that country. He had also asked Marshal Bulganin to use his influence to alleviate the sufferings of the Hungarian people and to permit competent international agencies to help in the work of distributing food and caring for the sick.

Referring to the proposed appropriation for Hungarian relief, Mr. St. Laurent stated that $100,000 would be paid to the International Red Cross for the use of refugees outside Hungary, another $100,000 would go to the U.N. High Commissioner for Refugees, and the remaining $800,000 would be spent, either by the International Red Cross or by a U.N. Agency, solely for assistance to " those who have been the victims of the horrible crimes perpetrated against that nation in the last few weeks."

Mr. Coldwell (leader of the C.C.F. Party) and **Mr. Solon Low** (leader of the Social Credit Party) both supported the Government's proposals. **Mr. Low** added, however, that he would not brand Britain and France as aggressors because it was necessary to " measure most carefully the motives of those two countries against the long line of provocations they have suffered." Mr. Low also suggested that the U.N. should be prepared to allow Britain and France to retain their forces in Egypt until such time as the U.N.E.F. had been completely established and placed in full possession of the Canal Zone.

Mr. Pickersgill (Minister of Citizenship and Immigration) reviewed the steps taken by the Government to help the Hungarian victims. He stated that all administrative facilities would be given to assisting Hungarian refugees to come to Canada ; that any responsible individual or organization in Canada would be at liberty to sponsor immigrants from Hungary, including people who were unable to look after themselves or were in need of medical treatment ; and that Canadian Pacific Airlines, Trans-Canada Airlines, and the shipping companies were co-operating with the Government to make all possible accommodation available to Hungarian refugees entering Canada.

Later in the debate (Nov. 27) Mr. Pickersgill announced that the Government had decided to apply the policy of free passages to all Hungarian refugees coming to Canada, including those who had already arrived. He mentioned that up to that date 1,070 Hungarians had received Canadian immigration visas, and that he himself was going to Vienna to see that everything possible was being done to facilitate the immigration of refugees who wished to enter Canada.

Mr. Howard Green (Progressive Conservative) accused the Canadian Government of ignoring the dangerous situation in the Middle East during the spring and summer, when " President Nasser was openly boasting that he was out to destroy Israel and to drive the United Kingdom and France out of the Middle East," and when he was fomenting trouble in North Africa for the French. Stressing that Colonel Nasser had no right to seize the Canal, Mr. Green declared that Britain and France had moved their troops into the area " to save their whole national existence," after Canada and the U.S.A. had failed to take any stand to try to clear up the Suez situation. He attacked U.S. Middle East policy, said Mr. St. Laurent had not proved that Canada's policy in the Middle East was any different from that of the U.S.A., and added that the U.S.A. would have " far more admiration for Canada if this Government stopped being the United States' chore-boy."

The attack on the Government was continued by **Mr. Donald Fleming** (Progressive Conservative), who dealt with the four points mentioned by Mr. Rowe. Pointing out that the declared purpose of the British and French intervention in the Middle East was to prevent a major war and to contain the hostilities between Israel and Egypt, Mr. Fleming said that " no-one dare question those motives of the British and French Governments unless he is prepared to accuse those Governments of bad faith." Although Mr. St. Laurent had not actually accused Britain and France of bad faith, he had accused them of " aggression," and it therefore seemed to him [Mr. Fleming] that the Prime Minister had not accepted the statement of the declared purpose of the two countries that carried out the intervention.

Mr. Fleming went on to say that those countries, including Canada, which had not instituted effective U.N. police action before the Middle East crisis reached its present proportions, must share the responsibility for the conditions which existed today. These countries should acknowledge that intervention by Britain and France had averted the spread of the conflagration ; had headed off any direct Russian intervention and might well have avoided a third world war ; had exposed the extent of Russian penetration in the Middle East ; and had moved the U.N. General Assembly to establish an International Police Force.

In conclusion, Mr. Fleming said that Canada, which should be acting independently in this matter, had " chosen to be too closely associated with the policies of the United States, which are responsible to a very considerable degree for the trouble that exists in the Middle East today."

Mr. Lester Pearson (State Secretary of Foreign Affairs) replied to the debate on Nov. 29. Refuting the charge that Canada was the " chore-boy " of the United States, he declared : " Our record over the last years gives us the right to say that we have performed, and will perform, no such role. While it is bad to be a chore-boy of the United States, it is equally bad to be a colonial chore-boy running around shouting ' Ready, aye, ready ! ' "

Dealing with the background of the events in the Middle East, Mr. Pearson said that Egyptian policy had been unfriendly to the Western Powers, arbitrary in the seizure of the Suez Canal, and had led to a gradual increase of Russian influence in Egypt and the Middle East. It had also been obvious that there had been " no meeting of minds " between Washington and London in these matters, that the fault was by no means entirely with Britain and France, and that " the vital importance of the Suez to Western Europe is perhaps not appreciated in Washington." Canada's attitude had been that this question should be brought as quickly as possible to the United Nations, and a solution attempted there ; that there should be no division of opinion or policy between Washington, London and Paris on a matter of such vital importance ; and that there should be no action by any party which could not be justified under the U.N. Charter.

Eventually the matter had been taken to the Security Council, and certain principles for a settlement of the Suez question were agreed upon [see 15252 A]. One of these principles, accepted by Egypt, was that the Canal should be insulated from the politics of any one nation, including Egypt herself. Through these discussions, and through conversations in the U.N. Secretary-General's office, there had been " some hope that an international solution might be reached which might be satisfactory to all concerned."

At this point (Mr. Pearson continued) the Israeli Government had moved against Egypt. Though admitting, as all members of the House would admit, the provocations which Israel had had to endure, Mr. Pearson said that the Canadian Government " did at that time, and do now, regret that the attack was made at that time and under those circumstances."

Mr. Pearson continued : " Then the U.K. and France intervened on the ground, so they claimed, that it was necessary to keep the fighting away from the Suez Canal and thereby to keep the Canal open. They wished, so they said in Paris and London, to keep a shield between the opposing forces. . . . To carry out that purpose, the French and British Governments sent a 12-hour ultimatum to Egypt and Israel It was accepted by Israel, whose forces at that time were within ten miles of Suez, but was rejected by Egypt, which had been asked to withdraw its forces beyond the Suez Canal. Following that rejection, the U.K. and French forces intervened, by air and later on the ground."

Mr. Pearson said that, far from gratuitously condeming the Anglo-French action, the Canadian Government had expressed regret at the necessity for the use of force in those circumstances—" circumstances that included an element of complete surprise on our part at the action taken "—and at the breaking-down of consultation between London and Paris on the one hand, and the Commonwealth capitals and Washington on the other. Canada had immediately begun to pursue a policy, both by diplomatic talks and correspondence and later at the United Nations, " which would bring us together again inside the Western Alliance and which would bring about peace in the area on terms which everybody could accept." Canada's policy was to seek through the United Nations a solution which would be satisfactory to all sides.

At the U.N., Canada had been anxious to avoid the creation of a " vacuum of chaos " in the Middle East after the fighting had stopped; had maintained that the situation leading up to the aggression should be given due consideration, and constructive action taken to prevent such a situation recurring again ; had wished to prevent any formal condemnation of the U.K. and France as aggressors ; and, finally, had resolved to " do what we could to help repair the lines of communication and contact between Washington, London, and Paris and restore some form of continuous friendly diplomatic consultation between the Western allies on those matters after its breakdown last October." In stressing that Canada had been anxious to hold the Commonwealth together " in this very severe test," Mr. Pearson declared : " At one stage after the fighting on land began it was on the verge of dissolution, and that is not an exaggerated observation."

Reviewing the various steps taken by Canada to implement these guiding principles in the various U.N. meetings and decisions, Mr. Pearson said that Canada had adopted an " objective and independent attitude, supporting views it believed right and indicating its disapproval of proposals it believed wrong." This attitude had been appreciated in London. " Far from criticizing us in London or Paris for our ' gratuitous condemnation ' of their course, we have had many expressions of appreciation for the line we have been trying to follow," Mr. Pearson added.

Referring to the U.N. Emergency Force, Mr. Pearson said that Canada's contribution had been made in consultation with its Commander and with the U.N., and not as a result of " dictation " by President Nasser. After expressing the hope that the U.N.E.F. would succeed in its task of ensuring the cessation of hostilities and preventing their recurrence, Mr. Pearson declared : " If it does, we may have started something of immense value for the future. We may have taken a step to put force behind the collective will of the international community under the law. That is our immediate task—to make this force work, to prevent fighting in the area, and to establish conditions there, through the operation of this force, so that the U.N. can work out speedily an enduring and honourable settlement for the area, including relations between Israel and her neighbours and the international supervision and control, if that can be done, of the Suez Canal."

As regards the events in Hungary, Mr. Pearson said : " The actions of the Soviet Union in Hungary throw a lurid light on the protestations that Stalinism is dead and that peaceful co-existence is here. There has never been a more significant exposure of the underlying and enduring purpose and methods of Soviet power. In this situation Canada can, as she is doing, help the victims of this terror, and can keep, through the United Nations, the spotlight of world public opinion on the savage actions of the Soviet Union. The U.N. must continue to endeavour to bring the U.N. into Hungary in the role of observers and investigators, but it would be wrong to hold out to the Hungarians promises of liberation by force which at this time it would be impossible to fulfil."

The Progressive Conservative motion of no-confidence was defeated by 171 votes to 86, and the Government's appropriations request approved.—(Department of External Affairs, Ottawa) **(Prev. rep. Middle East Crisis, Canadian Reactions, 15201 A, page 15209.)**

A. SOUTH AFRICA. — New Chief Justice.

It was announced in Pretoria on Nov. 27, 1956, that Mr. Justice H. A. Fagan had been designated as Chief Justice of the Union in succession to Chief Justice Centlivres, retiring in January on reaching the age of 80. Mr. Justice Fagan (67), a Member of Parliament from 1933-43, was Minister of Native Affairs and Minister of Education and Social Welfare in General Hertzog's Government before the Second World War. He became a judge of the Cape Provincial Division of the Supreme Court in 1943, and was appointed to the Appeal Court in 1950. A former Professor of Law at Stellenbosch, he has written a number of plays, poems, and short stories. (Die Burger, Cape Town - Cape Times) **(Prev. rep. 11250 B.)**

B. HONG KONG. — Report on the Kowloon Riots.

The report on the Kowloon riots of Oct. 10-12, 1956, submitted to the Colonial Secretary by the Governor of Hong Kong (Sir Alexander Grantham), was published on Jan. 1, 1957.

The report stated that because the rioters had chiefly attacked property belonging to Communist supporters, and particularly those who had flown the Communist flag on Oct. 1 (the anniversary of the establishment of the Chinese People's Republic in 1949), it had been suggested that the riots had been planned by Nationalist agents. All the indications, however, were that the Kowloon riots had started spontaneously, and that those taking part had been " people of Nationalist persuasion egged on by criminals bent on personal gain and power." In Tsuen Wan (an industrial area five miles from the centre of the rioting in Kowloon), however, it appeared that the Nationalists had collaborated with Triad gangs " to redress old scores and to attempt to win a dominant position in the labour world."

The Triad societies, the report recalled, had originated in the 17th-century attempts to overthrow the Manchu Ching dynasty, and in recent times had proliferated into the " Wo group " of 20 societies with a membership of some 50,000. They organized and protected opium dens, brothels, and pickpockets, and preyed upon hawkers and shopkeepers, and attempts to suppress them had been rendered ineffective by the unwillingness of the Chinese to give evidence against them for fear of reprisals. One of the societies, " 14K," which had originated in Canton under the Nationalist régime as a semi-official underground political organization, had become established in Hong Kong and was attempting to gain a position of dominance in Kowloon. Most of the societies were composed of Nationalist sympathizers, and by using the Nationalist flag as a " cover " purely gangster elements had secured the support of people whose political sympathies were strong but who were not disposed to violence. While there was ample evidence of organized Triad activity during the riots, there was no indication either of co-ordinated central control or of any planning of the disturbances before the initial outbreak on Oct. 10. When the riots began, however, word had been passed round in Triad circles that a situation had arisen from which the " brothers " could profit, and organized gangs carrying Nationalist flags had come out in force.

Hospital records showed that 59 people had been killed in the riots, including one European, and 384 injured, including four British officers, 13 other ranks, and 107 members of the police ; it was probable, however, that many more cases of injury had not reached the hospitals. Over 6,000 people had been arrested, of whom 3,700 had been released after questioning and 1,455 had been convicted only of breaches of the curfew order. Among those charged with more serious offences, five were awaiting trial for murder, 129 had been convicted of riot and unlawful assembly, and 171 were awaiting trial on the same charge. The total damage caused was estimated at about 4,770,000 Hong Kong dollars (£370,000). The report highly commended the behaviour of the police and garrison troops during the riots.

The report was prefaced by a despatch from the Governor, who pointed out that 500,000 to 600,000 refugees from China had entered Hong Kong in 1949-50, producing " conditions of unparalleled overcrowding and the attendant threat to law and order that arises therefrom." Since 1945 the population of the Colony had increased from 600,000 to over 2,500,000, and in Kowloon in particular the estimated density of population was about 2,000 to the acre, possibly the highest in the world. Some 200,000 of the refugees, whose closely packed " squatter " huts had constituted a very serious fire and health hazard, had been rehoused by the Hong Kong Government, but the bare subsistence level at which most of them lived had engendered a sense of frustration and bitterness. Without " substantial emigration to reduce the numbers or outside help to supplement Hong Kong's capacity to absorb them," the risk of a similar outbreak would " be ever present and require increased vigilance."

The Hong Kong Government announced on Jan. 1 that it was prepared to consider claims for compensation for injury (including fatal injury) and damage, theft, or destruction of property arising from the riots, but that no compensation would be paid to anyone who was a party or accessory to the riots.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15257 A.)**

C. UNITED KINGDOM. — Sir Anthony Eden to convalesce in New Zealand. - Invitations from N.Z. and Australian Governments.

Sir Anthony Eden, accompanied by Lady Eden, sailed from London on Jan. 18 in the liner *Rangitata* to convalesce in New Zealand, where they will be the guests of the Prime Minister, Mr. Holland. Prior to Sir Anthony's departure, it was announced that he had also conditionally accepted an invitation from Mr. Menzies to visit Australia.

Before sailing in the *Rangitata*, Sir Anthony said to press representatives : " The difference between the West and Egypt has not been colonialism—it is the difference between democracies and a dictatorship. The British people, with their instinctive good sense, have always understood that." He added that he had received " a kind personal note " from President Eisenhower.—(Times - Manchester Guardian) **(Prev. rep. 15301 A.)**

A. UNITED KINGDOM. — The New Year Honours.

The New Year Honours List was published on Jan. 1, the principal awards being set out below :

Barons. Sir Edward Bridges, Permanent Secretary to the Treasury and head of the Civil Service from 1945 until his retirement in October 1956, and Secretary to the Cabinet from 1938 to 1946; Sir Robert Sinclair, chairman of the Imperial Tobacco Company and a past president of the Federation of British Industries, for public services.

Baronet. Commander Peter Agnew, R.N. (retd.), M.P. (Conservative, South Worcestershire), for political and public services. Commander Agnew was a Conservative Whip from 1945-50.

Order of Merit. Sir John Cockcroft, Director of the Atomic Energy Research Establishment, Harwell.

Companion of Honour. Dr. John Baillie, the eminent Scottish divine, lately Professor of Divinity, Principal of New College, and Dean of the Faculty of Divinity in the University of Edinburgh.

Privy Councillors. Sir Harry Hylton-Foster, Q.C., M.P., the Solicitor-General; Sir Robert Tredgold, Chief Justice of the Federation of Rhodesia and Nyasaland.

Knights Bachelor. Mr. D. S. Anderson, Director of the Royal College of Science and Technology, Glasgow; Dr. G. L. Brown, Jodrell Professor of Physiology, University College, London; Major Egbert Cadbury, for public services in Somerset and Gloucestershire; Mr. J. J. Campbell, chairman, Committee of Scottish Bank General Managers; Mr. Henry Channon, M.P. (Conservative, Southend West), for political and public services; Alderman Bernard Waley-Cohen, lately Sheriff of the City of London; Mr. A. J. D. Crawford, for political services in the West of England; Mr. J. N. Dean, chairman, Telegraph Construction and Maintenance Co. Ltd.; Mr. Josiah Eccles, Deputy Chairman (Operations), Central Electricity Authority; Mr. G. R. Edwards, managing director, Aircraft Division, Vickers-Armstrong Ltd.; Mr. J. F. Emery, for political and public services in Salford; Mr. G. F. C. Fison, for political and public services in Suffolk; Mr. H. J. G. Griffin, secretary of the Council for the Preservation of Rural England; Lieut.-Colonel R. V. Gwynne, for public services in Sussex; Mr. Noel Hall, Principal of the Administrative Staff College, Henley-on-Thames; Mr. Samuel Hoare, Assistant Under-Secretary, Home Office; Mr. Edward Hulton, the magazine publisher, for services to journalism; Mr. Bertram Long, Senior Registrar, Principal Probate Registry; Mr. Charles Martin, Chief Constable of Liverpool; Colonel Jackson Millar, for political and public services in Scotland; Mr. Raymond Needham, Q.C., Master Treasurer of the Middle Temple, for political and public services; Mr. Basil Nield, Q.C., Recorder of Manchester, lately M.P. (Conservative) for the City of Chester (1940-56); Mr. W. L. Owen, Director of Engineering, U.K. Atomic Energy Authority's Industrial Group; Mr. K. W. Parkinson, for political and public services in the West Riding of Yorkshire; Mr. F. J. Pascoe, for political services; Mr. C. R. Mott-Radclyffe, M.P. (Conservative, Windsor), for political and public services; Mr. Charles Read, president of the Royal College of Obstetricians and Gynaecologists; Mr. Archibald Safford, Deputy Commissioner under the National Insurance Acts, Ministry of Pensions and National Insurance; Mr. J. R. Simpson, Controller of H.M. Stationery Office; Dr. C. P. Snow, Commissioner and Scientific Adviser, Civil Service Commission; Mr. J. L. Train, member of the British Transport Commission; Mr. Hugh Watson, Deputy Keeper of H.M. Signet; Mr. James Wordie, Master of St. John's College, Cambridge, for services to polar exploration.

[Major Egbert Cadbury, managing director of Cadbury Bros. Ltd., was an air "ace" of the First World War, in which he took part in the destruction of two zeppelins. Dr. C. P. Snow, scientist, novelist, and playwright, is well known for his "Lewis Eliot" novels (*The Masters*, *The New Men*, etc.), and is the husband of Pamela Hansford Johnson, herself a well-known novelist. Mr. John Wordie, who has taken part in many polar expeditions, is chairman of the British national committee for the International Geophysical Year.]

Other recipients of knighthoods (in addition to those enumerated above) and other awards included the following :

Prime Minister's List. Mr. A. R. Manktelow, deputy secretary, Ministry of Agriculture, Fisheries and Food; Mr. E. W. Playfair, Permanent Under-Secretary of State, War Office; Mr. G. F. Stedman, deputy secretary, Ministry of Transport and Civil Aviation.

Foreign Office List. Mr. Roger Allen, lately Minister at H.M. Embassy in Bonn; Mr. P. H. Gore-Booth, lately H.M. Ambassador in Rangoon; Mr. E. M. Jones, Director of Government Communications Headquarters, Foreign Office; Mr. G. C. Pelham, H.M. Ambassador in Prague; Mr. D'Arcy Reilly, Deputy Under-Secretary of State, Foreign Office.

Colonial Office List. Mr. Adetokunbo Ademola, Chief Justice, Western Region, Nigeria; Mr. A. J. Ainley, Chief Justice, Eastern Region, Nigeria; Mr. Oswald Arthur, Governor-designate of the Bahamas; Mr. E. B. Cottrell, for public services in Gibraltar; Mr. Colville Deverall, Governor of the Windward Islands; Mr. Maurice Dorman, Governor of Sierra Leone; Mr. Leonard Hannays, Q.C., for public services in Trinidad; Mr. A. F. Kirby, general manager, East African Railways and Harbours Administration; Mr. Amar Nath Malni, for public services in Uganda; Brigadier William Scupham, for public services in Tanganyika; Mr. Douglas Waring, for public services in the Federation of Malaya; Mr. Ernest Williams, Chief Justice of Sarawak, Brunei, and North Borneo.

Commonwealth Relations Office List. Mr. J. C. Burns, representative in Bombay of James Finlay & Co. Ltd.; Mr. R. K. Green, Senior Puisne Judge of the Supreme Court of Tasmania; Mr. W. S. Kent Hughes, Minister for the Interior and Works, Commonwealth of Australia, 1951-55; Mr. W. J. Jungwirth, Permanent Head of the Premier's Department, Victoria, Australia; Mr. J. G. B. McDonald, formerly Premier of Victoria; Professor M. L. Mitchell, Professor of Biochemistry and Deputy Vice-Chancellor, University of Adelaide, South Australia; Professor G. W. Paton, Vice-Chancellor of the University of Melbourne.

[Mr. Kent Hughes was chairman of the Organizing Committee for the Melbourne Olympic Games. Mr. McDonald and Mr. Jungwirth were also prominently associated with the preparations for the Melbourne Olympiad.]

Royal Navy List, Army List, and Royal Air Foce List. Recipients of knighthoods in the armed forces included Vice-Admirals J. W. Cuthbert and J. P. L. Reid, Lieutenant-Generals R. H. Bower, W. A. Drummond, C. R. Hardy, and W. H. Stratton, and Air Marshals the Earl of Bandon (C.-in-C., 2nd Tactical Air Force), Andrew McKee (A.O.C.-in-C., Transport Command), H. L. Patch (C.-in-C., Middle East Air Force), and G. W. Tuttle (Deputy Chief of Air Staff).

Commonwealth of Australia List. Mr. G. J. Coles, a director of the National Bank of Australasia, for public services; Vice-Admiral R. R. Dowling, First Naval Member and Chief of Naval Staff, Royal Australian Navy; the Hon. Josiah Francis, Australian Consul-General at New York, formerly Federal Minister for the Army and Navy; Mr. Lionel Hooke, managing director of Amalgamated Wireless (Australasia) Ltd., for public services; Dr. L. H. Martin, Professor of Physics, University of Melbourne, and Defence Scientific Advisor to the Australian Government; Mr. L. G. Melville, Vice-Chancellor of the Australian National University, Canberra; the Hon. W. F. L. Owen, Judge of the Supreme Court of New South Wales; Mr. Thomas Playford, Premier of South Australia; Mr. W. M. Tooth, of Hamilton, Queensland, for public and philanthropic services.

New Zealand List. Mr. Justice (Joseph) Stanton, Second Senior Puisne Judge of the N.Z. Supreme Court; Mr. Leonard Wright, Mayor of Dunedin.

D.B.E. Awards. The D.B.E. was conferred upon Sylvia, Viscountess Kilmuir (wife of the Lord Chancellor), formerly vice-chairman of the Conservative Party Organization, for political services; Commandant Nancy Margaret Robertson, Director of the Women's Royal Naval Service; and Dr. Janet Vaughan, Principal of Somerville College, Oxford.

C.B.E. Awards. Recipients of the C.B.E. included Mr. Harold Abrahams, secretary of the National Parks Commission; Mr. Cecil Beaton, the photographer and designer; Mr. Lennox Berkeley, the composer; Mr. Basil Cameron, the conductor; Mr. Donald Campbell, holder of the world water-speed record; Mr. Richard Church, the novelist, essayist and poet; Mr. Prince Littler, the impresario; Mr. Stanley Matthews, for services to association football; Mr. Robert Morley, the actor-dramatist; Mr. John Morris, Controller of the Third Programme, B.B.C.; and Lady Reading (wife of the Minister of State, Foreign Office), for services to child welfare.

[Mr. Harold Abrahams, a former Olympic sprinting champion, captained the British Olympic athletics team in 1928. Mr. Donald Campbell broke his own world water-speed record in September last on Coniston Water, in his jet-powered speedboat *Bluebird* (see 15111 B). Mr. Stanley Matthews, the Blackpool and England footballer, has 51 international caps and is still England's outside-right at the age of 41; he recently celebrated his silver jubilee in association football.]

Of the two barons created in the Birthday Honours of 1955 (see 14905 A) Sir Henry Cohen took the title of Baron Cohen of Birkenhead, of Birkenhead in the County Palatine of Chester; and Lieutenant-General Sir Ronald Weeks took the title of Baron Weeks, of Ryton in the County Palatine of Durham. (Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - New Zealand High Commissioner's Office, London) **(Prev. rep. Birthday Honours, 14905 A.)**

B. GUATEMALA. — Ending of State of War with Germany. - Lifting of Trade Restrictions.

A decree terminating the state of war between Guatemala and Germany was published in the Guatemalan Official Gazette on Nov. 28, 1956, and came into effect on Dec. 8. It was announced at the same time that restrictions on trade with Germany had been lifted.

As regards former German property seized during the war, the decree gave the Executive discretionary powers to return one dwelling-house to each former owner; to liquidate, transfer, or return commercial establishments as the case might require, no claims for damages being, however, admitted; and to expropriate properties where the owners had resorted to fraudulent transfers in order to evade confiscation. All life insurance policies would be returned to their holders, but (with the exception of the above-mentioned classes of property) all other German properties expropriated during the war would be retained by Guatemala.

It was also announced that Guatemala did not intend at present to establish diplomatic relations with Germany.
(Bank of London and South America, Fortnightly Review)

JANUARY 19—26, 1957

A. FRANCE - NORTH AFRICA. — Meetings between French Socialist Party and Algerian Nationalists. - Proposals by Sultan of Morocco and Prime Minister of Tunisia for Mediation in Algerian Problem. - Algerian Nationalist Delegation visits Rabat. - French Government suspends Negotiations with Morocco. - Arrest of Algerian Nationalist Leaders. - M. Mollet's Statement to French Assembly. - Joint Declaration by Moroccan and Tunisian Governments. - Anti-French Demonstrations in Morocco, Tunisia, and Middle East. - The Meknès Riots.

Following a series of secret meetings between representatives of the French Socialist Party and the Algerian National Liberation Front (F.L.N.), Prince Moulay Hassan, the eldest son of the Sultan of Morocco, and M. Bourguiba, the Tunisian Prime Minister, visited Paris during September and October 1956 to discuss with the French Government the possibility of a mediated settlement in Algeria. Five prominent members of the F.L.N., including its military leader, M. Ben Bella, and its political leader, M. Khider, arrived in Rabat from Cairo on Oct. 20 as guests of the Sultan, whom it was proposed that they should accompany to Tunis in order to take part in a conference between the Moroccan and Tunisian Governments. On Oct. 22, however, the French pilot of the plane in which they were flying to Tunis, acting on orders from the French authorities in Algeria, diverted the plane to Algiers, where the five F.L.N. leaders were arrested. The Tunisian and Moroccan Governments recalled their Ambassadors in Paris as a protest against the arrests.

Details of these developments, the events leading up to them, and their repercussions in France, Morocco, Tunisia, and the Middle Eastern countries, are given below under cross-headings.

Negotiations between French Socialists and Algerian Nationalists.

M. Mohammed Yazid, the F.L.N.'s representative in New York, disclosed on Oct. 26 that a series of meetings had taken place between the leaders of F.L.N. and prominent members of the French Socialist Party, including its acting secretary-general, M. Pierre Commin. M. Yazid said that the Algerian leaders had assumed that these talks were semi-official, and that M. Commin was acting as the representative of M. Mollet, the French Premier. He claimed also that the French delegates had accepted the principle of discussions with the F.L.N. and the "National Liberation Army," without the precondition—previously insisted on by the French Government—of a cease-fire with no political stipulations attached.

M. Commin confirmed on the following day that he had taken part in such discussions, and that he had met M. Yazid and two other F.L.N. leaders (M. Khider and M. Kiouane) in Rome at the beginning of September. He denied, however, that the talks had been in any sense of an official character, although M. Mollet had been kept informed of them. Contrary to M. Yazid's assertions, the French representatives had emphasized the necessity for a cease-fire without political conditions, but the Algerian spokesmen had declined to agree to this.

The Tunisian weekly *L'Action* (the organ of the ruling Néo-Destour party), stated on Jan. 3, 1957, that the first meeting had taken place in Cairo on April 12, 1956, at the request of M. Pineau, who had suggested it to President Nasser during his visit to Cairo in March, and that France had been represented by two Socialists personally accredited by M. Mollet. The second meeting was said to have taken place in Belgrade on July 7, M. Mollet being represented by M. Commin; the third in Rome on Sept. 2, as confirmed by M. Commin; and the fourth again in Belgrade on Sept. 22.

Moroccan and Tunisian Proposals for Mediated Settlement.

The Sultan of Morocco made his first public pronouncement on the Algerian question in a speech at Oujda on Sept. 25, 1956, in which he appealed to "men in responsible positions to bring the bloodshed in Algeria to a speedy end so as to establish firm relations between the two peoples and to find a solution which, while giving satisfaction to the Algerian people's aspirations for freedom, will respect the higher interests of France and guarantee the interests of Frenchmen who have chosen to settle in Algeria."

The Sultan expressed his belief that "the French people, who have shown an understanding and liberal attitude toward the peoples of Tunisia and Morocco, will approach the Algerian problem with the same understanding and realism." He added: "Whatever concerns Algeria has profound repercussions in Morocco, because of the close bonds and affinities between the two peoples, as well as their geographical vicinity. That is why the return of peace in Algeria remains a major preoccupation for us. It is a question of our security, of the stability of the whole of North Africa, and of the future of the friendly relations which the three countries sincerely wish to maintain with France."

Prince Moulay Hassan flew to Paris on Sept. 27, accompanied by M. Balafrej, the Moroccan Foreign Minister. During his visit, which ended on Oct. 9, the Prince was received by President Coty and had discussions with members of the French Government and with other leading political figures, including M. Mendès-France, M. Edgar Faure, and General de Gaulle.

The Prince subsequently stated on Oct. 25 that M. Mollet had invited him to bring the F.L.N leaders to Paris for discussions; had disclosed that he (M. Mollet) had himself been in contact with them; and had given his complete approval to a proposal by the Prince that they should take part in a conference at Montreux on the Algerian question. Prince Moulay Hassan's statement was, however, officially denied by the French Prime Minister's Office.

M. Bourguiba also visited Paris from Oct. 6-11 for talks with M. Mollet and other French political leaders, during which he put forward proposals for a settlement on the basis of the recognition by France of Algeria's right to independence.

In a statement issued on Oct. 9 M. Bourguiba said that he had "not concealed from the French leaders how disturbing the Algerian situation is for Tunisia, as peace in North Africa is to some extent indivisible." In an interview with *Le Monde* M. Bourguiba explained that he considered it necessary "to recognize formally and explicitly, not Algeria's immediate independence, but her right to independence." He expressed the opinion that the situation in Algeria was deteriorating, and that if the rebellion continued "revolutionary convulsions" would drag down first "the present régimes at Rabat and Tunis" and then France herself. If France recognized Algeria's right to independence, he was confident that the nationalists would accept a cease-fire, after which negotiations would be possible.

Talks between Sultan of Morocco and Algerian Leaders. - France suspends Negotiations with Moroccan Government.

The five Algerian leaders arrived in Tetuan on Oct. 20 from Cairo, were welcomed by Prince Moulay Hassan, and flew with him to Rabat. During the next two days they had meetings with the Sultan and the Moroccan Premier, Si Bekkai, but, in order to avoid offending French opinion, all the meetings took place at night and no witnesses were present. After these discussions the Sultan issued a communiqué reaffirming his view that a fundamental unity existed between the North African countries, and calling on "all men of goodwill" to unite their efforts to end the Algerian rebellion.

The French Foreign Ministry announced on Oct. 22 that the Government had decided to suspend all negotiations with Morocco, as a protest against the Sultan's reception of the Algerian nationalist leaders. The following statement was issued in Paris:

"The French Government understands the interest in Algeria's future felt in Morocco. The Sultan of Morocco could indeed usefully employ his great moral authority to make those concerned understand that the French offers of a cease-fire are sincere, and that they should be answered so as to reach a solution. On the other hand, it appears inconceivable to the French Government that the leaders of the Algerian rebellion should form the object of official demonstrations on the part of the Moroccan authorities . . . Recent events have caused the French Government grave concern. If the next few days were to confirm these fears, it would serve no purpose to continue the elaboration of [Franco-Moroccan] agreements involving such commitments for the future as conventions on technical assistance and finance."

Sultan of Morocco's Visit to Tunis. - Joint Tunisian-Moroccan Declaration on Algeria.

The Sultan of Morocco, accompanied by Prince Moulay Hassan, Si Bekkai, and M. Balafrej, flew to Tunis on Oct. 22 for discussions with M. Bourguiba and other Tunisian leaders on the Algerian situation and other matters of North African interest. A joint statement was issued on Oct. 25 expressing the "complete agreement" of the two Governments on the Algerian question, and their "entire solidarity with the Algerian people in their efforts to obtain their freedom." The statement added that Morocco and Tunisia would "concert appropriate measures which will serve the interests of the brother-countries of the *Maghreb* pending the signing of a treaty of alliance and co-operation which the two Governments have agreed to conclude."

Arrest of Algerian Nationalist Leaders.

Meanwhile the five Algerian leaders visiting Morocco had also left Rabat on Oct. 22, in a plane belonging to the Moroccan Government, to take part in the Tunis negotiations between the Sultan and M. Bourguiba. The machine, however, was intercepted by the French authorities and made to land at Algiers, where the five men were arrested and documents in their possession impounded.

The circumstances in which the plane was intercepted over the Mediterranean and diverted to Algiers remained obscure, nor was it known whether the action had been taken with the official knowledge or approval of the French Government. *Le Monde* commented as follows on Oct. 25:

"The circumstances surrounding the capture of the F.L.N. leaders are little known. The matter seems to have been directed by the Air Security service at Algiers on the orders of General Lorillot, the C.-in-C. in Algeria. The crew of the aircraft had absolutely no knowledge of the projected operation . . . The pilot, Commandant Grelier, was believed to have received a warning from the French air security service before the plane arrived at Palma de Majorca [for refuelling] . . . He apparently informed his chiefs in Rabat of this warning, as it was his duty to do . . . [and] . . . it seems that the Moroccan authorities then ordered him to remain at Palma. The Sultan, who had meanwhile arrived at Tunis, was understood to have informed M. de Leusse [French Ambassador to Tunisia] of the incident, and it is believed that M. de Leusse then telephoned M. Savary. It is thought that the State Secretary for Tunisian and Moroccan Affairs [i.e. M. Savary] tried to prevent an operation of which he disapproved . . . Meanwhile Commandant Grelier had apparently left Palma and, it seems, had decided to carry out the orders of Air Security. After being followed at a distance by machines from Oran, Blida, and Algiers, it is believed that he was contacted on arrival over territorial [i.e. Algerian] waters by another plane which instructed him to land at Maison-Blanche [Algiers airport]."

The interception of the plane—which the Moroccan Government described as "an act of piracy"— raised a complicated question of international law, since the French Government is a signatory to the Chicago Convention of 1944 guaranteeing to foreign aircraft the right of free passage in time of peace. As the French Government does not regard Algeria as being in a state of war, and does not recognize the Algerian rebels as belligerents, it was argued in Rabat that to force a plane owned by the Moroccan Government to land on French territory constituted a breach of the Chicago Convention—the more so as the machine was flying over the open sea. Moreover, it was claimed that the plane formed part of the Sultan's official suite and was therefore entitled to the immunity accorded to the suite of a Chief of State. In Paris, however, it was pointed out by experts that the plane bore a French registration marking, that there was no Moroccan register of aircraft, and that the French authorities were therefore legally justified in their action, since the plane was of French registration.

During the night of Oct. 27-28 the five arrested men were flown from Algiers to Paris, where they were held in the Santé prison. On Oct. 29 they were charged with the capital offence of attempted demoralization of the Army and the nation—specifically, with organizing the distribution of subversive leaflets in Algiers.

The documents found in their possession, according to unofficial reports, included directives issued by M. Ben Bella to the F.L.N., ordering them to have no dealings with the rival Algerian National Movement led by M. Messali Hadj; a report on the increasing lack of morale in the rebel forces; plans for military operations on the Moroccan frontier and for attacks on police headquarters in Algiers and Oran; notes on the discussions with the Sultan and Prince Moulay Hassan, and on the subjects to be discussed in Tunis; and lists of political and military leaders of the F.L.N. and of Frenchmen and Moslems who were in contact with them.

The arrested nationalist leaders were M. Mohammed Ben Bella, M. Khider, M. Boudiaf, Dr. Hocine, and M. Lachenaf, of whom biographical details are given below:

M. Mohammed Ben Bella (39), served in the French Army as a sergeant-major during the Second World War, winning the *Médaille Militaire* and being four times mentioned in despatches. After the war he joined the Movement for the Triumph of Democratic Liberties (M.T.L.D.), and in 1949 took command of its paramilitary section—the "Special Organization" or "O.S.," which reached a strength of 1,800 men. For leading an attack in 1949 on a military post in Oran he was sentenced in 1952 to seven years' imprisonment, but escaped from prison within a few days and was subsequently sentenced to life imprisonment *in absentia* on another charge. After some months in hiding he fled to Cairo, where he played a leading part in founding the "Revolutionary Committee for Unity of Action" (C.R.U.A.) which organized the Algerian rebellion.

M. Mohammed Khider (45) was elected as an M.T.L.D. deputy for Constantine in 1946, joined the O.S., and took part in the Oran raid in 1949. He escaped to Cairo in 1951, being sentenced to life imprisonment *in absentia*, and later assumed the leadership of the political committee of the F.L.N.

M. Mohammed Boudiaf, a former member of the central committee of the M.T.L.D., helped to found the C.R.U.A. after the split in the M.T.L.D. in 1954. **Dr. Ahmed Hocine,** a lawyer, is a member of the political committee of the F.L.N., which he has represented in the U.S.A. and at the Bandung Conference. **M. Mostafa Lachenaf,** a writer and journalist, lived until recently in Paris.

Reactions in France. - Resignation of M. Savary. - National Assembly Debate. - Statements by M. Mollet.

M. Savary (State Secretary for Moroccan and Tunisian Affairs) and M. de Leusse (French Ambassador in Tunis), both of whom were believed to favour a mediated settlement of the Algerian question, tendered their resignations to M. Mollet on Oct. 23. M. de Leusse, in his letter of resignation, deplored the apparent reversal of the Government's policy and protested against the situation in which he had been placed. The Government accepted both resignations, responsibility for Moroccan and Tunisian affairs being assumed on Nov. 14 by M. Maurice Faure, State Secretary for Foreign Affairs.

M. Mollet defended the arrests of the five Algerian nationalist leaders during a debate in the National Assembly on Oct. 23, held on a motion of confidence.

M. Mollet, after recalling the circumstances of the F.L.N. leaders' visit to Rabat, stated that the Government had warned the Moroccan Government several times of "the very grave consequences which any spectacular interference by Morocco in the Algerian problem would have for Franco-Moroccan relations." It had also warned Tunisia that the Algerian leaders' presence at the Tunis conference between the Sultan and M. Bourguiba would have "grave repercussions on Franco-Tunisian relations." The arrests, he added, "will certainly have diplomatic consequences; the Government has weighed their importance and is prepared to face them calmly. France is anxious to maintain relations of friendship and co-operation with Morocco and Tunisia. All her engagements remain valid. She understands the difficulties of these countries, and the interest which they take in the re-establishment of peace in Algeria. But she has the right to demand that they should reciprocate. It is impossible that friendly countries should behave like enemies."

M. Mendès-France (Radical) stressed the gravity of the possible consequences of the arrests; asked whether the Government had been "confronted with a *fait accompli*"; and declared: "The capture of the five rebel leaders and the methods employed for this purpose are pregnant with consequences. Were those who ordered it and carried it out in a position to assume such heavy responsibilities in France's name? In 1953 irresponsible officials deposed the Sultan; thousands of human lives paid for this madness, which still remains unpunished. Three years later, is the State still to allow itself to be made ridiculous?"

Referring to the forthcoming meeting of the U.N. General Assembly, M. Mendès-France continued: "It is for us, and for us alone, to conduct our affairs in such a way that we have no reason to fear any foreign interference, even from an ally. We must not forget that the Arab and Afro-Asian nations have a majority at U.N.O., and that the Latin American countries and the United States, in their anti-colonialism, will be unable to resist supporting the Afro-Asian point of view. It is difficult to suppose that Tunisia and Morocco can be insensible to affinities of religion and race. Apart from the vote at the U.N. on the Algerian question, it will be a terrible blow if these two States are led to disown us—and unfortunately this possibility must be feared."

M. Mollet, replying to the debate, stated that the civil and military authorities in Algeria had been responsible for the action taken, and that they had rendered their account for it to the head of the Government. "What happened to the rebels' aircraft," he declared, "was the same as what happened three days before to the *Athos* [see 15277 E]. I freely admit that we were some way outside our territorial waters. It was the Minister-Resident [M. Lacoste] who took the decision in the Government's name. I say this, not in order to evade my responsibility as head of the Government, but because I do not wish to take the credit for it."

Turning to relations with Tunisia and Morocco, M. Mollet continued: "We have made our position clear to the Sultan. We shall never accept a mediator. We have already refused others. The negotiations which will eventually take place will be direct and official. Through official Notes, which it is not customary to read in Parliament, we have told him that France could not permit a spectacular meeting between the rulers of Morocco and Tunisia and certain leaders of the F.L.N., which France would find shocking and provocative. We made the same viewpoint clear to the Tunisian Prime Minister . . ."

The motion of confidence approving the Government's policy on Algeria, the Suez dispute, and social and economic questions was adopted on Oct. 25 by 330 votes to 140, only the Communists and *progressistes* opposing. The 40 abstentions included 34 Poujadist deputies.

Although the Socialist deputies unanimously supported the Government in the division, the arrests were strongly criticized by a number of leading Socialists, including M. André Philip (a member of the party executive), who condemned them on legal, political, and moral grounds in an article published in *Le Monde*. M. Benbhamed, the former deputy for Constantine and a member of the Socialist Party for 30 years, announced on Oct. 26 that he had resigned from the party as a protest against "methods unworthy of a civilized State." He added that he was going to Cairo to join the F.L.N.

Reactions in Morocco. - The Meknès Riots.

As stated above, the Sultan of Morocco and his Ministers were in Tunis at the time of the arrest of the five Algerian nationalist leaders. During the night of Oct. 22-23 the Sultan telephoned President Coty from Tunis, demanded the immediate release of the F.L.N. leaders, and suggested the opening of negotiations on the Algerian question. On the following day Si Bekkai and M. Balafrej flew from Tunis to Paris with a Note setting out these proposals. M. Mollet, however, refused to accept this document, and the Moroccan Premier and Foreign Minister flew back to Tunis to continue their discussions with M. Bourguiba. The Sultan returned to Morocco from Tunis on Oct. 24, travelling in an Italian plane which landed at the U.S. air base at Port-Lyautey and not at a French airfield. The Moroccan Ambassador in Paris, M. Bouabid, was recalled to Rabat on Oct. 26.

Intense anger and indignation were aroused both in Morocco and in Tunisia by the arrest of the Algerian nationalist leaders. The Sultan's personal point of view was expressed in the following statement made by him to the French newspaper *Franc-Tireur* :

" This is the sharpest blow which could have been struck at my honour, not only as a sovereign but as a man. From the moral point of view it is more grave that the *coup d'état* of August 1953 [i.e. the Sultan's deposition]. It was then a question of a political conflict with France, but even in the darkest moments I never despaired or lost confidence in France . . . It was to show my confidence and to serve the cause of North African co-operation with France that I had agreed, with the French Government's official consent, to carry out this delicate mission of restoring peace in Algeria. The act which has been committed has struck a heavy blow at my confidence. I am suffering because men are in prison for having trusted me, for having accepted my word and my guarantee, knowing that I was seeking an honourable settlement for them and for France."

In protests against the arrests, the Istiqlal and the Moroccan Workers' Union (U.M.T.) called on the Moroccan Government to reconsider its policy toward France, whilst the right-wing Democratic Independence Party (P.D.I.) demanded the immediate evacuation of the French troops in Morocco. The Moroccan section of the French Socialist Party called for the release of the F.L.N. leaders and the punishment of those responsible for their arrest.

A general strike called by the U.M.T. was observed on Oct. 23 in all leading Moroccan cities, pro-Algerian and anti-French demonstrations taking place in Rabat, Casablanca, Marrakesh, Agadir, Tetuan, Tangier, and elsewhere. All the demonstrations were peaceful except at Meknès, where serious riots occurred in which over 30 Europeans were murdered.

The Meknès riots began when the commander of the municipal guard, a former officer of the " Liberation Army " was shot dead while dispersing unruly demonstrators. A Moroccan Government statement attributed his death to a revolver shot fired by a European, but French sources maintained that he had accidentally shot himself when striking a demonstrator with the butt-end of his carbine, and that this had been confirmed by the autopsy on his body. The municipal guard and the demonstrators thereupon attacked the houses from which it was thought the official had been shot, murdered Europeans in different parts of the city, killed European motorists passing through Meknès, and burned their bodies in their cars. French troops stationed in the area took over the protection of the European quarter and Moroccan troops also arrived to maintain order, but three further murders occurred on Oct. 25, the victims being two French policemen and a little girl. In the countryside near Meknès many European farms were attacked and set on fire, their occupants being murdered in several cases. The total number of casualties in the Meknès area was given on Oct. 26 as 47 Europeans killed and four missing.

Farms were also set on fire and a number of French settlers murdered between Oct. 25-29 in the neighbourhood of Port-Lyautey, Fez, and Fedala. These incidents were apparently the work of organized bands of incendaries, believed to be Algerians, working to a previously prepared plan, as many settlers had been warned beforehand by their employees. Intense anxiety was aroused by these disorders among the European community; women and children were sent back to France, many Frenchmen resigned from the police force, and over half the settlers in the Meknès area announced their intention of abandoning their farms and leaving the country.

Strong measures were taken by the Moroccan Government to restore order. Commandant Driss Ben Omar (of the Moroccan General Staff) was given supreme military and civil authority in the Meknès area on Oct. 27; over 1,500 arrests were made; and a decree was issued by the Sultan on Nov. 20 setting up military courts to try those responsible for the disorders. Three Moroccans who had been found guilty of murdering Europeans were executed by firing-squads at Meknès on Dec. 27, after the Sultan had refused to grant a reprieve. In a public speech on Nov. 18, the Sultan appealed to all foreign settlers to " pursue their constructive activities, which are very necessary to Morocco," and promised that their lives and property would be respected and protected.

A special French emissary, M. Jean Basdevant, arrived in Rabat on Oct. 30 and handed to Si Bekkai a letter from M. Mollet assuring the Moroccan Government of his desire to resume the negotiations which had been broken off on Oct. 22. A joint communiqué, issued by Si Bekkai and M. Basdevant on Nov. 1, expressed the hope that " the difficulties which have recently affected Franco-Moroccan relations " would be overcome, and stated that " the necessary measures to re-establish a normal climate of confidence between the two Governments have been considered." Later the same day, however, after M. Basdevant had left Rabat, the Moroccan Cabinet issued a statement announcing that it had pointed out to him that the arrest of the F.L.N. leaders constituted " a serious blow to the Sultan's honour and the sovereignty of Morocco," and had demanded their release as " the only possible solution."

Reactions in Tunisia. - M. Bourguiba's Denunciation of French Policy in Algeria. - Anti-French Riots in Tunis and Sfax.

M. Bourguiba, at a press conference on Oct. 23, denounced the arrest of the Algerian nationalist leaders as " a mistake which is worse than a crime," and announced that the Tunisian Ambassador in Paris, M. Belkhodja, had been recalled. [As stated below, however, a new Tunisian Ambassador to France was appointed in January 1957, a new French Ambassador to Tunisia being concurrently appointed by the French Government].

M. Bourguiba said that as a result of his conversations in Paris " a sort of moral pact " had been reached whereby the French Government had agreed that the F.L.N. leaders should take part in the Tunis conference, on condition that all publicity about their presence was avoided and that they did not appear on occasions when the French Ambassador was present. " If the trap has succeeded," he went on, " it is because we trusted to the agreement which had been reached between us and those we talked to in Paris . . . This mistake places France in a shameful position and will not stop the rebellion. It even threatens to spread it to the east and to the west of Algeria. It will turn every honourable man in the world against France and make them mistrust her word . . . "

As in Morocco, the arrests gave rise to widespread protest demonstrations. A general strike was observed throughout the country on Oct. 23, and in Tunis demonstrators attacked the French Embassy and broke the windows of French shops. Similar riots occurrered on the following day at Sfax, where a crowd broke into the French civil court and forced the president to suspend the sittings.

On Oct. 26-27 French troops came into conflict with civilian demonstrators who had erected barricades to hinder their movements at about 20 places near the Algerian frontier, around Tunis, in the Cape Bon area, and in southern Tunisia. At Bou-Arkoub (25 miles S.E. of Tunis) several people were injured when a convoy tried to force its way through a barricade; at Hamman-Lif (10 miles from Tunis) four civilians were killed in a similar incident; and at Mareth (southern Tunisia) a crowd attacked a French military convoy, killing five soldiers. The French military authorities alleged that Tunisian troops had witnessed several of the incidents but had made no attempt to intervene except when the French troops had defended themselves against attack.

M. Seydoux, the former French Ambassador in Tunis, arrived there on Oct. 30 on a similar mission to that undertaken by M. Basdevant in Morocco, and had two meetings with M. Bourguiba. M. Seydoux returned in December for further discussions as a result of which it was announced on Dec. 11 that the two Governments would shortly resume normal diplomatic contacts. On Jan. 23, 1957, it was announced that M. Georges Gorse (a former State Secretary for Moslem Affairs) had been appointed French Ambassador in Tunis in succession to M. de Leusse, and that M. Masmoudi (Minister of State in the Bourguiba Government) had been appointed Tunisian Ambassador in Paris in place of M. Belkhodja.

Reactions in Middle Eastern Countries. - Anti-French Riots in Jordan and Syria.

The arrest of the Algerian leaders also aroused strong feeling throughout the Arab countries of the Middle East, strikes and protest demonstrations occurring on Oct. 28 in Egypt, Libya, Syria, Jordan, and Lebanon. The demonstrations were of an orderly character except in Jordan and Syria, where serious riots broke out. In Amman, the capital of Jordan, some 3,000 demonstrators attempted to attack the French Embassy but were dispersed after a battle with the police in which 35 people were injured, while in the Jordanian sector of Jerusalem the French Consulate was sacked and burned down by a mob, 16 of whom were injured in clashes with the police. Two members of the Consualte staff were wounded. In Aleppo, demonstrators set fire to a French school and other institutions, the Syrian Government proclaiming a state of emergency after clashes between the mob and the police in which one person was killed and at least 25 injured.

New Leader of Algerian National Liberation Front.

It was announced in Cairo on Oct. 23 that Sheikh Ahmed Tewfik El-Medani—the former general secretary of the association of Algerian *ulema*, who had joined the F.L.N. in April 1956 (see 14913 A)—would act as leader of the movement for the time being. In a statement issued on Oct. 25 Sheikh El-Medani said that a conference of nationalist leaders held " somewhere in Algeria " had decided that the arrest of the five F.L.N. leaders would not affect military operations or political aims in any way, and that the recognition of Algerian independence, the release of all political prisoners, and the opening of negotiations between France and a provisional Algerian Government would remain the necessary prerequisites for a cease-fire.—(Le Monde, Paris - Le Figaro, Paris)

A. WESTERN GERMANY. — Trial of Dr. Otto John. - Sentence of Four Years' Penal Servitude.

The trial opened on Nov. 12, 1956, before the Federal Court in Karlsruhe, of Dr. Otto John, the former head of the Federal Office for the Protection of the Constitution, who had left West Berlin on July 20, 1954, for the Soviet sector of the city but had returned to the Western sector on Dec. 12, 1955. He had been under arrest since Dec. 23, 1955, on charges of treason and maintenance of treasonable relations.

The charges against Dr. John were based on certain statements made by him while in the East—in particular, the press conference which he gave in East Berlin on Aug. 1, 1954 (see 13851 A) and statements subsequently made when he was taken to the Soviet Union.

The indictment said that Dr. John had "voluntarily gone to the Soviet sector of Berlin, where he . . . decided to stay and carry out Communist propaganda activities against the Federal Republic . . . He had, for instance, asserted, publicly and contrary to the truth . . . that the West German judiciary was prevented by political pressure from functioning in accordance with legal democratic principles; that Chancellor Adenauer had instructed him to investigate the affairs of the Federal Minister for All-German Affairs [Herr Kaiser]; that the Gehlen [intelligence] organization was intensifying its activities in France—which, if true, would have been a State secret; and that there were secret clauses in the then projected European Defence Community treaty." The indictment pointed out that this latter allegation was true only insofar as an agreement existed concerning co-operation in intelligence work between the member-countries, which was intended to become effective when the treaty came into force—information which was also a State secret.

There was "sufficient ground" [the indictment continued] to charge Dr. John with responsibility for having, in the Soviet Zone of Germany and in the Soviet Union (1) established and maintained contact with the East German and Soviet authorities "with the intention of supporting efforts of those Governments aimed at impairing the security of the Federal Republic"; (2) made "untrue or grossly distorted statements" in pursuance of this intention; (3) betrayed State secrets through public disclosure or by giving information to unauthorized persons; and (4) "publicly declared to be true an untrue fact, which, had it been true, would have been a State secret" [i.e., the alleged activities of the Gehlen organization and the alleged secret clauses of the E.D.C. treaty].

Dr. John denied the charges of treason brought against him in the indictment.

Speaking in his own defence, Dr. John maintained that he had been abducted to East Berlin by Dr. Wohlgemuth a Berlin physician and an acquaintance of his—after having been drugged by Wohlgemuth, whom he had visited to discuss the compensation claim of a common acquaintance. Wohlgemuth, he alleged, had offered him some coffee and had then taken him away in his car on a pretext; during the car ride he had lost consciousness and recovered only 24 hours afterwards to find himself in the headquarters of the Soviet Administration in Eastern Germany, where he was kept under surveillance. Dr. John admitted that he had subsequently offered to work for the Russians, but explained that this seemed to him the only way to regain his freedom. He declared that his statements at the press conference of Aug. 1 and over the radio had been drawn up by the Russians, and, being in their hands, he had felt himself compelled to say what they wanted.

Referring to his interrogations by Soviet intelligence officers, which took place in Moscow and at a Black Sea resort between Aug. 24 and Dec. 12, 1954, Dr. John said that he had given certain relatively unimportant information to the Russians in order to win their confidence, since he was afraid that otherwise they might have drugged him and thus extracted vital secrets about his work. He admitted that he had given the Russians the names of two West German officials of the Federal Office for the Protection of the Constitution, but he had felt that he could safely do so without endangering the men because they were in Western Germany. The Russians had been mostly interested in his alleged relations with the British Intelligence Service, but had been satisfied with his explanation that he had never worked for Britain.

Dr. John also pointed out that in letters to his wife he had used the phrase "found himself compelled" to go to Eastern Germany, thereby clearly indicating to her that his presence there was not voluntary.

A large number of witnesses appeared during the hearings, which lasted for over six weeks.

Several of the witnesses—including Prince Louis Ferdinand of Prussia (a friend of the accused), Lieut.-Colonel Oster (a former head of the counter-intelligence department of the Federal Defence Ministry), Mr. Sefton Delmer (Berlin Correspondent of the London *Daily Express*), and Herr Egidi (a former head of the public security department of the Federal Ministry of the Interior, and now president of the Federal Administrative Court) expressed the view that Dr. John could not have gone to Eastern Germany voluntarily, as he had always been strongly opposed to Communism, and that, finding himself suddenly in Communist hands, he could not be blamed for the statements he had made.

On the other hand, Dr. Wohlgemuth's assistant testified that she had not tampered with the coffee she had made and handed to Dr. John during his visit to Wohlgemuth, nor had she seen anyone else do so. The Customs official who was stationed at the sector border when Wohlgemuth and John passed in the former's car said that he had warned the two men that they were entering East Berlin, that one of the men had said that it was exactly "where we want to go," and that both seemed to him fully conscious. Mr. Carl Robson, a British journalist, said that he had met Dr. John after the press conference in East Berlin, and on two later occasions, without receiving any indication from him that he was being kept in Eastern Germany against his will.

Many witnesses described Dr. Wohlgemuth as a "drawing-room Communist," and several gave the version which Wohlgemuth himself had given of the incident. According to this, Dr. Wohlgemuth had agreed to drive Dr. John into the Eastern sector of the city to meet a group of people who had taken part in the resistance movement against Hitler, and to visit his brother's grave. They had driven to the Charité Hospital, where they had been taken into another car and driven to a small villa. There Dr. John had talked privately with some of those present and had afterwards informed Dr. Wohlgemuth that he wished to remain in East Berlin a decision which had surprised him (Dr Wohlgemuth).

Dr. Wohlgemuth, who was summoned as a witness, failed to appear in court, explaining in a letter that he was not prepared to come because he had not received adequate assurances of safe-conduct. He alleged in this letter that Dr. John had gone to East Berlin of his own volition and had decided to stay there; this had created difficulties for himself (Dr. Wohlgemuth), so that he, in turn, had also decided to remain in the Soviet sector for fear of being implicated in the disappearance of Dr. John.

On Dec. 23 the court found Dr. John guilty of "treacherous falsification" and "treasonous conspiracy," and sentenced him to four years' penal servitude. The charge of "treasonous falsification" covered the statements made by Dr. John while in the East to the effect that the Gehlen agency had extended its activities in France, and that there were secret clauses in the E.D.C. treaty—items of information which, if true, would have been classed as State secrets. The second charge related to Dr. John's propaganda activities during his sojourn in the East, including his press conference, broadcasts, and writings.

The president of the court (Dr. Geier) said that it was of the opinion that Dr. John's claim to have been drugged and abducted into East Berlin was untrue and had been refuted. No-one could believe that the Communist authorities would have dared to arrange an international press conference for a man whom they had kidnapped only a few weeks earlier. Moreover, a witness had stated that Dr. John had told him in May 1955 that he entered Eastern Germany of his own free will and was in receipt of an East German pension, and the court considered that the accused had then spoken the truth. It was also highly improbable that Dr. Wohlgemuth was a kidnapper, as, in that case, he would not have behaved in a "suicidal" manner by returning to his home in West Berlin for several hours immediately after having driven the accused to East Berlin.

The court was satisfied, therefore, that Dr. John had gone to East Berlin of his own accord, but there was no proof that he had done so with treasonous intentions. It might well be supposed that he had originally not intended to stay there, and might have thought that he could establish contacts in the East and then return to the West. It was possible that his decision to stay had not been made without heavy pressure, but in the court's view such pressure had never amounted to a threat to life and limb. As regards the accused's return to the West in December 1955, this was no proof that he had been forcibly detained in the East. It could be far better explained by his growing disappointment with the East and with the pain he suffered at being separated from his wife.

The Federal Prosecutor had demanded a sentence of only two years' penal servitude, taking into account the 12 months Dr. John had already spent in custody. The court, however, thought that this would not be an appropriate punishment, and that a more severe sentence was necessary because of the important position held by Dr. John at the time he fled to the East. - (Frankfurter Allgemeine Zeitung) **(Prev. rep. 14609 B.)**

B. SCOTLAND. — Press. - Glasgow "Evening News" ceases Publication.

The Glasgow *Evening News*, one of the city's three evening papers, ceased publication on Jan. 17 after a life of about 90 years. In its last issue, the *Evening News* stated: "Glasgow has been until now the only city in the United Kingdom outside of London to publish three evening papers. That is no longer economically possible."

It was announced that the *Evening News* had been acquired by George Outram and Co. Ltd., publishers of the *Glasgow Herald* and the *Glasgow Evening Times*, and would be amalgamated with the latter paper. The Outram company took over the *Evening News* from the Daily Mirror and Sunday Pictorial companies, which had purchased it in 1955 from Kemsley Newspapers. A managerial statement to the staff of the *Evening News* explained that the paper had been "running at a very substantial loss and losing money steadily for more than five years."

The other Glasgow evening newspaper is the *Evening Citizen*, published by Beaverbrook Newspapers Ltd.
(Glasgow Herald - Times) **(Prev. rep. 15281 B; 15277 A.)**

A. UNITED KINGDOM. — Junior Ministerial Appointments. - Sir Edward Boyle joins Government.

The following junior ministerial appointments in Mr. Macmillan's Government were announced on Jan. 18:

Admiralty. Parliamentary and Financial Secretary—Mr. Christopher Soames (36) *vice* Mr. George Ward, now Secretary of State for Air; Civil Lord—Mr. T. G. D. Galbraith (39) *vice* Mr. Wingfield Digby.

Ministry of Agriculture, Fisheries, and Food. Joint Parliamentary Secretaries—Lord St. Aldwyn (44) and Mr. J. B. Godber (42).

There were formerly three Joint Parliamentary Secretaries—Lord St. Aldwyn (unchanged), Mr. George Nugent (now Joint Parliamentary Secretary to the Ministry of Transport) and Mr. Harmar Nicholls (now Parliamentary Secretary to the Ministry of Works).

Air Ministry. Parliamentary Under-Secretary—Mr. Charles Orr-Ewing (44) *vice* Mr. Soames, now Parliamentary and Financial Secretary to the Admiralty.

Colonial Office. Parliamentary Under-Secretary—Mr. J. D. Profumo (41) *vice* Lord Lloyd.

Commonwealth Relations Office. Parliamentary Under-Secretary—Mr. J. C. M. Alport (44) *vice* Lord John Hope, now Joint Parliamentary Under-Secretary at the Scottish Office.

Ministry of Defence. Parliamentary Secretary—Lord Mancroft (42) *vice* Lord Gosford, now Joint Parliamentary Secretary at the Foreign Office.

Ministry of Education. Parliamentary Secretary—Sir Edward Boyle (33) *vice* Mr. Dennis Vosper, now Minister of Health.

Foreign Office. Joint Parliamentary Under-Secretaries—Lord Gosford (46) and Mr. Ian Harvey (42) *vice* Mr. David Ormsby-Gore (now Minister of State for Foreign Affairs) and Mr. Dodds-Parker.

Ministry of Health. Parliamentary Secretary—Mr. J. K. Vaughan-Morgan (47) *vice* Miss P. Hornsby-Smith, now at the Home Office (see below).

Home Office. Joint Parliamentary Under-Secretaries—Miss Patricia Hornsby-Smith (42) and Mr. J. E. Simon, Q.C. (46) *vice* Lord Mancroft (now Parliamentary Secretary to the Ministry of Defence) and Mr. Deedes.

Ministry of Housing and Local Government. Parliamentary Secretary—Mr. J. R. Bevins (48) *vice* Mr. Enoch Powell, now Financial Secretary to the Treasury.

Ministry of Labour and National Service. Parliamentary Secretary—Mr. Robert Carr (40). No change.

Ministry of Pensions and National Insurance. Joint Parliamentary Secretaries—Miss Edith Pitt (50) and Mr. Richard Wood (36). No change.

Post Office. Assistant Postmaster-General—Mr. Kenneth Thompson (46) *vice* Mr. Alport, now Under-Secretary at the Commonwealth Relations Office.

Ministry of Power. Parliamentary Secretary (new post)—Mr. David Renton (48), formerly Parliamentary Secretary to the Ministry of Fuel and Power.

Scottish Office. Joint Parliamentary Under-Secretaries—Lord John Hope (44) *vice* Mr. J. Henderson Stewart, Mr. J. N. Browne (52), and Mr. Niall Macpherson (46), the two last-named remaining unchanged.

Ministry of Supply. Parliamentary Secretary—Mr. W. J. Taylor (54) *vice* Mr. Ian Harvey, now Joint Parliamentary Under-Secretary at the Foreign Office.

Ministry of Transport and Civil Aviation. Joint Parliamentary Secretaries—Mr. George Nugent (49) and Mr. Airey Neave (40) *vice* Mr. Hugh Molson (now Minister of Works) and Mr. Profumo (now Parliamentary Under-Secretary at the Colonial Office).

War Office. Parliamentary Under-Secretary and Financial Secretary—Mr. Julian Amery (37) *vice* Mr. Fitzroy Maclean.

Ministry of Works. Parliamentary Secretary—Mr. Harmar Nicholls (44) *vice* Mr. Bevins, now Parliamentary Secretary to the Ministry of Housing and Local Government.

Of the 29 Ministers listed above, 14 held other posts in Sir Anthony Eden's Government, eight continued in their former offices, and seven entered the Government for the first time. A feature of the new appointments was the entry into the Government of Sir Edward Boyle, who had resigned from the Eden Government in protest against the Anglo-French intervention in Egypt (see 15198 A), and of Mr. Julian Amery, one of the strongest supporters of the intervention in Egypt, and a leader of the Conservative "Suez group." Mr. Amery was one of the 15 Conservative back-benchers who abstained from voting on Dec. 6 on the motion approving the Government's policy of terminating the armed intervention in Egypt.

Commenting on the inclusion of Sir Edward Boyle and Mr. Amery in the new Government, the *Daily Telegraph* wrote: "The fact that both men have accepted office under Mr. Macmillan is strong evidence that the rift in the [Conservative] party over military intervention in Egypt is closed by his appointment as Prime Minister."

In a press statement on Jan. 18, Sir Edward Boyle said that he had never regretted his decision to resign from Sir Anthony Eden's Government on the Suez issue, and would "not unsay one word" of what he had said on that subject. Referring to Mr. Macmillan's broadcast of Jan. 17 (see page 15314), Sir Edward expressed his "warmest possible support" for all the objectives which Mr. Macmillan had outlined.

Sir Edward Boyle (33) is the youngest member of the Government. Mr. Julian Amery is a son of the late Conservative statesman (Mr. Leopold Amery) and a son-in-law of Mr. Macmillan. Among the other new junior Ministers, Mr. Orr-Ewing, an electrical engineer, served in the R.A.F. throughout the war; Mr. Godber is a nurseryman, and was a member of the Tomato and Cucumber Board; Mr. Vaughan-Morgan, a company director, was recently chairman of the Conservative Health Committee; Mr. Simon, Q.C., chairman of the Inns of Court Conservative and Unionist Party, led the campaign in the House of Commons against Mr. Silverman's Bill to abolish capital punishment; and Mr. Airey Neave is a barrister and author.

The six junior Ministers leaving the Government were Mr. J. Henderson Stewart (Joint Under-Secretary for Scotland since 1952), Lord Lloyd (Under-Secretary for the Colonies since 1954), Mr. Fitzroy Maclean (who, for personal reasons, had asked Mr. Macmillan not to take him into consideration when forming his Government), Mr. Wingfield Digby, Mr. Dodds-Parker, and Mr. Deedes.

Lord Lloyd, in addition to being Under-Secretary at the Colonial Office, had also been responsible for Welsh affairs as Joint Under-Secretary at the Home Office. It was explained that only one Parliamentary Secretary had been appointed to the Ministry of Housing and Local Government because the Minister (Mr. Henry Brooke), in his joint capacity as Minister for Welsh Affairs, would himself be responsible for all matters affecting the Principality.

A baronetcy was conferred on Mr. James Henderson Stewart on relinquishing the post of Joint Under-Secretary for Scotland.

The Government was completed on Jan. 19 by the following appointments to the Treasury and the Royal Household:

Lords Commissioners of the Treasury—Mr. Martin Redmayne, Mr. Peter Legh, Mr. E. B. Wakefield, and Colonel J. H. Harrison; Lords-in-Waiting (Royal Household)—Lord Hawke, Lord Fairfax of Cameron, and Lord Chesham, Captain of the Gentlemen-at-Arms—the Earl of Fortescue; Captain of the Yeomen of the Guard—the Earl of Onslow; Treasurer of the Household—Mr. H. D. Oakshott; Comptroller of the Household—Mr. Gerald Wills; Vice-Chamberlain—Mr. R. H. M. Thompson.

The only changes were the appointment of Mr. H. D. Oakshott as Treasurer of the Royal Household in succession to Mr. T. G. D. Galbraith, now Civil Lord of the Admiralty; and of Mr. Gerald Wills as Comptroller of the Royal Household *vice* Mr. Oakshott.

It was announced on Jan. 22 that Sir Percy Mills, the Minister of Power, had taken the title of Baron Mills, of Studley in the County of Warwick. Sir Percy Mills was created a baron on his appointment to the Cabinet.—(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times) **(15313 A.)**

B. AUSTRALIA. — Press. - Melbourne "Argus" ceases Publication.

The Melbourne *Argus*, founded in 1846, ceased publication on Jan. 19 after a life of 110 years. It had been formed into a public company in 1936, when it was sold by its then proprietors, Messrs. Wilson and Mackinnon. In 1949 the controlling interests in the company were purchased by Daily Mirror Newspapers Ltd. and Sunday Pictorial Newspapers (1920) Ltd., of London.

The two latter companies issued a statement in London on Jan. 18 saying that it had been decided to close down the Melbourne *Argus* because of "continued trading losses." The announcement added:

"To ensure continuance of the *Argus* company's other activities, the Daily Mirror and Sunday Pictorial companies have arranged to dispose of their controlling interest in the Argus and Australasian Ltd. to the Herald and Weekly Times Ltd., of Melbourne. The consideration will be satisfied by an issue to the Daily Mirror and Sunday Pictorial companies of fully paid Ordinary shares of 5s. Australian (having restricted voting rights) of the Herald and Weekly Times Ltd. capital. Such issue will be based on a valuation for the combined loan and Ordinary share interests in the Argus company of £A1,400,000."

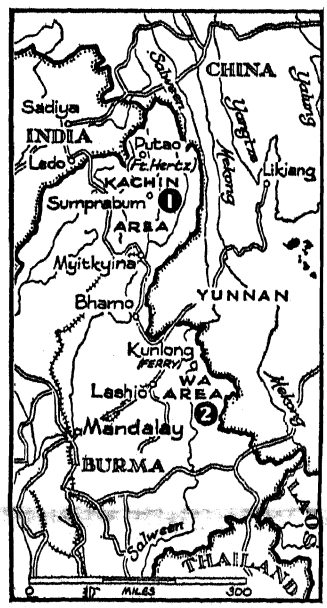
The *Argus* was the oldest newspaper in Melbourne, and one of the oldest in Australia.—(Times - Sydney Morning Herald)

C. INDIA. — Opening of Jawahar (Banihal) Tunnel.

The first tube of the Banihal tunnel, providing an all-weather link between the Kashmir Valley and the Punjab, was officially opened by the Indian Vice-President (Dr. Radhakrishnan) on Dec. 22, and was named the Jawahar Tunnel in honour of the Prime Minister of India, Mr. Jawaharlal Nehru. The tunnel—which is over 1½ miles long, and the second tube of which is still under construction—will be Asia's longest road tunnel and will reduce the distance between Srinagar and Jammu by 18 miles. It replaces the old road tunnel which ran through the Pir Panjal range about 2,000 feet higher, and which was usually snowbound during the winter. The project, which is being built with the assistance of a German engineering firm at a cost of nearly Rs. 30,000,000, incorporates some of the latest developments in tunnel construction, and is due for completion in 1959.—(The Statesman, Calcutta) **(Prev. rep. 14656 A.)**

A. BURMA - CHINA. — Border Dispute. - Chinese Troops enter Wa State. - Talks between U Nu and Chou En-lai. - Chinese Proposals for Settlement. - Withdrawal of Chinese Troops from Occupied Areas. - Chou En-lai's Visit to Burma.

The Burmese Foreign Ministry, in a communiqué issued on July 31, 1956, stated that Chinese troops had entered Burmese territory and established outposts in the Wa State (on the Chinese frontier east of Mandalay). The statement added that the Burmese Government was "seriously concerned" at this development and had brought the matter to the attention of the Chinese Government. Denying reports of the incursion of several thousands of Chinese troops, which had been published in several Rangoon newspapers, the Burmese Prime Minister (U Ba Swe) said at a press conference on Aug. 7 that there were about 500 Chinese troops on Burmese territory, scattered over an area of 700 to 1,000 square miles. He expressed confidence that a peaceful settlement could be achieved through diplomatic means.



The map shows the areas in the Kachin State (1) and the Wa State (2) which are disputed by Burma and China. (*New York Times*)

The frontier between China and the Wa State (the Premier explained) had been demarcated by agreement between the British Government and the Chinese Nationalist Government in 1941, although it had not been physically marked. In the Burmese Government's view, the present Chinese Government should respect the demarcation line agreed to by its predecessor, and should withdraw its troops before initiating further negotiations on the subject. U Ba Swe added that the Burmese Ambassador in Peking had been recalled for consultations, and that Burma was consulting India and other friendly countries on the matter.

U Ba Swe subsequently stated on Sept. 4 that talks were in progress between Burma and China, and announced on Oct. 2 that the Chinese Government had agreed to withdraw its troops to the 1941 boundary line; at the same time he denied press reports that Chinese forces had entered the autonomous Kachin State, in northern Burma.

At the Chinese Government's invitation, U Nu, the former Burmese Premier, arrived in Peking on Oct. 23 for discussions with the Chinese Prime Minister, Mr. Chou En-lai. A joint statement issued on Nov. 9 said that the Chinese Government had put forward "fair and reasonable proposals which take into account the interests of both sides," and which the Burmese Government had agreed to consider. The two Governments had also agreed that all Chinese troops should withdraw from the area west of the 1941 line before the end of the year, and that Burmese troops should withdraw from the villages of Hpimaw, Kangfang, and Gawlum, in Kachin State. The Chinese forces completed their withdrawal from the former area on Dec. 12, 1956.

In a broadcast from Rangoon on Nov. 10, U Nu summarized the historical background of the dispute and gave details of the Chinese proposals. These envisaged a definitive settlement of the frontier between the two countries, on which complete agreement had never been reached; the recognition of China's claim to the villages of Hpimaw, Gawlum, and Kangfang, which command seven high mountain passes into China; and the termination of the arrangement whereby the Namwan Assigned Tract [in the disputed area] had been leased by China to Burma.

Soon after the British annexation of Burma in 1886, U Nu stated, negotiations on the undefined border had been opened; as a result, agreement had been reached in 1897 that the eastern border should run south of latitude 25 deg. 35 min. N., just north of Myitkina. This border had been demarcated by 1900 except for the boundary of the Wa State, which had remained undecided until 1941, when the British and Chinese Governments reached an agreement on it. As regards that section of the border north of latitude 25 deg. 35 min., the British Government had informed China in 1906 that it would regard the watershed between the N'mai Kha and Salween rivers as the north-eastern frontier of Burma, whereupon the Chinese claimed that they had rights to territories west of this line, including Hpimaw, Gawlum, and Kangfang. In a Note of April 10, 1911, the British Government had rejected the Chinese claims except in regard to these three villages, in return for the cession of which it offered to pay monetary compensation. When this offer was refused, British troops had occupied the villages in 1913, an action which provoked deep resentment in China.

In 1914, as a result of negotiations on the delimitation of the border between Assam and Tibet, British, Tibetan and Chinese representatives had agreed on the "McMahon Line" as Burma's northern frontier. The Chinese Government, however, had disavowed its representative's action and refused to ratify the convention, although effect was given to it by the British and Tibetan Governments. Thus, when Burma became independent in 1948 the frontier north of latitude 25 deg. 35 min. had not been accepted by any Chinese Government, and Chinese maps continued to claim a great part of this area.

U Nu explained that Mr. Chou En-lai had agreed to accept the 1941 frontier of the Wa State, although he considered that it had been unfairly imposed upon China while she was under Japanese attack. Moreover, he had also agreed to recognize the McMahon Line and the N'mai Kha-Salween watershed as marking the frontier north of latitude 25 deg. 35 min. He had, however, made two reservations: (1) he had claimed that Hpimaw, Gawlum, and Kangfang were Chinese territory, a claim which was supported by the British Note of April 10, 1911, and should therefore be returned to China; (2) he had asked that the lease of the Namwan Assigned Tract (an area of about 100 square miles near Bhamo, which was recognized as Chinese territory but which had been under perpetual lease to British Burma) should be abrogated, pointing out that the nominal annual rent paid for it had been refused by the former Nationalist Government in 1948.

As both these areas formed part of the Kachin State (U Nu continued), he had asked a number of Kachin leaders to take part in the talks in Peking; U Zanhta Sin, the head of the State, had said, however, that he was not in a position to give an immediate answer, and discussions with the Kachin leaders were continuing. Meanwhile it had been agreed with Mr. Chou En-lai that Burmese troops should not enter that part of the Wa State evacuated by Chinese troops until the boundary had been delimited; that the area would remain under Burmese administration; and that Hpimaw, Gawlum, and Kangfang would also remain under Burmese administration until a final settlement had been reached.

U Nu expressed the opinion that the Chinese claims were "fair and reasonable," emphasizing that Namwan had never been Burmese territory and that the British had not denied that China had claims to the three disputed villages. "Burma," he concluded, "should not retain what she does not own. In all history, never has a boundary been completely settled between China and Burma. A friendly settlement will be an achievement . . . I realize that it is always hard to part with what we have, or what we think we own. But it is better to give up what is not ours rather than allow such property to become a bone of contention . . . In regard to Namwan . . . we must leave it to the friendly feelings of the Chinese to consider what they would do with it . . ."

Mr. Chou En-lai arrived in Rangoon on Dec. 10 for a ten-day visit to Burma. His arrival was made the occasion for a silent demonstration of protest against the proposed cession of the three villages by Kachin students, who carried placards bearing slogans such as "Friendship forever, cession never." In a speech on Dec. 11 Mr. Chou said that China must "make even more strict demands on herself to put resolutely into practice the principles of peaceful co-existence," and gave an assurance that China's policy towards Burma would not be actuated by "big-Power chauvinism."

The Chinese Premier, accompanied by U Ba Swe, Sao Hkun Hkio (Burmese Foreign Minister), and U Kyaw Nyein (Deputy Premier), flew on Dec. 15 to Mangshih, in Yunnan (China), for discussions on the border question, which were continued after their return to Rangoon. A joint statement issued on Dec. 20 said that talks, conducted "in a spirit of cordial and mutual understanding," had led to a further clarification of the Burmese and Chinese points of view and had brought the border problem nearer to a solution.—(Burmese Government Information Department, Rangoon) **(Prev. rep. 14037 A.)**

B. ICELAND. — Ban on Boxing.

Legislation banning boxing in all its forms—matches, exhibitions, and training—was unanimously approved by the Icelandic Parliament on Jan. 9. The measure had originally been introduced in the former *Althing*, and was in its final stages when the legislature was dissolved in preparation for the general elections of June 1956.—(New York Times)

C. FALKLAND ISLANDS. — New Governor.

It was announced in London on Jan. 22 that Mr. Edwin P. Arrowsmith, Resident Commissioner in Basutoland, had been appointed Governor of the Falkland Islands in succession to Sir Oswald Arthur, recently appointed to the Governorship of the Bahamas.—(Times) **(Prev. rep. 15247 E.)**

A. UNITED STATES.—Final Voting Figures in Presidential Election. - Inauguration of President Eisenhower.

The final voting figures in the presidential election held on Nov. 6, 1956, were officially published in Washington on Dec. 21 as follows:

	Votes	*Percentage*
President Eisenhower (Republican)	35,582,236	57.28
Mr. Adlai Stevenson (Democrat)	26,028,887	41.90
Minor parties and candidates ..	507,813	0.82

President Eisenhower's majority of 9,553,349 votes was 1,644,984 higher than his majority over Mr. Stevenson in 1952. The President's share of the total votes rose correspondingly from 55.4 to 57.28 per cent.

The total of valid votes was 62,118,936, representing 60.5 per cent of the electorate of 102,753,000. Although the figure was the highest on record (the previous "high" being 61,551,919 votes in 1952), the percentage going to the polls was slightly lower, comparing with 62.7 per cent in 1952.

Votes cast for minor parties and candidatures included 134,157 for Senator Harry F. Byrd of Virginia (States' Rights), 44,369 for Mr. Eric Hass (Socialist Labour), 41,547 for Dr. Enoch Holtwick (Prohibitionist), 7,805 for Mr. Farrell Dobbs (Socialist Workers), 2,192 for Mr. Darlington Hoopes (Socialist), and 1,829 for Mr. Henry B. Krajewski (American Third Party).

The following official figures were published showing the votes cast in the 48 States:

	Eisenhower	Stevenson
Alabama	194,883	279,982
Arizona	176,990	112,880
Arkansas	186,287	213,277
California	3,027,668	2,420,135
Colorado	394,479	263,997
Connecticut	711,837	405,079
Delaware	98,057	79,421
Florida	643,849	480,371
Georgia	216,652	441,094
Idaho	166,979	105,868
Illinois	2,623,327	1,775,682
Indiana	1,182,811	783,908
Iowa	729,187	501,858
Kansas	566,878	296,317
Kentucky	572,192	476,453
Louisiana	329,047	243,977
Maine	249,238	102,468
Maryland	559,737	372,603
Massachusetts	1,393,197	948,190
Michigan	1,713,647	1,359,898
Minnesota	719,302	617,525
Mississippi	60,685	144,498
Missouri	914,299	918,273
Montana	154,933	116,238
Nebraska	378,108	199,029
Nevada	56,049	40,640
New Hampshire	176,519	90,364
New Jersey	1,606,942	850,337
New Mexico	146,788	106,098
New York	4,340,340	2,750,769
North Carolina	575,062	590,530
North Dakota	156,766	96,742
Ohio	2,262,610	1,439,655
Oklahama	473,769	385,581
Oregon	406,393	329,204
Pennsylvania	2,585,252	1,981,769
Rhode Island	229,677	163,521
South Carolina	75,700	136,372
South Dakota	171,569	122,288
Tennessee	462,288	456,507
Texas	1,080,619	859,958
Utah	215,631	118,364
Vermont	110,390	42,549
Virginia	386,459	267,760
Washington	620,430	523,002
West Virginia	449,297	381,534
Wisconsin	954,844	586,768
Wyoming	74,573	49,554

The 531 members of the Electoral College met on Dec. 17 and cast their votes for the presidency as follows—for President Eisenhower, 457; for Mr. Adlai Stevenson, 73; for Mr. Walter B. Jones, 1. Although Mr. Stevenson had carried Alabama, one of the 11 electors for that State refused to vote for him and, instead, cast his vote for Mr. Jones, an Alabama judge.

Under the U.S. Constitution, the members of the Electoral College have the right to cast their votes as they wish. Only rarely, however, have electoral votes gone to anyone except the candidate who has obtained a majority in the State concerned. A similar case occurred in 1948, when a Tennessee member of the Electoral College cast his vote for Mr. J. Strom Thurmond (the States' Rights candidate), despite the fact that President Truman had carried Tennessee in the presidential election.

The last gubernatorial election result—for Rhode Island—was declared on Jan. 1, 1957, when the Supreme Court of Rhode Island ruled that it had been won by the incumbent Democratic governor, Mr. Dennis J. Roberts. As a result of the gubernatorial elections of Nov. 6, and the postponed Rhode Island result, the Democrats hold 29 State Governorships and the Republicans 19.

After the counting of postal ballots, it had been officially announced in Providence (the capital of Rhode Island) on Dec. 17 that the State gubernatorial election had been won by the Republican candidate, Mr. Christopher Del Sesto, with 194,974 votes against 194,547 for Governor Roberts—a majority of 427. The Democrats, however, contested this result and appealed to the Supreme Court of Rhode Island, the question at issue being the validity or otherwise of 5,062 absentee (i.e. postal) ballots. The State Supreme Court ruled on Jan. 1 that 4,994 of these votes were invalid, and that Governor Roberts had accordingly won the gubernatorial election.

President Eisenhower and Vice-President Nixon formally took their oaths of office on Jan. 21, 1957.

In a short inaugural address, delivered under the title "The Price of Peace," the President said *inter alia*: "We recognize and accept our own deep involvement in the destiny of men everywhere. We are accordingly pledged to honour and to strive to fortify the authority of the United Nations, for in that body rests the best hope of our age . . . And beyond this general resolve we are called to act a responsible role in the world's great concerns for conflict—whether they touch upon the affairs of a vast region, the fate of an island in the Pacific, or the use of a canal in the Middle East . . ."

In the course of his speech President Eisenhower stressed that an isolationist policy was an "impossibility" for the U.S.A., since "not even America's prosperity could long survive if other nations do not also prosper." (New York Times)

(Prev. rep. Presidential Election, 15237 A.)

B. ETHIOPIA. — Emperor Haile Selassie's Visits to India, Japan, and Burma.

The Emperor Haile Selassie, accompanied by the Duke of Harar, arrived at Bombay on Oct. 25 for a three weeks' tour of India, during which they visited New Delhi, Madras, Travancore-Cochin, and Mysore. During a four-day stay in the Indian capital the Emperor attended a number of official functions and had informal discussions with President Prasad and Mr. Nehru. While in India he visited the Bhakra Dam (Punjab), the Military College at Dehra Dun (Uttar Pradesh), and the University of Benares, ending his tour with a three-day stay in Calcutta.

In a joint communiqué, issued in Delhi on Nov. 8, the Emperor and Mr. Nehru expressed concern at "the grave and alarming developments in the international situation, involving violation of human dignity and freedom and the subjection of peoples by the force of modern arms." They appealed to the countries concerned to respect the principles of the U.N. Charter; affirmed their belief that strict observance of the principles of *Panch Sila* could alone lead to the easing of international tension; and reiterated their support for "the principles enunciated by the Asian-African conference at Bandung." The Emperor and Mr. Nehru also expressed their intention to strengthen Indo-Ethiopian friendship by further co-operation in the cultural and economic spheres, and to negotiate an economic agreement between the two countries.

On Nov. 17 the Emperor flew to Tokio, where he was welcomed on Nov. 19 by the Emperor Hirohito and the then Prime Minister, Mr. Hatoyama. During his visit to Japan—the first made by the head of a foreign State since the war—the Emperor toured a number of leading cities, including Nagoya, Kyoto, Osaka, and Kobe, and visited the Buddhist shrine at Nikko. The Emperor concluded his Asian tour with a three-day visit to Rangoon (Nov. 29 - Dec. 1) as the guest of the Burmese Government.—(The Hindu, Madras - The Statesman, Calcutta - Indian High Commisisoner's Office, London - Japanese Embassy Press Office, London - Burmese Embassy Press Office, London)

(Prev. rep. 14026 D.)

C. INTERNATIONAL FINANCE CORPORATION. - Sixteen New Members join I.F.C.

The President of the International Finance Corporation (Mr. Robert L. Garner) announced on Jan. 11 that 16 more countries had joined the Corporation since its formation. The 16 new members, with their subscriptions, were:

	U.S. dollars		U.S. dollars
Austria	554,000	Lebanon	50,000
Belgium	2,492,000	Luxemburg	111,000
Brazil	1,163,000	Netherlands	3,046,000
Burma	166,000	Paraguay	16,000
Indonesia	1,218,000	Persia	372,000
Iraq	67,000	Siam	139,000
Israel	50,000	Turkey	476,000
Italy	1,994,000	Venezuela	116,000

This brought the total membership of the Corporation to 47 countries, and capital subscriptions to $90,396,000. (International Finance Corporation, Washington) **(15048 A.)**

A. NORTH ATLANTIC TREATY ORGANIZATION. - General Norstad succeeds General Gruenther as Supreme Allied Commander, Europe. - General Gruenther's Warning to Soviet Union. - NATO Defence Expenditures. - General Speidel becomes C.-in-C. Allied Land Forces, Central Europe.

At a ceremony on Nov. 20, 1956, General Lauris Norstad formally took over the post of Supreme Commander, Allied Powers in Europe, from General Alfred M. Gruenther, who left for the U.S.A. on the following day to become President of the American Red Cross.

At his last news conference as Supreme Commander (Nov. 18), General Gruenther warned the Soviet Union that if guided missiles were used against Western European countries, retaliation would follow from the West "just as day follows night" and "the Soviet Union would be destroyed." General Gruenther's warning was issued at the height of the Suez crisis and shortly after Marshal Bulganin's threats of "rocket weapons" against Britain and France, contained in his letters to Sir Anthony Eden and M. Mollet [see page 15218].

General Gruenther emphasized that NATO's first objective was to act as a deterrent, and the most important element of that objective was the "overwhelming capacity" of the West to retaliate "very destructively" against the Soviet Union by means of air power. He continued:

"It is naturally a matter for apprehension in Europe, which alone could be affected by rocket weapons. But I think that no nation is going to press the button if it means suicide, as it would. But should these rockets be used, they would not destroy the capacity of NATO forces to retaliate."

While he thought no nation would "press the button" now, he added: "I do not say this will be true in five years' time, but as of to-day the offensive has got a great advantage over the defensive, and we have that offensive capability. The only thing I fear is that injudicious criticism inside the Atlantic alliance might mislead the Soviets about our determination to use our offensive capacity, and that could be a disaster.

"There is no reason for some of the current pessimism about NATO. Some people are saying that NATO is disintegrating and collapsing. Our forces are four to five times as strong as in 1951. We have a command organization and plans which could be implemented immediately. But we have never claimed that we are strong enough, and at present there is an additional strain because of the Middle East situation, which has an effect on our unity . . . But having recently visited all the NATO countries, I must say that I found nowhere any tendency among responsible people to write off NATO because of this crisis. The American Government considers NATO a vital part of its foreign policy, and I am absolutely confident that it is going to adhere loyally to it."

Questioned about NATO's power of reprisal, General Gruenther said that SHAPE itself had the means for delivering "close-in retaliation" [i.e. retaliation against targets in the "satellite" areas.] "Deep targets"—those in the Soviet Union itself—could be covered only by the U.S. Strategic Air Force and the British Bomber Command, neither of which were under the command of SHAPE; both these Commands, however, had a directive to support the NATO forces in the event of conflict, and, in any case, defence and air power were an indivisible whole. Air defence, he added, remained one of the weakest points of the NATO system; the state of radar sets and guided missiles was not yet adequate, "but we do have the ability to destroy the enemy planes at their base."

Other points made by General Gruenther, in answer to press correspondents' questions about the situation in Hungary, Poland, and the Middle East, are summarized below:

Military Strength of NATO. As regards recent events in Central Europe, General Gruenther said there was no reason to change NATO strategic thinking, as SHAPE had always doubted the reliability of the Soviet satellite countries and had based its estimate of the balance of power on that of the Soviet Union. A study carried out in 1953, and presented to the North Atlantic Council in 1954, had estimated Western needs after allowing for the introduction of atomic weapons; that study had shown that the need for the "shield" of ground forces in the Central European sector could be lowered by two-thirds as compared with 1951. After saying that SHAPE was concerned about talk of further reductions of this "shield," General Gruenther added: "We do not at present have the minimum amount of ground forces in Europe which SHAPE considers necessary to defend the whole NATO area successfully. Some of our forces have gone to North Africa, others to the Middle East, and the German programme of rearmament has been somewhat delayed. The NATO Council will consider this position."

Eastern Europe. When asked about the chances of Western military intervention in the event of a repetition in Poland of the events in Hungary, General Gruenther emphasized that this would be primarily a political decision, but he thought the likelihood of such intervention was "slight." There had been suggestions that the West should work to organize guerrilla warfare in "satellite" Europe, in order to pin down a great number of regular Soviet troops. The success of such a policy, however, would be doubtful, as the Russians were so ruthless that any such operations would lead to terrible repression and catastrophe for the people of the country concerned.

Middle East. Asked to comment on the situation in the Middle East, General Gruenther said: "It is one proof of the success of NATO that the enemy has been forced to go round our flank by subversive action and local attacks, but I agree that unless the Middle East problem gets solved it will have an adverse effect on our European defence." He added that any extension of NATO responsibilities to the Middle East was "a theoretical question"; NATO was based on the voluntary acceptance of the interested peoples, and it would be "quite out of keeping with that philosophy" to try to impose a NATO solution on the Middle East. If such a solution were decided politically, however, it could be effected from a purely military point of view, though there would be many difficulties.

The Annual NATO Review.

At the final session of its meeting on Dec. 14 [see 15285 A] the North Atlantic Council adopted the Annual Review—i.e. the annual estimate of NATO needs and resources—together with a resolution urging Governments to meet the 1957 defence targets.

The Annual Review (which was not published) confirmed that NATO sea, air, and ground forces were not at present adequate for the task of defending NATO territory. In particular, withdrawals of ground forces from the Central European sector had increased this inadequacy, and there were considerable numerical deficiencies in NATO air forces. On the other hand, there had been a qualitative improvement in NATO forces, and "some progress" had been made with the air defence system in Europe. It was emphasized that first priority should be given by all countries to control and warning systems (radar, etc.).

The Review also stated that the German Federal Government had undertaken to make a "significant contribution" to NATO forces by the end of 1957, although its full contribution of 12 divisions would not be available until after 1959. In addition, the French Government had undertaken to replace during 1957 the two divisions which had been sent from Central Europe to North Africa.

Defence Expenditures of NATO Countries, 1955-1956.

A table was released showing defence expenditures of all member-countries between 1949 and 1956. [With the exceptions mentioned below, the figures for 1949-1954 agreed with those given on page 14618 and are therefore not repeated.]

The actual figures for 1955 and the forecasts for 1956 were:

Country	Currency Unit	Actual 1955	Forecast 1956
Belgium	Million B. Frs.	17,067	19,306
Canada	Million Can.$	1,815	1,892
Denmark	Million D. Kr.	920	970
France	Milliard F. Frs.	1,102	1,368
Germany (Western) (*a*)	Million D.M.	7,383	7,150
Greece	Million Drachmae	3,688	4,050
Italy	Milliard Lire	551	560
Luxemburg	Million L. Frs.	614	482
Netherlands	Million Guilders	1,699	1,800
Norway	Million N. Kr.	953	1,004
Portugal	Million Escudos	2,224	2,351
Turkey (*b*)	Million Liras	1,058	1,249
United Kingdom ..	Million £ Sterling	1,569	1,551
United States (*c*) ..	Million U.S.$	40,482	41,551
Total Europe	Million U.S.$	11,827	12,663
Total North America	Million U.S.$	42,297	43,443
Total NATO	Million U.S.$	54,124	56,106

(*a*) Before it acceded to NATO in May 1955, the German Federal Republic contributed to the defence budgets of certain NATO countries by the payment of occupation costs; moreover, it bore certain other costs which also fell within the NATO definition of defence expenditures. Expenditures under these various heads for the fiscal years 1953-54 and 1954-55 (April 1-March 31) amounted to 6,195,000,000 DM. and 6,709,000,000 DM. respectively; the figures for the calendar years in question were not available, and figures for the years prior to 1953-54 had not been communicated to the International Staff.

(*b*) Revised figures for Turkish defence expenditures from 1949-1954 were (in million Liras): 556 (1949); 599 (1950); 652 (1951); 725 (1952); 804 (1953); 946 (1954). These figures should be substituted for those shown on page 14618.

(*c*) Revised U.S. defence expenditure in 1954 was given as $42,936,000,000.

Because of the above-mentioned changes relating to Western Germany, Turkey, and the U.S.A., the totals given on page 14618 for the years 1949-1954 were revised as follows:

Total	1949	1950	1951	1952	1953	1954
	(Million U.S. dollars)					
Europe ..	4,771	5,380	7,541	10,143	12,423	11,848
North America	13,952	15,054	34,618	49,727	51,591	44,707
NATO ..	18,723	20,434	42,159	59,870	64,014	56,555

Note. The figures given in the tables above are based on the NATO definition of defence expenditures and represent payments actually made or to be made in the course of the calendar year. There may be considerable divergencies between these figures and those

given in national budgets because (i) the national classification of expenditures for budgetary purposes never coincides exactly with the NATO definition, and (ii) under their national budgetary procedures, which differ from country to country, certain countries include large sums which will in reality be used to cover expenditures spread over a number of years.

The figures relating to the United States and Canada include expenditures on special military support, direct forces support, and the purchase of military items to be delivered in the form of "end-item aid." The value of such items delivered to European NATO countries has not been included in the defence expenditures of these countries.

General Speidel becomes C.-in-C., Allied Land Forces, Central Europe.

The appointment of Lieutenant-General Hans Speidel (Western Germany) as Commander-in-Chief, Allied Land Forces, Central Europe, in succession to General Marcel Carpentier (France), was announced at SHAPE on Jan. 24.

General Speidel (60), the first German officer to assume a senior NATO command, studied philology (in which he holds a doctorate) before entering the *Reichswehr* as a professional officer. Before the Second World War he served on the German General Staff, and during the war held staff appointments in France and Russia. In 1944 he was appointed Chief of Staff to Field-Marshal Rommel, and was responsible for defence planning in Normandy until September of that year, when he was arrested on Himmler's orders for participating in the anti-Hitler *putsch* of July 20, 1944. He was subsequently kept in prison for eight months by the Gestapo. In 1955 General Speidel became chief of the co-ordinating staff of the new German Federal Army—the *Bundeswehr*.

General Speidel will serve under General Valluy, C.-in-C., Allied Forces, Central Europe.

German Air Bases for NATO Defence.

The West German Defence Ministry announced on Jan. 13 that the Federal Republic had agreed to build 29 more airfields for the use of NATO forces, in addition to the 19 already in use, at an estimated cost of 1,740,000,000 DM.

It was stated that units of the new West German Air Force would occupy some of the new bases, each of which was expected to cost about 60,000,000 DM. Work on some of the bases will start during 1957, and all are expected to be ready by the end of 1959.

Training of German Airmen in Canada.

The Canadian Government announced on Jan. 2 that arrangements had been concluded with the German Federal Republic for the training in Canada of 360 German aircrew, who would man a number of *Sabre* jet fighters which had been allotted to Western Germany under mutual aid arrangements. The training was expected to begin during 1957 and to be completed by 1959.

Forthcoming Anglo-American Talks on Joint Defence.

It was announced in London on Jan. 19 that Mr. Duncan Sandys, the U.K. Minister of Defence, would visit Washington from Jan. 27-29 for "informal talks on joint United States-United Kingdom defence matters," at the invitation of the U.S. Secretary of Defence, Mr. Wilson.

The British Ministry of Defence stated that the purpose of Mr. Sandys' visit was to discuss military aspects of the international situation and arrangements for co-operation between the U.S.A. and Britain, especially matters covered by the terms of the Anglo-U.S. agreement on the application of atomic energy. The general question of NATO defence would come within the scope of the talks, as any defence cuts planned by the British Government "would naturally affect our position in NATO." It was not, however, expected that a formal agreement would result from the discussions.

The second conference of some 200 parliamentarians from the NATO countries was held in Paris from Nov. 19-23, 1956, under the chairmanship of Mr. Wayne Hays, of the U.S. House of Representatives. Resolutions were adopted, *inter alia*, on the parliamentary role in NATO, the closer union of the Atlantic peoples, and the situation in Hungary.
(NATO Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Montreal Star - New York Times) **(15285 A.)**

A. INDIA. — Legislation against Horror Comics.

A Government Bill seeking to prevent the publication, sale, or distribution of "horror comics" was unanimously passed on Nov. 22, 1956, by the Indian House of the People.

The Bill—the Young People's (Harmful Publications) Bill—defined "horror comics" as publications portraying "the commission of offences, or acts of violence or cruelty, or incidents of a repulsive or horrible nature, in such a way that the publication... would tend to corrupt a young person into whose hands it might fall, whether by inciting or encouraging him to commit offences or acts of violence or cruelty, or in any other manner whatsoever."

Pandit Pant (the Home Minister) pointed out that the Government had prohibited the import of such publications in 1955.—(The Statesman, Calcutta) **(Prev. rep. 14281 E.)**

B. EUROPEAN COAL AND STEEL COMMUNITY. — Coal and Steel Production in 1956. - Imports of U.S. Coal. - New President of Common Assembly.

Provisional figures released by the High Authority of the European Coal and Steel Community on Jan. 8 showed that production of coal, steel, and pig-iron and ferro-alloys in the six member-countries had reached new record levels in 1956. Further provisional figures released on Jan. 19 and Jan. 21 showed that output of iron-ore and coke had also reached new record levels in 1956.

Comparative figures for the member-countries of the Community for the years 1955 and 1956 are given below, in metric tons.

Coal.

	1956 Tons	1955 Tons	Percentage Change
Germany	134,378,000	130,728,000	+2.8
Belgium	29,546,000	29,978,000	−1.5
France	55,121,000	55,335,000	−0.4

At the fourth meeting of the Council of Association between Britain and the European Coal and Steel Community, held in London on Nov. 16, 1956, M. René Mayer, the president of the High Authority, predicted that the member-countries of the Community would have to import 37,000,000 tons of U.S. coal in 1957, some 12,000,000 tons more than in 1956. Although the Community's coal production had increased by over 2,500,000 tons in 1956, the pressure of demand was such that imports from the U.S.A. during the last quarter of 1956 would total 10,000,000 tons. The introduction of a system of rationing had been considered within the Community, but no decision had yet been taken by the High Authority.

At its meeting in Strasbourg on Nov. 27, 1956, the Common Assembly of the European Coal and Steel Community elected Professor Dr. Hans Furler (West Germany) as its president in succession to Signor Pella, the former Italian Prime Minister, who had held the post since November, 1954. Dr. Furler, a prominent international lawyer and a Christian Democratic member of the *Bundestag*, was the first German to be elected to the presidency of any of the Community's institutions.

A. SHIPPING. — World Tonnage and Construction in 1956. - Contracts for Super-Tankers.

Statistical tables published by Lloyd's Register of Shipping in November, 1956, gave the total of world shipping at June 30, 1956, as 105,200,361 gross tons, compared with 100,568,779 gross tons at June 30, 1955. The sizes of the principal national fleets (excluding ships under 100 tons, sailing vessels, and barges) at June 30, 1956, are shown in the following table:

	1956 Gross Tons	1955 Gross Tons
United States*	26,145,642	26,422,683
United Kingdom	19,545,875	19,356,660
Norway	8,035,340	7,249,087
Liberia	5,584,378	3,996,904
Italy	4,196,762	3,910,658
Japan	4,075,781	3,735,318
British Commonwealth (except U.K.)†	4,009,946	3,873,796
Netherlands	4,006,077	3,695,610
France	3,943,201	3,992,478
Panama	3,925,751	3,922,529
Germany (Western)	3,206,381	2,652,738

Portugal	536,765	n.a.
Costa Rica	507,706	341,000

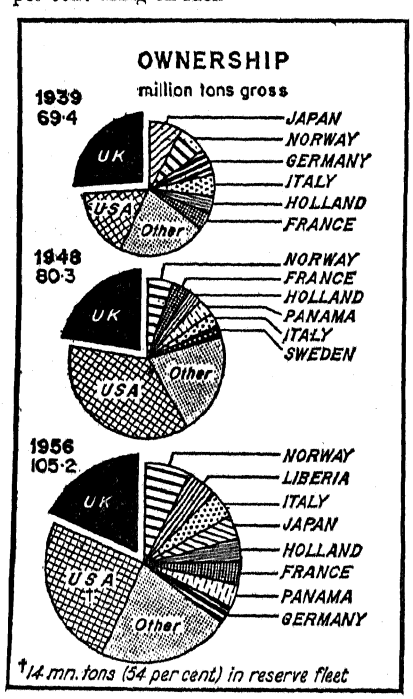
n.a.—not available.

*Including reserve fleet, estimated at about 14,000,000 tons at June 30, 1955 and June 30, 1956.

†Including 1,503,573 tons registered in Canada; 605,965 tons in Australia; 580,456 tons in India; 390,035 tons at Hong Kong; 249,786 tons in New Zealand; 166,802 tons in South Africa; and 153,537 tons in Pakistan.

A feature of the shipping returns was the continued increase in the "flags of convenience" fleets (e.g. Liberia, Panama, and Costa Rica), which accounted for about 10.5 per cent of total world shipping at the end of 1956, as compared with only one per cent in 1939 (see 14632 A).

Of world tonnage of all types, 35.6 per cent were motorships and 55.5 per cent oil-burning steamers, making a total of 91.1 per cent using oil fuel.



(*Economist*)

Of the total world tonnage, the largest group again consisted of ships of 6,000-8,000 gross tons, but a large proportion of these (including the U.S. reserve fleet) were out of commission. By far the greatest amount of tonnage built in the last five years, however, was in the 10,000 to 15,000-ton group; 78 per cent of all ships of this size, and 77.1 per cent of ships between 15,000 and 20,000 tons, were oil tankers. Of the principal maritime powers, Western Germany had the largest proportion of modern tonnage, with 52.7 per cent under five years old, followed by Liberia (48.8 per cent), Norway (37.7 per cent), Japan (36.9 per cent), Sweden (35.7 per cent), France (32.5 per cent), the Netherlands (25.1 per cent), and the United Kingdom (22.7 per cent). Only 4.5 per cent of tonnage registered in the United States was under five years old.

The world tanker fleet at June 30, 1956, totalled 28,211,080 gross tons, or about 26.8 per cent of all ships, compared with 26.0 per cent at June 30, 1955.

The largest tanker fleets were owned by the United Kingdom (5,348,930 tons), Norway (4,660,278 tons), the U.S.A. (4,210,162 tons), Liberia (3,183,914 tons), Panama (2,066,562 tons), Italy (1,302,534 tons), France (1,258,680 tons), and the Netherlands (1,083,028 tons).

Shipbuilding Returns.

Returns published by Lloyd's Register of Shipping on Jan. 23, 1957 gave the gross tonnage of merchant ships under construction throughout the world at Dec. 31, 1956 as 8,065,068 tons, excluding ships building in the U.S.S.R. and China, as well as ships under 100 gross tons, barges, etc. For the first time since March 1950, the returns included ships building in Poland. Of the total, 26.48 per cent was building in the United Kingdom and 73.52 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 328 of 2,135,218 tons (steamers 1,076,639 tons, motorships 1,058,579 tons), including five steamers of 25,000-30,000 tons, 23 steamers of 20,000-25,000 tons, and 5 steamers and 1 motorship of 15,000-20,000 tons. Of the total, 264 ships (1,687,824 tons) were building for Great Britain and N. Ireland, 14 (30,994 tons) for other British Commonwealth countries, 12 (127,068 tons) for Liberia, 9 (106,777 tons) for Norway, 3 (57,350 tons) for Panama, 4 (42,450 tons) for Greece, 5 (38,158 tons) for the Irish Republic, 5 (15,307 tons) for various countries, 10 (6,830 tons) for the U.S.S.R., and 2 (22,000 tons) for unspecified countries. Principal shipbuilding centres were: the Clyde (94 ships of 636,114 tons), the Tyne (37 ships of 414,750 tons), Belfast (19 ships of 243,687 tons), the Tees (21 ships of 231,446 tons), Sunderland (28 ships of 217,696 tons), and Liverpool (17 ships of 160,901 tons).

Ships building abroad numbered 1,247 of 5,929,850 tons (steamers 2,416,623 tons, motorships 3,513,227 tons), divided as follows: Japan 156 (1,364,190 tons), Western Germany 240 (798,772 tons), Italy 86 (657,529 tons), the Netherlands 187 (599,780 tons), France 69 (498,899 tons), Sweden 65 (485,218 tons), the U.S.A. 30 (294,885 tons), Norway 74 (243,140 tons), Spain 75 (181,479 tons), Denmark 29 (147,558 tons), British Commonwealth countries 57 (145,837 tons), Belgium 20 (136,750 tons), Finland 48 (126,497 tons), Poland 63 (124,816 tons), Yugoslavia 24 (99,536 tons), Portugal 11 (16,839 tons), Turkey 8 (6,371 tons), Indonesia 2 (1,200 tons), and 1 small vessel each in Hungary, Iceland, and the Irish Republic. The total included 4 steamers of over 30,000 tons in France, 2 in Japan, and 1 each in Italy and the Netherlands; 10 steamers of 25,000-30,000 tons in Japan, 3 in the U.S.A., and 1 each in France and Sweden; and 13 steamers and 1 motorship of 20,000-25,000 tons in Japan, 11 steamers and 1 motorship in Italy, 5 steamers in the Netherlands, 4 in the U.S.A., 3 steamers and 1 motorship in Germany, 2 steamers and 2 motorships in Sweden, 2 motorships in Norway, and 1 in France.

Tankers building throughout the world numbered 249 of 8,448,899 tons, including 63 (908,189 tons) in the United Kingdom, 43 (693,395 tons) in Japan, 19 (317,316 tons) in Italy, 19 (300,930 tons) in Sweden, 14 (286,490 tons) in France, 12 (246,060 tons) in the U.S.A., 11 (179,400 tons) in the Netherlands, and 18 (168,304 tons) in Norway.

Quarterly Construction Figures.

World construction figures for the first three quarters of 1956, as given by Lloyd's Register of Shipping, are summarized below:

First Quarter. Total tonnage under construction at March 31, 1956, amounted to 7,009,179 gross tons, of which 32.26 per cent was building in the United Kingdom and 67.74 per cent elsewhere.

Ships building in the U.K. numbered 355 of 2,260,949 tons (steamers 1,309,496 tons, motorships 951,453 tons); ships building overseas numbered 1,175 of 4,748,230 tons (steamers 1,754,875 tons, motorships 2,993,355 tons).

Tankers under construction throughout the world numbered 212 of 2,668,744 tons, including 71 (945,264 tons) in the U.K.

Second Quarter. Total tonnage under construction at June 30 amounted to 7,223,004 gross tons, of which 28.08 per cent was building in the United Kingdom and 71.92 per cent elsewhere.

Ships building in the U.K. numbered 334 of 2,028,132 tons (steamers 1,150,852 tons, motorships 877,280 tons); ships building overseas numbered 1,200 of 5,194,872 tons (steamers 2,061,640 tons, motorships 3,133,232 tons).

Tankers under construction throughout the world numbered 217 of 2,824,020 tons, including 62 (833,301 tons) in the U.K.

Third Quarter. Total tonnage under construction at Sept. 30 amounted to 7,449,310 gross tons, of which 27.90 per cent was building in the United Kingdom and 72.10 per cent elsewhere.

Ships building in the U.K. numbered 333 of 2,077,976 tons (steamers 1,125,210 tons, motorships 952,766 tons); ships building overseas numbered 1,168 of 5,371,334 tons (steamers 2,113,569 tons, motorships 3,257,765 tons).

Tankers under construction throughout the world numbered 219 of 2,993,201 tons, including 58 (842,564 tons) in the U.K.

Relative Positions of Britain and Japan.

Figures giving the tonnage of ships completed during 1956, also published by Lloyd's Register on Jan. 23, 1957, showed that Japan had ousted Britain from her position as the leading shipbuilding country, having increased her output from 561,000 gross tons in 1955 to 1,538,000 gross tons in 1955. The tonnage completed by British shipbuilders increased only from 1,822,000 gross tons in 1955 to 1,457,000 gross tons in 1956.

[The change in the relative positions of Britain and Japan was partly accounted for by the large proportion of "super tankers" building in Japanese yards, since these ships can be completed in less time than, e.g., passenger lines of equal tonnage.—*Ed. K.C.A.*]

Orders from British Shipyards.

Figures published by the Shipbuilding Conference in London on Jan. 23 showed that a total of 865 ships, of 6,442,000 gross tons, was on order from British shipbuilders at Dec. 31, 1956. It was stated in the Press that order books were full for several years ahead.

The total of new orders booked during 1956 amounted to 365 ships of 2,475,000 gross tons, including 143 ships of 1,210,000 gross tons booked during the fourth quarter. Nearly 30 per cent of the new orders in 1956 were for foreign account. Oil tankers represented 45 per cent of all new orders.

Ship Launchings in 1956.

The largest ship launched in the United Kingdom in 1956 was the tanker *Evgenia Niarchos* (47,750 deadweight tons), launched by Vickers-Armstrong at Barrow. Other notable ships launched included the Canadian Pacific liner *Empress of England* (25,000 gross tons, also launched at Barrow) and the Cunarder *Sylvania* (22,000 tons, John Brown and Co., Clydebank), the last of the four passenger ships ordered by the Cunard Company for its Canadian service.

Ships launched abroad included the Holland-America liner *Statendam* (24,300 gross tons, built by the Rotterdam Drydock Company); the Swedish-America liner *Gripsholm* (24,000 tons gross, built by the Ansaldo Company, Genoa); the supertanker *George F. Getty* (52,000 deadweight tons), launched at St. Nazaire by the *Union des Constructions Navales de l'Atlantique* [see below] for the Tidewater Oil Co., San Francisco; and the combined tanker and ore-carrier *Universe Leader* (83,090 deadweight tons), built at the former Japanese naval yard at Kure for Universe Tankships, Monrovia (a Liberian company controlled by Mr. D. K. Ludwig of New York).

The *Universe Leader*, which is exceeded in length only by the liners *Queen Mary*, *Queen Elizabeth*, *United States*, and *Liberté*, will trade between the Persian Gulf and North America *via* the Cape, being too big for the Suez and Panama Canals.

Order for World's Largest Tanker. - The Niarchos Tanker Fleet.

It was announced on Jan. 21 that Mr. Stavros Niarchos, the Greek shipowner, had ordered a super-tanker of 106,000 deadweight tons from the Bethlehem Steel Company (Quincy, Mass.) Her dimensions are such that she will have to carry Middle East oil direct to Philadelphia or Rotterdam, as there are at present no other tanker terminals able to accommodate her. The vessel will be delivered in 1959.

It was further announced on Jan. 23 that Mr. Niarchos had acquired two companies together owning 11 tankers of a total tonnage of 255,363 deadweight tons, thereby increasing the Niarchos group's tanker fleet to 60 ships aggregating 1,422,009 deadweight tons.

Merger of French Shipyards.

The former Penhoët and Loire shipbuilding companies, of St. Nazaire, which together accounted for over 65 per cent of French shipbuilding capacity, were amalgamated as from Oct. 1, 1956, under the name of *Union des Constructions Navales de l'Atlantique*.—(Lloyd's Register of Shipping, London - Times - Daily Telegraph - New York Herald Tribune - Le Monde, Paris - Netherlands News Agency)

(Prev. rep. Shipping, 14632 A.)

A. UNITED KINGDOM. — Mr. Peter Fryer expelled from British Communist Party.

Mr. Peter Fryer, special correspondent of the *Daily Worker* in Budapest at the time of the Hungarian uprising, was expelled from the British Communist party on Dec. 22, 1956, for "conduct detrimental to the party." Mr. Fryer, whose despatches from Budapest were suppressed by the *Daily Worker* (see page 15225, first column), issued the following statement on his expulsion:

"After 14 years in the Communist party I have been expelled because I would not remain silent about the rape of Hungary. I was an inconvenient witness—one who could refute from personal experience the lie that Soviet intervention was needed to crush 'counter-revolution.' What Pollitt and Gollan call 'counter-revolution' is in fact the most gallant rearguard action in the whole history of the international Labour movement. I was horrified to see the leaders of my party stab the Hungarian workers in the back, and I was not prepared to be an accomplice . . . "

The *Daily Worker* admitted on Jan. 9, 1957, "a serious fall in circulation due to some readers' disagreement with our policy on Hungary." It was stated that the present circulation was 63,000, and that the paper was finding itself "heavily crippled by rising costs and the fall in circulation."

(Observer - Manchester Guardian - Daily Telegraph)

B. INDIA. — Nationalization of Kolar Gold Fields.

The Kolar Gold Fields (45 miles from Bangalore), which for the past 75 years had been owned and worked by British companies, were nationalized by and transferred to the ownership of the State of Mysore on Nov. 29, 1956. The Bill nationalizing the undertakings had been unanimously passed by the Mysore Legislative Assembly on Oct. 17, and had been assented to by President Prasad on Oct. 31.

The Bill provided that (*a*) the Mysore Government would pay £1,230,000 (Rs. 16,400,000) compensation to the companies concerned—the Mysore Gold Mining Company (K.G.F.) Ltd., the Champion Reef Gold Mines of India (K.G.F.) Ltd., the Nandydroog Mines (K.G.F.) Ltd., and the Kolar Mines Power Station (K.G.F.) Private Ltd., (*b*) three-quarters of the compensation would be payable on Vesting Day and the balance three months later, (*c*) Kolar Gold Fields would be taken over as a going concern with all its assets and liabilities in India, but excluding the companies' assets held in Britain.

The Bill was the outcome of protracted negotiations over the compensation question, the companies originally demanding £4,500,000 (based on the actual net asset value, with allowances for loss of profit through the premature termination of the leases) and the Mysore Government offering £652,000 (based on the current market value of the shares). The companies rejected this offer, claiming that the share prices had been adversely influenced by the Government's decision to nationalize the mines and its "drastic tax measures," and also that the offer did not take into account the discovery of a new gold-bearing region within the leased area.

In view of the importance of maintaining the confidence of foreign investors and attracting foreign capital for the implementation of the Second Five-Year Plan, the Government of India intervened in the negotiations on June 19, 1956. As a result, agreement was reached with the companies on a compensation payment of £1,230,000, whilst subsequently the Chief Minister of Mysore (Mr. Nijalingappa) negotiated with the Union Minister of Finance (Mr. Krishnamachari) a loan of Rs. 4,500,000 (£337,500) to the Mysore Government to help finance the transaction.

The three gold mines—the Mysore, Champion Reef, and Nandydroog mines—were taken over by a State Board of Management, with Mr. Nijalingappa as chairman. Messrs. John Taylor and Sons, who had previously acted as operators and lessees, became consultants to the Board of Management.

Since the beginning of goldmining in the Kolar Gold Fields the three mines had yielded 22,466,944 oz. of gold, valued at about 1,850,000,000 rupees (£138,750,000), up to 1953. The mining is carried out at a great depth, the deepest point being 9,950 feet in the Champion Reef Mines—the deepest in the world. After the transfer of some territories in Hyderabad State, where the Hatti Gold Mines are located, Mysore will be the only gold-producing State in India.—(The Hindu, Madras)

C. LAOS. — Government of National Union. - Agreement with "Pathet Lao" Rebels.

A joint statement was issued in Vientiane on Dec. 31, 1956, announcing that Prince Souvanna Phouma, the Laotian Prime Minister, and Prince Souphannou Vong, the *Pathet Lao* leader and a half-brother of the Prime Minister, had signed an agreement providing for (*a*) the early formation of a "Government of National Union"; (*b*) the return of the provinces of Phong Saly and Sam Neua (which had been held by *Pathet Lao*) to the royal administration; and (*c*) the "integration" of the *Pathet Lao* rebels into the national community.

Negotiations between the two sides had been in progress since September to decide on the method by which the two disputed provinces should revert to the Government's control, one of the principal points being whether a "Government of National Union" should be formed before or after the new elections for the National Assembly. It was eventually agreed that such a government—the membership of which had not yet been decided upon—should be formed prior to the elections. It was also announced that the *Pathet Lao* would change its name to the "Patriotic Front of Laos."

A number of Franco-Laotian conventions dealing with judicial, commercial, monetary, defence, and other matters had been signed in Paris on Nov. 17, 1956.—(Le Monde, Paris)

(Prev. rep. 15118 A.)

D. ARGENTINA. — Nationalization of Deposits of Nuclear Minerals.

A decree of Dec. 18, 1956, laid down that all mineral deposits in Argentina considered to be possible sources of nuclear energy would become the property of the State, and that prospectors or occupiers of land containing such deposits would need special concessions for exploitation. These concessions would be granted by the National Commission for Atomic Energy. (Bank of London and South America)

A. MIDDLE EAST. — Cairo "Summit" Meeting. - Egyptian, Saudi Arabian, and Syrian Financial Aid to Jordan to replace British Subsidy. - British Proposal for Anglo-Jordanian Negotiations.

Following a conference in Cairo on Jan. 18-19 between King Saud of Saudi Arabia, King Hussein of Jordan, President Nasser of Egypt, M. Sabri Assali, the Syrian Prime Minister, and M. Nabulsi, the Prime Minister of Jordan, an agreement was signed providing for Saudi Arabian, Egyptian, and Syrian financial aid to Jordan to the value of £E12,500,000 (over £12,800,000 sterling) a year over the next ten years, of which Saudi Arabia and Egypt would each provide £E5,000,000 or its equivalent, and Syria £E2,500,000 or its equivalent. This aid would be used entirely for the Jordanian armed forces, including the National Guard, and would replace the subsidy of over £12,000,000 annually paid by Britain to Jordan under the Anglo-Jordanian treaty of 1948.

Payments will be made half-yearly, the first payments being made when the agreement comes into force upon ratification. [The Jordanian Deputy Premier, Shafiq Rusheidat, was reported to have said that the date was expected to be April 1.] Part of the cash contributions will be in hard currency, while Jordan will also obtain from the other three countries such proportion of her military equipment requirements as they are able to supply, the cost of these purchases being deducted from the aid allocations.

A statement issued in Cairo on Jan. 19 also dealt with the other questions discussed at the "summit" meeting.

With reference to the "Eisenhower doctrine" on the Middle East, it said that the Heads of State had agreed to reject the "vacuum theory" and had decided that "Arab nationalism is the sole basis on which Arab policy can be formulated."

On Israel's attitude regarding her withdrawal from the Gaza strip and the western shore of the Gulf of Akaba, the conferees had agreed that "occupation of any part of Egyptian territory, including the Gaza strip, must be regarded as a continuation of the tripartite Anglo-French-Israeli aggression against Egypt and can only bring about the gravest results." A supplementary statement said that the heads of State had also decided that "any attempt at changing the form of rule at Gaza can only be interpreted as an unacceptable continuation of such aggression." [This referred to certain proposals for placing the Gaza strip under U.N. administration.]

Finally, it was stated that the heads of State had agreed "to resist any attempt at impairing Egypt's sovereignty over the Suez Canal"; to support Yemen "in her resistance against aggression"; and to help the Algerian people "in every sphere."

It was announced in London on Jan. 21 that H.M. Government had sent a Note to Jordan stating that Britain was willing to enter into immediate discussions on the future of the Anglo-Jordanian treaty. The Note said:

"H.M. Government have noted that, according to the statement of policy issued by the Jordanian Government on Nov. 27, it is the intention of the Jordanian Government to end the treaty, to evacuate British forces from Jordanian territory, and to get rid of their bases. They have also noted the statement of the Jordanian Prime Minister to H.M. Ambassador on Nov. 29 that Jordan would soon be approaching H.M. Government with a request for negotiations to terminate the Anglo-Jordanian treaty in an agreed manner. Finally, they observe that the Jordanian Prime Minister informed the correspondent of the London *Times* on Dec. 30 that he was planning to begin negotiations to terminate the treaty as soon as conditions permit on both sides, but that the date for this must depend on Britain.

"Recalling the past friendship between the United Kingdom and Jordan, H.M. Government are anxious that the treaty relations between the two countries should serve to maintain and strengthen this friendship and not stand in its way. H.M. Government are therefore willing to meet the express wish of the Jordanian Government and to enter into immediate discussions with regard to the future of the Anglo-Jordanian treaty of alliance of 1948."

The Note concluded by requesting the Jordanian Government to name a place and date for the proposed discussions. (Times - Le Monde, Paris) **(Prev. rep. 15263 A; 14646 A.)**

B. FINE ARTS. — Royal Ballet established in Britain. - Merger of Sadler's Wells Companies.

It was announced on Jan. 16 that H.M. the Queen had granted a Royal Charter setting up a new corporation with the title of The Royal Ballet, which would co-ordinate the activities of the three Sadler's Wells groups—the Sadlers Wells Ballet (Covent Garden) the Sadler's Wells Theatre Ballet, and the Sadler's Wells Training School at Richmond, Surrey.

The Royal Ballet will "promote and advance the art of the ballet, and in association therewith the literary, musical, and graphical arts, and will foster public knowledge and appreciation of the same." It will have an 18-member Board of Governors under the chairmanship of Lord Waverley. The Queen consented to be Patron of the Royal Ballet, and Princess Margaret to be its first president. (Times - Daily Telegraph)

C. VATICAN. — The Pope's Christmas Broadcast. - Denunciation of Soviet Aggression against Hungary. - Criticism of United Nations.

In his Christmas broadcast from the Vatican on Dec. 23, 1956, Pope Pius XII appealed for world peace, disarmament, and unity among the Western countries; denounced the Soviet aggression against Hungary; and also strongly criticized the United Nations for its differing and "one-sided" approaches to the two recent international crises in the Middle East and Hungary. In the course of his speech the Pope contrasted the severe denunciation of Britain and France at the United Nations with the U.N.'s failure to save the Hungarian people from Communist military aggression. Excerpts from his broadcast are given below:

"... It would be a fatal error to repeat what, in similar circumstances, happened during the years preceding the Second World War: when all the threatened nations, and not merely the smallest, sought their safety at the expense of others; using them as shields, so to speak, and even seeking questionable economic and political advantages from their neighbour's suffering. In the end, all were overwhelmed together in the holocaust....

"A definite need of this [present] period - a means of ensuring the peace of the whole world; a force, too, which embraces the peoples of Asia, Africa, the Near East, Palestine with its Holy Places - is the restoration of European solidarity. But this unity is not assured until all the associated nations realize that the political and economic defeat of one of them cannot, in the long run, result in true gains for the others. It is not strength ... if, in the hour of common peril, criticism—even though justified—of one nation's actions is expressed by the others with such one-sidedness as to cause doubt that any bond of union exists at all.

"There is no longer room for doubt concerning the aims and methods which rely on tanks crashing over borders, sowing death in order to force peoples into a pattern of life they detest ... No-one expects or demands the impossible, even from the United Nations. But one should have the right to expect that its authority should have its weight, at least through observers, in places in which the essential values of men are in extreme danger. Although the U.N.'s condemnation of the grave violations of the rights of men and of entire nations is worthy of recognition, one could nevertheless wish that the exercise of their rights as members of this Organization should be denied to States which refuse even to admit observers—thereby showing that their concept of State sovereignty threatens the very foundations of the United Nations.

"The United Nations ought also to have the right and the power of forestalling all military intervention by one State in another, whatever be the pretext under which it is effected, and also the right and power of assuming, by means of a sufficient police force, the safeguarding of order where it is threatened...

"If we allude to these defects, it is because we desire to see the authority of the U.N. strengthened, especially for effecting general disarmament, which we have so much at heart. Only in the ambit of an institution like the U.N. can the promises of individual nations to reduce armaments, especially to abandon the production and use of certain arms, be mutually exchanged under the strict obligations of international law. Likewise, only the U.N. is at present in a position to exact the observance of this obligation by assuming effective control of the armaments of all nations without exception..."

The Pope concluded his message with an appeal for prayers and help for the Hungarian nation, declaring that the conscience of the world could not abandon "this martyred people." (Times - Le Monde, Paris - New York Times) **(14642 A.)**

D. SOVIET UNION - UNITED STATES. — Soviet Protest against Alleged U.S. Violation of Airspace.

A Soviet Note was handed to the U.S. State Department on Dec. 15 protesting against an alleged violation of Soviet airspace in the Vladivostok area on Dec. 11 by three U.S. bombers.

The Note alleged that the three aircraft which, it stated, had been identified as B-57s had flown across Siberian territory from the Sea of Japan; that the weather at the time had been "clear with good visibility, excluding the possibility of the pilots having lost their direction during the flight"; and that the violation could therefore only be regarded as "deliberate" and for "obvious reconnaissance purposes."

The Note also demanded measures for the punishment of those guilty of the alleged violation, and added that in the event of further violations "the responsibility for the consequences ... will rest fully with the U.S. Government."

U.S. Far East Air Force H.Q. stated on Dec. 17 that they had no knowledge of any flight by American bombers on Dec. 11 which might have resulted in an intrusion over Soviet territory. (Soviet Weekly - New York Times) **(Prev. rep. 15048 C.)**

E. WESTERN GERMANY. — G.C.M.G. conferred on Dr. Adenauer.

The Grand Cross of the Order of St. Michael and St. George, conferred upon Dr. Adenauer by H.M. Queen Elizabeth II on the occasion of his 81st birthday, was handed to the Federal Chancellor on Jan. 5 by the British Ambassador in Bonn, Sir Frederick Hoyer Millar. (Frankfurter Allgemeine Zeitung)

JANUARY 26—FEBRUARY 2, 1957

A. SUEZ CANAL. — U.N. Salvage Fleet for Canal Clearance. - General Wheeler's Plan for Reopening of Canal by May 1957. - Achievements of Anglo-French Salvage Command. - Clearance of Port Said Harbour and Northern Section of Canal. - Withdrawal of Anglo-French Salvage Fleet. - Clearance Operations taken over by U.N. Salvage Organization.

As stated in his third report to the U.N. General Assembly on Nov. 20 (see page 15316), following his discussions in Cairo with President Nasser, the U.N. Secretary-General announced (*a*) that the Egyptian Government had requested the assistance of the United Nations in clearing the Suez Canal of obstructions "immediately upon the withdrawal of non-Egyptian forces from Port Said and the Canal area"; and (*b*) that he (Dr. Hammarskjöld) had given an assurance in principle "that the U.N. would undertake to provide such assistance."

U.N. Salvage Fleet for Clearance of Suez Canal. - General Wheeler's Plan for Canal Clearance.

On Nov. 24, immediately after the General Assembly had approved the resolution on the clearance of the Canal (see page 15317, first column), Dr. Hammarskjöld announced that he had appointed a three-man team to supervise the task of canal clearance, headed by Lieut.-General Raymond A. Wheeler (retd.), formerly Chief of the U.S. Army Engineer Corps. The other two members were Mr. John J. McCloy, chairman of the Chase National Bank and lately U.S. High Commissioner in Germany, and Colonel A. G. Katzin, a member of the U.N. Secretariat.

General Wheeler was chief maintenance engineer for the Panama Canal in 1940-41, and was subsequently Commanding General of U.S. Forces in the India-Burma theatre during the Second World War. Since his retirement from the U.S. Army he had been engineering consultant to the International Bank for Reconstruction and Development. Mr. McCloy was president of the latter body before his appointment in 1949 as U.S. High Commissioner in Germany, a post he held for three years. Colonel Katzin, a South African, was personal representative of the U.N. Secretary-General in Korea, and head of the U.N. Bureau of Personnel.

The Danish and Netherlands Governments had previously sent a joint Note to Dr. Hammarskjöld (Nov. 8) expressing their willingness to send salvage vessels and the necessary equipment to help in clearing the Canal. [As stated in the Secretary-General's report to the General Assembly, referred to above, Dr. Hammarskjöld had been in touch with the two Governments on this matter.] Two leading Dutch and Danish salvage firms—L. Smit and Co.'s Internationale Sleepdienst, of Rotterdam, and Em. Z. Svitzer's Salvage Co., of Copenhagen—subsequently formed a consortium for this purpose, and on Dec. 9 officials and surveyors of these companies arrived in Cairo with General Wheeler for discussions with the Egyptian authorities on technical problems of clearing the Canal.

During the following fortnight General Wheeler had a number of discussions with the Egyptian authorities in Cairo and with the British and French Commanders in Port Said, and also inspected canal obstructions at Ismailia, Suez, and other places. On Dec. 30, after the Anglo-French withdrawal, General Wheeler announced a three-stage plan whereby the Canal would be cleared for ships up to 10,000 tons by early March, and completely cleared for ships of maximum draught by early May, 1957. At the same time he announced that Colonel Yunis, chairman of the Egyptian Canal Authority, had given him the "green light" to start U.N. salvage operations immediately.

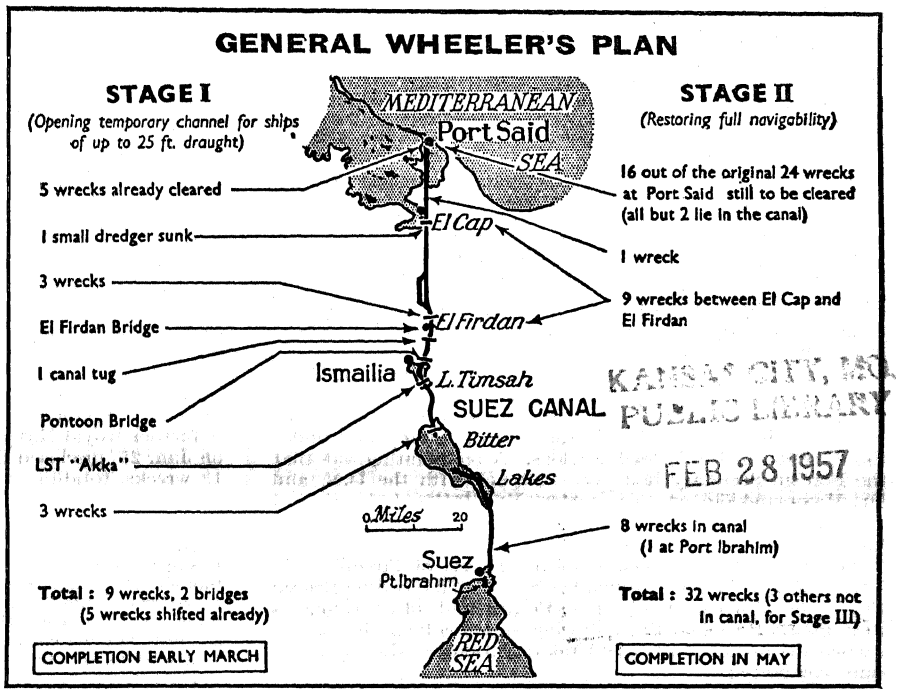
General Wheeler (who had established his headquarters at Ismailia) explained that the clearance plan would be carried out in the following stages, with the full agreement and co-operation of the Egyptian Government and the Egyptian Canal Authority:

(1) The first stage envisaged the opening of a channel for vessels of 25 ft. draught. Between Port Said and "Kilometre 35" (near El Cap, the southernmost limit of that part of the Canal occupied by the Anglo-French forces) five sunken vessels had already been removed by British and French salvage ships, and this stretch of the Canal had accordingly been cleared. The remaining part of "stage one" would involve the clearance of nine more obstructions south of "Kilometre 35" and of two collapsed bridges south of El Cap. It was expected that the whole of this work would be completed by early March, thus permitting limited passage for vessels up to 10,000 tons throughout the length of the Canal.

(2) The second stage would be the removal of over 30 remaining obstructions, concurrently with the necessary dredging operations to restore full navigability. It was estimated that this stage would be completed by early May, by which time the Canal should be open to vessels of maximum draught throughout its entire length.

(3) The final stage would be the removal of obstructions from ports and harbours and the restoration of docks and harbour works. This would proceed concurrently with "stage two."

General Wheeler said that the U.N. had at its disposal an "excellent" salvage fleet of approximately 30 vessels, of



The chart, reproduced from *The Economist*, illustrates General Wheeler's plan for reopening the Suez Canal. The obstructions in the Canal are shown, including those already cleared and those still to be removed.

which 23 had already arrived in the Canal. In addition, some of the British and French salvage vessels at Port Said [see below] had been temporarily incorporated in the U.N. fleet and would work under his directions during January. The Dutch-Danish consortium, as chief contractors for the United Nations, would be responsible for the general management of the salvage operations, assisted by sub-contractors from Belgium, Western Germany, Italy, and Sweden, which were also providing salvage vessels and experts.

Anglo-French Salvage Operations. - Clearance of Port Said Harbour and Northern Section of Suez Canal. - Allied Vessels withdrawn from U.N. Salvage Fleet.

The British Admiralty announced on Dec. 3 that the Suez Canal was blocked throughout its entire length by 51 obstructions, apart from two wrecked bridges south of El Ferdan. [The number of obstructions had not previously been known with exactitude, the British War Office and the Admiralty having at first given a figure of 32, and later of 47, before the final figure of 51.] The vessels scuttled by the Egyptians included tugs, dredgers, barges laden with cement and scrap, salvage vessels, a tank-landing craft, and floating cranes, some of which were totally submerged while others had their upper works above water. As a result, 13 freighters and tankers had been marooned north of the wrecked bridge at El Ferdan and three others south of the bridge, and were thus unable to leave the Canal either by its northern or southern exit. Of the 13 vessels marooned north of El Ferdan, the largest was the 22,000-ton Liberian tanker *Statue of Liberty*, the other 12

vessels—three Italian, two Norwegian, two Liberian, two Panamanian, one Dutch, one Russian, and one Swedish—being between 6,000 and 10,000 tons' displacement.

Prior to the Allied evacuation of Port Said, a joint Anglo-French salvage command for Canal clearance had been set up on Nov. 16 under Rear-Admiral Jean Champion (France), with Captain Podger, R.N., as his deputy. A fleet of 35 British and French salvage vessels, reinforced by two large German salvage ships chartered by the Admiralty, began clearance operations at Port Said on Nov. 23, and had succeeded in clearing a large part of Port Said harbour and one-third of the Canal (the section between Port Said and "Kilometre 35" as mentioned by General Wheeler) before operations were taken over by the U.N. salvage organization.

General Wheeler arrived in Port Said on Dec. 12 for discussions with the British and French authorities about the possibility of incorporating some of the British and French salvage vessels, without their crews, in the U.N. salvage fleet which would take over clearance operations after the Anglo-French withdrawal from Egypt.

At a press conference in Port Said, General Wheeler warmly praised the Anglo-French salvage command for doing "a great job," and said that the British and French had got together "about as fine a [salvage] fleet as could possibly be assembled." According to press correspondents, General Wheeler was said to have remarked that the U.N. could assemble within ten days a salvage fleet comparable to the Anglo-French fleet—a comment, however, which was not officially substantiated.

The remark attributed to General Wheeler was strongly criticized by Lord Hailsham (then First Lord of the Admiralty) during a visit to Port Said on Dec. 14. At a press conference on board H.M.S. *Forth* Lord Hailsham said that his advisers could only "greet with total incredulity" the suggestion that the U.N. could assemble within ten days a salvage fleet comparable to the Anglo-French fleet. Whereas the Anglo-French command already had a large salvage fleet at its disposal, and all the necessary resources, the assembling of a similar U.N. fleet would take "months and months," and it was "nonsense" to suppose otherwise.

In reply to a question in the House of Commons, Mr. R. A. Butler emphasized on Dec. 13 that H.M. Government would in no circumstances agree to the use of British salvage ships without their crews for the clearance of the Suez Canal under the direction of the United Nations. After pointing out that the Foreign Secretary had been in touch with the U.N. and Dr. Hammarskjöld on this matter, Mr. Butler declared that there could be "no question of our ships being used without their crews."

Mr. Selwyn Lloyd declared in the House of Commons on Dec. 17 that a channel through the Suez Canal could be cleared within seven weeks if all Anglo-French and other resources were used. He made the following statement on the Anglo-French discussions with the United Nations on the subject of canal clearance:

"I regret to inform the House that arrangements are not going as well as I had hoped . . . The French and British Governments have offered the whole of their salvage fleet to be used under U.N. auspices, provided the safety of the equipment and crews can be guaranteed. That offer has not yet been accepted.

"It has been suggested that the Anglo-French salvage fleet should be split. First, we have been asked whether we will allow the vessels now engaged in salvage operations in Port Said harbour to continue that work after the withdrawal of our forces. We are prepared to agree to that provided adequate security arrangements can be made for the equipment and crews, and provided the civilian crews are prepared to continue at their work after the withdrawal of Anglo-French forces. That depends on them being satisfied about safe arrangements for their work.

"Secondly, we have been asked whether we will release certain ships now on charter to the Admiralty, particularly two German heavy lifting-vessels. We have said that so far as the Government are concerned, we are prepared to do that. Whether the owners of the vessels will agree is another matter, and precisely the same point will arise about security arrangements for the crews.

"Thirdly, we have further offered six ships to work under the U.N. flag, with U.N. observers on board and with civilian crews, to work south of the area of the Canal previously under Anglo-French control, provided adequate security arrangements can be made and the crews are prepared to continue to serve. That offer has not yet been accepted. It remains open.

"A counter-suggestion has been made that those six vessels should be handed over to the U.N. without their crews, except for three instructors to be left aboard to train new scratch crews of other nationalities in the use of the vessels and their equipment. This in our view is an inefficient and unsatisfactory arrangement. I doubt whether it is practicable.

"So far as the time for clearance is concerned, our estimate is that if all the Anglo-French and other resources are used, a channel can be cleared through the Canal in seven weeks. If no Anglo-French resources are used south of the Port Said area, it would take at least double that time, and probably much more.

"I am sure that the U.N. Secretary-General is acting in the spirit of the understandings which he reached with me. I think it right, however, to put on record that H.M. Government and the French Government, by maintaining their programme of withdrawal without delay, have kept their word. It is for others concerned, both Governments and individuals, to understand that it is essential in the interests of many countries that this matter should be tackled as an emergency operation, and that all available resources of whatever nationality should be used in the most efficient manner. If the period for clearance of the Canal is prolonged, it will have the gravest consequences from the point of view of the economies of many countries of Asia as well as of Europe."

Lord Hailsham announced in London on Dec. 20 that an agreement had been reached between H.M. Government and the United Nations whereby 18 British salvage vessels would remain at Port Said after the Anglo-French evacuation and would continue their efforts to clear the remaining obstructions in the harbour, under the authority of the U.N. salvage organization. The crews of the 18 ships would wear civilian clothes, and the vessels themselves would fly the U.N. flag and would stay at Port Said "until the job is done or until it is indicated that their presence is no longer necessary." To ensure the safety of the vessels and their crews, armed U.N. guards would be posted on each ship and U.N. land forces would patrol one bank of the Canal.

The 18 vessels remaining at Port Said comprised eight Royal Navy ships, eight naval auxiliaries, and the two German vessels on charter – the *Ausdauer* and *Energie*, the biggest salvage vessels of their kind in the world, each with a lifting power of 3,000-4,000 tons as compared with about 1,200 tons in the case of the British salvage ships. A French salvage vessel also remained at Port Said under U.N. authority.

After having completed the clearance of Port Said harbour, the last British vessels at Port Said, together with the French vessel, were withdrawn on Jan. 24, 1957. The two German ships remained behind under charter to the U.N. salvage organization. An Admiralty communiqué, issued on the same day, said that the clearance of Port Said harbour had been "effected with remarkable speed and efficiency" and represented "a unique operation in the history of the Royal Navy." A further Royal Navy statement, issued from Valletta (Malta) on Jan. 25, disclosed that the British salvage fleet had cleared 13 wrecks, totalling nearly 17,000 tons, "in the face of every conceivable form of obstruction and irritation from the Egyptians."

The Admiralty communiqué paid special tribute to the crews of the 18 ships which had remained behind at Port Said. It was pointed out that since the Anglo-French withdrawal these crews had been unable to go ashore and had only very limited amenities aboard their vessels; nevertheless they had carried out their task "with the greatest skill and enthusiasm under difficult conditions, often involving working throughout the night."

In reply to a question by Captain Pilkington (C.), the following statement was made in the House of Commons on Jan. 30 by Mr. Christopher Soames, Parliamentary Secretary to the Admiralty:

"By mid-December the Anglo-French salvage fleet at Port Said consisted of 19 ships, and another 21 were being held in readiness to go to Port Said or Suez. To the best of our knowledge, the U.N. have assembled 17 salvage ships. None of these figures includes tugs. If the Anglo-French salvage fleet had been allowed to proceed with the clearance beyond El Cap from November onwards, the Canal would probably have been cleared for shipping by the middle of this month, certainly by the end of this week. Our salvage fleet has, however, cleared two channels for the largest shipping at Port Said with remarkable speed and efficiency in the face of considerable difficulties. I am sure that all Members will join with me in paying tribute to the magnificent efforts of our salvage forces."

Replying to a further question, Mr. Soames said that so far as was known, there were no technical reasons why General Wheeler's timetable of getting a channel cleared through the whole length of the Canal by the end of March should not be adhered to.

Prior to its final withdrawal, the Anglo-French salvage fleet had cleared the entire northern section of the Canal from Port Said to El Cap (a distance of 23 miles), in addition to clearing the greater part of Port Said harbour. The Anglo-French salvage operations, among the biggest and most intensive of their kind ever undertaken, had succeeded as early as Nov. 25 (i.e. within three weeks of the Allied landings), firstly, in opening Port Said harbour to vessels of 10,000 tons, and secondly, in clearing a channel 180 ft. wide and 25 ft. deep between Port Said and El Cap—an achievement which could have made it possible for the 18 vessels marooned north of El Ferdan to enter the Mediterranean. By the beginning of December this channel had been deepened to 30 ft., while by Dec. 17 a second channel 217 ft. wide and 25 ft. deep had been opened along the eastern bank of the Canal.

As stated above, the 13 vessels stranded in the Canal north of the wrecked El Ferdan bridge could have entered the Mediterranean as early as Nov. 25, owing to the efforts of the Anglo-French salvage fleet in clearing a navigable channel. Permission to leave the Canal, however, was refused by President Nasser, and it was only on Jan. 8 that the 13 ships were able to do so, after being immobilized in the Canal for two months. All the ships were piloted to Port Said by the Egyptian Canal Authority, using the channel cleared by the Anglo-French salvage fleet and successfully skirting a number of wrecks which still remained to be cleared. Originally the vessels were southward bound at the time the Canal was blocked, and they thus had to make a northward "turnabout" for Port Said and the Mediterranean.

The other three vessels which had been trapped in the Canal south of El Ferdan—Liberian and Yugoslav freighters, and a Polish dredger—left the Canal by its southern (Suez) exit on Jan. 28.

United Nations takes over Salvage Operations. - Agreement between U.N. and Egyptian Government.

With the departure of the Anglo-French forces, the U.N. salvage organization was left with the task of clearing that stretch of the Canal between El Cap and Suez—about two-thirds of its length. One of the major obstructions—a 165-ft. steel span of El Ferdan bridge—was removed on Jan. 4-5 by the German salvage vessels, thereby making the Canal navigable from Port Said to Ismailia. On Feb. 1 the *Ausdauer* and *Energie* also removed the 1,400-ton Egyptian tank-landing ship *Akka*—the biggest single obstruction in the Canal.

In a report on the first full month of salvage operations, issued in New York on the same day (Feb. 1), it was stated that more than half the wrecks blocking the Canal had been cleared; that the removal of five more obstructions would make it possible to complete a 25-ft. channel through the Canal able to take vessels up to 10,000 tons; and that the removal of seven more obstructions would allow passage for larger ships.

Dr. Hammarskjöld presented to the U.N. General Assembly on Jan. 11 a report dealing respectively with (1) detailed plans for clearing the Canal under U.N. auspices; (2) an agreement between the U.N. and Egypt on canal clearance; and (3) costs of the clearance operations.

Clearance of Canal. After recapitulating the three-stage plan of canal clearance announced by General Wheeler, the Secretary-General said that "experience in the salvage operation during the first ten days gives every reason for optimism regarding the schedule." He stated that the U.N. salvage fleet "as of January" comprised (*a*) 32 salvage vessels with crews drawn from seven countries outside the conflict—Belgium, Denmark, Germany, Italy, the Netherlands, Sweden, and Yugoslavia; and (*b*) the Anglo-French salvage vessels which would remain "on a scheduled basis for the completion of certain specified work already in hand by these vessels in Port Said harbour"—i.e. the 18 British and one French vessels which had remained at Port Said and were finally withdrawn on Jan. 24.

Dr. Hammarskjöld pointed out that the general management of the salvage operations would be in the hands of the Dutch-Danish consortium; that restoration of the workshops of the Egyptian Canal Authority in Port Said would be undertaken by engineers under the supervision of General Wheeler; that restoration of communications and lighting requirements would be carried out by General Wheeler in conjunction with two U.S. firms, the General Electric Company and the International Telegraph and Telephone Corporation; and that the Egyptian Canal Authority would co-operate in all these projects at all stages.

Agreement with Egyptian Government. This agreement was contained in an exchange of letters (dated Jan. 8) between Dr Hammarskjöld and the Egyptian Foreign Minister, Dr. Fawzi. The Secretary-General's letter was as follows:

"... I am in a position to advise you that the United Nations would be prepared to assist Egypt by undertaking the operations necessary for the speedy clearance of the Canal. The general plans for this assistance would be elaborated in consultation with the Government of Egypt and ... implemented under the instructions of the Secretary-General. The Secretary-General would be authorized by the Government of Egypt to carry out the task as a matter of priority...

"The undertaking would be regarded as a U.N. enterprise, and its personnel would be under obligation to discharge their functions solely in the interests of the United Nations. In keeping with U.N. responsibilities, the [salvage] vessels would fly the flag of the United Nations in place of their national flags. The property and persons engaged in the clearance operation (including the contractors, sub-contractors, and their personnel) would, in view of their U.N. character, be covered by the Convention on Privileges and Immunities of the United Nations, to which Egypt is a party ...

"As the clearance of the Canal has to be completed with the utmost speed, the United Nations, in consultation with the Egyptian Government, will take all measures required in order to avoid unnecessary damage to persons and property. It is understood that the U.N. would not incur responsibility for possible damage to Egyptian ships lying in the Canal from such activities as it considers necessary to speed the clearance of the Canal...

"If the points set forth in this letter are acceptable to the Government of Egypt, this letter and the Egyptian Government's reply will be considered as constituting an agreement between Egypt and the United Nations, effective from the date of the reply."

Dr Fawzi, in reply, expressed his Government's "full agreement on and acceptance of" the terms contained in the Secretary-General's letter. He pledged Egypt's "fullest co-operation and assistance" in the U.N. clearance operations, and said that "the Government of Egypt agrees that your letter and this reply will be considered as constituting an agreement between Egypt and the United Nations."

Costs of Canal Clearance. After recalling the Assembly's resolution of Nov. 26, 1956, Dr. Hammarskjold asked all U.N. members who could do so to assist in providing "interim financing to the extent of not less than $10,000,000." Each member-Government was asked "to indicate ... the measure of assistance it can make in the way of an advance, without prejudice to the nature and extent of its participation in such overall financial settlement as may eventually be agreed upon."

It had earlier been disclosed at U.N. Headquarters (Jan. 3) that Dr. Hammarskjold had approached nine countries—the U.S.A., Norway, Denmark, Sweden, the Netherlands, the German Federal Republic, Italy, Canada, and Australia—for loans to help in financing the initial stages of the canal clearance. The U.S. representative at the U.N. (Mr. Cabot Lodge), announced on the same day that the United States would provide $5,000,000 for this purpose (about £1,785,000). During the following fortnight both the Australian and the German Federal Governments promised loans of $1,000,000 in convertible currency.

British Reply to Egyptian Threat of Discrimination against Anglo-French Shipping.

A broadcast from Cairo Radio on Jan. 6 quoted President Nasser as saying that he would "not allow British and French ships to pass through the Suez Canal so long as Israel does not withdraw from the Gaza strip." Colonel Nasser was also quoted as having said that all ships passing through the Canal in future would be required to pay transit dues directly to the Egyptian Canal Authority.

The British Foreign Office issued a statement on the following day protesting against the statement attributed to President Nasser, and pointing out that the Egyptian Government had given assurances to Dr. Hammarskjold, before the Anglo-French forces left Port Said, that there would be no discrimination against British or French shipping when the Canal was reopened. The Foreign Office statement said:

"The accuracy of this report [i.e. the statement attributed to Colonel Nasser] has not yet been confirmed. If it is correct, it raises issues of the greatest importance. It discloses an intention to discriminate against Great Britain and France on political grounds. Such discrimination would be a breach of the 1888 Convention. It would also be a repudiation of assurances given by the Egyptian Government to the U.N. Secretary-General.

"Before the withdrawal of Anglo-French forces from Port Said, the Foreign Secretary asked the Secretary-General for an assurance that there would be no discrimination against British and French shipping once the Canal was cleared. After communicating with the Egyptian Government, the Secretary-General on Dec. 1, 1956, handed to Sir Pierson Dixon [U.K. representative at the United Nations] the draft of a statement approved by the Egyptian Government.

"This made it plain that there had been no official statement from the Egyptian Government that Egypt was in a state of war with France and the United Kingdom; that there was therefore nothing that should cause the U.K. Government to believe that the Egyptian Government, after the withdrawal of the British and French forces, would interfere with British and French shipping through the Canal; and that there would be no justification for such interference. The Secretary-General ... assured the U.K. Government that this represented also his understanding of the situation."

A spokesman of the British delegation at the U.N. confirmed on Jan. 8 that Britain was prepared to resume negotiations on the Suez Canal dispute at the point at which they were broken off in October. The Egyptian Director-General of Information (Colonel Hatem) stated on the following day that Egypt was ready to negotiate a settlement of the Canal dispute within the framework of the United Nations, but would refuse to negotiate with Britain and France "either directly or indirectly."

The Council of the Suez Canal Users' Association, meeting in London on Jan. 21, adopted a U.S. proposal that it should collect and analyse information "about the economic and transportation changes which have resulted from the closing of the Suez Canal." The Administrator of the S.C.U.A., Hr. Bartels, was entrusted with this study, assisted by experts. (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Algemeen Handelsblad, Amsterdam - Politiken, Copenhagen - Le Monde, Paris)

(Prev. rep. 15316 A.)

A. UNITED KINGDOM. — Defence Economy Cuts. - New Powers for Minister of Defence. - Sir William Dickson appointed Chief of Staff to Mr. Sandys.

Defence economies were announced by the three Service Ministries and the Ministry of Supply on Jan. 15, as follows:

(1) The War Office announced that the call-up of National Servicemen for part-time training with the Territorial Army or the Army Emergency Reserve (including the Mobile Defence Corps) would be suspended for 1957.

(2) The Air Ministry announced that most units of the Royal Auxiliary Air Force would be disbanded by March 10, including the 20 fighter squadrons, the 5 Air O.P. (observation post) squadrons, the 12 Regiment squadrons (used for the ground defence of airfields), and nine of the 30 Fighter Control and Radar Operating units. All flying and other training in these units had ceased.

(3) The Admiralty announced that the Air Branch of the Royal Naval Volunteer Reserve, consisting of 11 squadrons, would be disbanded by March 10.

(4) The Ministry of Supply announced that its orders for *Hunter* aircraft would be reduced by 100 because of reductions in R.A.F. requirements.

Further details in connexion with these measures were given as follows:

Army. It was stated that the statutory obligation of National Servicemen to perform 60 days' training in their 3½ years' part-time service would not be affected by the decision to suspend part-time training in 1957, and that the annual camps for volunteers in the T.A., the A.E.R., and the Mobile Defence Corps would continue. The number of men affected by the decision was variously given in the Press as 80,000 or 120,000, out of about 350,000 National Servicemen in the Reserve Army who are liable for part-time service.

R.A.F. The Air Ministry stated that it had been decided two years ago that it would not be possible to re-equip the auxiliary fighter squadrons with *Hunter* aircraft (the R.A.F.'s front-line jet fighter); and that, subject to review from time to time, these squadrons, with their *Meteors* and *Vampires*, "should assume the operational role of supplementing the country's defence against forms of air attack other than the high-altitude nuclear threat." Technical development, however, had continually reinforced the view that the main threat to Britain was from high-altitude attack; in consequence, other forms of attack, which might be countered by less advanced types of defence, were less likely to materialize.

Although it had been hoped at one time that selected auxiliary pilots might be trained in *Hunters*, it had not been possible to implement this scheme owing to the need to give priority to the training of Regular pilots. Moreover, the supply of trained pilots for the R.Aux.A.F. was likely to be limited in future by restrictions which it had been necessary to impose on the number of National Service entrants accepted for pilot training. With the growing cost of equipment, it had therefore become clear that the auxiliary fighter squadrons could not be retained, even with their present aircraft, except at the expense of Regular units, which must be regarded as the higher priority. The decision to disband the Air O.P. and Regiment squadrons had been taken on similar grounds.

Members of the disbanded squadrons, it was stated, could transfer if they wished to one of the retained fighter control and radar reporting units, or to the R.A.F. Volunteer Reserve. For officers suitable to be earmarked for specific appointments, there would also be vacancies in the R.Aux.A.F. general list. Furthermore, members of the disbanded squadrons could transfer to the R.Aux.A.F. Reserve (an inactive reserve with no training liability and normally no bounty).

The Air Ministry also stated that it would still be necessary, in order to maintain the efficiency of reserve flights supporting operational stations of the R.A.F., to call up a limited number of R.A.F. National Service reservists for training in those flights during 1957.

The disbanding of the units of the R.Aux.A.F. was expected to result in a saving of £5,500,000 and of 17,000,000 gallons of aviation fuel a year. Among the Royal Auxiliary fighter squadrons to be disbanded are the County of Kent Squadron, based at West Malling, of which Sir Anthony Eden is honorary air commodore; the City of London Squadron, at Biggin Hill, of which the Queen Mother is honorary air commodore; the City of Edinburgh Squadron, at Turnhouse, of which H.M. the Queen is honorary air commodore; and the County of Surrey Squadron, also at Biggin Hill, of which Sir Winston Churchill is honorary air commodore.

Royal Navy. The Admiralty stated that officers and ratings affected by the disbanding of the air branch of the R.N.V.R. could change to other R.N.V.R. activities; alternatively, officers could either go on a separate list pending completion of their obligations, or retire if they had completed 10 years' service. Volunteer ratings could obtain a free discharge, and post-National Service ratings could be discharged on to the lists of the R.N. Special Reserve.

The number of men affected was given as 401 pilots and observers, 300 other officers, and 426 ratings. The anticipated savings were about £1,000,000 a year.

Ministry of Supply. The Ministry described the savings to be achieved through the reduction in orders for *Hunter* fighters as "substantial." No figure was officially given, but it was estimated in the Press that the savings would be of the order of £10,000,000.

It was stated in the Press that the economies resulted from organizational adjustments recommended during Sir Anthony Eden's administration, and were not part of the £100,000,000 savings on the current year's Estimates announced earlier by Mr. Macmillan when he was Chancellor of the Exchequer (see 14977 A).

The commanding officers of four of the 20 auxiliary fighter squadrons to be disbanded Nos. 600 (City of London), 601 (County of London), 604 (County of Middlesex), and 615 (County of Surrey) squadrons - issued a joint statement on Jan. 16 criticizing the Government's decision.

The statement said that "past performance has shown that the auxiliary fighter squadrons can do the job which at present is done by the regular squadrons," and that by disbanding the R.Aux.A.F. squadrons the country was "throwing away an organization whose worth is far greater than its face value, employing people whose time is spent productively five days a week, and two days a week in the service of the Crown." The disbanding meant that Britain would lose over 300 fully-trained fighter pilots, as well as over 2,000 trained ground crew.

The new Prime Minister, Mr. Macmillan, made a statement to the House on Jan. 24 on the powers which would be vested in Mr. Duncan Sandys, the Minister of Defence. He explained that Mr. Sandys would be responsible for (1) "formulating, in the light of present strategic needs, a defence policy which will secure a substantial reduction in expenditure and manpower"; (2) preparing a plan "for reshaping and reorganizing the armed forces"; (3) decisions on "all matters of policy affecting the size, shape, organization and disposal of the armed forces and their equipment and supply, including defence research and development, pay, and conditions of service," subject to consultation with the Cabinet, Treasury, and Defence Committee on matters of finance; and (4) decisions on "any matters of service administration and appointments which, in his opinion, are of special importance."

Mr. Macmillan also announced (*a*) that Mr. Sandys would have a Chief of Staff, responsible to him in that capacity, who would be chairman of the Chiefs of Staff Committee; and (*b*) that Marshal of the R.A.F. Sir William Dickson had been appointed to that post, remaining chairman of the Chiefs of Staff Committee. The corporate responsibility of the Chiefs of Staff as the professional advisers to the Government would remain unchanged.—(Times - Daily Telegraph) **(15216 A.)**

B. UNITED STATES. — Foreign Service. - New Ambassadors to Britain, Italy, India, and Japan.

New U.S. ambassadorial appointments to London, Rome, New Delhi, and Tokio were made by President Eisenhower during November and December, as follows:

Mr. John Hay Whitney (52), a prominent financier and sportsman, and senior partner in the New York firm of J. H. Whitney & Co., was appointed Ambassador to the United Kingdom on Dec. 27 in succession to Mr. Winthrop Aldrich (71), retiring. Educated at Yale and Oxford, Mr. Whitney has extensive interests in the films, theatre, and the Turf, and was the founder of the John Hay Whitney Foundation which has carried out educational programmes in the United States. A close friend of President Eisenhower, he has been a member of Presidential commissions dealing with foreign economic policy, State Department personnel, and educational problems. Mr. Whitney served with the U.S. Army Air Force in Europe during the war.

Mr. James D. Zellerbach, a Californian industrialist, was appointed Ambassador to Italy on Nov. 24 *vice* Mrs. Clare Boothe Luce, who had resigned through ill-health. Mr. Zellerbach, president of the Crown Zellerbach Corporation (manufacturers of paper and pulp products), was head of the Economic Co-operation Administration's mission in Rome in 1948-50, and supervised the Marshall Aid programme for Italy during that period.

Mr. Ellsworth Bunker (62), retiring president of the American Red Cross, became Ambassador to India on Nov. 28 *vice* Mr. John Sherman Cooper, who was elected as a Senator for Kentucky in the recent Congressional elections (see page 15238, first column). Mr. Bunker was Ambassador in Rome and Buenos Aires during the Truman Administration. He was succeeded as president of the American Red Cross by General Alfred M. Gruenther, lately Supreme Allied Commander in Europe (see 15336 A).

Mr. Douglas MacArthur (47), a counsellor at the State Department, was appointed Ambassador to Japan on Dec. 17 in succession to Mr. John M. Allison. He is a nephew of General Douglas MacArthur, U.S. High Commissioner in Japan during the post-war years, and Supreme Allied Commander in the South-West Pacific in the Second World War.

Italy's highest decoration—the Grand Star of the Order of Merit of the Italian Republic—was conferred upon Mrs. Clare Luce by the Italian Government on Dec. 18, this being the first time that the decoration had been conferred on a woman. Mrs. Luce, who had been in ill-health for several months prior to her resignation, had been at the Rome Embassy since 1953. (New York Times - New York Herald Tribune) **(15024 D.)**

A. UNITED KINGDOM. — Liberal Party. - Mr. Grimond succeeds Mr. Clement Davies as Leader of Parliamentary Liberal Party. - The Liberal Assembly.

Mr. Joseph Grimond (43), M.P. for Orkney and Zetland, was unanimously elected leader of the Parliamentary Liberal Party on Nov. 5, 1956, in succession to Mr. Clement Davies (72), who had been party leader in the House of Commons since 1945. Mr. Donald Wade, M.P. for Huddersfield West, was elected Liberal Chief Whip in succession to Mr. Grimond.

Mr. Clement Davies, Q.C., succeeded Lord Thurso (then Sir Archibald Sinclair) as leader of the Parliamentary Liberal Party in 1945, and was made a Privy Counsellor in 1947. A leading parliamentarian, and principal spokesman of the Liberal Party in the House of Commons since the war, he declined an offer by Sir Winston Churchill to enter the Government formed by Sir Winston in 1951 (see page 11794, second column). Mr. Clement Davies has been M.P for Montgomeryshire since 1929.

Mr. Grimond, a son-in-law of Lady Violet Bonham Carter, has been M.P. for Orkney and Zetland since 1950. A barrister, he was educated at Eton and Balliol College, Oxford, served in the Second World War, and later worked with UNRRA, subsequently becoming secretary to the Scottish National Trust.

Mr. Clement Davies had announced his resignation on Sept. 29 (the last day of the annual Liberal Assembly, held at Folkestone on Sept. 27-29) on the ground that it was "time that the tiller was placed in the hands of a younger man and that a new voice should be calling on the ship's company." Without referring to Mr. Grimond directly, he said that he could "fortunately step down knowing that there is a worthy successor waiting." Mr. Davies added that he would continue to represent Montgomeryshire until the next general election.

The principal resolutions adopted at the 1956 Liberal Assembly are summarized below:

Foreign Policy and the Suez Crisis. An Executive resolution on foreign policy, calling for wholehearted Anglo-American co-operation, especially in the Middle East, for economic integration in Western Europe, and for a bolder attitude in the "war of ideas," was adopted after the incorporation of an amendment urging the Government to seek a world-wide ban on hydrogen-bomb tests, and to give an example by postponing the British test planned for 1957.

A further resolution on the Suez Canal dispute was also adopted after amendment. It condemned the action of President Nasser in seizing the Canal, expressed dissatisfaction with the Government's handling of the problem, and called for the Suez Canal—together with other important international waterways—to be placed under United Nations control.

Colonial Policy. The Assembly adopted a motion by Miss N Harvey (Women's Liberal Federation) (*a*) demanding that workers in colonial territories should be free to enter any trade, profession, or branch of Government service regardless of race, sex, religion, or place of birth; (*b*) rejecting an economic caste system based on racial differences; and (*c*) condemning the arbitrary restriction of markets.

Free Trade. The following resolution, passed by a very large majority, was sponsored by the Union of University Liberal Societies and the National League of Young Liberals: "This Assembly, recognizing the urgent need within the Liberal Party for a realistic and well-defined approach to the question of free trade, calls upon the Executive to set up a committee to restate Liberal policy upon this issue in the light of present-day economic demands, with a view to implementing the principles of this policy in conformity with the preamble to the constitution of the Liberal Party organization." [The relevant passage in the Liberal Party constitution lays emphasis on the principle of "Liberty under free trade to buy, sell and produce."]

Monopolies and Restrictive Practices. The Assembly accepted an Executive motion calling for (*a*) the progressive abolition of protective tariffs, regardless of the tariffs imposed by other States; (*b*) re-examination of statutory monopolies in agriculture, with particular emphasis on the need for encouraging voluntary and co-operative marketing schemes; (*c*) an intensified campaign against price rings and other restrictive agreements; (*d*) fuller use of the Monopolies Commission, and postponement of the decision to reduce its size and powers; and (*e*) an attack on restrictive labour practices.

Automation. A resolution was moved by Mr. Grimond calling for the acceleration of automation and for policies to ensure availability of the necessary capital and machinery. It was carried after being amended to include the recommendation of co-ownership and joint consultation as means by which some of the problems created by automation might be solved.

Co-ownership. An Executive motion pledging the party to work for the adoption of co-ownership, and accepting the report of a committee on the subject, was adopted with a small number of dissentients. The report had recommended the encouragement of co-ownership by means of financial incentives, and the deferring of legislation to introduce compulsory co-ownership until other methods of encouraging it had been tried.

A ballot resulted in the election of Mr. Frank Byers, Lord Beveridge, Mr. Oliver Smedley, Lady Violet Bonham Carter, Sir Andrew McFadyean, and Mr. Elliott Dodds as vice-presidents of the Liberal Party for 1956-57.

(Prev. rep. Liberal Party, 15007 B; 14220 C.)

B. BRITISH EAST AFRICA.—Defence. - Control and Administration of East African Forces transferred to East African Governments.

The War Office in London and the East Africa High Commission in Nairobi announced on Jan. 16 that control and administration of the East African forces, which had been vested in the War Office since the outbreak of the Second World War, would be handed back to the East African Governments on July 1, 1957.

The responsibilities of the C.-in-C., East Africa Command (at present Lieut.-General Sir Gerald Lathbury) will not be affected, but he will in future be responsible not to the War Office but to the Governors of Kenya, Uganda, and Tanganyika, as well as to the Governors of Mauritius and the Seychelles and the British Resident in Zanzibar.

It was proposed, for reasons of economy and efficiency, that certain administrative functions connected with stores, rations, pay, and records should be performed on behalf of the three Governments by a section of the Administrator's Office of the East African High Commission. This would require the approval of the legislatures of the three territories, and appropriate resolutions would be submitted to them

The announcement added: "The new arrangement will enable the territorial Governments to assume greater responsibilities for the expenditure on the forces, and will permit of a closer control by each Government of the administrative organization needed for the forces."

The East African forces consist of six battalions of the King's African Rifles, of which four are stationed in Kenya, one in Uganda, and one in Tanganyika, with a company in Mauritius. Their cost has been just under £4,500,000 a year, of which the British Army paid about £1,350,000. This included, however, the cost of certain static units (e.g. signals) which Britain maintains in East Africa and for which the Army will continue to pay. The saving to the British Government from the change will therefore be nearly £1,000,000.

It was pointed out in the Press that although the change-over was a reversion to the pre-war system, there would be one important difference, viz., the existence of a G.H.Q. with a Commander-in-Chief meant that the East African forces would continue to be inter-territorial.

(Times - Daily Telegraph) **(Prev. rep. 13732 C.)**

C. RUMANIA. — Details of Soviet Economic Aid.

Further details of the concessions made by the Soviet Government to Rumania within the framework of the economic co-operation agreement of Dec. 3, 1956 (see 15283 C) were given by the Rumanian Prime Minister, M. Stoica, in a broadcast after his return from Moscow. They were as follows:

(*a*) Because of balance-of-payments difficulties caused by the bad harvest in Rumania, the Soviet Union had accepted a revision of the agreement on the repurchase by Rumania of the joint Soviet-Rumanian companies (see 14628 C; 13801 C), reducing its claim by 4,300,000,000 lei. Rumania would thereby acquire, without payment, the former German properties confiscated by the Soviet Union at the end of the war, which had formed part of the Soviet contribution to the joint companies, and would have to pay only for the equipment and installations supplied by the Soviet Union to these companies after the war. It had also been agreed that payment of the amounts owed by Rumania would be extended over a long period and could be made in lei instead of in foreign currency.

(*b*) The U.S.S.R.. had agreed to supply the Rumanian iron and steel industry in 1957 with an additional 380,000 tons of coke and 570,000 tons of iron ore, as well as a large quantity of steel. In return, Rumania would sell various commodities to the U.S.S.R., particularly oil products, timber products, chemicals, and machinery.

(*c*) Rumania would also export to the U.S.S.R. uranium ore at a price which had been fixed above the world market price. The U.S.S.R. would make metallic uranium available to Rumania to the extent required for peaceful uses of atomic energy by Rumania.

(*d*) The U.S.S.R. would supply, on a long-term credit basis, equipment for the construction in Rumania of five large industrial plants, including plants for the production of nitrogenous fertilizers, synthetic rubber, and plastics. The credit, amounting to 270,000,000 roubles, would be repaid by Rumania through the supply of goods to be manufactured by the new plants over a period of 10 years from the commencement of their operation.

(*e*) The U.S.S.R. had agreed to postpone for four years the repayment of all Soviet loans granted to Rumania during the period 1949-1956.

(*f*) As mentioned in the Moscow communiqué, Rumania would receive 450,000 tons of wheat and 60,000 tons of fodder on loan during the first half of 1957 to make up for the effects of the bad harvest. The loan would be repaid within three years from 1959, either in grain or in other goods agreed between the two countries.

M. Stoica emphasized that the Government would concentrate on the development of agricultural production "now that industry has reached a level at which it can satisfy the most important requirements of Rumania's economy."

(Agerpres, Bucharest) **(Prev. rep. 15283 C.)**

A. BAGHDAD PACT. — Ankara Meeting of Asian Members. - Support for U.S. Middle East Policy.

The Prime Ministers of the four Moslem member-countries of the Baghdad Pact—M. Adnan Menderes (Turkey), General Nuri es-Said (Iraq), Mr. Suhrawardy (Pakistan), and M. Hussein Ala (Persia) - met in Ankara on Jan. 19-20, the meeting being also attended by President Bayar of Turkey, Prince Abdul Illah (the Crown Prince of Iraq), and the Foreign Ministers of Turkey, Iraq, and Persia (M. Ethem Menderes, M. Bashayan, and M. Ardalan respectively).

A communiqué issued at the end of the conference stated that it had "discussed the international situation, and particularly developments in the Middle East since the previous meeting in Baghdad in November 1956." The communiqué continued as follows (cross-headings inserted):

The Middle East Crisis. "The conference noted with satisfaction the complete withdrawal of Anglo-French forces from Egyptian soil in compliance with U.N. resolutions and the recommendations of the conference of the four Baghdad Pact Powers in Teheran, which preceded the U.N. resolutions. They welcomed the resolution passed by the U.N. General Assembly which again calls upon Israel to withdraw all its forces behind the demarcation lines. They believe that the maintenance of peace in this region should be the permanent responsibility of the United Nations. They also advocate an urgent settlement of the Palestine question through the U.N., taking into consideration the Arabs' legitimate rights.

The Suez Canal. "The conference expressed the hope that freedom of navigation in the Suez Canal would be guaranteed in accordance with the 1888 Convention, and without infringing the sovereignty of Egypt. The Canal question should be separated from the national policy of any State.

Combating of Subversive Activities. "After studying the situation in the Middle East in general since the previous conference, the four States have concluded that subversive activities are continuing. These activities aim at undermining the existing regimes and the *status quo* of the region. The four States have agreed to adopt firm measures against this subversive propaganda.

The "Eisenhower Doctrine." "The conferees noted with satisfaction that President Eisenhower's plan for the Middle East is based upon realization of the threat posed by Communist aggression and subversion in the Middle East. They fully support measures included in this plan in its present form, considering that the plan aims at maintaining peace and promoting the economic prosperity of this region. They note with satisfaction that this plan does not aim at establishing spheres of influence, nor does it seek to enslave the people of the Middle East.

The Syrian Oil Pipelines. "The conferees again assert the importance of the Baghdad Pact for the interests of the region and of peace throughout the entire world. They deplore the damage to oil pipelines in Syria, which has harmed the economies of the States concerned and caused many difficulties. They recommend that the pipelines be expeditiously repaired, and deplore the delay to date."

The latest Baghdad Pact meeting was the third to be held within two months without British participation. It was authoritatively reported from Ankara, however, that the four Prime Ministers had agreed that a full meeting of all member-countries, including Britain, should be called, probably in Karachi, within the next two months. Immediately after the meeting Crown Prince Abdul Ilah left for London, where he was expected to give British statesmen an account of the meeting. The Pakistani Foreign Minister (Mr. Firoz Khan Noon) had emphasized on Dec. 7 that Britain was still a member of the Baghdad Pact, and had added: "We want Britain to remain in the pact; we also want America to join."
(Turkish Embassy Press Office, London - Pakistani High Commissioner's Office, London - Times - Daily Telegraph)
(Prev. rep. Baghdad Pact, 15247 C; 15230 A.)

B. UNITED STATES. — "Collier's" Magazine ceases Publication.

Two of the oldest and best-known magazines in the United States—*Collier's* and *Woman's Home Companion*—issued their last numbers on Dec. 20, 1956. *Collier's* had been in existence for 68 years and *Woman's Home Companion* for 88 years.

Mr. Paul C. Smith, president of the Crowell-Collier Publishing Company (which owned both magazines), explained that it had been decided to close them down because they had cost the company $7,500,000 (about £2,700,000) in 1956, thus converting the company's profit on its other publishing activities into a net loss of $2,500,000 on the year. The decision had been taken in spite of the fact that both magazines had established new sales records, each having topped the 4,000,000 mark in the weeks before publication was suspended. Mr. Smith added that *Collier's* title and subscription-list had been taken over by *Look* magazine, also published by the Crowell-Collier company.

Collier's was founded in 1888 by Mr. Peter F. Collier, a salesman and publisher of religious books. Its original title, *Once a Week*, was changed to *Collier's Weekly* in 1895. The magazine changed to fortnightly publication in 1953.
(New York Times - New York Herald Tribune)

C. AUSTRIA. — Death of President Körner.

Dr. Theodor Körner, President of the Austrian Republic, died in Vienna on Jan. 4, aged 83.

Theodor Körner von Siegringen was born at Komorn (Hungary) in 1873, the son of an artillery captain in the Imperial and Royal (*K. und K.*) Austro-Hungarian Army. Entering the Army himself at an early age, he was a lieutenant-colonel at the outbreak of the First World War, took part in the Serbian and Italian campaigns, and in 1917 was Chief of Staff of the Austro-Hungarian forces on the Isonzo front in Italy. He was one of the few officers of aristocratic descent in the *K. und K.* Army to take the oath of loyalty to the new Austrian Republic which came into existence in 1918 after the dissolution of the Dual Monarchy.

After serving as the first Inspector-General of the Republican Army, General Körner retired from active service in 1924 and joined the Socialist Party, renouncing his aristocratic title and dropping the "von" from his name. As the party's principal military expert he helped to organize the Republican Defence Corps, a para-military formation formed by the Socialist Party to combat the right-wing *Heimwehr* organization. He was elected to the *Bundesrat* (the Austrian Upper House) in 1925 for the City of Vienna, and was President (Speaker) of the *Bundesrat* when the Austrian Parliament was dissolved by the Dollfuss-Starhemberg *coup d'état* in 1934. Dr. Körner protested strongly against the unconstitutionality of the Dollfuss regime and was imprisoned for 11 months, being eventually released without having been brought to trial.

Dr. Körner refused several Nazi offers to re-enter military service after the *Anschluss*, living in complete retirement during the Nazi regime and the Second World War. He was arrested by the Gestapo in 1944, together with other Austrian Socialist leaders, but was released within a few weeks. After the liberation of Vienna in 1945 he was nominated by the Socialist Party as Burgomaster of Vienna, his appointment to that post being approved by the Soviet occupation authorities. As Burgomaster from 1945 until 1951, when he became President of the Republic, Dr. Körner played an outstanding part in restoring normal life to the war-shattered capital.

On the death of President Renner in 1951, Dr. Körner was nominated for the Presidency by the Socialist Party and won the presidential election by a narrow margin over Dr. Gleissner, the candidate of the (Catholic) People's Party. President Körner had been in ill-health for many months before his death, and it was understood that he would not have sought re-election when his term of office expired in May 1957.

It was announced in Vienna on Jan. 15 that presidential elections would be held on May 5. The Austrian Chancellor, Dr. Raab, took over the presidential functions *ad interim* until the elections.—(Wiener Zeitung) **(Prev. rep. 11487 A.)**

D. SCIENTIFIC RESEARCH. — Production of Synthetic Petrol claimed by British Inventor.

A Sheffield consulting engineer, Mr. William Harthill, announced on Jan. 11 that he had been given permission by the Ministry of Fuel and Power to start producing synthetic "off-the-ration" petrol made to a secret formula which he had discovered. Mr. Harthill said that the synthetic fuel could be made in quantity from materials easily available in Britain; that it was equivalent to premium grades of petrol; and that he expected to supply "about 30,000 gallons a week at first, and later greatly increase the figure." He stated also that he had been interviewed by representatives of large haulage and transport concerns and was unable to "cope with all the orders that are flowing in." The proprietor of a Sheffield motoring school stated that tests of the fuel had shown its ability "to do anything that ordinary petrol will do."

Mr. Harthill, accompanied by Mr. John Hynd (Labour M.P. for Attercliffe, Sheffield), had previously visited the Ministry of Fuel and Power and given details of his project. It was stated at the Ministry that a letter would shortly be sent to Mr. Harthill giving the Minister's decision on his plan. Mr. Harthill shares the secret of his formula with a metallurgist friend who helped him with the invention, and with his solicitor.—(Times - Daily Telegraph - Manchester Guardian)

E. NORWAY. — Anglo-Norwegian Educational Trust.

The formation of an Anglo-Norwegian Educational Trust to enable selected Norwegian boys to be educated at English public schools was announced in Oslo early in January. The initiative in this direction had been taken in Norway a year earlier, whereby three Norwegian boys had already been sent to English public schools with scholarships from Norwegian sources. Under the new scheme, opportunity for education in England will not, as hitherto, be confined to the sons of well-to-do parents, though the parents will be required to contribute something toward the costs of the boys' education. The chairman of the trust is Mr. Walter Hamilton, Headmaster of Westminster School, the other members including the Norwegian Ambassador in London, Hr. Prebensen.
(Norwegian Embassy Press Office, London)

A. MALTA. — British Acceptance of Round-table Commission Report. - Forthcoming Legislation on Integration. - Settlement of Anglo-Maltese Financial Dispute. - The Rediffusion Incident.

Developments in the Maltese situation since the referendum on the constitutional status of the island (see 14712 A), which showed a majority of votes in favour of integration with the United Kingdom, are summarized below under cross-headings.

British Government's Acceptance of Report of Round-table Conference. - Statement by Mr. Lennox-Boyd.

The British Colonial Secretary (Mr. Lennox-Boyd), in a statement to the House of Commons on March 26, 1956, announced that H.M. Government "unconditionally" accepted the report of the Round-table Conference on Malta (see 14589 A).

After rejecting the idea of a "two-package" arrangement, as had been proposed in the minority report of Mr. Maclay and Mr. Pickthorn, Mr. Lennox-Boyd replied to various objections that had been raised to the integration of Malta with Britain. He disagreed with the view that such integration might become a precedent for other Colonial territories, pointing out that the position of Malta was distinguished, among other things, by the facts that integration would come about of the people's own free will; that the island was geographically close to Britain and had a record of special distinction and association with Britain in two World Wars; and that its economy was very largely dependent on expenditure by British departments, especially the Defence departments.

Reviewing the results of the referendum and the findings of the Round-table Conference, Mr. Lennox-Boyd said that although all parties in Malta wanted the British base on the island to be maintained, they held differing views on the constitutional issue and had shown no disposition to reach a compromise. On the question of economic aid, H.M. Government accepted the proposals contained in the report of the Round-table Conference, but stressed that integration would not commit Britain to provide financial assistance to Malta "in excess of the levels envisaged in the report." As regards apprehensions about the effects of integration on the position of the Roman Catholic Church in Malta, Mr. Lennox-Boyd recalled that both he and the Prime Minister had already given assurances that the rights and position of the Church would be in no way affected by integration. The Imperial Government could not interfere in the relations between the Maltese Government and the Church, and full religious freedom was guaranteed under the present Constitution and would be guaranteed in any new Constitution.

The House "took note" of the report of the Round-table Conference after Mr. Aneurin Bevan, on behalf of the Opposition, had expressed support for the integration proposals. Prior to the debate, the Prime Minister (then Sir Anthony Eden) had had discussions on the future of Malta with Mr. Gaitskell and Mr. James Griffiths (leader and deputy-leader of the Opposition) at 10, Downing Street, after the Opposition had expressed its willingness to co-operate with the Government in finding a satisfactory solution to the Maltese problem.

The Governor of Malta (Major-General Sir Robert Laycock) had visited London from Feb. 23-38, 1956, for discussions with H.M. Government in the light of the referendum results. On his return journey to Valletta he visited the Vatican for talks with Papal officials on the position of the Roman Catholic Church in Malta after the island's eventual integration with the United Kingdom.

Implementation of Round-table Conference Recommendations. - Forthcoming British Legislation.

The British Government's decisions with regard to the further steps to be taken in implementing the recommendations of the Round-table Conference were announced by Sir Anthony Eden in the House of Commons on March 28, 1956. Sir Anthony said: "H.M. Government have decided to proceed with legislation to give effect to the recommendations of the report. The Bill will provide for all the necessary changes involved in carrying the report into effect. However, that part of the Bill relating to the representation of Malta in this House will be brought into operation only if and when the Maltese people have shown their desire for it in a general election following a dissolution of the Maltese Legislative Assembly. The Maltese Prime Minister has said he will request the Governor to grant this."

In reply to questions, Sir Anthony stated that the proposed Bill would pass through all its stages before the next general election in Malta. He gave assurances that the Government would proceed on the basis of the existing Constitution in drafting the Bill, and that they would do everything in their power to obtain full agreement on its provisions from all the Christian denominations in Malta.

Sir Anthony Eden's announcement was warmly welcomed by Mr. Mintoff, the Prime Minister of Malta, who was in London at the time.

Mr. Mintoff said that the British Government's decision had brought to an end a period of uncertainty, and that the people of Malta would "rejoice at the prospect, which was now in sight, of losing their colonial status." Commenting on the future representation of Malta in the Imperial Parliament, Mr. Mintoff said that Maltese members would not be elected to sit at Westminster until there was a general election in Britain. He believed that the main Maltese political parties would align themselves with their British counterparts, and that the Maltese Labour and Nationalist members at Westminster would accept the British Labour and Conservative whips respectively.

Mr. Mintoff also expressed the hope that the controversy between the Maltese Labour Party and the Roman Catholic Church would now be ended in view of the assurances given by Government and Opposition spokesmen in the House of Commons on March 26. A statement issued by the Archbishop of Malta's press office, however, said that there was no change in the Archbishop's attitude, which had the support of the Vatican. [Mr. Mintoff subsequently announced on July 22 that the Archbishop had intimated that he would be satisfied with the guarantees given in the House of Commons debate.]

The Financial Dispute. - Appointment of Economic Commission for Malta. - British Financial Assistance for Maltese Budget.

Mr. Mintoff arrived in London again on June 18, 1956, for talks with the Colonial Office on financial aspects of the integration proposals. The talks broke down on June 21, however, owing to disagreement over the amount of U.K. financial aid for Malta during the financial year 1956-57.

It had been agreed at the Round-table Conference of 1955 that a "clear understanding" should be arrived at between the two Governments on the maximum annual amount of financial aid which might be extended by Britain to Malta during the next few years. The report of the conference also referred to the contribution for the year 1955-56—between £4,000,000 and £5,000,000, which included, in addition to the grant-in-aid, substantial sums from the War Damage and Colonial Development Funds, etc.]

The Colonial Secretary made a statement on his talks with Mr. Mintoff to the House of Commons on June 29, 1956.

Mr. Lennox-Boyd pointed out that the British Government's attitude was based on the recommendations of the Round-table Conference, but the Maltese Government had rejected these recommendations and had asked for their 1956-57 Budget to be considered on its own merits. Analysing the demands made upon the basis of that Budget, the Colonial Secretary said: "While expenditure was to rise by £4,250,000 or nearly 45 per cent over last year, Maltese revenue was to rise by only £250,000, or about 3 per cent over last year. H.M. Government were thus being asked to meet practically the whole of the increased deficit and thus to increase their contribution from £4,250,000 last year to over £8,000,000, or by nearly 90 per cent. H.M Government were prepared to consider granting this year total assistance at the level of £4,000,000, as recommended by the Conference 'for the next few years.' However, the Maltese Government, having at first maintained that they could not modify their proposals in any way, were at the end of the talks prepared to consider a reduction of less than £500,000 in expenditure, with no increase in domestic revenue, leaving H.M. Government's commitment at £7,500,000." Mr. Lennox-Boyd added that Mr. Mintoff had rejected any substantial modification of his proposals as unacceptable, since aid at the level of £5,000,000 would give rise to serious unemployment in Malta.

Outlining the proposals he was making to Mr. Mintoff with a view to resolving the deadlock, Mr. Lennox-Boyd said that in order to allow the Maltese Government to re-phase its expenditure, he had suggested "an arrangement whereby an agreed Budget would be drawn up on a basis of 18 months from April 1956, H.M. Government's contribution being fixed at £7,500,000." At the same time H.M. Government would appoint an Economic Commission "to examine and report upon the issues involved, in the light of the recommendations of the Round-table Conference."

Mr. James Griffiths (Lab.) suggested that the Maltese Government should be allowed to continue at the present rate of expenditure for three months to allow time for consideration, rather than that unemployment should occur in the island. **Mr. Gaitskell** expressed concern lest the integration proposals should fall through as a result of the disagreement, and asked the Colonial Secretary to undertake to negotiate "this very small difference."

Mr. Lennox-Boyd, in reply, stressed that he was anxious to see that the integration plans did not fail, but that it was not "a matter that can be settled by £1,000,000 or so." He added. "The provision for this year would involve larger sums for the next two or three years. I have made what should be regarded as a generous approach in this matter, and I hope the Maltese Prime Minister will make a similar one."

Mr. Mintoff, speaking in the Maltese Parliament on the same day, maintained that the funds he had asked for were the minimum necessary to prevent unemployment, and that the Round-table Conference had imposed no ceiling upon financial aid. On June 30, however, he announced that he had conditionally accepted the Colonial Secretary's new offer and was willing to resume negotiations. On the same day the Governor of Malta gave his assent to an Appropriations Bill which had been presented to the Maltese Parliament on the assumption that the British contribution for the year would be between £6,500,000 and £7,000,000.

Nevertheless, fresh difficulties over the financial arrangements between Britain and Malta arose during August. Addressing the Maltese Labour Party conference on Aug. 12, Mr. Mintoff spoke of an "approaching economic and constitutional crisis in Malta," said that the Maltese Government's available funds would be exhausted by the end of the month, and alleged that "not a halfpenny" of the promised £5,000,000 from Britain had reached Malta.

In a statement issued on Aug. 14 the Maltese Government referred to a "general malaise" in Malta resulting from disputes that had arisen between the British and Maltese Governments. It accused Britain of evading the immediate financial problems, and of taking an excessive time to formulate the terms of reference of the proposed Economic Commission. "The Maltese Government," the statement continued, "is thus going to be placed in a position in which funds will have to be voted by the Legislative Assembly without knowledge of the source from which the money is to come, or whether there will be any source at all." After complaining that no progress had been made by the Colonial Office on the constitutional issue, the statement concluded: "All this accumulation of evidence throws doubt on the British Government's real willingness to steer Malta on the road of integration in the true spirit of the recommendations of the Round-table Conference as endorsed by the House of Commons. In these circumstances the Maltese Government have appealed to the British Prime Minister. They have drawn his attention to the deteriorating state of affairs, and have requested urgent high-level political decisions. It is their hope that this appeal will not be made in vain."

A Colonial Office spokesman, replying to the Maltese Government's charges, stated on Aug. 15 that a total of £2,208,282 had been paid by the U.K. to Malta since April, including a grant-in-aid payment of £1,174,032. There had also been a grant-in-aid payment of £800,000 in March.

On Aug. 17 it was announced by the Colonial Office that H.M. Government was prepared to give immediate financial aid to Malta on receipt from the Maltese Government of a statement of its foreseeable cash needs at the end of the month.

The announcement pointed out that under the existing financial arrangements agreed upon in July, 1955, the Maltese Government had undertaken to provide Britain with quarterly statements of its revenue and expenditure and the level of its cash reserves, but that no such statement had been made in respect of Malta's requested grant-in-aid for the current year.

After receiving the appropriate financial statement, the Colonial Office announced on Aug. 21 that a grant-in-aid payment of £500,000 would be made to the Maltese Government to enable it to meet its immediate cash needs for the next three months.

As a result of further discussions, held in London from Sept. 4-7, 1956 between Mr. Mintoff and officials of the Colonial Office, agreement was reached on the appointment and terms of reference of an Economic Commission to report on financial aid from Britain to Malta. Pending the commission's report, the British Government undertook to make a further interim grant to Malta of £1,000,000.

It was announced on Sept. 7 that the Economic Commission would consist of Sir George Schuster and Sir William Scott, and that its terms of reference would be "to examine the Maltese Government's budgetary proposals for the 18-month period from April 1, 1956, and to make recommendations as to the level of budgetary expenditure during the period and on the budgetary contribution which should be made by the U.K. Government during that period."

Sir George Schuster was Financial Secretary of the Sudan Government (1922-27) and Finance Member of the Viceroy of India's Executive Council (1928-34); in 1950 he had advised the Maltese Government on economic and financial matters. Sir William Scott was formerly head of the Northern Ireland Civil Service.

The Commission arrived in Malta on Sept. 20 and completed its enquiry during the first half of October. Shortly after its return to Britain, Mr. Mintoff visited London from Oct. 17-23 for further talks with the British Government on financial and constitutional problems.

As a result of these discussions, and the interim report of the Economic Commission, Mr. Lennox-Boyd announced on Nov. 5 that H.M. Government had taken the following decisions on further financial aid to Malta:

H.M. Government, Mr Lennox-Boyd stated, accepted the Maltese Budget proposed by the Economic Commission for 1956-57, and had agreed to make available from U.K. funds the amounts necessary to meet the Budget deficit. These amounts would be:—(i) up to £1,731,703 for war damage and reconstruction; (ii) up to £225,000 for emigration; (iii) up to £343,000 from Colonial Development and Welfare funds; (iv) subject to the approval of Parliament, up to £3,361,002 for a grant-in-aid of administration.

H.M. Government had also agreed that the balance of the Consolidated Revenue Fund should be £1,000,000 at the end of 1956-57, and would make such payments, within the amount of grant-in-aid of £3,361,002 recommended by the Economic Commission, as were necessary to maintain the balance at that figure. The Maltese Government, for their part, had agreed to meet from the fund the cost of any recoverable loans to be advanced in 1956-57. They recognized that H.M. Government were not committed by these arrangements to the maintenance of the balance in the fund as a permanent part of their financial arrangements with Malta.

H.M. Government would also be ready to consider a supplementary grant for certain items mentioned by the Economic Commission in their interim report, and of certain other items to which they had subsequently drawn attention. In considering any such changes in the Budget, the cost of which could not be met from savings, H.M. Government would consider themselves free to review the question of the level at which the balance of the Consolidated Revenue Fund was to be maintained at the end of the current financial year.

Mr. Mintoff stated on Feb. 3, 1957, that he intended to visit London in a few days with a delegation to conduct constitutional and economic talks with the British Government. He stated that an amount exceeding Britain's £5,500,000 grant for the financial year expiring on March 31, 1957, would be demanded, and also announced that a commission was in Malta studying the possibilities of retrenchment as well as of further taxation. Mr. Mintoff said that although the British Government had not yet agreed to "economic equivalence" between Malta and Britain, "three-quarters of integration was in the bag." If and when it was granted, as the Malta Labour Party desired, there would be a general election, in which the religious issue would not arise because guarantees would have been embodied in a constitutional instrument before the elections took place.

The Rediffusion Incident.

Some 48,000 subscribers to the radio rediffusion service in Malta were deprived of this service on Aug. 12, 1956, when Mr. Mintoff gave orders for the transmission lines to be put out of action during the course of a dispute with Rediffusion (Malta) Ltd., the British-owned operating company.

The dispute arose as a result of a broadcast made on the orders of the British Government, but without reference to the Maltese Government, directing bathers and fishermen to keep clear of parts of St. Paul's Bay and Marsaxlokk Bay, which were to be used as emergency landing areas for flying-boats in connexion with the evacuation of British women and children from the Canal zone during the Suez crisis. Mr. Mintoff immediately instructed Rediffusion to broadcast a Maltese Government announcement to the effect that the earlier warning had been made without its approval, and that fishermen should ignore it. After consulting the Governor, however, the company broadcast the Maltese statement without the instruction to fishermen to ignore the warning. The Maltese Cabinet thereupon decided in the early hours of Aug. 12 to put Rediffusion out of action from 10 a.m. on that date, and Government workmen were sent to cut the company's cables.

[Under the existing division of powers in the Island between the Maltese and U.K. Governments, the immediate authority for licensing the rediffusion service is vested in the Maltese Government, and broadcasting generally comes within its sphere of responsibility. Nevertheless, in that part of the broadcasting service dealing with matters reserved to the Imperial side of the diarchy (including foreign affairs, defence, civil aviation, and public safety), control of broadcasting rests with the U.K. Government.]

Rediffusion remained out of action until Sept. 4, 1956, when, during Mr. Mintoff's visit to London, the Colonial Office issued a statement announcing that agreement had been reached between the two Governments and Rediffusion (Malta) Ltd. The statement attributed the incident to "a misunderstanding, for which the Company was not responsible, in a complicated situation," and announced that the rediffusion service was being re-established.

Maltese National Insurance Scheme. - Reciprocal Social Insurance Agreement with Britain.

A national insurance scheme, covering all employed persons over the age of 14, came into operation in Malta on May 8, 1956. The scheme covered cash benefits in respect of sickness, unemployment, marriage, widowhood, orphanhood, old age, and industrial injury.

An agreement providing for reciprocal social insurance coverage was signed by the British and Maltese Governments in Valletta on Oct. 26. Under the agreement, a person insured in either country will be entitled to draw benefits in the other under the social insurance legislation in force in both countries. (Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times) **(Prev. rep. Malta, 14712 A; 14589 A.)**

A. NETHERLANDS. — Emigration in 1956.

Figures recently issued in The Hague showed that 56,000 Netherlands nationals emigrated during 1956, the principal destinations (1955 figures in parentheses) being as follows: Australia, 11,000 (13,000); United States, 9,500 (4,000); Canada, 7,000 (6,500); South Africa, 1,800 (2,800); New Zealand, 1,300 (1,200); Rhodesia, 350 (440); Brazil, 300 (440). (Netherlands News Agency) **(Prev. rep. 13538 E.)**

A. UNITED KINGDOM. — Coal Production in 1956. - Review of Coalmining Industry in Decade since Nationalization.

Provisional figures published by the Ministry of Fuel and Power on Jan. 1, 1957, gave the total output of saleable coal in 1956 as 222,004,000 tons (209,929,600 tons deep-mined and 12,074,400 tons opencast), compared with 221,551,400 tons (210,185,700 tons deep-mined and 11,365,700 tons opencast) in 1955.

The output of saleable mined coal by Divisions in 1956 and 1955 was as follows :

Division	1956	1955
Scottish	21,480,900	22,036,100
Northern	13,692,000	13,483,900
Durham	25,601,500	25,582,200
North-Eastern	43,640,900	43,898,000
North-Western	15,707,800	15,629,800
East Midlands	46,272,500	46,064,200
West Midlands	17,728,200	17,738,500
South-Western	24,119,900	24,226,700
South-Eastern	1,685,900	1,526,300
	209,929,600	210,185,700

The increase of over 450,000 tons in total output, as compared with 1955, was achieved with a smaller labour force, the total number on the colliery books averaging 703,300 in 1956 as compared with a weekly average of 704,200 in 1955. Nearly 1,000,000 fewer tons of coal were lost through disputes than in 1955.

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the fourth quarter of 1956 :

	Saleable Mined Coal Produced Tons	Plus Open-cast Tons	Total Pro-duction Tons	Inland Con-sumption Tons	Overseas Shipments & Bunkers* Tons
October ..	4,302,675	258,000	4,561,575	4,196,500	179,750
November	4,438,200	280,225	4,718,425	4,521,250	204,000
December	3,962,325	202,125	4,164,450	4,761,250	201,000
4th Quarter	4,234,400	247,080	4,481,480	4,493,000	194,917

	Wage-earners on colliery books Total	Wage-earners at coal-face	No. of shifts worked per wage-earner	Output per manshift at coal-face Tons	Output per manshift over-all Tons	Per-centage of absentee-ism
October ..	702,050	284,800	4 92	3.337	1.236fi	12.72
November	716,725	284,850	4.99	3.385	1.258	12.32
December	703,150	285,025	5.10	3,394	1.267	11.00
4th Quarter	707,308	284,892	5.00	3.372	1.253	12.01

*Including fishing vessels but excluding coastwise bunkers.

Coal output in the week ended Dec. 15, 1956 (5,063,000 tons) was the highest since December 1937. The previous best weekly output since nationalization (approximately 5,000,000 tons) was achieved in the week ended Dec. 19, 1953.

Other recent developments in the coal industry are summarized below :

Underground Coal Gasification. The National Coal Board announced on Dec. 13 the appointment of Sir Alexander Gibb and Partners as consultants in the development of underground gasification. A contract had been given to Humphreys and Glasgow Ltd., London, for work in connexion with a pilot plant at Newton Spinney (near Chesterfield) which was expected to be delivering gas by the end of 1958 to a 5-megawatt generating plant to be built by the Central Electricity Authority. It was explained that the coal at Newton Spinney was not worth mining by ordinary methods owing to its high ash content.

N.C.B. Quarterly Accounts. The N.C.B.'s accounts for the third quarter of 1956 showed an estimated loss (after allowing for £5,750,000 interest) of £1,226,411, compared with a surplus of £1,678,186 for the previous quarter and a loss of £4,970,682 in the third quarter of 1955.

New Chairman of North-Eastern Division. The N.C.B. announced on Nov. 27 that Mr. W. H. Sales, the Board's industrial relations member, would succeed Major-General Sir Noel Holmes (retiring) as chairman of the N.E. Division on Jan. 31, 1957. It was explained that Mr. Sales (at one time a working miner) would bring "special gifts and experience" to the task of improving labour relations, which —especially in the Yorkshire coalfield—had been "unsatisfactory for a long time."

Yorkshire Miners' "Charter of Conciliation." A "charter of conciliation," providing for Yorkshire colliery disputes (delay in the settlement of which had been a frequent source of unofficial strikes) to be dealt with at pit level in future, was unanimously accepted by the Yorkshire area council of the National Union of Mineworkers on Nov. 26.

The completion of the first 10 years of public ownership of the coalmining industry was marked by the publication by the National Coal Board on Dec. 31 of a booklet bearing the title *British Coal: The Rebirth of an Industry.*

Mr. James Bowman, chairman of the N.C.B., stated in an introduction that without any increase in its labour force the industry now turned out seven tons of coal for every six tons produced in 1946. "The Board," he continued, "was created to take over an industry much of which had for many years been declining in output, in equipment, and in good will. In the 10 years since then the coal industry has been reborn. It is transforming the means by which it does its job and the spirit in which that job is done . . . Coal has provided the nation with the resources to weather the first critical decade of the post-war world. Even in an age of oil and atomic energy, it will continue to be the mainstay of Britain's economic prosperity."

British Coal stated that in 1955 power-loading appliances had handled 23,000,000 tons of coal, compared with only 7,000,000 tons in 1951, and that the 1955 figure would be doubled by 1958. Over 180 major projects, each taking from three to 10 years to complete, had already been begun, and 150 more were planned for the next 10 years. The cost of these projects would range from £250,000 to "many millions" each, and in the next decade the industry's expenditure on such projects and on new plant would average £100,000,000 a year. (Ministry of Fuel and Power - Times - Daily Telegraph)

B. NORTH VIETNAM. — "Democratization" of Communist Regime. - Changes in Agrarian Policy. - Dismissal of Secretary-General of Communist Party. - Agrarian Riots in Central Annam.

Hanoi Radio gave details on Nov. 2, 1956, of a programme of "democratization" which had been drawn up by the North Vietnamese Government and President Ho Chi-Minh. It included the holding of general elections in 1957; the "development of the democratic organs of the people"; an extension of the powers of the present National Assembly; measures to "ensure respect for the people's democratic rights and to strengthen the bases of democratic legality"; abolition of the "people's courts" set up to carry out agrarian reforms; greater freedom of movement and expression; and the improvement of living conditions through "a more reasonable wage system."

It was officially stated that these reforms had been made necessary by "grave mistakes" in the enforcement of the agrarian reform laws and in the administration of justice. In addition, it was announced that three leading officials who had been largely responsible for the agrarian reform programme had been relieved of their posts—among them M. Truong Chinh, the secretary-general of the Laodong (Communist) party.

President Ho Chi-Minh had previously criticized the implementation of the Government's agrarian policy in a "letter to the peasants" issued on Aug. 17, and had announced that the party and the Government had agreed on a programme of reforms. Under this, persons who had been wrongly classified as "landowners" and "rich peasants" would be reclassified; party members and others who had been unjustly punished would be rehabilitated; special consideration would be shown to landowners who had supported the revolution; and "mistakes" in the land reform policy would be rectified.

Reports published in *Le Monde* (Paris) and *The Times* described some of the excesses which had taken place in the implementation of the land reform programme since the end of 1953. Many peasants who had taken an active part in the fighting against the French had wrongly been classified as "landowners" and had had their land confiscated, while the productive capacity of the redistributed land had often been greatly over-estimated by inexperienced officials, mostly drawn from the army. The "trials" of landlords, at which thousands of peasants had assembled to "judge" one man, had been characterized by a complete lack of procedure, and had usually ended with the accused being shot or even tortured to death.

During the summer and autumn of 1956 Government representatives had undertaken an inquiry into the peasants' grievances and the judgments of the "people's courts," resulting in the release of several hundred imprisoned "landowners" and the arrest of party "cadres" responsible for abuses. Mass meetings of workers in the towns were allowed to express strong criticisms of the activities of the party "cadres," the taxation system, and the food situation, while the Government's attitude toward religious bodies—in particular, toward the French Bishops of Langson and Sontay—assumed a more liberal character during the same period.

Serious disturbances took place from Nov. 11-14, 1956, in the area north of Vinh, in Central Amman. The Communist organ *Nhan Dan* stated that "reactionaries" had "taken advantage of the mistakes committed in the introduction of agrarian reforms in an area populated mainly by Catholics to foment disorders," and had been joined by local troops. A number of people were killed or wounded, including several soldiers, in a clash between rioters and Government troops. The disturbances were regarded as particularly significant because the Vinh area had been under continous Vietminh control since 1945 and had played a leading part in the struggle against French rule. (Le Monde, Paris - Times)

A. UNITED STATES.—President Eisenhower's State of the Union Message.

President Eisenhower delivered his State of the Union message at the first session of the new (85th) Congress on Jan. 10. The President gave the broad outline of the Administration's domestic and foreign policy, speaking as follows (cross-headings inserted):

America's Role in the World. "I appear before Congress to report on the State of the Union and the relationships of the Union to the other nations of the world. I come here firmly convinced that at no time in the history of the Republic have circumstances more emphatically underscored the need, in all echelons of Government, for vision and wisdom and resolution . . .

"In the world today, the surging and understandable tide of nationalism is marked by widespread revulsion and revolt against tyranny, injustice, inequality, and poverty. As individuals, joined in a common hunger for freedom, men, women, and even children pit their spirit against guns and tanks. On a larger scale, in an ever more persistent search for the self-respect of authentic sovereignty and the economic base on which national independence must rest, peoples sever old ties; seek new alliances; experiment—sometimes dangerously—in their struggle to satisfy these human aspirations . . . This Republic cannot be aloof to these events heralding a new epoch in the affairs of mankind. Our pledged word, our enlightened self-interest, our character as a nation, commit us to a high role in world affairs; a role of vigorous leadership, ready strength, sympathetic understanding.

"The State of the Union, at the opening of the 85th Congress, continues to vindicate the wisdom of the principles on which this Republic is founded. Proclaimed in the Constitution of the nation and in many of our historic documents, and founded in devout religious convictions, these principles enunciate—a vigilant regard for human liberty; a wise concern for human welfare; a ceaseless effort for human progress. Fidelity to these principles, in our relations with other peoples, has won us new friendships and has increased our opportunity for service within the family of nations.

Strength of the American Economy. "At home, the application of these principles to the complex problems of our national life has brought us to an unprecedented peak in our economic prosperity . . . Through the past four years these principles have guided the legislative programmes submitted by the Administration to Congress. As we attempt to apply them to current events, domestic and foreign, we must take into account the complex entity that is the United States of America; what endangers it; what can improve it.

"The visible structure is our American economy itself. After more than a century and a half of constant expansion, it is still rich in a wide variety of natural resources. It is first among nations in its people's mastery of industrial skills. It is productive beyond our own needs of many foodstuffs and industrial products. It is rewarding to all our citizens in opportunity to earn and to advance in self-realization and in self-expression . . .

The Inflationary Danger. "Our economy is strong, expanding, and fundamentally sound. But in any realistic appraisal, even the optimistic analyst will realize that in a prosperous period the principal threat to efficient functioning of a free enterprise system is inflation. We look back on four years of prosperous activities during which prices, the cost of living, have been relatively stable—that is, inflation has been held in check. But it is clear that the danger is always present, particularly if the Government might become profligate in its expenditures, or private groups ignore the possible results on our economy of unwise struggles for immediate gain.

"This danger requires a firm resolution that the Federal Government shall utilize only a prudent share of the nation's resources, that it shall live within its means . . . Through the next four years I shall continue to insist that the Executive departments and agencies of Government search out additional ways to save money and manpower. I urge that Congress be equally watchful in this matter. We pledge the Government's share in guarding the integrity of the dollar. But the Government's efforts cannot be the entire campaign against inflation . . . For success, the Government's efforts must be paralleled by the attitudes and actions of individual citizens. The national interest must take precedence over temporary advantages which may be secured by particular groups at the expense of all the people.

Prices and Wages. "In this regard I urge leaders in business and in labour to think well on their responsibility to the American people. With all the elements of our society, they owe the nation a vigilant guard against the inflationary tendencies that are always at work in a dynamic economy operating at today's high levels. They can powerfully help to counteract or accentuate such tendencies by their wage and price policies.

"Business in its pricing policies should avoid unnecessary price increases, especially at a time like the present when demand in so many areas presses hard on short supplies. A reasonable profit is essential to the new investments that provide more jobs in an expanding economy. But business leaders must, in the national interest, studiously avoid those price rises that are possible only because of vital or unusual needs of the whole nation.

"If our economy is to remain healthy, increases in wages and other labour benefits, negotiated by labour and management, must be reasonably related to improvements in productivity. Such increases are beneficial, for they provide wage-earners with greater purchasing power. Except where necessary to correct obvious injustices, wage increases that outrun productivity are, however, an inflationary factor. They make for higher prices for the public generally, and impose particular hardship on those whose welfare depends on the purchasing power of retirement income and savings . . .

"Freedom has been defined as the opportunity for self-discipline. This designation has a special application to wage and price policy in a free economy. Should we persistently fail to discipline ourselves, eventually there will be increasing pressure of Government to redress the failure. By that process freedom will step by step disappear. No subject on the domestic scene should attract more concern of the friends of American working-men and women and of free business enterprise than the forces that threaten a steady depreciation of the value of our money.

Agriculture. "Concerning developments in another vital sector of our economy—agriculture—I am gratified that the long slide in farm income has been halted, and that further improvement is in prospect. This is heartening progress. Three tools that we have developed—improved surplus disposal, improved price support laws, and the soil bank—are working to reduce price-depressing Government stocks of farm products. Our concern for the well-being of farm families demands that we constantly search for new ways by which they can share more fully in our unprecedented prosperity . . .

Water Conservation. "I would like to make special mention of programmes for making the best uses of water, rapidly becoming our most precious natural resource. There has been prepared and published a comprehensive Water Report developed by a Cabinet committee, and relating to all phases of this particular problem. In the light of this report, there are two things we should keep constantly in mind. The first is that each of our great river valleys should be considered as a whole. Piecemeal operations within each lesser drainage area can be self-defeating or, at the very least, needlessly expensive. The second is that the domestic and industrial demands for water grow far more rapidly than does our population.

"The whole matter of making the best use of each drop of water from the moment it touches our soil until it reaches the oceans, for such purposes as irrigation, flood control, power production, and domestic and industrial uses, clearly demands the closest co-operation and partnership between municipalities, States, and the Federal Government . . . Until such partnership is established on a proper and logical basis of sharing authority, responsibility, and costs, our country will never have both the fully productive use of water that it so obviously needs, and protection against disastrous floods . . .

School Construction. "High priority should be given to the School Construction Bill. This will benefit children of all races throughout the country—and children of all races need schools now. A programme designed to meet emergency needs for more classrooms should be enacted without delay. I am hopeful that this programme can be enacted on its own merits, uncomplicated by provisions dealing with the complex problems of integration. I urge the people in all sections of the country to approach these problems with calm and reason, with mutual understanding and goodwill, and in the American tradition of deep respect for the orderly processes of law and justice.

Civil Rights. "We have much reason to be proud of the progress our people are making in mutual understanding—the chief buttress of human and civil rights. Steadily we are moving closer to the goal of fair and equal treatment of citizens without regard to race or colour. But unhappily much remains to be done. Last year the Administration recommended to Congress a four-point programme to reinforce civil rights. That programme included:

(1) Creation of a bipartisan commission to investigate asserted violation of civil rights and to make recommendations;

(2) Creation of a civil rights division in the Department of Justice in charge of an Assistant Attorney-General;

(3) Enactment by Congress of new laws to aid in the enforcement of voting rights; and

(4) Amendment of the laws so as to permit the Federal Government to seek from the civil courts preventive relief in civil rights cases.

I urge that Congress enact this legislation.

Financial Institutions. "Essential to the stable economic growth we seek is a system of well-adapted and efficient financial institutions. I believe the time has come to conduct a broad national inquiry into the nature, performance and adequacy of our financial system, both in terms of its directive service to the whole economy and in terms of its function as the mechanism through which monetary and credit policy takes effect. I believe Congress should authorize the creation of a Commission of able and qualified citizens to undertake this vital inquiry. Out of their findings and recommendations the Administration would develop and present to Congress any legislative proposals that might be indicated for the purpose of improving our financial machinery . . .

Defence and Security. "The existence of a strongly armed imperialistic dictatorship poses a continuing threat to the free world's, and thus to our own nation's, security and peace. There are certain truths to be remembered here. First, America alone and isolated cannot assure even its own security. We must be joined by the capability and resolution of nations that have proved themselves dependable defenders of freedom. Isolation from them invites war. Our security is also enhanced by the immeasurable interest that joins us with all peoples who believe that peace with justice must be preserved, that wars of aggression are crimes against humanity.

"Another truth is that our survival in today's world requires modern, adequate, dependable military strength. Our nation has made great strides in assuring a modern defence, so armed in new weapons, so deployed, so equipped, that today our security force is the most powerful in our peacetime history. It can punish heavily any enemy who undertakes to attack us. It is a major deterrent to war.

" By our research and development more efficient weapons—some of amazing capabilities—are being constantly created. These vital efforts we shall continue. Yet we must not delude ourselves that safety necessarily increases as expenditures for military research or forces in being go up. Indeed, beyond a wise and reasonable level, which is always changing and is under constant study, money spent on arms may be money wasted on sterile metal or inflated costs, thereby weakening the very security and strength we seek.

" National security requires far more than military power. Economic and moral factors play indispensable roles. Any programme that endangers our economy could defeat us. Any weakening of our national will and resolution, any diminution of the vigour and initiative of our individual citizens, would strike a blow at the heart of our defences.

" The finest military establishment we can produce must work closely in co-operation with the forces of our friends. Our system of regional pacts, developed within the U.N. Charter, serves to increase both our own security and the security of other nations. This system is still a recent introduction on the world scene. Its problems are many and difficult, because it insists on equality among its members and brings into association some nations traditionally divided. Repeatedly in recent months, the collapse of these regional alliances has been predicted. The strains upon them have been at times indeed severe. Despite these strains our regional alliances have proved durable and strong, and dire predictions of their disintegration have proved completely false.

" With other free nations, we should vigorously prosecute measures that will promote mutual strength, prosperity and welfare within the free world. Strength is essentially a product of economic health and social well-being. Consequently, even as we continue our programmes of military assistance, we must emphasize aid to our friends in building more productive economies and in better satisfying the natural demands of their people for progress. Thereby we shall move a long way toward a peaceful world.

World Disarmament. " A sound and safeguarded agreement for ' open skies,' unarmed aerial sentinels, and reduced armament would provide a valuable contribution toward a durable peace in the years ahead. We have been persistent in our efforts to reach such an agreement. We are prepared to make further proposals in the United Nations. We are willing to enter any reliable agreement which would reverse the trend toward ever more devastating nuclear weapons; reciprocally provide against the possibility of surprise attack; mutually control the outer-space missile and satellite development; and make feasible a lower level of armaments and armed forces and an easier burden of military expenditures. Our continuing negotiations in this field are a major part of our quest for a confident peace in this atomic age.

World Trade and Atomic Co-operation. " This quest requires as well a constructive attitude among all the nations of the free world toward expansion of trade and investment, that can give all of us opportunity to work out economic betterment. An essential step in this field is the provision of an administrative agency to ensure the orderly and proper operation of existing arrangements under which multilateral trade is now carried on. To that end I urge Congressional authorization for U.S. membership in the proposed Organization for Trade Co-operation, an action which will speed removal of discrimination against our export trade.

" We welcome the efforts of a number of our European friends to achieve an integrated community to develop a Common Market. We likewise welcome their co-operative effort in the field of atomic energy. To demonstrate once again our unalterable purpose to make of the atom a peaceful servant of humanity, I shortly shall ask Congress to authorize full U.S. participation in the International Atomic Energy Agency.

The U.S. Information Agency. " World events have magnified both the responsibilities and the opportunities of the U.S. Information Agency. Just as, in recent months, the voice of Communism has become more shaken and confused, the voice of truth must be more clearly heard. To enable our Information Agency to cope with these new responsibilities and opportunities, I am asking Congress to increase appreciably the appropriations for this programme, and for legislation establishing a career service for the Agency's overseas Foreign Service Officers.

Refugees and Immigration. " The recent historic events in Hungary demand that all free nations share to the extent of their capabilities in the responsibility of granting asylum to victims of Communist persecution. I request Congress promptly to enact legislation to regularize the status in the U.S.A. of Hungarian refugees brought here as parolees. I shall shortly recommend to Congress changes in our immigration laws that I deem necessary in the light of our world responsibilities.

America and the Middle East. " The cost of peace is something we must face boldly, fearlessly, beyond money. It involves changes in attitudes, the renunciation of old prejudices, even the sacrifice of some seeming self-interest. Only five days ago I expressed to you the grave concern of your Government over the threat of Soviet aggression in the Middle East [i.e. the " Eisenhower doctrine," see 15305 A]. I asked for Congressional authorization to help counter this threat. I say again that this matter is of vital and immediate importance to the nation's and the free world's security and peace. By our proposed programmes in the Middle East, we hope to assist in establishing a climate in which constructive and long-term solutions to basic problems of the area may be sought.

Interdependence of the Free Nations. " From time to time there will be presented to Congress requests for other legislation in the broad field of international affairs. All requests will reflect the steadfast purpose of this Administration to pursue peace based on justice. Although in some cases details will be new, the underlying purpose and objectives will remain the same All proposals made by the Administration in this field are based on the free world's unity. This unity may not be immediately obvious unless we examine link by link the chain of relationships that binds us to every area and every nation. . .

" First of all, no reasonable man will question the absolute need for our American neighbours to be prosperous and secure. Their security and prosperity are inextricably bound to our own. We are already joined with these neighbours by historic pledges.

" Again, no reasonable man will deny that the freedom, prosperity, and security of Western Europe are vital to our own prosperity and security. If the institutions, skills, and manpower of its peoples were to fall under the domination of an aggressive imperialism, the violent change in the balance of world power and in the pattern of world commerce could not be fully compensated for by any American measures, military or economic. But these people, whose economic strength is largely dependent on free and uninterrupted movement of oil from the Middle East, cannot prosper—indeed, their economies would be severely impaired—should that area be controlled by an enemy and the movement of oil be subject to its decisions.

" Next, to the eastward, are Asiatic and Far Eastern peoples, recently returned to independent control of their own affairs or now emerging into sovereign statehood. Their potential strength constitutes new assurance for stability and peace in the world—if they can retain their independence. Should they lose freedom and be dominated by an aggressor, the world-wide effects would imperil the security of the free world.

" In short, the world has so shrunk that all free nations are our neighbours. Without co-operative neighbours, the United States cannot maintain its own security and welfare, because :

(1) America's vital interests are world-wide, embracing both hemispheres and every continent;

(2) We have community of interest with every nation in the free world;

(3) Inter-dependence of interests requires a decent respect for the rights and the peace of all peoples.

" These principles motivate our actions within the United Nations. There, before all the world, by our loyalty to them, by our practice of them, let us strive to set a standard to which all who seek justice and who hunger for peace can rally. May we at home, here at the seat of Government, in all the cities and towns and farmlands of America, support these principles in a personal effort of dedication. Thereby each of us can help establish a secure world order in which opportunity for freedom and justice will be more widespread, and in which the resources now dissipated on armaments of war can be released for the life and growth of all humanity . . . "

In the course of his speech the President said that it was unnecessary for him to " repeat recommendations involving our domestic affairs that have been urged upon Congress during the past four years, but which in some instances did not reach the stage of completely satisfactory legislation." He announced that future messages would be transmitted to Congress, either by himself personally or by the departments or agencies concerned, dealing with fiscal affairs, defence, agriculture, trade policy, labour-management relations, health, education, atomic energy, and other matters.—(U.S. Information Service)

A. AUSTRALIA. — Committee of Inquiry into Australian Universities.

The Federal Prime Minister, Mr. Menzies, announced on Jan. 21 that the Government had appointed a Committee of Inquiry into the future of the Australian universities, consisting of three Australian members and two British members with experience of university problems.

The three Australian members are Sir Ian Clunies Ross, head of the Commonwealth Scientific and Industrial Research Organization; Mr. Alex Reid, Chancellor of the University of Western Australia; and Mr. Jack Richards, assistant general manager of the Broken Hill Proprietary Co. Ltd., and a former Queensland Rhodes Scholar. The two British members are Sir Keith Murray, chairman of the University Grants Committee in the U.K., and Sir Charles Morris, Vice-Chancellor of the University of Leeds. Sir Keith Murray will act as chairman of the Committee of Inquiry.

The Committee was asked " to indicate ways in which the Universities might be organized so as to ensure that their long-term pattern of development is in the best interests of the nation, and, in particular, to inquire into such matters as : (1) the role of the university in the Australian community; (2) the extension and co-ordination of university facilities; (3) technological education at university level; and (4) the financial needs of universities and appropriate means of providing for these needs."

The inquiry arose out of a request by the Vice-Chancellors of all the Australian universities, who had approached the Government in March 1956 and had asked for the appointment of such a body.—(Australian News and Information Bureau)

A. EASTERN GERMANY - SOVIET UNION. — Political and Economic Co-operation. - Bulganin-Grotewohl Agreement. - Moscow Discussions.

An agreement on political and economic co-operation between the U.S.S.R. and the German Democratic Republic was signed in Moscow on Jan. 7 by the respective Prime Ministers (Marshal Bulganin and Herr Grotewohl) at the conclusion of a two-day meeting between leaders of the two Governments.

Political Agreement.

(1) The two Governments would conclude an agreement on the status of Soviet forces "temporarily stationed on the territory of the German Democratic Republic under existing international treaties." It would deal with questions of jurisdiction in criminal and civil cases, housing, the use of lines of communication, etc.

(2) After exchanging views on "the exercise by the German Democratic Republic of its sovereign rights to its airspace," the two Governments had agreed that "the existing quadripartite agreements on the use of air corridors between Berlin and Western Germany by aircraft of the U.S.A., Britain, and France are of a temporary and restricted nature and do not affect the Democratic Republic's sovereignty over its airspace."

(3) The U.S.S.R. and the German Democratic Republic had also agreed (*a*) to conclude a consular convention; (*b*) to conclude an agreement on legal aid in civil and criminal cases with the aim of protecting "the personal rights and interests of the citizens of both countries; (*c*) to expand the scientific, technical, and cultural co-operation between the two countries; (*d*) to return art treasures, archives, etc., moved from one country to the other during the war and post-war period; (*e*) to settle unclarified questions of citizenship, including measures to reunite families at present separated; (*f*) to improve postal communications between the two countries; and (*g*) to ensure reciprocal care of war graves, monuments, etc.

Economic Agreement.

(1) The U.S.S.R. and Eastern Germany had agreed to a "substantial" increase in the trade between the two countries. In 1957 the U.S.S.R. would accordingly increase the volume of its deliveries to Eastern Germany by 30 per cent as compared with 1956, and would supply increased quantities of metallurgical coke, oil, ferrous metals, timber, other industrial raw materials, and foodstuffs in exchange for East German exports to the U.S.S.R. of machinery and manufactured and household goods.

(2) In addition, the U.S.S.R. would grant the German Democratic Republic during 1957 a credit of 340,000,000 roubles (about £30,000,000) in freely convertible currency "for the purchase of commodities needed by the economy of the Democratic Republic."

(3) Appropriate agreements on these matters would be worked out by the economic agencies of both Governments during the year.

German Reunification.

The joint communiqué said that the two Governments had exchanged views on the German problem and were agreed that "a peaceable democratic solution" of this problem was "of the greatest importance for the future of the German nation and the destinies of Europe." After declaring that "mutual understanding and *rapprochement* between both German States are essential to a solution of the German problem on a peaceful and democratic basis, which must be first and foremost a matter for the Germans themselves," the statement went on:

"The main obstacle to the reunification of Germany as a peace-loving and democratic State is the present political course of the Government of the German Federal Republic—its policy of remilitarization, its participation in the aggressive NATO bloc, and its suppression of democratic rights and freedoms in Western Germany ...

"The introduction of compulsory military service in the Federal Republic, the intensive build-up of armed forces, the appropriation of huge funds for armaments, and the NATO decision to equip the West German Army with atomic weapons, show that the present Federal Government is in no way trying to reach a peaceful solution of the problem of Germany's reunification ...

"Both sides [i.e. the U.S.S.R. and Eastern Germany] take the view that the interests of European security and the national interests of the German people demand that the German Federal Republic should abandon its policy of remilitarizing Western Germany, and that the Democratic Republic and the Federal Republic should reach agreement on questions of an all-German character. This would pave the way to a final solution of the German problem ...

"On the basis of their alliance under the Warsaw Treaty, the German Democratic Republic and the Soviet Union declare that all attempts to use methods of force in the solution of the German question, and all attempts to use hostile methods to undermine the people's democratic order in the Democratic Republic, will be frustrated."

The joint communiqué also contained a lengthy statement on the attitude of the two Governments toward current international problems, including Egypt, Hungary, the new U.S. policy in the Middle East formulated by President Eisenhower, and the question of disarmament.

Egypt. After expressing "satisfaction" that the "resolute resistance of the Egyptian people and the rallying of all peace-loving forces" had "stopped the war of aggression against the Egyptian State," the two Governments expressed their support "both for the demand of the Egyptian Republic for the punishment of those guilty of aggression, and the legitimate claim of the Egyptian people for compensation for the damage caused by the countries that started the war against Egypt."

The "Eisenhower Doctrine." In a violent denunciation of the new U.S. policy in the Middle East, the statement said that the U.S.S.R. and the German Democratic Republic had "noted that U.S. imperialist circles are seeking to take advantage of the weakening of British and French positions in that area in order to impose on the peoples of the Middle East new forms of colonialism and economic and political enslavement in the guise of 'aid.'" The statement went on:

"The so-called 'Eisenhower doctrine' ... is designed to help American monopolists to seize key positions in the economy of the Middle Eastern countries. It also gives the President the right to direct military intervention in the affairs of the Middle Eastern countries through the despatch of American armed forces. We thus have an attempt to justify in advance aggressive actions by the American imperialists designed to reimpose on the Eastern peoples the yoke of colonial oppression ..."

Hungary. The Hungarian uprising was described as "the product of a broad plan conceived by the forces of reaction to destroy the people's government and to restore the Horthyist-Fascist regime." The statement said that the "suppression of the counter-revolution by the healthy democratic forces of Hungary, with the assistance of Soviet troops requested by the Hungarian Revolutionary Workers' and Peasants' Government," had "put an end to White terror and averted the threat of a new springboard of aggression in Europe."

Disarmament. The statement expressed the East German Government's full support for the various disarmament proposals put forward by the U.S.S.R.; recalled the "practical measures in the sphere of disarmament" taken by the U.S.S.R. in reducing its armed forces by 1,840,000 men, and by the German Democratic Republic in restricting its army to 90,000 men and in forgoing compulsory military service; and called for a ban on all nuclear and thermo-nuclear weapons and the immediate prohibition of tests of those weapons. It was stated *inter alia* that the disarmament problem could "be partially solved by establishing a restricted armaments zone in Europe comprising both parts of Germany."

It was announced in Moscow on Jan. 8, after discussions between the First Secretaries of the Soviet and East German Communist parties (M. Khrushchev and Herr Ulbricht), that the two parties were agreed that the world Communist movement should take "joint measures" to counter "attacks by imperialist reaction." In an obvious reference to Yugoslavia, the statement stressed the obligation upon all Communist parties to "rebuff resolutely all attempts to revise the principles of Marxism-Leninism."—(A.D.N. Agency, East Berlin - New York Times) **(Prev. rep. Soviet - East German Agreements, 15267 A; 15087 A.)**

B. AVIATION. — Round-the-World Non-stop Flight in 45 Hours by U.S. Bombers.

Three U.S. heavy jet bombers (B-52 Stratofortresses) landed on Jan. 18 at the March Air Force Base, near Los Angeles, after a non-stop flight round the world in 45 hours 19 minutes, covering 24,325 miles at an average speed of 525 m.p.h. They were refuelled in mid-air during the flight, the number of refuellings not being disclosed.

Five Stratofortresses, all capable of carrying hydrogen bombs, left the Castle Air Force Base near Merced (California) on Jan. 16, one of the machines landing at a U.S. air base in Britain (Brize Norton, Oxfordshire) "as planned" and another landing in Labrador "not as planned"; no reason was given for the Labrador landing, which was believed to have been due to mechanical trouble. The other three machines completed the round-the-world flight in the time stated above, under the command of Major-General Archie J. Old jr., chief of the U.S. 15th Air Force.

The three machines flew from the Castle Air Force base across the U.S.A. to Newfoundland, then across the Atlantic to French Morocco, then over Saudi Arabia, then southward along the coasts of India, Ceylon, and Malaya, over the Philippines and Guam, and thence across the Pacific to California. Off the tip of the Malay peninsula they carried out a mock bombing attack under simulated combat conditions. General Curtis Lemay, C.-in-C. of U.S. Strategic Air Command, said that the flight had shown the Command's "global capability to strike any target on the face of the earth."

The previous record round-the-world flight was in 1949, when a U.S. B-50 Superfortress covered 23,452 miles in 94 hours 1 minute at an average speed of 249 m.p.h., being refuelled four times in mid-air. The B-52 Stratoforts thus cut the previous time by half.

The Boeing-built B-52 is America's first-line heavy bomber. It has a ceiling of 50,000 feet, a top speed of 650 m.p.h., and can carry a bomb-load of 20,000 lb.—(New York Times) **(Prev. rep. 9855 A.)**

FEBRUARY 2—9, 1957

A. MIDDLE EAST. — Israeli Withdrawal from Sinai Peninsula. - Repatriation of Egyptian Prisoners-of-War. - U.N. Emergency Force enters Sinai. - Israel Troops retained in Gaza Strip and Sharm-el-Sheikh Area. - Israeli Request for U.N. Guarantees against Fedayeen Attacks. - Insistence on Freedom of Navigation in Gulf of Akaba. - Declaration by Mr. Ben-Gurion. - Israeli Proposals to U.N. on Gaza Strip and Gulf of Akaba. - Dr. Hammarskjöld's Reports to General Assembly. - U.N. Resolutions for Israeli Withdrawal to Armistice Lines.

Simultaneously with the withdrawal of the British and French forces from Port Said, the Israeli forces began a phased withdrawal from the Sinai peninsula during December, the areas evacuated by Israeli troops being progressively taken over by the U.N. Emergency Force (UNEF) following agreements between the respective U.N. and Israeli commanders, General Burns and General Moshe Dayan. By Jan. 22, 1957, the Israeli forces had completed their withdrawal from the Sinai peninsula except for a strip of coastline on the western shore of the Gulf of Akaba extending from Elath (Eilat), the Israeli port at the head of the gulf, to the Sharm-el-Sheikh area at the entrance to the Gulf, which includes the islands of Tiran and Sanafir. In addition, the Israeli forces continued to occupy the Gaza strip, which had previously been in Egyptian military occupation since the outbreak of the Palestine War in 1948.

The question of Israel's withdrawal to the 1949 armistice lines, as demanded by the U.N. resolutions of Nov. 2 and Nov. 6, 1956, and subsequent resolutions (see below), was, however, linked by the Israeli Government with the fulfilment of two essential conditions on which it continued to insist: (1) that the Egyptians should not be allowed to reimpose a blockade in the Gulf of Akaba, as they had done for the past six years, and that the Gulf should be open to ships of all nations; (2) that the Gaza strip should not be used, as it had been in the past, as a base for Egyptian *fedayeen* attacks against Israel. As stated below, both Mr. Ben-Gurion and the Israeli representative at the U.N. insisted that Israel should receive U.N. guarantees on both these points.

The Gulf of Akaba extends for 100 miles between the Negev and the Red Sea, the coastline on either side being uninhabited desert. The frontiers of Israel, Egypt, Jordan, and Saudi Arabia converge at the head of the Gulf, where there are two ports—Elath and the Jordanian port of Akaba. The entrance to the Gulf is commanded by the two small islands of Tiran and Sanafir, on which the Egyptians had installed garrisons in addition to erecting coastal batteries at two points on the western shore of the Gulf. As a result, Israeli shipping had been prevented from using the Gulf of Akaba, which is Israel's outlet to the Red Sea and the Indian Ocean.

Since November last, when Tiran and Sanafir were captured by Israeli paratroops and the Egyptian gun emplacements destroyed, Israeli cargo vessels had been free to navigate the Gulf of Akaba and to use the port of Elath for the first time for six years. British supply ships to Akaba, Saudi Arabian fishing vessels, and ships of other nationalities had also sailed into and out of the Gulf without hindrance. A 1,400-ton frigate of the Israeli Navy arrived at Elath on Jan. 4 after an 18,000-mile voyage round the Cape.

The Gaza Strip, 30 miles long and seven miles wide, was formerly part of undivided Palestine and has never legally been part of Egypt. Under the U.N. resolution partitioning Palestine into Jewish and Arab States, it was to have formed part of the Palestinian-Arab State envisaged in that resolution. Occupied by the Egyptian Army on the first day of the Palestine War, it remained under Egyptian control under the 1949 armistice agreements, and had had an Egyptian Military Governor until November last, when the territory was captured by Israeli forces and an Israeli Military Governor installed. In addition to its normal population of about 100,000, over 200,000 Palestine Arab refugees have been living in the Gaza strip since 1948, their welfare being a responsibility of the U.N. Relief and Works Agency (UNRWA). The Gaza strip is largely barren and unproductive, only about one-quarter being under cultivation. During recent years it had been a base for many *fedayeen* attacks into Israeli territory, and the scene of frequent clashes between Egyptian and Israeli forces.

Israeli Withdrawal from Sinai. - Evacuation of El Arish. - Repatriation of Egyptian Prisoners-of-War.

By agreement between General Burns and General Dayan, who had six meetings at Lydda (Israel) during December and January, the Israeli forces were withdrawn from Sinai in three stages, phased with the take-over of evacuated areas by the UNEF: (1) in the first stage, ending on Jan. 8, the Israeli Army withdrew to the line Abu Aweigila-El Quseima (running west of El Arish) and thence southward to the tip of the peninsula; (2) in the second stage, ending on Jan. 15, the Israeli forces evacuated El Arish, the capital of Sinai and centre of the Egyptian administration; (3) in the third and final stage, completed on Jan. 22, Israeli forces had withdrawn from the whole of Sinai except for the west coast of the Gulf of Akaba and the Gaza strip. All Egyptian gun emplacements, *fedayeen* bases, and other military installations were destroyed before the occupied areas were evacuated.

El Arish was taken over by Yugoslav troops on Jan. 15, without incident, at a ceremony attended by General Dayan and U.N. officers. Press correspondents reported that the only apparent damage during the 75-day Israeli occupation was the destruction of the Egyptian military barracks, the town being otherwise intact. On the same day the ancient Monastery of St. Catherine, in southern Sinai, was taken over from the Israelis by Indian paratroopers. Contrary to Egyptian allegations that the monastery had been looted during the Israeli occupation, a U.N. mission headed by Unesco officials found the monastery completely undamaged and all its historic records and documents intact. The Archimandrite Christophoros informed U.N. officers and Unesco representatives that the Israelis had left the monastery "in perfect order." [The monastery is believed to have been built by the East Roman Emperor Justinian in honour of St. Catherine of Alexandria.]

The 5,881 Egyptian prisoners-of-war captured by the Israeli Army during the Sinai campaign were repatriated in three batches on Jan. 21, 27, and 31, in exchange for four Israeli prisoners held by the Egyptians. The repatriation was carried out near Rafah through the intermediary of the International Red Cross, in co-operation with the Egyptian Red Crescent and the Israeli Red Shield and under the supervision of U.N. officers. A first group of 27 Egyptian prisoners, all of whom were gravely ill, had been released by Israel on Dec. 4 and were flown from Lydda to Cairo in Italian planes chartered by the International Red Cross.

One of the Egyptian prisoners—Captain Yousef Nada, company commander of an Egyptian infantry regiment, and the son of an Egyptian father and a British mother—refused to be repatriated and asked to be sent to Britain, where he was born. He said that he did not want to return to Egypt because it was "a Fascist State—a dictatorship with power in the hands of a clique of officers who keep the best positions for themselves and their relatives." He was given temporary asylum in Israel.

The four repatriated Israelis said that they had been frequently beaten, tortured, and kept in solitary confinement during their captivity in order to make them disclose military information. Three of the men had been detained by the Egyptians for over a year after being captured in border incidents, while the fourth was an Israeli air officer who had been shot down over Sharm-el-Sheikh—the only Israeli captured in the Sinai campaign.

Dr. Hammarskjöld's Report to General Assembly on Progress of Israeli Withdrawal.

The U.N. Secretary-General, Dr. Hammarskjöld, presented to the General Assembly on Jan. 16 a report on the withdrawal of the Israeli forces and related questions—in particular, the situation in the Gaza strip and the Gulf of Akaba, and the measures which should be taken to avoid raids by either side into the territory of the other. The report is summarized below under cross-headings.

The Israeli Withdrawal from Sinai. After recapitulating the resolutions adopted by the General Assembly on Nov. 2, Nov. 4, Nov. 7, and Nov. 24, and pointing out that the Anglo-French forces had withdrawn from Port Said, "thus achieving full compliance with one aspect of the requirement defined in the four resolutions," Dr. Hammarskjöld gave the following details of the Israeli withdrawal from Sinai:

(1) By Dec. 3, 1956, Israeli forces had withdrawn from the Suez Canal area to a distance of about 50 kilometres eastward; (2) by Jan. 7-8 they had withdrawn to a line roughly following meridian 33 deg. 44 min. [i.e. the Abu Aweigila-El Quseima line]; (3) by Jan. 15 they had withdrawn another 25-30 kilometres eastward, this phase involving the occupation by UNEF of El Arish and the Monastery of St. Catherine; (4) on Jan. 14 the Israeli Government had informed him (*a*) that the entire Sinai desert would be evacuated by Jan. 22 "with the exception of the Sharm-el-Sheikh area—that is, the strip of the western coast of the Gulf of Akaba which ensures freedom of navigation through the Straits of Tiran into the Gulf"; and (*b*) that the Government of Israel was "prepared to enter forthwith into conversations with the Secretary-General in connexion with the evacuation of this strip."

Dr. Hammarskjöld confirmed that the Sinai peninsula had been evacuated except for the Sharm-el-Sheikh area, and said that the U.N. and Israeli Commanders would have a further meeting at which the latter would be asked "to define the precise meaning of the 'Sharm-el-Sheikh area' and 'the strip of the western coast of the Gulf of Akaba.'" Dr. Hammarskjöld added: "The intentions of the Government of Israel concerning . . . the withdrawal of Israeli forces from the Gaza strip have not been made known to the Secretary-General."

The Armistice Lines, the Gaza Strip, and Prevention of Border Raids. The General Assembly's resolution of Nov. 2, Dr. Hammarskjöld continued, had called for action on three specific points in its operative paragraph: (1) all parties had been urged to withdraw their forces promptly behind the armistice lines; (2) the Secretary-General had been asked to "observe and report promptly" on compliance with this resolution; and (3) the parties concerned were urged "to desist from raids across the armistice lines . . . and to observe scrupulously the provisions of the armistice agreements."

After commenting that "the three points in this operative paragraph, while existing simultaneously within the terms of the paragraph, were not linked together conditionally," Dr. Hammarskjöld continued: "The U.N. Emergency Force will on Jan. 22 reach the armistice demarcation line wherever it follows the north-eastern boundary of the Sinai desert. At that stage the last two points of the resolution of Nov. 2 will assume added importance . . . One of these points is the request for full observance of the provisions of the armistice agreements. This request makes it clear that the withdrawal of Israeli forces must be behind the armistice line as established in the Egyptian-Israeli agreement. In this context it is to be noted . . . that the Israeli communication [to the U.N. Secretary-General, referred to above] is silent about withdrawal from the Gaza strip, which, according to the armistice agreement, falls on the Egyptian side of the armistice demarcation line . . .

"The other point mentioned . . . refers to raids across the armistice lines into neighbouring territory. Such raids are prohibited in the armistice agreements . . . [and] . . . the U.N. Truce Supervision Organization (UNTSO), established under those agreements, has as one of its main duties the prevention of incursions and raids. In accordance with the call for scrupulous observance of the armistice agreements, it is for the parties concerned to take all appropriate measures to give UNTSO the necessary support to render it fully effective. It is the primary duty of the U.N. Emergency Force to supervise and enforce the cease-fire to which the parties committed themselves in response to the resolution of Nov. 2. Appropriate liaison should be established between these two U.N. auxiliary organizations . . ."

The Gulf of Akaba. "The communication of Jan. 14 from the Government of Israel . . . indicates that the evacuation of the coastal strip is anticipated, although further discussions with the Secretary-General are suggested. The area referred to and the islands opposite Sharm-el-Sheikh and Tiran are Egyptian territory, or territory under Egyptian jurisdiction on the basis of an agreement with Saudi Arabia. Under the terms of the General Assembly's resolution, the [Israeli] forces should be withdrawn from these territories."

Dr. Hammarskjöld agreed that "the international significance of the Gulf of Akaba may be considered to justify the right of innocent passage through the Straits of Tiran and the Gulf in accordance with the recognized rules of international law." He added, however, that "a discussion of this matter, and its possible relation to the action requested in the General Assembly's resolutions on the Middle East crisis," did not fall within the mandate imposed on him under those resolutions.

Afro-Asian Resolution on Withdrawal to Armistice Lines. - Adoption by General Assembly.

A resolution was presented in the General Assembly on Jan. 17 by 25 countries of the Afro-Asian group which, after taking note of the Secretary-General's report, (1) noted "with regret and concern" the failure of Israel to comply with the various resolutions passed by the General Assembly in November last; and (2) requested Dr. Hammarskjöld "to continue his efforts for securing the complete withdrawal of Israel in pursuance of the above-mentioned resolutions, and to report to the General Assembly within five days."

The resolution was adopted on Jan. 19, after a two-day debate, by 74 votes to two (Israel and France), with two abstentions (Cuba and Costa Rica) and two countries absent (Hungary and South Africa). It was supported by the United States, Great Britain, the Commonwealth countries, nearly all the Latin American countries, and the Communist bloc, in addition to the Afro-Asian group.

Dr. Fawzi (Foreign Minister of Egypt) accused Israel of "contemptuously" ignoring the earlier U.N. resolutions, of seeking to impose conditions for her compliance with those resolutions, and of "picking and choosing" from the resolutions—"taking one piece and leaving another, carrying out one part and throwing other parts overboard." He demanded that Israel should withdraw unconditionally from all territories previously under Egyptian control, and comply fully with all U.N. resolutions on the subject.

Mrs. Golda Meir (Foreign Minister of Israel) emphasized that her Government sought U.N. guarantees, firstly, against any renewal of Egyptian *fedayeen* attacks from the Gaza strip, and secondly, against a reimposition of the Egyptian blockade in the Straits of Tiran and the Gulf of Akaba. After declaring that it was "inconceivable" to the Israeli Government that "the nightmare of the past eight years should be restablished in Gaza with international sanction," Mrs. Meir added: "The mere entry into this area of the U.N. Emergency Force, even with the specific aim of preventing belligerency, would not in itself be a solution, for there is as yet no clarity about the functions of UNEF or the duration of its tenure . . . Shall Egypt be allowed once more to organize murder and sabotage in the strip? Shall she be allowed to condemn the local population to permanent impoverishment, and to block any solution of the refugee problem?"

Mrs. Meir said that Israel hoped shortly to present "detailed plans" whereby peace and stability could be assured to the Gaza area, the economic future of its population assured, and the refugee problem solved in co-operation with the United Nations. "The withdrawal of Israeli military forces from the Gaza strip can well be one of the elements in the arrangements which we envisage," she added.

As regards the Gulf of Akaba, Mrs. Meir stressed that Israel's sole concern was to prevent the reimposition of the Egyptian blockade, and to secure the right of free passage to ships of all nationalities.

Mr. Cabot Lodge (U.S.A.) commended the Afro-Asian resolution as "reasonable and moderate" because it avoided condemnation and recrimination and was focused on the immediate problem. Without referring specifically to the Gaza strip or the Gulf of Akaba, he said that "the areas in question have been major sources of tension in the past," and expressed the opinion that the UNEF "should be so deployed as to be in a position to prevent a recurrence of hostile activities." The U.S.A. felt it important that UNEF should "move in immediately behind the withdrawing Israeli forces to ensure the maintenance of the cease-fire and to safeguard the armistice agreements."

Sir Percy Spender (Australia) urged that Egyptian troops should not "directly or indirectly" reoccupy the Gaza strip and the Gulf of Akaba coastline when Israeli forces withdrew from those areas, since it would create again a situation of "imminent danger." Positions relinquished by the Israelis "must be occupied effectively by the UNEF for as long as is necessary to establish procedures for the settlement of the problems existing in these areas." Israel should comply with the Assembly's resolution, Sir Percy said, "provided it is understood that the UNEF remains as a buffer between the two countries [Israel and Egypt] until a final solution of the problems in this area is determined." After stressing the importance of solving the refugee problem in the Gaza strip, he declared that it was "impossible to envisage that this area could for years to come be permitted to serve as a basis of operations for Egyptian *fedayeen* activities."

Commander Allan Noble (U.K. Minister of State for Foreign Affairs) said that Israel had very serious grievances against Egypt. These grievances, however, did not justify her attack, and "still less has my Government ever considered that Israel was entitled to derive any territorial advantage from her attack on Egypt."

Britain, he continued, had withdrawn her forces from Egypt because she felt confident that the U.N. Emergency Force would be enabled to fulfil all the purposes for which it was created. The General Assembly, for its part, must be prepared to face fundamental issues squarely if there was not to be a return to the tension and instability which had threatened the peace of the Middle East for so many years. The rapid build-up of UNEF had been a remarkable feat of improvisation, and that force, "now clearly an effective body," should be capable of carrying out all the functions entrusted to it by the General Assembly.

By insisting on the withdrawal of Israeli forces, he went on, the U.N. had inevitably assumed responsibility for solving the problems that arose. This made it imperative that UNEF should be so deployed as to prevent a recurrence of attacks by either side against the other. In this connexion the U.K. hoped that Dr. Hammarskjöld would be able to elaborate on the idea, contained in his report, that UNEF might assume the responsibilities hitherto carried out by the Truce Supervision Organization and might be deployed "as a shield to separate the parties at sensitive points."

As regards the Gulf of Akaba and the Straits of Tiran, Commander Noble declared: "H.M. Government would support any acceptable form of internationalization or any other arrangements guaranteeing free passage through the Straits and the Gulf, to which Jordan, no less than Israel, would be entitled."

With regard to the Gaza strip, H.M. Government had already stated unequivocally that Israeli forces should be withdrawn from that area in accordance with the Assembly's resolutions [see Mr. Selwyn Lloyd's speech of Dec. 15 page 15320]. Everyone recognized the need for more permanent arrangements to ensure the maintenance of peace in this sensitive area, and the British Government took the view that the Gaza strip might perhaps come under some form of international administration and control.

Commander Noble concluded: "We are all acutely aware of the need to reopen the Suez Canal to world shipping with the utmost speed, and to restore freedom of navigation in accordance with the Assembly's resolution of Nov. 2. The other outstanding problem of the area is the question of settling the dispute between Israel and the Arab States . . . We will support any settlement that can be obtained through the U.N. or by any other means . . . In approaching this problem, we must recognize that there is widespread suspicion and fear on the part of the Arab States that Israel will in future seek to expand. Any settlement must be such as to remove these suspicions and fears."

Mr. Lester Pearson (Canada) suggested that the UNEF "could be deployed in the area of the demarcation lines from the Mediterranean to the Gulf of Akaba, where it could function to prevent incidents, keep the peace, and secure the cessation of hostilities already brought about by the United Nations." He emphasized that the Gulf of Akaba should be open to ships of all nations; asked that U.N. observers should be stationed in the area to ensure freedom of navigation; and stressed that there must be no return to the conditions which had prevailed during the last eight years.

M. Georges-Picot (France) described the Afro-Asian resolution as "premature," and suggested that Dr. Hammarskjöld should have further discussions with the Egyptian and Israeli Governments. The U.N. should obtain assurances from Egypt that there would in future be no interference with navigation in the Gulf of Akaba, or any renewal of *fedayeen* attacks from the Gaza strip.

Israeli Insistence on U.N. Guarantees for Gaza Strip and Gulf of Akaba. - Declaration by Mr. Ben-Gurion. - Israeli Proposals presented to United Nations.

In a speech to the *Knesset* in Jerusalem on Jan. 23, the Prime Minister of Israel (Mr. David Ben-Gurion) reiterated that Israel would not withdraw from the Gulf of Akaba until guarantees had been obtained whereby freedom of navigation would be assured to Israeli shipping and to vessels of all nations. Israeli forces would be withdrawn from the Gaza strip when similar guarantees had been given against any renewal of *fedayeen* raids, but the Israeli civilian administration should continue to function in the area until satisfactory arrangements for its future had been worked out with the United Nations. In the course of his speech Mr. Ben-Gurion said that Israel was ready to sign a mutual non-aggression treaty with Egypt immediately, as confirmation of her position that she did not consider herself in a state of war with Egypt.

Mr. Ben-Gurion declared that "Israel, perhaps more than any other country, is interested in strengthening the authority of the United Nations to safeguard peace and international justice." He recalled, however, that when, on the very day of her creation in 1948, Israel was attacked by five Arab countries - four of which were members of the U.N.—neither the General Assembly nor the Security Council had "lifted a finger to come to our assistance or even rebuked the aggressors." Since then the Arab States had violated the armistice agreements, ignored U.N. resolutions, and organized boycott, blockade, and guerrilla warfare against Israel with the proclaimed intention of "wiping her off the face of the earth." In the face of the large Communist arms supplies to Egypt, and of the Egyptian-Syrian-Jordanian military pact for the "liquidation" of Israel, Israel had launched her Sinai campaign in self-defence at a time when she was faced with deadly danger. "When a nation's life is in danger, he declared, "its first duty is to act in self-defence. That is what we did."

With reference to the shortcomings of the U.N. Organization, Mr. Ben-Gurion quoted the following comment recently made by M. Spaak, the first President of the U.N. General Assembly and Foreign Minister of Belgium: "In the present U.N. set-up, which is not what its founders wished or hoped for, everything short of war is permitted. Treaties may be violated and promises broken, a nation may be licensed to menace its neighbours—just as long as there is no actual war. The attitude of Egypt during the last few months is a case in point."

Continuing, Mr. Ben-Gurion said that in the U.N. resolutions of Nov. 2 and subsequent dates there was no indication that those parts applicable to Egypt were intended to be carried out, whereas Israel had been under constant pressure to carry out those parts of the resolutions applicable to herself. Israel, which had evacuated 50,000 square kilometres of the Sinai desert the entire area except for the coastal strip on the Gulf of Akaba—was entitled to expect that the U.N Force would refrain from restoring the *status quo* in Sinai: namely, its transformation into a base for aggression against Israel. She was also entitled to expect that freedom of navigation would be ensured in the Gulf of Akaba to all vessels without discrimination, Israeli and Arab alike, and that the Egyptian blockade would not be reimposed.

After emphasizing that the Gaza strip had never been Egyptian territory, and declaring that it had been seized by Egypt in 1948 as "a springboard for aggression against Israel," Mr. Ben-Gurion stressed that there was no intention of maintaining Israeli military forces in the area. He added, however: "For the benefit of the area's inhabitants, Israel must remain in the strip while a suitable relationship is established between the Israeli administration and the United Nations. The administration will maintain the internal security of the strip, will continue to develop self-government, and will ensure public services, health, education, electricity, irrigation, communications, agriculture, trade, and industry. Israel will make all possible and necessary efforts to lift the 60,000 destitute residents of the strip from their present miserable condition and help to secure for them decent conditions of existence and a reasonable standard of life . . .

"The position of the Gaza strip is unique. No U.N. Force, by its very character, could prevent the organization of *Fedayeen* bands by the Egyptian authorities in that area, and their employment in Israeli territory. The entry of a U.N. Force in the strip would result in a deterioration of the security position of Israel settlements along the border of the strip, and everywhere within Israel's limited area."

As regards the Gulf of Akaba, Mr. Ben-Gurion declared that Israeli forces would be withdrawn on the following conditions:

(1) The four countries with coastlines on the Gulf—Egypt, Israel, Jordan, and Saudi Arabia—should conclude an agreement on freedom of navigation.

(2) Pending a final settlement between Egypt and Israel, the U.N. Emergency Force should be stationed at the mouth of the Gulf.

(3) Special arrangements should be made on freedom of navigation for vessels of all nations.

In conclusion, Mr. Ben-Gurion said: "The people of Israel, the oldest of the peoples of the Middle East, which has bequeathed to many nations the foundations of their faith and their spiritual culture, appeals to the conscience of the world that everything should be done to avert the possibility of the outbreak of a new conflict in the Middle East and to secure the establishment of real peace, so that the lands of the Bible, in co-operation with one another, may again become a source of inspiration and blessing to the world."

The *Knesset* approved the Prime Minister's statement by 54 votes to 17, the opposition consisting of 11 members of the *Heruth* (right-wing nationalist) party and the six Communists. Spokesmen of the *Heruth* attacked the Government for not having insisted on a peace settlement with Egypt as a condition for withdrawal from the Sinai peninsula.

The detailed proposals of the Israeli Government, as outlined by Mr. Ben-Gurion, were presented to Dr. Hammarskjold on Jan. 24 by Mr. Eban (Israeli representative at the U.N., and Ambassador in Washington) and were circulated to all U.N. member-countries. They comprised (1) a general statement of Israel's policy; (2) proposals for the Sharm-el-Sheikh area in the Gulf of Akaba; (3) a statement on the functions of the U.N. Emergency Force; and (4) proposals for the future of the Gaza strip.

Statement of Policy.

After commenting that "an international interest" was involved in the Gulf of Akaba question, and that the problem of the Gaza strip was "especially complex," the statement continued

"Israel's approach to these problems is influenced primarily by the policy of belligerency maintained by Egypt for several years. This policy finds expression in the Egyptian doctrine of a 'state of war', in Egypt's refusal to recognize Israel's Charter rights of sovereignty, independence and integrity, and in the organization by Egypt of hostile acts, including raids, armed attacks, and blockade activities in the Suez Canal and the Gulf of Akaba.

"It is clear that Israel's policy toward Egypt must be influenced by Egypt's policy toward Israel, since the duties of member-States toward each other under the Charter are governed by the principle of reciprocity . . On Nov. 4, 1956, and thereafter Israel attempted to clarify whether Egypt intends to maintain a state of war against Israel; whether she agrees to recall *fedayeen* gangs under her control in other territories; whether she will suspend the economic boycott and blockade of Israel-bound shipping in the Suez Canal; and whether she will agree to enter into negotiations with Israel with a view to the establishment of peace. Egypt's lack of response to these questions can only be interpreted as signifying that she intends to maintain her belligerent policy toward Israel on land, sea and in the air.

"This consideration strengthens Israel's concern to ensure that the withdrawal of her forces should not be undertaken in such a manner as to strengthen the serious likelihood of warlike acts against her.

"The position would be radically different if Egypt would agree to a policy of simultaneous liquidation of belligerent acts. Israel is willing at any time to sign a protocol or other instrument for the mutual and simultaneous liquidation of belligerency; or a non-aggression pact.

The Gulf of Akaba.

"(1) The aim [of Israel's policy] is the simultaneous reconciliation of two objectives—the withdrawal of Israeli forces, and the guaranteeing of permanent freedom of navigation by the prevention of belligerent acts against shipping in the Straits of Tiran and the Gulf of Akaba.

"(2) The need for accompanying any withdrawal of Israeli forces by related measures for ensuring free navigation and the prevention of belligerency is dictated by the following considerations:

"(*a*) For six years Egypt has imposed illegal restrictions on the passage of shipping to Elath through the establishment of gun positions at Sharm-el-Sheikh.

"(*b*) If Egypt were to re-establish her gun positions and exercise forcible restrictions on Israel-bound shipping, a grave danger would arise to peace and security. It is axiomatic that the General Assembly cannot intend its resolutions to lead . . . to the restoration of an illegal situation with a consequent eruption of conflict.

"(*c*) Egypt has not taken any steps to comply with the basic decision against belligerency and maritime restrictions adopted by the Security Council on Sept. 1, 1951 [i.e. the Suez Canal resolution]. This fact has a direct effect on Israel's need to be safeguarded against maritime blockade in other waterways.

"(*d*) Many nations have a legitimate interest in freedom of navigation in the Gulf of Akaba, and in the recent discussion of the General Assembly there was a wide consensus of opinion in favour of establishing suitable measures forthwith for ensuring freedom of navigation.

"(*e*) The deprivations suffered in the past, and still being suffered by many nations, including Israel, through Egypt's refusal to comply with her international obligations in the Suez Canal, make it imperative to ensure that the blockade is never restored in the Gulf of Akaba.

"(3) Egyptian compliance with the Security Council's decision of Sept. 1, 1951, has legal and chronological priority over Israel's duty to fulfil recommendations in which Egypt has an interest. Accordingly, Israel formally requests the Secretary-General to ascertain Egypt's intentions with respect to the 1951 resolution of the Security Council.

"(4) Many delegations in the General Assembly raised the possibility that UNEF might be so deployed as to contribute to a solution of this problem. Some delegations invited the Secretary-General to make proposals in this connexion.

" (5) The Government of Israel considers that UNEF could be a factor in the solution of this problem if the following arrangements were confirmed and implemented :

(*a*) On the withdrawal of Israeli forces, the positions evacuated along the western coast of the Gulf of Akaba would be held by the UNEF.

(*b*) It would be the function of UNEF to see that freedom of navigation was maintained and belligerent acts avoided in the Gulf of Akaba and the Straits of Tiran. The prevention of acts of belligerency is definitely within UNEF's mandate.

(*c*) UNEF would remain in the area so long as it has as its function the prevention of any renewal of hostilities.

(*d*) In view of the above considerations, UNEF would maintain its position along the western shore of the Gulf until another effective means was agreed upon between the parties concerned for ensuring permanent freedom of navigation and the absence of belligerent acts in the Straits of Tiran and the Gulf of Akaba.

(*e*) Such effective means would be deemed to have been found when a peace settlement was achieved, or when secure freedom of navigation was guaranteed by other international instruments to which Israel was a party."

Functions of the U.N. Emergency Force.

" (1) All the elements in the above proposals (the withdrawal of forces ; the need to guarantee free navigation ; the assignment of UNEF with the function of preventing belligerency ; and the need to secure compliance with the Security Council's resolution of Sept. 1, 1951) were advocated by many delegations in the recent General Assembly debate.

" (2) It is evident that if UNEF is to develop its capacity to help solve this problem, more clarity and precision are needed in defining its character, its functions, and, above all, the duration of its tenure and the conditions for the termination of its assignments. The need for such precision is the more urgent in view of the fact that many delegations, including those whose troops compose the Force, have expressed conflicting views on the functions and nature of the Force."

The Gaza Strip.

" Israel's approach to this question comprises the following considerations :

" (1) The Egyptian occupation of Gaza arose out of acts of force committed in 1948 during an attempt to overthrow a recommendation of the General Assembly, and in defiance of successive cease-fire resolutions by the Security Council.

" (2) The area has never been part of Egypt and its inhabitants are not Egyptian citizens.

" (3) During eight years of occupation Egypt has used the Gaza strip solely as a springboard for assaults against Israel. The *fedayeen* movement had its main centres and recruiting grounds in Gaza. As a result, Gaza was a source of constant threats to peace and tranquillity over a large part of Israel's territory.

" (4) During the occupation Egypt made no attempt to rehabilitate any of Gaza's refugee population, or to develop the political freedom or economic welfare of the permanent residents of the zone.

" (5) At the present time law and order prevail in Gaza. Its municipal institutions and public utilities are soundly established. Autonomous local government is being developed, and numerous economic advantages accrue to the zone from the association of its economic life with that of Israel.

" (6) Israel does not seek to annex Gaza or to maintain its military forces there. On the other hand, Israel is the only State which has a direct interest in a peaceful, orderly, and prosperous Gaza strip.

" In the light of these considerations, Israel offers the following programme for study and comment :

" (*a*) No Israeli military forces will remain in the Gaza strip.

" (*b*) Israel will continue to supply administrative services, including agriculture, education, health, industry, and labour welfare.

" (*c*) Law and order will be maintained by the Israel Police (including local police).

" (*d*) Israel will continue to make available, and to develop, public utilities such as electricity and water.

" (*e*) Israel will continue to develop local administration in towns and villages.

" (*f*) Israel will support the development of means of livelihood for the local population of about 80,000, two-thirds of whom were unemployed under Egyptian administration.

" (*g*) The necessary functions of security and administration are all covered by the above proposals. An international military force would not be able to undertake effectively the police duties necessary to prevent a recrudescence of *fedayeen* activities. Nor would such a force be in a position to carry out measures of administration and of economic development for the civilian population. For these reasons the entry of UNEF into the Gaza area is not envisaged under this plan.

" (*h*) Israel will continue to co-operate with the U.N. Relief and Works Agency in connexion with the care and maintenance of the refugees.

" (*i*) Israel will make full contribution toward any U.N. plan for the permanent settlement of the refugees.

(*j*) In connection with the above matters, Israel is ready to work out with the United Nations a suitable relationship with respect to the Gaza strip."

Dr. Hammarskjöld's Second Report. - Insistance on Israeli Withdrawal from Gaza and Gulf of Akaba.

The U.N. Secretary-General, who had had separate discussions on Jan. 20 with Mr. Eban and Dr. Fawzi, issued a second report to the General Assembly on Jan. 25, after the expiration of the five-day time limit set by the General Assembly for Israeli compliance with the resolution adopted on Jan. 19.

In this report, an 11-page document of highly legalistic character, Dr. Hammarskjöld rejected, by implication, Israel's request for guarantees in the Gaza strip and the Gulf of Akaba, and stressed that the armistice agreements must remain in force until a peaceful settlement of the Arab-Israel dispute. Basing his arguments on the continued validity of these agreements, he stressed that their provisions should be scrupulously observed by both sides and that the respective military forces had the obligation to withdraw to the armistice lines. Reiterating his previously expressed view that UNEF could only operate with the consent of the State in which it was stationed, he declared that the widening of UNEF's responsibilities to the Gaza strip would " have to be based on agreement with Egypt." Dr. Hammarskjöld envisaged the possibility of U.N. troops or observers being stationed on the Gulf of Akaba after the Israeli withdrawal " to maintain quiet in the area," but said that UNEF should not be used " to prejudge the solution of the controversial questions involved."

The first section of the report laid emphasis on two points : " (1) The United Nations cannot condone a change of the *status juris* resulting from military action contrary to the Charter. The Organization must therefore maintain that the *status juris* existing prior to such military action be re-established by a withdrawal of troops. (2) The use of military force by the U.N., other than that under Chapter VII of the Charter, requires the consent of the States in which the force is to operate . . . It must, furthermore, be impartial, in the sense that it does not serve as a means to force a settlement, in the interests of one party, of political conflicts or legal issues recognized as controversial."

The report then discussed the situation in the Gaza strip and the Gulf of Akaba, as summarized below :

The Gaza Strip.

" In considering the situation in Gaza, it should be taken into account that the Egyptian-Israeli Armistice Agreement provides that the armistice line is not to be construed . . . as a political or territorial boundary, and is delineated without prejudice to the rights, claims and positions of either party as regards the ultimate settlement of the Palestine question. It goes on to say that ' the basic purpose of the armistice line is to delineate the line beyond which the armed forces of the respective parties shall not move . . . '

" Although the armistice line thus does not create any new rights for the parties on either side, it resulted in a *de facto* situation by leaving the ' control ' of the territory in the hands of the Government, the military forces of which were there in accordance with the stipulations of the armistice. Control in this case obviously must be considered as including administration and security . . . It follows that the *de facto* administrative situation created under the armistice . . . can be legally changed only through settlement between the parties.

" The armistice agreement was signed by both parties and remains in force until a peaceful settlement between them is achieved. It was approved by the Security Council. Whatever arrangements the U.N. may wish to make in order to further progress toward peaceful conditions, the agreement must be fully respected by it. Thus the U.N. cannot recognize a change of the *de facto* situation created under the agreement unless the change is brought about through settlement between the parties. Nor, of course, can it lend its assistance to the maintenance of a *de facto* situation contrary to the one created by the armistice agreement.

" These considerations exclude the U.N. from accepting Israeli control over the area, even if it were of a non-military character. They would also exclude the deployment of the UNEF in the absence of Israeli troops, if such arrangements as those proposed by the Government of Israel were to be implemented.

" Deployment of the UNEF in Gaza, under the resolutions of the General Assembly, would have to be on the same basis as its deployment along the armistice line in the Sinai peninsula. Any broader function for it in that area, in view of the terms of the armistice agreement, would require the consent of Egypt. A widening of U.N. administrative responsibilities in the area, beyond its responsibilities for the refugees, would likewise have to be based on agreement with Egypt . . . Therefore, although the U.N. General Assembly would be entitled to recommend the establishment of a U.N. administration and to request negotiations to implement such an arrangement, it would lack authority . . . unilaterally to require compliance.

" The first Article of the armistice agreement provides that no aggressive action by the armed forces of either party shall be undertaken, planned or threatened against the people or armed forces of the other. It establishes the right of each party to security and to freedom from fear of attack by the armed forces of the other. This

Article assimilates the armistice agreement to a non-aggression pact providing for mutual and full abstention from belligerent acts. A restoration of relations between the parties, more stable than those now prevailing, can therefore be based on a reaffirmation of this Article . . .

" The provisions [of the armistice agreement] have been undermined progressively by the developments in recent years, and at the beginning of the crisis were not being fulfilled There is universal recognition that this state of affairs should not be permitted to return. Renewed full implementation of the armistice agreement obviously presumes such an attitude on the part of the Governments concerned, and such supporting measures as would guarantee a return to the state of affairs envisaged in the agreement . . .

" Whatever the state of non-compliance with the armistice agreement before the crisis, it would seem apparent that a by-passing of that agreement now would seriously impede efforts to lay the foundation for progress toward solutions of pending problems. A return to full implementation of the agreement would be a valuable step toward reduction of tension and the establishment of peaceful conditions in the region . . .

" The UNEF is deployed at the dividing line between the forces of Israel and Egypt. The General Assembly concurred in the Secretary-General's [earlier] report (see above) which specifically referred to the deployment of the force on only one side of the armistice line. On this basis, the force would have units in the Gaza area as well as opposite El Auja. With the demilitarization of the El Auja zone in accordance with the armistice agreement, it might be indicated that the force should have units stationed also on the Israel side of the armistice line, at least in that zone.

" Such deployment, which would require a new decision by the General Assembly, would have the advantage that the force would be in a position to assume the supervisory duties of the U.N. Truce Supervision Organization in all the territory where that organization now functions . . . In both Gaza and El Auja the functions of UNTSO and UNEF would somewhat overlap if such an arrangement were not to be made. As an arrangement of this kind was not foreseen by the armistice agreement, it obviously would require the consent of the two parties to the agreement . . . "

In conclusion, Dr. Hammarskjöld said that UNEF and UNTSO should co-operate in preventing raids and incursions and should seek formal assurances from the two parties to the dispute. He added that he had received an assurance from Dr. Fawzi that " the Government of Egypt desires that all raids and incursions across the armistice line, in both directions, be brought to an end."

The Gulf of Akaba.

" In connexion with the question of Israel's withdrawal from the Sharm-el-Sheikh area, attention has been directed to the situation in the Gulf of Akaba and the Straits of Tiran. This matter is . . . not directly related to the present crisis. The concern evinced about it, however, calls for consideration of the legal aspects of the matter as a problem in its own right . . .

" As stated in the previous report [i.e. Dr. Hammarskjöld's report of Jan. 16—see above] the international significance of the Gulf of Akaba may be considered to justify the right of innocent passage through the Straits of Tiran and the Gulf in accordance with recognized rules of international law. However, in its commentary to Article 17 of the Articles of the Law of the Sea, the International Law Commission reserved consideration of the question: What would be the legal position of straits forming part of the territorial sea of one or more States and constituting the sole means of access to the port of another State? This description applies to the Gulf of Akaba and the Straits of Tiran. A legal controversy exists as to the extent of the right of innocent passage through these waters.

" Under these circumstances . . . whatever rights there may be in relation to the Gulf and the Straits should be exercised with restraint on all sides. Any possible claims of belligerent rights should take into account the international interests involved and therefore, if asserted, should be limited to clearly non-controversial situations.

" The Security Council, in its resolution of Sept. 1, 1951 concerning the passage of international shipping through the Suez Canal, considered that 'since the [Palestine] armistice . . . is of permanent character, neither party can reasonably assert that it actively is a belligerent or requires to exercise the right of visit, search and seizure for any legitimate purpose of self-defence'—a basis on which the Council called upon Egypt to terminate the restrictions on the passage of shipping through the Canal. This finding of the Security Council has a direct bearing on the question under consideration. It remains valid and warrants corresponding conclusions as long as the assumptions defined by the Council remain correct . . ."

Given the observance of the armistice agreement by both sides (Dr. Hammarskjöld continued), " possible claims to rights of belligerency would at least be so much in doubt that, having regard for the general international interests at stake, no such claim should be exercised in the Gulf of Akaba and the Straits of Tiran. Such a *de facto* position, if taken, obviously would be part of efforts to re-establish as complete an armistice regime as possible, and, as such, would be detached from the policy of implementation of the unconditional General Assembly request for withdrawal behind the armistice lines . . .

" Israel troops, on their withdrawal from the Sharm-el-Sheikh area, would be followed by the UNEF in the same way as in other parts of Sinai. The duties of the Force in respect of the cease-fire and the withdrawal will determine its movements. However, if it is recognized that there is need for such an arrangement, it may be agreed that units of the Force (or special representatives as observers) would assist in maintaining quiet in the area beyond what follows from this general principle . . . The UNEF should not be used so as to prejudge the solution of the controversial questions involved . . . "

Dr. Hammarskjold's report gave rise to intense disappointment in Israel, where a Foreign Ministry spokesman described it as " a masterpiece of obscurity . . . remarkable no less for what it ignores than for some of the theories put forward."

Mr. Ben-Gurion, in a press statement on Jan. 28, said that the emphasis in the report " seems to be on legal formalism, associated with a past of Egyptian violence, bloodshed, and blockade, rather than on proposals which would promote peace in the area by preventing Egyptian aggression." The Israeli Government was " gravely disappointed " that the Secretary-General's report had " ignored the basic problem of Egypt's claim that she is entitled, contrary to the U.N. Charter, to maintain a state of war against Israel, and her desire to restore a state of affairs in which she can resume her murder of Israel's citizens and her blockade of Israel shipping."

Further U.N. Resolutions for Israeli Withdrawal to Armistice Lines.

The General Assembly held a further debate on the Middle East situation, extending over four days (Jan. 28-29 and Feb. 2-3), at the end of which it passed two more resolutions, each of which was sponsored jointly by Brazil, Colombia, India, Indonesia, Norway, the U.S.A., and Yugoslavia.

(1) The first resolution, after recalling the earlier Assembly resolutions of Nov. 2, Nov. 4, Nov. 6, Nov. 24, 1956, and Jan. 19, 1957:

(*a*) Deplored " the non-compliance of Israel to complete its withdrawal behind the armistice demarcation lines despite the repeated requests of the General Assembly ";

(*b*) Called upon Israel " to complete its withdrawal behind the armistice demarcation lines without further delay."

The resolution—the sixth of its kind passed by the General Assembly since the outbreak of the Middle East crisis—was adopted by 72 votes against two (France and Israel), with the Netherlands and Luxemburg abstaining.

(2) The second resolution, after taking note of the Secretary-General's report of Jan. 25:

(*a*) Recognized that " withdrawal by Israel must be followed by action which would assure progress toward the creation of peaceful conditions," and " noted with appreciation " the Secretary-General's report " and the measures therein to be carried out upon Israel's complete withdrawal ";

(*b*) Called upon Egypt and Israel " scrupulously to observe the provisions of the 1949 armistice agreement."

(*c*) Declared that " after the full withdrawal of Israel from the Sharm-el-Sheikh and Gaza areas, the scrupulous maintenance of the armistice agreement requires the placing of the U.N. Emergency Force on the Egyptian-Israeli armistice demarcation line and the implementation of other measures as proposed in the Secretary-General's report, with due regard to the considerations set out therein with a view to . . . the maintenance of peaceful conditions in the area ";

(*d*) Requested the Secretary-General, " in consultation with the parties concerned, to take steps to carry out these measures and to report, as appropriate, to the General Assembly."

The resolution was adopted by 56 votes to nil, with 22 abstentions—France, Israel, the Netherlands, all the 11 Arab countries, and eight of the nine Communist countries (Hungary being absent).

The Assembly's debate was opened by a number of spokesmen of the Arab countries, most of the speeches being marked by comparative restraint—although **Mr. Mahgoub** (Sudan) called upon all U.N. members to condemn Israel, and if possible to " discard " her.

Mr. Cabot Lodge (U.S.A.) called upon the Assembly to give " decisive " support to Dr. Hammarskjöld's recommendations, and said that the U.S. Government " strongly supported " the Secretary-General's proposal for the deployment of UNEF on both sides of the armistice lines, " particularly with regard to the sensitive positions in the Gaza and El Auja sectors." Israel should withdraw her forces to the 1949 armistice lines " without further delay," and when this was done " the UNEF should move in behind the withdrawing Israeli forces to assure the maintenance of the cease-fire and to safeguard the armistice agreement." Mr. Lodge said that it was " essential " that UNEF units should be stationed at the Straits of Tiran, but made it clear that the specific assurances asked by Israel could only be considered after the complete withdrawal of all Israeli forces behind the armistice lines.

Mr. Kuznetsov (U.S.S.R.) asserted that the UNEF had been created " in violation of the Charter," and said that its stationing in the Gaza strip and the Sharm-el-Sheikh area would convert it into a " permanent army of occupation " designed to " exert pressure on Egypt." Denouncing the " Eisenhower doctrine " for the Middle East, he declared that the U.N. was confronted with a new plan aimed at substituting " one colonial domination by another."

Mr. Lester Pearson (Canada) said that Dr. Hammarskjöld had made reasonable suggestions which could point the way to a solution of the present deadlock after the withdrawal of Israeli troops. He urged that Israel's withdrawal to the armistice lines should be followed by immediate steps leading to the creation of peaceful conditions in the area: in particular, (1) both sides should undertake to refrain from all hostile activities and to observe the armistice agreements scrupulously; (2) the UNEF should be deployed on both sides of the armistice line in the Gaza strip so as to prevent raids and incursions. Mr. Pearson also urged that the legal position in the Gulf of Akaba should be clarified, that Egypt should in the meantime give full guarantees that she would not interfere with freedom of shipping, and that UNEF troops should be stationed in the area to ensure peaceful conditions.

Commander Noble (U.K.) reiterated the British view that UNEF should act as a "shield" between Egypt and Israel. A return to the armistice regime should not involve the assertion of any belligerent rights by either side, a provision which should apply to the Gulf of Akaba and the Straits of Tiran.

Dr. Fawzi (Egypt) stated the position of his Government as follows: (1) Israel must withdraw immediately behind the armistice lines; (2) UNEF should then take up positions "exclusively" on both sides of these lines; (3) the entry of UNEF was subject to the consent of Egypt; (4) UNEF was in Egypt "not as an occupying force, not as a replacement for the invaders, not to resolve any questions relating to freedom of passage through the Suez Canal or through territorial waters, not to infringe Egyptian sovereignty, but for the sole purpose of giving expression to the determination of the United Nations to put an end to the aggression against Egypt."

Mr. Eban (Israel) stressed that there could be no return to the conditions of the past eight years; that belligerency must be renounced by both sides; that there should be no recrudescence of *fedayeen* raids or of the blockade in the Gulf of Akaba; and that Egypt and Israel should move forward "by direct contacts" toward "new relations of permanent peace."

Mr. Cabot Lodge (U.S.A.) reiterated that Israel must withdraw "forthwith," and said that he could "not predict the consequences" if Israel failed to comply with the resolution.

It was understood that Canada had declined to join the sponsors of the second resolution (all of whom, except the U.S.A., were countries contributing troops to the UNEF) because of its "studiedly vague" wording. Mr. Lester Pearson told the Assembly on Feb. 2 that Canada had "doubts" about the wording of the resolution in its present form, and would have preferred "more precise" language. He insisted, *inter alia*, that neither Egypt nor Israel should claim any belligerent rights, and that there should be no interference with freedom of navigation in the Gulf of Akaba.

Israeli Request for U. N. Assurances against Renewal of Egyptian Blockade. - Government of Israel maintains Position on Gulf of Akaba and Gaza Strip.

After a meeting of the Israeli Cabinet on Feb. 3, it was announced that Israel continued to adhere firmly to her position with regard to the Gaza strip and the Gulf of Akaba, as outlined by Mr. Ben-Gurion and communicated to the United Nations. It was further announced on Feb. 6 that Mr. Eban had had discussions with Dr. Hammarskjöld and had submitted to him:

(1) A declaration that Israel would "co-operate with U.N. efforts designed to establish peace in the Middle East based on the principles of the U.N. Charter."

(2) A request to the Secretary-General to ask the Egyptian Government whether it agreed to "the mutual and full abstention from belligerent acts by land, sea and air on the withdrawal of Israeli troops."

(3) A reference to the Sharm-el-Sheikh area "and the related question of measures designed to prevent interference with free navigation in the Straits of Tiran and the Gulf of Akaba."

The Director-General of the Israeli Foreign Ministry (Mr. Walter Eytan), in a press statement on Feb. 8, emphasized (*a*) that Israel would not withdraw her forces from the western shore of the Gulf of Akaba without effective assurances of free navigation, and (*b*) that she would not hand over control of the administration in the Gaza strip. He intimated that Mr. Ben-Gurion had informed President Eisenhower of Israel's stand in reply to a letter sent by the U.S. President on Feb. 3. [No details were given of President Eisenhower's letter, but it was understood to have urged compliance by Israel with the General Assembly's resolutions.] Mr. Eytan added, however, that the situation would change "radically, automatically, and immediately" if Egypt responded satisfactorily to the Israeli request that she should agree to "mutual and full abstention from belligerency."

Mr. Eytan pointed out that without a positive declaration from Egypt to this effect, the security of Israel would continue to be endangered; in such circumstances Israel dared not shift from the stand she had taken in respect of the Gulf of Akaba and the Gaza strip. Meanwhile, Dr. Hammarskjöld had been asked to define the arrangements he thought it possible to make for the permanent stationing of U.N. forces along the Gulf of Akaba if Israel should withdraw her forces from that area.

As regards Gaza, Israel would withdraw her military forces from the area if it were agreed that the administration of the strip should remain in Israeli hands. "Some form of suitable relationship" with the U.N. could be worked out, but it should not be allowed to hamper the exercise of full administrative authority by Israel. Mr. Eytan reiterated that the stationing of the U.N. Emergency Force in the Gaza area was unacceptable to Israel.

Mr. Eytan said that the Government had not ruled out the possibility that sanctions might be imposed against Israel by the U.N., and had borne this possibility in mind when formulating its present policy. He added: "We cannot be guided by double standards applied by the United Nations which result in one set of judgments in respect of Egypt and another in respect of Israel." (U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times)

A. UNITED KINGDOM. — Gold and Dollar Reserves in January 1957. - Sterling reaches Dollar Parity Level.

The Treasury announced on Feb. 4 that the sterling area's gold and dollar reserves fell by $40,000,000 during January after taking into account (*a*) $4,000,0000 received in U.S. defence aid, (*b*) $17,000,000 paid to E.P.U. in part settlement of the December deficit, and (*c*) $3,000,000 paid to creditor countries in E.P.U. under bilateral settlements. As a result, the gold and dollar reserves stood at $2,084,000,000 on Jan. 31, compared with $2,133,000,000 on December 31, 1956 and $2,140,000,000 on January 31, 1956.

It was pointed out in the press that the main reason for the fall in the reserves during January had been the considerable dollar expenditure on oil, which had not been met by drawing on the $500,000,000 credit extended to Britain by the U.S. Export-Import Bank.

Provisional figures for the E.P.U. January settlement showed that after a series of deficits starting in June, 1956, Britain had a surplus of £9,000,000.

For the first time since June 25, 1956, the sterling spot rate against the U.S. dollar passed the parity level of $2.80 on Jan. 22. After a slight decline on succeeding days, it reached parity again on Feb. 4.—(Treasury Press Office - Financial Times)

B. GERMANY. — Berlin. - Western Allies' Protest against Militia Parade in East Berlin.

The French, British, and U.S. Commandants in West Berlin issued a joint statement on Jan. 25 protesting against an armed Communist demonstration held in East Berlin on Jan. 20. During this demonstration over 10,000 armed factory workers organized into militia squads had marched in procession through the Eastern sector of the city in connexion with ceremonies commemorating the death in 1919 of the Communist leaders Wilhelm Liebknecht and Rosa Luxemburg.

The Allied statement reiterated that the whole of Berlin was still governed by rules drawn up by the four occupation Powers; that under these rules armed demonstrations were banned and "inconsistent with the special status of the city"; and that such demonstrations created "dangers for the city's security." The statement referred to two similar protests made by the Western allies during 1956. (New York Herald Tribune)
(Prev. rep. 14701 A.)

C. MONACO. — Birth of Princess Caroline.

A daughter was born on Jan. 23 to Prince Rainier and Princess Grace of Monaco, and was named Caroline Louise Marguerite. The infant princess is heir-presumptive to the throne of Monaco.—(Le Monde, Paris) **(Prev. rep. 14830 B.)**

Corrigendum. It was incorrectly stated in the footnote to 14830 B that the Principality of Monaco would pass under French sovereignty if the House of Grimaldi were to die out without male issue. This eventuality would only occur, however, if there were no heir to the throne of Monaco, either male or female. As stated above, the infant princess is heir-presumptive, but if a son should be born to Prince Rainier and Princess Grace he would become heir-apparent.
(Ed. K.C.A.)

D. YUGOSLAVIA. — Rejection of Appeal by M. Djilas against Three-year Sentence of Imprisonment.

The Supreme Court of Serbia rejected on Jan. 27 an appeal lodged by M. Milovan Djilas, the former Vice-President of Yugoslavia, against his conviction on Dec. 12, 1956, to three years' imprisonment on charges of conducting anti-State propaganda.—(Tanjug Agency, Belgrade) **(15273 B.)**

A. UNITED STATES. — Administration's Civil Rights Programme. - Progress of Racial Desegregation in Schools and Universities. - Protest Declaration by Southern Congressmen. - Counter-measures by Southern States. - Riots in Kentucky and Tennessee. - Segregation on Buses declared Illegal by Supreme Court.

The U.S. Attorney-General, Mr. Herbert Brownell, submitted to Congress on April 9, 1956, two draft Bills providing for (*a*) the establishment of a bipartisan commission on civil rights; (*b*) the appointment of an additional Assistant Attorney-General to direct the Government's legal activities in this field; (*c*) the creation of a new civil rights section in the Department of Justice; (*d*) the strengthening of the law against intimidation of voters; (*e*) powers for the Attorney-General to take legal action against conspiracies to interfere with civil rights.

The Bill for the establishment of a Civil Rights Commission provided that it should consist of six members appointed by the President with the Senate's consent, of whom not more than three should belong to the same political party. The commission would (1) "investigate allegations that certain citizens of the United States are being deprived of their right to vote or are being subjected to unwarranted economic pressures by reason of their colour, race, religion, or national origin"; (2) "study and collect information concerning economic, social, and legal developments constituting a denial of equal protection of the laws under the Constitution"; (3) "appraise the laws and policies of the Federal Government with respect to equal protection of the laws under the Constitution"; and (4) submit its final report within two years of its establishment. It would be empowered to subpoena witnesses and to demand the production of written evidence.

In his accompanying letter to Congress, Mr. Brownell pointed out that the civil rights section of the Justice Department was one of a number of sections within the criminal division, and proposed that in view of the "broadening legal activity in the civil rights field" it should become a separate section under the direction of an Assistant Attorney-General. The existing civil voting Statute, which was limited to deprivation of voting rights by State officers or other persons purporting to act under authority of law, should be amended in order to (1) "prevent anyone from threatening, intimidating, or coercing an individual in the exercise of his right to vote"; (2) authorize the Attorney-General to bring civil proceedings in any case covered by the Statute; and (3) eliminate the requirement that all State administrative and judicial remedies must be exhausted before access could be had to the Federal courts. Finally, Mr. Brownell proposed that, whereas at present conspiracies interfering with certain rights could be redressed only by a civil suit by the injured individual, the Attorney-General should be authorized to initiate civil action in such cases.

The Judiciary Committee of the House of Representatives approved the Administration's proposals on April 25, 1956.

Seven southern members of the committee (six Democrats and one Republican) issued a minority report on May 21 condemning the proposals on the grounds that they would permit the Federal Government to "invade" State and local governments in matters involving segregation and elections, and would constitute "a constant threat to any State or local government and to virtually every officer and agent of such governments." A statement denouncing the proposals as "a flagrant violation of States' rights" which would lead to "a further concentration of power in the Federal Government" and to "deterioration of the good will and harmonious relations existing between the races" was subsequently issued on July 13 by 83 Southern members of the House of Representatives (79 Democrats and four Republicans).

The Bill was passed by the House of Representatives on July 23, 1956, the voting being 279 to 126. Those supporting the Bill comprised 168 Republicans and 111 Democrats, while the opposition consisted of 102 Democrats (mostly from the Southern States) and 24 Republicans (five from the Southern States and 19 from 12 States north of the "Mason-Dixon line"). In the Senate the Bill was referred to the Judiciary Committee headed by Senator Eastland (a Democratic senator for Mississippi, and an opponent of the Civil Rights programme), but because of lack of time to deal with it before the adjournment of Congress, Senator Knowland informed President Eisenhower on July 25 that it would not be possible to get the Bill through. In consequence the measure lapsed.

Segregation in Education.

The process of abolition of racial segregation in public, elementary and secondary schools continued to make varying progress during 1956. Eight of the southern States—Alabama, Florida, Georgia, Louisiana, Mississippi, North and South Carolina, and Virginia—maintained their policy of complete segregation, and in all these States the Legislatures adopted measures during 1954-56 to circumvent the Supreme Court's ruling on the subject by abolishing the public school system and subsidizing private schools, or by means of "pupil assignment" schemes. In the nine other States where segregation had previously been compulsory—Arkansas, Delaware, Kentucky, Maryland, Missouri, Oklahoma, Tennessee, Texas, and West Virginia—the process of integration continued, although its speed varied from State to State. In Kentucky, Tennessee, and Texas the abolition of segregation at the beginning of 1956 led to riots and demonstrations in a number of towns.

In the field of higher education, only Florida, Georgia, Mississippi, and South Carolina continued to enforce complete segregation in State-supported colleges, although the Supreme Court issued two decisions against segregation.

(*a*) After considering an appeal from a lower court's order directing the University of North Carolina to admit three Negro students, the Supreme Court affirmed on March 5, 1956, that its ruling against segregation in public schools applied to institutions of higher education supported by public funds (*b*) On March 12, 1956, the Supreme Court reversed a decision of the Florida Supreme Court and ordered the University of Florida to admit a Negro student immediately.

A declaration condemning the Supreme Court's ruling of May 17, 1954 (see 13593 A) was issued on March 11, 1956, by 19 Senators and 77 members of the House of Representatives from 11 Southern States, who pledged themselves to resist it by "all lawful means."

Describing the Supreme Court's ruling as "clear abuse of judicial power," the declaration pointed out that the Fourteenth Amendment, on which the ruling was based, did not mention education, that the Congress which proposed the amendment had provided for segregated schools in the District of Columbia, and that "every one of the 26 States that had any substantial racial differences among its people either approved the operation of segregated schools already in existence or subsequently established such schools by action of the same law-making body which considered the Fourteenth Amendment." As the Supreme Court had admitted, the doctrine that "separate but equal" schools did not violate a constitutional guarantee of equality had apparently originated in 1849 in the northern State of Massachusetts, and had been followed by other northern States. In 1896 the Supreme Court had expressly declared that under the Fourteenth Amendment no person was denied any of his rights if the States provided separate but equal public facilities, and in 1927 the Court had unanimously reaffirmed this, with express reference to the public schools. In conclusion, the signatories pledged themselves to "use all lawful means to bring about a reversal of this decision," but appealed to the people of the southern States to "scrupulously refrain from disorder and lawless acts."

The declaration was signed by Congressmen from Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North and South Carolina, Tennessee, Texas, and Virginia, including all the Senators from those States except Senator Lyndon Johnson of Texas (Democratic leader in the Senate) and the two Senators for Tennessee—Senators Kefauver and Gore. All the signatories were Democrats except Representatives Broyhill and Poff of Virginia.

Developments in the individual States on the question of educational segregation are described below.

Alabama. The Birmingham Federal District Court ordered the University of Alabama on Feb. 29, 1956, to reinstate Miss Lucy, the first Negro admitted to the university, who had been suspended on Feb. 6 (see 14690 A); an appeal by the University against the order was dismissed by the Supreme Court on May 14. Miss Lucy, however, had meanwhile been expelled on Feb. 29 on the ground that she had made "baseless allegations" against the university authorities.

The trustees of the University, on March 12, also expelled a student who had acted as chairman of the local White Citizens' Council for making "outrageous public attacks" on them, and suspended other students for their part in the rioting occasioned by Miss Lucy's admission to the University.

Arkansas. Following the abolition of segregation in schools in the small town of Hoxie in July 1955, a boycott of the schools was organized by segregationist groups, whereupon an injunction against such activities was issued on Jan. 9, 1956, by the Federal District Court. When the segregationist organizations appealed against the injunction, the Department of Justice filed a brief with the Federal Appeal Court as a "friend of the court" on Aug. 24, accusing the segregationists of using intimidation to "force the school board to disobey the law." This was the first case in which the Federal Government had directly intervened to ensure enforcement of the Supreme Court's decision.

Georgia. The State Senate adopted on Feb. 13, 1956, a resolution declaring the Supreme Court's decision "null, void, and of no effect." The resolution had previously been passed by the Georgia House of Representatives.

Kentucky. Hostile demonstrations broke out at the town of Sturgis on Sept. 4, 1956, when nine Negro children were admitted to the local high school for the first time, National Guards having to be called in to maintain order. Similar incidents occurred at the nearby town of Clay. The State Attorney-General, Mr J. M. Ferguson, ruled on Sept. 13 that a local school board had to take action on integration before Negroes could be admitted, with the result that at both Sturgis and Clay the school boards voted to return to segregation. A suit was subsequently filed with the Federal Court on the Negro children's behalf by the National Association for the Advancement of Coloured People (N.A.A.C.P.). A boycott of schools in Henderson County, organized by the White Citizens' Council as a protest against integration, ended on Sept. 28 after Mr. Ferguson had ruled that its organizers could be prosecuted for conspiracy. In Louisville mixed classes were introduced on Sept. 10 without opposition, and in the State as a whole more than half the schools had been integrated by September.

Louisiana. The New Orleans Federal District Court ruled on Feb. 15, 1956, that State laws passed in 1954 enforcing segregation were invalid, and ordered the integration of the New Orleans schools "with all deliberate speed." An appeal by the Orleans Parish School Board was rejected by the Supreme Court on May 28. The State Legislature, however, unanimously adopted on May 29 a resolution declaring that the Supreme Court's ruling of 1954 "violates the Constitution of the United States and of Louisiana," and was therefore null and void. A Bill permitting the dismissal of teachers who advocated the abolition of segregation was unanimously adopted by the Louisiana House of Representatives on June 17, 1956.

Archbishop Rummell of New Orleans denounced segregation on Feb. 19, 1956, in a pastoral letter read in all Roman Catholic churches in the diocese. Roman Catholic spokesmen subsequently stated that all Catholic schools in the State would be integrated, and Catholic members of the State Legislature were warned that any of them supporting legislation to enforce segregation in Catholic and other private schools would be excommunicated. About one-third of the population of Louisiana are Catholics, over one-third of the children in New Orleans attending Catholic schools.

North Carolina. An advisory committee on education, appointed by the Governor in June 1955, issued its report on April 6, 1956. While accepting the Supreme Court's decision as binding, it recommended (*a*) that local school boards should decide what school each child should attend on the basis of the child's welfare, and (*b*) that the State Assembly should adopt legislation authorizing financial grants to non-sectarian private schools and the suspension of public education in any community which so decided by popular vote.

Ohio. The Supreme Court rejected on April 2, 1956, an appeal by the Hillsboro school board against an order of the Cincinnati Federal District Court ordering the immediate integration of Hillsboro elementary schools.

Tennessee. In accordance with a court order issued on Jan. 4, 1956, 12 Negro pupils were admitted on Aug. 27 to Clinton High School, the first public secondary school in the State to be integrated. Although there was no immediate reaction, serious rioting broke out within the next few days under the leadership of an agitator from Washington, who was sentenced on Aug. 31 to a year's imprisonment. The same evening (Aug. 31) a mob stoned cars driven by Negroes, and on the following day armed National Guards were sent to the town to restore order. A request by the Tennessee Federation of Constitutional Government (a segregationist organization) contending that the principal of the school had no authority to admit Negroes, and that school officials had no right to spend State funds on integrated schools, was rejected on Sept. 3 by the State Supreme Court, which held that the question had been "fully foreclosed" by the U.S. Supreme Court's decision. The Court subsequently ruled on Oct. 5 that State laws requiring segregation in schools were unenforceable.

There was no renewal of violence when the National Guards were withdrawn, and in municipal elections held on Dec. 4 segregationist candidates were overwhelmingly defeated. As a result of ill-treatment by their schoolmates, however, some of the Negro children asked on Nov. 30 to be transferred to a Negro school, and on Dec. 4 a White clergyman was assaulted after he had escorted six Negro children to the school, which was then closed. The school board appealed to Mr. Brownell on Dec. 3 for assistance in enforcing the order of Jan. 1956, and Mr. Brownell, in reply, gave an assurance that persons wilfully violating the order would be prosecuted. The school was reopened without further incident on Dec. 10, after 16 persons had been arrested on charges of provoking new outbreaks of violence.

Governor Clement recommended on Jan. 9, 1957, that the State Legislature should adopt Bills permitting local school boards (1) to maintain separate schools for children whose parents preferred them "to attend school with members of their own race," and (2) to "place, assign, and transfer" the pupils in their jurisdiction on "sociological, geographical, physical, psychological, fiscal, educational, and other factors, in the best interests of the child and the community as a whole." The Bill was approved by the Legislature on Jan. 23.

Texas. At the town of Mansfield crowds gathered outside the high school on Sept. 4, 1956, to prevent Negro pupils from registering, and the local authorities announced that if any of the eligible Negroes attempted to register they would be transferred immediately to another school district for "safety reasons." Two Negro pupils, the first admitted to Texarkana Junior College, were prevented from entering the college building on Sept. 10 by demonstrators, after Texas Rangers who had been sent to maintain order had refused to protect them.

Virginia. The House of Delegates approved on Feb. 20, 1956, a resolution calling for continued segregation in State schools in the 1956-57 academic year, on the ground that there was insufficient time for adjustment by September. A State convention unanimously approved on March 6 a constitutional amendment permitting the General Assembly and local governing bodies to pay tuition fees from public funds.

A special session of the State Legislature, meeting from Aug. 27-Sept. 22, 1956, adopted a number of Bills intended to prevent integration, their main provisions being as follows: (1) The Governor was empowered to stop all State aid to school boards which complied with court orders to admit Negroes to White schools, and to take under his direct control schools which had been closed for lack of funds. (2) State grants might be made available to finance the tuition in non-sectarian private schools of pupils whose public schools had been integrated or closed. (3) Teachers in private schools receiving State grants would be eligible for the same benefits as teachers in public schools. (4) All powers to assign pupils to particular schools, or to transfer them from one school to another, were taken from local school boards and vested in the Governor. (5) Officials assigning pupils were directed to do so on the basis of individual needs, health, and aptitude, and to avoid mixing races contrary to the wishes of the children and parents involved.

The Norfolk Federal District Court ruled on Jan. 11, 1957, however, that the Act for the assignment of pupils on the basis of "intangible social-scientific factors" was "directly in the teeth of the language of the Supreme Court" and therefore unconstitutional.

Segregation in Buses and Public Places.

The U.S. Supreme Court ruled on April 23, 1956, that racial segregation on buses running within a State was unconstitutional. The ruling arose out of a suit for damages brought against a South Carolina bus company by a Negro woman who had been turned off a bus by the driver when she refused to move to the section reserved for Negroes. Her claim was dismissed by the Federal District Court, but was subsequently upheld by the Richmond Federal Court of Appeals, whose decision was upheld by the Supreme Court. Segregation on inter-State buses [i.e. buses travelling between States] had been declared unconstitutional by the Supreme Court in 1946.

Under existing laws racial segregation on internal State bus services was compulsory in 13 of the southern and border States. The Attorneys-General of South Carolina, Texas, and Virginia denounced the Supreme Court's decision in a joint statement on April 23 as "another unwarranted invasion of State and municipal rights," while Governor Griffin of Georgia declared that the State's segregation laws would remain in force. Bus companies in North Carolina, Tennessee, Texas, and Virginia, however, instructed their drivers not to enforce segregation. In Montgomery (Alabama), where Negroes had been boycotting the buses since December 1955 (see below), the local police over-ruled a proposal by the bus company to end segregation, which remained in force until the Supreme Court reaffirmed its ruling on Nov. 13. Following the Supreme Court's decision of April 23, protest campaigns against segregation were also organized in Tallahassee (Florida), Birmingham (Alabama), and Atlanta (Georgia), where Negroes either boycotted the buses or ignored the segregation laws.

The Civil Aeronautics Administration announced on May 4, 1956, that it would refuse to allocate federal funds for the building of airport facilities which were intended to be used on a racially segregated basis.

Recent developments in the individual States relating to segregation in buses, parks, and other public facilities are summarized below:

Alabama. In Montgomery, Negroes began a boycott of the city's transport system on Dec. 5, 1955, after a Negro woman had been arrested for refusing to give up her seat on a bus to a White passenger. The leader of the movement, Dr. M. L. King (a Negro Baptist minister), was fined $500 on March 22, 1956, for conducting an illegal boycott under a statute originally intended to be used in labour disputes, an appeal being lodged by Dr. King. Although the bus company stated on April 24 that the Supreme Court's decision left it with "no choice except to discontinue the practice of segregation," the local police commissioner, announced that any passenger violating city or State segregation laws would be prosecuted, with the result that the boycott continued. The Montgomery Federal District Court ruled on June 5 that the city's ordinances enforcing segregation were unconstitutional, this decision being upheld by the Supreme Court on Nov. 13, 1956. Segregation was accordingly ended on Dec. 21, and with it the boycott, but on Jan. 10, 1957, the bus service was suspended indefinitely after a series of incidents in which shots were fired at buses and four Negro churches and the homes of a White and a Negro clergyman were seriously damaged by dynamite explosions. The bus service was resumed again on January 15 during the hours of daylight.

In Birmingham, large numbers of Negroes on Dec. 26, 1956 occupied bus seats reserved for Whites; the demonstration was called off, however, after 21 had been arrested, in order that the legality of the arrests might be tested in the courts. The home and church of the Rev. F. L. Shuttlesworth, the leader of the movement, had been wrecked by a dynamite bomb on Dec. 25.

Florida. In Tallahassee, Negroes began a boycott of the city's buses in May 1956, but on Dec. 24 they adopted the new tactic of ignoring the segregation laws. The city authorities suspended the bus company's licence on Dec. 26 because it had refused to enforce the segregation laws, but on the following day the Federal District Court issued an injunction forbidding the city to interfere with integrated bus services on the ground that all segregation laws were "dead as a doornail." Governor Collins again suspended the city's bus services on Jan. 1, 1957, after a Negro minister's house had been stoned and shots fired at a Negro shop, and the city council subsequently passed a bye-law assigning bus passengers to certain seats. This law, however, was condemned on Jan. 12 by Governor Collins, who ordered the bus services to be resumed.

Georgia. In Atlanta a number of Negro clergymen occupied "White" seats on buses in defiance of the law on Jan. 9, 1957, six being arrested but subsequently released on bail.

Louisiana. A Bill forbidding all "inter-racial dancing, social functions, entertainments, athletic training, games, sports or contests, and other activities involving personal and social contacts" was passed unanimously by the State House of Representatives on June 17, 1956, and was signed by Governor Long on July 16.

Mississippi. The State Legislature passed two Bills on March 1, 1956, requiring Negro and White passengers to use separate waiting rooms at railway and bus stations.

Tennessee. The N.A.A.C.P. appealed to the Memphis Federal District Court on June 5, 1956, to declare the State laws requiring segregation on buses unconstitutional, and to issue an injunction restraining the city and the bus company from enforcing them.

Texas. The San Antonio city council unanimously repealed on March 22, 1956, all local ordinances requiring racial segregation in public swimming baths, golf courses, and other public facilities.

Virginia. The Federal Court of Appeals upheld on April 9, 1956, a ruling of the Norfolk Federal District Court that the State could not lease Seashore State Park under any arrangement that would discriminate against members of any race. The exclusion of Negroes from the park had been the subject of ligitation since 1951.

Measures against N.A.A.C.P.

Governor Timmerman of South Carolina signed an Act on March 17, 1956, forbidding the employment of members of the National Association for the Advancement of Coloured People by State, county, or municipal authorities. Injunctions forbidding further activities by the N.A.A.C.P. were issued by State courts in Louisiana on April 24, 1956, and in Alabama on June 1. In Louisiana action was taken (under a law originally directed against the Ku Klux Klan) on the ground that the N.A.A.C.P. had failed to file annual membership lists, while in Alabama the injunction was sought by the State Attorney-General on the grounds that the Association had organized the boycott of buses in Montgomery and had induced Miss Lucy to enrol at the State university. This latter allegation was subsequently denied by the N.A.A.C.P., which stressed that no pressure of any sort had been brought upon Miss Lucy to induce her to enrol at the University of Alabama.

Negro Leaders' Appeal to President Eisenhower and Vice-President Nixon.

A conference attended by 60 Negro leaders from 29 communities in 10 Southern States, held at Atlanta on Jan. 11, 1957, under the chairmanship of the Rev. King [see Alabama, above], appealed to President Eisenhower to "come immediately" to a Southern city and make a "major speech" urging all people in the South to abide by the decisions of the Supreme Court on civil rights. It was also suggested that the President should "use the weight of his great office" to emphasize to Southerners the "moral nature of the problem posed at home and abroad by the unsolved civil rights issue." In a telegram to Vice-President Nixon the Negro leaders asked him to make a tour of the South "similar to the one made on behalf of Hungarian refugees." [Mr. Nixon had recently flown to Vienna to study the problems of Hungarian refugees in Austria].—(New York Times - New York Herald Tribune) **(Prev. rep. 14690 A.)**

A. UNITED KINGDOM. — Unemployment Figures.

The monthly figures of persons registered as unemployed in Great Britain during 1956 were as follows:

	Wholly unemployed (including Casuals)		Temporarily stopped		
	Males	Females	Males	Females	Total
Jan. 16 ..	164,555	83,581	8,621	7,153	263,910
Feb. 13 ..	167,073	80,230	19,382	8,943	275,628
March 12 ..	158,967	79,110	10,936	10,509	265,522
April 16 ..	148,696	78,832	12,823	11,164	251,515
May 14 ..	135,601	72,302	17,787	11,741	237,431
June 11 ..	126,072	63,456	20,134	12,915	222,577
July 16 ..	120,007	63,693	32,013	13,424	238,137
Aug. 13 ..	146,651	72,238	35,052	12,600	266,541
Sept. 17 ..	145,044	80,151	13,782	8,663	247,640
Oct. 15 ..	151,339	88,002	8,742	5,990	254,073
Nov. 12 ..	161,705	91,205	5,812	5,856	264,578
Dec. 10 ..	176,977	90,737	22,686	6,547	296,947

Persons registered as unemployed at Dec. 10, 1956, represented 1.4 per cent of total employees, compared with 1.2 per cent at Nov. 12, 1956 and 1 per cent in December 1955. Of the total number of unemployed in December, 31,645 were wholly unemployed and 1,147 temporarily unemployed in Northern Ireland.

The number of vacancies on the employment exchanges' registers at Dec. 12, 1956 was 279,000, which was 21,000 fewer than at Nov. 14, 1956 and 103,000 fewer than at Dec. 12, 1955. In December 1956, therefore, the number of unemployed for the first time exceeded the total number of vacancies.
(Ministry of Labour Gazette) **(Prev. rep. 14756 B.)**

B. ARGENTINA. — Par Value for Argentine Peso.

The International Monetary Fund in Washington announced on Jan. 10 that the initial par value for the Argentine peso had been established by agreement with the Argentine Government at 18 pesos to the U.S. dollar, the other new parities being one peso = 0.0408706 grams of fine gold, or 5.55556 U.S. cents. (International Monetary Fund) **(Prev. rep. 15142 B; 14791 E.)**

C. FRANCE - ITALY. — Mont Blanc Road Tunnel Project. - Approval by French National Assembly.

The French National Assembly approved on Jan. 24, by 544 votes to 32, the ratification of the Franco-Italian convention of 1953 for the construction of a road tunnel under Mont Blanc, linking the Chamonix valley in France with the Upper Aosta valley near Courmayeur, in Italy.

Support for the project had been recommended by the Assembly's Communications Commission, on whose behalf M. Anthonioz (Independent) pointed out that, on the basis of present prices and costs, the total French participation would be about 6,000,000,000 francs (about £6,000,000), the Italian participation 5,500,000,000 lire (about £3,300,000), and the share of the Canton and City of Geneva 700,000,000 French francs (about £700,000). The French share would include (*a*) a subscription of 210,000,000 francs by the French Government to the capital of the French company which would build the French half of the tunnel; (*b*) a French subsidy of 1,790,000,000 francs to that company, to be charged to the special road development fund; and (*c*) a French State guarantee of up to 2,000,000,000 francs for any loans issued by the company. The French and Italian construction companies would form a joint Franco-Italian company for the operation of the tunnel.

The tunnel—which would be 11.9 kilometres (7¼ miles) long and whose construction would take three years—would be a paying proposition, receipts from tolls being estimated at 720,000,000 francs annually against running expenses of 200,000,000 francs; there would thus be left a gross profit of 520,000,000 francs, to be shared between France and Italy and sufficient to amortize a thirty-year loan at 7 per cent.

The project was also supported by M. de Menthon (M.R.P.), *rapporteur* of the Foreign Affairs Commission, and M. de Chevigné (M.R.P.), for the Industrial Production Commission. It was opposed by Dr. Médecin (R.G.R.), the mayor of Nice, and by several deputies representing the Savoie and Haute-Savoie departments, who wanted a further study of an alternative road project under the Mont-Cenis (Fréjus). The Communists were among the parties supporting the Bill.

The Italian Parliament had approved the project in 1954. (Le Monde, Paris) **(Prev. rep. Mont Blanc Tunnel, 13783 C.)**

D. BRAZIL - UNITED STATES. — Agreement on Guided Missile Tracking Station on Fernando de Noronha Island.

After nearly six months of negotiation, an agreement was concluded on Jan. 21 between the Brazilian and U.S. Governments whereby the U.S.A., under a five-year concession, was given permission to establish a guided missile tracking station on the Brazilian island of Fernando de Noronha, in the South Atlantic.

In an exchange of Notes the two Governments stated that the agreement was based on the Inter-American Treaty of Reciprocal Assistance signed in Rio de Janeiro on Sept. 2, 1947, and the U.S.-Brazilian Military Assistance Agreement of March 25, 1952, and that it related to "the defence of Brazilian territory and of the American continent."

The agreement provided (1) that the electronic tracking station would be constructed by U.S. specialists and technicians, assisted by Brazilian specialists and technicians; (2) that it would be under the command of a Brazilian officer; (3) that only the Brazilian flag would fly over Fernando de Noronha; (4) that the operation of the installations should be under the responsibility of U.S. technicians, assisted by Brazilian technicians and defence personnel; (5) that U.S. technicians would gradually be replaced by Brazilian technicians in accordance with conditions to be determined by common agreement; and (6) that the buildings and fixed structures to be erected in connexion with the installations would become Brazilian property without payment on the termination of the agreement.

It was laid down that the agreement might be extended after the initial five-year period "under conditions and for a period to be agreed by both sides, and in the event of such an extension may be terminated by either side at one year's notice."

The island of Fernando de Noronha lies in the 4,400-mile rocket testing corridor between Florida and Ascension Island, established under the Anglo-U.S. agreement of June 1956. (New York Times - New York Herald Tribune) **(Prev. rep. 14964 B.)**

E. NEW ZEALAND. — Overseas Exchange Transactions. - 1956 Surplus.

It was announced in Wellington on Jan. 24 that New Zealand's overseas exchange transactions in 1956 had resulted in a surplus of £8,800,000, compared with deficits of £26,600,000 in 1955 and of £16,600,000 in 1954. Receipts in 1956 amounted to £324,300,000 (an increase of £30,200,000 over 1955) while payments, at £315,500,000, showed a decrease of £5,200,000.

New Zealand had a deficit of £37,000,000 with the sterling area but a surplus of £45,800,000 with non-sterling countries. The greatest improvement, however, was in the dollar area balance—from a deficit of £14,700,000 in 1955 to a surplus of £800,000 in 1956.—(Directorate of Information, Wellington) **(Prev. rep. 14941 A.**

A. UNITED KINGDOM. — The Finance Act, 1956. - Details of Premium Bonds Scheme. - Treasury Advances to Nationalized Industries. - National Savings in 1956.

The Finance Bill, 1956, embodying the provisions announced by the Chancellor of the Exchequer, then Mr. Harold Macmillan, in his 1956-57 Budget (see 14821 A), was enacted on Aug. 2, 1956, with only minor modifications.

The chief amendments agreed to during the House of Commons' Committee and Report stages, which took place from June 5-26 and July 10-11, were as follows:

(*a*) A Government amendment restoring the existing tax position for persons domiciled overseas but working in the U.K. for overseas employers, whereby only that part of their salary which was received in or remitted to Britain would be taxable.

[Clause 9 of the Finance Bill, which would have made such persons liable to U.K. taxation on the whole of their pay for work done in Britain, irrespective of whether payment was received in the U.K. or overseas, was withdrawn. This clause had been widely criticized, especially because of its possible repercussions on U.S. businesses in Britain. In withdrawing the clause, Mr. Macmillan explained that it might have discouraged investment and trading by overseas concerns in the U.K., and have led to their establishing their business elsewhere.]

(*b*) Three related Government-sponsored amendments affording Income-tax relief in respect of premiums paid for retirement pensions by self-employed persons: (i) raising the maximum basic amount of qualifying premiums to rank for tax relief in any particular year from £500, or 10 per cent of "net relevant earnings," whichever was less, to £750 or 10 per cent of earnings; (ii) increasing the new limit further for persons born before 1916, on a sliding scale depending on age—viz. for those born in 1914 or 1915 to a maximum of £825 or 11 per cent of earnings, and for those born before 1907 to a maximum of £1,125 or 15 per cent of earnings; (iii) enabling persons simultaneously holding two posts—one "pensionable" and the other "non-pensionable" (e.g., doctors acting as hospital registrars in addition to their practice, or accountants being at the same time company secretaries)—to take up a retirement annuity scheme in respect of their self-employed service and any other non-pensionable appointment.

(*c*) An amendment, moved by Mr. Arbuthnot (C.) and accepted by the Government, bringing within the retirement annuities scheme a policy guaranteeing the payment of an annuity after the death of the beneficiary for a period not exceeding ten years, instead of five years as originally proposed. The amendment aimed at safeguarding participants in the retirement and pension schemes against the contingency of their death before receiving benefits, by making it possible for an annuity to be paid to their dependants for the above-mentioned period.

(*d*) A series of Government amendments exempting cars made by amateur enthusiasts from purchase tax. It was made clear, however, that close watch would be kept to see that the new provision was not turned to commercial benefit.

(*e*) A Government amendment extending the limited Income-tax relief on savings bank interest to deposits in savings banks maintained under a local act (subject to Treasury approval of the arrangements), and also to deposits in seamen's savings banks maintained under the Merchant Shipping Act, 1894.

(*f*) A Government amendment providing taxation relief for M.P.s' compulsory contributions to the House of Commons Members' Fund.

(*g*) An amendment, moved by Colonel Marcus Lipton (Lab.) and accepted by Mr. Macmillan, exempting from Income-tax the annuities and additional provisions paid to holders of the Victoria Cross.

(*h*) An amendment, accepted by the Government, providing that not only works of art of aesthetic merit but also those of historic value might be accepted towards estate duty.

The principal amendments rejected or withdrawn are summarized below, the names of their sponsors being given in parentheses:

(1) To provide that capital expenditure up to £5,000 should continue to rank for investment allowance to assist small businesses on which the "credit squeeze" bore heavily (Mr. Jenkins, Lab.; rejected by 257 votes to 199).

Sir Edward Boyle (then Economic Secretary to the Treasury) said that although the Government would suspend the investment allowance, it had restored the initial allowance, thus making the position more favourable for small firms than in 1951.

Three other amendments to retain the investment allowances for the cotton textile industry (Mr. Thornton, Lab.), for the machine-tool industry (Mr. Hobson, Lab.), and for new-type kilns and dryers used in the pottery industry, were similarly rejected.

(2) To afford relief from U.K. taxation for British firms taking advantage of the tax concessions offered by Colonial territories to set up businesses in those territories (Mr. Ted Leather, C.). Withdrawn after Mr. Macmillan had promised that he would introduce during 1957 legislation on the lines recommended by the Royal Commission on taxation granting tax relief to pioneer industries operating overseas, with retrospective effect to April 6, 1956.

(3) To exempt the living theatre and similar entertainments from Entertainments Duty. Moved by Dr. Barnett Stross, Lab., who asserted out that the theatre was in a state of decline because of heavy taxation, 80 provincial theatres having closed down in the past few years.

Mr. Macmillan rejected the amendment on the ground that the £40,000,000 revenue involved would upset the balance of his Budget. He promised, however, that the tax would be reshaped in the near future after a review by the Customs and Excise Department. The amendment was negatived by 243 votes to 206.

Two other amendments to exempt games and sports other than horse- and dog-racing from Entertainments Duty (Mr. E. Smith, Lab.), and to reduce the contribution made by cinemas (Mrs. White, Lab.), were both rejected.

(4) To grant relief from income tax for parents educating their children privately (Lt.-Col. Bromley-Davenport, C.). Defeated by 248 votes to 191.

(5) Two amendments to raise the income tax allowance for a child from £100 to £125 (Mr. Jay, Lab.), and that for an incapacitated child under 21 from £100 to £150 (Mr. Cronin, Lab.). Both were rejected, the first by 248 votes to 191 and the second by 244 to 193.

(6) To grant old-age pensioners relief from the increase in tobacco duty (Mr. T. Brown, Lab.). Defeated by 260 votes to 205.

Replying to Opposition pleas that a concession costing only £2,250,000 in a Budget aiming at a £464,000,000 surplus was not "asking too much," Mr. Macmillan said that he had considered giving pensioners an additional tobacco coupon. He did not feel it right, however, to perpetuate a scheme which was not a good method of helping old-age pensioners, many of whom were non-smokers and received no comparable benefit. Earlier, Mr. Brooke had pointed out that the proposed duty increase raised the price of tobacco by only 5 per cent, in comparison with which prices of almost everything else had risen since 1948 by 50 per cent, and old-age pensions by over 50 per cent.

The Finance Bill was given an unopposed third reading in the House of Commons on July 13, 1956, passed its second reading in the House of Lords on July 30, and received the Royal Assent on Aug. 2, 1956.

The Premium Bonds Scheme.

During the Committee stage Mr. Macmillan announced on June 18, 1956, that the first issue of Premium Bonds would be on sale at banks and post offices from Nov. 1, 1956. He gave the following details:

(*a*) Individual holdings would be limited to £500, and not £250 as previously announced.

(*b*) Draws would take place monthly, commencing June 1957, but a bond would not be eligible for its first draw until six months after purchase; it would then remain eligible for successive draws as long as the holder wished.

(*c*) Bonds would not be transferable, but might be repaid at any time on application.

(*d*) The prize fund would be calculated each time on the assumption that all bonds in the draw had earned 4 per cent interest per annum since the end of the month in which they were bought.

(*e*) Each £10,000 of the prize fund would be divided into 237 tax-free prizes as follows: one of £1,000, two of £500, four of £250, ten of £100, 20 of £50, and 200 of £25. [A subsequent Treasury statement announced that any "broken" amount of less than £10,000 would be allocated in £25 prizes.]

(*f*) Administrative costs would not be a charge on the prize fund, but in order to keep these costs as low as possible there would be no joint holdings of bonds.

(*g*) Bonds could be bought only by persons of 16 or over, although a child could hold a bond bought in his name.

Further details of the Premium Bonds scheme were given by the Postmaster-General (then Dr. Hill) on July 26, as follows:

(i) The bonds sold at post offices and banks would be in units of from £1 to £10. Multiple bonds of higher denominations would be available on application.

(ii) The numbers of the bonds winning prizes would be published in the *London Gazette* and the holders notified by post. No further information would be disclosed.

The Postmaster-General announced on Nov. 30 that over £40,000,000 of bonds qualifying for the first draw had been sold by Nov. 28. Sales of premium bonds amounted to £25,400,000 in December and to £4,400,000 in January.

The Chancellor's plan to institute premium savings bonds to stimulate National Savings had been strongly criticized by many Church leaders, as well as by the Opposition.

Church Opposition. During a House of Lords' debate on the Small Lotteries and Gaming Bill (a private member's measure), held on April 26, 1956, the Archbishop of Canterbury (Dr. Fisher) declared with reference to the Premium Bonds scheme that he was "deeply concerned with the moral aspect of the issue," and accused Mr. Macmillan of "debasing the spiritual coinage of the nation at the very time when there is paramount need to restore it." Rejecting the Chancellor's argument that premium bonds were not "a gamble" or that they were "too small to corrupt," he said that "a long succession of small gambles tending to become more numerous, aided by commercial examples, cannot make the nation great. They can only make it flabby and fluttery in spirit."

Similar criticisms were directed against the scheme by the British Council of Churches, the Lambeth Conference, the World Methodist Council, the secretary of the Baptist Union, (Rev. E. A. Payne), Dr. H. C. Whitley (Minister of St. Giles' Cathedral, Edinburgh), Professor J. Burleigh (a former Convener of the Church and Nation

Committee of the Church of Scotland), and Dr. Leslie Weatherhead (president of the Methodist Conference). On the other hand, the Bishop of Exeter (Dr. Mortimer) and the Dean of St. Paul's (Dr. Matthews) were among a number of Churchmen who expressed support for the premium bonds scheme.

Parliamentary Opposition. Following a meeting of the Parliamentary Labour party on May 31, 1956, Mr. Harold Wilson, who had earlier described the scheme as a "squalid raffle," stated that the "Shadow Cabinet" was opposed to it for the following reasons: (*a*) recourse to this "expedient" was "an indication of the Government's failure to deal with the economic situation", (*b*) State support for a form of lottery was objectionable; (*c*) there was a serious risk that the new bonds would detract from normal savings; and (*d*) an important section of the public had strong conscientious objections to the gambling element.

Chancellor's Defence of Premium Bonds Scheme. Replying to these criticisms on June 18, during the Committee stage of the Finance Bill, Mr. Macmillan expressed the view that the country would welcome this new idea as part of a "large new package of securities," the need for which had been stressed by the National Savings Movement to stimulate savings. Denying that the scheme would result in a switch from one form of savings to another, the Chancellor pointed out that it would attract a large section of the public who, "rightly or wrongly, are not attracted by interest but will be by the prospect of a prize." He deeply respected the views of those who felt strongly on the moral issue, but he felt that they were mistaken, and he deplored the "tendency to exploit these views for political ends."

National Savings in 1955 and 1956.

The National Savings Committee announced on Jan. 5, 1957, that savings during 1956 totalled £1,701,000,000 (compared with £1,342,000,000 in 1955) and withdrawals £1,574,000,000 (£1,265,000,000 in 1955). The excess of savings over withdrawals thus amounted to £127,000,000, this figure comparing with £77,000,000 in 1955 and being the largest since 1948. The sum remaining invested at Dec. 31, 1956 was £6,170,000,000.

Bank Overdrafts of the Nationalized Industries.

The new arrangements embodied in the Finance Bill whereby certain nationalized industries would have their capital requirements for the next two years provided by the Exchequer, were introduced at the beginning of September 1956. The industries concerned were the Central Electricity Authority, the North of Scotland Hydro-Electric Board, the South of Scotland Electricity Board, the Gas Council, the British Transport Commission, B.O.A.C., and B.E.A.

According to figures published by the Treasury, the total outstanding bank overdrafts of these undertakings were: at June 30, 1956, £100,800,000; at July 18, £106,900,000; at Aug. 15, £123,400,000; at Sept. 19, £90,300,000; at Oct. 17, £90,400,000; at Nov. 21, £95,200,000; at Dec. 31, £118,700,000; and at Jan. 16, 1957, £104,600,000.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Treasury Press Office) **(Prev. rep. Budget 1956-57, 14821 A; National Savings, 14027 F.)**

A. INDIA. — Inauguration of Hirakud Dam.

The Hirakud Dam, spanning the Mahanadi River in Orissa, was officially inaugurated by Mr. Nehru on Jan. 13. Three miles in length and 200 ft. high, it is not only the longest dam in the world but also impounds the world's largest man-made reservoir, covering 288 square miles and having a storage capacity of 6,600,000 acre-feet of water.

The inauguration marked the first stage of the Hirakud project, which, after the installation of further power-plant and the construction of additional "feeder" canals, will have a total generating capacity of 123,000 kilowatts in 1957, rising to 200,000 kw. as further stages are completed. The dam will make it possible to irrigate an area of 450,000 acres by 1958-59, and of over 2,000,000 acres in subsequent years.

In addition to power production and irrigation, one of the dam's principal benefits will be the prevention of the disastrous floods caused in past years by the overflowing of the Mahanadi River, which had frequently devastated large areas of Orissa. The new steel plant at Rourkela, at present under construction (see 15298 C), will be among the industrial concerns to obtain hydro-electric power from the dam.

The cost of the first stage of the Hirakud project was 710,000,000 rupees (£53,250,000), to which the U.S. Government had contributed equipment worth about $8,000,000 in 1952. The dam was built entirely by Indian engineers. (The Statesman, Calcutta - The Hindu, Madras)

(Prev. rep. 14509 E; 9245 F.)

B. UNITED KINGDOM. — War Damage Payments.

The War Damage Commission announced on Jan. 15 that it had paid out £25,000,000 in 1956, compared with £27,250,000 in 1955 and £32,000,000 in 1954. This brought total war damage payments by the Commission to £1,199,000,000 in 4,698,000 separate payments. It was estimated that a further £100,000,000 still remained to be paid out. C. HAITI. — Resignation of President Magloire.

General Paul Magloire (49), President of Haiti since 1950, resigned on Dec. 12, 1956, following widespread disorders and a general strike. He left for exile in Jamaica on Dec. 13, accompanied by his family.

General Magloire, a member of the junta which overthrew President Dumarsais Estime in 1949, was elected to the Presidency in October 1950 for a six-year term beginning on Dec. 6, 1950, and thus normally due to expire on Dec. 6, 1956. His resignation ended a prolonged and complicated dispute over the interpretation of the Constitution adopted in 1950, the question at issue being whether the President's term of office should end in December 1956 or May 1957.

The Constitution of 1950, which made no provision for a second presidential term, was adopted before General Magloire's election to the Presidency. Originally, it stipulated that the President must retire on May 15 of his sixth year of office [which would have been May 15, 1956], but a constitutional amendment was subsequently inserted providing that this date should be extended to May 1957. Supporters of General Magloire therefore maintained that he could legally remain in office until the latter date. On the other hand, political opponents of the President insisted that he should retire on Dec. 6, 1956, on the termination of his six-year term of office, and that the presidential functions should be vested in the President of the Haitian Supreme Court pending new presidential elections, as stipulated in the 1950 Constitution.

Political controversy on this matter rose to a climax during the first week of December, when there were a number of clashes between supporters and opponents of President Magloire, involving bomb-throwing incidents and other acts of violence in which several persons were killed and injured. On Dec. 6 President Magloire announced in a broadcast that he had accepted his opponents' interpretation of the Constitution and was willing to resign immediately and to transfer the presidential powers *ad interim* to the President of the Supreme Court, M. Pierre-Louis. Immediately after the broadcast, however, the Army Chief of Staff (General Levelt) declared in a second broadcast that "terrorists" were creating a "grave situation" throughout the country, and that the Army had asked President Magloire to remain in office until the country was "restored to tranquillity." A censorship was imposed throughout Haiti on the same day.

President Magloire announced on Dec. 8 that the Haitian Ambassador in Washington had been instructed to protest against "intervention by some Americans" [unnamed] in the Haitian political situation, and to notify the U.S. State Department that "Haiti will not tolerate intervention by any Americans in the nation's internal affairs." At the same time he announced that Opposition leaders had been imprisoned for "acts of terrorism" and "conspiracy to overthrow the Government", that he and the Army would remain in control until new presidential elections were held; and that he would determine the date of such elections "as soon as order prevails."

Further outbreaks of violence occurred in Port-au-Prince (the capital) and other centres following President Magloire's retention of power, culminating in a two-day strike on Dec. 10-11 which brought all commercial life in Port-au-Prince to a standstill. The Haitian Government issued a statement on the latter date declaring that the political situation had been "aggravated owing to the entry into the strike of certain foreign bodies, notably American Government organizations working in collaboration with the Haitian Government." The "foreign bodies" referred to were not mentioned by name, but the *New York Times* correspondent in Port-au-Prince said that this was an apparent reference to U.S. missions assisting the Haitian Government in agricultural, health, and similar projects.

Eventually, President Magloire resigned on Dec. 12 because of the general strike and "political complications." Before going into exile in Jamaica he transferred the presidential powers to the President of the Supreme Court, M. Pierre-Louis, who formed a new Cabinet on Dec. 15 which included two Supreme Court judges and the Rector of the University of Haiti (M. Jean Mars), who was appointed Foreign Minister. In addition, General Levelt was replaced as Army Chief of Staff by General Léon Cantave, who issued a proclamation calling upon the Army to "maintain complete discipline and abstain at all costs from mingling in politics."

M. Pierre-Louis, in his capacity as Provisional President, announced on Dec. 28 that presidential elections would be held in April 1957.—(New York Times - Le Monde, Paris)

D. LITERATURE. — Discovery of Alleged Source of Izaak Walton's "Compleat Angler."

Dr. G. E. Bentley, Professor of English Literature at Princeton University, U.S.A., announced on Dec. 16 that "startling similarities" had been discovered between Izaak Walton's *The Compleat Angler*, published in 1653, and *The Arte of Angling*, an anonymous work published in 1577. Professor Bentley pointed out that both works were in the form of a dialogue between "Piscator" and "Viator" (changed to "Venator" in the later editions of Walton's book), and that certain passages of the earlier work were reproduced almost word for word by Walton. The only known copy of *The Arte of Angling* was discovered in London in 1954 by Mr. C. O. von Kienbusch, a graduate of Princeton and a collector of angling literature, who presented it to the university. (New York Times - Times - Manchester Guardian)

A. UNITED KINGDOM - UNITED STATES - CANADA. — Mr. Duncan Sandys' Visits to Washington and Ottawa. - Defence Discussions with U.S. and Canadian Governments. - Extended Anglo-U.S. Co-operation in Weapons Development.

The U.K. and U.S. Ministers of Defence, respectively Mr. Duncan Sandys and Mr. Charles E. Wilson, had discussions on defence matters in Washington on Jan. 28-29, following the invitation extended to Mr. Sandys by Mr. Wilson on Jan. 19 (see page 15337, first column). Scientific advisers and officials of both Governments took part in the discussions at the Pentagon, those on the British side including Sir Richard Powell, Permanent Secretary to the Ministry of Defence, Sir Frederick Brundit, chairman of the Defence Research Policy Committee, and Dr. Robert Cockburn, Controller of Guided Weapons and Electronics at the Ministry of Supply. While in Washington Mr. Sandys also had a meeting with Mr. Dulles, the U.S. Secretary of State.

From Washington Mr. Sandys and his advisers flew to Ottawa for similar talks (Jan. 30-31) with the Canadian Prime Minister (Mr. St. Laurent), the Minister of Defence (Mr. Campney), and the Canadian Chiefs of Staff. Mr. Sandys returned to Washington on Feb. 1 and flew back to London on the following day.

The following communiqué was issued in Washington on Feb. 2 on the discussions between Mr. Sandys and Mr. Wilson:

"The two Ministers reviewed the military aspects of the international situation. They reaffirmed the solidarity of their defence objectives and the importance of NATO and the other regional alliances as a vital means of safeguarding peace and stability in the world.

"They agreed that priority must be given to maintaining effective military capacity in a high state of readiness. This must include conventional forces as well as nuclear power.

"They recognize that financial and economic stability is an essential foundation of military strength and that due account must be taken of this in considering what a country can contribute to the common defence effort.

"The Ministers also reviewed the progress of collaboration between the U.S.A. and Britain in research and development. They noted with satisfaction the mutually beneficial results already achieved by co-operation, and decided to continue and extend their joint work in this field.

"The possible adoption by Britain of certain American weapons was explored, and this matter is being referred to the two Governments for further consideration.

"In addition to his talks with Mr. Wilson and the U.S. defence authorities, Mr. Sandys had a meeting with Mr. Dulles, U.S. Secretary of State, at which the international aspects of the military programme were discussed."

In a press statement at Washington Airport, before leaving for London, Mr. Sandys said that although the joint statement contained "a lot of meat," it should be remembered that "it is about defence, which involves many security matters." He added: "I would say this statement is like an iceberg—there is more below than there is on top to see." In all his talks with the U.S. Government he had been left "in no doubt that they, like us, wish to re-establish fully and at once the special and intimate relationship between our countries which was momentarily interrupted by recent events [i.e. the Middle East crisis.] . . . As Mr. Wilson said to me: 'We talked to one another as members of one family.' That is how we all want it to be."

On arrival at London Airport, Mr. Sandys gave a warning against "some of the rather fantastic speculations that have emerged in one or two of the Sunday papers about the extent of the cuts that are contemplated in defence." He added that "some of these speculations of astronomical cuts in defence belong more to the Geophysical Year than to the realm of reality."

Mr. Sandys made the following statement to the House of Commons on Feb. 6 on his discussions with the U.S. and Canadian Governments:

"The main purpose of my visit was to have a thorough exchange of views with the U.S. defence authorities on a wide range of military matters. Similarly, my two-day visit to Ottawa gave me an opportunity of discussing a number of problems of common concern in the military and international fields with the Prime Minister of Canada, the Minister of Defence, and the Canadian Chiefs of Staff.

"My discussions in Washington with Mr. Wilson showed that there is full accord between our two Governments on the broad objectives of the defence policy to be pursued. In particular, we reaffirmed the importance of NATO and other regional alliances as a vital means of safeguarding peace and stability. We reviewed the arrangements previously made for collaboration between the U.S.A. and Britain in military research and development, with particular reference to guided rockets. It was agreed that both countries had derived considerable benefit from that co-operation, and we decided to extend still further our joint work. We discussed a possible scheme for the adoption by Britain of certain American weapons, and this is now being examined by the two Governments.

"I explained to the U.S. Government that, for economic as well as military reasons, we were reviewing the shape and size of our forces and that H.M. Government had decided that a substantial reduction in the demands of defence upon manpower, materials, and money must be effected. Although no country welcomes a reduction in the military effort of its allies, I found in Washington a sympathetic understanding of the circumstances which make it necessary for us to lighten our defence burden. In this connexion it is fully recognized that financial and economic stability is an essential foundation of military strength and that due account must be taken of this in considering what contribution each nation can reasonably be expected to make to the common defence effort.

"Throughout my meetings with Mr. Wilson and the American defence authorities, as well as in my talks with Mr. Dulles, I found a warm desire, which is fully shared by H.M. Government, to see an immediate resumption of the special and intimate relationship which has so long existed between Britain and the United States and which is so vitally important for the peace of the world."

Mr. Sandys replied as follows to a number of questions by Opposition members:

Mr. Shinwell (Lab.) asked: "What is the nature of any concessions we made to the U.S.A. in return for their offer to co-operate in research and development of guided missiles?" **Mr. Sandys** replied: "No concessions were made. What we discussed was fruitful avenues of co-operation, and I believe we found them."

Mr. Usborne (Lab.) said that many people in Britain would be "extremely unhappy if this country were to become a massive rocket-launching site." **Mr. Sandys** replied: "I think everybody agrees this island must be defended. The only question is whether we are to have effective or ineffective weapons to defend us."

Mr. Fletcher (Lab.) asked if it was correct that America was going to supply Britain with "the fullest information and deliveries of intercontinental ballistic missiles." **Mr. Sandys** replied that "until firm conclusions are reached" it would be premature for him to make a statement in any greater detail.

Mr. Gaitskell (Leader of the Opposition) asked how far Mr. Sandys had discussed with Mr. Wilson or Mr. Dulles the reduction of Britain's commitments in Europe and elsewhere, and "if these matters were to be carried further in any other discussions between our Government and the U.S. Administration."

Mr. Sandys replied that he had naturally taken the opportunity to tell the U.S. Government in general terms the ideas H.M. Government had in mind for the future shape and size of Britain's contribution to NATO. He added: "Advance warning was already given to the North Atlantic Council in December, and I shall have an opportunity of discussing this further with the Supreme Commander [General Norstad], who is coming here . . . There will be the fullest possible consultation with all countries and parties concerned before any final conclusion is announced."

Commenting on the "possible adoption by Britain of certain American weapons," as mentioned in the Sandys-Wilson statement, the London *Daily Telegraph* wrote:

"The weapons in question are presumably guided missiles with nuclear warheads. As American law stands, Britain can be supplied with the missiles but would have to make and fit the warheads herself. If the Governments can agree on a means of enabling the U.S.A. to supply the warheads as well, much duplication of effort would be saved."

The Defence Correspondent of *The Times* wrote that although no details had been given, "it is known that the [Washington] conversations ranged over the whole field of ballistic and guided missiles."—(Times - Daily Telegraph - Manchester Guardian - New York Times - Montreal Star) **(Prev. rep. NATO, 15336 A; U.K. Defence Economy Cuts, 15344 A.)**

B. BRAZIL. — Free Port at Manãos.

A project to establish a free port at Manaus (Manãos), in conformity with plans to develop the Amazon Valley, was approved during January by the Brazilian Congress. Special port privileges will be enjoyed by Peru in agreement with the Brazilian Government. The harbour installations at Manãos, 1,000 miles up the Amazon and regularly used by ocean-going ships, were built during the rubber "boom" at the beginning of the century.—(Brazilian Government Bulletin) **(Prev. rep. 15134 A.)**

C. INDIA. — Mr. Nehru takes over Defence Portfolio.

It was announced in New Delhi on Jan. 30 that President Prasad had accepted the resignation of Dr. Katju as Minister of Defence, and that the portfolio would be taken over by Mr. Nehru. Dr. Katju's resignation followed his election as leader of the Congress Legislature Party in Madhya Pradesh, pending his appointment as Chief Minister of that State in succession to the late Mr. R. S. Shukla, who had died on Dec. 31 1956. (The Statesman, Calcutta) **(Prev. rep. 15228 A.)**

FEBRUARY 9—16, 1957

A. GHANA (GOLD COAST). — Proposed New Constitution on Attainment of Independence within British Commonwealth. - The Ghana Independence Act.

Details of the proposed Constitution of the Gold Coast when it attains independence within the British Commonwealth on March 6, 1957, under the name of Ghana, were given in a White Paper (Cmd. 71) published in London by the Colonial Office on Feb. 8. The Ghana Independence Bill, providing for the independence of the Gold Coast within the Commonwealth from the above-mentioned date, had previously been passed by the U.K. Parliament and was enacted on Feb. 7—the day before the publication of the White Paper.

The White Paper was divided into two sections dealing respectively with (1) the origin and nature of the constitutional proposals, and (2) the proposed new Constitution of Ghana.

Origin and Nature of Constitutional Proposals.

The first section recapitulated the various steps taken over the past three years, beginning with the publication of the Bourne Report (see 14636 A). It was worded as follows:

"In 1954 a new Constitution was introduced in the Gold Coast which granted virtually full internal self-government. Later that year an organized Opposition movement emerged and . . . it became apparent that there was a difference of view about the desirable Constitution for the country on its attainment of independence. Towards the end of September, 1955, Sir Frederick Bourne was appointed independent Constitutional Adviser at the request of the Gold Coast Government. He had talks in all parts of the country and published his recommendations in December, 1955. In February, 1956, the Gold Coast Government convened a round-table conference (known as the Achimota Conference) to discuss the Bourne Report. This conference recommended the adoption of the Bourne Report with minor modifications. The Opposition felt unable to co-operate with Sir Frederick Bourne or to participate in the Achimota Conference.

"In April, 1956, the Gold Coast Government published a White Paper containing their own constitutional proposals for Gold Coast independence: in substance these proposals conformed with the Bourne recommendations as modified by the Achimota Conference. This White Paper was debated in the Gold Coast Legislative Assembly on May 18 and 22, 1956. The Opposition were not present at the debate. On May 11, 1956, the Secretary of State for the Colonies [Mr. Lennox-Boyd] stated in the House of Commons that, because of the failure to resolve the constitutional dispute within the Gold Coast, the aim of early independence of the Gold Coast within the Commonwealth could only be achieved in one way—by giving the peoples of the Gold Coast an opportunity to consider their own constitution and to express their views on it in a general election. The Colonial Secretary undertook on behalf of H.M. Government that if a general election were held in the Gold Coast, H.M. Government would be ready to accept a motion calling for independence within the Commonwealth passed by a reasonable majority in a newly elected legislature, and then to declare a firm date for independence. A general election was accordingly held in the Gold Coast on July 12 and 17, 1956.

"As a result of the general election, the Government party (the Convention People's Party) was returned to power and now holds 72 of the 104 seats in the Legislative Assembly. On Aug. 3 the Assembly passed by 72 votes to none a motion calling for independence within the Commonwealth. The Opposition parties abstained from voting. H.M. Government considered that the outcome of the general election and the vote on the motion fulfilled the conditions of the Colonial Secretary's undertaking of May 11, 1956. Accordingly the Colonial Secretary announced on Sept. 18 that H.M. Government would introduce a Bill to accord independence to the Gold Coast, and that, subject to Parliamentary approval, H.M. Government intended that independence should come about on March 6, 1957.

"In October, 1956, the Gold Coast Government held talks about the constitution with the Parliamentary Opposition and the Territorial Councils. Following these talks the Gold Coast Government published in November, 1956, their Revised Constitutional Proposals for Gold Coast independence in a further White Paper which was debated by the Legislative Assembly on Nov. 12-14 and approved . . . by 70 votes to 25. The Gold Coast Government then requested H.M. Government to enact an Order-in-Council, to come into effect on the date of independence, based on the Revised Constitutional Proposals as approved by the Assembly.

"The existing constitution of the Gold Coast is, according to normal colonial practice, contained in an Order-in-Council. The amendments necessary or desirable on account of independence must similarly be made by Order-in-Council. The Order will have to be made after the Ghana Independence Act has received the Royal Assent but before 'the appointed day,' that is, before independence comes about. The final responsibility for the terms of the Order-in-Council must therefore rest with U.K. Ministers. In drafting the Constitution, the U.K. Government has taken the fullest possible account of the views of the Gold Coast Government. For reasons of convenience it has been decided to enact a consolidated Order which will repeat many of the provisions of the existing Constitution and incorporate the necessary amendments and additions.

"The Colonial Secretary visited the Gold Coast between Jan. 24-30 and held talks with the Government, the Leader of the Opposition and his colleagues, the Asantahene, and other Chiefs and leaders. He has considered most carefully the views put before him, and Part II of this Paper [i.e. the constitutional proposals set forth below] reflects the result of his discussions. Despite many apparent differences of view and some lack of mutual confidence between different parties, he was very conscious throughout his visit of an underlying unity of purpose. All whom he met were united in their earnest desire that Ghana should make a successful start to its independent life. He is confident that the Constitution outlined provides reasonable safeguards against abuse and a fair and workable foundation on which the people of Ghana will be able to build their independent nationhood within the Commonwealth."

The Proposed Constitution.

The Constitution declared: "Ghana is to be an independent State within the Commonwealth, with the Queen as Sovereign and with a Cabinet and Parliamentary system of government of the same general type as is found in the United Kingdom and other independent Commonwealth countries." The detailed constitutional provisions are summarized below:

The Executive.

The executive power would be vested in the Queen, represented by a Governor-General. Except where there was express provision to the contrary, the powers and functions of the Queen and the Governor-General would be exercised "in accordance with the constitutional conventions applicable in the United Kingdom."

The Constitution would provide for a Cabinet of Ministers drawn from Members of Parliament and collectively responsible to Parliament. Ministers would be appointed and might be removed by the Governor-General on the Prime Minister's advice. The Governor-General would terminate the Prime Minister's appointment if the National Assembly passed a motion of no-confidence in his Government; unless, within three days of such a motion, the Prime Minister advised the Governor-General to dissolve the National Assembly.

The Legislature.

The legislative power would be vested in the National Assembly, consisting of a Speaker and 104 Members. Bills passed by the Assembly and assented to by the Governor-General in Her Majesty's name would become Acts of Parliament.

The maximum life of the National Assembly would be increased to five years instead of four years as at present. This provision would also apply to the Legislative Assembly elected in July, 1956, which would continue in being as the National Assembly. The first session would begin in three months after the date of independence, and there would be a session of the Assembly at least once a year.

The qualifications for election as an M.P. would be set out in the Constitution. Changes would be made in the present law to make it conform more nearly to existing practice in the United Kingdom.

The Constitution would provide for universal adult suffrage and secret ballot, as at present. Every citizen of Ghana, without distinction of religion, race, or sex, would be entitled to vote if fulfilling the existing qualifications.

The Constitution would also provide for the continuance of the existing constituencies. There would be machinery to review their number and boundaries from time to time, having regard to changes in population.

The Public Service.

The Constitution would provide for a Public Service Commission which would continue to function "very much as at present." It was hoped that the existing members would consent to remain in office at least until the expiry of their terms in two or three years' time. Thereafter, future appointments would be made by the Governor-General on the advice of the Prime Minister. [The White Paper stated that Dr. Nkrumah had informed Mr. Lennox-Boyd that it was his intention to consult the Leader of the Opposition before making any appointments, and that he hoped his successors would do the same.]

The appointment, promotion, transfer, termination of appointment, dismissal, and disciplinary control of public officers would be vested in the Governor-General acting on the advice of the Public Service Commission, with the exception of a limited class of posts in regard to which the Governor-General would act on the Prime Minister's advice. The posts affected would be those of Permanent Secretary and of a corresponding or higher grade in the Public Service (other than the post of Attorney-General), and special overseas posts.

The new Constitution would continue the provisions of the existing Constitution providing for the payment of compensation to Public Officers appointed before March 31, 1954, who elected to retire from the Public Service.

The Attorney-General.

The post of Attorney-General would continue to be a post in the Public Service "for at least as long as the present holder of this post continues in office." The assignment of responsibility for the Attorney-General's department to a Minister should relate only to Cabinet and Parliamentary business, the Attorney-General himself retaining responsibility for initiating and discontinuing prosecutions.

The White Paper said in this connexion: "The Gold Coast Government . . . while welcoming this arrangement so long as the present Attorney-General remains in office, expressed the view that there are strong arguments in favour of this post thereafter being held

by a Minister, as has been done in other Commonwealth countries. They added, however, that before making any such change they would consult the Opposition and were prepared after independence, in the light of experience gained, to look at the matter afresh. Any such change would require amendment of the Constitution."

The Judiciary.

There would continue to be a Judicial Service Commission as at present. It would be composed of the Chief Justice, the Attorney-General, the senior Puisne Judge (until Justices of Appeal were appointed, when he would be replaced by the senior Justice of Appeal), the Chairman of the Public Service Commission, and a person "who is or shall have been a Judge of the Supreme Court, appointed by the Governor-General acting on the advice of the Prime Minister."

The Chief Justice and (when they exist) Justices of Appeal would be appointed by the Governor-General on the advice of the Prime Minister, and Puisne Judges on the advice of the Judicial Service Commission.

Any Judge would be liable to removal "on an address of Parliament carried by not less than two-thirds of all the members thereof praying for his removal from office on the ground of stated misbehaviour or of infirmity of body or mind."

The age of retirement of Judges would continue to be 62, subject to permission being granted to a Judge by the Governor-General to continue in office for a further period subject to continued mental and physical fitness.

The appointment, promotion, transfer, termination of appointment, dismissal, and disciplinary control of judicial officers (other than Judges) would be vested in the Governor-General, who would be advised by the Judicial Service Commission.

The Chief Justice and other Judges of the Supreme Court, and judicial officers appointed before Independence Day, would continue in office thereafter "and be deemed to have been appointed under the conditions specified in the Independence Constitution."

The White Paper added: "At present there are no Justices of Appeal in the Gold Coast, and appeals from its Supreme Court lie to the West African Court of Appeal. The Gold Coast Government stated in their White Paper of November, 1956, that after independence they proposed to enact legislation providing for a unified judiciary consisting of Magistrates, Judges, and Justices of Appeal with the Chief Justice at the head; and that thereafter they proposed that the West African Court of Appeal should cease to exercise jurisdiction in the Gold Coast. They also affirmed that the powers of the Judicial Committee of the Privy Council to entertain appeals from the Gold Coast will be retained . . . It has now been decided by the Gold Coast Government to set up the Ghana Court of Appeal on the attainment of independence, and appeals to the Privy Council will lie from that Court as soon as it is established."

Public Audit.

The accounts of all Government departments and offices would be audited by the Auditor-General. He would be appointed by the Governor-General on the Prime Minister's advice and would not be removable except on an address of the Assembly, carried by not less than two-thirds of all the members, "praying for his removal on the grounds of stated misbehaviour or of infirmity of body or mind."

The Regions.

Under the new Constitution, Ghana would be divided into the following five Regions: (1) Eastern Region; (2) Western Region; (3) Transvolta-Togoland; (4) Ashanti; (5) the Northern Territories (including the northern section of Togoland), with their present boundaries. These boundaries would not be altered except with the consent of the Region or Regions concerned under the procedure set out below.

If it was desired to alter the boundaries of a Region without increasing the number of Regions, the following procedure would be followed:

"(*a*) If there are fewer than 10,000 registered voters resident in the area affected, the alteration can be made after a vote in favour of it passed by a simple majority in the Regional Assembly of the Region concerned, followed by the passage through the National Assembly by a simple majority of whatever legal measure may be necessary."

"(*b*) If there are more than 10,000 registered voters resident in the area affected, a referendum shall be taken in the Region containing the area. If the majority of the votes cast in the referendum are in favour of the change, the proposal should be put to the Regional Assembly of the Region into which it is proposed to incorporate the area. If that body approves of the proposal by the vote of a simple majority, the necessary legal measures shall be placed before the National Assembly, where their passage shall require a simple majority of those present and voting."

If the alteration proposed would increase the number of Regions, a referendum would be held in the Region or Regions whose boundaries would be affected by the change. If a simple majority of the votes cast in each of these Regions was in favour of the change, the proposal would then be put to the Regional Assemblies or Interim Regional Assemblies [see below] of all the other Regions in the country. If two-thirds of all the Regions agreed to it (i.e. by the referendum in the case of those whose boundaries were affected, and by simple majority vote in the Regional Assemblies of the other Regions), it would then be put to the National Assembly. If it obtained a simple majority in the National Assembly, the change would come into effect.

Regional Assemblies.

"Quite apart from the understandable strength of local patriotism," [the White Paper continued] "there is for administrative reasons an undoubted need for a body at the regional level with effective powers in specified fields. The Constitution will therefore provide for a Regional Assembly to be established by Act of Parliament in each Region; and each Regional Assembly shall have authority, functions, and powers to such an extent as may be prescribed by Act of Parliament relating to: (*a*) Local Government; (*b*) Agriculture, Animal Health, and Forestry; (*c*) Education; (*d*) Communications; (*e*) Medical and Health Services; (*f*) Public Works; (*g*) Town and Country Planning; (*h*) Housing; (*i*) Police; (*j*) Such other matters as the Parliament of Ghana may from time to time determine. The maximum life of a Regional Assembly shall be three years."

A Regional Constitutional Commission would be appointed "as soon as may be, and if possible within three months of independence," to make recommendations as to the composition, authority, functions and powers of the Regional Assemblies, the funds they would require, and the means by which these funds should be provided. They would also make recommendations as to the legislation required to give effect to their proposals.

The Commission would consist of the Chief Justice or a Judge nominated by him, ten representatives of the Regions nominated by the Interim Regional Assemblies [see below], five persons nominated by the Territorial Councils, and not more than six members nominated by the Government. The Commission would hold meetings in each Region and consult with the Territorial Councils, the Interim Regional Assemblies, and such other persons and bodies as they deemed fit. Its report would be presented to the Parliament of Ghana within nine months, "and as soon as may be thereafter a Bill is to be introduced into the National Assembly to give effect to its recommendations."

Pending the establishment of the permanent Regional Assemblies, Interim Regional Assemblies would be formed consisting of the Members of Parliament for each Region. The Speaker would convene the first meeting of each of these bodies, under his chairmanship, to enable them to make their own rules of procedure and elect their first chairmen. Thereafter they would meet in accordance with their own rules.

An Interim Regional Assembly might appoint a Police Relations Committee "with the object of encouraging good relations between the Police Force and the public." Such a Committee should consist of not less than four persons appointed by the Interim Regional Assembly, to whom should be added two members appointed by the Commissioner of Police and, if the Minister responsible for Police so desired, two persons appointed by him.

Houses of Chiefs.

The Constitution would "guarantee the office of Chief in Ghana as existing by customary law and usage," and would provide for a House of Chiefs to be established for each Region by Act of Parliament. There would be a Head of each Region, "who shall for Ashanti be the Asantahene and for the other Regions a person chosen by the House of Chiefs." A House of Chiefs would have power to consider any matter referred to it by a Minister or the Regional Assembly, and might at any time offer advice to any Minister.

The Constitution would contain provision for dealing with appeals from traditional councils in the following matters: (*a*) the nomination, election or installation of any person as Chief, or the claim of any person to be elected or installed as a Chief; (*b*) the deposition or abdication of any Chief; (*c*) the right of any person to take part in the election or installation of any person as a Chief, or in the deposition of any Chief; (*d*) the recovery or delivery of "Stool property" or "Skin property" in connexion with any such election, installation, deposition or abdication; (*e*) political or constitutional relations under customary law between Chiefs.

Appeals from State Councils would be made to the House of Chiefs of the Region in which the issue had arisen, and the House of Chiefs would be obliged within a prescribed period to refer the appeal to an Appeal Commissioner appointed by the Judicial Service Commission. The Appeal Commissioner would transmit his report and findings to the House of Chiefs, which would not have power to depart from the findings of the Appeal Commissioner but might remit the matter back to him for further clarification. The House of Chiefs would be obliged within a prescribed time-limit to transmit the report and findings of the Appeal Commissioner to the appropriate Minister, who would be responsible for publishing the findings.

In the case of matters heard in the first instance by the House of Chiefs for the Ashanti Region, an appeal would lie to an Appeal Commissioner. The latter would forward his report and findings to the Head of the Region [the Asantahene], who would thereupon act in the same way as provided above for a House of Chiefs in relation to Appeal Commissioners and the Minister. Pending the establishment of the Houses of Chiefs, appeals would be direct to the Appeal Commissioner. "Thus in all cases the ultimate decision on appeals will be that of the Appeal Commissioner, sitting with or without assessors."

When any Bill affecting the traditional functions or privileges of a Chief was introduced in the National Assembly, the Speaker would immediately refer it to the House of Chiefs of the Region concerned. No motion would be moved for the second reading of the Bill in the National Assembly until three months after the date of its introduction into the Assembly.

Emergency Powers.

The present Emergency Powers Orders-in-Council, 1939-56, would remain in effect as part of the law of Ghana after independence, but the Constitution would limit their validity to a period of 12 months. This would give the Ghana Government time to prepare and introduce legislation to replace the U.K. Order concerned.

Freedom of Religion. - Ban on Racial Discrimination.

The Constitution would provide that "no law shall deprive any person of his freedom of conscience or of the right freely to profess, practice, or propagate any religion, subject to public order, morality, and health." It would also provide that "no law shall be made discriminating against any racial community."

Restrictions on Compulsory Acquisition of Property.

The provisions of the existing Constitution about the compulsory acquisition of property would be reproduced in the new Constitution. [These forbid compulsory acquisition save under law; require the payment of adequate compensation; give any person claiming such compensation a right of access to the Supreme Court of Ghana for determining his rights (including the amount of compensation); and give any party to proceedings in the Supreme Court relating to such a claim the same rights of appeal as are accorded to parties to civil proceedings in that Court.]

Amendment of the Constitution.

No Bill to amend, repeal, or modify any part of the Constitution could be presented for the Royal Assent unless it had received a two-thirds majority of the whole number of Members of Parliament on its third reading.

Additional processes would be required when a Bill sought to amend, repeal or modify certain basic clauses of the Constitution dealing with subjects set out in the Appendix [see below]. After the Committee stage in the National Assembly, such a Bill would have to be referred to all the Regional Assemblies and to the Houses of Chiefs. In each Region the House of Chiefs might within one month submit its views to the Regional Assembly. The Regional Assembly, after taking account of any views submitted by the House of Chiefs, would within three months express by a simple majority its approval or disapproval of the Bill as it stood. When the Assemblies of two-thirds of the Regions had expressed their approval of the Bill, the third reading could be taken in the National Assembly, where it would require the support of two-thirds of all members of the Assembly to become law.

Any Bill for the abolition or suspension of a Regional Assembly, or for diminishing its functions or powers, would require the consent of the Regional Assembly of the Region concerned. If it was rejected by that Assembly, it could be submitted to a referendum in the Region. If approved by a simple majority vote, this would be regarded as constituting the required approval of the Regional Assembly.

[An Appendix to the White Paper listed the following "basic clauses" in the Constitution which could only be modified by the "additional processes" referred to: (1) the Executive power; (2) the National Assembly; (3) adult suffrage and secret ballot; (4) power of Parliament to make laws; (5) assurances against racial discrimination; (6) freedom of conscience; (7) provisions for constitutional changes; (8) alteration of Regional boundaries; (9) provisions affecting compulsory acquisition of property; (10) Bills affecting Chiefs; (11) the Royal Assent to Bills; (12) the annual meeting and term of office of Parliament, and the requirement for general elections to be held within two months after every dissolution; (13) provisions relating to the Public Service, the Public Service Commission, the Judicature, the Judicial Service Commission, and the appointment and tenure of office of the Auditor-General; (14) the institution and powers of Regional Assemblies; (15) the institutions and functions of Houses of Chiefs.]

White Paper Proposals accepted by Dr. Nkrumah and Professor Busia. - Statement by Mr. Lennox-Boyd.

The White Paper proposals were welcomed in Accra both by Government and by Opposition leaders—by the Government because the constitutional proposals retained the unitary form of government, on which the People's Convention Party had insisted; and by the Opposition because sufficient powers had been given to the Regions and the traditional authorities to counter-balance any undue concentration of power at the centre.

The following statements were made in the Ghana Legislative Assembly on Feb. 12 by Dr. Nkrumah, the Prime Minister, and Professor Busia, Leader of the Opposition:

Dr. Nkrumah: "The leader of the Opposition and I are at one in accepting the White Paper, to our general satisfaction. We consider it, and the Order-in-Council to be based on it, acceptable as a basis for the working of our Independence Constitution. With mutual confidence and co-operation we are certain that the foundation of our independence, which is now being truly laid, will support firmly the superstructure of our political and economic life and lead to the greater happiness and progress of all sections of our nation."

Professor Busia: "It [the White Paper] does not, indeed, provide all that we asked for, but we are prepared to co-operate to make it a successful foundation for the democratic way of life which we all desire to see established and practised in this country. A constitution, however carefully drawn up, cannot by itself secure democracy for the country—for democracy, as a way of life, depends on the will and character of the people. It cannot succeed in an atmosphere of mutual distrust. As the first African colonial territory to achieve independence, we have a special responsibility and a challenge. We in the Opposition are prepared to co-operate to make our experiment a success."

Prior to the publication of the White Paper, Mr. Lennox-Boyd had visited Accra from Jan. 24-30 for discussions with Government and Opposition leaders on the proposed new Constitution. He also had discussions in London on Feb. 6 with two Ministers of the Ghana Government, Mr. Botsio (Minister of State) and Mr. Gbedemah (Minister of Finance), who flew to London for last-minute talks before the White Paper was published. It was understood that one or two drafting alterations were made to the White Paper as a result of the Colonial Secretary's discussions with Mr. Botsio and Mr. Gbedemah.

In a statement to the House of Commons on Feb. 8, Mr. Lennox-Boyd pointed out that the new Constitution would have to be proclaimed by Order-in-Council before the actual date of independence. After recapitulating its principal provisions, he added: "As a result of my discussions in the Gold Coast, and with Mr. Gbedemah and Mr. Botsio, I have every hope that this Constitution will provide a basis upon which Ghana will enter upon its independence with the wholehearted concurrence of all the principal leaders in the country."

The Accra Correspondent of *The Times* commented as follows on the constitutional changes: "The main change from the proposals of the Gold Coast Government put forward before Mr. Lennox-Boyd's visit—and this is one of considerable substance—is in connexion with regional powers and the powers of the Chiefs, and also in connexion with changes in the Constitution itself. These changes not only make it much more difficult to alter the Constitution but give considerably greater powers to the Regions and the Chiefs, not only in connexion with their own affairs but also to prevent alterations of the Constitution . . . With such large powers in regard to the Constitution, the Regions can no longer say that Ghana is to be governed entirely from Accra."

In a subsequent despatch, the Correspondent wrote: "The present compromise is widely felt here [in Accra] to be a great personal success for Mr. Lennox-Boyd, whose stock in this country probably stands higher now than that of any of his predecessors. Britain's stock in this country is equally high, and it seems that the breaking of the colonial bond will be achieved with great goodwill remaining here for Britain."

The Ghana Independence Act.

As stated above, the Ghana Independence Bill had received the Royal Assent on Feb. 7, after an unopposed second reading in the House of Commons on Dec. 11, 1956, and in the House of Lords on Jan. 24, 1957. The Bill was a short measure comprising five clauses and two schedules.

Clause 1 conferred Statute of Westminster powers on the Gold Coast territories which, after March 6, 1957, would form "part of Her Majesty's dominions under the name of Ghana." It was laid down that these proposals would not apply to Togoland until an Order-in-Council was issued for that purpose—this provision being necessary because the U.N. General Assembly would have to approve the projected change in Togoland's status (i.e. union with the Gold Coast) as recommended by the U.N. Trusteeship Council following the referendum in the territory.

Clause 2 provided that all citizens of Ghana—under any future citizenship law to be passed by the Ghana Parliament—would automatically be British subjects and Commonwealth citizens. It also provided that "British-protected persons" in the Northern Territories and Togoland would continue to have that status until Ghana citizenship was conferred on them by legislation of the Ghana Parliament.

Clause 3 laid down that Ghana would cease to be eligible for assistance under the Colonial Development and Welfare Acts as from the "appointed day" (i.e. March 6, 1957). This, however, would be "without prejudice to the continuance of any operations commenced by the Colonial Development Corporation in any part of Ghana before the appointed day."

The second reading was moved in the House of Commons by Lord John Hope, then Under-Secretary for Commonwealth Relations.

Lord John Hope said: "The result of the passage of this Bill will mean that we shall hail the first of the British dependent territories in tropical Africa to attain full self-government as a sovereign and independent nation . . . The grant of independence is an act of goodwill. The Government trusts that it will be received by the people of the Gold Coast in a spirit of responsibility which will command the respect of the whole world."

After an historical survey of the territory's advance to independence, Lord John pointed out that the Bill did not deal with details of the Constitution, its main purpose being to confer on Ghana the basic powers necessary to give it the status of an independent country within the Commonwealth. It also made necessary amendments in the law of the United Kingdom and of Ghana.

Announcing the Government's rejection of requests for separate independence for Ashanti and the Northern Territories [see below], Lord John declared: "The Bill is evidence of the Government's intention to proceed with the granting of independence to the country as a whole. Partition would not be in the interests of the whole country or of its component parts, which, during the past half-century, have grown steadily and strongly into a single nation. The different parts of the country are inter-dependent both politically and economically. The north and the south are complementary to one another. To sever would be to cripple. Partition at this stage would not only inhibit further development and progress; it would mean a serious falling-back in the standard of living."

In conclusion, Lord John explained that the name Ghana had been conferred on the new State to meet local wishes; it was the name borne by an ancient African kingdom, in what was now French territory south of the Sahara, which had once attained great importance in the territories now forming the Gold Coast. The date chosen for independence—March 6, 1957—was of local historic significance since it was the anniversary of the signing of the bond of 1844, from which British jurisdiction over the Gold Coast had derived.

The Bill was warmly welcomed by **Mr. James Griffiths,** Deputy Leader of the Opposition, and **Mr. Clement Davies,** leader of the Parliamentary Liberal Party. A number of Members, however, both Conservative and Labour, expressed various doubts and reservations. **Mr. Pannell** (C.) feared that a sudden exodus of British officials after independence might lead to a breakdown of law and order in the Gold Coast; **Mr. Mason** (Lab.) doubted whether the Gold Coast was ready for self-government; **Mr. John Hall** (C.) referred to allegations of corruption and nepotism in the Gold Coast, and feared that the Ashanti demands for independence might lead to bloodshed after March 1957; and the **Rev. R. W. Sorensen** (Lab.) said that the eradication of corruption and nepotism should be one of the first steps toward independence in Ghana.

Mr. Creech Jones (Lab.), a former Colonial Secretary, moved the deletion of Clause 3 of the Bill, on the ground that the withdrawal of Colonial Development and Welfare funds would seriously affect Ghana's economy. Mr. Jones's amendment was rejected by 185 votes to 135 after **Mr. Lennox-Boyd** had pointed out that the Colonial Development and Welfare Acts specifically laid down that assistance should be provided only for non-self-governing territories, and not for territories for which the Colonial Secretary was no longer responsible. He emphasized, however, that the clause did not mean that Britain intended to "wash her hands economically" of Ghana, or to dissociate herself from its future economic development. On the contrary, he was in touch with the Gold Coast Government about economic aid, and was ready at all times to discuss this matter personally. It might still be necessary to make funds available to Ghana under the Colonial Development and Welfare Acts, but only for schemes begun before independence.

The second reading was moved in the House of Lords by the Earl of Perth, Minister of State at the Colonial Office.

Lord Milverton (a former Governor of Nigeria) said that Parliament should bear in mind that they were handing the Gold Coast over to "a few able men at the top—a *corps d'élite*—with little effective challenge from a responsible public opinion." The economy of the Gold Coast was fragile, with "a dangerous dependence on cocoa," and power was being placed "into the eager, inexperienced hands of an anxious, ambitious group after only six years' apprenticeship in the art of government." Failure would not only be a tragedy for the 5,000,000 citizens of Ghana but a setback for the hopes of other African territories advancing toward self-government. He particularly deplored Clause 3 of the Bill, and believed that the Colonial Development Corporation (under another name, if necessary) should be free to assist Ghana if the latter so desired.

The deletion of Clause 3 was moved by **Lord Ogmore** (a Labour peer), who maintained that it laid down a principle which would adversely affect all dependent territories advancing toward self-government. He compared the Government's attitude toward the Gold Coast with that of a Victorian father saying to his son: "Well, my boy, here's £50 and a gold watch—just take yourself off and make your own way in the world." The removal of the clause was also urged by **Lord Swinton** (a former Conservative Colonial Secretary and Commonwealth Relations Secretary), **Lord Attlee** (the former Labour Prime Minister), and other peers on both sides of the House. Lord Ogmore's amendment was, however, rejected by 53 votes to 25.

Lord Hemingford (a former Rector of Achimota College, in the Gold Coast) pointed out during the debate that the name "Ghana" was the original and more correct form of the familiar word "guinea." Describing how he had "caught out" the *Oxford English Dictionary*, Lord Hemingford said: "It was from Ghana in West Africa that our forbears misnamed the coast 'the Guinea Coast.' I have been sorry to read in the *Oxford English Dictionary* that the origin of the word 'guinea' is unknown. I hope in the next edition they will correct the entry. The sovereigns minted first in the reign of Charles II from Ghana were found to be more valuable than other sovereigns, so their value had to be fixed at 21s. instead of 20s. May we hope that this will prove a happy augury."

Lord Home (Secretary for Commonwealth Relations), replying to the debate, reaffirmed the Government's principle that the independence of a Colony, when achieved, must be absolute, and that the country must "establish credit-worthiness by its own right." H.M. Government, however, were consulting the other Commonwealth countries on the problems of financing developments in the Commonwealth, and the U.K.'s role in the development of newly independent countries would be reviewed in the light of the replies received.

Political Developments before Publication of White Paper. - Ashanti Demands for Independence. - Mr. Lennox-Boyd's Visit to the Gold Coast.

Following Mr. Lennox-Boyd's announcement of Sept. 18, 1956 (see 15121 C) that the Gold Coast would achieve independence on March 6, 1957, under the name of Ghana, an all-party conference opened in Accra on Oct. 16 to discuss the Gold Coast Government's draft proposals for a constitution. Despite certain concessions by each side, however, no agreement was reached, and after abortive discussions extending over several weeks the two main Opposition parties - the National Liberation Movement (N.L.M.) and the Northern People's Party (N.P.P.)— sent a joint resolution to Mr. Lennox-Boyd on Nov. 20 demanding "separate independence for Ashanti and the Northern Territories, and a partition commission to divide the assets and liabilities of the Gold Coast among its four component territories." On Nov. 27 the N.L.M. issued a 10-point plan (also forwarded to Mr. Lennox-Boyd) calling for the establishment of Ashanti (or a union of Ashanti and the Northern Territories) as an independent State within the British Commonwealth.

The all-party conference in Accra consisted of eight representatives from the Government side (including seven Ministers) and eight Opposition representatives (four from the Northern Territories, three from Ashanti, and one from Gold Coast Colony) led by Professor Busia. Fundamentally, the discussions broke down because the Government insisted on a unitary constitution and the Opposition on a Federal constitution. On Nov. 7 the Gold Coast Government published a White Paper setting out its own constitutional proposals, and the points of disagreement between the Government and the Opposition. The constitutional proposals of the Gold Coast Government [referred to in the White Paper published in London] were subsequently approved by the Legislative Assembly in Accra, in which the Government has a large majority.

The 10-point plan for the creation of an independent Ashanti State, referred to above, contained the following proposals:

(1) Ashanti and the Northern Territories should unite on a basis of equality.

(2) A constitution should be drawn up for Ashanti, or for a union of Ashanti and the Northern Territories, establishing the new State as a member of the British Commonwealth, with H.M. the Queen as Head of the State.

(3) A Governor-General should be appointed by the Queen.

(4) Civil servants, both African and European, should suffer no adverse changes in their terms and conditions of service and emoluments.

(5) Pending the final withdrawal of British control, interim governments should be established in Ashanti and the Northern Territories before March 6, 1957.

(6) The interim Legislature of Ashanti should consist of members of the present Assembly [in Accra] representing Ashanti constituencies.

(7) An interim Finance Board should be created to control the national revenues and finances of Ashanti, or a Union of Ashanti and the Northern Territories.

(8) The interim Government should establish certain interim statutory boards on which interests concerned should be adequately represented.

(9) Foreign investment should be encouraged.

(10) The Colonial Secretary should appoint a Partition Commission to divide the assets and liabilities of the Gold Coast among its component territories.

A Colonial Office statement, issued in Accra on Dec. 10, said that "H.M. Government does not consider that partition of the Gold Coast is in the interests of the Gold Coast as a whole or of any of its component parts, and cannot abandon its established policy."

The Opposition's objections to the constitutional proposals formulated by the Gold Coast Government were set forth by Professor Busia at a press conference in London on Dec. 10, 1956.

After emphasizing that the proposed State of Ghana was not a single entity either geographically, historically, or politically, but consisted of four separate territories with their own problems and traditions, Professor Busia said that a "serious situation" had arisen because of "the failure of the Gold Coast Government to produce a draft constitution embodying those checks, balances, and safeguards essential to the preservation of individual liberty and the rights of minorities and regions in a nascent State." The Regions should be permitted to take an effective part in their own Government, and Ashanti—where the secessionist movement was particularly strong—should be allowed to keep together as a nation and to retain its own institutions. It was therefore essential to reach agreement on a united, independent Gold Coast before Independence Day, but in the existing situation such agreement was not present. The Opposition in the Gold Coast believed that the Constitution should contain effective safeguards for the Regions and minorities, but Britain was apparently prepared to hand over power without ensuring "that some of the most cherished and precious things she has taught us should be preserved."

Professor Busia suggested (1) that the Ghana Independence Bill, then before the U.K. Parliament, should be amended to provide the safeguards sought; or (2) that talks should be held in which "the British would bring to the service of the Gold Coast their long experience and statesmanship in helping to settle the Constitution." Though he believed it would be possible to reach agreement before Independence Day, there were "grim possibilities" in ignoring the strength of feeling that had already been manifested by the people of Ashanti.

Mr. Lennox-Boyd, who had been on a prolonged tour of the Rhodesia and Nyasaland Federation (see 15324 A), arrived in the Gold Coast on Jan. 26 for a week's visit. During this period he had meetings with Ashanti leaders in Kumasi (the Ashanti capital), with political leaders in the Northern Territories, and with Government and Opposition leaders in Accra.

During his visit to Kumasi (Jan. 26-27) the Colonial Secretary met the Asantahene (Otumfuo Sir Agyeman Prempeh, head of the Ashanti nation) and the Asanteman Council, the highest traditional authority in the region. The Asantahene told Mr. Lennox-Boyd that his people were "not in a happy mood" about the impending withdrawal of Britain from the Gold Coast, and stressed that Ashanti wished to preserve her traditions and institutions against "the dictatorial attitude of the present Gold Coast Government."

The Asanteman Council handed Mr. Lennox-Boyd a 2,000-word memorandum declaring that the constitutional dispute in the Gold Coast was not one between "traditionalism and modern democracy" but "a struggle to provide checks against the concentration of power at the centre, which the experience of the past six years has proved to be highly dangerous and inimical to the liberties of individuals and minorities in the Regions . . ." The memorandum also asked that the Asantahene should be recognized as the head of the Ashanti nation; that the Regional House of Chiefs should have sole responsibility for local constitutional and traditional matters; that a Regional Assembly and a Regional House of Chiefs should be created in Ashanti; and that Ashanti's boundaries should be regarded as inviolate.

In reply to these representations, Mr. Lennox-Boyd said that he would do his best "to smooth out the constitutional differences," and expressed confidence that he would be able to "remove many of your fears." Though his suggestions might "not altogether satisfy everybody in their entirety," he hoped the Ashanti people would be able "to join with an easy mind in the celebrations of the independence of Ghana." He emphasized that Britain recognized the deep attachment of the Ashanti people to their traditions and institutions.

In a broadcast from Accra on Jan. 30, Mr. Lennox-Boyd said that nearly all the acute differences in the Gold Coast could be traced to lack of mutual confidence between the Government and the Opposition, which had prevented them from reaching agreement on the constitutional question. He added: "Now confidence is not something I can pull out of my brief-case and give you as a present. It is something organic—a frail plant which needs the good earth of mutual respect and the constant fertilizer of good will. I think I have been able to give both Government and Opposition some gardening hints during my visit."

On his return to London (Feb. 2) the Colonial Secretary expressed confidence that Ghana would have a tranquil and prosperous future after her attainment of independence. "For some time," he said, "there have been very considerable differences, but I hope my visit has been able to ease the tension. I found far more unity—an underlying unity—than I expected, and I believe this will prevail over other differences."

It was announced in London and Accra on Feb. 13 that the Queen, on the advice of Dr. Nkrumah, had appointed the Governor of the Gold Coast (Sir Charles Arden-Clarke) as the first Governor-General of Ghana when it attained independence. Sir Charles stated that he would be "very happy to hold the appointment for a short period, when I would wish to be permitted to retire and to hand over to my successor."

The Colonial Correspondent of *The Times* wrote: "The appointment of Sir Charles Arden-Clarke as Governor-General of Ghana is, of course, an interim measure. Sir Charles became Governor of the Gold Coast in 1949, and has been mainly instrumental in guiding it toward independence. At the same time, it has always been recognized that it would be desirable for Ghana, once it became an independent country of the Commonwealth, to have a Governor-General appointed from the U.K. in the ordinary way. It is generally considered that it would be more in keeping with Ghana's new status if someone other than a member of the Colonial Service were to be appointed."

It had previously been announced on Dec. 13, 1956, that Mr. I. M. R. Maclennan, an Assistant Under-Secretary of State at the Commonwealth Relations Office, would become the first U.K. High Commissioner in Ghana as from March 6, 1957. Mr. Maclennan, U.K. High Commissioner in Southern Rhodesia from 1951-53, was the first U.K. High Commissioner to the Rhodesia and Nyasaland Federation, a post he held from 1953 until his return to the Commonwealth Relations Office in 1955.—(White Paper, Cmd. 71 - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Gold Coast, 15121 C.)**

A. BULGARIA. — Cabinet Changes. - Reorganization of Ministries. - Reintroduction of Bread Rationing. - Posthumous Rehabilitation of Traicho Kostov.

A reorganization of the Bulgarian Government, recommended by the Central Committee of the Bulgarian Communist Party on Jan. 17, was approved by the National Assembly on Feb. 3. It involved the fusion of a number of Ministries, as follows:

(1) The Ministry of Transport and the Ministry of Posts, Telegraphs, and Telephones were merged into a single Ministry of Transport and Communications under General Ivan Mihailov, a Deputy Premier.

(2) A Ministry of Construction and Building Materials replaced the separate Ministries of Building Materials and of Construction. The new Ministry was headed by M. Vladenko Vidinsky.

(3) The Ministry of Culture and the Ministry of People's Education were combined in a single Ministry of Education and Culture headed by M. Chervenkov, the former Prime Minister, and now a Deputy Premier.

(4) The Ministry of Finance and the State Control Commission were merged into a unified Ministry of Finance and State Control headed by M. Kyril Lazarov, the former Finance Minister.

(5) The former Ministries of Home Trade and Foreign Trade were combined into a single Ministry of Trade under M. Raiko Damyanov, a Deputy Premier.

(6) A new Ministry of Agriculture and Forests replaced the former Ministry of Agriculture and the Forestry Administration.

(7) The Ministry of Municipal Economy and Highways took over the functions of a number of former administrative bodies in this sphere, while local industries became the concern of the Ministry of Light Industry.

(8) The administration of social security services was transferred from the Central Council of Trade Unions to the Ministry of Health and Social Services.

(9) The number of Deputy Premiers was reduced from six to five—the Foreign Minister, M. Lukanov, losing his deputy premiership.

(10) The following former Ministers were relieved of their functions: M. Zhivkov (Foreign Trade); M. Pelovski (Internal Trade); M. Avramov Levi (Culture); M. Yanev (Education); M. Dimitrov (Transport); Mme. Dragoicheva (Posts, Telegraphs, and Telephones); and M. Ditchev (State Control Commission).

The following governmental changes had been approved by the National Assembly on Dec. 30, 1956:

(*a*) M. Russi Hristozov (previously Minister of Supplies) was appointed chairman of the State Planning Commission *vice* M. Georgi Chankov, a First Deputy Premier;

(*b*) M. Atanas Dimitrov, previously Minister of Food and Light Industry, became head of a newly-established Ministry of the Food Industry;

(*c*) Mme. Stanka Tsekova, previously Deputy Minister of Food and Light Industry, was appointed Minister of Light Industry.

Other developments in Bulgaria in recent months are summarized below:

Bread Rationing. - Soviet Wheat Aid. It was announced on Oct. 15, 1956, that rationing of certain kinds of bread had been reintroduced in Bulgaria owing to the shortage of wheat. In negotiations with the Soviet Union, however, which concluded on Jan. 12, 1957, agreement was reached on Soviet economic aid to Bulgaria through wheat deliveries on credit, to be redeemed over a three-year period beginning with the 1957 harvest.

Reduction of Compulsory Farm Product Deliveries. As from Jan. 1, 1957, the system of obligatory quota deliveries by farmers to the Government was abolished for grapes, apples, plums, potatoes, oats, hay, and milk, being replaced by a purchasing system through separate contracts with producers. Under the same decree, quota deliveries of wool were halved in respect of sheep used for breeding and those privately owned by co-operative farmers.

Agricultural Collectives. It was reported during January that 79 per cent of the cultivated area of Bulgaria was in the hands of co-operative and State farms, the remaining 21 per cent—cultivated by private farmers—being predominantly mountainous and hilly country.

Farmers' Pensions. A scheme under which co-operative farmers will receive small pensions at the ages of 60 (men) and 55 (women) came into force on Jan. 1, 1957. The pensions vary from 60 to 150 levas a month, and benefit over 400,000 co-operative farmers.

Working Hours. A joint announcement by the Bulgarian Government and the Central Committee of the Communist Party, issued on April 26, 1956, stated that, in conformity with similar measures adopted in the Soviet Union, working hours on Saturdays and on the eve of public holidays would be reduced to six hours, and that Sunday would be a day of rest for practically all workers.

Abolition of Special Courts for Workers' Offences. The National Assembly passed legislation on Nov. 1, 1956, abolishing the existing courts for transport workers and the courts-martial procedure for employees of the Ministry of the Interior.

Sofia Radio announced on Sept. 18 that the Central Committee of the Communist Party had "formally rehabilitated" M. Traicho Kostov, the former Deputy Premier and party secretary, who had been executed in 1949 for alleged treason and "Titoism."—(Bulgarian Legation Press Office, London) **(Prev. rep. Cabinet, 15058 A; M. Kostov, 14817 A.)**

A. SOVIET UNION.—M. Shepilov's "Six Principles" for Peace in Middle East. - Speech to Supreme Soviet. - Denunciation of "Eisenhower Doctrine." - Marshal Bulganin's Letter to Dr. Adenauer on Co-operation between U.S.S.R. and Western Germany. - Soviet Demands for British, French, and Israeli "Compensation" to Egypt. - Mr. Ben-Gurion's Rejoinder.

The Soviet Foreign Minister (M. Shepilov), in a speech to the Supreme Soviet in Moscow on Feb. 12, proposed that the Soviet, U.S., British, and French Governments should join in a four-Power declaration, based on six principles, with the aim of keeping the peace in the Middle East. The Soviet proposals were presented on the same day to the U.S., British, and French Ambassadors, the "six principles" mentioned therein being as follows:

(1) Settlement of outstanding issues solely through peaceful negotiations.

(2) Non-intervention in the domestic affairs of the Middle East countries, and respect for their sovereignty and independence.

(3) Dropping of all attempts to involve the Middle East in Great-Power military blocs.

(4) Abolition of foreign bases and withdrawal of foreign troops from the Middle East countries

(5) Mutual agreement not to deliver arms to those countries.

(6) Economic assistance to the Middle East countries without political, military, or other terms incompatible with their sovereignty.

M. Shepilov's speech to the Supreme Soviet is summarized below under cross-headings:

Attack on "Western Imperialism." After claiming that the U.S.S.R. had made "strenuous efforts" to break the disarmament deadlock, and citing *inter alia* the reductions in the Soviet armed forces and the relinquishment of the Soviet bases at Porkkala and Port Arthur, M. Shepilov said that "ill-starred strategists" in the West had hoped for a new "evolution" in the U.S.S.R. after the 20th Party Congress. The criticisms of "mistakes and shortcomings in various spheres of party life and government construction" had given rise to "wishful thinking" in the West and to unfounded hopes that the U.S.S.R. would "become 'pink,' if not actually 'white.'" When, however, the "imperialists" had realized that "the might of the Socialist countries was steadily increasing and the moral and political unity of their peoples growing," they had again resorted to "the poisoned weapon of anti-popular conspiracies and war gambles." The "aggression of Britain, France and Israel against Egypt" and the "counter-revolutionary *putsch* in Hungary" were all "part and parcel of the same broadly conceived strategic plan," the sponsors of which had hoped to change the international situation in their favour.

M. Shepilov went on to denounce the Atlantic Pact and the remilitarization of Western Germany; to emphasize that it was "the sacred duty of all Socialist states to strengthen the Warsaw Treaty Organization as long as the imperialist bloc exists"; and to denounce "the ideas of so-called national Communism, which have gained currency of late." He recalled that Government representatives of the U.S.S.R., Bulgaria, Czechoslovakia, Hungary, and Rumania, at their recent meeting in Budapest [see 15379 B], had declared their full resolve "to foil the attempts of the aggressive forces to aggravate the international situation still further and to intensify the arms race and war psychosis."

The Middle East. - Denunciation of "Eisenhower Doctrine." "The past year," M. Shepilov continued, "has demonstrated the growing changes in the correlation of forces within the capitalist camp. The domination of the United States increases; the international positions of Britain and France are weakening considerably; the role of Western Germany increases substantially; Japan is gathering strength . . . The strengthening of America's domination in the capitalist world and the weakening of the international positions of Britain and France are two sides of the same medal . . . The struggle between the U.S.A. and Britain reached its peak in the Middle East. In the post-war years the U.S.A. squeezed Britain out of her key oil positions in the area. In 1937 the U.S.A. accounted for only 13 per cent of oil produced in the Middle East, and Britain for over 80 per cent. In 1956 the U.S.A. controlled almost 60 per cent of Middle East oil production, and Britain about one-third.

"The Middle East has become an area of struggle between two old but weakened colonial empires, Britain and France, and a new, more powerful American empire . . . As a result of the collapse of the Anglo-Franco-Israeli aggression against Egypt, America's supremacy over its rivals has further increased. Relying on this new correlation of forces, the U.S.A. has set itself the task of completely ousting Britain and France from the Middle East. This is borne out by the so-called 'Eisenhower doctrine,' whereby the U.S.A. intends to cover the area with a network of atomic bases and, at the first opportunity, to launch from the area a war of aggression. The 'Eisenhower doctrine' may be called a 'doctrine of closed doors in the Middle East in the interests of the United States.' . . .

"The advocates of the 'Eisenhower doctrine' contend that it helps to put into effect the U.N. principles of respect for national sovereignty and independence and the right of peoples to self-determination . . . In fact, it is a most flagrant violation of U.N. principles. Its implementation would be tantamount to the liquidation of the United Nations, because the U.S.A. would seize unlimited dictatorial powers in that part of the world and would in effect deprive a number of U.N. member-States of their independence. U.S. policymakers seek to justify their predatory aspirations by alleging that a 'vacuum' has appeared in the Middle East. The 'vacuum' doctrine is produced every time the American rulers intend to ensconce themselves in some part of the world . . ."

After announcing the six-point proposals for the Middle East conveyed to the U.S., British and French Governments, as mentioned above, M. Shepilov declared, with reference to the present position in the Middle East: "The most urgent question is the complete withdrawal of Israel's forces from Egyptian territory. The responsibility for the consequences which may be entailed by further occupation of part of Egyptian territory rests with Israel and her overlords . . ."

Relations with Foreign Countries. As regards the Soviet Union's relations with foreign countries, M. Shepilov said that the U.S.S.R. would consider "with all good will" any initiative which would help to improve relations with the U.S.A., Britain, and France; that she was ready to meet Western Germany "half-way" if the German Federal Republic showed a "sincere desire for co-operation"; and that the U.S.S.R. would develop friendly relations with Austria and support Austrian neutrality and independence. M. Shepilov also welcomed the "growing understanding and co-operation" with India; said that the re-establishment of diplomatic relations with Japan had contributed to the normalization of international relations; and spoke of the "invariably good" relations with Afghanistan and of "opportunities for further development" of Soviet-Persian relations. There had been for a long time a need "to clear away all the accumulated lumber" from Soviet-Turkish relations, and "as soon as this is appreciated by Turkey's ruling circles, the faster Soviet-Turkish relations will take a turn for the better."

As regards relations with Yugoslavia, M. Shepilov said: "We shall continue to take all necessary steps to make Soviet-Yugoslav relations develop successfully on the basis of friendship and equality. At present, however, this chiefly depends on the leaders of the Yugoslav Republic, inasmuch as within Yugoslavia there are still manifestations of ill-will and even open attacks by certain elements against the U.S.S.R. and some of the people's democracies."

M. Shepilov also spoke of the Soviet Union's close co-operation and friendship with Finland, and of its desire to maintain friendly relations with the Scandinavian countries and Iceland.

Call for World Economic Conference. The Soviet Foreign Minister called for a World Economic Conference to discuss:

"(1) The further development of international trade and the establishment of an international trade organization within the framework of the United Nations.

(2) International economic co-operation to promote the creation of independent national economies in under-developed countries, and also certain financial questions."

Disarmament. In conclusion, M. Shepilov appealed for general disarmament and "the destruction and prohibition for all time of the latest devastating weapons of war."

No official statement on M. Shepilov's Middle East proposals was issued in Washington, London, or Paris. A spokesman of the U.S. State Department, however, said that they were "obviously . . . a move to try to discredit or stop the Eisenhower plan" for the area.

Marshal Bulganin's Letter to Dr. Adenauer.

The text of a personal letter sent by Marshal Bulganin to Dr. Adenauer was published in Bonn on Feb. 10. In this letter the Soviet Prime Minister said that the Soviet Government were "not satisfied" with the development of relations between the U.S.S.R. and Western Germany since Dr. Adenauer's visit to Moscow in 1955, and proposed that the two countries should improve their relations and sign trade, cultural, and consular agreements. In the course of his letter, the text of which is given below, Marshal Bulganin attacked Western Germany's participation in the Atlantic Pact and declared that a solution of the problem of German reunification could be effected only on an "all-German basis" in co-operation between "the two German States."

"More than a year has passed," wrote Marshal Bulganin, "since extensive and frank negotiations took place in Moscow between the Soviet Union and the German Federal Republic, as a result of which diplomatic relations were established between our two countries . . . I would like to tell you, with the same frankness which marked our talks in Moscow, that my colleagues and I are not satisfied with the course which relations between our two countries have taken since then . . . I will also not conceal that we watch with anxiety how, in the German Federal Republic, a strengthening is taking place of those forces which, with support from abroad, are preventing better relations between our countries, and which desire to impel the Federal Republic on to the dangerous path of military adventures.

"You may point out to me, as did the German delegation during the Moscow negotiations, that in Western Germany there are neither the forces nor the politicians who want an aggressive war. We see, however, the role which is contemplated for the German Federal Republic and its armed forces by the organizers of the North Atlantic Pact. They wish to use the Federal Republic for an aggressive war against the interests of the German people. . . . .

" Also we cannot share the view of certain circles in Western Germany that the formation of strong fighting forces and their equipment with atomic weapons strengthens the international position of the Federal Republic. In our view the opposite is the case. Every fresh milliard spent on armaments, every new division raised, will only complicate the international situation of the Federal Republic and increase the mistrust and fears which other States, particularly Western Germany's neighbours, feel toward her. As a result of all this, the solution of the question which the entire German people regards as its greatest national concern—namely, the re-establishment of the unity of Germany as a democratic State—becomes ever more remote.

" If I write this to you in all frankness, it is not because our country fears the newly-established army in the Federal Republic, but because we are activated by a feeling of anxiety and responsibility for the fate of the peace of Europe. When you told us in Moscow that the German people shudder at the thought of war with its horrible consequences, and that peace seemed the supreme good, we understood this, because we know very well what suffering and sacrifices the German people endured during the two World Wars. The German people also know what infinite suffering and sacrifices the Soviet people had to endure during the First, and particularly during the Second World War . . . It would be a crime to forget the lesson of history. That is why we are convinced of the necessity for a close and friendly relationship and peaceful co-operation between the Soviet and the German peoples, in order that history shall not repeat itself and that peace in Europe shall be assured.

" Whether there will be war or peace in Europe depends in the first place on the relations between our peoples. Our two Governments must, therefore, have a sense of responsibility for the fate of their peoples, as well as for the fate of peace in Europe. This is surely of decisive importance for the maintenance of peace in the whole world . . .

" We are aware of the fact that there are forces which, with all the means at their disposal, are preventing the normalization of relations between the Soviet Union and the German Federal Republic. For the sake of their narrow and selfish interests, these forces are trying to incite a policy which would lead to a military conflict with the Soviet Union and other Socialist countries. This may be seen very clearly from the constant demands addressed to the Federal Republic for a speedy establishment of strong armed forces, and for increased expenditure on rearmament and the maintenance of foreign troops . . . In addition, the use of West German territory as a concentration area for an atomic war is being prepared quite openly.

" The attempt is being made to cover all this by pointing to the alleged aggression of the Soviet Union. This, however, is only an excuse. The Federal Republic is being forced along a path of aggression—a very disastrous path for her—which has nothing in common with the true national interests of the German people . . . Those who are forcing the Federal Republic along a path leading to war do not care in the least about the fate of the Federal Republic and the interests of the German people. They are calculating on distracting atomic reprisal from themselves and drawing attention to the Federal Republic, in the hope that they will succeed in making others pull their chestnuts out of the fire. By exploiting the advantages of their geographical situation, they hope to remain unpunished in the remote corners of the globe until all is over. They forget, however, that in our time of highly developed techniques such remote corners no longer exist . . .

" The policy of the Soviet Government is based on peace and co-operation with all States . . . We are convinced that all international problems can be settled peacefully through negotiations between the interested countries. The Soviet Union adheres inviolably to these principles in its relations with the Federal Republic and other countries. We are convinced that Germany's greatness, and the full unfolding of the creative genius of the German people, can be achieved only in peaceful development.

" To a large degree there are sufficient prerequisites for an extensive development of mutually advantageous economic relations between the Soviet Union and the Federal Republic. The Federal Republic has an industry developed in all fields, and may count on big and favourable orders from the Soviet Union. On the other hand, the Soviet Union can sell goods to the Federal Republic in which West German industry and agriculture are interested. We raise the question of trade relations with the Federal Republic because the Soviet Union believes that they provide a solid basis for the improvement of political relations between States . . .

" The strengthening of trust and of friendly co-operation between our countries would without doubt facilitate the unification of Germany, which the German people regards as its most urgent national task . . . We sympathize with these justified desires, and are ready as always to support the German people in solving this all-German task. The reunification of Germany will not, however, be brought nearer if people ignore the fact of the existence of two German States. A solution of the German problem can be found only through a *rapprochement* between the German Democratic Republic and the German Federal Republic. It is equally clear that the remilitarization of Western Germany, the limitation of the democratic rights of its peoples, and the continuation of an unfriendly policy toward neighbouring peace-loving countries, are not serving the reunification of Germany.

" Before the day of reunification comes nearer, many difficulties will have to be overcome. All interested States will have to unite their efforts. The sooner this happens, the better. The Soviet Government, for its part, is ready to lend its support to the Governments of both German States in solving the problem of reunification. An improvement in relations between our countries will be very useful in this respect . . .

" We are of the opinion that the time has come for the Governments of both our countries to undertake definite steps for an improvement of relations between the Soviet Union and the German Federal Republic, in conformity with the agreed decisions taken during the Moscow talks in 1955, and on the basis of the modest but nevertheless useful experiences of mutual relations in various fields since then.

" In particular, the following urgent questions should be discussed : (1) a substantial increase in trade between both countries, and the conclusion of a trade treaty : (2) the conclusion of an agreement for cultural and scientific co-operation : (3) a consular agreement which would lay down the rights of both sides in the protection of the interests of their nationals, thus facilitating the solution of questions concerning the repatriation of nationals of both countries.

" I would like to emphasize that we obviously do not consider it proper to limit our relations to economic, cultural, and scientific co-operation. We attach great importance to the opinion of the German people in the discussion of important international problems. In talks with the German Democratic Republic [see 15352 A] we have already reached mutual understanding on such important questions as rearmament, European security, and other problems in which both the Soviet and the German peoples are equally interested. We are of the opinion that a *rapprochement* in the standpoints of the Soviet Union and the German Federal Republic in these questions would be very profitable.

" We hope that the points of view outlined above will be examined by the Federal Government in a spirit of friendly and constructive co-operation. It goes without saying that I and the other members of the Soviet Government will gladly and carefully examine any proposals which you may care to make toward the strengthening of our relations . . . "

In a broadcast on Feb. 13, Dr. Adenauer said that although discussions between the U.S.S.R. and the Federal Republic might profitably be held on certain subjects, it was essential for the German people to bear in mind " clearly and distinctly " (1) that there was " only one German State," and that the " so-called Democratic Republic " was " not a State but an occupation zone under Soviet rule, whose people must have their freedom restored to them " ; (2) that the Federal Government had no aggressive intentions whatsoever, and none of its allies had attempted to encourage any such intentions. If this were understood by the Soviet Union, as the German people sincerely hoped, " many difficulties could be overcome more easily."

Bulganin Notes to Britain, France and Israel on Middle East Situation. - Demand for Payment of Compensation to Egypt. - Mr. Ben-Gurion's Rejoinder.

Following Marshal Bulganin s letters of Nov. 5, 1956, to the Prime Ministers of Britain, France, and Israel (see 15217 A), the Soviet Prime Minister sent further letters on Nov. 15 to Sir Anthony Eden, M. Guy Mollet, and Mr. David Ben-Gurion welcoming the decision of their Governments to accept a cease-fire in Egypt, but demanding that they should pay compensation to Egypt for damage incurred through the British, French, and Israeli military operations.

The letters to Sir Anthony Eden and M. Mollet, more conciliatory in tone than those sent on Nov. 5, expressed the Soviet Government's " regret " that Britain and France had embarked on hostilities against Egypt, and declared that neither country had gained anything but, on the contrary, had suffered economically by the closing of the Suez Canal and the deprivation of Middle East oil. He went on to say that " justice demands that Britain, France, and Israel should compensate Egypt for the damage caused in connexion with the destruction of Egyptian towns and populated places, and in connexion with the blocking of the Suez Canal and the destruction of its equipment." He proposed that an international commission, on which Egypt should be represented, should " examine and speedily satisfy the legitimate claims of Egypt for compensation for losses sustained through the military operations of Britain, France, and Israel."

Marshal Bulganin also said that the Soviet Government saw no need for the creation of a U.N. Emergency Force, but, as Egypt had agreed to such a Force in principle, the U.S.S.R. would have no objections providing it was stationed on both sides of the Egyptian-Israeli armistice line. With regard to Sir Anthony Eden's and M. Mollet's criticisms of the Soviet action in Hungary, Marshal Bulganin said that the Kadar Government had issued an " appropriate statement " showing that " in spite of the mobilization of the black forces of reaction inside and outside Hungary with the aim of overthrowing the democratic order and restoring the Horthyist-Fascist regime, this conspiracy ended in complete bankruptcy." He added that " any attempt, from whatever side it may come, at interfering in the internal affairs of Hungary, and in Hungary's relations with the Soviet Union, is entirely unfounded and must be resolutely rejected."

In his letter to Mr. Ben-Gurion, Marshal Bulganin wrote *inter alia* that Israel's policy was " dangerous to peace and menaces the very interests of Israel herself." He also wrote that " the Israeli aggression against Egypt has resulted in the death of thousands of people, the destruction of towns, and hatred for Israel in the Arab countries."

Sir Anthony Eden sent a brief reply to Marshal Bulganin on Nov. 20, worded as follows: "As you know, our purpose in intervening in the Middle East was to limit the effects of the conflict between Israel and Egypt. I advocated as long ago as Nov. 1 the sending there of a U.N. Force. We are glad to have U.N. observers with us now. The world would welcome similar action by the Soviet Government in Hungary." The French Prime Minister's reply to Marshall Bulganin was similarly terse.

Mr. Ben-Gurion, in a letter to Marshal Bulganin on Nov. 18, rejected the Soviet demand that Israel should pay compensation to Egypt, and maintained that Israel herself had a case for compensation from Egypt for the losses inflicted on her by hostile Egyptian actions since 1948.

Drawing Marshal Bulganin's attention to "the true state of affairs in the relations between Egypt and Israel which has produced the present crisis," Mr. Ben-Gurion stressed that the Arab States had invaded Israel on the very first day of her independent existence for the purpose of "annihilating" her; that Egypt had insisted on remaining in a state of war with Israel since the signing of the 1949 armistice agreements; and that she had continued to wage hostile actions against Israel ever since. Mr. Ben-Gurion added: "I cannot but express my surprise at the fact that you do not appear to be aware of these roots of tension in our area."

After drawing attention to the powerful Egyptian military build-up in the Sinai desert and the Gaza strip in readiness for an attack on Israel, Mr. Ben-Gurion emphasized that Israel's military operations had neither harmed any civilians nor caused the destruction of a single Egyptian town. Nor had Israel damaged the Suez Canal, which had been blocked by the Egyptians themselves.

"If there is a case for claiming compensation," Mr. Ben-Gurion continued, "it is we who are entitled to compensation for the Egyptian invasion of our country in 1948; for the death of thousands of our sons and daughters as a result of this aggression; for the economic boycott and maritime blockade maintained in defiance of the U.N. Charter and Security Council resolutions; for the hundreds of Israelis—Jews and Arabs—murdered by *fedayeen*; and for all the damage caused to our economy, running into millions of pounds. However, if peace is established between Egypt and ourselves, we shall be ready to forgive all the past transgressions of the Egyptian rulers."

Mr. Ben-Gurion also wrote, with reference to the military operations in Sinai: "From the mass flight and surrender of the Egyptian soldiers—peasants torn from their homes in Egypt and sent against their will to do battle in a remote desert it is clear that these soldiers were not prepared to fight for the Fascist dictator in Cairo . . . This is conclusive proof that many people in Egypt now understand the true character of Gamal Abdel Nasser, who at the beginning pretended he was concerned with improving his people's health, education, and economic development, but who has since shown himself to be consumed by lust for power and an ambition to impose his rule on all Islamic peoples . . . and to make himself master of the Moslem world."

In his concluding remarks, Mr. Ben-Gurion reiterated that Israel was prepared for a settlement of her dispute with Egypt, as well as with other Arab States, by peaceful means. "It is with regret," he told Marshal Bulganin, "that I have to point out that several of the expressions used in your letter are not likely to be interpreted by the Arab rulers as encouragement to the achievement of peace in our region. Nor would they appear appropriate to the accepted relations between member-States of the United Nations."

The Soviet Government announced on Dec. 8, 1956, through the Tass Agency, that the British, French, and Israeli undertakings to withdraw their forces from Egypt "naturally cancels the question of despatching Soviet volunteers to Egypt."—(Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times - New York Herald Tribune - Soviet Weekly - Frankfurter Allgemeine Zeitung) **(Prev. rep. 15217 A.)**

A. JAPAN. — Cabinet Appointments.

Two further appointments to Mr. Ishibashi's Cabinet were announced in Tokio on Dec. 27, 1956: Mr. Taro Hirai (a newspaper publisher) as Minister for Postal Services, and Mr. Matsusuke Kawamura as Minister of State in charge of the Hokkaido Development Agency, the latter department having been temporarily held by the Prime Minister. Both new Ministers are members of the House of Councillors. (Japanese Embassy Press Office, London) **15307 C.)**

B. PERSIA. — Completion of Trans-Iranian Oil Pipeline from Abadan to Teheran.

The construction of the trans-Iranian pipeline from the oil refinery at Abadan to Teheran was completed on Jan. 31. The work on the northern section between Teheran and Azna had been carried out by a French firm (*l'Entrepose*), and that on the southern section by a British firm (Costain-John Brown). The length of the pipeline is 600 miles.—(Le Monde, Paris) **(Prev. rep. 14405 C.)**

C. UNITED KINGDOM. — North Lewisham By-election. - Labour wins Seat from Conservatives.

Polling took place on Feb. 14 at North Lewisham in the by-election caused by the death of Sir Austin Hudson (Conservative). The result was as follows:

MacDermot, Niall (Labour)	18,516
Farmer, Norman (Conservative)	17,406
*Greene, Miss Lesley (Independent Loyalist) ..	1,487
Labour gain from Conservative. Majority ..	1,110

*Forfeited deposit.

Figures at the general election were: Sir A. Hudson (C.) 22,070, S. T. Williams (Lab.) 18,834—Conservative majority, 3,236.

The Labour candidate received 49.5 per cent of the votes in the by-election, the Conservative candidate 46.5 per cent, and the Independent Loyalist candidate 4 per cent, whereas at the general election the Conservatives received 54 per cent and Labour 46 per cent in a straight fight. The Labour proportion of the poll thus rose by 3.5 per cent and the Conservative proportion fell by 7.5 per cent. Of the total electorate of 52,864 (an increase of 379 since the general election), 70.8 per cent went to the polls, compared with 77.9 per cent at the general election.

The loss of the seat to Labour was attributed by the Conservatives partly to the intensive Labour campaign against the Government's Rent Bill (see 15292 A), which was made one of the principal issues in the by-election, and partly to the intervention of Miss Greene, in which connexion it was pointed out that the Labour candidate had got in on a minority vote. Mr. Gaitskell, the Leader of the Opposition, described the Lewisham result as "a vote of no-confidence in the Government" and as a vote against the Rent Bill, which he called upon the Government to withdraw. Miss Greene, secretary of the League of Empire Loyalists, fought the by-election on a programme of "freeing the British Empire from American domination." The new Member, Mr. Niall MacDermot, is a barrister practising on the Midland circuit.

The late Member, Sir Austin Hudson (59), died on Nov. 29, 1956, having been in serious ill-health for several months previously. He had been Conservative M.P. for East Islington in 1922-23, for North Hackney from 1924-45, and for North Lewisham from 1950 until his death, and had held the posts of Parliamentary Secretary to the Ministry of Transport (1935-39), Civil Lord of the Admiralty (1939-42), and Parliamentary Secretary to the Ministry of Fuel and Power in the "caretaker" Government of 1945. He was chairman of Morgan Bros. Ltd., publishers of trade and technical journals, and had been created a baronet in 1942.

The North Lewisham result was the first since the war in which any Government had lost a seat to the Opposition at a by-election. Moreover, it was only the second time since the war that a seat had changed hands in a by-election - the previous occasion being in May 1953, when the Conservatives won Sunderland South from Labour (see 12913 B).
(Times - Daily Herald) **(Prev. rep. By-elections, 15275 C.)**

Note. Seven other by-elections are pending - at Warwick and Leamington, owing to the resignation of Sir Anthony Eden (see 15301 A); at Wednesbury, owing to the resignation of Mr. Stanley Evans (Labour) (see 15231 A); at Carmarthen, owing to the death of Sir Rhys Hopkin Morris (Liberal); at Beckenham, owing to the conferment of a peerage on Mr. Patrick Buchan-Hepburn (C.), the former Minister of Works (see 15313 A); at Newcastle-upon-Tyne North, caused by the conferment of a peerage on Major Gwilym Lloyd-George (Liberal-Conservative), the former Home Secretary (15313 A); at Bristol West, caused by the conferment of a peerage on Sir Walter Monckton (C.), the former Paymaster-General (15313 A); and at Hornsey, caused by the death of Sir David Gammans (C.).
(Ed. K.C.A.)

D. BARBADOS. — General Election.

General elections held in Barbados on Dec. 6, 1956, resulted in the return to office of the Labour Government headed by Mr. Grantley Adams, who had been Prime Minister of Barbados since the introduction of the ministerial constitution in 1954. Party strengths in the new House of Assembly are: Labour party, 15 (no change); Democratic Labour party, four; Progressive Conservative party, three; Independents, two. The election was the second to be held in the island under adult suffrage, the previous one being in 1951.—(Times) **(Prev. rep. 13402 A.)**

E. ISLE OF MAN. — Decline in Manx-speaking Population. - Comparative Census Figures.

It was recently announced in Douglas (I.O.M.) that the census of 1951 had shown a continued decline in the number of people able to speak the Manx language, as shown by the following census returns of Manx-speaking people since the beginning of the century—4,657 in 1901, 915 in 1921, 529 in 1931, and only 355 in 1951. The population of the Isle of Man in 1951 was 55,218.—(Daily Telegraph)
(Prev. rep. 1951 Census, 11751 A.)

A. UNITED KINGDOM. — Aircraft Industry. - Canadian and U.S. Orders for British Aircraft and Aero-Engines. - U.K. Aircraft Exports in 1956.

Vickers-Armstrong Ltd. announced on Jan. 3 that Trans-Canada Air Lines had placed an order for 20 Vickers *Vanguard* turbo-prop airliners which would cost, with spares, $67,100,000 (£23,900,000), and had also taken an option on four more *Vanguards* with spares, valued at an additional $11,710,000 (£4,100,000). This transaction represented the largest dollar export order placed in Britain by commercial buyers since the end of the war, and, taken together with orders already placed by T.C.A. in Britain, (including contracts for 38 Vickers *Viscounts* and spares to a value of about $38,600,000), made the Canadian company Britain's largest dollar customer. Delivery of the *Vanguards* will begin in 1960 and will be completed in 1961.

Mr. Gordon McGregor, president of T.C.A., stated that the decision to order *Vanguards* followed an "exhaustive equipment analysis over a period of two years," during which six other competing aircraft had been examined. The *Vanguard* had been chosen because of its high standard of comfort and its freedom from noise and vibration.

The *Vanguard*, developed by Vickers-Armstrong as a private venture, is 100 m.p.h. faster and nearly twice as large as the *Viscount*, and is expected to make its first flight in the autumn of 1958. Its four Rolls-Royce *Tyne* engines will give it a cruising speed of 425 m.p.h. at 20,000 feet, and the T.C.A. version will carry 82 first-class or 102 tourist-class passengers and have an effective range of 1,750 miles in the worst Canadian operating conditions. The T.C.A. contract brought the total number of *Vanguards* on order to 40, an order for 20 having already been placed by British European Airways. Delivery of the B.E.A. *Vanguards* will begin early in 1960.

The Bristol Aeroplane Company had announced on Dec. 3, 1956, that, after "exceptionally complicated and protracted negotiations," a contract had been signed with Northeast Airlines of America for an initial order for five *Britannia* airliners valued at more than $17,000,000 (over £6,000,000), to be delivered in the autumn of 1957.

It was explained that the airliners (*Britannia* Mark 305s) had been originally intended for B.O.A.C. but that, in order to enable the Bristol Aeroplane Company to meet Northeast Airlines' delivery requirements, B.O.A.C. had agreed to release five of the aircraft it had on order and to take instead five other *Britannias* of the slightly later Mark 310. The aircraft to be delivered to Northeast Airlines will accommodate 92 first-class or 133 tourist-class passengers. Their four Bristol *Proteus* turbo-prop engines will give them a cruising speed of 400 m.p.h., enabling the flying time from Boston to Miami and from New York to Miami to be reduced to under 4 and 3¼ hours respectively.

The Northeast Airlines contract followed an order by Canadian Pacific Airlines (announced on Oct. 21) for three Bristol *Britannias*, valued, together with spares, at about $10,000,000 (over £3,500,000). The airliners, the first of which is scheduled for delivery towards the end of 1957, will fly non-stop between Vancouver and Tokio in 12 hours and between Vancouver and Honolulu in seven. They are expected to reduce the time taken on the Vancouver-Amsterdam non-stop run over the North Pole to 12 hours, compared with 18½ hours taken by the existing C.P.A. service using American Douglas DC-6 airliners.

These contracts brought the number of *Britannias* on order to 60, including 33 for B.O.A.C., three for *El Al* (Israel Airlines), 10 for the R.A.F., and four for the British Ministry of Supply.

Details of other recent contracts placed by overseas buyers for British aircraft and aero-engines are given below:

U.S. Orders for British Aircraft. U.S. Capital Airlines announced on July 24 that it had placed an order with the de Havilland Aircraft Company for 14 *Comet IV* jet airliners at a cost of about $42,000,000. The aircraft are intended to go into service early in 1959, and (if the schedule is met) will be the first jets to be operated on U.S. domestic routes.

Earlier in 1956 Capital Airlines had increased its orders for Vickers-Armstrong *Viscount* airliners from 60 to 75.

Orders for British Aero-Engines. Trans-Canada Air Lines announced on May 9, 1956, that it had placed orders with the U.S. Douglas company for four *Douglas DC7* airliners, to be powered by Rolls-Royce *Conway* by-pass jet engines, and had taken an option on two more. The total value of the contract, including spares, was about $28,000,000 (£10,000,000), the Rolls-Royce company's share being over $10,000,000 (£3,571,000). It was explained that the decision to purchase aircraft powered by *Conway* engines had been influenced by the "exceptional success" of the *Viscounts* already in T.C.A. service, which had Rolls-Royce *Dart* engines.

On Aug. 13 Rolls-Royce Ltd. announced that the German *Lufthansa* company had placed an order in the U.S.A. with the Boeing company for four *Boeing 707* airliners to be fitted with *Conway* engines, to be ready in 1960 for the *Lufthansa* transatlantic service. The value of the contract to the Rolls-Royce company was given as about £3,000,000.

[The *Conway* engine had not been specified for any British-built aircraft since the decision to abandon the *Vickers 1000* military transport was taken on Nov. 11, 1956—see 14551 A.]

Figures published by the Society of British Aircraft Constructors on Jan. 25, 1957 gave the value of British aviation exports in 1956 as £104,460,562, or 58 per cent more than the 1955 record figure. Of the 1956 total, aeroplanes and parts accounted for £71,759,067, aero-engines for £27,902,808, electrical appliances for £2,682,209, instruments for £1,428,657, and tyres for £687,821.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Montreal Star)

B. AUSTRALIA. — Trade Surplus in Second Half of 1956. - Relaxation of Import Restrictions. - Rise in External Reserves.

Relaxations in import restrictions, with retrospective effect from Jan. 1, 1957, were announced by Sir Arthur Fadden (the Federal Treasurer) and Mr. McEwen (the Minister of Trade) on Jan. 16-17. The major items affected included capital plant and machinery, machine-tools, and agricultural equipment valued at £A20,000,000 and textiles, raw materials, and producer goods valued at £A10,000,000 imported from British and other non-dollar sources, as well as from the dollar area. It was pointed out that Britain would benefit chiefly from the increased textile imports, as Australia was Britain's largest single market for cotton and rayon piece-goods and yarns.

The new regulations provided that:

(*a*) Supplies of imported textiles for the retail trade on the one hand, and for local manufacture on the other, would be dealt with separately to ensure adequate supplies of textile materials for manufacturing in Australia.

(*b*) Manufacturers' textile quotas would be increased by 60 per cent over their July 1956 allocations, and other traders' textile quotas by 20 per cent.

(*c*) Importers would be allowed to transfer quotas for clothing to textiles, thus enabling them to maintain a supply of textiles at the expense of ready-made clothing.

(*d*) The import licensing period for all goods would be extended from three to four months commencing April 1, 1957.

Explaining the reasons for the Government's decision, Sir Arthur Fadden stated that the balance-of-payments position had improved greatly by comparison with 12 months earlier, Australia having reached a state of balance in her external accounts. If the wool market held for the remainder of the selling season, Australia should be able to make a worthwhile addition to her overseas reserves and possibly to relax import restrictions still further.

It was announced on Jan. 9 that Australia had a favourable trade balance of nearly £A100,000,000 during the period July-December 1956 (the first half of the financial year 1956-57), exports having amounted to £A459,500,000 and imports to nearly £A360,000,000. In the corresponding period of 1955-56 there was a deficit of more than £A26,000,000.

The Commonwealth Bank of Australia's holdings of gold and balances abroad, representing the major part of Australia's total international reserves, rose by £A69,500,000 between July 1, 1956, and Jan. 16, 1957, compared with a fall of £A78,600,000 in the corresponding period of the previous year. This brought total reserves to £A342,000,000, the highest since August 1955.—(Australian News and Information Bureau - Financial Times) **(Prev. rep. Trade Figures, 15071 B; Import Restrictions, 14952 A.)**

C. NIGERIA. — Elections in Northern Region.

Elections for a new House of Assembly (the Lower Chamber of the Regional Legislature) were held in the Northern Region of Nigeria during November 1956. They resulted in a decisive victory for the Northern People's Congress (the majority party in the previous Assembly), which won 100 out of the 131 elected seats, seven more seats being won by smaller parties allied to the N.P.C. The Northern Elements Progressive Union (NEPU), the main Opposition party, won six seats, while 12 were won by other Opposition parties (including the Action Group, the dominant party in the Western Region) and five by Independents. One seat was still undecided.

In addition to the elected members, the Northern House of Assembly comprises four official members and five special members, the latter being appointed by the Governor to represent interests or communities not otherwise adequately represented.

In the rural areas the elections were indirect, through electoral colleges, but in 19 urban constituencies they were direct elections—the first held in Nigeria. The franchise for both direct and indirect elections was limited to adult male taxpayers.

The Northern People's Congress is led by the Sardauna of Sokoto, the Regional Premier. The Northern Elements Progressive Union is affiliated to the National Council for Nigeria and the Cameroons, led by Dr. Azikiwe, the Premier of the Eastern Region.—(Times - Commonwealth Survey)

(Prev. rep. Federal Elections, 14140 A.)

A. UNITED KINGDOM. — The Clean Air Act. - City of London proclaimed a "Smokeless Area." - Smokeless Zones in Birmingham.

Mr. Duncan Sandys, then Minister of Housing and Local Government, laid an Order before Parliament on Dec. 21, 1956, bringing into operation from Dec. 31 certain provisions of the Clean Air Act, which implemented the principal recommendations of the Beaver Committee on Air Pollution (see 13944 A) and had received the Royal Assent on July 5, 1956. The provisions brought into force:

(1) Empowered local authorities, subject to ministerial confirmation, to create smoke control areas in which it would be an offence to emit smoke from buildings;

(2) authorized them to make by-laws requiring new buildings to have "smokeless" heating and cooking arrangements;

(3) required all new industrial furnaces to be as far as possible smokeless, and stipulated that the height of new industrial chimneys must be approved by the local authorities concerned;

(4) required owners of colliery "spoilbanks" to use all practicable means to prevent the combustion of refuse and to minimize the emission of smoke and fumes from the surface.

A similar Order applying these provisions to Scotland from the same date was made by the Secretary of State for Scotland. The remaining provisions of the Act will be brought into operation later.

The Clean Air Act also prohibited the emission of "dark smoke" from factory and other chimneys; required steps to be taken to minimize the emission of dust and grit; and provided for grants to householders in "smoke control areas" toward the cost of converting fireplaces, etc., to burn smokeless fuel. The full provisions of the Act are summarized below:

"Dark Smoke." The emission of "dark smoke" from chimneys, railway locomotives, or ships in inland waters was prohibited after a date to be fixed by the Minister of Housing and Local Government.

["Dark Smoke" was defined as "smoke as dark as, or darker than, shade 2 on the Ringelmann chart."]

The Minister was empowered, however, to make regulations granting exemptions from the prohibition for specified periods, e.g. to cover such operations as the raking of boiler fires, or soot-blowing. It would be a defence to a charge of emitting "dark smoke" to prove that the emission was due solely to (*a*) the lighting of a furnace "from cold"; (*b*) a mechanical failure which could not reasonably have been prevented; (*c*) the impracticability (having regard to cost, local conditions, or the state of technical knowledge) of obtaining suitable fuel; (*d*) the unsatisfactory nature of the furnace and the impracticability of modifying it at a reasonable cost. The last-named defence would lapse after the Act had been in force for seven years.

Emission of Grit and Dust. Users of existing furnaces (except domestic furnaces) were required to take "all practicable steps" to minimize the emission of grit and dust, and it was laid down that all new furnaces burning solid or pulverized fuel in large quantities should be fitted with grit and dust-arresting equipment. The Bill made it an offence to instal any new furnace (except a domestic furnace) unless it was capable of being operated continuously without emitting smoke.

Smoke from Railway Locomotives. Besides prohibiting the emission of "dark smoke" from railway locomotives, the Bill stipulated that "all practicable means" must be taken to minimize the emission from locomotives of any kind of smoke.

Colliery Spoilbanks. Owners of colliery spoilbanks were required to take all practicable steps to minimize the emission of smoke and fumes.

Special Industrial Processes. Where the nature of an industrial process involved special technical difficulties in the prevention of smoke, grit, and dust, the Bill transferred responsibility for supervision from the local authority to the Government Alkali Inspectorate.

Smoke Control Areas. Local authorities were given permissive powers to make Orders (requiring ministerial confirmation) designating "smoke control areas," within which it would, in general, be an offence to emit smoke of any kind. A local authority might, however (*a*) make different provision as regards smoke control for different parts of a designated area; (*b*) limit the operation of a smoke control Order to specified classes of buildings in the area; (*c*) exempt specified buildings or classes of buildings, or specified fireplaces or classes of fireplace, from the operation of the Order. In addition, the Minister of Housing might himself exempt some fireplaces from conversion if he was satisfied that they could burn non-authorized fuel without producing undue smoke.

[It was pointed out in the Press that although the Beaver Committee had recommended the designation of both "smoke control areas" and outright "smokeless zones," the Government had decided that this would be an unnecessary complication. The object of the provision that local authority Orders must be confirmed by the Minister was to ensure that the rate of designation did not outrun the available supplies of smokeless fuel.]

Grants for Conversion of Domestic Grates in "Smoke Control Areas." Owners or occupiers of existing houses in "smoke control areas" would receive grants of at least 70 per cent of the cost of adapting or replacing their grates or stoves for smokeless fuel. Of these grants, 40 per cent of the actual cost of the work would be provided by the Exchequer and at least 30 per cent by the local authority. The respective costs to the Exchequer and the local authorities were estimated at about £3,000,000 and £2,000,000.

No grants would be payable in respect of houses built after the Bill came into operation, as these would be expected to be equipped with appliances to burn smokeless fuel. In the case of council houses, the local authority would bear the full cost of conversion but would receive the Exchequer grants.

Penalties. Maximum penalties under the Bill were fixed as follows: (*a*) for industrial offences (emission of "dark smoke" from factory chimneys, failure to take all practicable steps to minimize the emission of grit and dust from furnaces and of smoke and fumes from spoilbanks, etc.), £100; (*b*) for the emission of "dark smoke" from dwelling-house chimneys anywhere, or of smoke of any kind from a dwelling-house chimney in a "smoke control area," £10. The Bill also prescribed a maximum fine of £100 for the disclosure of trade secrets or manufacturing processes obtained by anyone in the course of applying the provisions of the Bill.

Date of Entry into Force. The Minister of Housing and Local Government would fix the dates on which the various provisions of the Bill would come into force.

The Bill had been given an unopposed second reading in the House of Commons on Nov. 3, 1955.

Mr. Deedes (then Parliamentary Secretary, Ministry of Housing and Local Government) pointed out that domestic smoke was a more difficult problem than industrial smoke, and that its prevention would be a large-scale operation involving radical changes in fuel use, large-scale alteration of domestic apparatus, and a high degree of public willingness. In the "black areas" a fuel consumption of nearly 19,000,000 tons of house coal would have eventually to be replaced by smokeless fuel, but it was no part of the Government's plan to "put a sudden end to the open fire," which remained the most popular way of heating living-rooms. The transition to smokeless fuel must depend largely on developments in the fuel industry, but the Government believed that the objective could gradually be achieved over a period of 15 years. Meanwhile the provision of grants toward the cost of altering heating apparatus would mean that only 30 per cent or less of the cost would have to be borne by the householder.

As regards industrial air pollution, Mr. Deedes said that the Government recognized that the ban on "dark smoke," etc., would involve alterations to many industrial plants, and had accepted the Beaver Commission's recommendation that seven years' grace should be allowed under certain circumstances. Sulphur gases constituted one of the most harmful forms of industrial pollution, but in the present stage of technical knowledge the problem of prevention could not be solved by legislation. Research into the question was being pressed forward, and the Government agreed with the Beaver Committee that the latest and most efficient methods of removing sulphur from chimney gases must be used at all new power stations. The Government also agreed that a Clean Air Council should be set up.

Mr. Deedes concluded by saying that the industrial and domestic sections of the Bill would be brought into effect at different times. It was proposed that the "dark smoke" and "dust and grit" provisions should not come into operation until the early part of 1958—i.e. not until over three years had elapsed since the Beaver Committee's report, as recommended by the committee itself. The provisions for the designation of "smoke control areas," and for grants to householders in those areas, would come into force as soon as possible after the Bill became law.

Dr. Edith Summerskill (Lab.) welcomed the Bill on behalf of the Opposition, but expressed disappointment at the Government's "apparent 'go-slow' policy," complaining in particular that the Bill did not deal effectively with the problem of the harmful effects of sulphur dioxide in the air. She pointed out that the incidence of lung cancer was greater in areas having a high degree of air pollution, while the harmful effects of factory smoke in tubercular diseases was shown by the fact that the percentage of cattle which had to be slaughtered under the Tuberculosis Order was about four times greater in industrial areas than in other areas.

Criticism of the "leisurely" nature of the Government's proposals was also voiced by **Mr. Nabarro** (C.), who had earlier (February, 1955) introduced a private member's Bill with similar objects, but had withdrawn it after the Government had undertaken to bring in their own Bill. Mr. Nabarro (himself an industrialist) strongly criticized the seven years' grace allowed to industrialists in certain circumstances before the penalties for emission of "dark smoke" could be applied, alleging that this concession had been made at the instance of the Federation of British Industries. [During the Committee stage of the Bill, Mr. Nabarro moved an amendment—which was defeated—seeking to reduce the seven-year period of grace to three years.]

The most important amendments adopted during the Committee and Report stages were:

(1) An amendment authorizing local authorities in large industrial boroughs to appoint officials to carry out supervisory duties which the Bill stipulated should be carried out by the Government Alkali Inspectorate. Mr. Nabarro had stressed that inspectors appointed by local authorities would be "more diligent and forceful" in applying the law than the "comparatively remote" Government inspectorate could be.

(2) An amendment providing for the setting-up of a Clean Air Council, with the Minister of Housing as chairman, to act as a consultative committee without executive functions;

(3) An amendment empowering the Minister to make regulations requiring industrialists to instal instruments for measuring smoke emission;

(4) An amendment excluding "furnaces designed solely or mainly for domestic use" from the requirement that all new furnaces should be smokeless as far as possible.

The last three amendments were moved by the Government.

Mr. Enoch Powell (then Parliamentary Secretary, Ministry of Housing and Local Government) gave an undertaking during the Report stage (April 10) that the Minister of Housing would report annually to Parliament on the progress of the Government's clean air policy. The third reading was given on the same day, and the Bill was subsequently enacted after an unopposed passage through the House of Lords.

On Oct. 2, 1955, under parliamentary powers obtained by the Common Council, the City of London was proclaimed a "smokeless area" in which only fuels such as coke, anthracite, Welsh "dry" steam coal, coalite, and phurnacite might be used. In February 1955 it had been announced that two areas in Birmingham—one of 93 acres in the centre of the city, and another of 110 acres in a new industrial estate—would be designated smokeless areas under parliamentary powers obtained by Birmingham City Council. It was further announced in October 1956 that these areas would be supplemented by a further 61 acres in the city centre and a new 56-acre area in the suburbs.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Beaver Committee Report, 13944 A.)

A. INDIA. — Inauguration of Trombay Reactor.

India's first atomic reactor, at Trombay (near Bombay), was inaugurated on Jan. 20 by Mr. Nehru, who named it *Apsara* (meaning a "water nymph" or "celestial dancer"). Mr. Nehru declared in his address that India would never use atomic energy "for evil purposes, whatever might happen or whatever might be the circumstances," and expressed gratitude to those countries which had helped India in her atomic energy development programme—Britain, Canada, the United States, France, and the Soviet Union.

Dr. Bhabha, chairman of the Atomic Energy Commission, stated on the same day (1) that a plant to convert uranium salt into uranium metal had already been designed and was expected to go into operation by the middle of 1958 [uranium salt is produced from the monazite sand deposits of Southern India]; (2) that heavy water would be manufactured in quantity, the fertilizer plant at Nangal being expected to produce 10 to 20 tons a year; and (3) that it was also the Government's intention to produce heavy water in all the other fertilizer factories to be erected during the Second Five-Year Plan. Moreover, the Government were considering the erection of a plant to make atomically pure graphite from coke produced in a refinery in Assam, and to erect plants for the manufacture of beryllium and zirconium metals. In this connexion Dr. Bhabha pointed out that India was the world's largest producer of beryl, from which beryllium metal was obtained, and that zircon sand for the manufacture of metal zirconium was found on the south-western coast. [Both these metals have important uses in advanced types of atomic reactors.]

The Trombay reactor, the first in Asia outside the Soviet Union, had gone into operation on August 4, 1956.
(The Statesman, Calcutta) **(Prev. rep. 15086 E.)**

B. NEW ZEALAND. — Cabinet Changes.

The N.Z. Prime Minister, Mr. Holland, announced on Feb. 8 the following Cabinet changes resulting from the resignation on Jan. 29 of Mr. W. Sullivan, Minister of Labour, Mines, and Housing: (*a*) Mr. R. G. Gerard as Minister of Social Security and Marine; (*b*) Mr. J. K. McAlpine as Minister of Labour and Mines; and (*c*) Mr. D. J. Eyre as Minister of Housing and Minister in charge of the State Advances Corporation. Mr. McAlpine retained the Railways portfolio, and Mr. Eyre the portfolios of Police, Tourism, and Health Resorts. Mr. Gerard, a farmer, was senior Government Whip prior to joining the Cabinet.

Mr. Sullivan had been a member of the Cabinet since 1949; his resignation was due to personal reasons, one of his sons having recently died.—(Directorate of Information, Wellington)

(Prev. rep. 14780 D.)

C. EUROPEAN COAL AND STEEL COMMUNITY. — M. Mayer re-elected President of High Authority.

M. René Mayer was re-elected on Jan. 28 for two years as president of the High Authority of the European Coal and Steel Community. Herr Franz Etzel (Western Germany) and M. Albert Coppé (Belgium) were re-elected vice-presidents.
(Le Monde, Paris) **(Prev. rep. 15025 A.)**

D. UNITED STATES. — Arrest of Alleged Russian Espionage Ring.

It was officially announced in Washington on Jan. 25 that three persons had been arrested earlier the same day on charges of espionage for the U.S.S.R. The accused persons—described as members of a "highly organized" Russian spy ring that had been in operation for "at least 10 years"—were Jack Soble (53), his wife Myra Soble (52), and Jacob Albam (64).

Soble (whose former name was Sobolevicius) and his wife had both arrived in the U.S.A. from Japan in October 1941, and had become naturalized U.S. citizens in 1947. Albam had entered the U.S.A. in 1947, returned to Europe in 1948, but had re-entered the U.S.A. as the husband of an American citizen, his application for citizenship being still pending at the time of his arrest. Both Soble and Albam were born in Lithuania, while Mrs. Soble's nationality by birth was given as Russian.

An F.B.I. statement said that investigations in the case dated back 13 years, when the F.B.I. had begun to scrutinize the activities of Vassili Zubilin (then serving as Third Secretary at the Soviet Embassy in Washington), who was believed to have been at one time a general in the Soviet secret police. Zubilin had returned to the Soviet Union in 1944 and had since been replaced by Soble as a dominant figure in a Russian spy ring. Soble had been arrested when on the point of leaving the United States.

It was stated that the charges against Soble, Mrs. Soble, and Albam were that they had conspired "for the purpose of obtaining information respecting the national defence of the U.S.A., including documents, writings, photographs, photographic negatives, and notes for delivery to Russian agents." Soble was specifically charged with relaying in New York on Aug. 15, 1956, two reports "for delivery to agents of Russia." All three were also charged with conspiring to act as agents of the Soviet Government.

It was announced that an immediate grand jury investigation had been authorized into the operations of the three accused and "others who might be involved in the espionage conspiracy, including Soviet officials." Pending the investigation, Soble, Mrs. Soble, and Albam were ordered to be held on bail of $100,000 each.—(New York Herald Tribune)

E. UNITED KINGDOM. — Capital Issues in 1956.

New capital issues in the U.K. in 1956 amounted to £295,952,000, as compared with £567,192,000 in 1955. Of the 1956 total, £264,607,000 (89.4 per cent) was for the home market, £31,345,000 (10.6 per cent) for Commonwealth and Empire countries, and nil for foreign countries.

Issues in respect of the home market were divided into the following categories: Public Bodies, £53,857,000; Production, £158,419,000; Trade, £16,624,000; Transport, £1,487,000; Finance, £34,220,000. Classified by industrial and other groups, the total of all capital issues (home and overseas) was divided as follows: Governments, £13,795,000; Local Authorities, £53,857,000; Public Boards, nil; Railways, nil; Gas and Water, £3,647,000; Electric Light and Power, nil; Telegraph and Telephone, £980,000; Road Transport, nil; Shipping, Canals and Docks, £543,000; Banking, Insurance, Investment, and Finance, £41,079,000; Property, £365,000: Coal, Iron, Steel, and Engineering, £28,866,000; Motors and Aircraft, £10,882,000; Mining, £5,898,000; Oil, £9,700,000; Tea, Coffee, and Rubber, nil; Breweries and Distilleries, £5,283,000; Miscellaneous, £121,055,000.

The above figures exclude all borrowings by the British Government; shares issued to vendors; allotments arising from the capitalization of reserve funds and undivided profits; sales of already issued securities which add nothing to the capital resources of the company whose securities have been offered; issues in replacement of securities previously held in the United Kingdom; and private placings for which no market quotations are obtained. The figures are based upon the prices of issue.

The 1956 total also excluded the sums being raised by Imperial Chemical Industries (£39,000,000) and London and Overseas Freighters (£7,300,000), as the first subscriptions to these are not payable until 1957.—(Midland Bank Ltd.)

(Prev. rep. 1955 Issues, 14621 B.)

F. SUDAN. — Population Census.

Provisional figures of a census held between July 1, 1955, and June 30, 1956, were released in Khartoum in January. They showed that the population of the Sudan was 10,200,000, divided between the nine provinces as follows:

Bahr-el-Ghazal ..	994,004	Kassala	938,913
Blue Nile	2,061,119	Khartoum ..	503,766
Darfur	1,318,000	Kordofan ..	1,744,417
Equatoria	871,210	Northern	870,614
Upper Nile ..	807,516		

The population of the Blue Nile, Kordofan, and Darfur provinces together constituted 50 per cent of the total population, while that of the three Southern provinces (Bahr-el-Ghazal, Equatoria, and Upper Nile) comprised 27 per cent.
(Sudan Government Information Service, Khartoum)

A. LIBYA - TUNISIA. — Treaty of "Brotherhood and Good-Neighbourliness." - Joint Declaration on Algeria. - M. Bourguiba on the "Greater Maghreb."

A treaty of "brotherhood and good-neighbourliness" between Tunisia and Libya was signed in Tunis on Jan. 6 by the respective Prime Ministers, M. Bourguiba and M. Mustapha Ben Halim, after discussions lasting four days. The joint communiqué said that the treaty defined the "relations of brotherhood and good-neighbourliness between the two countries and the principles of their co-operation"; affirmed the solidarity of the two countries "for better and for worse"; and laid down that each country would consider itself directly affected by any menace or threat against the other.

The statement also said that the Algerian problem had "prominently figured in the discussions." It continued: "It has become clear that an equitable solution of this question is necessary for the maintenance of security in the whole of the Arab *Maghreb* [North Africa]. Both sides feel convinced that an equitable solution necessarily implies recognition of the right of the Algerian people to its sovereignty and independence . . . in conformity with the U.N. Charter. Both sides take the opportunity of appealing to the conscience of the free countries so that they may co-operate in bringing about a solution of the Algerian question in conformity with the aspirations of the Algerian people . . ."

During the Libyan Premier's stay in Tunis, M. Bourguiba made a broadcast on the Algerian question on Jan. 4 which was deeply resented in France.

After declaring that the Libyan-Tunisian treaty then being drawn up was "a courageous step on the way to the building of the united Greater Arab *Maghreb*," and that a treaty of friendship and alliance with Morocco was also under discussion, M. Bourguiba continued: "To those among the French people who are listening we say in full sincerity: 'In the conflict which ranges you against Algeria, the Tunisian people are on the side of the Algerian people and not on the side of France. In view of the joint feelings of the Tunisian and Libyan peoples, we have drawn up with our guests a plan of action to help the Algerian people and relieve its sufferings . . . Our action is meant to convince France that real and sincere co-operation between her and the peoples of the *Maghreb* cannot exist as long as the fighting in Algeria lasts."

A visit to Tunis which had been planned by M. Maurice Faure (French Secretary of State for Foreign Affairs) was postponed on Jan. 6, the official reason being given that M. Faure, who was then in Rome for discussions with the Italian Government, had to extend his stay in Italy. It was, however, pointed out in the French and foreign press that M. Faure's action was due to French resentment at M. Bourguiba's broadcast.

In a statement on the previous day M. Bourguiba had spoken of the unification of North Africa "from Sollum to Casablanca" in the light of his concept of a "Greater Arab Maghreb." (Le Monde) **(Prev. rep. M. Bourguiba on Algeria, 15329 A.)**

B. SPAIN. — Spanish Gold Reserves in Moscow. - Recovery of Soviet Receipt.

The Spanish Foreign Ministry announced on Dec. 29, 1956, that, after prolonged efforts, the official Soviet receipt for the Spanish gold reserves which the Spanish Republican Government had secretly sent to Moscow in September 1936 at the start of the Spanish Civil War had now been recovered. The statement said that this had been possible "with the efficient collaboration of the family of the late Dr. Negrin and some close Spanish friends of his," and that the papers would "provide the Spanish Government with the juridical basis for asking for the return of the very large quantity of gold" in Russian hands.

During the Spanish Civil War, Dr. Negrin was Minister of Finance and later Prime Minister of the Spanish Republican Government. After General Franco's victory he lived in exile in Paris and London until his death in the French capital on Nov. 14, 1956. The Soviet receipt for the gold shipment had been preserved in his personal archives, and it was reported that he had left instructions to one of his sons to hand it over to the Spanish Government.

No authoritative estimates were available of the quantity of Spanish gold held in the U.S.S.R., but unofficial reports from Madrid spoke of between 500 and 700 tons.

(Daily Telegraph - Observer - New York Times)

C. CHILE. — Cabinet Changes.

The following changes in the Chilean Cabinet were announced in Santiago in November 1956: (*a*) Señor Arturo Zuñiga Latorre as Minister of Justice in succession to Señor Mariano Fontecilla Varas (the latter had succeeded Señor Santiago Wilson Hernandez in May 1956); (*b*) General Eduardo Yanez Zavala as Minister of Public Works *vice* Señor Adalberto Fernandez Ferreira. Señor Zuñiga had been Minister of Justice and subsequently Minister of Economy in 1955, while General Yanez had been Minister of Labour from 1955 until May 1956.—(New York Times) **(Prev. rep. 15131 C.)**

D. SOVIET UNION.—Expulsion of Soviet Diplomats from the U.S.A., Denmark, and the Netherlands. - Soviet Expulsion of U.S. Diplomats. - U.S. Naval Attachés expelled from Moscow.

The U.S. State Department announced on Jan. 15 that it had requested the Soviet Embassy in Washington to withdraw immediately the Soviet assistant military attaché, Major Yuri Krylov, on the ground that he had engaged in "highly improper activities" which were incompatible with his diplomatic status.

A State Department spokesman said that Major Krylov had bought, through U.S. intermediaries, quantities of electronic equipment which was not of a type licensed for export, and had apparently tried to smuggle some of it out of the country.

It was announced in The Hague on Jan. 21 that the Second Secretary at the Soviet Embassy, M. Drankov, had been declared *persona non grata* by the Netherlands Government and had been asked to leave the country within 48 hours.

It was authoritatively stated that M. Drankov had tried to bribe a Dutch official to supply him with certain secret information, thus endangering the security of the State.

The Danish Foreign Ministry announced on Jan. 29 that it had informed the Soviet Ambassador that the residence permit of one of the two Soviet military attachés in Copenhagen, Lieut.-Colonel Rogov, would not be renewed on its expiry, and that he should leave at an early date. Colonel Rogov, who had been in Denmark since 1955, was alleged to have "displayed conduct which Denmark must consider incompatible with his position." The charges (of which no details were given) were denied by the Soviet Embassy.

In retaliation for the expulsion of Major Krylov, the Soviet Government demanded on Jan. 30 the immediate departure of two U.S. assistant military attachés in Moscow, Major Hubert Tansey and Captain C. W. Stockwell, on the ground that they had "engaged in activities incompatible with their status of accredited diplomatic officials." On Feb. 7 the Soviet Government also expelled two U.S. assistant naval attachés in Moscow (Captain Paul Uffelman and Lieut. William Lewis), alleging that they had taken photographs of "objects of military significance" and had engaged in espionage activities.

The State Department said that the "expulsion of the four American military officers on false charges can be presumed to be in retaliation against revelations of Soviet espionage activities in the U.S.A." [see 15375 D]. It added: "These charges, moreover, derive from the understandably extreme sensitivity of the Soviet Government to overwhelming U.N. condemnation of Soviet aggression in Hungary."—(New York Times - Berlingske Tidende, Copenhagen - Netherlands News Agency) **(Prev. rep. 15236 C.)**

E. UNITED KINGDOM. — Reduction in Bank Rate. - Issue of £300,000,000 Funding Stock.

The Bank of England announced on Feb. 7 that the Bank Rate would be reduced with immediate effect from 5½ per cent to 5 per cent.

The Chancellor of the Exchequer (Mr. Thorneycroft) told the House of Commons that "it would be wrong to interpret the move as a change in economic policy" or as "a signal to bankers and others controlling sources of finance to relax credit, or to ease restrictions on lending." "Today's reduction in the very high rate which has prevailed for the last 12 months," he continued, "is designed to enable the Bank of England to maintain the full effectiveness of monetary policy. I am assured that their control will not be weakened by this move . . . There is no change in the need to restrain both public and private spending and lending in order to make room for exports and essential investment. As long as these are our economic objectives we intend to continue to make full use of interest rates to discourage spending and encourage savings. At the same time it is necessary that our monetary policy should remain flexible, and the Bank rate will be varied as circumstances require."

The lowering of the Bank Rate followed a falling-off in the Treasury Bill rate and other short-term market rates.

The Treasury announced on Feb. 11 that application lists would open and close on Feb. 14 for a £300,000,000 issue of 3½ per cent Funding Stock, 1999-2004, the longest-dated stock in existence, and that the issue price would be £80 per £100 nominal. The Bank of England stated on Feb. 14 that applications up to £1,000,000 had been allotted in full, and above £1,000,000 on a basis of about 91 per cent.—(Treasury Press Office - Financial Times) **(Prev. rep. Bank Rate, 14705 A; Treasury Stock, 15010 B.)**

F. PAKISTAN - CAMBODIA.—Diplomatic Relations.

It was announced in Karachi during January that Pakistan and Cambodia had agreed to exchange diplomatic missions at Legation level, and that the Pakistani Ambassador to Siam, Mr. S. M. Burke, would be simultaneously accredited as Minister to Cambodia.—(Dawn, Karachi) **(13954 C.)**

A. ARGENTINA.—Cabinet Reorganization. - Changes in Army Command. - Statute for Political Parties. - Creation of New Parties. - Forthcoming Elections.

A reorganization of the Argentine Government was announced on Jan. 25 after all civilian Ministers had resigned at the request of General Aramburu, the provisional President. The reorganization was completed on Jan. 29, the full membership of the Cabinet being as follows:

*General Arturo Ossorio Arana	Army.
*Rear-Admiral Teodoro Hartung	Navy.
*Commodore Julio César Krause	Air.
Dr. Carlos Alconada Aramburu	Interior.
Señor Alfonso de Laferrère ..	Foreign Affairs.
Dr. Roberto Verrier	Finance.
*Dr. Alberto Mercier	Agriculture and Livestock.
*Rear-Admiral Sadi Bonnet ..	Transport.
*Señor Pedro Mendiondo ..	Public Works.
*Dr. Francisco Martinez ..	Health and Welfare.
*Señor Rodolfo Martinez ..	Trade and Industry.
Dr. A. Ernesto Salas	Education and Justice.
Dr. Angel Cabral	Communications.
Dr. Tristan Enrique Guevara ..	Labour and Welfare.

*No change.

The reshuffle did not affect the members of the military junta which shares executive responsibility with President Aramburu—viz., Admiral Rojas, the Vice-President, General Arana, the Army Minister, Admiral Hartung, the Navy Minister, and Commodore Krause, the Air Minister. The principal change was the appointment of Dr. Verrier as Finance Minister in place of Dr. Blanco, who had been increasingly criticized for his handling of Argentina's economic and social problems, and in particular for the Government's inability to prevent a reappearance of inflation and a rise in the cost of living, which had led to increasing labour unrest, strikes, and acts of sabotage in recent months. Another aspect of Dr. Blanco's policy which had come under criticism was his failure to bring about the full implementation of the multilateral payments and debt consolidation scheme with nine European countries (see 15021 A) which had been negotiated by his predecessor, Dr. Garcia.

Dr. de Laferrère, the new Foreign Minister, is a writer and journalist and had been Argentine Ambassador in Santiago; he replaced Dr. Luis Podestà Costa. The new Minister of the Interior, Dr. Carlos Alconada Aramburu (who succeeded Dr. Landaburu), is not related to the President. Dr. Cabral, the new Minister of Communications, had been president of the Supreme Court of Justice in Cordoba Province. Dr. Salas, the Minister of Education and Justice, succeeded Dr. Adrogue.

Dr. Verrier said in a press statement on Jan. 28 that he was a firm believer in private enterprise and free competition; that in his view the State, while not disinteresting itself in economic affairs, should determine only monetary and trade policy, and taxation; and that he proposed to return to the strict execution of the economic recovery plan recommended by Dr. Raul Prebish after the fall of the Peron regime (see pp. 14554-55), which he (Dr. Verrier) had helped to draft.

On the same day (Jan. 28) two Presidential decrees were issued giving effect to Dr. Verrier's policy. The first decree extended for one year all collective labour contracts on wages (which in most cases would have expired between August 1957 and February 1958), thus fixing wages at their present level, to avoid a further rise in the cost of living. The second decree authorized employers to pay the retroactive wage increases recently granted under current collective wage agreements in 12 equal monthly or 24 fortnightly instalments, instead of in a lump sum; the purpose of this step was to avoid jeopardizing the financial stability of many firms, and to check inflation.

A decree of Jan. 25 had established a special commission to draw up within 45 days a plan to solve labour conflicts; the commission comprised three representatives of the Ministry of Labour and Welfare, two of the General Confederation of Labour, and two of the Argentine Industrial Union (the employers' organization).

Changes in Army High Command.

In the months preceding the Cabinet crisis dissension among the leaders of the Argentine armed forces had led to a number of sweeping changes in the Army High Command, and to the arrest of two generals who had been Ministers in President Lonardi's Cabinet and who belonged to the extreme right-wing of the Catholic nationalist movement. The Government announced on Nov. 22:

(1) The arrest of a number of persons "behaving suspiciously" in vehicles stationed near a military barracks in the capital, and who were found to have been armed. They included General Bengoa, Army Minister under the late President Lonardi, and General Uranga, who held the Transport portfolio in the Lonardi Cabinet.

(2) The appointment of General Arturo Ossorio Arana, Minister of the Army, as C.-in-C. of the Argentine Army (retaining his ministerial portfolio) *vice* General Francisco Zerda, who had been relieved of his post.

(3) Other changes in the Army High Command, including the appointment of General Bussetti as Chief of the General Staff *vice* General Alonso; General Villarroel as Commander of the Cavalry Corps; General Huergo as Commander of the First Motorized Division; and General Garcia as Commander of the Second Division.

Although the events preceding these changes remained obscure, it was commented in the Press that they indicated a replacement of "nationalist" by "liberal" generals, and that the new commanders belonged to that wing of the army which favoured the abolition of the Revolutionary Military Council and the setting-up of a Government consisting entirely of politicians and technicians. All the officers who had been removed had been accused by one of the Radical Party leaders, Dr. Arturo Mathou, of "engaging in political activities contrary to the interests of the revolution." The head of the Presidential Secretariat, Colonel Arribau, disclosed on Nov. 26 that there had been differences of opinion between the senior generals, who felt that their rank gave them authority over the younger officers, and a number of colonels who advocated that authority should belong to all who had actively fought to overthrow General Perón.

Subsequently, on Dec. 8, it was reported that 19 generals and two colonels of the Army had been detained, including General Zerda, General Imaz (former Commander of the First Motorized Division), General Campos (former Commander of the Cavalry Corps), and General Plantamuru (former Inspector-General of Infantry).

General Uranga, together with a number of Army officers and civilians, had been arrested in August 1956 on charges of conspiracy, but was subsequently released.

Announcement of Elections. - Party Statute. - Creation of Board for the Defence of Democracy.

President Aramburu, speaking at the annual Independence Day dinner of the armed forces on July 6, 1956, announced that the Government had decided to hold general elections late in 1957, when the new electoral register would be ready.

After saying that the armed forces "desire nothing more than the complete triumph of the revolution," General Aramburu outlined the following four-point plan for a return to constitutional Government:

(1) General elections for the Federal, provincial, and municipal authorities, including the City Council of Buenos Aires (the Federal capital), which would be re-established in due course.

(2) A forthcoming statute for political parties which would permit the formation of new democratic political parties.

(3) The drafting of a new electoral law to replace the "fraudulent instruments" created under the Peronista regime.

(4) The Government would also consider the convocation of a Constituent Assembly to reform the Constitution of 1853, which had been revived on May 1, 1956.

The President added that he hoped that these proposals would be "the subject of a full national debate representing all sectors of public opinion."

In implementation of this programme, the following decisions were announced by the Government in October 1956:

(1) A decree was issued on Oct. 10 creating a Board for the Defence of Democracy against "ideologies contrary to freedom, democracy, and the republican system of government."

The decree, which remains valid until the provisional Government hands over power to an Administration based on general elections, stated that the Board's activities would be directed against totalitarian organizations both of the extreme right and the extreme left; that it would classify the organizations concerned as "Communist," "crypto-Communist," "Communist-infiltrated," or "totalitarian"; and that all organizations considered by the Board to merit such designations would be compelled to place these words after their name.

(2) A statute for political parties was promulgated on Oct. 17 in the form of a governmental decree-law.

The statute guaranteed the free development of political groupings and laid down rules for the formation of new parties, while at the same time recognizing all those parties that existed at the time of the revolution of Sept. 16, 1955, which overthrew the Perón regime. [These parties were the Socialist, Radical, Christian Democratic, National Democratic (Conservative), and Labour parties, as well as the Christian Democratic Federal Union and the Communist Party.] It was also laid down that new totalitarian parties either of the Left or the Right would not be permitted, all new parties being required to issue a "basic declaration and a political action programme" in which they would expressly undertake to support a representative Democratic Republican regime. Another Article of the Statute forbade the use by new parties of the names of individuals—a clause aimed at the former Peronista party, now outlawed.

(3) President Aramburu announced on Oct. 26 that the Government had decided to hold nation-wide elections for a Constituent Assembly to consider certain reforms of the 1853

Constitution. These elections, to be held by proportional representation, would take place as soon as the electoral registers were ready, and before the general parliamentary elections already announced.

Formation of New Political Parties. - Communist Party deprived of Legal Status in Elections.

Consequent upon the promulgation of the new party statute, several new parties were formed, of which the most important were:

(*a*) The Independent Civic Party, headed by Señor Alvaro Carlos Alsogaray (Nov. 29, 1956). Señor Alsogaray, who advocates "dynamic capitalism" as opposed to "State interventionism," had been Minister of Industry in General Aramburu's Government until June 1956.

(*b*) The Party of National Concord, headed by General Bengoa (Dec. 14). This party, which was considered to be of the extreme Right, urged the need to "end the hatred which divides the Argentine people," and declared that "national reconciliation must be achieved by a policy of peace, forgiveness, concord, and love between Argentine brothers, and not by machine-guns." This declaration was in line with General Bengoa's avowed aim of bringing about a reconciliation with the former adherents of the Peronista regime—a policy which was strongly in conflict with that of General Aramburu.

Five further groups were recognized in January 1957—the *Cruzada Renovadora de la Unión Cívica Radical* and the *Cruzada Renovadora de la Unión Cívica Radical de la Capital Federal*, both dissident Radical factions; the *Unión Cívica Radical—Intransigencia Popular*, an offshoot of the *U.C.R.*; the *Partido Democrata Conservador Popular del Distrito de la Capital Federal*, the Buenos Aires branch of the Popular Democratic party, an extreme right-wing Conservative group; and the *Partido de los Trabajadores*, previously known as the *Acción Socialista*.

The Argentine Communist party was deprived of legal status and prevented from participating in the forthcoming general elections by a court ruling of Nov. 13, 1956.

Rejecting an application for enrolment in the election register which had been filed by the party, Dr. Botet (a federal judge in Buenos Aires) ruled that the Communist Party did not meet the conditions laid down by the Political Party Statute, which had banned parties considered to be totalitarian, anti-democratic, or inspired from abroad. "Events in Europe," Judge Botet said, "prove that the Communist Party is not a democratic party but the greatest exponent of totalitarianism in contemporary history." The events in Hungary had shown the formation of "independent" Communist parties to be "only a fiction, since Soviet Communist rule is now being imposed by the brutal weight of arms in foreign territories."

It was subsequently expained that the decision did not outlaw the Communist party, but that it would be prohibited from contesting any presidential, congressional, provincial, or municipal election.

Anti-Peronista Measures.

It was announced in July 1956 that the *Junta Nacional de Recuperación Patrimonial* had decided that all property acquired by ex-President Perón after June 4, 1946 (the day he assumed office) should be handed over to the nation. [General Perón's possessions in the Argentine were valued at an estimated 150,000,000 pesos.] An appeal by General Perón's lawyers against the ruling was rejected on Nov. 24 by the Federal Court of Appeals, which ruled that General Perón was entitled only to keep decorations awarded to him by foreign Governments, as well as property that he could prove belonged to him before June 4, 1946.

Under a decree issued on July 5, 1956, all goods and property belonging to the former Peronista party had been declared State property.

Terrorist Incidents.

A number of terrorist incidents occurred in Argentina during the second half of 1956 and at the beginning of 1957, all of them being attributed by the authorities to followers of General Perón and, in one case, to joint Peronista-Communist action.

It was announced on July 14, 1956, that 72 persons had been arrested in Mendoza Province and in San Juan following attempted terrorist outrages, including the placing of an incendiary bomb in a theatre and of a powerful gelignite bomb on a railway bridge at Mendoza. All those arrested were said to be former Peronistas.

An announcement by the Presidential Office on Oct. 18 stated that the authorities had foiled a plot to blow up the main power-station at Buenos Aires and had arrested 70 Peronistas.

Eight bomb explosions in the Buenos Aires area and a big fire in one of the largest industrial plants, which occurred during the night of Dec. 18-19, 1956, were similarly attributed by the Government to a Peronista campaign of bomb outrages, sabotage, and strikes in various parts of the country.

On Dec. 23 it was announced that the police had arrested members of a joint Peronista and Communist sabotage committee, which included three representatives of the Metal Workers' Union, and that the committee had planned to call a 24-hour general strike in support of a strike of metal-workers which had been in progress for several weeks. On the previous day a metal-worker was found dying on a railway line in the capital after the explosion of two bombs, his injuries indicating that the explosion occurred prematurely while he was placing the bombs in position.

The worst outrage occurred on Feb. 12, 1957, when a powerful bomb exploded just before midnight under a railway bridge in a suburb of Buenos Aires, on the main line from La Plata, while a passenger train was crossing the bridge. The explosion set fire to the petrol pipeline which runs alongside the permanent way from La Plata refinery to storage tanks at Buenos Aires, and also to the bridge, which subsequently collapsed; the train, however, escaped disaster and no casualties occurred.

Death of General Lonardi.

Major-General Eduardo Lonardi, who was one of the leaders of the revolution which overthrew the Perón regime in September 1955, died on March 22, 1956, aged 59.

General Lonardi, the son of an Italian-born bandmaster of the Argentine Military College, became an artillery officer and later served at the Superior War College and on the General Staff. In 1948 he became an Army Commander but retired in September 1951 for political reasons, subsequently helping to organize the abortive military and air force rising against the Peronista dictatorship which took place at the time. He was imprisoned for nearly a year and after his release was twice accused of participation in anti-Perón plots, but escaped arrest. After the successful revolution of 1955 he became provisional President of Argentina, but was overthrown on Nov. 13, 1955, by Army officers who accused his régime of being too strongly Roman Catholic and right-wing.

General Lonardi was given a State funeral—an honour normally accorded only to a President who dies in office. (New York Times - Times - Bank of London and South America, Fortnightly Review - Le Monde, Paris)

(Prev. rep. 15229 E; 14964 A; 14871 A; 14553 A.)

A. SOUTH AFRICA. — Dissolution of Conservative Party. - Mr. Coetzee joins Nationalist Party.

Mr. P. B. Bekker, leader of the Conservative Party, announced during a debate in the Union House of Assembly on Jan. 28, 1957, that the party had been disbanded.

Mr. Bekker said that the change in the leadership of the United Party [i.e., the election of Sir de Villiers Graaf in place of Mr. Strauss] had fully vindicated the action taken at the time by members of the Conservative Party in leaving the U.P. Although "certain friendly differences" remained, every member of the Conservative Party would henceforth be free to speak and act for himself and to "decide about his own political destiny."

Later in the debate Mr. Blaar Coetzee, another former U.P. member who had joined the Conservative Party, crossed the floor of the House and announced that he was joining the Nationalist Party. Mr. Coetzee had won the North Rand seat from the Nationalists by a majority of 1,873 votes, the Nationalists themselves having won the seat from the U.P. in 1948 by a majority of 97 votes.

Mr. Coetzee was the second Conservative to join the Nationalists, following Dr. Jonker's decision to that effect in April 1956. The other four members who joined the Conservative Party after their expulsion from the U.P. were Mr. Frank Waring, Mr. Bailey Bekker, Dr. V. L. Shearer, and Mr. Arthur Barlow. Neither Mr. Waring nor Mr. Bekker gave any indication of their future plans, but Dr. Shearer stated that he would remain an Independent until the end of the present Parliament, when he was likely to retire from politics. It was expected that Mr. Barlow would take a similar decision, as he had previously announced that he would not seek re-election at the next general election.—(Cape Times) **(14870 B.)**

B. AUSTRIA. — Expulsion of World Peace Council.

The Austrian Government announced on Feb. 2 that it had banned all further activities of the Secretariat of the World Peace Council established in Vienna, and had closed down the Council's offices.

A statement by the Ministry of the Interior said that the Council had "recently reflected a partial attitude towards world events"; that the Secretariat, whose members were foreigners, had "tried to interfere in the internal affairs of other countries"; and that its activities were therefore "in contradiction to Austria's express desire to maintain peaceful relations with all countries," and "thus liable to compromise the interests of the Austrian State."

The headquarters of the World Peace Council had been moved to Vienna from Prague in 1954; had been installed in the then Soviet sector of the city; and, after the regaining of Austria's freedom under the State Treaty, had been allowed to continue as an association under Austrian law. The Communist-led World Federation of Trade Unions had been expelled by the Austrian Government in February 1956. (Wiener Zeitung) **(Prev. rep. 14703 C.)**

A. MOROCCO. — New Cabinet formed by Si Bekkai. - Creation of Consultative National Assembly.

The Prime Minister of Morocco, Si Bekkai, tendered his resignation on Oct. 26, 1956, but accepted the Sultan's request to form a new Government, the membership of which was announced on the following day. Unlike the previous Ministry, which was a coalition between the Istiqlal and P.D.I. (Democratic Independence) parties, the new Government was drawn entirely from the Istiqlal except for three Independent ministers, including Si Bekkai himself. The P.D.I. refused to take office in the new Government on the ground that the portfolios offered to it were not in proportion to the party's influence in the country.

In addition to Si Bekkai, five Ministers—all Istiqlal members—retained the portfolios they held in the former Cabinet: Dr. Balafrej (Foreign Affairs), Maître Driss M'Hamedi (Interior), Maître Abedlkrim Bendjelloul (Justice), Si Mohamed El-Fassi (Education) and Si M'Hamed Douiri (Public Works). The other Ministers in the new Government were Dr. Abderrahim Bouabid (Economic Affairs), Si Abdallah Ibrahim (Labour), Si Omar Ben Abdeljellil (Agriculture), Si Mohamed Zeghari (Defence), Maître Reda Guedira (Information), and Maître Rashid Mouline (Minister of State), of whom the first three were Istiqlal members and the three latter were Independents. No appointments were made to the Ministries of Religious Foundations (whose former Minister, Si Moktar Soussi, was appointed to the Sultan's Privy Council, a newly created body) or of Housing.

M. Bouabid, the new Minister of Economic Affairs, was formerly Ambassador in Paris, having been recalled to Rabat after the arrest of the five Algerian nationalist leaders [see page 15330, foot of second column]. The new Minister of Defence, Si Mohamed Zeghari, was Vice-Premier in the former Government.

The new Government issued a policy statement defining its immediate aims as the maintenance of public order, the launching of an economic plan to encourage the investment of Moroccan and foreign capital, and the preparation of general elections. The statement reaffirmed the "solidarity of the Moroccan people with the struggle of the Algerian people," denounced the arrest of the Algerian nationalist leaders, and said that the French action had gravely affected Franco-Moroccan relations.

Other recent developments in Morocco are described below under cross-headings:

Meeting of Consultative Assembly.

A Consultative National Assembly, consisting of 76 members nominated by the Sultan, met in Rabat on Nov. 12, 1956. The Istiqlal and the Moroccan Workers' Union (U.M.T.), which is closely allied with the Istiqlal, were represented by 10 members each; the P.D.I. by six; the Moslem religion by four doctors of Koranic law; and the Jewish community by a rabbi. The remaining members represented agriculture, commerce and industry, the legal and medical professions, and cultural, youth, and sports organizations. The members were selected so as to represent all areas of Morocco, including Tangier and the Spanish *enclave* of Ifni.

In his opening speech the Sultan described the Assembly as "a step toward the final objective which we shall strive to attain—a genuine representative system allowing the people to conduct public affairs within the framework of a constitutional monarchy." He added: "We shall lay the foundations of the democratic regime by setting up local assemblies in both towns and countryside which will permit the political education of our citizens and their participation in the control of their own affairs. It is our wish to build democracy from the bottom upwards."

M. Mehdi Ben Barka, a member of the Istiqlal executive, and M. Mahjoub Ben Seddik, general secretary of the U.M.T., were elected president and first vice-president of the Assembly respectively by large majorities. Almost all the other members of the Assembly's bureau were also Istiqlal members or sympathizers, no P.D.I. supporters being elected.

Relations with France.

A series of general strikes occurred during the first fortnight of October at Agadir, Mogador, and Safi as a protest against French troop movements, road barricades being erected in many areas. A provisional agreement was reached on Oct. 13, after talks between M. Guedira (then Minister of Defence) and General Cogny (Commander of the French forces), whereby all French troop movements were suspended. Prince Moulay Hassan, the Chief of Staff, and M. Guedira visited Paris on Oct. 14-15 for discussions with M. Bourgès-Manoury (Defence Minister) and M. Savary (State Secretary for Moroccan and Tunisian Affairs), as a result of which it was agreed that negotiations on military relations between the two countries should open on Nov. 12. The negotiations, however, were cancelled by the French Government on Oct. 22, following the Sultan's reception of Algerian nationalist leaders (see 15329 A).

The French Ambassador in Rabat, M. André Dubois, had tendered his resignation on Oct. 10, 1956, for personal reasons.

Legal Reforms.

Under a decree issued on Sept. 4, 1956, the caïds in the Berber areas were relieved of their judicial functions, which in future will be divided between cadis (religious judges), who will apply Koranic law in cases concerning personal status and inheritance, and civil magistrates, who will deal with criminal and commercial cases. The caïds, under a decree issued in 1930, had hitherto administered the customary law of the Berber tribes in these areas.

A new code of military law, based on that of France, was promulgated on Nov. 21. It provided *inter alia* for the trial by court-martial of all crimes committed in an area which had been declared to be under military law, this clause being put into effect immediately for the trial of those concerned in the Meknès riots during October (see 15329 A).

Diplomatic Appointments.

Dr. El Mehdi Ben Aboud, the first Moroccan Ambassador to the U.S.A., presented letters of credence to President Eisenhower on Sept. 6, while the new U.S. Ambassador to Morocco, Mr. Cavendish Cannon, presented his credentials to the Sultan on Oct. 6. Si Fatmi Ben Slimane, the former Premier-designate and Governor of Fez, was appointed Ambassador to Iraq on Nov. 5, 1956.—(Le Monde, Paris - Le Figaro, Paris) **(Prev. rep. Cabinet, 15110 A; 14946 A; 14677 A; Relations with France, 15329 A; Moroccan Diplomatic Appointments, 15135 C.)**

B. EASTERN EUROPE. — Budapest Meeting of East European Communist Leaders. - Joint Declaration.

Leaders of the Governments and Communist parties of the U.S.S.R., Bulgaria, Czechoslovakia, Hungary, and Rumania met in Budapest from Jan. 1-4, the Soviet Union being represented by M. Khrushchev and M. Malenkov; Bulgaria by M. Zhivkov and General Damianov; Czechoslovakia by M. Siroky and M. Novotny; Hungary by M. Janos Kadar and M. Ferenc Muench; and Rumania by M. Gheorghiu-Dej and General Borila. The principal subjects discussed were the Hungarian situation, the Soviet declaration of Oct. 30, 1956 (see page 15191, second column), the "Eisenhower doctrine" for the Middle East, and the international situation generally, as summarized below:

Hungary. The communiqué issued at the end of the meeting stated that all the participants had "expressed satisfaction over the progressive normalization of the political and economic situation in Hungary." They had welcomed the fact that "attempts to destroy the people's democratic regime and the Socialist achievements of the Hungarian people were smashed by the efforts of the Hungarian workers under the leadership of the Hungarian Revolutionary Workers' and Peasants' Government and with the assistance of the Soviet armed forces," thereby averting "the threat of a Fascist dictatorship in Hungary and the intrigues of counter-revolutionary and imperialist circles to turn Hungary into a hotbed of a new war in Europe."

The Soviet Declaration. It was unanimously agreed that the Soviet declaration of Oct. 30, 1956, "fully answers the interests of strengthening friendly relations between the Socialist countries on the basis of the Leninist principles of equality, respect for the interests of all peoples, non-interference in internal affairs, and proletarian internationalism."

The "Cold War." The communiqué noted that there had "recently occurred a significant deterioration of the international position caused by the actions of the aggressive Powers who are trying to bring about a return to the 'cold war.' Evidence of this is to be found in the Anglo-French-Israeli aggression against Egypt and in the actions of imperialist circles in Hungary."

The "Eisenhower Doctrine." The communiqué went on: "The sharpening of international tension is also caused by the actions of the United States, which is taking new measures to enslave the countries of the Middle East. Evidence of the colonial aspirations of the U.S.A. is given by the so-called 'Eisenhower doctrine' . . . The interference of American monopolist capital and its militaristic circles in the affairs of the Middle Eastern countries could lead to a new and serious deterioration of the situation in that region . . . The whole responsibility . . . for the consequences would fall upon the United States."

Conclusion. In conclusion, the communiqué said that "the Socialist States . . . are exerting every effort not to permit a return to the 'cold war' . . . [and] . . . are determined to foil the attempts of the aggressive forces to aggravate the international situation still further and to intensify the arms race and war psychosis."

The declaration ended with a call for disarmament, the banning of nuclear and thermo-nuclear weapons, and the establishment of a European collective security system.

(Le Monde, Paris - New York Times)

A. OBITUARY. — Admiral Horthy.

Admiral Nicholas Horthy, Regent of Hungary from 1920 to 1944, died in exile at Estoril (Portugal) on Feb. 9. He was 88 years of age.

Born at Kenderes on June 18, 1868, the son of a minor Hungarian nobleman, Horthy entered the Austro-Hungarian Navy, became adjutant to the Emperor Franz Josef, and commanded the battleship *Habsburg* and other warships prior to and after the outbreak of the First World War. He subsequently became C.-in-C. of the Austro-Hungarian Navy and Admiral of the Fleet, and in that capacity suppressed a naval mutiny at Cattaro in February 1918.

After the dissolution of the Dual Monarchy and the liquidation of the Austro-Hungarian Navy, Horthy assumed the leadership of a group of Nationalist officers who set up a counter-revolutionary "White" government at Szegedin in 1919 when the Communists under Bela Kun seized power in Budapest. After Bela Kun's regime had been overthrown by Rumanian military intervention, Horthy entered the capital at the head of the "White" forces with the original intention of restoring the monarchy. As, however, the restoration of the Habsburgs would have been resisted by Hungary's neighbours and was also vetoed by the Allies, Horthy was proclaimed Regent of Hungary in 1920 in default of a monarchical restoration. In the following year he prevented two attempts by the Emperor Karl II (the last Habsburg emperor) to seize the Hungarian throne.

As Regent and virtual dictator of Hungary for 24 years, Horthy was the head of a right-wing oligarchy drawing its support from the nobility, the landed gentry, and the officer class. His regime, however, was not fully totalitarian in character, parliamentary forms being preserved and non-Communist opposition parties being permitted. After Hitler's rise to power Hungary increasingly aligned herself with Nazi Germany, and subsequently adhered to the Anti-Comintern Pact (1939) and the Axis Pact (1941). In April 1941 Hungarian forces invaded Yugoslavia at the side of the Germans, while in December 1941 Hungary also took part in the invasion of the Soviet Union with Germany, Rumania, and Finland.

Though allied to Hitler, with whose help he hoped to regain the Hungarian territories ceded to Rumania, Czechoslovakia and Yugoslavia after the First World War, Admiral Horthy attempted—though with little success—to retain a certain independence of action and to prevent Hungary from becoming completely subservient to Nazi Germany. As a result, his relations with Hitler became increasingly strained as the war progressed. In 1943, after a meeting with Hitler, he refused to approve the text of a joint declaration pledging Germany and Hungary to fight Bolshevism "and its British and American allies" until final victory; in its place, he issued a statement declaring Hungary's intention to fight Bolshevism, but making no mention of Britain and America. Later in the same year he resisted a peremptory demand by Hitler that Germany should be allowed to use the Hungarian railways for the transport of troops and war material.

In March, 1944, Horthy was summoned to Hitler's headquarters and confronted with demands for full Hungarian military co-operation with Germany, including the placing of the Hungarian Army under German command. While he was in conference with Hitler, the *Wehrmacht* took over control of Hungary and remained as a virtual army of occupation until expelled by the Russians. Until the last few months of the war the Nazis were in effective control of the country, deporting hundreds of thousands of Hungarian Jews to the Auschwitz extermination camp and bringing strong pressure on Horthy to form a government of Hungarian "Arrow Cross" fascists. On Oct. 16, 1944, Horthy broadcast an appeal to the Allies for an armistice, but was immediately arrested by the Nazis and deported to Germany. For a short time thereafter the Hungarian Government was taken over by the "Arrow Cross" fascists headed by Ferenc Szalassi, who was subsequently executed.

During the last six months of the war Horthy was held by the Germans in protective custody, being eventually liberated by American troops from the castle at Weilheim (Bavaria) where he had been interned. For a short time after the war he was held in protective custody by the Americans as a possible witness for the prosecution in the Nuremberg trials, but was released in 1946.

Admiral Horthy had lived in retirement since the end of the war, first in the U.S. zone of Germany and since 1949 in Portugal.—(Times - Manchester Guardian - Observer - Le Monde, Paris) **(Prev. rep. Admiral Horthy, 8156 B.)**

B. IRISH REPUBLIC. — Gold Deposits discovered in County Monaghan.

It was announced on Jan. 30 by the Mining Corporation of Ireland that samples of high-grade gold ore had been discovered during prospecting and exploratory work at an old antimony mine near Clontibret, County Monaghan. The samples, which assayed one troy oz. of gold to the ton, were found at a depth of 60 ft., but until further drillings are carried out the extent of the gold-bearing ore will not be definitely known.

The Mining Corporation of Ireland, a subsidiary of a Canadian concern (Can-Erin Mines Ltd., of Toronto), has obtained concessions for exploring mineral resources in Counties Monaghan and Meath. Other subsidiary companies of Can-Erin Mines Ltd. are also prospecting in Counties Galway, Mayo, and Cork. (Irish Times, Dublin)

C. ATOMIC PHYSICS. — Discovery of New Method of producing Atomic Energy. - The Mu-Meson.

The discovery of a new and revolutionary method of producing atomic energy was announced on Dec. 28, 1956, by a team of scientists of the University of California headed by Dr. Luis A. Alvarez, and also by the U.S. Atomic Energy Commission in Washington. It was stated that the new process, called "catalyzed nuclear reaction," had been discovered accidentally during experiments with the Bevatron (atom-smasher) at the University of California's laboratories.

The essence of the discovery was that a certain type of atomic particle, known as a "negative mu-meson," has the power of pulling together the nuclei of a heavy hydrogen atom and a light hydrogen atom and fusing them into a helium atom. In this fusion, a little of the weight of the two hydrogen atoms is converted into a tremendous amount of nuclear energy. The new process involves neither uranium, as in the fission reaction, nor the very great heat necessary in the fusion (thermo-nuclear) reaction, as pointed out in the following explanation given by the *New York Times*:

"One method of obtaining nuclear reaction - the 'fission reaction' employed in the atom bomb - relies on the bombardment of atomic nuclei with other atomic particles. The other the 'thermo-nuclear reaction' of stars and the hydrogen bomb - depends upon the union or fusion of two light atomic nuclei to form one heavy nucleus at temperatures of about 1,000,000 degrees.

"The type described [i.e. the new method discovered by Dr. Alvarez and his colleagues] employs a medium-weight atomic particle (known as a negative mu-meson) as a catalyst to make a hydrogen nucleus fuse with a deuterium (heavy hydrogen) nucleus. This fusion occurs at low temperatures. One result is the formation of helium. Another is the release of prodigious amounts of energy, calculated at about 5,400,000 electron volts for each reaction.

"The mu-meson, which triggers this change of elements, is not used up as a catalyst but remains free to bring together other nuclei of hydrogen and deuterium, and to form more helium and produce more energy. But the catalyst is extremely short-lived . . . The mu-meson has a life of approximately one-millionth of a second, a period sufficient to let it catalyze no more than one or two fusions before it perishes . . ."

Commenting on the discovery, Dr. Alvarez pointed out that "if it is to become of practical importance, we would have to find a different catalyzing particle which has properties similar to the mu-meson but has a lifetime of at least 10 or 20 minutes." Such a particle, he explained, would permit millions of energy-producing reactions and, presumably, would release enough energy to operate electric generators, motors, and other heavy equipment. Dr. Alvarez (who had recently visited scientific laboratories in the Soviet Union) commented in this connexion that "Russian scientists have reported evidence that such a particle does exist in cosmic rays."—(New York Times)

D. SWEDEN - SOVIET UNION. — Soviet Admission of Death of Mr. Raoul Wallenberg.

The Soviet Government informed the Swedish Ambassador in Moscow on Feb. 7 that Mr. Raoul Wallenberg, a former Swedish diplomat who had been missing since the Red Army entered Budapest in January 1945, had died from cardiac thrombosis in the Lubianka prison in Moscow. While in Budapest Mr. Wallenberg had carried out extensive rescue work among Hungarian Jews towards the end of the war, which was believed to have saved the lives of about 20,000 people. He disappeared soon after the entry of Soviet troops, and in spite of a great number of *démarches* by the Swedish Government the Soviet authorities had for many years denied all knowledge of his fate.

During the visit to Moscow by the Swedish Prime Minister, Mr. Erlander, in March-April 1956, the Soviet Government had agreed, however, in the light of the material collected by the Swedish Government, to make further investigations. In finally admitting the death of Mr. Wallenberg, and taking responsibility for it, the Soviet Government said that his death had been reported to the former Minister of Security, M. Abakumov, who, however, had not communicated it to the Ministry of Foreign Affairs. Confirmation of Mr. Wallenberg's death had now been obtained in a report discovered in the hospital archives of the Lubianka prison, from which it also appeared that his body had been cremated. The Soviet Note added that Abakumov had been executed in 1954 for his "criminal activities" and for being a "tool of Beria."

A spokesman of the Swedish Foreign Ministry stated on Feb. 7 that Mr. Wallenberg was 35 at the time of his death, and that cardiac thrombosis at that age was rare "unless the patient had been starved or subjected to undue strain." (Svenska Dagbladet, Stockholm - Times) **(Prev. rep. 14811 A.)**

FEBRUARY 16—23, 1957

A. KASHMIR. — Pakistani Complaint to Security Council against Kashmir's Integration with India. - Demands for Kashmir Plebiscite and Despatch of U.N. Force to Kashmir. - Security Council Discussions. - Speeches by Mr. Firoz Khan Noon and Mr. Krishna Menon. - Security Council Resolution for Plebiscite in Kashmir under U.N. Auspices. - Formal Integration of Kashmir with India. - Anti-Indian Demonstrations in Pakistan. - Pakistani Warnings of "Danger of War."

The Foreign Minister of Pakistan, Mr. Firoz Khan Noon, requested the president of the U.N. Security Council on Jan. 2 to convene a meeting of the Council "at a very early date" to resume consideration of the Kashmir question, in view of the forthcoming entry into force of the State's new Constitution on Jan. 26 and the integration of Kashmir with India as from that date (see 15265 A). The Security Council had last discussed Kashmir on Dec. 23, 1952, when it urged the Indian and Pakistani Governments to negotiate on demilitarization under the auspices of Dr. Frank Graham, U.N. representative for India and Pakistan (see 12778 A).

Direct negotiations, Mr. Noon stated in his letter, had failed to produce a satisfactory solution, and, in the light of recent statements by Mr. Nehru, the Pakistani Government had been forced to the conclusion that the continuance of negotiations held out no prospect of a settlement. The Kashmir Constituent Assembly, "in collusion with the Indian Government," had taken steps regarding the future disposition of the State which were "in direct contravention" of the Security Council's resolution of March 30, 1951 (see 11457 A), and the effect of these steps and of the failure of direct negotiations had been to create a "most deleterious" situation.

After alleging that a "reign of repression" prevailed in that part of Kashmir under Indian occupation, and declaring that over half a million Kashmiri refugees in Pakistan were becoming increasingly restive and wanted to "return to the State without further delay to fight for their rights," Mr. Noon's letter continued: "The Indian Prime Minister's declaration that he is now opposed to a plebiscite, accompanied by the steps that are being taken by the Government of India unilaterally to 'integrate' the State with India, in disregard of the assurances given by that Government to the Security Council, and the mounting unrest both inside and outside Kashmir, have combined to create an explosive situation which constitutes a serious threat to peace in the area." It was therefore "essential that early action should be taken to implement the 1948 and 1949 resolutions of the U.N. Commission for India and Pakistan (U.N.C.I.P.) in favour of a free and impartial plebiscite under U.N. auspices."

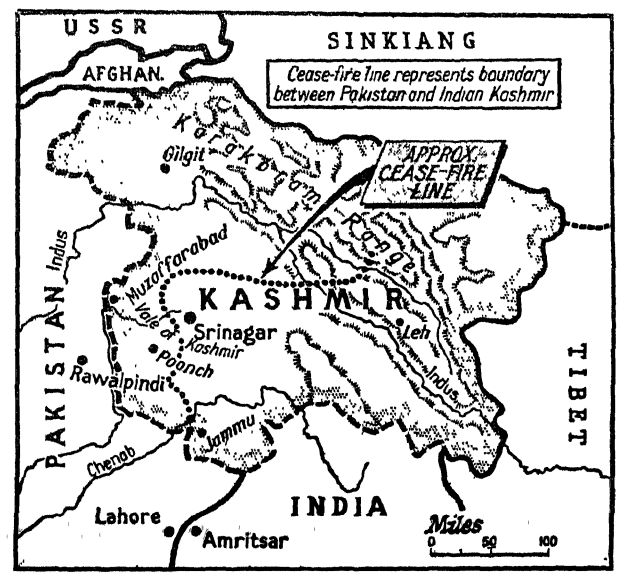
The Security Council Discussions. - Speeches by Mr. Firoz Khan Noon and Mr. Krishna Menon.

When the Security Council met on Jan. 16 to consider the Pakistani complaint, Mr. Firoz Khan Noon proposed that all Indian and Pakistani forces should be withdrawn from Kashmir and that a U.N. force should be sent there to enable a plebiscite to be held.

Mr. Noon said that the direct negotiations initiated in 1953 had failed because of "the intransigent attitude adopted by the Government of India and their unwillingness to honour their international commitments," and that the Indian Government were now taking steps to integrate Kashmir into the Indian Union "in defiance of the Security Council's directives and their own freely accepted international obligations." On the partition of the sub-continent in 1947, he recalled, it had been agreed that the Princes, in deciding on the accession question, should pay regard to the communal composition and the wishes of their peoples and to the geographical location of their States. In its dealings with Junagadh and Hyderabad, India had maintained that a State with a Hindu majority must accede to India even if its Moslem ruler did not wish to do so. In the case of Kashmir, however, 77 per cent of the population of which was Moslem, the Indian Government had accepted "a spurious offer of accession" from the Hindu Maharaja, and Indian forces had been sent to the State to "subjugate the population."

In their reply to the Maharaja's offer of accession, and in telegrams of Oct. 31 and Nov. 8, 1947, to the Pakistani Government [Mr. Noon went on], the Indian Government had promised to settle the question of the accession of Kashmir by means of a plebiscite under U.N. auspices "as soon as the invader had been driven from Kashmiri soil and law and order restored." After the dispute had been referred to the U.N., however, the Indian Government had "launched a major offensive" in Kashmir in April 1948, as a result of which 500,000 Moslems from Kashmir had sought refuge in Pakistan, while the Pakistani Government had been "compelled to move a limited number of troops into the State." The Commission appointed by the Security Council had brought about an agreement between India and Pakistan, embodied in its resolutions of Aug. 13, 1948, and Jan. 5, 1949 [see 9661 A; 9757 A]. These had provided for (i) a cease-fire; (ii) a truce agreement, under which Pakistani tribesmen and troops and the bulk of the Indian forces would be withdrawn; (iii) a plebiscite under the supervision of a Plebiscite Administrator. In contravention of these resolutions, India had made the withdrawal of her troops conditional on the disarming of the "Azad Kashmir" forces, and during 1949-52 had rejected 11 different proposals for demilitarization, all of which had been accepted by Pakistan.

On Aug. 20, 1953 [Mr. Noon continued] the Indian and Pakistani Prime Ministers had agreed on the holding of a plebiscite and the appointment of a Plebiscite Administrator [see 13126 A]. Soon afterwards, however, India had broken off negotiations on the grounds that Pakistan had accepted U.S. military aid and had joined regional defence pacts. "In essence India has been saying, 'If you want us to fulfil our obligations under the international agreement, you must follow our policy as to defensive pacts,'" Mr Noon observed. "Here I should like to say that if the objection of India to these pacts is genuine and India fears that Pakistan may attack her, then we make this offer to India—hold a plebiscite, and we will enter into a 'no-war' pact with India as soon as the plebiscite is held. I go further. The moment Mr. Nehru agrees to honour the pledges he has given to the Security Council, to the world, and to the people of Kashmir and holds a plebiscite, we are willing to enter into a pact which will say that an attack on India will be an attack on Pakistan. What more does India want by way of an assurance from us that our intentions are friendly?"



(*The Economist*)

The accession to India by the "puppet Constituent Assembly," Mr. Noon declared, was "wholly devoid of any legal effect." India had assured the Security Council that the Assembly could take no decision on the accession question, and this had been reaffirmed by the Security Council's resolution of March 30, 1951 [see 11457 A]. The Assembly, moreover, did not represent "Azad Kashmir," and all its members had been returned unopposed because the population had "boycotted the elections." Even so, the Assembly had not voted in favour of accession until after the State Premier, Sheikh Abdullah, had been imprisoned by the present regime.

Mr. Noon went on to allege that Kashmir was "virtually an armed camp" occupied by 82,000 Indian soldiers, and that a "reign of terror" prevailed. In support of his allegations he referred to extracts from letters said to have been written by Miss Mridula Sarabhai, a former assistant secretary-general of the All-India Congress Committee. [Miss Sarabhai subsequently protested to the president of the Security Council, alleging that Mr. Noon had misquoted her letters, taken extracts out of their context, and inserted words and sentences not in the original.] Civil liberties were "extinct" and corruption and nepotism were "rampant," Mr. Noon declared, with the result that the people of Kashmir were "ripe for revolution"; the refugees in Pakistan wanted to launch "a mass movement inside the State with a view to winning for the Kashmiris their right to self-determination"; and the tribesmen on Pakistan's north-west frontier were also "impatient." Referring to Sardar Amir Azam Khan's allegation that Indian troops were massed on the border [see below, page 15384], Mr. Noon said: "The excuse that Mr. Nehru gives is that he fears an attack from Pakistan, whereas we have not sent one soldier to our border. The fact that he is afraid of a war breaking out because of the Kashmir problem should assure the Security Council and the world that the problem is peaceful on the surface; but if the Security Council closes the door on a peaceful settlement, we cannot say what will happen."

In view of this grave situation, the Pakistani Government requested the Security Council to take action on the following lines:

(1) To "call upon India to refrain from accepting the change envisaged by the new Constitution adopted by the so-called Constituent Assembly."

(2) Under Article 37 (2) of the U.N. Charter, to "spell out the obligations of the parties under the terms of the international agreement for a plebiscite as embodied in the U.N. resolutions." [Article 37 (2) empowers the Security Council to act "if it deems that the continuance of a dispute is likely to endanger the maintenance of international peace and security."]

After specifically proposing that the Security Council should "call upon the parties to withdraw all their troops from the State, and also ensure that the local forces placed under the Security Council and left behind are suitably reduced, if not disbanded altogether," Mr. Noon concluded. "The functions of protecting the State and ensuring internal security should be entrusted by the Council to a U.N. Force which should be introduced into the area at once. Let all other forces Indian, Pakistani, and local be disbanded, and non-Kashmiri nationals even in the police forces be removed. It is further requested that an early and firm date be fixed for the induction of an officer of the Plebiscite Administrator. The situation may be saved even at this late stage, but only by these means."

The Indian Minister of State, Mr. Krishna Menon, replied to Mr. Noon on Jan. 23-24. In a speech lasting 7 hours and 48 minutes, the longest in the history of the U.N., he maintained that the real issue was the Pakistani invasion of Kashmir, and denied that the introduction of the new Constitution represented any fundamental change in the situation.

Mr. Krishna Menon declared that the only problem confronting the Security Council was the Indian Government's complaint about Pakistani aggression, which had been brought as long as nine years ago. India could then have stated that if the invading forces were not withdrawn within a certain time, she would retaliate; instead, she had made "a friendly request" that Pakistan should prevent her nationals from taking part in the fighting in Kashmir, but even that request was still pending before the Security Council. In defiance of the U.N.C.I.P.'s resolutions, Pakistan had introduced new troops into the area, and although India had since withdrawn a considerable part of her forces from that part of Kashmir under her administration, there were still 45 Pakistani battalions in "Azad Kashmir," which had a population of only 500,000. India had not asked for the condemnation of Pakistan, but simply requested that "people who were committing murder should not be allowed to go on with it." "If the Security Council takes the view that moderation in these matters is a misdemeanour," Mr. Menon added, "then I am afraid that we must plead guilty."

Kashmir's accession to India in 1947, Mr. Menon maintained, had been both legal and final, as the Indian Constitution contained no provision for the secession of a State. It had been the Pakistani invasion which had forced the Maharaja to ask for Indian protection. India had used no force to induce this, nor had she tried to inveigle Kashmir into any kind of accession; the only force which she had used had been "to repel the invader."

After declaring that India was under a moral commitment to consult the wishes of the people of Kashmir, Mr. Menon denied that she was under any legal commitment to Pakistan or the international community to hold a plebiscite. The U.N.C.I.P.'s resolution of Aug. 13, 1948, had provided (*a*) for the conclusion of a truce agreement, under which Pakistani troops and nationals would be withdrawn from Kashmir and the unity of the State restored; (*b*) for subsequent consultations between India and Pakistan; and (*c*) for the U.N.C.I.P. to determine fair and equitable conditions whereby the free expression of the will of the people of Kashmir would be assured. The conditions laid down for a truce agreement, however, had not been fulfilled by Pakistan, which had not withdrawn her troops, and the Indian Government therefore did not consider themselves bound by the resolution.

Turning to the position of the Kashmir Constituent Assembly, Mr. Menon pointed out that every State which acceded to India had had the right to decide for itself what subjects, other than external affairs, defence, and communications, it wished to hand over to the Central Government. The majority of the former States had decided that any special decision of this kind would be "a waste of time," but in Kashmir the powerful National Movement had decided after partition to have its own Constituent Assembly. Denying that the elections to the Kashmir Constituent Assembly had been "rigged" or that the Assembly was a "puppet" body, he recalled that at the time of its election Opposition candidates had been put forward by orthodox Hindu sections of the community, but had then been withdrawn for fear of losing their deposits. The candidates who were returned unopposed had been participating in the National Movement for a very long time.

Refuting Mr. Noon's description of the Indian troops in Kashmir as "forces of occupation," Mr. Menon said that Kashmir was the northern extremity of India, and the Indian Army was there for the protection not only of Kashmir but of India herself. In this connexion India had to take into account that divisions of the Pakistani Army were located five, 10, or 20 miles from the Indian border, and that there had been serious violations of the cease-fire by Pakistan.

Continuing, Mr. Menon denied that India was taking steps to integrate Kashmir into the Indian Union on Jan. 26, and said that an "atmosphere of crisis" had been created in the Security Council as if that date were "some kind of D-day." In reality, the Constituent Assembly's task had not been to decide on the question of Kashmir's accession to India, but to frame a Constitution for the State in pursuance of the Maharaja's act of accession. The clause in the Constitution under which Kashmir became an integral part of the Union of India had come into force in November 1956, and was therefore "past history." There was thus no "zero hour" on January 26, and all that would happen on that date would be that the Constituent Assembly would dissolve itself.

Resuming his speech on Jan. 24, Mr. Menon said that Pakistan, which had been "threatening war," had very considerable quantities of military equipment at her disposal and had concentrated troops on the Indian border. The so-called "Azad Kashmir" forces were on a par with Pakistani troops and were commanded by Pakistani officers, whilst airstrips and landing grounds were being enlarged to accommodate the latest types of jet aircraft.

Contrasting conditions in the Indian and Pakistani areas of Kashmir, Mr. Menon stated that some 450,000 Moslem refugees had returned to the Indian area from Pakistan; he also quoted from a memorandum which he claimed had been submitted to the Pakistani Constituent Assembly by the Kashmir Moslem Conference and which protested against terrorization of the people in "Azad Kashmir," introduction of martial law, arrests without warrant, and ruthless shootings. He admitted that in the Indian area some 49 people had been detained without trial, but said that a good many cases related to matters which had nothing to do with political crimes, and that bringing them to trial had not been feasible because the Kashmir Government would then not have been able to withold evidence "involving other countries besides Pakistan." In conclusion, Mr. Menon protested at the fact that the resolution before the Council [see below] had been introduced before he had finished making his statement to the Council.

Security Council's Resolution for Kashmir Plebiscite under U.N. Auspices.

The following resolution, reaffirming the view that the future of Kashmir should be decided by a plebiscite conducted under U.N. auspices, was submitted on Jan. 24 by Australia, Colombia, Cuba, the United Kingdom, and the U.S.A.:

"The Security Council, having heard statements from the representatives of the Governments of India and Pakistan concerning the dispute over the State of Jammu and Kashmir;

"Reminding the Governments and the authorities concerned of the principle embodied in its resolutions of April 21, 1948, June 3, 1948, March 14, 1950, and March 30, 1951 (see 9661 A; 10692 A; 11457 A), and the U.N.C.I.P. resolutions of Aug. 13, 1948, and Jan. 5, 1949, that the final disposition of the State of Jammu and Kashmir will be made in accordance with the will of the people expressed through the democratic method of a free and impartial plebiscite conducted under the auspices of the United Nations;

"Reaffirms the affirmation in its resolution of March 30, 1951;

"Declares that the convening of a Constituent Assembly as recommended by the General Council of the All-Jammu and Kashmir National Conference, and any action that Assembly may have taken or might attempt to take to determine the future shape and affiliation of the entire State or any part thereof, or action by the parties concerned in support of any such action by the Assembly, would not constitute a disposition of the State in accordance with the above principle; and

"Decides to continue its consideration of the dispute."

Sir Pierson Dixon (U.K.) expressed regret that the Kashmir question was again before the Council, and stressed Britain's friendship and "close relationship" with both India and Pakistan. As regards the question of the Constituent Assembly in Kashmir, Sir Pierson pointed out that in 1951, when the Security Council was considering this question, it was decided that one of the Assembly's functions would be to consider the future shape and affiliation of Kashmir, and that the final disposition of its future was to be made in accordance with the wishes of the people in a free and impartial plebiscite under U.N. auspices. At that time both Sir Benegal Rau and Mr. Dayal, of India, had affirmed to the Council that the Constituent Assembly was not intended to prejudice the issue before it. However, he [Sir Pierson] had understood Mr. Krishna Menon to say that some provisions of the Constitution drawn up by the Constituent Assembly had come into effect on Nov. 17, 1956, and that other provisions were expected to come into effect on Jan. 26, 1957. Moreover, Mr. Menon had said that Article 3 of the Constitution, wherein it was stated that Kashmir was an integral part of the Indian Union, was already in effect. It was therefore natural that the Pakistani representative should have sought reassurances from the Security Council on this question.

With regard to Mr. Menon's complaint that the Four-Power Resolution had been circulated before he had completed his statement to the Security Council, Sir Pierson explained (on behalf of the sponsors of the resolution) that he had thought that Mr. Menon's statement of the previous day was an exposition of India's position on the constitutional issue involved. Moreover, there was special reason for "expedition" in considering the matter lest—as the Pakistani representative feared—developments should take place shortly to prejudice the case.

Dr. Ronald Walker (Australia) felt that it was necessary to introduce the resolution before the Security Council "because of the march of the calendar." Australia had followed the Kashmir problem with "great anxiety and concern" in view of her partnership with India and Pakistan in the Commonwealth, and was "not eager to take sides." He did not think it would be desirable for the Security Council to take up in detail the various charges and counter-charges relating to the past. Whatever varying interpretations had been placed at various times by India and Pakistan on the conditions, the Security Council had clearly expressed itself in favour of the principle of a free plebiscite in Kashmir, but it was still not quite

clear where India stood on this today. It was also not clear to him what was to happen in Kashmir from the constitutional standpoint on Jan. 26, 1957. To what extent did the coming into force of a Constitution on that date introduce a new change in the status of the State? And would a new obstacle thus be created to the implementation of the principle of a plebiscite? If this was so, it would be "inimical" to the resolutions passed by the Security Council. He therefore felt that, the Council before going any further, should draw the attention of all parties to the principles embodied in its previous resolutions, and for this reason, Australia had co-sponsored the resolution before the Council.

Mr. Cabot Lodge (U.S.A.) said that the Security Council was facing "an unfortunate difference of opinion" between two nations whose friendship the U.S.A. highly valued. The main concern of the Security Council was not to aggravate the situation, and the U.S.A. trusted that the parties concerned would also do nothing in this direction. After recalling the Security Council's resolution of March 30, 1951, Mr. Lodge said that "an important new element," of which the Council must take account, had been raised by the complaint that the Kashmir Constituent Assembly was dealing with the question of affiliation of the State. The U.S.A. still adhered to the "correct position" taken by the Security Council resolution of March 30, 1951.

Dr. Tsiang (Nationalist China), who referred to the Kashmir question as an "Asian Alsace-Lorraine," said that a special feature of the case was that both parties had agreed to a plebiscite even before coming to the Security Council. A plebiscite, which had not only been agreed upon by the parties but had also been unanimously supported by the Security Council, meant the exercise of the Charter right of self-determination. In his opinion, therefore, all States subscribing to the Charter must accept a plebiscite, and neither India nor Pakistan should be "too meticulous" about the conditions.

Hr. Gunnar Jarring (Sweden) said that Sweden, as a newly-elected member of the Security Council, was not committed to any particular stand taken by the Council in the past on this question. He felt, however, that the two parties must refrain from any military measures, that the present cease-fire must be maintained, that force must not be used, and that no measures should be definitely taken to incorporate Kashmir into either of the States concerned. Though Sweden was prepared to vote for the Four-Power resolution, the legal issues involved required further study, especially in the light of the statements of Mr. Menon and Mr. Noon.

M. Sobolev (U.S.S.R.) charged that the Kashmir question had been "inflated" by certain Powers which were guided by their own interests in "infiltrating" into a highly important strategic region. The people of Kashmir had in 1952 elected a Constituent Assembly which had confirmed the accession of the State to India; thus the Kashmir question had been "solved by the people of Kashmir, who consider themselves an integral part of India." The resolution now before the Security Council did not take this fact into account but was based on the Council's resolution of March 30, 1951, which the U.S.S.R. had not been able to support because it had been rejected by one of the parties. Moreover, the new resolution did not take into account the "radical changes" that had occurred in Kashmir. The Soviet delegation therefore saw no useful purpose in passing another resolution unacceptable to one party, but believed that the Security Council should recommend both parties to settle their differences by negotiations "without foreign interference."

M. Georges-Picot (France) supported the resolution as a "stop-gap measure," on condition that it should not be viewed in such a way as to prevent the Security Council from devoting later consideration to the question. Speeches in support of the resolution were also made by **Dr. Nuñez-Portuondo** (Cuba), **Señor Carlos Duarte** (Colombia), **Mr. Hashim Jawad** (Iraq), and **General Carlos Romulo** (Philippines).

Mr. Krishna Menon declared that India would not consider the new resolution as binding upon her, and that its only effect would be to "re-agitate" the question. "To record another resolution which reaffirms something that one party has rejected," he added, "is not calculated to promote the purposes of the U.N. or the exercise by the Security Council of the tasks entrusted to it."

The resolution was adopted by 10 votes to nil, the Soviet Union abstaining. Discussion of the Kashmir question was resumed on Jan. 30, when Mr. Noon replied to Mr. Menon's speech.

Mr. Noon claimed that such issues as the question of accession or of aggression had already been disposed of by the Council in 1948 and 1950, and that the problem was "how to go forward," as delay in the holding of a plebiscite was fraught with grave dangers. The only international obligations undertaken by India and Pakistan in regard to Kashmir were embodied in the U.N.C.I.P.'s resolutions of Aug. 13, 1948, and Jan. 5, 1949, and it was the Council's duty to ensure that this agreement was implemented without further delay. The crux of the matter was the need to secure the demilitarization of Kashmir, which should precede the holding of a plebiscite. Pakistan was only too anxious to withdraw her forces, but "the question that has been engaging the attention of the Security Council for the last eight years is how to persuade the Government of India to do what it has agreed to do."

Mr. Noon went on to reject Mr. Menon's contention that the Maharaja's "purported accession" in 1947 was both legal and final, and maintained that India, by accepting the resolution of Jan. 5, 1949, had thereby accepted that the status of Kashmir remained to be decided by a U.N. plebiscite. Now the Council was told that India, by adopting in 1950 a Constitution which made no provision for the secession of a State, had made herself powerless to honour her commitments. "Can that be pleaded before an international body?" Mr. Noon asked "Suppose India, under a Constitution framed by herself unilaterally, incorporated the State of Texas into India, what would be the legal implication? Would it be binding on the people of Texas?"

Refuting Mr. Menon's denial that India had ever undertaken to abide by the results of a plebiscite, Mr. Noon maintained that Mr. Nehru had pledged himself to do so in a letter of Oct. 31, 1947, to the then Prime Minister of Pakistan. Why had India agreed to the appointment of a U.N. Plebiscite Administrator. Mr. Noon asked, if the Indian Constitution forbade the carrying-out of the terms of a plebiscite? Did Mr Menon want the Council to believe that his Government had all along been consciously "misleading everyone with regard to her true intentions?" Pakistan completely agreed that a plebiscite was not to take place until demilitarization had been carried out, but "to date the ingenuity of the Indian side has been entirely concentrated on avoiding this demilitarization." Mr. Menon had argued that because no truce agreement had been reached, the obligation to hold a plebiscite failed; but [Mr. Noon continued] "in seeking to avoid the obligation to hold a plebiscite, Mr. Menon would have the Council overlook the prior obligation to secure the demilitarization of the State." In conclusion, the Pakistani Foreign Minister repeated his appeal to the Council to resolve the deadlock over demilitarization by sending a U.N. Force to Kashmir.

Mr. Krishna Menon replied to Mr. Noon's speech on Feb. 8.

Mr. Menon rejected Mr. Noon's contention that Kashmir's accession to India had been brought about "by force and fraud," and declared that India had used force only against the 73,000 tribesmen who had entered Kashmir "for rapine and plunder." India had referred the question to the Security Council and had suggested a plebiscite in order to avoid spreading the conflict, but this did not mean that Kashmir was a disputed territory. The issue remained exactly what it had always been—viz., the question of aggression and its consequences to the people of Kashmir.

Mr. Menon denied that India had violated any international obligations, and emphasized that legally, if an offer was rejected, that offer was no longer valid. When Lord Mountbatten had asked Mr. Jinnah to arrange a plebiscite, Mr. Jinnah had rejected the offer, whilst Mr. Liaquat Ali Khan had rejected a similar offer by Mr. Nehru. India had then complained to the Security Council. Pakistan's only answer had been a denial, which had subsequently been disproved, and the Indian complaint of aggression therefore still existed. The only engagements by which India was bound, Mr. Menon maintained, were the U.N.C.I.P.'s resolutions of Aug. 13, 1948, and Jan. 5, 1949, both of which India had accepted and Pakistan had at first rejected. Ever since these agreements were concluded, he added, Pakistan had "consistently, repeatedly, continuously, and without interruption" violated the cease-fire.

Pakistan's obligation to withdraw her troops was unconditional, Mr. Menon went on, and nothing further could be considered until Pakistan had "vacated aggression." Pakistan, however, had not yet carried out her obligation to withdraw from Kashmir all tribesmen and Pakistani nationals who had entered the State for the purpose of fighting. She had "no business whatsoever in Kashmir," and the one and only duty she had, and had failed to discharge, was "to take these men out fully and completely."

The Security Council's resolution of Jan. 5, 1949, Mr. Menon pointed out, had laid down that a plebiscite should be held "when it shall be found by the U.N.C.I.P. that the cease-fire and truce arrangements set forth in Parts 1 and 2 of the Commission's resolution of Aug. 13, 1948, have been carried out and arrangements for a plebiscite have been completed." The U.N.C.I.P. had also given India the following assurances: (1) The responsibility for the security of the State rested with India; (2) the sovereignty of the Kashmir Government over the entire territory of the State should not be brought into question; (3) the plebiscite proposals should not be binding upon India if Pakistan did not implement Parts 1 and 2 of the resolution of Aug. 13; (4) there should be no recognition of the "so-called Azad Kashmir Government"; (5) the territory occupied by Pakistan should not be consolidated; (6) the administration of evacuated areas in the north should revert to the Kashmir Government, and their defence to the Indian Government; (7) the "Azad Kashmir" forces should be disbanded and disarmed; (8) Pakistan should be excluded from all affairs of Kashmir. All these assurances had been known to Pakistan before she had accepted the resolution of Jan. 5, 1949.

Mr. Menon declared that it was for the Council to consider whether any step could be taken when the first condition—maintenance of the cease-fire—had not been carried out. India had not introduced into Kashmir any more troops than had been there when the agreement was signed. The default, he alleged, had been on the other side, and it was a default that went to the root of the agreement.

The Indian Government, Mr. Menon concluded, had given a solemn undertaking that it would not move one gun or fire one shot which would violate the cease-fire agreement. At the same time it was their duty to defend their country, in view of the campaign of "incitement to war" which was being carried on in Pakistan. They could not get away from the fact that India had been "invaded," and there could be no solution to the problem except by recognizing this "original sin." India wanted to reach a settlement, but this could not be found on grounds that she had "committed a wrong."

Security Council's Resolution for Swedish Representative to consult Indian and Pakistani Governments.

When the Security Council met again on Feb. 15, a resolution was submitted on behalf of the United Kingdom, the U.S.A., Australia, and Cuba, calling upon Hr. Jarring (the Swedish representative on the Council) to consult the Indian and Pakistani Governments on the dispute and to report back not later than April 15, 1957.

The resolution asked Hr. Jarring "to examine with the Governments of India and Pakistan proposals which, in his opinion, are likely to contribute to the achievement of demilitarization in Kashmir or to the establishment of other conditions for progress toward the settlement of the dispute, having regard to the previous resolutions of the Security Council and of the U.N.C.I.P., and bearing in mind the statements of the representatives of the Governments of India and Pakistan, and the proposal for the use of a temporary U.N. force." After authorizing Hr. Jarring to visit the sub-continent for this purpose, the resolution requested him to report to the Council as soon as possible, but not later than April 15. It invited the two Governments to co-operate with Hr. Jarring in his efforts, and asked Dr. Hammarskjöld, the U.N. Secretary-General, and Dr. Graham, the U.N. representative for India and Pakistan, "to render such assistance to him as he may request."

Indian and Pakistani Reactions to Security Council Resolution. - Statements by Mr. Nehru, President Mirza and Mr. Suhrawardy.

Commenting on the Security Council's resolution, Mr. Nehru declared on Jan. 25 "that the [Kashmir] Constituent Assembly has finished its work, dissolves itself tonight, and disappears. There is nothing more to be done by it. The position remains as it is now." He said that he was "deeply pained" by the manner in which the resolution had been sponsored and passed, adding that it was "very extraordinary that the resolution should be sponsored before really hearing either side."

In a speech in Madras on Jan. 31, Mr. Nehru said: "It seems to us that this serious problem, which has existed for nine years now, was dealt with very casually in the Security Council." India, he recalled, had agreed to a plebiscite "on certain conditions and in a certain context of events." The very first condition was the withdrawal of Pakistani forces from Kashmir, yet they still had not been withdrawn. After saying that any such conditional offer could not last "for ever and ever," Mr. Nehru declared: "If I am convinced that I have not honoured any international commitment, I will either honour it or resign my Premiership . . . I have no doubt in my mind that under fair, peaceful conditions, and in conditions where religious fanaticism is not allowed play, a great number of people in Kashmir would decide for India in a plebiscite. We have always stressed that elections or a plebiscite must be on political and economic issues. We do not want to have communal riots there and call it a plebiscite, or a tearing campaign based on religious bigotry and rousing people's passions . . . I do not want Kashmir in the name of a plebiscite to be the scene of a fraticidal war which would spread to India . . ."

Speaking in Delhi on Feb. 3 Mr. Nehru declared that India would "not tolerate the stationing of any foreign troops in the smallest corner of her territory." The U.N.C.I.P., he pointed out, had never considered the introduction of U.N. forces but had recommended the complete withdrawal of Pakistani forces from Kashmir, whilst recognizing India's right to station troops there. There was no parallel between the introduction of a U.N. force into Egypt and the proposal to send one to Kashmir, as the circumstances were "altogether different" and the U.N. force had gone to Egypt with the Egyptian Government's consent.

On the other hand, President Mirza of Pakistan described the U.N. resolution on Jan. 26 as "a symbol of international good sense and moral justice" which had "vindicated the stand taken by Pakistan and protected the people of Kashmir from an imminent conspiracy to perpetuate their enslavement." The Prime Minister of Pakistan, Mr. Suhrawardy, declared on the same day that the resolution had made clear that "any attempt by India to pursue its declared intention of integrating Kashmir with India will be an unfair and unjust step, a breach of its international commitments, and a defiance of the United Nations."

The President of "Azad Kashmir," Sardar Abdul Qaiyum Khan, stated on Jan. 26 that nothing short of a "deadline" for the plebiscite would satisfy his Government. He added: "If the Security Council fails to enforce its resolution, why should Pakistan prevent 'Azad Kashmir' from resuming the freedom struggle against India?"

Entry into Force of Kashmir Constitution. - Formal Integration of Kashmir in Indian Union.

The Constitution of Kashmir came officially into force at midnight on Jan. 25 with the formal dissolution of the Constituent Assembly.

Addressing the final session of the Assembly, the Prime Minister of the State (Bakshi Ghulam Mohammed) claimed that Kashmir's accession to India in 1947 had been "decisive and complete in all respects," and that the people of Kashmir had "never been in doubt in regard to the finality of this association." When in 1951 it was proposed to invest the Assembly with supreme authority to determine Kashmir's future shape and affiliation, "the Security Council passed a resolution asking us not to proceed with the work of Constitution-making . . . Since we felt that such an injunction carried the suggestion of restricting our sovereign rights, we went ahead, knowing that the course we were pursuing was based upon the sanction of our people and the compulsion of circumstances. One of the factors responsible for our decision to convene the Constituent Assembly was the failure of the Security Council to undo the wrong of aggression perpetrated by Pakistan upon the people of the State, of which she continues to enjoy the fruit. No amount of legal quibbling will wipe away the memory of death and destruction which the people of Kashmir have suffered as a result of that invasion. I do not wish to sit in judgment upon the conduct of various Powers, but it strikes one as odd and extraordinary that while those Powers have hastened to take notice of aggression in other parts of the world, they have hesitated to take a similar attitude in regard to Kashmir. Aggression is aggression, whether it takes place in Korea, Egypt, or Kashmir . . . We would be perfectly justified if we regarded their views as biased and totally divorced from considerations of justice and equity so far as this issue is concerned."

The members of the Assembly took the oath of loyalty to the new Constitution on Jan. 28, when they first met as members of the provisional State Legislature which will function until general elections are held. The Legislature adopted on Jan. 30 a Bill empowering the Head of State to determine the number of constituencies into which the State should be divided, and providing for the appointment of an Election Commissioner and of a tribunal to hear election petitions.

Sheikh Abdullah's Letter to Security Council.

The Pakistani High Commissioner's Office in London released on Jan. 25 the text of a letter, stated to have been sent by Sheikh Abdullah from prison to the president of the Security Council, which denounced the Constituent Assembly's ratification of Kashmir's accession to India as "a fraud upon the people, a betrayal of their right to self-determination, and a gross breach of international commitments," and which declared that only a free plebiscite could "end the agony of the people of Kashmir and eliminate a grave danger to peace." In this letter, which was stated to have been hand-written and smuggled out of prison, Sheikh Abdullah also alleged *inter alia* that "a lawless law of detention has been promulgated in the State, with the sanction of the President of India, which has stifled all civil liberties."

Pakistani Warnings of Danger of War.

Addressing Pakistani Air Force cadets on Jan. 11, President Mirza warned them to be "always ready," as India had "sinister designs" on Pakistan. The Minister of Information, Sardar Amir Azam Khan, alleged on the same day that Indian troops were massed on Pakistan's borders, and claimed that in Pakistan "not a single soldier has been moved toward the Indian borders." This allegation was denied on Jan. 16 by Indian Government spokesmen, who stated that Indian forces in Kashmir had recently been reduced. They also alleged that Pakistani troops were stationed within a few miles of the Indian border, and that the "Azad Kashmir" forces had recently been increased to nearly 45 well-equipped battalions.

Pakistan Radio declared on Jan. 11 that tribal chieftains had expressed impatience at the slow progress of the Kashmir question, and were ready to "march into Kashmir" if the Security Council did not satisfactorily solve it. On Feb. 1 Mr. Suhrawardy gave a warning that there was a real danger of "undeclared war" breaking out in the tribal territories; telegrams pledging support for armed operations were pouring into Karachi from tribal leaders, and although the Government was trying to restrain them "no one could say what would happen if no effective action was taken."

Sardar Abdul Qaiyum Khan, head of the "Azad Kashmir" Government, told a *Daily Telegraph* correspondent on Feb. 9 that "it is coming to a fight in Kashmir, whether people like it or not. We have no alternative left, and I have told the Pakistani Government, this . . . I think it is certain that there will be fighting this year, perhaps even in a few weeks . . . Kashmiris want to see some results at last, if not by diplomacy, then by war . . . In Kashmir we can give the Indians hell. We are much better equipped now than in the former fighting." He insisted that "Azad Kashmir" had not been a party to the cease-fire agreement and was therefore not bound by it.

The "Azad Kashmir" Cabinet had told the same correspondent on Feb. 6 that its forces numbered 35,000 men and could be increased overnight to 80,000, of whom 70,000 were trained ex-soldiers.

Anti-Indian Demonstrations in Pakistan.

Widespread anti-Indian demonstrations took place in Karachi, Lahore, Hyderabad (Sind), and Dacca on Jan. 26, which was observed as a "black day" throughout Pakistan in protest against the integration of Kashmir with India. In Karachi demonstrators attacked the Indian High Commissioner's office, burned effigies of Mr. Nehru and other Indian leaders, and stoned the police; in Dacca and Hyderabad, the Indian Deputy High Commissioners' offices were stoned by demonstrators shouting slogans demanding war with India; while in Lahore the Deputy High Commissioner's office was also attacked and his residence stoned. During clashes between the rioters and the police 25 people were injured in Hyderabad and 18 in Lahore. Anti-Pakistani counter-demonstrations took place on Feb. 2 in Delhi, where police used tear-gas to disperse Indian students demonstrating outside the Pakistani High Commissioner's residence.

In a statement in Karachi on Feb. 1, Mr. Suhrawardy appealed to the public to moderate the tone of its opposition, and said that the justice and strength of Pakistan's case did not justify demonstrations against Mr. Nehru. The statement said: "I have noted a tendency on the part of our newspapers and public to revile the leaders of countries with whom we have differences, rather than to comment on or criticize their policies. Also, in public demonstrations, attacks are made on the leaders of these countries. This is against all international usage and behaviour. I would request newspapers and our public leaders to refrain from indulging in vilification. This does not help the cause of truth and justice which we espouse. On the other hand, it is apt to arouse opposition to us in the people of the countries concerned, and to create unnecessary prejudice which will impede the cause of justice for which we stand . . ."

A. FINLAND - SOVIET UNION. — M. Fagerholm's Visit to Moscow. - Trade Agreement for 1957.

The Finnish Prime Minister, M. Fagerholm, and the Minister of Commerce, M. Kleemola, visited Moscow from Jan. 30 to Feb. 3 for discussions with the Soviet Government.

A joint statement issued on Feb. 2, signed by Marshal Bulganin and M. Fagerholm, said that Finno-Soviet relations were developing satisfactorily "in the spirit of the 1948 treaty" and based upon "complete equality, non-interference in each other's domestic affairs, and mutual respect for sovereignty and national independence." The Soviet Government had noted that "Finland's peaceful neutral foreign policy and her friendly relations with all countries" were a valuable contribution to international peace, and both Governments were agreed that good-neighbourly relations among the countries of Northern Europe were of great importance for European and world peace. They also attached great significance to "the achievement of practical results in the field of disarmament" and the prohibition of atomic and hydrogen weapons.

After noting that commercial relations on the basis of the Finno-Soviet five-year trade agreement of 1954 had been developing satisfactorily, the statement concluded: "This exchange of opinions has deepened the mutual understanding between the two countries and has demonstrated once again the spirit of mutual respect and confidence which is typical of the good-neighbourly relations between the Soviet Union and Finland."

It was also announced that Marshal Bulganin and M. Khruschev had accepted an invitation by M. Fagerholm to visit Finland later in the year.

A Finno-Soviet trade agreement for 1957 had been signed on Nov. 28, 1956, on the basis of the five-year trade treaty between the two countries.

The agreement provided for Finnish exports to the U.S.S.R. totalling 615,000,000 roubles and Soviet deliveries to Finland valued at about 500,000,000 roubles. The Finnish exports will consist principally of ships, machinery and other metal goods, timber products, copper and copper products, and certain consumer goods, while Soviet supplies will include wheat and fodder, petroleum products, iron and steel products, sugar, coal, coke, zinc, potash, aluminium, motor vehicles, tractors, etc. The balance in Finland's favour will be compensated by Finnish imports from Soviet-bloc countries under "triangular" arrangements.

The agreement for 1956 had envisaged Finnish supplies to the Soviet Union totalling 590,000,000 roubles and Soviet exports to Finland worth 440,000,000 roubles. It was provided that the difference in Finland's favour should be settled by the Soviet Union as to 40,000,000 roubles in foreign exchange payments and as to 110,000,000 roubles by the supply of goods to Finland under "triangular" arrangements with Czechoslovakia and Poland.

Because of the partial breakdown of the "triangular" trade arrangements previously envisaged for 1957, it was agreed during M. Fagerholm's visit that the Soviet Union would deliver additional supplies of raw materials needed by Finland, including coal and oil which Finland had been unable to get from Poland and Rumania in sufficient quantities.
(Soviet Weekly - Times - Le Monde, Paris) **(Prev. rep. 14460 A.)**

B. SOVIET UNION. — M. Gromyko succeeds M. Shepilov as Foreign Minister.

The Tass Agency announced on Feb. 15 that M. Andrei Gromyko had been appointed Foreign Minister of the U.S.S.R. in succession to M. Dmitri Shepilov, who had been elected as one of the secretaries of the central committee of the Soviet Communist party.

M. Gromyko (47) was born in Byelorussia and graduated in agricultural economics at the Lenin Institute of Economics in Moscow. From 1936-39 he held a senior post in the Economics Institute of the Soviet Academy of Sciences and edited the official Soviet economic review, *Problems of Economics*. On the eve of the Second World War he was appointed by M. Molotov as head of the American section of the Soviet Foreign Ministry, and shortly thereafter became Counsellor at the Soviet Embassy in Washington. M. Gromyko subsequently held the posts of Ambassador to the U.S.A. (1943-46), Soviet representative at the United Nations (1946-49), Deputy Foreign Minister in the Soviet Government (1949-52), Ambassador in London (1952-53), and First Deputy Foreign Minister since 1953.

As Ambassador in Washington, Soviet representative at the U.N. (in which capacity he cast the Soviet veto on 26 occasions), and First Deputy Foreign Minister of the U.S.S.R., M. Gromyko played an important part in shaping Soviet post-war foreign policy, and was regarded as a close associate of M. Molotov. He took part in the wartime conferences at Teheran, Yalta, and Potsdam and also in a number of post-war conferences, including the conference of Foreign Ministers' Deputies held in Paris in 1951. M. Gromyko is the first Byelorussian to become Foreign Minister of the U.S.S.R., and the youngest holder of that post, being four years junior to M. Shepilov. The Special Correspondent of *The Times* in Moscow commented that it might "well be . . . that M. Gromyko's appointment represents a return to an attitude in Soviet foreign affairs more in keeping with the Stalinist tradition."

M. Gromyko was succeeded as First Deputy Foreign Minister by M. Nikolai Patolichev, also a Byelorussian, and Deputy Foreign Minister since July 1956.

M. Shepilov had held the post of Foreign Minister for only eight months. A Moscow broadcast of Feb. 16 confirmed the "correctness" of M. Shepilov's speech to the Supreme Soviet made four days earlier (see 15370 A), in which he had enunciated six "principles" as the basis for a four-Power pact on the Middle East.—(Soviet Weekly - Times) **(14900 B.)**

C. UNITED STATES. — Administration. - Mr. Gordon Gray appointed Director of Defence Mobilization. - Resignation of Dr. Flemming.

It was announced on Feb. 6 that President Eisenhower had appointed Mr. Gordon Gray, Assistant Secretary of Defence for International Security Affairs, as Director of the Office of Defence Mobilization in succession to Dr. Arthur S. Flemming, consequent upon the latter's resignation (see page 15388, first column).

Mr. Gordon Gray (47), a North Carolina Democrat, served as Secretary of the Army in President Truman's Cabinet and also as Director of the Psychological Strategy Board—the forerunner of the Operations Co-ordinating Board. He conducted an important foreign policy study which recommended continued American aid to Western Europe and increased aid to the under-developed areas. Mr. Gray resigned in 1950 to become president of the University of North Carolina, but was recalled to Government service by President Eisenhower in 1955. As Assistant Secretary of Defence for International Security Affairs since the latter year, he had supervised the foreign military aid programme and had also been a member of the Operations Co-ordinating Board and the planning board of the National Security Council. Mr. Gray also served in 1954 as chairman of the special security board which voted against the reinstatement of Dr. J. Robert Oppenheimer as a Government consultant on atomic energy matters.

Mr. Gray, one of the few Democrats to attain high office in President Eisenhower's administration, will have Cabinet rank and attend Cabinet meetings, though his new post is not a Cabinet position. He will also be a member of the National Security Council *ex officio*.—(New York Times)
(Prev. rep. Dr. Flemming, 12839 B; Mr. Gray, 10027 B.)

D. JAPAN. — Termination of State of War with Poland and Czechoslovakia.

An agreement on the termination of the state of war and the establishment of diplomatic relations between Poland and Japan was signed in New York on Feb. 8 by Mr. Kase, the Japanese Ambassador in Washington, and M. Winiewicz, Polish Deputy Minister of Foreign Affairs and head of the Polish delegation at the United Nations.

A similar agreement for the ending of the state of war and the restoration of diplomatic relations between Japan and Czechoslovakia was signed in London on Feb. 13 by the Japanese and Czechoslovak Ambassadors, Mr. Nishi and M. Hajek.—(Polish Embassy Press Office, London - Japanese Embassy Press Office, London) **(Prev. rep. 15307 E.**

A. PETROLEUM.—Further British and Continental Measures against Oil Shortage. - O.E.E.C. Emergency Oil Pool. - Shortfall of U.S. Oil Shipments to Europe. - President Eisenhower's Request for Increase in U.S. Oil Supplies. - Improvement in European Fuel Position.

Further measures taken in European countries to counteract the effects of the blocking of the Suez Canal on the oil supply position in Europe are summarized below.

Great Britain.

The introduction of petrol rationing was followed by a number of steps aimed at minimizing its effects on the country's economic activities.

Road Hauliers and Commercial Travellers. The Ministry of Transport warned long-distance hauliers on Jan. 1 that a 25 per cent cut in fuel consumption would be achieved by reducing the transport of less essential goods. On Dec. 18, 1956, it had been pointed out that supplementary allocations to hauliers would vary from nil to 80-100 per cent of needs for essential users. Particular attention, however, would be given to persons whose living depended on such transport services, whilst long-distance hauliers would receive most favourable treatment provided the goods carried could not be transferred to the railways.

The arrangements for issuing supplementary petrol and diesel allowances were widely criticized by the various road haulage associations, commercial travellers, and manufacturers' agents dependent on road transport.

The road hauliers alleged that (i) the fuel emergency had been "exploited" by the Government to protect railway interests, thus endangering the livelihood of thousands of road hauliers; (ii) although the Government had agreed on an overall saving of 25 per cent in their sector, no haulier had received more than 25-30 per cent of normal consumption; (iii) applications for supplementary allowances had neither been dealt with speedily, nor had the allowances been calculated on uniform principles throughout the country but varied according to the ways in which Regional Commissioners interpreted their instructions. The United Commercial Travellers' Association maintained that a traveller received a ration of only 300 miles a month compared with 1,000 miles a month in May 1950 just before petrol rationing ended, and a normal consumption averaging 500-600 miles a week.

The Minister of Transport (Mr. Watkinson) reaffirmed on Jan. 4, however, that there would be no change in the principles of the existing rationing scheme whereby overall petrol and oil supplies would be reduced by 25 per cent, although amendments would be made to ensure that available supplies were equitably distributed. On the previous day Mr. Watkinson had emphasized that "rationing is going exactly as planned . . . You cannot cut petrol by 25 per cent without hurting someone." He explained that rationing would be effected in three stages—first, the issue of the basic ration; second, the first round of supplementaries; and third, the clearing-up of individual problems that had arisen. It was also pointed out by the spokesman of the Ministry of Transport that the main complication in the administration of petrol rationing had resulted from delay by road hauliers in returning applications for supplementary allowances.

On Jan. 10 it was announced that fuel rationing problems arising in the road transport industry would be dealt with by a joint consultative advisory committee consisting of representatives of the British Transport Commission, coastal shipping, the Road Haulage Association, the Traders' Road Transport Association, the National Conference of Road Transport Clearing Houses, and the trade unions, under the chairmanship of Sir G. F. Stodman, deputy secretary of the Ministry of Transport and Civil Aviation. It was also announced that final assessments for road hauliers with "A," "B" and "C" licences would be made immediately, that appeals against wrongful assessment could be made first to the District and then to the Regional Transport Commissioners, and that a substantial fuel reserve would be kept, primarily to meet cases of exceptional hardship.

"C" Licence Vehicles. After a meeting with representatives of the Traders' Road Transport Association, the Minister of Transport announced on Jan. 9 that "C" licence holders, normally allowed to carry only their own goods, would be permitted for the present to carry goods of other "C" licence holders, provided the goods would normally be carried under such a licence. The Order affected 450,000 licence holders operating nearly 1,000,000 vehicles.

Supplementary Allowances for Hardship Cases. The Ministry of Fuel and Power announced on Jan. 2 that applications for special hardship allowances of petrol would be considered for the following categories:

(*a*) Firms who considered that output or turnover would suffer seriously unless private cars used in business were allowed more mileage than at present covered on the business block allowance.

(*b*) Employers who suffered serious interference with their business through the inability of employees to get to work. Applicants would, however, have to show that (i) public transport was not available or practicable over any part of the journey; (ii) needs could not be met by collective transport, e.g. coaches; (iii) the employees' mileage to work and back exceeded 150 miles a month; (iv) there were arrangements for mutual aid among employees living in the same neighbourhood or on the same route.

(*c*) Self-employed persons who could show that supplementary petrol was essential to avoid serious loss of livelihood.

(*d*) Persons living in remote areas who suffered serious personal hardships, especially those concerned with welfare of the sick and aged, or of children (e.g. extreme difficulty in getting children to school).

Diesel Oil Cut for Farming and Fishing. A 10 per cent cut in gas and diesel oil supplies for farm vehicles and fishing vessels, (effective for three months as from Jan. 1, 1957, and based on deliveries in the same period of 1956) was announced by the Ministry of Agriculture on Dec. 20. [Subsequently, however, it was announced by Lord Mills that the cut would be abolished on April 1 see below].

Car Hire Service. Increased petrol allowances for chauffeur-driven hire cars were announced on Jan. 24, and owners of self-drive hire cars were permitted to apply for increases on hardship grounds.

Motor Racing. The Ministry of Power announced on Feb. 13 that special petrol allowances would be made available to the Royal Automobile Club and the Auto-Cycle Union (the governing authorities for British motor- and motor-cycle racing) to enable a "strictly limited" number of race meetings to be held. No supplementary coupons, however, would be issued to enable spectators to travel to these events.

Lawn Mowers. An allocation of petrol for gardeners using motor-mowers, equal to a ¼-gallon per month for each 1,000 square yards of lawn for the period April-September, was announced on Feb. 12.

New Registrations. The Ministry of Power announced on Jan. 18 that vehicles registered for the first time in January would receive a complete basic ration book covering the Dec. 17-April 17 period, while those registered or re-licensed in February and March would receive coupons for three and two months respectively.

Driving Licences. Mr. Watkinson announced in the House of Commons on Dec. 5 that the provision requiring a provisional licence holder to be accompanied when driving by a substantive licence holder, would be temporarily suspended to avoid hardship to those whose livelihood would otherwise be affected by the suspension of driving tests.

Statements by Minister of Power. Lord Mills, the new Minister of Power, reviewed the oil situation at a press conference on Jan. 21. He pointed out that although there was a general shortage of about 25 per cent, "the position differed from product to product," viz.:

Fuel Oil was "our greatest anxiety," with supplies much below demand and no immediate prospect of material improvement. If further cuts were unavoidable industry would receive "as long notice as possible," but meanwhile there would be no additional cut before the end of February.

Diesel Oil. The position was being "well held, thanks to the very great efforts of industry and the co-operation of road transport"; although stocks were being run down, "I think we can stand it until the end of the present rationing period in April."

Petrol. "My own view is to get rid of petrol rationing as soon as possible, but that time has unfortunately not yet arrived. It is often said that there is plenty of petrol in Texas and elsewhere waiting to be fetched, but we dare not let the tankers bring petrol—they should carry fuel or crude oil."

Lord Mills announced on Jan. 29 that the period in which no further cut in fuel oil supplies to industry would be made would now be extended "to at least the end of March." He said that although fuel oil supplies were still substantially short of normal levels and there was no immediate prospect of improvement, consumption had been reduced by savings of 80 per cent by the Central Electricity Authority, 25 per cent for central heating, and 10 per cent in other branches of industry. In spite of these savings, however, it would still be necessary to draw extensively on stocks.

Lord Mills announced in the House of Lords on Feb. 20 that the measures taken to deal with the severe reduction in petrol and oil supplies had led to an improvement in the position compared with the first weeks of the emergency, and had thus enabled the Government to ease certain of these restrictions, as follows:

Fuel Oil. Because of improved crude oil supplies and the mild winter, restrictions could be limited to their present level—10 per cent in industry—throughout April.

Diesel Oil. As from April 1, cuts would be reduced from 20 per cent to 10 per cent for industry, and from 33⅓ per cent to 25 per cent for non-industrial central heating, whilst the 10 per cent cut in supplies for agriculture and fishing would be abolished. In spite of these changes the average saving on gas-diesel oil would still be about 15 per cent.

Petrol. Coupons held by private motorists and operators of goods and public service vehicles, and unused in the current rationing period would be valid up to April 30. This would enable private motorists, for example, to use their cars to a greater extent during the Easter holiday.

Road and Passenger Transport. During the next rationing period for goods and public service vehicles, commencing April 8, allowance would be made for seasonal changes in normal consumption—particularly in respect of coaches, whose allocation would be increased to 75 per cent of their usual consumption for the period.

Continental Europe.

Various developments in connexion with the oil restrictions in continental Europe are summarized below:

France. It was announced on Dec. 16 that the Monte Carlo Rally for 1957 would be cancelled because of petrol restrictions.

M. Lemaire (State Secretary for Industry and Commerce) announced on Feb. 12 that gas oil would be on free sale again as from April 1 and that motorists would be able from April 10 to take their basic petrol rations in coupons without time limit.

Belgium and Luxemburg. Speed limit of 40 m.p.h. imposed on all vehicles outside towns (Dec. 12). Ban on Sunday motoring lifted (Dec. 19)

Denmark. Petrol rationing abolished (Feb. 7) owing to satisfactory stocks.

Netherlands. Ban on Sunday motoring (which had resulted in a 15 per cent saving of petrol) lifted experimentally on Jan. 27, and permanently on Feb. 6.

Portugal. Petrol supplies limited and petrol stations closed on Sundays.

Greece. Oil for central heating cut by 30 per cent. Severe petrol rationing scheme for private cars; all week-end motoring barred.

Sweden. Sunday motoring ban lifted experimentally for three week-ends (Feb. 4).

Switzerland. An Order was issued on Feb. 16 prohibiting foreign cars from taking out more petrol than they brought in—a step aimed against French motorists crossing the frontier for petrol.

Creation of O.E.E.C. Oil Pool.

The O.E.E.C. Oil Committee, after discussions with the O.P.E.G., announced on Jan. 15 that it had decided to introduce an "equitable system of allocations" whereby regular oil supplies to member-countries would be equalized to ensure a more balanced distribution based on national requirements, replacing the existing "stop-gap" arrangements.

The scheme was outlined on the same date by M. Gérard Bauer (chairman of O.E.E.C.'s Executive Committee), Mr. J. Berkin (chairman of O.P.E.G.), and Mr. J. Beckett (head of the Oil Committee), as follows:

(*a*) The major U.S. and European oil companies would establish a special oil pool, from which 200,000 tons (made up of 40,000 tons of petrol, 50,000 tons of diesel oil, and 110,000 tons of fuel oil) would be distributed every ten days among participating countries in special difficulties;

(*b*) allocations from the special pool would be decided by the Oil Committee;

(*c*) generally speaking, each of the member-countries should undergo a cut of the same percentage relative to their needs.

Mr. Beckett commented that the new system would "not cure the oil shortage but will spread the burden as fairly as possible." Countries which enjoyed special advantages from their domestic production, or from a high level of deliveries by certain oil companies, would now be in the same position as the rest. The allocation scheme did not, however, take account of the existing level of stocks, although the regular distribution of the 200,000-ton reserve (representing 8 per cent of normal requirements) would gradually even out stock levels. Bigger distributions from the reserve would be given to those countries whose stocks were low, unless the draft on stocks had resulted from failure to cut consumption to a reasonable extent; e.g. the Scandinavian countries, would receive less for the time being because of the normal winter stocks they accumulated each year. Discussing fuel oil supplies, Mr. Beckett said that stocks at Jan. 1, 1957, had amounted to 3,750,000 tons but would be reduced to 2,500,000 tons by Feb. 11, representing two weeks' consumption by O.E.E.C. countries.

Distributions from the O.E.E.C. reserve pool started on February 1, 1957.

In the first distribution (Feb. 1-10) 112,000 tons of fuel oil and 46,500 tons of gas-diesel oil were distributed as follows:

Austria, 3,500 tons of fuel oil; Denmark, 12,000 tons of fuel oil and 7,000 tons of diesel oil; France, 10,000 tons each of fuel and diesel oil; Greece, 4,000 tons of fuel oil and 5,000 tons of diesel oil; Irish Republic, 3,000 tons of fuel oil and 2,000 tons of diesel oil; Italy, 45,000 tons of fuel oil; Sweden, 27,000 tons of fuel oil and 10,000 tons fo diesel oil; Switzerland, 1,500 tons each of fuel and diesel oil; and Turkey, 5,000 tons of diesel oil. Britain, the Benelux countries, Western Germany, and Portugal made no claim "in view of the difficult situation in other countries." No allocations were made out of the extra 40,000 tons of petrol, which were returned to O.P.E.G. "to be distributed by the oil companies in accordance with the agreed equalization procedure," as so many countries were in an equally difficult position.

It was announced on Jan. 29 that the reserve for the period Feb. 10-20 would be allocated to Britain (16,000 tons of petrol), France, Italy, Spain, Denmark and Sweden.

In the third distribution for the period Feb. 20-March 2, Britain received 15,000 tons of petrol—the largest petrol allocation made to any member-country and representing about 10 per cent of Britain's normal needs in that period.

The Oil Committee announced on Feb. 19 that allotments would in future be made twice monthly for 15-day periods, covering each time a total of 240,000 tons of gas-diesel and fuel oil and 60,000 tons of petrol. For March 1-15 the recipients would be the Irish Republic, Spain, France, Italy and Britain (who for the first time received an allocation of gas-diesel and fuel oil from the pool.

A resolution by the O.E.E.C. Executive Committee, adopted on Jan. 8, said that current European oil supplies amounted to less than 75 per cent of requirements and would shortly be inadequate to maintain economic activity at a normal rate, so that only a further increase in U.S. supplies could alleviate the situation. The Committee expressed concern that the Texas Railroad Commission had taken no action to increase the number of days on which oil might be extracted from the Texan oilwells.

A joint meeting of the Oil Committee and O.P.E.G., held in Paris on Feb. 7, was attended for the first time by representatives of the U.S. Government and six members of the U.S. Middle East Emergency Committee headed by Mr. S. Coleman, vice-president of the Standard Oil Company of New Jersey.

Mr. Berkin, reviewing the European oil situation at a press conference after this meeting, estimated that 80 per cent of normal supplies would be available for the first quarter of 1957, as against the 75 per cent forecast on Jan. 8. There had been a marked improvement in the flow of oil to Europe in the past few weeks, averaging about 3,000,000 barrels a day, despite the falling-off in U.S. deliveries. Of the total supplies, 1,500,000 barrels a day were coming from the Western Hemisphere, 1,000,000 from the Middle East *via* the Cape, 100,000 from the Soviet Union *via* the Black Sea, and 300,000 from the Eastern Mediterranean.

This improvement in total supplies, Mr. Berkin pointed out, had resulted from better planning and making the optimum use of available tankers through speeding up the turn-round. The draft on fuel oil stocks had consequently been reduced, although a prolonged spell of cold weather resulting in a heavier use of fuel oil would seriously affect economic activity. Even with total oil supplies at 80 per cent of normal, however, restricted consumption was still 5-7 per cent above the level of the increased supplies, and in the case of fuel oil the shortfall was even greater than the average, although for petrol it was rather less. Several factors affecting future supplies, such as the resumption of the oil flow through the Syrian pipelines and of traffic through the Suez Canal, were uncertain, but it was hoped that supplies in the second quarter would increase further, even if none were received *via* these two supply lines.

Oil Shipments to Europe under U.S. Emergency Plan. - President Eisenhower's Call to U.S. Oil Companies for Increased Production.

Figures published by the U.S. Department of the Interior showed that shipments of U.S. oil to Europe under the Emergency Plan announced by President Eisenhower on Nov. 30 (see 15249 A) averaged 944,000 barrels a day for the week Nov. 21-28 and 636,000 barrels for the week Nov. 29-Dec. 5. Thereafter they reached the target of 500,000 barrels a day only once, averaging 468,000 barrels during the last week of December and the first week of January, and falling still further to 275,000 barrels a day for Jan. 9-17, of which only 72,000 was crude oil. Although shipments for Jan. 18-23 rose to 513,000 barrels (made up of 157,000 of crude oil, 235,000 of refined products, and 121,000 of petrol), this was only achieved through running down U.S. crude oil stocks, which by Jan. 26 were over 2,000,000 barrels short of the level considered a minimum for national security reasons. For the week Jan. 24-30 shipments fell to 454,000 barrels a day, bringing total movements of oil to Western Europe from the U.S.A. to over 5,000,000 metric tons.

It was pointed out in the British, French and U.S. press that the obstacles to the fulfilment of the Emergency Plan arose not so much from a tanker shortage, since the reorganization of tanker schedules by Dec. 20 had made available sufficient tanker capacity to carry 1,200,000 barrels a day from the Gulf Coast, but from the following reasons:

(i) The restricted pipeline capacity for carrying oil from the West Texas oilfields (the centre of Texan surplus oil stocks) to the coast.

(ii) The refusal of the Texas Railroad Commission—the body administering the State's conservation laws and therefore controlling Texan oil output, which amounts to 40 per cent of U.S. output—to sanction production increases sufficient to alleviate the European oil deficiency. [Whereas the international oil companies had favoured increased U.S. production of crude oil and a large diversion of Caribbean oil to European refineries, the independent Texan producers had opposed this policy. The Texas Railroad Commission had approved the policy of the independent producers, the result being to force up prices because of the European shortage.]

Allowable production, fixed monthly by the Commission on the basis of estimated demand, and distributed on an equitable basis between producers, was fixed at 16 working days for both December and January, and 15 days for February; the latter represented an increase of 92,970 barrels of oil a day after taking into consideration the shorter month.

Defending their decisions, the Commissioners maintained that exisiting oil stocks were sufficient to meet temporary European demands and that excessive stocks of petrol (amounting to 196,000,000 barrels) and of other crude oil products, resulting from

Europe's general reluctance to purchase these items, threatened the existing price level. Mr. Culberson, the chairman of the Commission, stated on Jan. 26 that further increases in stocks would wreck the domestic industry, and that Britain must understand that the industry had to keep its stocks in balance against the time when she no longer required U.S. oil.

Following representations by the British and French Ambassadors to the State Department on Jan. 25-26, Mr. F. Wormser, Assistant Secretary of the Interior, made an urgent appeal to the oil industry on Jan. 26 to increase their shipments to Europe during the next two "critical" months. He asked them to raise output on the one hand and to reduce refining operations on the other, thus averting a situation "threatening to have the most severe impact on the European economy and to undermine U.S. relationships with Europe and NATO." The supply of oil to the civil economies of Europe, Mr. Wormser emphasized, was of "major importance" to the U.S. armed forces.

President Eisenhower declared on Feb. 6 that the U.S.A. must not let Europe "go flat on its back" for the lack of oil, and announced that the U.S. Government "might have to move in" unless the oil flow to Europe was kept to a maximum by making the optimum use of all transport facilities. The Government would not, however, disturb the U.S. economy to achieve this unless it was forced to do so. The President also announced that Dr. Arthur Flemming, the Director of Defence Mobilization [and, in that capacity, responsible for the emergency oil shipments] would be succeeded by Mr. Gordon Gray, Assistant Secretary for International Affairs and supervisor of the foreign military aid programme—a step interpreted by the American press as the outcome of the disappointing U.S. oil shipments to Europe.

Mr. Stewart, director of the Interior Department's Office of Oil and Gas, had previously stated on Feb. 1 that although appeals for more production of crude oil and less refining had been unsuccessful "as yet," the President would not "step in." The Federal Government, Mr. Stewart said, would not willingly encroach on the rights of the States and had no control over the decisions of the Texas Railroad Commissioners. He rejected the suggestion that the Administration was allowing the Commission "to conduct foreign policy by hindering the oil lift to America's allies in Western Europe," and said that he was unwilling to criticize the Commissioners, who had a "tough job" and were "only looking after their own interests." He would, however, "like to see them a little more generous."

In response to President Eisenhower's request, six major oil companies—the Texas Oil Company, Shell Oil Company, Sinclair Oil Corporation, Standard Oil Company of New Jersey, Standard Oil Company of Ohio, and Socony Mobil Oil Company—announced on Feb. 8 that they would increase crude oil shipments to Europe by reducing refinery runs. In addition, the Shell Oil Company would make available over 1,000,000 barrels of crude oil by closing down several refinery units for overhaul.

The Texas Oil Company also announced on the same date that its total oil shipments (refined and crude) to Europe had increased fivefold, viz., from 20,000 barrels a day before the crisis to 104,000 barrels. This increase had been brought about by (1) increasing shipments from Trinidad to Britain by 85 per cent, or about 17,000 barrels a day in January; (2) drawing on stocks from Caribbean and Gulf Coast sources; (3) diverting Arabian crude oil from Sidon (Lebanon).

At a meeting of the Texas Railroad Commission held on Feb. 19, allowable production for March was fixed at 18 days' operation or 3,733,054 barrels a day, representing an increase of 210,901 barrels a day over the output for February.

U.S. Investigations into Oil Shipments to Europe.

Four investigations commenced in the U.S.A. during January and February to determine whether the major oil companies had "conspired" to raise oil prices in violation of the anti-trust laws—viz. (1) by the Justice Department's anti-trust division on Jan. 11; (2) by the Senate Anti-Trust and Public Lands Committee on Feb. 5; (3) by a grand jury of investigation at the request of the Federal Government on Feb. 8; and (4) by a sub-committee of the Senate Commerce Committee on Feb. 8. In addition to price increases, the Senate Anti-Trust and Public Lands Committee also decided to examine the alleged failure of the Government's emergency oil programme for Western Europe, and to investigate whether the Middle East Emergency Committee had violated the anti-trust laws.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - New York Times - New York Herald Tribune - O.E.E.C. Information Division, Paris - Le Monde, Paris - Neue Zürcher Zeitung - Netherlands News Agency - Berlingske Tidende, Copenhagen) **(Prev. rep. 15249 A.)**

A. FRANCE. — Anti-Alcohol Legislation. - Ban on Sale of Alcoholic Drinks to Children. - Statistics of Alcohol Consumption.

The French National Assembly passed a Bill on Feb. 13 banning the sale to children under 12 years of age, in bars and other public places, of drinks containing more than three degrees of alcohol. Infringements were made liable to fines of 100,000 to 500,000 francs, and, in the event of the death or serious illness of the minor concerned, charges could be brought for manslaughter, bodily injury through negligence, or maltreatment of children. The Bill also prohibited the distribution or despatch to people under 20 years of age of any advertising matter publicizing alcoholic drinks.

The Bill, introduced by Mme. de Grond (Socialist) and supported by the Government, was approved by 527 votes to 46, although the Assembly's Commission for Alcoholic Drinks had voted almost solidly against the measure. The Commission pointed out that it was not so much necessary to fight alcoholism in public but in the home, where 88 per cent of all wine consumption and 70 per cent of the consumption of all alcoholic drinks took place.

The French *Centre des recherches et de documentation sur la consommation* published on Feb. 1 the results of investigations carried out by it into the expenditure of French households. These showed (*a*) that alcoholic consumtion in France in 1955 amounted to 9,400,000 hectolitres (about 207,000,000 gallons) of pure alcohol, compared with 7,800,000 hectolitres in 1950, and (*b*) that, of the total expenditure on food in 1955, aggregating 4,880,000,000,000 francs, 760,000,000,000 francs had been spent on drink, including 718,000,000,000 francs on alcoholic beverages.

The expenditure on drink in 1955 compared with 14,000,000,000 francs for meat, poultry, and eggs, 160,000,000,000 francs for milk and dairy produce, 540,000,000,000 francs for bread and cereals, and 770,000,000,000 francs for fruit and vegetables. It also compared with an expenditure of 1,420,000,000,000 francs for clothing and 1,030,000,000,000 francs for rents and household equipment.

The increase in the consumption of alcoholic drinks between 1950 and 1955 was due to a considerable rise in wine consumption (from 50,300,000 hectolitres to 63,350,000 hectolitres), as well as in beer consumption. On the other hand, consumption of *apéritifs*, brandies, and liqueurs fell during the five-year period.

Figures published by the French National Institute of Statistics on May 25, 1956, showed that 17,400 Frenchmen died in 1955 as a result of alcoholism or cirrhosis of the liver, compared with 13,300 deaths from tuberculosis. In 1954, 4,106 people had died in France from alcoholism and another 12,071 from cirrhosis of the liver, compared with 3,905 and 11,871 respectively in 1953. The highest number of deaths from these causes were in Paris and the north-western departments, while the lowest were in Corsica and two of the principal wine-producing departments Hérault and Bouches-du-Rhône.

Two measures to combat anti-alcoholism, introduced by M. Mendès-France during his Premiership in 1954, were subsequently withdrawn by the National Assembly. The decree of Dec. 22, 1954, which had increased the licence fees for the opening of new bars and other drinking-places from 20,000 francs to 100,000 francs, was abrogated by the Assembly on March 16, 1955, whilst the application of the decree of Nov. 13, 1954, which drastically reduced the number of persons not engaged in agriculture who would be licensed to distil small quantities of alcohol free of duty (*bouilleurs de cru*), was postponed until Sept. 1, 1956, under a Bill adopted by the Assembly on Nov. 8, 1955. This Bill (enacted on Nov. 30, 1955) called upon the Government, however, to "organize effectively the fight against alcoholism" and to "encourage" private distillers to renounce their alcohol allocations by giving them certain tax concessions. No further action was taken after Sept. 1, 1956, the provisions of the 1954 decree on the *bouilleurs de cru* thus remaining inoperative.—(Le Monde, Paris)

B. UNITED KINGDOM. — Local Authority Loans.

The rate of interest charged on loans advanced to local authorities from the Local Loans Fund was reduced as from Feb. 16 from 5¾ per cent to 5½ per cent for all loans for over five years. For loans for up to five years the rate remained unchanged at 5½ per cent. The reduction for medium and long-term loans followed the recent fall in the Bank Rate. (Treasury Press Office) **(Prev. rep. 15194 C; 15376 E.)**

C. INDIA. — Banking Appointments.

It was announced in New Delhi on Feb. 1 that Mr. H. V. R. Iyengar, chairman of the State Bank of India, was to become Governor of the Reserve Bank of India with effect from March 1, and that Mr. P. C. Bhattacharyya, of the Ministry of Finance, would become the new chairman of the State Bank of India.—(The Statesman, Calcutta) **(Prev. rep. 15099 A.)**

A. EGYPT. — Expulsion of British and French Nationals and of Stateless and Foreign Jews.

The British and French Foreign Offices announced on Nov. 24, 1956, that reports had been received from the Swiss Foreign Ministry stating that the Egyptian Government intended to expel all British and French nationals in Egypt within seven to ten days. It was pointed out in London that there were about 13,000 British subjects and British-protected persons in Egypt, comprising 5,000 to 6,000 Maltese, 4,500-5,000 Cypriots, about 1,700 U.K. nationals, and about 1,000 from various overseas territories such as Aden and Gibraltar.

The British Foreign Office spokesman said that the Swiss representative in Cairo had "protested vigorously to the Egyptian Government against what he described as a barbarous measure." The Swiss Legation in Cairo [which protects British interests in Egypt] had also described the Egyptian measures as a "veritable catastrophe," since most of the deportees had had their livelihood in Egypt for many years, had nowhere to go, and were allowed to take only £E.20 out of the country. The spokesman added: "It is the view of H.M. Government that the Egyptian action in denying funds to these unfortunate people is in breach of Article 35 of the 1949 Geneva Convention on civilians."

[Article 35 of the Geneva Convention on the Protection of Civilians in Time of War gives civilians the right to leave a country when war breaks out, and guarantees them the right to "provide themselves with the necessary funds for their journey and to take with them a reasonable amount of their effects and articles of personal use."]

In an earlier statement on Nov. 20, 1956, the British Foreign Office had issued a strong protest against the conditions in which British nationals in Egypt were being kept under detention. "The Foreign Office has learned with regret," the statement said, "that despite representations by the Swiss Government, the Egyptian treatment of the civilian employees of the Suez base contractors who have been interned is by no means satisfactory. Their food is poor and insufficient; sanitary facilities are inadequate; they are in crowded conditions with no furniture but beds; and they possess only the clothes which they wore on arrival . . . The treatment of British civilians in Egypt contrasts with that of Egyptian civilians in the United Kingdom. No restrictions of any kind have been imposed on the latter, who are free to leave the U.K. if they wish or to stay and go about their business unmolested."

In a statement to the House of Commons on Nov. 26, Commander Noble (Minister of State for Foreign Affairs) declared that H.M. Government "would not meet barbarism with barbarism," and that no retaliatory measures would be taken against Egyptian civilians in Britain. Mr. Robens, for the Opposition, denounced the Egyptian Government's measures as "a cruel and inhuman act."

The Egyptian Government, however, issued a statement on Nov. 27 denying that it had ever planned the mass expulsion of British and French nationals in Egypt, and saying that British and French citizens in Egypt were free to remain or to leave the country, as they wished. This statement was conveyed to the U.K. and French Governments through the Swiss Legation in Cairo. A British Foreign Office spokesman commented:

"We are glad to hear from the Swiss Government that no formal order for mass expulsions has been promulgated by the Egyptian Government. Nevertheless, a considerable bulk of evidence has accumulated, both from Swiss Government sources and from members of the British community who have arrived back from Egypt, that large numbers of individual expulsion orders have been served by the Egyptian police. We do not know whether these individual expulsion orders will be maintained or not. We hope that they will be revoked. H.M. Government will, in any case, reserve the right to claim compensation on behalf of British subjects in Egypt when the true status of the legislation against British and French subjects becomes clear."

The 472 British technicians of Suez Contractors Ltd., who had been interned for 51 days, were exchanged on Dec. 21 for 357 Egyptian prisoners held by the British and French forces, the exchange being carried out at El Cap through the intermediary of the Swiss Legation. They sailed the same day in the troopship *Asturias* for Cyprus, from where they were flown home to Britain in an air-lift completed by Dec. 24. During preceding weeks a number of British journalists interned in Cairo, and the British Embassy and Consular staffs in Egypt, had also left the country.

Describing their experiences during their internment, officials of Suez Contractors Ltd. said that in the early stages they had been, "packed like sardines" in overcrowded rooms without light, heating, or sanitation; there were only two washbasins and one lavatory for 450 men, the bedding was verminous, and the food poor and inadequate. Later, however, conditions had greatly improved when they were transferred to a school at Heliopolis where there were baths and lavatories, and where they had been allowed to buy food with their own money or with money supplied by the Swiss Legation. The Egyptian guards had behaved well on the whole and there had been no cases of ill-treatment.

All British diplomatic officials in Egypt and their staffs—about 250 in all—arrived in Britain on Nov. 12 in chartered airliners, having flown from Libya after the Egyptian Government had given them permission to leave the country. The diplomatic party included the staff of the Embassy in Cairo and the Consular staffs in Alexandria, Ismailia and Suez. The Ambassador (Sir Humphrey Trevelyan), who travelled in the last plane, said that all the Embassy and Consular officials had been shut up in the Embassy for nine days while waiting permission to leave, no-one being allowed either to enter or leave the building. The Egyptian attitude, however, had been "very correct" throughout.

Nine British journalists in Cairo were allowed to leave Egypt on Nov. 23 after having been detained for three weeks, and were flown back to Britain *via* Rome. They included the Cairo Correspondent of *The Times*, who, in a despatch from Rome on Nov. 25, said that he and his colleagues had been "incarcerated in luxury in the Semiramis Hotel" and had had "little to grumble about."

Several thousand British subjects deported from Egypt—the great majority of whom were Maltese or Cypriots—arrived in Cyprus, Italy, or Britain during November, December, and January. None had been allowed to take more than £E.20 out of Egypt, many had lost their sole means of livelihood, and in a number of cases the refugees had had to surrender their personal possessions and business papers before being allowed to leave the country. Many of the refugees had lived in Egypt all or the greater part of their lives, their shops or businesses having been confiscated before their deportation. They were of all ages from infants to aged persons, many of the latter being frail and in ill-health.

Aid for British Refugees from Egypt.

The British Prime Minister, Mr. Macmillan, announced on Feb. 5 (*a*) that an Anglo-Egyptian Resettlement Board would be set up by the Government to deal with the needs of British subjects who had been forced to leave Egypt; (*b*) that the Board would co-ordinate all voluntary work hitherto done in this field; and (*c*) that an organization would be set up in the Foreign Office to classify claims against the Egyptian Government by persons who had suffered loss through their deportation.

In an earlier statement on Dec. 16, it had been announced by Lord Mancroft (then Under-Secretary at the Home Office) that the Government was making a grant of £100,000 to the Anglo-Egyptian Aid Society, a voluntary body which had been set up to help British subjects returning to the U.K. as refugees from Egypt.

In his statement to the House of Commons on Feb. 5, Mr. Macmillan explained that about 4,000 refugees from Egypt had arrived in the United Kingdom, with others *en route*. The operation of assisting these people and enabling them to start life again would be a large one, and the Anglo-Egyptian Aid Society had taken the view that, as a voluntary welfare organization, it should be relieved of the growing responsibility for making payments from Government funds. The Government accepted this view and proposed to set up an Anglo-Egyptian Resettlement Board which would be headed by Lord Colyton [who, as Mr. Henry Hopkinson, was Minister of State for the Colonies from 1952-55.] The other members of the Board would be Lord Listowel [who held the same post as Lord Colyton in the last Labour Government] and Sir Humphrey Trevelyan, Ambassador in Cairo until the breaking-off of diplomatic relations by Egypt.

The Resettlement Board would take over the £100,000 grant-in-aid made to the Anglo-Egyptian Aid Society, and would deal with each individual case on its merits. Specifically, it would pay allowances, make grants or loans in appropriate cases, meet immediate educational commitments, and make full pension advances to former pensioners of the Egyptian Government until the latter again discharged its contractual obligations. The Board would seek the co-operation of the trade unions, public corporations, and private employers in trying to settle the refugees.

The Prime Minister's statement was welcomed by Mr. Gaitskell, Leader of the Opposition, and Mr. Grimond, leader of the Parliamentary Liberal party.

As stated by Mr. Macmillan, about 4,000 British refugees from Egypt had arrived in the United Kingdom by the beginning of February, with another 2,000-3,000 on the way. Of the approximately 7,000 refugees who had entered or were *en route* for the United Kingdom, more than half were of Maltese origin and the remainder were mostly U.K. nationals. Some 3,000 of the refugees, most of them Maltese, were being accommodated in hostels until employment could be found for them, in which connexion the Minister of Labour (Mr. Macleod) appealed to employers and to managers of employment exchanges to find jobs for them. Mr. Macleod pointed out that about 3,000 jobs would need to be found for British subjects evicted from Egypt, the other 4,000 refugees being dependants.

Mr. Macleod (whose appeal was made on Jan. 7) pointed out that there had been a great surge of sympathy for the Hungarian refugees, for many of whom work had been found by British employers. The Hungarian problem, however, was one for the whole free world, whereas the problem of the refugees from Egypt was one for Britain alone—in which connexion Mr. Macleod pointed out that 60 times as much money had been subscribed for the Hungarians as had been subscribed by private persons to aid the evicted British subjects. While some of the refugees from Egypt were skilled workers—technicians, chemists, engineers, etc.—the great majority had been formerly small merchants, clerks, and shop assistants, which made it harder to find suitable jobs for them. Many of the refugees, however, spoke a wide range of languages, particularly French and Arabic, and this might prove very useful to firms seeking administrative staff for posts overseas, or for export businesses.

British and French Protests to United Nations.

The British and French representatives at the United Nations sent identical letters on Nov. 28, 1956, to the U.N. Secretary-General (Dr. Hammarskjöld) protesting at the treatment of British and French nationals in Egypt, the British communication being worded as follows:

"... Thousands of British subjects have received orders from the [Egyptian] security police ... to leave Egypt within a few days. In many cases, British subjects have been obliged to sign a declaration in Arabic (without even knowing its contents) confirming that they are leaving of their own free will, undertaking not to return to Egypt, and renouncing any claim for damages.

"The Swiss Minister in Cairo, who is looking after British interests in Egypt, has vigorously protested to the Egyptian Government against what he has described as 'a barbarous measure.' ... Despite the efforts of the Swiss Legation, these people are not being permitted to make provision for the deserted homes and personal property they will be leaving behind ... The indiscriminate character of these expulsion orders is reminiscent of the barbarous methods of mass deportation at short notice which have been practised in other countries."

The French delegation at the U.N. presented a draft resolution on Dec. 12 which, after accusing Egypt of violating the 1949 Geneva Convention, and declaring that the cease-fire and the impending withdrawal of French and British troops had "removed any shadow of pretext for the exceptional measures taken by the Egyptian authorities":

(1) Called upon Egypt "to restore to private individuals and companies all their property which has been wrongly sequestrated, confiscated or liquidated";

(2) Requested Dr. Hammarskjöld "to take all necessary measures, either by sending observers or by other means, for the purpose of inducing Egypt to respect the rights of French nationals residing in her territory."

The measures taken against British and French nationals in Egypt were debated by the U.N. General Assembly on Dec. 18 and Dec. 21, when Sir Pierson Dixon (U.K.) and M. Giscard d'Estaing (France) reiterated the charges contained in the Anglo-French communications to Dr. Hammarskjöld. In the absence, however, of any substantive resolution (the French draft resolution not being put forward), the debate ended inconclusively. The Egyptian delegate (M. Omar Loutfi) strongly denied that his Government had authorized the expulsion of all U.K. and French nationals, and declared that only a small number of foreign nationals "considered dangerous to security" had been interned or deported.

M. Loutfi said that of the 11,000 British nationals in Egypt at the time of the Anglo-French attack, 719 had been expelled for security reasons, 706 had left Egypt of their own free will, and 450 technicians had been interned. Of the 7,000 French nationals in Egypt, 2,648 had been ordered to leave the country, 474 had left voluntarily, and none had been interned. He claimed that the Egyptian Government's action in regard to foreign nationals had not gone beyond recognized measures of security in time of war, and had conformed to international law. He declared also that the property of foreign nationals had not been confiscated but sequestrated, as was customary in time of war.

Mr. Wadsworth (U.S.A.) said that his Government had received information regarding the mistreatment of foreign nationals in Egypt which had "occasioned concern" on the part of the United States. It was not possible, however, "to evaluate fully this information or to ascertain the facts, which are still obscure." It appeared, nevertheless, that an indeterminate number of persons had been "subjected to pressure" and "intimidated," and in some cases deported. The U.S. Ambassador in Cairo had been asked to express the concern of the U.S. Government, and to urge that no measures be taken against individuals on grounds of race, religion, or nationality.

Deportation of Stateless and Foreign Jews from Egypt.

Simultaneously with the expulsion of British and French nationals, the Egyptian Government also ordered the deportation of stateless Jews, of whom some 11,000 had been compelled to leave Egypt by the beginning of February. As in the case of the U.K. and French nationals, however, there were contradictory versions of the extent of the Egyptian Government's anti-Jewish measures—the Egyptian Government asserting, on the one hand, that its measures were directed only against Jews who were not Egyptian citizens, or who were "pro-Zionist" and "pro-Israel"; whereas Jewish organizations in the U.S.A. and Britain, as well as the World Jewish Congress, asserted that the Egyptian Government's actions were directed against the entire Jewish community in Egypt, numbering *some 50,000 persons.*

Mr. A. L. Easterman, political director of the World Jewish Congress, stated in London on Nov. 27 that the ancient Jewish community in Egypt, which had always been loyal, law-abiding and peaceful citizens of their country, was in danger of complete elimination as a result of the measures taken by the Egyptian Government. These measures, as ascertained from a large number of authoritative sources, included the confiscation of Jewish property and the sequestration of Jewish businesses, ranging from the largest business houses to small shops. As a result of these measures, the Egyptian-Jewish community was being "rendered destitute to all intents and purposes," there was almost total unemployment among the Jews in Egypt, and many leading members of the Jewish community had been interned in Cairo and Alexandria.

Mr. Easterman quoted from an order issued by the Military Governor of Cairo, published in the Egyptian press on Nov. 22, which provided for the expulsion of all stateless Jews defined as those who had "not succeeded in entering into the Egyptian way of life" and also of large numbers of other Jews of Egyptian nationality. The order provided (1) that the 14,000 stateless Jews in Egypt would be immediately expelled; (2) that all Jews naturalized after 1932 who had any connexions with Zionism or sympathies with Israel would be automatically deprived of their Egyptian nationality and expelled; (3) that Jews who had become Egyptian citizens after 1925 would have to apply to the Ministry of the Interior for permission to remain in Egypt and "prove" that they were loyal citizens; (4) that Jews naturalized between 1900 and 1925 could ask for their cases "to be considered"; and (5) that Jews who were Egyptian citizens before 1900 would be permitted to remain in Egypt. After saying that the last category comprised only four families, Mr. Easterman added: "Of the total Jewish population of 50,000 in Egypt, 25,000 are thus already under order of expulsion and another 25,000 are subject to expulsion unless they can 'prove' that they are not in sympathy with Israel or Zionism." He added that Dr. Haim Nahum, Chief Rabbi of Egypt since 1922, had resigned in protest against these measures.

Mr. Z. Shuster, European director of the American-Jewish Committee, also stated in Paris on Nov. 28 that stateless Jews in Egypt, and Jews of many other nationalities, were being threatened with internment unless they left Egypt immediately, "although there has been no mass deportation order." To corroborate these charges, he produced photostatic copies of Egyptian official documents. Mr. Shuster stated, *inter alia*, that about 1,000 Jews of various nationalities, including Italians, Greeks, Turks, Spaniards, French, British and American, had been interned in the Prison des Barrages in Cairo; that another 600, both foreign and Egyptian Jews, were being held in a Jewish school in Cairo; and that foreign Jewish women were interned in a school at Heliopolis.

Over 11,000 Jews—more than one-fifth of the Jewish community in Egypt—had left the country by the beginning of February, many of them in the Egyptian s.s. *Misr*, a vessel chartered by the International Red Cross and normally used for carrying pilgrims to Mecca. The deportees—many of whose families had been in Egypt for several generations—comprised both stateless persons and Jews of many different nationalities, among them many former shopkeepers, businessmen, bankers, etc., whose businesses had been sequestrated and whose bank accounts had been blocked by the Egyptian authorities. Like the deported British and French nationals, they were allowed to take *no more than £E.20 out of Egypt*. The stateless Jews, after disembarking at the Piraeus, Naples, and Brindisi, were nearly all flown to Israel by air-lifts organized by the Jewish Agency, while those of Italian, Greek, British, French and other nationalities for the most part returned to their countries of origin.

Mr. Charles H. Jordan, director-general of the American Joint Distribution Committee (Joint), stated in Athens on Jan. 23 that 10,025 Jews had left Egypt as at that date, of whom 7,368 had come to Europe by ship between Nov. 30 and Jan. 18, an additional 1,400 had travelled by plane, and another 1,257 had disembarked at the Piraeus from the *Misr* in the last few days. Further disembarkations during the last week of January brought the figure to over 11,000.

Mr. Jordan also announced that the Egyptian Government had decided to expel the ancient Karaite Jewish community in Egypt, numbering 4,000-5,000 and the largest Karaite community in the world. [The Karaite sect is a Jewish "protestant" group which has existed for over 1,000 years and whose tenets differ from those of orthodox Judaism.] It was understood that the Karaite Jews would be allowed to enter Israel, despite protests from ultra-orthodox groups in that country.

A protest against the treatment of the Jewish community in Egypt was sent to Dr. Hammarskjöld on Dec. 13 by the Israeli delegation at the United Nations, for transmission to all member-countries. It was worded as follows:

"The Government of Israel is in daily receipt of first-hand reports which fully confirm the deep apprehension which these policies of the Egyptian Government have aroused. From these reports it is manifest that the atmosphere in which the Jews of Egypt live is one of terror. They are arbitrarily deprived of their individual liberties and are dispossessed of their movable and immovable properties. Members of the free professions are prohibited from exercising them. Employees are dismissed from their employments. The whole community lives under a police regime. Those who remain in Egypt are indeed in a more tragic condition than those who have been expelled or who have fled, because they no longer have means of livelihood.

"This action of the Egyptian Government strikes not only at a large number of foreign and Egyptian nationals of Jewish faith, but also at thousands of stateless Jews, among them a large number who have been deprived of Egyptian citizenship. It thus bears the indisputable character of wholesale repression of a religious community.

"In the view of the Israeli Government, the course taken by Egypt constitutes a flagrant violation of the principles of international law, of the U.N. Charter, of the Universal Declaration of Human Rights, of the Genocide Convention, and of the Geneva Convention of 1949. As such it calls for the prompt intervention of the United Nations."

After hearing a statement by Mr. Ben-Gurion, the *Knesset* in Jerusalem passed a resolution on Nov. 28 calling upon the U.N. and the great Powers to "halt the persecution of the Jews in Egypt," and denouncing the "reign of terror" imposed on those Egyptian Jews "who desire to hold fast to their faith." There were three dissenting (Communist) votes.

Egyptian Denials of Anti-Jewish Measures.

The Egyptian Minister of the Interior, Colonel Mohieddin, issued a statment on Dec. 3 declaring that the Egyptian Government was opposed to racial or religious discrimination, and saying that only 288 Jews had been detained "for security reasons." He said that only those suspected of "pro-Zionist" or "pro-Israeli" activities were being interned or expelled, while "those who are not considered security risks are free to live here and conduct their business unmolested, as they have always been."

After refuting what he described as "the fantastic reports that have appeared abroad concerning our treatment of the Jews," Colonel Mohieddin said that the number of Jews in Egypt was not known with exactitude, but was estimated at 40,000 to 50,000. About 5,000 were of Egyptian nationality and about 20,000 stateless so far as was known, the remainder being of many different nationalities. He maintained that no Jewish property had been seized, and said that the only measure taken had been to "put the assets of rich Jews under sequestration to be sure that they do not try to smuggle their money out of the country." Of the 288 Jews under detention, 157 were stateless and the remainder of Egyptian nationality; their names had been given to the International Red Cross with the request that efforts should be made to enable them to leave Egypt as quickly as possible. Colonel Mohieddin also said that only two persons had been imprisoned on charges of "collaborating with the enemy" since the outbreak of hostilities—one an Egyptian Moslem and the other a Jew of Egyptian nationality.

Colonel Hatem, head of the Government Information Department in Cairo, also issued a statement on Dec. 27 denouncing what he described as "false rumours" about the treatment of the Jews in Egypt, and declaring that "Egyptian Jews enjoy the same rights as all other Egyptians." While making no reference to the position of stateless and foreign Jews, he emphasized that "Egypt has not deported a single Egyptian Jew." Colonel Hatem also pointed out that the Chief Rabbi of Egypt (Dr. Nahum) had emphasized that Israel had no competence to raise the question of the Jewish community in Egypt.

At a press conference in Cairo on Dec. 20, the 88-year-old Chief Rabbi of Egypt had stressed the loyalty of the Egyptian Jews to their country, denounced the "brutal Anglo-French-Israeli aggression against our motherland," and declared that neither Israel nor any other foreign country was authorized to speak on behalf of the Jews of Egypt, who represented "an integral part of the Egyptian nation."

Although the situation in Egypt remained obscure, reports from Cairo during January and February indicated a certain relaxation in the Egyptian Government's attitude toward the Jewish community, although its position still appeared precarious.

Confirmation of this trend was given in a Cairo statement on Jan. 24 by Dr. Chaim Shoskes, the correspondent of the New York Yiddish-language newspaper *Day-Jewish Journal*. Dr. Shoskes, who had been given a visa by the Egyptian authorities to enable him to make a first-hand investigation, stated that 11 prominent members of the Jewish community had been released after nearly three months of internment and permitted to resume their occupations. The Egyptian authorities had also assured him that the remaining 60 or 70 Jews still interned would also be released within a very few days. While there were signs of a relaxation of the policies of internment, expulsion, and seizure of property, most members of the Jewish community nevertheless feared that the Egyptian Government intended eventually to expel all Jews in the country.

Dr. Shoskes said that he had had a long conversation with Colonel Hatem, to whom he had addressed "very pointed and frank questions." Colonel Hatem had explained that the Egyptian Government felt compelled to take stern measures against the Jews after the Israeli attack, "just as the United States did against the Japanese living in America after Pearl Harbour," but had given an assurance that these measures were being relaxed and that all Jewish detainees would be released very shortly. He (Colonel Hatem) had also stressed that most of those expelled from the country had been stateless Jews, whose exodus had been carried out in co-operation with the International Red Cross.

Present Position of Foreign Communities in Egypt.

The following description of the present position of the foreign communities in Egypt was given in a despatch to *The Times* on Feb. 21 from a correspondent in Cairo:

"... The first rush to get out after the Anglo-French intervention last November has subsided. But ... thoughts of emigration preoccupy many an Italian, Greek, or Jew who has come to the hard decision that 'it is finished for us here' .... Estimates of how many people have left the country in the past three months range from 20,000 to 50,000. Even if some of those at present planning to leave should subsequently change their minds, it seems inevitable that by the end of the year the number of foreigners remaining in Egypt will be much less than half of the 140,000 or so who lived here before the Suez crisis ...

"While the Swiss Legation [is] trying its best to care for British and French interests ... it is plain enough ... that the influential Anglo-Saxon and French communities have simply ceased to exist and their businesses and wealth have been sequestrated, those of them who were not summarily expelled or 'advised to leave' having gone of their own volition ...

"It appears that most of the Maltese have been obliged to leave. The Cypriots, facing employment problems, are also going, though they, as a gesture of Egyptian approval of their compatriots' objections to British rule in Cyprus, seem generally to have been exempted from the expulsion orders and 'pressing advices.' Jews of all nationalities are of course going. Such figures as are available show that about half of the 45,000 Jews resident here in the middle of 1956 were Stateless. 15,000 held British, French, Italian, or Greek passports, and the remainder, roughly 7,000, were Egyptian nationals. During and immediately after the hostilities some Egyptian or Stateless Jews seem to have been treated on much the same basis as enemy aliens—a number of Egyptian Jews were temporarily interned. Their businesses were sequestrated or they were dismissed from their employment. In some cases, Italian or Greek Jews also found themselves suddenly jobless.

"Fewer than 300 Jews, it is said, were officially expelled in the tense and difficult days after the cease-fire, but about 11,000 are reported to have left the country since. Although nearly 280 Jewish-owned businesses have been free from sequestration this month, ideas of displacement seem to have gone deep and departures continue in a steady stream. Among the destinations, apparently, Brazil is far more popular than Israel.

"Many foreign residents now leaving Egypt for good are called upon to sign a declaration saying that they will not return. In addition to 'personal possessions'—in estimating which the Customs are said to be more generous now than they were in November and December—each adult may take a maximum of £E100. In practice, because of exchange difficulties, this usually takes the form, at the moment, of £E20 in travel cheques and the balance on a letter of credit . . "

U.S. Representations to Egypt.

The State Department in Washington announced on Dec. 11 that the U.S. Ambassador in Cairo (Mr. Raymond A. Hare) had been instructed to express to the Egyptian Government the "deep concern" of the U.S. Government at the reports of mistreatment of the Jewish community in Egypt. A State Department spokesman said that although Mr. Hare had been instructed to gather all the facts about this matter, "the welter of conflicting information had made it impossible for the Embassy to get a clear picture."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Neue Zürcher Zeitung)

A. MIDDLE EAST. — The U.N. Emergency Force.

The U.N. Emergency Force in the Middle East was reinforced on Feb. 3 by the arrival at Port Said of a Brazilian infantry battalion of about 500 officers and men, thereby bringing UNEF up to its target strength of two combat brigades totalling 6,000 officers and men.

The Canadian aircraft carrier *Magnificent* had arrived at Port Said on Jan. 11 with 407 Canadian reinforcements, all of whom will be engaged on the administrative side of UNEF's activities. H.M.C.S. *Magnificent* also disembarked 232 vehicles, 500 gallons of petrol, and quantities of ammunition and other supplies for UNEF, as well as four *Otter*-type planes of the Royal Canadian Air Force for "spotter" and reconnaissance work in the Sinai desert The machines will be based at Abu Sueir and will bear the U.N. insignia instead of Canadian markings while serving with UNEF.

An agreement concerning the status of the U.N. Emergency Force in Egypt was initialled in Cairo on Feb. 4 by M. Stavropoulos, legal adviser at U.N. Headquarters, and the Egyptian Deputy Foreign Minister. No details were made public. (U.N. Information Centre, London) **(Prev. rep. UNEF, 15201 A; 15316 A.)**

Corrigendum. It was incorrectly stated on page 15318 (second column) that Major-General Martola, of Finland, had been appointed personal adviser to General Burns, the Commander of UNEF. General Martola was in fact appointed personal adviser to the U.N. Secretary-General (Dr. Hammarskjold) "on matters relating to the U.N. Emergency Force." *(Ed. K.C.A.)*

A. INTERNATIONAL SUGAR CONFERENCE. — Amendment of International Sugar Agreement. - New Price Zones governing Application of Export Quotas.

An International Sugar Conference, convened by the United Nations at the request of the International Sugar Council, met in New York from May 21-June 20, 1956, under the chairmanship of M. Paul de Kronacher (Belgium). The main purpose of the conference was to review the International Sugar Agreement of 1953 (see 13273 A) and to consider methods of increasing the number of signatory countries, the International Sugar Council having previously stressed its view that, for the Agreement to be fully effective, " a much larger proportion of trade should be brought within its scope and influence."

The conference was attended by representatives of 37 countries —Australia, Belgium, Cambodia, Canada, Ceylon, China, Cuba, Czechoslovakia, Dominican Republic, Ecuador, France, Western Germany, Greece, Haiti, Honduras, Hungary, India, Indonesia, Israel, Japan, Mexico, the Netherlands, New Zealand, Panama, Peru, the Philippines, Poland, Portugal, Rumania, South Africa, Spain, Syria, the U.K., the U.S.A., the U.S.S.R., South Vietnam, and Yugoslavia. Observers were present from Argentina, Brazil, Bulgaria, Burma, Denmark, Ethiopia, Guatemala, South Korea, Nicaragua, Pakistan, Siam, Turkey, and Venezuela.

On June 20 the conference adjourned without having reached agreement on its main objects. A subsequent communiqué explained that it had unanimously adopted new proposals intended to promote " increased consumption of sugar, including consumption other than for human nutrition " (e.g. for cattle feeding and the manufacture of industrial alcohol), and had also made progress in the study of methods of operating the Agreement, including the fixing of prices and quotas. A deadlock had been reached, however, on proposals for enlarging the membership of the Agreement and for reducing the quotas of individual members, since Cuba (which exports 50 per cent of the sugar covered by the Agreement) had refused to accept a cut in her quota, while Indonesia, Nationalist China, the Philippines, and the Dominican Republic had pressed for increases in their respective quotas.

The conference resumed its sessions at Geneva on Oct. 4, 1956, and on Nov. 2 unanimously adopted a protocol amending the 1953 Agreement.

The protocol established three " price zones "; (*a*) a " medium " or " target " zone, between 3.25 and 3.45 cents per lb.; (*b*) an "upper zone," between 3.45 and 4 cents per lb.; and (*c*) a " low zone" between 3.15 and 3.25 cents per lb. It stipulated that, when prices fell within zone (*a*), the full export quotas would be released, and when they rose above 4 cents per lb. all quotas would be temporarily suspended. If, on the other hand, quotas fell below the 3.25 cent limit for 17 consecutive days, an automatic reduction of 2.5 per cent in all quotas would take place and the International Sugar Council would meet within seven days to decide on further reductions, down to a limit of 90 per cent of the agreed quotas. Should prices go below 3.15 cents a lb., the 90 per cent downward limit would not apply, and the extent of the reductions would be entirely in the Council's discretion. If the Council failed to agree and the price continued to fall, a further automatic reduction of 2 per cent would take place.

The protocol would be submitted to member-Governments for signature and would enter into force on Jan. 1, 1957 if formally accepted by Governments holding 60 per cent of the votes of the importing countries and 75 per cent of those of the exporting countries. If these percentages were not reached, those countries which had accepted the protocol might put it into force among themselves, but in any event the International Sugar Agreement in its existing form would not continue in operation after Jan. 1, 1957.

The first meeting of the International Sugar Council since the coming into force of the protocol on Jan. 1, 1957 was held on Jan. 29-31.

The Council noted that as the market price of sugar had averaged 5.84 cents per lb. for over 17 consecutive days between Jan. 1-24, and had been above 4 cents per lb. on at least 12 of these days, all quotas and limitations on exports had become inoperative under the amended Agreement from Jan. 25. In order to make the maximum supply of sugar immediately available for the free market while quotas were inoperative, the Council decided (1) to call upon exporting member-countries to release immediately for export to the free market the minimum stocks held by them under the Agreement; (2) to ensure that the exports made by any country up to the Council's next meeting should not be charged against its quotas when quotas again became operative; (3) to call on exporting countries to take all possible measures to ensure that the requirements of importing countries were met; (4) to recommend that during the period in which quotas were inoperative, each participating exporting country should, whenever possible, postpone importation of sugar from any other participating exporting country.

It was officially stated on Dec. 1, 1956 that Brazil had become the world's second largest producer of cane sugar in 1955, having increased her production to 2,309,000 tons, or 193 per cent above the pre-war (1935-39) average. Brazilian sugar production in 1955 was exceeded only by that of Cuba, which exported 4,740,000 tons.—(U.N. Information Centre, London - New York Times - Times - Financial Times - Brazilian Government Bulletin) **(15069 A; 13658 D; 13273 A.)**

B. UNITED KINGDOM. — Earth Tremors.

The most severe earth tremors experienced in England for many years occurred on Feb. 11 over a wide area of the Midlands, the shocks being felt in 11 counties—Derbyshire, Nottinghamshire, Leicestershire, Staffordshire, Northamptonshire, Lincolnshire, Yorkshire, Lancashire, Cheshire, Warwickshire and Gloucestershire—and at places as far apart as Blackpool and Sheffield in the north, Grimsby in the east, and Bristol in the west. Further but much slighter tremors also occurred on the following day. There were no fatal casualties, but a little boy in Derby had his skull fractured by falling masonry and was taken to hospital in a serious condition. Several people were treated for minor injuries and shock, and many had narrow escapes from collapsing chimney-stacks and masonry in Derby, Nottingham, Chesterfield, Loughborough, and other Midland towns. Large numbers of houses were badly shaken over a wide area.

In Derby, where the fire brigade answered over 120 calls owing to collapses of chimneys, masonry, etc., 25 girls working at the Crown Derby porcelain factory had a narrow escape when a large chimney-pot crashed through a sunshine roof. A near-panic occurred in a Nottingham cinema when the audience rushed out after the screen began shaking, while at Loughborough General Hospital part of the main roof fell on the roof of the children's ward without causing any casualties. In the Leicestershire coalfield people in mining towns and villages rushed from their homes, some being thrown to the ground by the violence of earth vibrations which persisted for several seconds. Several thousand miners in the area were deep underground when the tremors occurred, pit-props being shaken and trolleys full of coal being rocked on their rails.

The tremors, whose epicentre was believed to be in the Charnwood Forest area of Leicestershire, were described by seismologists as the most severe in England since 1884, when 1,200 houses were damaged by an earthquake in the Colchester area. Dr. A. T. Dollar, head of the Department of Geology at Birkbeck College, University of London, is to carry out a full investigation into the earth tremors of Feb. 11-12, in which he will seek the co-operation of universities, scientific departments, and other official and private organizations.

(Times - Daily Telegraph - Manchester Guardian)

C. POLAND. — Partial Currency Devaluation.

The Polish Minister of Finance (M. Dietrich) and the President of the National Bank of Poland (M. Drozniak) announced on Feb. 9 that special foreign currency rates would be introduced for the zloty for certain transactions as from Feb. 11. Accordingly, the exchange rate of the zloty would be lowered sixfold in relation to all Western currencies and to the Yugoslav dinar, thereby devaluing it from four to 24 zlotys to the dollar and from 11.20 to 67.20 zlotys to the pound sterling. In relation to the rouble area (i.e. the Soviet Union and the other " people's democracies ") the existing exchange rate would remain in force.

It was explained that the new rate would not apply to foreign trade and payments connected therewith, but would affect:

(*a*) Foreign tourists and diplomats in Poland, who would receive six times as much for their own currencies, while Polish citizens going abroad would have to pay six times as much for any foreign currency granted to them by the National Bank;

(*b*) Railway, air, and sea tickets outside the rouble area, which would also cost six times more;

(*c*) Telephone and telegraph services and postal rates (the latter to be adjusted in March);

(*d*) The cost of maintaining foreign missions, pensions and annuities, current earnings, legacies, authors' rights, fees for professional services, income from property abroad, contributions to international organizations, etc.

It was pointed out in the British press that the devaluation of the Polish zloty *vis-à-vis* the Western countries was a drastic move in Poland's efforts to raise credits in Britain and the U.S.A., as well as to attract foreign tourists and businessmen, who—at the artificially high zloty rate hitherto prevailing—had had to pay the equivalent of £3 for a breakfast or £5 for a hotel room in Warsaw. British trade with Poland, on the other hand, had always been done on a sterling basis and thus would not be affected by the new rate, the same applying to Poland's debt agreements with the United Kingdom.

(Polish Embassy Press Office, London - Financial Times)

D. FRANCE. — Civilian Order of Merit.

A decree promulgated on Feb. 2 created a new French decoration—the *Ordre du mérite du travail*—which will be awarded to civilians " on account of their professional merits." The new Order will be additional to the existing *Médaille d'honneur du travail*, which is awarded for meritorious long service by civilians.—(Le Monde, Paris) **(Prev. rep. 15260 B.)**

FEBRUARY 23—MARCH 2, 1957

A. EUROPEAN UNIFICATION. — Plan for European Free Trade Area. - British Memorandum and O.E.E.C. Report. - O.E.E.C. Council appoints Mr. Thorneycroft as Co-ordinator of Further Investigations. - Agreement between "Messina Powers" on Common Market and Euratom Treaties. - Inclusion of Overseas Territories in Common Market. - French National Assembly supports Common Market Project.

M. Spaak, the Belgian Foreign Minister, and chairman of the Inter-Governmental Conference negotiating the treaty to establish a Common Market between the members of the European Coal and Steel Community (Belgium, France, Western Germany, Italy, Luxemburg, and the Netherlands), visited London on Jan. 15 for discussions with the British Government on the question of a British association with the Common Market on the lines explained by Mr. Macmillan (then Chancellor of the Exchequer) and Mr. Thorneycroft (then President of the Board of Trade) on Oct. 3, 1956 [see page 15142].

A joint communiqué issued at the end of the talks stated that, after being received by Mr. Macmillan (the Prime Minister), M. Spaak had had talks with Mr. Thorneycroft (Chancellor of the Exchequer), Sir David Eccles (President of the Board of Trade), Lord Reading (then Minister of State for Foreign Affairs), and Mr. Walker-Smith (Economic Secretary to the Treasury). M. René Sergent, Secretary-General of the O.E.E.C., had also been present at the discussions.

Mr. Thorneycroft had explained the British proposals for establishing a free trade area in Europe, covering all goods except foodstuffs, whilst M. Spaak had given an account of the progress of the Common Market negotiations in Brussels. "There was a valuable exchange of views on the problems of common interest arising from the measures contemplated by the 'Six' and the work done in O.E.E.C. on the possibility of a European Free Trade Area. This exchange of views will facilitate the discussions on this question which will take place at the meeting of the O.E.E.C. Council opening on Feb. 12 in Paris."

British Memorandum on Free Trade Area.

A memorandum explaining the British Government's views on a European Free Trade Area was published as a White Paper (Cmd. 72) on Feb. 7, and was circulated among the members of O.E.E.C. in preparation for the O.E.E.C. Council meeting on Feb. 12-13. The memorandum reaffirmed the Government's view that a European Industrial Free Trade Area could be set up, and proposed that negotiations should be undertaken within the O.E.E.C. to establish it. The White Paper is summarized below under cross-headings.

British Views on a European Free Trade Area. After expressing approval of the work done in O.E.E.C. and elsewhere for the removal of existing trade barriers within Europe and for the development of a single market for manufactured goods, the memorandum noted that the negotiations for the establishment of a Customs and Economic Union between the six "Messina" Powers (Belgium, France, Western Germany, Italy, Luxemburg, and the Netherlands) were approaching a successful conclusion. It pointed out, however, that Britain would not be able to join such a Union owing to her particular interests and responsibilities in the Commonwealth. Membership of the Union would mean that individual tariffs would be replaced by a single common tariff with the other member-countries against the rest of the world, with the result that goods entering Britain from the Commonwealth would have to pay duty at the same rate as goods coming from any other third country which was not a member of the Customs and Economic Union, whereas goods from the Union's member-countries would be admitted free of duty. The British Government could not contemplate entering arrangements which would in principle make it impossible for Britain to treat imports from the Commonwealth at least as favourably as those from Europe.

An associated free trade area, on the other hand, offered a solution to this problem, and the recent report of the O.E.E.C. Working Party on this question [see below] had shown that it was "fully practicable for the U.K. and many other O.E.E.C. countries, including the countries which are proposing to create a Customs and Economic Union, to enter a Free Trade Area." The members of this Area would undertake to eliminate, in respect of each other's products, protective duties and other restrictive regulations, including quantitative restrictions. They would be free to keep their own separate and different tariffs on imports from outside the Area, except that the member-countries of the Customs and Economic Union would in due course establish a common external tariff.

The British Government's view was that a Free Trade Area could be established in Europe, provided that foodstuffs were excluded from its scope, and the Government hoped that other countries would also declare their willingness to negotiate on these lines.

The establishment of a Free Trade Area would raise industrial efficiency by the encouragement it would afford to increased specialization, large-scale production, and new technical and industrial developments. It should therefore strengthen the economy of Western Europe as a whole, and as a result its members would be in a stronger position progressively to remove restrictions on imports from countries outside the Area. The proposal would not involve the creation of any new barriers against trade with the rest of the world, and the British Government considered it indispensable that the Free Trade Area should be formed in such a way as to be "wholly consistent" with the existing objective of a collective approach to the widest possible system of multilateral trade and payments.

The proposed Customs and Economic Union would involve far-reaching economic integration and harmonization of financial and social policies within an appropriate institutional framework. The British idea of the Free Trade Area, on the other hand, related primarily to the removal of restrictions on trade such as tariffs and quotas, although, in practice, the progressive liberalization of trade could be expected to lead toward closer economic co-operation—i.e. multilateral payments arrangements, consultation on economic and financial questions of common interest, and co-operation in the development of constructive social policies and in movements of capital and labour. New institutions would not be required for the establishment of the Free Trade Area, as the problems could be met within the existing framework of O.E.E.C.

Foodstuffs. In connexion with Britain's desire to exclude agricultural products from the provisions of the Free Trade Area, the White Paper explained (1) that many of the independent members of the Commonwealth and of the Colonial Territories relied to an important extent on the preferential treatment which their exports of foodstuffs received in the U.K., and (2) that many European countries, including the U.K., protected their home agriculture by various means for well-known reasons, and would wish to continue to do so in the future. It was pointed out that even the Customs and Economic Union project of the Messina Powers envisaged a regulated rather than a free market for agricultural products.

Tariff Reductions. With regard to the method of reducing tariffs, the British Government insisted that "clear and unambiguous rules" should be established so that industry in each country could plan its production and investment in advance.

Revenue Duties. The right to levy duties for revenue purposes should not be impaired by the rules of the Free Trade Area, but any protective element in existing duties (whether import, export, or excise duties) should be eliminated during the transitional period.

Quantitative Import Restrictions. These should be removed within the Area by progressive annual quota increases until they were completely abolished "well within the transitional period for tariffs."

Escape Clauses. The invocation of "escape clauses" should rarely occur, and probably only on the occasion of extremely serious balance-of-payments difficulties. In that event the imposition of quotas without prior consultation should be permissible, though subject to frequent and stringent examination.

Rules of Competition. The efficient working of the Free Trade Area and the realization of its objectives would necessitate provisions "against such frustrations as the use of subsidies, artificial aids to exports, export controls, certain types of State trading, discrimination in freight rates, and the operations of private monopolies or restrictive business practices."

O.E.E.C. Report on Free Trade Area.

A report on the possibility of creating a Free Trade Area in Europe was published on Feb. 5 by the special Working Party set up by the O.E.E.C. Council in July 1955 (see 15097 A). The report is summarized below under cross-headings.

Trade Problems.

In examining the technical possibility of the operation of a Free Trade Area in Europe, the Working Party studied (*a*) the problem raised by the definition of the origin of products; (*b*) the technical considerations involved in the removal of trade barriers; and (*c*) questions arising from the fact that the Free Trade Area would include the Customs and Economic Union of the six Messina Powers, and the extent to which common or parallel solutions for problems encountered by the two systems were indispensable for practical reasons.

Definition of Origin of Products. The report pointed out that the need to define the origin of products arose from the fact that in a Free Trade Area "each participating country will retain its national tariff on imports from third countries." In a Customs Union, all countries would have a common external tariff after the end of the transitional period, and a product of outside origin entering the Union would pay the same duty whatever the country by which it entered. It might then be sent to another country in the Union, either in the same form or after processing, without need for verifying its origin.

On the other hand, the countries of a Free Trade Area, while abolishing among themselves the barriers to imports of goods originating in the Area, would retain their individual tariffs for goods originating outside the area as well as their individual import policies with regard to third countries. This would imply different treatment for two kinds of goods traded between the member-countries: those which were considered to originate in the Area, and those which were not.

The countries of the Free Trade Area would undertake to grant duty-free entry only to goods originating in the Area. Two problems would therefore have to be solved: (*a*) goods of outside origin should be prevented from enjoying the benefit of duty-free circulation within the Area; (*b*) it would be necessary to avoid deflections of the normal flow of trade which might result from the maintenance of different tariffs by countries of the Area on imports from outside

sources, and which might give rise to serious difficulties [i.e. the importation of goods for high-duty countries through low-duty countries, or the unfair competitive position of low-duty countries for the processing of raw materials from outside sources]

The Working Party concluded that, to solve these problems in a spirit of reciprocity, the member-countries of the Area should agree on common criteria for defining "origin." The working of the system would necessitate close co-operation between the member-countries, both in administrative matters and on questions of commercial policy, and should be simple enough not to impose unduly complicated formalities either on traders or on Government administrations.

The report also pointed out that "very many products . . . combine elements originating both inside and outside the Area." The Working Party considered certain principles on which solutions of this problem might be based and concluded that a satisfactory solution could be found. The best solution recommended was the narrowing of the gap between the external customs tariffs of Area countries on products which gave rise to difficulties. If this method were not possible, it was suggested that, in some cases, a solution might lie in a system allowing the exporter to claim drawback [i.e. refund] on the non-area elements incorporated in the manufactured product exported, and the importer in another member-country to pay his national rates of duty on such elements when he imported that product. Failing other solutions, each difficult case could be submitted by a country of the Area for examination by its institutions.

Removal of Tariffs and Quantitative Restrictions. The Working Party concluded that in order to make a Free Trade Area, which would include a Customs and Economic Union, practicable and manageable, and to avoid discrimination, there should be some similarity or identity between the two systems concerning the period required for the progressive abolition of tariffs, quantitative restrictions, and other trade barriers. On the other hand, the Working Party recognized that, although any element of protection should be eliminated from revenue duties during the transitional period, Governments should retain authority to levy consumer taxes of a non-protective character on imported goods.

Escape Clauses. During the process of removing tariffs and quantitative restrictions some member-countries might be unable to fulfil the obligations which they had assumed within the prescribed time limits. The difficulties which might arise would have to be "studied, averted, and solved" as far as possible by increasingly close co-operation between member-countries—such as the adoption of new forms of consultation and collaboration in economic, financial, and commercial policies and a more intensive co-ordination of these policies. In many cases, these new procedures should make it possible to avoid recourse to "escape clauses," which might still have to be invoked, however, in the case of balance-of-payments difficulties or difficulties in a specific sector of the economy. The conditions under which "escape clauses" might be invoked should be similar in both the Free Trade Area and the Customs and Economic Union, and provision should be made for close co-operation between the two systems to ensure that a country which was a member of both should receive similar treatment when seeking release from the provisions of the agreements.

Since the mutual inter-dependence of countries in the Free Trade Area would be greater than in O.E.E.C. or under GATT, the escape clauses should be narrower in scope (subject to stricter rules regarding their use) than was the case in O.E.E.C. The report suggested that it might be necessary to prevent member-countries making use of "escape clauses" without having first obtained the approval of a majority of the other members.

Rules of Competition. The use of certain "artificial" trade practices could distort competition and thus hamper the "more effective division of labour" which was one of the benefits expected from a Free Trade Area. Such practices included, under governmental action, "subsidies and other forms of export aid, export restrictions, and dual pricing," and, in private commercial business, "dumping, monopoly, or cartel policies" and restrictive business practices in general. The Working Party considered that the elaboration of rules for ensuring fair competition would require, among other things, "a procedure for the progressive abolition of such practices, in particular of export subsidies and export restrictions."

General Problems.

Because of the differences in economic structure between the member-countries of O.E.E.C., the Working Party examined the problems of economic co-ordination, the special position of agricultural commodities in European trade, and the situation of "countries in process of economic development." These questions were described in the report as "fundamental problems, the solution of which will exert a direct influence on the substance and extent of the Free Trade Area"

Economic Co-ordination. While stressing the importance of a close co-ordination of economic and financial policies, the Working Party reached no firm conclusions on details. It recommended, however, a re-examination of the rules and procedures of O.E.E.C. regarding economic and financial co-operation, the liberalization of invisible transactions, and other similar matters. There was a division of opinion within the Working Party between those members who considered that certain disparities between national regulations on social security payments, etc., should be corrected during the transitional period to prevent distortion of the free play of competition, and those whose countries were unwilling to commit themselves in advance to solutions to all the problems liable to arise in these fields.

Agriculture. The report also revealed differences of opinion on the treatment of agriculture in the Free Trade Area. Several members considered that "it would be impossible to achieve reciprocity between members if Customs barriers or quotas were abolished for exports of industrial products but retained for agricultural products." The British representative, however, considered that the Free Trade Area should not include agricultural products. The report concluded that the Council of O.E.E.C. should settle the problem, and added that in the opinion of the Working Party "the solutions which may be envisaged must take into account the desire to avoid any discrimination in the treatment accorded to agricultural products in all the member-countries of the Area."

Under-developed Countries. Some member-countries whose economies were "in process of development" would wish to join the Free Trade Area, but considered that for the time being they would have to maintain their existing protection either on all or on a substantial part of their imports, and consequently could not undertake the full obligations of membership. The Working Party considered possible solutions to this problem, but referred the matter to the O.E.E.C. Council without reaching any conclusions.

Institutions.

It was stated that questions concerning the establishment of institutions could be studied only when the nature of the obligations of membership of the Free Trade Area had been defined. Appropriate bodies would have to be constituted to ensure that the obligations of member-countries were being observed; to deal with any difficulties which might arise; to assess requests to invoke "escape clauses"; to provide a procedure for ligitation and arbitration; and to strengthen co-operation on general economic problems.

O.E.E.C. Council Decision on Preparation of Convention for Free Trade Area.

A Ministerial meeting of the O.E.E.C. Council was held in Paris from Feb. 12-13 under the chairmanship of Mr. Peter Thorneycroft, who had been elected chairman in succession to Mr. Harold Macmillan. The meeting considered the Working Party's report and the British memorandum on establishing a Free Trade Area in Europe, and the delegates of all member-countries expressed their Governments' readiness to enter into negotiations for a convention to that effect. A number of important reservations were made, however, including continued British insistence on the exclusion of agricultural products.

Mr. Thorneycroft reminded the Council that it was not the purpose of the meeting to take irrevocable decisions. "If I can regard a free trade area as a house," he said, "we are not here so much to buy the house as to decide whether we should draw up the plans for one. When those plans have been made, we can decide whether to build the house." He stressed that no-one should be excluded from the "circle of European friendship" just because he could not fulfil the obligations of the Free Trade Area or of the Customs Union, and that "special arrangements" would have to be made to associate all in due course with the new work. Mr. Thorneycroft concluded: "We meet here not only as friends but as Europeans, men conscious of the history, traditions, geography, culture, perils, and hopes that bind us in some sense together to-day."

Sir David Eccles (President of the Board of Trade) told the Council that previous British Governments had been cautious towards the "European idea" because "to many of our people every step towards Europe appears as a step away from the Commonwealth." A practical way of reconciling responsibilities to Europe with those to the Commonwealth had now been found, however, "and in Britain we are ready for the decisive offer we are making at this meeting." After saying that Britain's wish to join a Free Trade Area was "not a case of political fascination," Sir David added: "We are not dreaming of a 'third force' or of a European block endowed with supranational institutions and anxious to rival Russia or the United States. We are more prosaic and . . . more practical."

The aim was that the countries of Western Europe should become strong and rich together, in order to raise living standards and to be in a position to contribute more to stability and the prosperity of the whole world. They were all "under-developed countries" unless they combined, and liberated and expanded their markets; otherwise, savings would be insufficient for the necessary investments in Europe and overseas.

As regards agriculture, however, Sir David Eccles explained that Britain was forced to adopt a special position—both for the sake of British farmers, who would have to be protected in one way or another, and also because of the "indispensable arrangements" with Commonwealth suppliers. "The U.K. would be a poor partner in Europe without the goodwill of the Commonwealth," and it would be impossible for Britain to enter a Free Trade Area which included agriculture. On the other hand, Britain had in fact a liberal agricultural policy with a moderate tariff, and in 1956 she had imported £350,000,000 worth of agricultural products from Western Europe—more than any other O.E.E.C. country had imported from its European neighbours.

M. Spaak, speaking on behalf of the six "Messina" Powers, said that the signature of the Common Market treaty should "not be delayed for a single day" in order to wait until Britain and the other O.E.E.C. countries were ready with the Free Trade Area. If any amendments would be needed in the Common Market treaty to reconcile it with the other scheme, they would have to be made afterwards. Moreover, he strongly opposed the British plan to exclude agriculture.

Dr. Erhard (West German Minister of Economic Affairs) welcomed the idea of the Free Trade zone as not only the most important contribution but also "the decisive political and economic initiative towards the integration of Europe."

Hr. Krag (Danish Minister of Economic Affairs), as well as the representatives of Greece, Turkey, and Portugal, declared that their countries could not join a free trade area if agricultural products were treated in a different way, although Hr. Krag himself recognized that Britain might need special treatment because of Commonwealth food production.

The Canadian and U.S. representatives stressed that the interests of countries outside the zone should be fully taken into account. Strong support for the Free Trade Area came from the Swedish and Swiss representatives, but the delegates of the Irish Republic, Greece, Portugal, and Turkey all expressed anxiety lest the establishment of free trade in Europe might damage their economies, which were still in process of development.

At the end of its meeting the Council adopted the following resolution:

"The Council . . . decides to enter into negotiations in order to determine ways and means on the basis of which there could be brought into being a European Free Trade Area which would, on a multilateral basis, associate the European Common Market with other member-countries of the Organization, and to prepare the necessary instruments. It draws special attention to the objectives of finding ways to ensure the expansion of trade in agricultural products on a non-discriminatory basis between all member-countries of the Organization. It also draws attention to the need to deal with the special situation of member-countries in the course of economic development.

"The Council requests its Chairman [Mr. Thorneycroft];

(1) to propose to the Council the setting-up of Working Parties required for this work and, in particular, those which shall be concerned with finding solutions to the problems referred to above;

(2) in the light of the declarations of the representatives of Member and Associated Governments at the [present] meetings of the Council . . . to guide and co-ordinate the work undertaken in pursuance of this resolution; and

(3) to submit a report to the Council on the results of this work in time for it to take further decisions before July 31, 1957.

"The Council invites the Governments of the Associated countries to be represented on the Working Parties concerned . . ."

It was commented in the Press that Mr. Thorneycroft's function as "co-ordinator" in the planning of a wide European free trade area would give Britain a guiding influence on the work of the expert committees which were to draw up the convention for associating the Free Trade Area with the six-nation Common Market.

Agreement between "Messina Powers" on Draft Treaties for Common Market and Euratom.

The Prime Ministers and Foreign Ministers of the "Messina Powers" met in Paris from Feb. 18-20 to discuss the last outstanding problems in the drafting of treaties for the establishment of a European Common Market and Euratom—principally the question of the inclusion in the Common Market of overseas territories of member-countries, as proposed by France, and the question of whether or not Euratom should be the sole owner of fissile materials. Those present were: Dr. Adenauer and Dr. von Brentano (Western Germany); M. Van Acker and M. Spaak (Belgium); M. Mollet, M. Pineau, and M. Maurice Faure (France); Signor Segni, Professor Martino, and Signor Badini-Confalonier (Italy); M. Bech (Luxemburg); and Dr. Drees, Dr. Luns, and Mr. Van der Beugel (Netherlands).

A communiqué issued on Feb. 20 announced that agreement had been reached on the above-mentioned questions and that it was hoped that the two treaties would shortly be ready for signature. The communiqué was worded as follows:

"Agreement was reached on the problems relevant to the association of overseas territories with the Common Market. It was agreed that the treaties should embody those principles expressing the willingness of the six countries to associate their overseas territories with the Common Market and to contribute to the economic and social investments required for the development of these territories. A first convention, concluded for five years and attached to the treaty, will define the terms of the application of these principles. It will lay down the participation of the member-States in the big investment effort they are prepared to make in favour of the oversea territories. The convention will also establish the methods whereby the markets of member-States and oversea territories shall be progressively opened to reciprocal exchanges. Before the expiry of this first convention a new agreement will be negotiated within the Council of Ministers [i.e. of the Common Market].

"It was further agreed that the European Atomic Energy Community [Euratom] shall have property rights in special fissile materials.

"At the end of this meeting the Ministers took note that their work, conducted under the active leadership of M. Spaak, is sufficiently advanced to allow the results to be submitted shortly to their respective Councils of Ministers, and to hope that the two treaties may be signed shortly in Rome.

"The six Heads of Government reaffirmed the intention of their Governments to pursue their efforts for an even closer European integration, towards which the Euratom and Common Market treaties will constitute a decisive step."

Authoritative press reports on the European Investment Fund for the oversea territories of member-countries during the first five-year period stated that it would amount to $580,000,000 (£207,000,000). Of this sum, France and Western Germany would each contribute $200,000,000, Belgium and the Netherlands each $70,000,000, Italy $40,000,000, and Luxemburg $1,250,000. These figures represented a compromise between a French proposal for $500,000,000 excluding her own contribution, and a German proposal for $500,000,000 including the French contribution.

As regards the distribution of the fund, $512,000,000 would go to French overseas territories (mainly in Africa and Madagascar), $35,000,000 to Dutch overseas territories (Surinam and Netherlands New Guinea), $30,000,000 to the Belgian Congo, and $5,000,000 to Italian Somaliland.

France would thus receive $312,000,000 over and above her contribution, in the following instalments: first year $30,250,000; second year $40,250,000; third year $50,250,000; fourth year $70,250,000; fifth year $120,250,000. Italy would receive $35,000,000 less than her contribution, Belgium $35,000,000 less, and the Netherlands $35,000,000 less. The German Federal Republic and Luxemburg (which have no oversea territories) would receive nothing in return for their contribution.

In return for securing foreign investments, France would progressively open her overseas markets to the five other member-countries. Tariffs and quota restrictions would be lowered over a period of 15 years, and tariffs would simultaneously be raised on colonial products entering the Common Market from outside sources.

The French Government had earlier submitted a memorandum to the other governments for the inclusion of her overseas territories in the Common Market for a trial period of five years.

The plan envisaged (*a*) that during the five-year period tariffs and other forms of discrimination which prevented European goods from circulating in the French overseas territories should be reduced; (*b*) that the other five member-countries should simultaneously extend to the oversea territories the same advantages as those which, by virtue of the Common Market Treaty, would be current within the European community; and (*c*) that the other countries would contribute an average of $35,000,000 annually over the five-year period to an investment fund.

In opposition to this scheme the West German delegation proposed not merely that the figure of $500,000,000 should include the French contribution, but that it should take the form of a simple aid programme, without any "political strings" and without the removal of tariffs or integration of economies.

Previous Ministerial Meetings.

Prior to the various meetings, the Foreign Ministers of the six Powers had held further meetings to discuss various points which had arisen during the work of the Inter-Governmental Committee in Brussels. In addition, M. Spaak had had discussions with Netherlands Ministers at The Hague, while M. Mollet and Dr. Adenauer had met in Paris.

Foreign Ministers' Paris Meeting, October 1956. The communiqué issued after this meeting (held on Oct. 20-21) stated that the Foreign Ministers had received a report from M. Spaak on the work of the experts engaged in drafting the Euratom and Common Market treaties in Brussels. After discussion, they had come to the conclusion that although agreement had been reached on many points, there remained "a number of divergencies" that would necessitate consultation with their respective Governments.

It was reported in the Press that the main subjects discussed by the Ministers had been (*a*) the conditions regarding the harmonization of wages and social charges which France wished to be met in connexion with the proposed Common Market, (*b*) the question of including overseas territories in the Common Market, (*c*) the problem of the ownership and purchase of fissile material; (*d*) a proposal put forward by the "Action Committee for a United States of Europe" regarding the appointment of a committee of "three wise men" for the Euratom project.

Foreign Ministers' Brussels Meetings, January-February 1957. As a result of these meetings, held on Jan. 28 and Feb. 4, the Foreign Ministers reached agreement on all outstanding problems concerning the Common Market and Euratom, except for the question of the inclusion of overseas territories and the ownership of fissile material.

Press reports stated that the subjects on which solutions had been reached included the future common tariff *vis-à-vis* third countries; details of the gradual reduction of Customs duties and import restrictions between the six member-countries during the 15-year transitional period; the establishment of a consultative committee to advise the European Commission (the executive organ of the Common Market) on such questions as competition, non-discrimination, free exchanges of goods, etc.; transport policy; the composition of the Euratom-Common Market Assembly; and the membership of the Council of Ministers for the two institutions.

M. Spaak's Hague Visit. M. Spaak's discussions with Netherlands Ministers (on Feb. 3) concerned a number of Common Market problems such as the inclusion of agriculture, the question of a common tariff *vis-à-vis* non-member countries, and the eventual association of overseas territories with the Common Market.

It was reported in the Press that the Netherlands Government had opposed any restrictions on the Common Market principle for agricultural products; that it favoured a lower common tariff than France was willing to apply; and that it was also reluctant to assume political commitments through the inclusion of French overseas territories.

Mollet-Adenauer Meeting. A statement issued after this meeting (which took place in Paris on Nov. 6) said that the two Heads of Government had had "very satisfactory" conversations about Euratom and the Common Market, which should make it possible to overcome the difficulties encountered by the conference of the six Foreign Ministers on Oct. 21. The statement added:

"They have expressed their grave concern that the co-operation of the Western Powers may not have been hitherto affirmed with sufficient force. In an atmosphere of complete mutual confidence, the two Heads of Government have expressed the wish that a solidarity should affirm itself in future without default, not only between the European Powers, but also with all the Powers of the Atlantic alliance and those of the free world.

"As for themselves, the two Governments will spare no effort to achieve this result, which they consider to be of vital importance. To this end they propose that meetings at ministerial level should be held periodically between the two Powers concerned."

Three-Man Committee on Euratom.

A committee of "three wise men," as proposed by the Action Committee for a United States of Europe on Sept. 20 (see above), was appointed on Nov. 16, 1956, at a meeting of the Brussels Inter-Governmental Committee attended by the Foreign Ministers of the six "Messina Powers."

A communiqué stated that the committee would consist of M. Louis Armand (France), Herr Franz Etzel (German Federal Republic) and Professor Francesco Giordani (Italy); that it would work "within the framework of the Brussels Conference under the chairmanship of M. Spaak"; and that it would "report within two months on the amount of nuclear energy which could be produced in the near future by the six countries, and on the means which should be employed to achieve this." The Committee would "seek information from the competent authorities as to the prospects regarding energy requirements, sources of energy, and atomic energy programmes in the countries concerned," and had been authorized "to approach the competent authorities of third countries in order to gather the information necessary for the successful fulfilment of its task."

M. Armand is president of the Industrial Development Committee of the French Atomic Energy Commission, and president of the French National Railways; Herr Etzel is vice-president of the High Authority of the European Coal and Steel Community; and Professor Giordani is president of the Italian National Research Council, and had previously been president of the Italian National Committee for Nuclear Research.

At the invitation of Mr. Dulles (the U.S. Secretary of State) and Admiral Strauss (chairman of the U.S. Atomic Energy Commission) the three-man committee visited the U.S.A. from Feb. 8-13. A joint communiqué was issued on Feb. 8 by the State Department, the Atomic Energy Commission, and the Committee saying that the United States anticipated "active association" in Euratom. The communiqué was worded as follows:

"(1) A Committee appointed by the Governments of Belgium, France, Germany, Italy, Luxemburg, and the Netherlands, which are negotiating the Treaty for a European Atomic Energy Community (Euratom), has concluded its official visit to Washington. The Committee . . . called upon President Eisenhower, the Secretary of State, and the Chairman of the U.S. Atomic Energy Commission, and held discussions with officials of the Department of State and the Commission.

"(2) The Committee's task is to determine the extent to which atomic power can meet Europe's growing energy needs. The availability and cost of energy has become a limiting factor on the growth of Europe's economic strength and welfare. The Committee's review of needs and possibilities has led it to adopt as an objective the stabilization of fuel imports early in the 1960's. To meet this target would require that nuclear power plants with a total generating capacity of 15,000,000 kw. be installed within the next ten years.

"(3) Examination of the Committee's programme indicates that its objective is feasible. Under present circumstances the availability of nuclear fuels is not considered to be a limiting factor. A joint group of experts to be designated by the Committee and the [U.S.] Atomic Energy Commission will continue to examine the technical problems posed by the Committee's objective.

"(4) The Committee pointed out that the Atomic Energy Community (Euratom) which will result from the present Brussels negotiations provides the framework and the stimulus required to realize the Committee's objective. It would mobilize in Europe the technical and industrial resources required, and would provide a political entity competent to afford adequate safeguards and to enter into comprehensive and practical engagements with the U.S. Government.

"(5) The U.S. Government welcomes the initiative taken in the Committee's proposal for a bold and imaginative application of nuclear energy. On Feb. 22, 1956, President Eisenhower, in announcing the allocation of 20,000 kilograms of [Uranium] 7-235 for sale or lease outside the U.S.A. for peaceful purposes, stated: 'Significant actions are under way to create an international agency and an integrated community for Western Europe to develop peaceful uses of atomic energy. The United States welcomes this progress and will co-operate with such agencies when they come into existence.' The U.S.A. anticipates active association in the achievement of the Committee's objective and foresees a fruitful two-way exchange of experience and technical development. . ."

French National Assembly Support for Common Market.

At the end of a two-day debate (Jan. 22-23), the French National Assembly adopted by 322 votes to 207 an *ordre du jour* expressing general agreement with the project for a European Common Market, subject to certain conditions. The resolution was presented by a number of deputies all of whom were delegates either to the Council of Europe or to the Assembly of the European Coal and Steel Community, the sponsors including Socialists, Radicals, and Independents. The *ordre du jour* was worded as follows:

"The National Assembly . . . welcomes the progress which has been made toward a treaty for a European Common Market which will guarantee the essential interests of the French economy, and calls upon the Government to continue the negotiations with a view to obtaining, before the signature of the treaty:

"(1) Confirmation of the agreement already reached by experts with regard to the harmonization of *charges salariales*" [i.e. equal pay for men and women, and adoption of the French system of overtime pay];

"(2) A system of long-term contracts guaranteeing prices of agricultural products before the end of the first stage of the transitional period [i.e. from four to six years], and the progressive replacement of national market organizations for farm products by European organizations which will give no less security than hitherto, but on the basis of a European agricultural policy";

"(3) As regards oversea territories, to ensure that their association with the Common Market should be regulated by treaty on the basis of the principles laid down by the Government" [namely, that since all six of the "Messina Powers" would have access to this large market, they should all make a suitable contribution to oversea investment and offer substantial markets themselves to the oversea territories a principle enunciated by M. Mollet in his speech to the National Assembly].

"The Assembly also asks that the negotiations for the creation of a Free Trade Area, which should include Great Britain and which should contain guarantees equivalent to those envisaged for the Common Market Treaty, should be pursued with determination and brought to a successful conclusion as soon as possible;

"In view of the perspectives opened by the Common Market, the Assembly calls upon the Government to pursue an investment policy aimed at the modernization of the French economy and the establishment of equilibrium in the balance of payments."

Much of the debate was concerned with the British attitude, and, in particular, with the British plan for a Free Trade Area—a matter first raised by M. Mendès-France, who expressed concern lest the Common Market project should prejudice the British proposals for a Free Trade Area, and who voted against the *ordre du jour*. M. Mollet, however, denied that France had to make a choice between "two methods of co-operation," since if the Common Market failed to come into existence the Free Trade Area would be "no more than a dream." After describing the Common Market and the Free Trade Area as complementary, he said that, with British agreement, a clause would be included in the Common Market Treaty allowing for modifications which the subsequent creation of a Free Trade Area might make necessary.

M. Mollet, in winding up the debate, admitted that France was taking a risk in joining the Common Market, but suggested that there was no alternative if she was to continue her policy of industrial and agricultural expansion. Even if France chose to stand out of the Common Market, she could not prevent its creation by the other five Powers, who were determined to create a larger trading area. Moreover, the idea of a wide free area was supported by Great Britain and the other O.E.E.C. countries.

The 322 deputies approving the *ordre du jour* comprised 98 Socialists, 73 M.R.P., 70 Independents (Conservatives), 24 Radicals, 11 dissident Radicals, 18 U.D.S.R., 11 *paysans*, three Social Republicans, and five *non-inscrits*. The 207 opposing votes comprised 149 Communists and *progressistes*, 36 Poujadists, 14 Radicals (including M. Mendès-France), and a few U.S.D.R., Social Republican and *non-inscrit* deputies. Thirty deputies voluntarily abstained from voting (including 11 Independents), while 17 took no part in the vote (among them 12 Social Republicans) and 16 were absent.—(O.E.E.C. Information Division, Paris - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - Frankfurter Allgemeine Zeitung - Corriere della Sera, Milan - Algemeen Handelsblad, Amsterdam - New York Times) **(Prev. rep. 15137 A.)**

A. UNITED KINGDOM. — Civil Estimates, 1957-58. - Growth of Expenditure on Social Services. - Increase in Price of School Meals and Welfare Milk. - Higher National Health Service Contributions. - Supplementary Civil and Defence Estimates, 1956-57.

Mr. Thorneycroft, the Chancellor of the Exchequer, announced in the House of Commons on Feb. 19 that the total Estimates of civil expenditure in 1957-58 (excluding defence expenditure by the Ministries of Supply and Defence, as well as self-balancing expenditure) would be £2,654,000,000, an increase of £110,000,000 over the total Estimates (including Supplementaries) for 1956-57, or of £173,000,000 over the original Estimates for that year. He also announced economy measures affecting school meals, welfare milk, and National Health Service contributions, intended to moderate the fast-growing burden of social service expenditure, and estimated to save about £37,000,000 in 1957-58 and about £57,000,000 in a full year.

Mr. Thorneycroft explained that the main items in the increase in Civil Estimates for 1957-58 were for Education (£63,000,000), the National Health Service (£49,000,000), and Atomic Energy (£31,000,000). The Social Services as a whole showed an increase of £146,000,000 over the original Estimates for 1956-57—largely due to higher prices, salaries, and wages, but in part also to increases in the number of children to be educated and in the use being made of the National Health Service. Grants to Local Authorities for other services, as well as for education, showed "a marked upward tendency."

The Chancellor continued: "Although much of this expenditure—particularly that on the programmes of atomic energy and technical education—is of a productive character, yet the very large and continuing increase in our total expenditure, Defence and Civil, imposes a burden on the economy which the Government cannot ignore. It also represents a threat to the high level of public and private investment on which productivity depends."

After referring to Mr. Sandys' statement [in the Defence debate on Feb. 13—see 15403 A] that a comprehensive review of the Defence programme was in progress, Mr. Thorneycroft stated that although it was impossible to announce the figures for Defence expenditure for 1957-58, they would be less than the original figure of £1,500,000,000 for 1956-57. The amounts of the full Estimates would be published in a Defence White Paper before the end of March. It would, however, be wrong for the Government to seek to meet its difficulties by making changes in defence policy alone, and on the Civil side it had therefore decided to make changes in three fields, as follows:

(1) In the field of local Government finance it was proposed to introduce, among other measures, a general grant in substitution for a number of percentage grants. This should introduce a stabilizing influence in the Central Government's contribution to local expenditure.

(2) The Government had reviewed the subsidies involved where supplies were provided by the State below cost, and had decided on the following measures:

(*a*) From April 1 the price of welfare milk provided for children up to five, and to expectant mothers, would be increased from 1½d. to 4d. a pint, roughly half its cost. There would be corresponding increases in the price of national dried milk. The saving was estimated at £14,000,000.

(*b*) The charge for school meals would be increased by 2d. to 1s., also from April 1. Existing arrangements for hardship [under which 3½ per cent of the 3,000,000 children taking school meals have them free] would be continued. Estimated saving—£3,500,000.

(3) Finally, the Government had decided to introduce legislation to establish a separate National Health Service contribution towards the growing cost of the Service.

The Chancellor explained that when the N.H.S. was introduced it was expected to cost £175,000,000 a year, but by 1949-50 the cost had risen to £450,000,000. He continued: "At that time Sir Stafford Cripps was so concerned by this that in 1950 he imposed a ceiling of £400,000,000 on Exchequer expenditure below which the cost of improvements and extensions to the Service had to be contained. In 1957-58 the total cost of the Service will be £690,000,000. Toward this, as things stand now, £40,000,000 would come from the contribution made from the National Insurance Fund—10d. in respect of the adult man and lesser sums in respect of other contributors. £100,000,000 would come from a variety of other receipts (including charges to patients) and the whole of the balance of £550,000,000—or £49,000,000 above last year—would be provided by general taxation.

"The alternatives to this increase in the charge on the Exchequer are to reduce the scope of the Service, to charge more to patients, or to increase the contribution. It is widely believed that the National Health Service is paid for by weekly contributions. This is not so. The contribution has never paid for more than a small proportion of the cost of the Service, and this proportion has steadily declined each year.

"When the original National Health Service Bills were before Parliament, it was expected that the Fund's contribution would provide about one-fifth of the gross cost of the Service. Today it provides only about one-seventeenth. We therefore propose to increase the contribution by 10d. in respect of an adult man, and by smaller sums in respect of adult women and juveniles. The employer will pay the same proportionate share as at present. Our purpose is to establish a separate National Health Service contribution toward the cost of the Service. Next year, the contributory element will rise from one-seventeenth to about one-ninth of the gross cost of the Service. Separate legislation for this purpose will be introduced as soon as possible. The change will provide an additional £40,000,000 for the Exchequer in a full year. In the meantime, no credit has been taken in the Estimates for the relief to the Exchequer next year [1957-58], which we hope will be about £20,000,000."

The Chancellor's announcement was strongly criticized on behalf of the Opposition by **Mr. Harold Wilson,** who declared that the Government had completely failed to control inflation and were "taking it out on those who can least afford to pay." He called for undertakings that there would be no reduction in the total grant for local authorities as compared with 1956-57, and no increase in charges under the National Health Service. He also asked the Chancellor to estimate the effect of the proposals regarding welfare milk and school meals on the living costs of families with young children, and warned him of the possible repercussions of the increase in N.H.S. contributions on the wage-price spiral.

Mr. Thorneycroft, in reply, said that the general grants to local authorities would not be in effect in 1956-57. The cost of the increased milk and school-meals prices would be 2s. for a family of two children, including one at school, and 2s. 10d. for a family of three children, two of them at school. As to the effect of the increase in N.H.S. contributions, he contended that 10d. was "not unreasonable," and that "when dealing with a service which is costing £690,000,000, compared with £175,000,000 when it was introduced, it is not unreasonable to go back to the traditional arrangement whereby people contribute a little when they are well to enable them to be looked after when they are ill." He refused to give any assurance that there would be no increase in charges under the National Health Service.

Government expenditure in 1957-58 on Civil and Revenue departments and the Ministry of Defence was estimated in the Civil Vote on Account (published on Feb. 20) at £3,197,000,000, compared with £3,059,000,000 in 1956-57.

The total included (in addition to the £2,654,000,000 mentioned by Mr. Thorneycroft on Feb. 19) self-balancing expenditure of £307,000,000 for the Post Office, £218,000,000 for Defence items included in the Ministry of Supply Vote, and £18,000,000 for the Ministry of Defence. The largest single estimate (£550,000,000) was for the National Health Service, but the biggest increase (nearly £42,000,000) shown by any one service was for Education and the Universities. The estimated expenditure on the principal social services, with the increases on the corresponding expenditure for 1956-57, are shown in the following table:

Service	1957-58 £	Increase (+) or decrease (−) £
National Health Service	550,100,000	+21,600,000
Education and Universities ..	445,000,000	+41,900,000
National Insurance and Family Allowances	225,400,000	+ 5,600,000
National Assistance	133,000,000	+ 3,800,000
War Pensions, &c.	88,025,000	+ 1,426,000
Housing	79,060,000	+ 2,081,000

Other principal items (1956-57 figures in parentheses) were: Ministry of Supply, £252,000,000 (£222,000,000); Agriculture and Food, grants and subsidies, £208,000,000 (£222,000,000); Exchequer Grants, £104,730,000 (£85,510,000); War Pensions, £88,020,000 (£89,450,000); Housing, £79,050,000 (£76,970,000); Roads, £67,620,000 (£54,380,000); Police, £47,890,000 (£46,670,000); Broadcasting, £30,840,000 (£29,340,000).

Supplementary Estimates, 1956-57.

Supplementary Civil Estimates for 1956-57, amounting to £94,400,000 and bringing the total of revised and supplementary Estimates for the current year to £107,360,796, were published on Feb. 6.

The largest single item was £26,900,000 for the National Health Service, including £15,000,000 for hospital running costs, £8,000,000 for drugs, appliances, and medicines, and £2,900,000 and £1,600,000 respectively for additional payments to doctors and dentists. Other items included £12,000,000 for pay increases in the Civil Service, £10,100,000 for Education, £8,500,000 for the Ministry of Supply, and £3,700,000 for the Atomic Energy Authority. Smaller sums included £750,000 for the relief of distressed British subjects in the Middle East, £500,000 for aid to Hungarian refugees, and £140,000 for an advance on account of the U.K. subscription to the U.N. Emergency Force in the Middle East.

Supplementary Estimates for the Army and the Royal Navy for 1956-57 were published on Jan. 28 and Feb. 19 respectively, and are summarized below:

Army. The total of the Supplementary Estimates was £39,000,000, required to cover additional expenditure of £48,000,000 (less savings) and increased appropriations amounting to £9,000,000. The cost to the Army of the "Suez emergency" was given as £29,900,000, including an additional £11,000,000 for movement of stores and £2,500,000 extra for movement of troops by sea and air. Apart from the Suez expenditure, the largest individual increases were £10,000,000 for deliveries of stores ordered in earlier years and nearly £8,000,000 to cover higher prices, wages, and freights.

Royal Navy. The Supplementary Estimates totalled £11,000,000, required to cover increased expenditure (partly offset by economies) of £11,500,000 on account of higher wages, prices, and freights; £3,000,000 for payments to the Atomic Energy Authority, the Ministry of Supply, and certain oil companies; and £2,000,000 for additional expenditure arising out of the Suez emergency.

Mr. Sandys, the Minister of Defence, stated in a written answer on Jan. 28 that the total cost of the Suez operations was estimated at "about £35,000,000."—(Treasury Press Office - Times - Daily Telegraph - Manchester Guardian)

A. LITERATURE. — Book Selections, January-February 1957. - British Book Production in 1956.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Appleton, Sir Edward—"Science and the Nation." The B.B.C. Reith Lectures for 1956. (Edinburgh University Press, 10s. 6d.)

de Beauvoir, Simone—"The Mandarins." Translated from the French. (Collins. 18s.). *Prix Goncourt* Award for 1956.

Bonnard, André—"Greek Civilization: Volume I—From the Iliad to the Parthenon." Translated from the French. (Allen and Unwin, 30s.)

Bryant, Arthur—"The Turn of the Tide." Based on the War Diaries of Field-Marshal Viscount Alanbrooke. (Collins, 30s.)

Carrington, Richard—"Mermaids and Mastodons: A Book of Natural and Unnatural History." (Chatto and Windus, 25s.)

Chute, J.B.—"Greenwillow." A Novel of American Rural Life. (Robert Hale, 10s. 6d.)

Collier, Basil—"Official History of the Second World War: The Defence of the United Kingdom." (H.M. Stationery Office, 50s.)

Constance, Arthur—"The Inexplicable Sky." (Werner Laurie, 21s.)

Cooke, Colin—"The Life of Richard Stafford Cripps." (Hodder and Stoughton, 30s.)

Cottrell, Leonard—"Seeing Roman Britain." (Evans, 21s.)

Crompton, John—"The Living Sea." (Collins, 15s.)

Elvin, Harold—"The Ride to Chandigarh." (Macmillan, 25s.)

Hoehling, A. A. and Mary—"The Last Voyage of the Lusitania." (Longmans, 16s.)

Irononger, Lucille—"The Ghosts of Versailles." (Faber and Faber, 21s.)

Masterman, J. C.—"The Case of the Four Friends." (Hodder and Stoughton, 12s. 6d.)

Mikes, George—"The Hungarian Revolution." (André Deutsch, 12s. 6d.)

Moore, Bernard—"The Second Lesson: Seven Years at the United Nations." (Macmillan, 25s.)

Morgan, Charles—"Challenge to Venus." (Macmillan, 15s.)

Neale, J.E.—"Elizabeth I and her Parliaments, 1584-1601." (Cape, 30s.)

Patterson, Sheila—"The Last Trek: A Study of the Boer People and the Afrikaner Nation." (Routledge and Kegen Paul, 28s.)

Roskill, Captain—"The War at Sea, 1939-1945: The Period of Balance." (H.M. Stationery Office, 42s.)

Speaight, Robert—"The Life of Hilaire Belloc." (Hollis and Carter, 30s.)

Somervell, D. C.—"A Study of History, by Arnold J. Toynbee: Abridgement of Volumes VII-X." (Oxford University Press, 25s.)

Templewood, Viscount (Sir Samuel Hoare)—"Empire of the Air: The Advent of the Air Age, 1922-1929." (Collins, 21s.)

West, Rebecca—"The Fountain Overflows." (Macmillan, 16s.)

United States. Powell, Richard—"The Philadelphian." (Charles Scribner's Sons, New York, $3.95)

Russ, Martin—"The Last Parallel: A Marine's War Journey." (Rinehart, New York, $3.95)

White, William S.—"Citadel: The Story of the U.S. Senate." (Harper and Brothers, New York, $3.75)

France. Caisseau, Pierre-Dominique—"Visa pour le préhistoire: Shangrila, la vallée perdue de Nouvelle-Guinée." (Albin Michel, Paris)

Jouhandeau, Marcel—"Nouvelles images de Paris." (Gallimard, Paris, 420 francs)

Manton, Jo—"Un destin: Albert Schweitzer." (Albin Michel, Paris, 600 francs)

Parinaud, André—"L'affaire Minou Drouet." (Julliard, Paris, 450 francs)

The number of new books published in Britain during 1956 was 19,107 (including 5,302 reprints or new editions), the biggest categories being fiction (3,443), children's books (1,754), educational (1,700) and religious (1,035).

All these categories showed some decline during the year, the biggest absolute decline being in fiction (259). Other categories to show declines were art and architecture, sociology, sports and pastimes, and poetry and drama. The biggest proportionate increases were in travel and adventure, biography, medicine and surgery, natural history, and politics.

The 1956 total was 855 fewer than in 1955 and 81 fewer than in 1954, but was nevertheless the highest since 1937 with the exception of these two years.—(Ed. K.C.A. - The Bookseller)
(Prev. rep. 15299 B; Book Production, 14606 B.)

B. AVIATION. — Inauguration of Trans-polar Air Service between Denmark and Japan.

The first commercial air service between Europe and Japan *via* the North Pole was inaugurated on Feb. 24 by the Scandinavian Airlines System (SAS), when the airliner *Guttorm Viking* left Copenhagen (Kastrup airport) for Tokio. On the same day the airliner *Reidar Viking* left Tokio for Copenhagen to inaugurate the service in the reverse direction. The two airliners (both DC-7 Cloudmasters) passed each other in the vicinity of the North Pole, where they exchanged greetings, the *Guttorm Viking* arriving at Tokio in the scheduled time of 30 hours and the *Reidar Viking* reaching Copenhagen 1½ hours behind schedule owing to adverse head-winds.

The *Guttorm Viking* carried a crew of 12 Scandinavians, headed by a Danish chief pilot, and 47 passengers, among whom were Prince Axel of Denmark, Mr. Hans Christian Hansen (Prime Minister of Denmark), Dr. Halvard Lange (Foreign Minister of Norway), Mr. Lindell (Swedish Minister without portfolio), and Mr. Thor Heyerdahl, the Norwegian geographer and leader of the Kon-Tiki Expedition. Passengers on the *Reidar Viking* included Prince Mikasa (youngest brother of the Emperor of Japan), Princess Mikasa, and Mr. Araki, the Japanese Minister of Transport.

The Prime Minister of Denmark made a broadcast from the *Guttorm Viking* over the North Pole, carried by radio networks in 28 countries, welcoming the opening of the trans-polar service as "a great pioneering exploit" and a token of international co-operation. Over the Pole Mr. Hansen released by parachute a canister containing the United Nations flag, the text of his broadcast, and microfilmed copies of pages from the Jan. 1, 1957, edition of 700 newspapers in many languages.

The Copenhagen-Tokio trans-polar service shortens the journey from Europe to the Far East by roughly one-quarter as compared with the present southerly route *via* India, cutting the distance from 10,300 to under 8,000 statute miles and reducing the time from 52 to 30 hours. From Copenhagen the route runs to the west of the Norwegian coast, thence over Spitzbergen, the Arctic Ocean, and the North Pole, thence across Alaska, and finally along a route running near the Aleutians and on to Tokio. There is only one stop *en route* for refuelling—at Anchorage, Alaska. The service will operate twice weekly in both directions.—(Politiken, Copenhagen - Berlingske Tidende, Copenhagen - Aftenposten, Oslo)
(Prev. rep. Trans-Polar Air Services, 14359 C; 13916 D.)

C. WESTERN GERMANY - UNITED KINGDOM. — Reciprocal Social Security Agreements.

Reciprocal agreements on social security were signed in London on Dec. 18, 1956, by Mr. Selwyn Lloyd, the U.K. Foreign Secretary, and Herr Storch, the German Federal Minister of Labour.

The first agreement, covering unemployment insurance and assistance, will enable nationals of one country living in the other to have their records of employment and insurance contributions in both countries taken into account if they become unemployed and claim benefit in either country. The second agreement covers benefits under the National Insurance and Industrial Injuries schemes, and provides for insurance in both countries to be taken into account when a person claims benefit under the scheme of either country. Each country also undertook to pay certain benefits in the other country to people qualifying for them.

A protocol on health services entitles U.K. nationals taking up employment in Germany, and certain groups of National Insurance beneficiaries, to take advantage of the German health services, in return for reciprocal National Health Service facilities for Germans employed in Britain.

The agreements take effect on ratification by both countries. (Ministry of Labour Gazette - Frankfurter Allgemeine Zeitung)

D. INDIA. — Control over Movement of Pakistani and South African Nationals.

Under a presidential Ordinance which came into force on Jan. 30, the Government of India was empowered (*a*) to exercise some control over the movements of Commonwealth nationals in India similar to the control of movements of foreigners; (*b*) to exempt from such control citizens of any Commonwealth country, or any individual foreigner.

By a separate Order the Government exempted citizens of all Commonwealth countries from the purview of the Ordinance, except those of Pakistan and South Africa. This meant that all Pakistani and South African nationals entering India with valid passports would have to register with the authorities and report their movements to the police, like other foreigners, and that they could be deported if they overstayed the period of their visas.

It was explained that the Ordinance [which amended the Foreigners Act of 1946 and the Registration of Foreigners Act of 1939] had been issued because a Bill on similar lines, introduced in the last session of Parliament, could not be passed for lack of time.—(Indian High Commissioner's Office, London)

A. ITALY. — Political Developments. - Negotiations for Reunification of Italian Socialist Partics. - New "Consultation Agreement" between Communists and "Nenni Socialists." - Abandonment of "Unity of Action" Pact. - Differences between "Nenni" and "Saragat" Socialist Parties. - Signor Saragat's Insistence on Non-collaboration with Communists as Pre-condition for Socialist Unification. - Signor Togliatti's Declaration on Communist Policy. - Restoration of Relations between Italian and Yugoslav Communists.

Important developments in the Italian political situation during the past six months are described below under cross-headings. They relate principally to (1) the attempts to bring about the reunification of the two Italian Socialist parties—the left-wing Italian Socialist Party headed by Signor Pietro Nenni, and the Social Democratic Party headed by Signor Giuseppe Saragat; (2) relations between the Italian Communist party and the "Nenni" Socialists; and (3) developments within the Italian Communist party.

Negotiations for Unification of Italian Socialist Parties.

Exploratory discussions, aimed at ending the schism between the two Italian Socialist parties, were undertaken in Rome from Aug. 30-Sept. 6, 1956, by M. Pierre Commin (assistant secretary of the French Socialist party), acting on behalf of Mr. Morgan Phillips, secretary-general of the Committee of the International Socialist Conference (Comisco).

M. Commin had previously visited Italy during the summer in a private capacity, and had established contacts with Signor Nenni and Signor Saragat. His subsequent mission on behalf of Comisco was carried out with the approval of the Labour and Socialist parties of Western Europe and at the invitation of the two Italian parties. Signori Nenni and Saragat had had a personal meeting on Aug. 27-28—their first since 1947, when the "Saragat" Socialists broke away from the "Nenni" Socialists after the latter had allied themselves with the Communists.

During his visit to Rome M. Commin presided over round-table discussions between leaders of the two Socialist parties, and also had a number of meetings with Signor Nenni, Signor Saragat, and other leaders of the two parties—including Signor Vigorelli, the Social Democratic Minister of Labour, and Signor Ignazio Silone, the eminent writer and a supporter of Signor Saragat. Before leaving for Paris, M. Commin received memoranda from Signori Nenni and Saragat outlining the views of the two parties on the question of reunification.

Nenni Memorandum. The principal points made by Signor Nenni were as follows: (1) a united Socialist party, if created, should abandon the policy of *centrismo* (i.e. collaboration with the Christian Democrats and other Centre parties) and should work for the creation of "a new majority capable of applying the Constitution in its entirety"; (2) in international affairs, a united party should promote "an active policy of *détente* and peace aimed at overcoming the division of the world into opposing military blocs"; (3) all Italian workers should be grouped into "a single united trade union federation, autonomous and independent of party, of which the Italian General Confederation of Labour (C.G.I.L.) represents the natural and democratic base."

The programme outlined by Signor Nenni called, by implication, for two major concessions by the Social Democrats. Firstly, the insistence on the abandonment of *centrismo* meant that Signor Saragat's party was asked to give up its collaboration with the Government, in which the "Saragat" Socialists are allied with the Christian Democrats and the Liberals. Secondly, the support expressed for the C.G.I.L. meant that Social Democratic workers were being called upon to leave their own labour federation and to join one of extreme Left-wing character.

[There are two main trade union organizations in Italy: (1) the *Confederazione Generale Italiana del Lavoro* (C.G.I.L.), representing the Communist and Left-wing (Nenni) Socialist workers, and (2) the *Confederazione Italiana dei Sindacati dei Lavoratori* (C.S.I.L.), representing the non-Communist unions—Christian Democratic, Social Democratic, and Republican. See 10706 B.]

Saragat Memorandum. The chief points made by Signor Saragat were (1) the complete acceptance of democratic principles, and "the exclusion of all Popular Front formulas both as regards elections and the composition of a Government"; (2) a foreign policy which would not only promote international peace and the relaxation of tension, as urged by Signor Nenni, but would also be based on "the solidarity of the democratic world" and on Italy's full co-operation with the West; (3) trade union unity "within the framework of an organization which, free from party ties, will represent permanently the interests of the working classes and will have a clearly democratic internal structure."

Signor Saragat's insistence on the "exclusion of all Popular Front formulas" meant, by implication, that the Nenni Socialists were being called upon to abandon their alliance with the Communists as a condition of unification between the two Socialist parties. The "Saragat" memorandum also differed from Signor Nenni's proposals in laying emphasis upon continued Italian association with the West, and on a trade union federation with a "clearly democratic" structure.

Before leaving Rome, M. Commin suggested a five-point programme on which the two Socialist parties should agree while working out the practical problems of reunification: (1) the cessation of "polemics" between the two parties; (2) efforts by both parties, in dealing with day-to-day problems, to show that they were working for the same objectives; (3) the preparation of a common economic and social programme; (4) the preparation of a constitution for a reunified party; (5) in the final phase, the convening of separate party congresses at which the decision should be taken to unite in a single party.

New "Consultation Agreement" between Nenni Socialists and Communists. - Abandonment of "Action Pact" of 1946.

After a meeting on Oct. 4, 1956 between Signor Nenni and Signor Palmiro Togliatti, the Communist leader, it was announced that the respective party directorates had agreed to examine "new methods of consultation" between the two parties "based upon working-class unity and taking into account changes in the situation." On Oct. 7 the Communist party organ *Unità* and the "Nenni" Socialist organ *Avanti* published the text of a new agreement replacing the "unity of action" pact concluded between the two parties in 1946 (see 8261 A), and worded as follows:

"The Italian Socialist party and the Italian Communist party . . . are agreed that changes in the situation necessitate forms of collaboration between them different from those established under the pact for unity of action concluded in 1946. Consequently, they have decided that co-operation between them shall take the form of consultations at the centre and in local organizations to examine problems of fundamental interest for the working-class and of common action by all workers."

Leaders of the Italian Socialist Party emphasized that the "unity of action" pact of 1946 had become "redundant"; that the new "consultation agreement" would make relations between the two parties more "elastic"; and that future contacts between them would be "occasional" and no longer "regular" as in the past. Writing in *Avanti* on Oct. 9, Signor Nenni pointed out that the two parties "no longer have a common political platform" and that the various organs set up in the past to ensure unity of action "no longer exist." He defended the new "consultation agreement" on the ground that both parties had "common day-to-day problems to solve in the factories, villages, co-operatives, and trade unions."

Social Democratic Party's Protest at "Consultation Agreement" between Nenni Socialists and Communists.

The executive committee of the Social Democratic Party, meeting in special session in Rome on Oct. 5, 1956, denounced the new "consultation agreement" between the Communists and the "Nenni" Socialists as "irreconcilable with the conditions which were adopted in the discussion between the two [Socialist] parties when they discussed their reunification." Signor Saragat denounced what he described as Signor Nenni's "capitulation" to the Communists, declared that the future of the Social Democratic Party would not be "mortgaged" to the Communists, and urged his party to "continue to fight alone for working-class unity through Democratic Socialism." He and other party leaders insisted that there could be no question of reunification between the two Socialist parties unless the "Nenni" Socialists unequivocally broke off all contacts with the Communists.

After further discussions on Oct. 12, however, the executive committees of the "Nenni" and "Saragat" parties agreed to continue their negotiations on party reunification, and to set up a permanent committee—consisting of three members from each party—to study the ways and means to attain that objective.

Signor Nenni emphasized in an *Avanti* article that the "consultation agreement" with the Communists should not be considered an obstacle to the reunification of the two Socialist parties. He pointed out *inter alia* that the Italian Socialist party had not "bound" itself to the Communists, and that there had been no intention of committing the Social Democrats to a "Popular Front" policy. Signor Saragat, however, retorted that "the pact uniting the Socialists and Communists must be denounced" and that all ties between those two parties "must be severed" before Socialist reunification could become a fact.

The three "Saragat" members on the joint reunification preparatory committee—Signor Giancarlo Matteotti (secretary-general of the Social Democratic Party), Signor Tanassi (a member of the party directorate) and Signor Saragat himself—resigned from the committee on Dec. 13 in protest at an *Avanti* article which accused Signor Saragat of "blind support" for the Atlantic Pact and "vulgar anti-Communism."

Italian Socialist Party Congress. – Approval for Signor Nenni's Policy Statement. – Election of New Central Committee.

The 32nd national congress of the Italian Socialist Party, held in Venice from Feb. 6-10, 1957, resulted in unanimous approval for a resolution (sponsored by Signor Nenni) calling *inter alia* for the reunification of the two Socialist parties, and pledging the Italian Socialist Party to democratic methods "without reservation." The congress was attended by Mr. Morgan Phillips, representing the Socialist International, and by observers from the Labour and Socialist parties of Western Europe, including Mr. Aneurin Bevan from Britain and M. Pierre Commin from France.

The congress was opened with a speech by Signor Nenni, who spoke for nearly five hours.

Signor Nenni claimed that the close co-operation between the Communists and the Italian Socialist Party had played an important part in "saving democracy" in Italy during the immediate post-war years. From 1953 onwards, however, the situation had changed and the ties between the two parties had become progressively loosened. In its relations with the Communists, the Socialist Party had now "passed from unity to freedom of action and initiative," and the only remaining link between the two parties was the "class solidarity" which brought together Marxist and Christian workers in the face of "common responsibilities, problems and struggles." After denouncing the Russian brand of "reactionary" Socialism, and describing the Soviet intervention in Hungary as "the gravest error made by the Soviet Union since the October Revolution," Signor Nenni emphasized that the split between the Italian Socialist Party and the Communists had been accentuated, above all, by M. Khrushchev's revelations at the 20th Congress of the Soviet Communist Party, by the Soviet repression of the Hungarian workers' uprising, and by the events in Poland.

Appealing for the reunification of the Italian Socialist and Social Democratic parties, Signor Nenni declared that his party stood unequivocally for representative Government, universal suffrage, and a freely-elected Parliament. As the Socialist Party had freed themselves from their ties with the Communists, so the Social Democratic Party should also abandon its present policy of co-operation with the "Centre bourgeois parties."

In conclusion, Signor Nenni appealed to the Italian Socialist Party (1) to work for Socialist reunification, (2) to "block any possibility of a clerical regime," and (3) to work for a solution of Italy's economic and social problems.

The congress ended with the unanimous adoption of a resolution declaring that "the path to Socialist unity is open," and that "the common front policy [i.e. collaboration with the Communists] is no longer possible or useful in view of the new prospects for Socialism." After appealing to the Social Democratic Party to convene a national congress as a first step toward reunification, and emphasizing the Italian Socialist Party's acceptance of democratic principles, the resolution laid down several basic directives for future policy, as summarized below:

(1) The party remained "internationalist" in foreign policy and would strive to develop contacts and establish ties with the workers' movements of both Western and Eastern Europe. "Faithful to its neutralist ideals," it would continue to oppose military blocs, to work for progressive disarmament, and to strengthen the United Nations.

(2) Support was expressed for a policy of European unity aimed at making Europe an independent force "standing for democratic and social progress, mediation, and peace." European policies such as Euratom and the Common Market were approved, provided that the interests of the workers were guaranteed and the needs of under-developed areas taken into account.

(3) The "class basis" of the party made it desirable that co-operation with Communist workers should continue on concrete issues, as well as co-operation with Roman Catholic workers wherever possible. Socialist workers should remain in the C.G.I.L., but the party would strive to make Italian trade unionism non-political and to achieve trade union unity.

Despite the unanimous support for his policy at the party congress, Signor Nenni suffered a temporary reverse on Feb. 11, when a ballot for a new central committee of the party resulted in the election of only 27 of his followers out of a total committee membership of 81, the remaining 54 seats being divided between three "rebel" groups within the party. After 48 hours of negotiations, however, a compromise was reached on Feb. 13 whereby Signor Nenni retained the party leadership and his supporters retained a three-to-two majority on the party's executive committee.

The balloting for the 81 members of the new central committee resulted in the election of 30 supporters of the late Signor Morandi (Signor Nenni's predecessor in the party secretaryship), 27 supporters of Signor Nenni, 15 supporters of Signor Lelio Basso (also a former party secretary), and nine supporters of Signor Pertini, who is regarded as the leader of the pro-Communist wing of the party. During the Venice congress Signor Nenni had strongly criticized "intrigues" within the party, and it was believed that the *Morandiani* and the "Basso" and "Pertini" groups had taken umbrage at his remarks and had engaged in intensive lobbying prior to the election of the central committee. The *Morandiani* are for the most part younger men owing their positions in the party organization to the late Signor Morandi; they have no political leader and, as a group, are not opposed to the reunification policy.

The *Morandiani* and the "Basso" group subsequently assured Signor Nenni that the voting for the central committee had no political significance; that it reflected merely a preference for certain individuals as executors of the party policy; and that there was no question of lack of confidence in him personally, as shown by the unanimous approval given to his policy by the party congress. Signor Nenni nevertheless took the view that the balloting had shown a lack of confidence in himself, and expressed reluctance to continue in the party secretaryship unless he was assured that the new executive committee would include a majority of his followers and that key positions in the party were entrusted to persons enjoying his confidence.

After prolonged and almost non-stop discussions lasting 48 hours, a compromise settlement was reached on Feb. 13 whereby it was agreed (1) that the party's Secretariat should consist of Signor Nenni (as secretary-general), Signori Mazzali and De Martino (both supporters of Signor Nenni), Signor Vecchietti (representing the party machine, and hitherto editor of *Avanti*), and Signor Basso; (2) the *Morandiani* would remain in control of key organizational posts; (3) the 21-member party directorate (drawn from the central committee) would comprise 10 followers of Signor Nenni, seven *Morandiani*, and four from the "Basso" group. No representatives of the pro-Communist "Pertini group" were appointed to either of these bodies.

It was also announced that the two deputy-editors of *Avanti* would act in future as co-editors of the paper, under the general supervision of Signor Nenni. During the Venice congress Signor Nenni had announced his intention of replacing Signor Vecchietti in the editorship of *Avanti* in the reshuffle of party posts after the congress.

Signor Saragat's Attack on Signor Nenni. – Social Democrats to remain in Government Coalition.

In an article in the Democratic Socialist organ *La Giustizia*, published on Feb. 12, Signor Saragat said that the voting for the new central committee of the Italian Socialist Party had shown "the realities of the underlying tendencies in the Nenni party"; namely, that only 30 per cent of the party had "leanings towards Social Democracy" and that 70 per cent were still "orientated or definitely anchored to philo-Communist positions."

After declaring that it was "the highest good fortune" for the Social Democrats that these "tendencies" should have shown themselves when they did, Signor Saragat added: "One has only to think what might have happened if . . . the flowery cloak of Nennian eloquence had been able to hide the reality. Socialist reunification would have taken place in conditions which would have represented a real and complete absorption of a democratic Socialist party such as ours into a party of predominantly totalitarian tendencies." In the course of his article Signor Saragat bitterly attacked Signor Nenni for "opportunism," "duplicity," and lack of "political and intellectual honesty."

After a two-day meeting on Feb. 22-23, the executive committee of the Social Democratic Party passed a resolution declaring that only "future concrete actions" by the Italian Socialist Party could show whether or not Socialist unity was possible on the basis of full acceptance of the principles of parliamentary democracy. The view was expressed that the Venice congress of the "Nenni" party, while representing a "step forward," did not represent the "decisive step" on the road to Italian Socialist reunification. It was also agreed that the Social Democratic Party should remain in the Government coalition, and that no immediate steps should be taken to call a special party congress on the question of reunification.

Signor Saragat's Discussions with British Labour Delegation. – Criticism of Alleged Comment by Mr. Aneurin Bevan.

While visiting Italy for the Venice congress of the Italian Socialist Party, Mr. Aneurin Bevan and Mr. Morgan Phillips had discussions with leaders of both Italian Socialist parties on the prospects of reunification. They subsequently visited Rome on Feb. 9 for a meeting with Signor Saragat, a joint statement being issued speaking of a "long, friendly, and frank conversation" and of "a complete understanding of reciprocal points of view."

On the previous day (Feb. 8) Signor Saragat had strongly criticized a statement, alleged to have been made by Mr. Bevan in a press interview on Feb. 7, which quoted Mr. Bevan as saying that the Socialist International might have to make a "painful choice" between the "Nenni" and "Saragat" parties if they did not reunite. [Only one Socialist party from each country can be affiliated to the Socialist International, the Italian party at present represented being the Social Democratic Party.] Signor Saragat said that Mr. Bevan's remarks, if correctly reported, constituted a "plain threat" to the Italian Social Democrats that they might be "kicked out" of the Socialist International. After charging Mr. Bevan with 'inadmissible interference" in the affairs of the Social Democratic Party, Signor Saragat stressed that Mr. Bevan, though a "welcome guest" in Italy, had no authority to speak for the Socialist International, which had been officially represented at Venice by Mr. Morgan Phillips.

La Giustizia published on Feb. 6 the text of a letter which had been sent by Signor Saragat to Mr. Morgan Phillips in September, 1956, laying down the following "minimum requirements" for a reunification of the two Italian Socialist parties: (1) democracy "must be accepted as a permanent value and not as a tactical device"; (2) any form of "popular front" with the Communists must be ruled out; (3) Italian foreign policy must be based on solidarity with the West; (4) trade union unity must be realized within a democratic framework; (5) a reunited Socialist party must possess a democratic structure.

Christian Democratic Party Congress. - Attitude to Unification of Socialist Parties.

At the sixth annual congress of the Christian Democratic Party, held at Trento from Oct. 15-19, 1956, much of the discussion centred on the *pourparlers* between the two Socialist parties on the question of reunification. Signor Amintore Fanfani, the party's secretary-general, emphasized that the Christian Democrats were in no circumstances prepared to collaborate with any Socialist party associating itself with the Communists, and denounced the new "consultation agreement" between the Communists and the "Nenni" Socialists as extending, rather than loosening, the former "unity of action" pact. He also warned the Social Democrats that their participation in a unified Socialist party based on collaboration with the Communists might result in their exclusion from the Coalition Government.

By a show of hands, the congress approved a motion by Signor Fanfani and the party leadership declaring that any future collaboration between the Christian Democrats and a unified Socialist party could only materialize if the Socialists unequivocally severed all ties with the Communist party. Resolutions by the party's left-wing, urging an approach to the "Nenni" Socialists with the aim of "isolating" the Communists, and by the party's right-wing, proposing co-operation with the Monarchists, were both heavily defeated.

Communist Party Congress. - Signor Togliatti on Communist Policy. - Expulsion of Signor Reale.

As in France and other Western countries, the Soviet military intervention in Hungary led to many resignations from the Italian Communist party (see page 15226, first column) and to widespread criticisms of the party leadership for supporting the Russian action. The C.G.I.L. (the Communist-dominated trade union federation) published a statement on Oct. 27, 1956, deploring the "intervention of foreign troops" in Hungary and expressing sympathy for those who had "fallen in the Hungarian blood-bath," whilst Signor di Vittorio (secretary-general of the C.G.I.L., and a leading Communist) called for "profound modifications" in the structure and policy of the Italian Communist party, involving, if necessary, changes in the party leadership. Signor di Vittorio was severely rebuked for these remarks by the Communist organ *Unità*, which had refused to publish a manifesto by some 120 Communist intellectuals criticizing the party leadership and condemning Soviet intervention in Hungary and Poland.

The eighth congress of the Italian Communist party was held in Rome from Dec. 8-12. The discussions were centred on a lengthy policy statement which had been issued on Oct. 14, 1956—i.e. before the Hungarian uprising.

The policy statement affirmed the party's intention of pursuing "an Italian road to Socialism," based upon democratic methods and eschewing violence. After describing the post-war Republican Constitution as containing the "essential elements . . . for the development of Italian society and the Italian State," the statement affirmed that Italian Communists "have never believed and do not believe in violence for its own sake"; that "the idea of a revolution imposed by foreign armies is absurd and ridiculous"; and that the Italian people and working-class had "the historical task of building Socialism by methods differing from those by which the dictatorship of the proletariat was achieved in other countries." The statement contained frequent references to collaboration with other parties "in the march to Socialism," and to the desirability of a "Popular Front" for achieving this aim.

Whilst making no direct reference to M. Khrushchev's exposures of "Stalinism," the policy statement acknowledged that "errors" and "grave violations of legality" had occurred in the U.S.S.R. and the "people's democracies" after World War II. It added, however, that these "errors" had now been "denounced and corrected" and that they did not affect the "enormous positive balance" of Soviet achievements.

The party congress was opened with a three-hour speech by Signor Togliatti, who spoke on the theme of "The Italian Road to Socialism" as defined in the policy statement. In the course of his speech Signor Togliatti expressed full support for the Soviet Government's intervention in Hungary.

Signor Togliatti asserted that the uprising in Hungary had been caused "only to a small extent by the mistakes committed by the Hungarian Communist Party, but mainly by imperialist and capitalist propaganda engineered by American and West German secret services and financed by Wall Street." He attributed many of the troubles of East European countries to "servile imitation of the Soviet model," declaring in this connexion that the "principles . . . which have led to the victorious passage to Socialism in one country, the Soviet Union, cannot be applied universally nor copied mechanically" Stressing that there could be no return to the past system of intervention in the affairs of national Communist parties, he called for a new international Communist system based upon bilateral relations between individual parties, accompanied by "a sort of international division of work, reduction of costs, increase of productivity, and thus an increase of well-being in each country."

In the course of his speech Signor Togliatti said that the Italian Communist party was being weakened by "political arguments" which tended to sap its strength, and declared that the party must not become a "debating club" but must remain "a revolutionary and fighting political party." He attacked Signor Saragat and the Social Democrats as "enemies of the people," and warned Signor Nenni that he would "divide the working-class" if the reunification of the Socialist parties were based upon Social Democratic precepts.

Overwhelming support was expressed for Signor Togliatti's policy statement, although, for the first time at a Communist congress, outspoken criticisms of his leadership were made by two of the delegates—Signor Antonio Giolitti (a nephew of the famous statesman Giovanni Giolitti, Prime Minister after the First World War) and Signor Fausto Gullo, who had been Minister of Agriculture and Minister of Justice in several Cabinets after the Second World War.

Signor Giolitti, a Communist deputy from Piedmont, declared that the Soviet intervention in Hungary was irreconcilable with the principles of true Socialism, and strongly criticized the official attitude of the Italian Communist party toward the Hungarian uprising. After appealing for a "regeneration" of the party based upon "more democracy and internal freedom," he concluded, with reference to the present party leadership: "If we cannot change the minds, we should change the men."

Signor Gullo spoke along similar lines and, like Signor Giolitti, declared that the events in Hungary had shown that the Government and Communist party in that country were "completely isolated" from the people.

Signor Togliatti's position was strengthened by the election of a new central committee of 110 members (elected from the 1,064 delegates attending the party congress) consisting almost entirely of his supporters. On Dec. 17 the new central committee confirmed Signor Togliatti as secretary-general of the party (a position he has held uninterruptedly since 1927, and which he exercised in exile before 1944), and at the same time eliminated five of his opponents from the party's Politburo.

Among those removed from the Politburo was Signor Pietro Secchia, for many years organizing secretary of the Italian Communist party, and until January, 1955, one of the two vice-secretaries of the party with Signor Luigi Longo. Signor Secchia had been "demoted" from the latter post on Jan. 18, 1955, after the previous party congress, and had been relegated to the comparatively minor post of regional secretary for Lombardy, though remaining a member of the Politburo. He was regarded as the leader of a group critical of Signor Togliatti for alleged "softness" and "lack of revolutionary *élan*."

One of the leading personalities in the Italian Communist party, Signor Eugenio Reale (a former senator), was expelled from the party by Signor Togliatti on Dec. 31, 1956, for criticizing the party leadership in the "bourgeois" press. Signor Reale had reorganized the Italian Communist party after the collapse of the Fascist regime, and was its recognized leader until Signor Togliatti returned to Italy from Moscow in 1944.

In a letter on Dec. 29 to the *Corriere d'Informazione*, of Milan (a Christian Democratic newspaper), Signor Reale had expressed "profound disagreement" with the party's policy, which he described as founded on "deliberate violation of Socialist ideals," and had declared that the party should have sided openly with the Hungarian insurgents. In a subsequent press interview to the weekly *Espresso*, and in other press statements, Signor Reale accused Signor Togliatti and his associates in the party leadership of "blind subservience to Russia" and said that Togliatti himself had "always been a Stalinist."

Signor Reale appealed against his expulsion to the party's control commission, maintaining that he was entitled to a personal hearing under the party's statutes. His appeal was rejected on Jan. 26, 1957, when the party also announced the expulsion of Signor Fabrizio Onafri (a leading intellectual) for "conducting a campaign inside the party on behalf of so-called 'revisionists'" and for "preparing the transfer of groups of comrades to another party" [presumably the "Nenni" Socialists.]

Signor Reale stated after his expulsion that the 1956 membership of the Italian Communist party was about 1,600,000, and not 2,300,000 as claimed by the party's propaganda organization.

Restoration of Relations between Italian and Yugoslav Communist Parties. - Italian Communist Delegation visits Belgrade.

An Italian Communist party delegation headed by Signor Luigi Longo paid a 10-day visit to Yugoslavia from Oct. 6-15, 1956, at the personal invitation of President Tito, who had invited such a delegation to visit Belgrade during his talks with Signor Togliatti earlier in the year (see 14922 A). A joint statement, published in Belgrade on Oct. 15, said that the discussions had yielded "positive results" and that the future co-operation between the Italian Communist party and the League of Yugoslav Communists would bring the workers' movements of both countries closer together and promote "increased understanding between the two Governments.

On returning to Italy, Signor Longo described the Yugoslav Communist system as a "most original and efficient form of popular democracy," and forecast "frequent visits and exchanges of views" between the Italian and Yugoslav parties. He expressed "great satisfaction" over his personal meeting with President Tito, who, he said, had greatly impressed him by his "wide understanding of international problems and his determination to collaborate with all countries in the defence of peace and the safeguarding of the freedom and independence of peoples."

The restoration of mutual co-operation between the Italian and Yugoslav Communist parties closed the breach which had existed between them since Yugoslavia's expulsion from the Cominform in 1948.—(Corriere della Sera, Milan - Giornale d'Italia, Rome - Avanti, Rome - Le Monde, Paris - Times - Manchester Guardian) **(Prev. rep. Communist and Socialist Parties, 15020 A; 14922 A; Christian Democratic Party, 13687 B; Social Democratic Party, 12276 B.)**

A. FRANCE - SOVIET UNION. — Three-Year Trade Agreement. - Increase in Trade Exchanges.

A new trade agreement between France and the Soviet Union was signed in Paris on Feb. 11. Valid for three years from Jan. 1, 1957, it envisaged trade exchanges on a basis growing from year to year, so that at the end of 1959 the volume of trade would be three times the 1955 total.

Lists attached to the agreement, laying down the goods to be supplied year by year, provided for French exports to the U.S.S.R. of capital equipment (35,000,000,000 francs), steel products (31,000,000,000 francs), machine-tools, leather, copper, cork, cocoa, etc.; in addition, a number of agricultural products would be exported to settle the Soviet trade deficit resulting from the previous agreement. French exports of capital goods would include locomotives, electric instruments and equipment (including radio and television equipment), mining machinery, machinery for the chemical and food industries, cables, etc.

The principal Soviet exports to France would be anthracite (2,000,000 tons), oil (1,800,000 tons), manganese (475,000 tons), asbestos, timber, newsprint, cotton, various other raw materials, caviare, furs, etc.

To avoid any shortfall in Soviet orders, such as had occurred under the previous agreement (see 13044 A), the new agreement not only provided definite lists of goods to be exchanged, but also laid down that the major part of the orders must be placed before Dec. 31, 1957. It was stated in the French press that the Soviet negotiators had proposed to include goods which came under the ban on the export of strategic materials, but that the French side had declined this, especially in view of recent events in Hungary.

M. Kumykin, who signed on behalf of the Soviet Union, stated that Franco-Soviet trade exchanges in 1955 had amounted to 30,000,000,000 francs in each direction, and in 1956 to 37,000,000,000 francs. In 1957 they would rise to 57,000,000,000 francs (an increase of nearly 50 per cent over 1956) and in 1959 to an estimated 96,000,000,000 francs.

B. INDIA.—Indian Vessels not to call at South African Ports. - Directive by Indian Steamship Company.

The chairman of the Indian Steamship Company, Mr. Ramaswami Mudaliar, announced in Calcutta on Jan. 20 that the company had directed its vessels not to call at any South African ports. This action followed a statement by the South African Minister for External Affairs (Mr. Louw) that, in view of sanctions applied by India against South African trade [in retaliation for South Africa's treatment of her Indian population], South Africa would be justified in refusing facilities at her ports to Indian ships. Mr. Mudaliar added that his company's directives had been issued immediately after they had learned that Indian vessels had actually been refused facilities in South Africa.—(The Statesman, Calcutta - Indian High Commissioner's Office, London)

C. RUMANIA. — Abolition of Compulsory Agricultural Quotas. - Revision of Wages System.

A plenary session of the central committee of the Rumanian Workers' (Communist) Party, held from Dec. 27-29, 1956, decided on a number of important economic changes aimed at giving greater emphasis to the raising of the standard of living. The principal decisions, recommended in a report by M. Gheorghiu-Dej (the First Secretary of the party), were as follows:

Agriculture. It was decided to abolish the system of compulsory quota deliveries for agricultural products introduced in 1948. As from Jan. 1, 1957, individual as well as co-operative farmers would no longer be compelled to deliver fixed quotas of wheat, rye, maize, potatoes, hay, and milk, and would also be exempted from forced deliveries of meat. Instead, the Government would set up a number of special contracting and purchasing boards which would carry out the purchase of agricultural products. Farmers would be given a voice in the fixing of prices, and, as a further step to stimulate production and meet the peasants' grievances, prices of many farm products would be increased.

M. Gheorghiu-Dej admitted in his report that the compulsory quota system had proved a failure and was, in fact, hampering the development of Rumanian agriculture.

Re-examination of Five-Year Plan. The Central Committee decided to "re-examine" the five-year plan for 1956-60 with a view to reducing State investments and devoting a larger part of the national income to satisfying the people's needs by developing agriculture and the production of consumer goods. Industrial development would still continue as a priority, but would be slowed down to bring it into harmony with the real resources of the country and to improve the balance between investment and consumption.

Revision of Wages System. The wages system would be revised with a view to creating greater incentives. Basic wages would be increased by 30 per cent, resulting in an average income increase of 15 per cent as compared with present average incomes, and of more than 15 per cent for the lowest-paid groups. At the same time there would be an improved bonus system for workers in industrial enterprises in order to stimulate production.

M. Gheorghiu-Dej declared that the existing level of wage rates was "unsatisfactory," and that it had had an "adverse influence on the interest of the workers in raising productivity."

Decentralization in Industry and Local Administration. To reduce the existing "over-centralization, red tape, and bureaucracy" the powers of managements of industrial and State agricultural enterprises in planning output and distributing income within their factories or firms would be increased, and local industry would be put under the control of local government administrations. In addition, managements and local "people's councils" would be allowed to dispose of the main part of their profits for housing schemes, canteens, and the distribution of bonuses for the benefit of their workers.

The committee's resolution admitted that these policy changes (many of which followed the Yugoslav model without adopting the "Titoist" ideology) had been made necessary by the failure of the policy of enforced industrialization and collectivization to improve the standard of living.
(Agerpres, Bucharest) **(Prev. rep. 14002 C; 14817 A.)**

D. BOLIVIA.—Abolition of Multiple Exchange Rates. - I.M.F. "Stand-by" Credit. - U.S. Exchange Stabilization Credits.

The International Monetary Fund announced on Dec. 15, 1956, that the Bolivian Government, after consultation with the Fund, had put into effect a comprehensive economic stabilization programme providing for a fundamental reform of the exchange system and for procedures for exchange stabilization. It also envisaged major adjustments in taxation, Customs tariffs, Government expenditure, wages, and social security; the removal of price controls; and measures to eliminate the deficits of the principal Government-owned enterprises.

It was explained (1) that in place of the complex system of multiple rates previously existing, Bolivia's new exchange system would be based on a unified fluctuating exchange rate; (2) that trade and exchange restrictions were being removed; and (3) that the Central Bank of Bolivia would allow the boliviano to find its appropriate level in a free market as quickly as possible.

The announcement added that the I.M.F., in order to support Bolivia's currency stabilization efforts, had agreed to a one-year "stand-by" arrangement under which Bolivia might purchase foreign currencies from the Fund equivalent to $7,500,000. In addition, Bolivia had concluded an exchange agreement for $7,500,000 with the U.S. Treasury, as well as an arrangement with the U.S. International Co-operation Administration, which was making $10,000,000 available for the same purpose.—(International Monetary Fund, Washington)

A. UNITED KINGDOM. — Mr. Sandys' Statement on British Defence Policy. - Development of British Megaton Bomb. - Danger of Soviet Atomic Rocket Attacks. - Rejection of Opposition Censure Motion. - Publication of Votes on Account, 1957-58. - Manpower Reductions in Armed Forces.

Mr. Duncan Sandys, the Minister of Defence, made an important statement on Britain's future defence policy to the House of Commons on Feb. 13. In the course of his speech he announced that the R.A.F. held a substantial stock of British atomic bombs, and that the development of the first British megaton bomb was almost complete.

Mr. Sandys said that "a turning-point" had been reached in defence which required "large decisions" to be taken. A great deal of work had been done by his predecessor (Mr. Head), who had formulated definite proposals, and the money spent in recent years had not been wasted. Although he described "talk about defence expenditure being reduced overnight" as "wishful thinking," Mr. Sandys pointed out that if the defence programme was allowed "to roll on unchecked," the outlay during the coming financial year would be over £1,700,000,000. This compared with a total of about £1,600,000,000 originally budgeted for the 1956-57 financial year, so that savings of £100,000,000 alone would be needed "just to keep level."

Mr. Sandys went on: "Big changes in military expenditure would involve big changes in policy. If such changes are to be introduced smoothly without creating chaos . . . it is bound to take a certain amount of time. Without savings in manpower we shall never get substantial savings in money. In so far as it is consistent with the needs of defence, it is the Government's first aim to end the call-up as soon as practicable. How soon that will be depends on how much we can reduce the total numbers now in the three Services and how far we can step up the rate of voluntary recruitment." Since the introduction of improved conditions and pay a year ago there had been some increase in the rate of recruiting and in the numbers prolonging their engagements, but "a lot more than that" was needed.

"As Minister of Defence" Mr. Sandys continued, "my first responsibility is defence and . . . I am not going to slash about indiscriminately, lopping off bits and pieces here and there where it is easiest. My task is to reshape the Forces, not to mutilate them. Any reduction must be part of a coherent plan which makes sense militarily as well as financially. Above all, it must take account of the realities of to-day—the whole balance has been upset by the development of the hydrogen and the megaton bomb. The American Strategic Air Force is now in a position to carry bombs of destructive power hundreds of times greater than the bomb dropped on Hiroshima. It is wise to assume, I think, that the Russians can do much the same. Atomic weapons of Hiroshima power are regarded now as primarily suitable for tactical use by troops in the field.

"This has entirely altered the whole situation. However efficient our defences, it is inconceivable that they could provide 100 per cent immunity against air attack. If only half a dozen nuclear bombers got through they could in a single raid cause incalculable death and devastation over enormous areas. I am referring to attacks by manned bombers flying at over 50,000 feet at speeds close to that of sound. These are difficult enough to bring down, but Britain might soon be open to attack by ballistic rockets. After the war the Russians took over the German rocket ranges, and there is every reason to believe they are engaged on a larger version of the V-2 rocket with a nuclear warhead. The range of this rocket would probably be sufficient to reach Britain from launching points within Soviet-controlled territory. They would rise to a height of over 100 miles in the stratosphere and travel at a speed of over 5,000 miles an hour.

"So far no weapon has ever been invented to which there is no answer. I do not doubt that the ballistic rocket will prove no exception, but it would be absurd to pretend that we could quickly evolve an effective defence against that form of attack. The present superiority of the means of attack over defence, coupled with the catastrophic consequences of thermo-nuclear war, virtually determines the course we must follow. We have got to see that it never happens. The central theme of our policy must be to concentrate military effort on prevention rather than defence.

"There is no doubt that now, and probably for a long time ahead, the peace and safety of the world will depend upon the atomic deterrent—the power to meet attack by instant and devastating retaliation. One suggestion has been that we should leave this field exclusively to the U.S.A., and that Britain should not waste her limited resources upon making atomic and hydrogen bombs. As a result of brilliant scientific research initiated under the Labour Government, the British atomic bomb was successfully developed. These are now in steady production and the R.A.F. holds a substantial stock. Furthermore, we have now almost completed the development of the first British megaton bomb. In the present state of the world I cannot believe that any British Government would feel it right to throw away at this stage all that has been accomplished in this field. All this is bound up with disarmament, but in the absence of international agreement we have to deal with the situation as it is.

"As a means of preventing war, the possession of nuclear air power does not necessarily by itself provide a fully effective deterrent. The frontiers of free Europe must not be left undefended. Otherwise the Soviet Union, either directly or through the agency of a satellite, might be tempted to grab or absorb some neighbouring territory, believing that if it could quickly produce a *fait accompli* the Western Powers would hesitate to start a nuclear war. Britain and her allies in NATO have to maintain well-equipped forces along the Iron Curtain . . . (1) to make it plain that aggression would meet with instant resistance by the combined forces of the Western alliance, and, if need be, by the full power of nuclear retaliation; and (2) to prevent Europe being overcome during the time needed for the retaliatory power to be brought into operation and for its effects to become felt.

"This is a gigantic combined operation in which all allied nations must play their part, and we have no thought of shirking our fair share of this burden. On the other hand, we can no longer bear more than our fair share. With the exception of the U.S.A., Britain is devoting to defence a higher proportion of her resources than any other NATO country. We are at a disadvantage because, unlike our European allies, we have to maintain most of our NATO forces outside our own country, and this has faced us with a particularly awkward balance-of-payments problem. The size of the forces we can reasonably maintain on the Continent is at present being considered. This is to some extent governed by treaty, and before making any change there will be the fullest consultation with our partners in NATO and the Western European Union.

"Our prime responsibility is the protection of the British Isles. When the contribution Britain should make to the deterrent has been settled, we have to ask ourselves whether, in addition, other forces should be provided which do not directly contribute to the deterrent but which would be desirable in waging major war should the deterrent fail. I feel that we must as far as possible resist the temptation to dissipate our limited resources on forces which in themselves have no deterrent value, for to that extent we should be reducing the contribution we could make to the prevention of war.

"A difficult question to decide is how much of the effort should be devoted to the air defence of Britain. I will not attempt to give an answer, but will indicate some courses open. One is to try to provide fighter protection over the British Isles. It is difficult to reconcile this policy with the knowledge that it is virtually impossible to stop some bombers getting through and that with nuclear weapons this would blot out large areas. As an alternative, the task of fighters might be confined to a more limited role of protecting our power of retaliation, on which the prospect of peace is largely dependent. If the nuclear deterrent is to be effective, the potential aggressor must be convinced that he could not reasonably hope by surprise attack to knock out the Allied bomber forces before they could take off. So far as there remains an effective means of protecting bombers, this task must rank as part of our deterrent and as such must be given high priority . . .

"When the Russians are in a position to bombard this country accurately and on a massive scale with rockets, we shall have to consider whether it is worth while retaining fighter aircraft at all; but until we are sure that the Russians are so far advanced, it would be irresponsible to neglect such means as are available to protect our deterrent power. However that might be, it is clear that ultimately the threat to these islands will come not from manned bombers but from nuclear ballistic projectiles. It is also clear that the effectiveness of our deterrent power will also depend on the possession by us of these weapons.

"Our assessment of the likely rate of progress of these new developments must greatly influence our future programme of research and production. It is bound to affect our decisions on such questions as whether more advanced types of bombers and fighters should be developed, or whether the assumption could be made that by the time these more advanced types could be introduced into service, they will have been superseded by rocket weapons in defensive and offensive roles . . .

"In any case, we must give high priority to the development of these new weapons and their introduction at the earliest moment, and here the co-operation of the U.S.A. is of such importance. By the steps taken to integrate more closely our scientific effort we are saving not only money but, what is more vital, time. In many fields of military research the United States are ahead of us, but British scientists and technicians are putting into the common pool of ideas and inventions an extremely valuable contribution which is recognized and appreciated in America . . . Perhaps the most important advantage of closer co-operation with America is that it will be possible for us to concentrate our more limited resources on a smaller number of projects, instead of spreading the effort too thinly over too wide a field."

After strongly refuting rumours in the Australian Press that, without consulting the Australian Government, he had offered the United States facilities at the Woomera range during his recent talks in Washington, Mr. Sandys turned to the role of the Navy, pointing out that "a number of extremely difficult questions" had to be asked to which he would not at the moment volunteer the answers. He outlined these problems as follows:

Should the Navy provide an element in the deterrent—in other words, was the use of carrier-borne aircraft contemplated as part of Britain's nuclear bombing effort? To what extent should naval forces be provided for roles which did not contribute directly to the deterrent? In particular, how much effort should be devoted to providing naval forces to protect Atlantic communications against the threat of Soviet submarines? How soon after the outbreak of a full-scale nuclear war might one expect that shipping across the Atlantic could be resumed? After the initial nuclear attack, would the harbours of Britain and Western Europe still be usable? Had one to assume that when the first all-out atomic phase was over, there would follow a second phase, sometimes described as a 'broken-back war,' in which operations at sea would play a major part? Alternatively, if we had

won the nuclear battle in the opening round, would we have to provide for the possibility (as had been suggested) that Soviet submarines would try to carry on the war on their own? Finally, if it was doubtful whether convoys could get through, would it be feasible to go in for a policy of stockpiling? In addition, consideration had to be given as to what naval forces Britain needed for more limited operations and other duties in distant theatres, where the Navy and its mobile air power had an important role to play.

Mr. Sandys concluded: "We have to reshape Great Britain's defence policy in the light of the economic realities of our domestic position and of the military realities of this atomic age. I believe there is a wide measure of agreement on the basic principle which should inspire us. It can be summed up in a single sentence: We must concentrate our defence effort, not on preparations for war, but on measures to prevent it; not on planning for victory, but on the protection of peace."

Mr. Sandys' statement was made in reply to Mr. George Brown (Lab.), who had moved the following Opposition amendment:

"That this House regrets that, despite the expenditure since 1951 of more than £7,500,000,000, recent events have emphasized the wasteful and ineffective character of the present defence arrangements; and accordingly calls upon H.M. Government to prepare forthwith a revised defence plan which will ensure greater efficiency and lead to both a substantial cut in expenditure and the abolition of National Service."

In presenting this amendment, Mr. Brown said that there was a feeling that the Suez Canal operations had shown that all the money spent on defence had been wasted, and asked the Government whether they still stood by the objectives outlined in last year's White Paper on Defence. He thought that economies could be obtained by streamlining the forces, by making mobility and machines replace men, and by effective pooling of production, development, and resources among all NATO countries. Economies in the aircraft industry would not be possible until there was a concentration and association of the firms concerned. After asking a number of questions about future policy, Mr. Brown suggested that National Service should be ended in a phased four-year operation.

After debate, the Opposition motion was defeated by 302 votes to 243, and a Government amendment agreed to which "welcomed the intention of H.M. Government to meet the essential needs of defence and our Commonwealth and international responsibilities while reducing expenditure and demands upon manpower."

Defence Votes on Account, 1957-58.

Votes on Account for the three Service departments were published on Feb. 20. Because of the impossibility of presenting the usual Service Estimates pending final Government decisions on defence policy, the amounts given covered only the first four or five months of the financial year 1957-58.

The Votes on Account showed a total decrease of 65,500 in the maximum strengths of the Army, Navy, and R.A.F. during the coming financial year—representing the final stage in the manpower reductions announced by Sir Anthony Eden in October, 1955, which were designed to bring the strength of the Forces down to 700,000 by March 31, 1958, a total reduction of about 100,000. The maximum strengths shown were:

Navy.—121,500, a reduction of 6,500.

Army.—443,000, a reduction of 42,000. This figure included a reduction of 5,650 in the strength of Commonwealth, Colonial, and Gurkha troops, so that the actual reduction in U.K. manpower was 36,350.

R.A.F.—240,000, a reduction of 17,000.

Excluding the reduction in Commonwealth, Colonial, and Gurkha troops, the total reduction in U.K. manpower for the Services will therefore be 59,850. It was pointed out, however, that these were maxima which could be reduced still further.

The total sums asked for in the Votes on Account were:

Navy.—£125,000,000, including a start on new works costing eventually just over £2,000,000.

Army.—£210,000,000. This included the cost up to September of new works to be started at home or overseas whose eventual estimated cost will be £5,500,000.

R.A.F.—£240,000,000, including a start on new works costing eventually £50,000,000. The bulk of the expenditure on new works will be on accommodation, workshops and technical buildings, and airfields.

Votes on Account for the Service departments, instead of detailed Estimates, had been introduced on two previous occasions—in 1922 and 1946.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 15364 A; 15344 A.)**

A. YUGOSLAVIA. — Investigation into Yugoslav Electricity Exports to Neighbouring Countries.

A "Yugel-Export Study Society" was formed in Ljubljana on Feb. 11 by representatives of the Yugoslav, Italian, West German, and Austrian electricity industries. It will investigate projects for the establishment of hydro-electric power plants in Yugoslavia to export electric power to the other three countries represented.—(Tanjug Agency, Belgrade)

B. UNITED KINGDOM. — The Carmarthen and Wednesbury By-elections. - Labour wins Carmarthen from Liberals.

Polling took place on Feb. 28 at Carmarthen, where Labour won the seat from the Liberals, and at Wednesbury, where Labour retained the seat with an increased majority.

Carmarthen. The by-election, caused by the death of Sir Rhys Hopkin Morris, Q.C. (Liberal), resulted as follows:

Lloyd-George, Lady Megan (Labour)	23,679
Davies, John Morgan (Liberal)	20,610
*Davies, Mrs. Jennie Eirian (Welsh Nationalist)	5,741
Labour gain from Liberals. Majority	3,069

*Forfeited deposit.

Figures at the general election were: Sir R. Hopkin Morris (L.) 24,410, J. Evans (Lab.) 21,077, Mrs. J. E. Davies (Welsh Nat.) 3,835—Liberal majority, 3,333.

Of the votes cast in the by-election, Labour received 47.3 per cent (against 42.7 per cent at the general election), the Liberals 41.2 per cent (against 49.5 per cent) and the Welsh Nationalists 11.5 per cent (against 7.8 per cent). The Labour vote thus rose by 4.6 per cent and the Welsh Nationalist vote by 3.7 per cent, whereas the Liberal vote fell by 8.3 per cent. Of the total electorate of 57,183 (773 fewer than at the general election) 87.5 per cent went to the poll, compared with 85.1 per cent at the general election.

Lady Megan Lloyd-George (54), a former vice-president of the Liberal Party, was Liberal M.P. for Anglesey for 21 years before losing the seat to Labour in 1951. She joined the Labour Party in 1955 (see 14192 B). Lady Megan is the youngest daughter of the late Earl Lloyd-George (who, as Mr. David Lloyd George, was Prime Minister from 1916-22) and the sister of Major Gwilym Lloyd-George (now Viscount Tenby), lately Home Secretary and Minister for Welsh Affairs. Her victory in the Carmarthen by-election increased the number of women M.P.s to 26.

The late Member, Sir Rhys Hopkin Morris (68), died on Nov. 22, 1956. The son of a Welsh Congregational minister, he studied at the Universities of Wales and London, was called to the Bar, and fought in the First World War, being mentioned in despatches. From 1923 to 1932 he was Independent Liberal M.P. for Cardiganshire, but resigned in the latter year to become a London metropolitan magistrate. In 1936 he was appointed B.B.C. Regional Controller for Wales, a post he held until 1945. He re-entered politics in the latter year, when he was elected Liberal M.P. for Carmarthen. In 1951 he became Deputy Chairman of Ways and Means, in which capacity he frequently acted as Speaker of the House of Commons. He was knighted in 1954.

The Conservative Party have not contested the constituency for 21 years.

Wednesbury. The by-election was caused by the resignation of Mr. Stanley Evans (Labour) owing to his disagreement with the Labour Party's policy in the Suez crisis (see 15231 A). Result:

Stonehouse, John (Labour)	22,235
Tapsell, Peter (Conservative)	9,999
*Wade, Michael (Independent)	3,529
No change. Labour majority	12,236

*Forfeited deposit.

Figures at the general election were: S. N. Evans (Lab.) 26,064, R. E. Hall (C.) 17,120—Labour majority, 8,944.

Of the votes cast in the by-election, the Labour candidate received 62.2 per cent, the Conservative candidate 28 per cent, and the Independent candidate 9.8 per cent, whereas at the general election Mr. Evans received 60.4 per cent and his Conservative opponent 39.6 per cent in a straight fight. The Labour proportion thus increased by 1.8 per cent and the Conservative proportion fell by 11.6 per cent. 59.1 per cent of the electorate voted in the by-election, as compared with 60.4 per cent at the general election.

The new Member, Mr. John Stonehouse (31), is an underwriter and lecturer, and a director of the London Co-operative Society. He unsuccessfully contested Twickenham in 1950 and Burton-on-Trent in 1951.

The Labour Party's victory at Carmarthen, together with its recent success in the North Lewisham by-election (see 15872 C), increased the party's representation in the House of Commons by two members to 279. Conversely, the Liberal defeat at Carmarthen reduced the Liberal Party's representation in the House from six to five.—(Times - Daily Herald) **(Prev. rep. By-elections, 15372 C.)**

C. GREECE. — Unified Liberal Party.

A merger between the Liberal Democratic party headed by M. Sophocles Venizelos and the Liberals under M. Giorgios Papandreou was announced in Athens on Feb. 28, after prolonged inter-party negotiations. The unified party will be known as the Liberal Party and will be headed jointly by M. Venizelos and M. Papandreou. It will command 68 seats in the Chamber of Deputies, as compared with 160 seats held by the National Radical Union—the Government party headed by M. Karamanlis, the Prime Minister.—(Times) **(Prev. rep. 14732 A.)**

MARCH 2—9, 1957

A. HUNGARY. — U.N. General Assembly Resolutions on Withdrawal of Soviet Forces from Hungary, Entry of U.N. Observers, and Free Elections. - Continued Soviet Non-compliance with U.N. Resolutions. - Kadar Government refuses Entry to U.N. Observers. - General Assembly condemns Soviet Union for Violation of U.N. Charter. - Dr. Hammarskjöld's Proposal for U.N. Fact-Finding Committee on Soviet Military Intervention in Hungary. - Approval by General Assembly. - Soviet Attack on Dr. Hammarskjöld. - Fact-Finding Committee hears Evidence from Miss Anna Kethly and General Kiraly.

The Hungarian situation was discussed by the 11th regular session of the U.N. General Assembly on a number of occasions during November, December, and January, following the earlier discussions and resolutions in the General Assembly's special emergency session during the first ten days of November (see 15221A).

In view of the continued refusal of the Soviet Government and the Kadar regime in Hungary to comply with the resolutions of the special emergency session adopted on Nov. 4 and Nov. 9, calling *inter alia* for the withdrawal of Soviet troops from Hungary, the admission of U.N. observers, and free Hungarian elections under U.N. supervision, the Cuban representative at the U.N. (Dr. Nuñez-Portuondo) tabled a resolution in the General Assembly on Nov. 19, 1956, calling upon the Soviet Government and "the Hungarian authorities" to comply with those resolutions and to cease the deportation of Hungarian citizens. After a three-day debate, the Cuban resolution was adopted on Nov. 21 by 55 votes to 10, with 14 abstentions, together with (*a*) a resolution, submitted jointly by Ceylon, India, and Indonesia, urging Hungary to permit the entry of U.N. observers and to co-operate with the U.N. Secretary-General, and (*b*) a resolution, presented jointly by Argentina, Belgium, Denmark, and the U.S.A., on assistance to Hungarian refugees.

Resolution on Withdrawal of Soviet Occupation Forces and Ending of Deportations.

The Cuban resolution (embodying certain amendments by El Salvador and accepted by Cuba) was worded as follows:

"The General Assembly,

"Recalling the Resolutions of Nov. 4 and Nov. 9, 1956;

"Noting that the Secretary-General has been requested to report to the General Assembly on compliance with those Resolutions;

"Having received information that the Soviet Army of Occupation in Hungary is forcibly deporting Hungarian men, women and children from their homes to places outside Hungary;

"Recalling the principles of the U.N. Charter and . . . the obligations assumed by all Member-States under the Charter; the principles of the Convention on the Prevention and Punishment of the Crime of Genocide, to which Hungary and the Soviet Union are parties; and the Treaty of Peace with Hungary;

"(1) Considers that this information adds urgency to the necessity of prompt compliance with the General Assembly's Resolutions of Nov. 4 and Nov. 9 calling for the prompt withdrawal of Soviet forces from Hungary and for the despatch of observers to Hungary by the Secretary-General;

"(2) Urges the Soviet Government and Hungarian authorities to take immediate steps to cease the deportation of Hungarian citizens, and to return promptly to their homes those who have been deported;

"(3) Requests the Secretary-General to keep the General Assembly informed as to compliance with this and the above-mentioned Resolutions, so that the Assembly may be in a position to consider such further action as it may deem necessary."

[In its original wording the resolution had charged the Soviet Union with the crime of genocide, but the wording was modified after a number of delegations, including that of the U.S.A., had drawn attention to the fact that their governments had not ratified the U.N. Convention on Genocide.]

The resolution, as stated above, was adopted by 55 votes to 10, with 14 abstentions. The 10 opposing votes were those of the Communist bloc and Yugoslavia, while the 14 countries abstaining were Afghanistan, Egypt, Finland, India, Indonesia, Jordan, Lebanon, Libya, Morocco, Saudi Arabia, Sudan, Syria, Tunisia, and Yemen—i.e. all from the Afro-Asian group with the exception of Finland.

Resolution on Admission of U.N. Observers.

The Ceylonese-Indian-Indonesian resolution was worded as follows:

"The General Assembly,

"Noting that certain Member-States have affirmed that Hungarian nationals have been forcibly deported from their country;

"Noting that certain other Member-States [i.e. the U.S.S.R. and other Communist countries] have categorically affirmed that no such deportations have taken place;

"Recalling its Resolution of Nov. 4, 1956, in which the Hungarian Government is asked to permit observers designated by the Secretary-General to enter Hungary, to travel freely therein, and to report their findings to the Secretary-General;

"Noting that the Secretary-General is pursuing his efforts in this behalf with the Hungarian Government;

"Further noting that the Secretary-General has urged Hungary, as a member of the United Nations, to co-operate in the clarification of the situation;

"(1) Urges Hungary to accede to the request made by the Secretary-General without prejudice to its sovereignty; and

"(2) Requests the Secretary-General to report to the General Assembly without delay."

The resolution was adopted by 57 votes to eight (Albania, Bulgaria, Byelorussia, Czechoslovakia, Hungary, Rumania, Ukraine, and the U.S.S.R.), with 14 abstentions—Chile, Nationalist China, Cuba, Dominican Republic, Egypt, Ethiopia, Jordan, Panama, Paraguay, Poland, Saudi Arabia, Syria, Yemen, and Yugoslavia.

Resolution on Aid to Hungarian Refugees.

The resolution submitted by Argentina, Belgium, Denmark, and the U.S.A. was worded as follows:

"The General Assembly,

"Considering that the flow of refugees from Hungary continues at a high rate;

"Recognizing the urgent need of these tens of thousands of refugees for care and resettlement;

"(1) Notes with appreciation the action taken by the Secretary-General to determine and help meet the needs of the Hungarian refugees, and by the Office of the U.N. High Commissioner for Refugees to assist the refugees and to bring about co-ordinated action on their behalf by Governments and inter-governmental organizations;

"(2) Requests the Secretary-General and the U.N. High Commissioner for Refugees to continue these efforts;

"(3) Urges Governments and non-governmental organizations to make contributions . . . for the care and resettlement of Hungarian refugees, and to co-ordinate their aid programmes in consultation with the U.N. High Commissioner;

"(4) Requests the Secretary-General and the High Commissioner to make an immediate appeal to both Governments and non-governmental agencies to meet the minimum present needs [for refugees], and authorizes them to make subsequent appeals on the basis of plans and estimates made by the High Commissioner."

The resolution was adopted by 69 votes to two (Hungary and Rumania), with eight abstentions—Albania, Bulgaria, Byelorussia, Czechoslovakia, Poland, Sudan, Ukraine, and the U.S.S.R.

The resolutions were adopted after an embittered three-day debate in which a large number of delegates took part.

Dr. Nuñez-Portuondo (Cuba), in presenting his country's resolution, accused the Soviet occupation forces of having turned Hungary into "one vast cemetery" by mass executions and deportations. A "foreign army of more than 200,000 soldiers and 5,000 tanks" had invaded a helpless nation and had slaughtered more than 65,000 men, women and children, besides deporting large numbers of others who were "guilty only of wishing to be free." The mass executions and deportations amounted to genocide, a crime which, he alleged, the U.S.S.R. had already perpetrated in Estonia, Latvia, and Lithuania. After declaring that only the U.N. could put an end to the "butchery" in Hungary, the Cuban delegate declared: "We cannot tolerate that there should be two classes of States in the United Nations—those which comply with U.N. resolutions and those which do not."

M. Shepilov (Foreign Minister of the U.S.S.R.) categorically denied that any civilians had been deported from Hungary, describing the allegation as a "myth" and the Cuban resolution as possessing "the foetid odour of a provocation." After accusing Dr. Nuñez-Portuondo of "dragging out on the floor of the Assembly a reeking canard from the dump of refuted fabrications," and denying that the Soviet Army had killed Hungarian civilians, he declared that the Soviet armed forces had entered Hungary "at the request of the Hungarian Government" and had saved the Hungarian people from "the spectre of the Fascist beast" and "the re-establishment of Horthyist-Fascism in the centre of Europe." In a bitter attack on the United States, he accused U.S. "ruling circles" and intelligence agencies of seeking to overthrow the "legal governments" in Hungary and in the other "people's democracies."

Mr. Cabot Lodge (U.S.A.) refuted M. Shepilov's allegations against the United States, declaring that the difference between the U.S. and Soviet attitudes toward the peoples of the "satellite" countries was that "the U.S.A. seeks to fill their stomachs with food and the Soviets seek to fill their stomachs with lead." He emphasized that the U.S.S.R., while denying that any outrages had occurred in Hungary, had nevertheless refused to allow U.N. observers to enter the country and find out the truth. After stressing that the Hungarian revolution was not the work of "Fascists" but "a genuine movement of workers, farmers, students, and young people," Mr. Lodge said that the U.S. Government had factual evidence that at least 16,000 people had been deported from Budapest alone up to Nov. 14. He added: "Our reports indicate that this movement is continuing. We have had confirmation of a trainload of young Hungarians in sealed freight cars moving toward the Soviet border through Cluj, Predeal, and Ploesti, in Rumania . . . It is inevitable that many of the men in these boxcars will die from cold and exposure—just as the unfortunate victims of the Nazi concentration camps died in the trainloads of boxcars which I saw with my own eyes around the horrible Nazi camp at Dachau in 1945. This is all information available to the U.S. Government. None of it is drawn from press reports . . ."

Dr. Hammarskjöld's Report to General Assembly. - Soviet and Hungarian Non-Compliance with U.N. Resolutions. - U.N. Observers refused Entry to Hungary.

The U.N. Secretary-General (Dr. Hammarskjöld) presented a report to the General Assembly on Nov. 30 stating (1) that he had sent letters to the Soviet and Hungarian representatives at the U.N. drawing their attention to the U.N. resolutions on "the withdrawal of troops from Hungarian territory and related questions, including deportations, investigation of the situation caused by foreign intervention in Hungary, and humanitarian assistance, including assistance to refugees"; (2) that "no information is available to the Secretary-General concerning steps taken to establish compliance with the decisions of the General Assembly which refer to the withdrawal of troops and related matters"; and (3) that, in spite of his efforts, the Hungarian Government had so far not given permission for the entry of U.N. observers.

After revealing that he had offered to go personally to Budapest for discussions with the Hungarian Government, Dr. Hammarskjöld added: "The Secretary-General has been informed that this question is under consideration by the [Hungarian] Government. It is his hope that the reaction will be positive and that he will be invited to Budapest. If an invitation is received, it would be his intention so to organize the visit as to cover not only the humanitarian activities, to which his offer originally referred, but also the position taken by the Government of Hungary regarding the resolutions of the United Nations."

With regard to the three-man committee set up by him to "investigate the situation caused by foreign intervention in Hungary" (see page 15224, first column), Dr. Hammarskjöld stated: "This group has been examining material presently available to the Secretariat. The Secretary-General has been informed, however, that this material does not provide a sufficient basis for a report to him at the present stage, and that the group, moreover, deems it essential that its work should be supplemented by and co-ordinated with such findings as might result from the process of direct observation in Hungary. Since arrangements have not been concluded for effecting observation in Hungary, the stage has not yet been reached where it is possible to present a comprehensive report. Meanwhile, the investigating group is continuing to examine available material with reference to certain broad issues."

Further U.N. Resolution. - Demand for Soviet Compliance with Earlier Resolutions. - New Call for Entry of U.N. Observers to Hungary.

The Assembly met again on Dec. 3 to consider the situation created by the Soviet Government's continued non-compliance with the U.N. resolutions calling for the withdrawal of Soviet troops from Hungary, and the Kadar Government's continued refusal to permit the entry of U.N. observers. By 54 votes to 10 with 14 abstentions, it adopted a 14-nation resolution on Dec. 4 calling upon the Soviet Government and "the Hungarian authorities" to comply with the earlier U.N. resolutions and, for the first time, setting a time-limit for a reply. The resolution was worded as follows:

"The General Assembly,

"Recalling its Resolutions of Nov. 4, Nov. 9, and Nov. 21 relating to the tragic events in Hungary;

"Having received and noted the report of the Secretary-General that U.N. observers have not been permitted to enter Hungary;

"Noting with deep concern that the U.S.S.R. has failed to comply with the U.N. Resolutions calling upon it to desist from intervention in the internal affairs of Hungary, to cease its deportations of Hungarian citizens, to return promptly to their homes those it has already deported, to withdraw its armed forces from Hungary, and to cease its repression of the Hungarian people;

"(1) Reiterates its call to the U.S.S.R. and the Hungarian authorities to comply with the above Resolutions and to permit U.N. observers to enter Hungary, to travel freely therein, and to report their findings to the Secretary-General;

"(2) Requests the U.S.S.R. and the Hungarian authorities to communicate to the Secretary-General not later than Dec. 7, 1956, their consent to receive U.N. observers;

"(3) Recommends that in the meantime the Secretary-General arrange for the immediate despatch to Hungary, and other countries as appropriate [i.e. countries bordering Hungary], of observers named by him;

"(4) Requests all member-Governments to co-operate with the representatives named by the Secretary-General by extending such assistance and providing such facilities as may be necessary for the effective discharge of their responsibilities."

The countries sponsoring the resolution were the U.S.A., Argentina, Australia, Belgium, Cuba, Denmark, El Salvador, the Irish Republic, Italy, the Netherlands, Norway, Pakistan, Siam, and Sweden. The ten opposing votes were cast by Albania, Bulgaria, Byelorussia, Czechoslovakia, Hungary, Poland, Rumania, Ukraine, the U.S.S.R., and Yugoslavia (i.e. the Communist countries), while the 14 abstentions were Afghanistan, Burma, Ceylon, Egypt, Finland, India, Indonesia, Jordan, Morocco, Saudi Arabia, Sudan, Syria, Tunisia, and Yemen (i.e. all from the Afro-Asian group except for Finland). During the debate many delegates contrasted the respect which Britain and France had shown for the U.N., by their decision to withdraw from Egypt, with the Soviet Union's continued defiance of the U.N. in refusing to withdraw its troops from Hungary.

Mr. Krishna Menon (India), explaining his country's abstention on the 14-nation resolution, declared that India was of the opinion that both the Soviet and the Hungarian Governments had disregarded U.N. resolutions. Moreover, India did not subscribe to the view that the Hungarian question fell exclusively within domestic jurisdiction, and she had made it clear that the Hungarian people had the right to live under institutions of their own choosing and that all foreign forces should be withdrawn from Hungary, as from other countries. India objected, however, to that clause in the resolution calling upon Hungary and neighbouring countries to admit observers, which, in her opinion, constituted an "ultimatum" and an infringement upon national sovereignty. The practice of sending observers to neighbouring countries would, if adopted, "result in a situation in which no nation's sovereignty is respected; in the event of a country being neutral, it would be a great embarrassment for them on the one hand to refuse entry to observers, and on the other hand it would be an equally great embarrassment to admit them." Mr. Menon reiterated, however, that India's sympathies were with the Hungarian national movement, and that she regarded the Soviet Union's non-compliance with U.N. resolutions as "deplorable."

M. Imre Horvath (Hungary) reiterated the Kadar Government's position that the events in Hungary were an "exclusively internal matter . . . and do not fall within the competence of any international organization, including the United Nations." For this reason the Hungarian Government could not allow U.N. observers to enter the country, since this would be "a violation of Hungarian sovereignty."

On Dec. 3 the Kadar Government had informed Dr. Hammarskjöld by telegram that, although it could not permit U.N. observers to enter Hungary, the Secretary-General himself would be welcome in Budapest "at a later date appropriate to all parties." After discussions with M. Horvath, Dr. Hammarskjöld informed the General Assembly on Dec. 4 that it had been agreed that he (Dr. Hammarskjöld) should arrive in Budapest on Dec. 16 for a three-day visit. On Dec. 5, however, Budapest Radio announced that the date mentioned by Dr. Hammarskjöld for his arrival in Budapest (Dec. 16) was "not suitable" and that the Secretary-General's visit would therefore "not take place." No alternative date was mentioned in the broadcast.

Mr. Cabot Lodge (U.S. representative at the U.N.) described the Budapest broadcast as "an affront to the Secretary-General and to the whole civilized world, particularly after the attempt to hornswoggle us last night." ["Hornswoggle" is an Americanism for "pulling wool over the eyes"—i.e. the Kadar Government's brusque withdrawal of the invitation to Dr. Hammarskjöld after it had agreed on the previous day that the Secretary-General should arrive in Budapest on Dec. 16.]

General Assembly's Condemnation of Soviet Union for Violation of U.N. Charter. - Hungarian Walk-out from General Assembly.

Dr. Hammarskjöld presented a second report to the Assembly on Dec. 7 (i.e. at the expiration of the time-limit set for compliance with the resolution of Dec. 4) stating (1) that he had asked the delegates of Austria, Czechoslovakia, Rumania, and Yugoslavia whether their Governments would permit the entry of U.N. observers as requested in that resolution; (2) that only Austria had expressed its willingness to permit observers; and (3) that, as the other three countries had not replied, he had been unable "to arrange for the despatch of any observers to the region."

As the time-limit set in the resolution of Dec. 4 had expired without any response by the Soviet Government or the Kadar regime to the U.N. requests, a further resolution was introduced on Dec. 9 by 20 countries condemning the U.S.S.R. for violation of the U.N. Charter, and denouncing it for having deprived the Hungarian people of their liberty and independence by armed force. The resolution—the most strongly-worded on the Hungarian question to date—was as follows:

"The General Assembly,

"Deeply concerned over the tragic events in Hungary;

"Recalling those provisions of the Resolutions of Nov. 4, Nov. 9, Nov. 21, and Dec. 4, 1956, calling upon the U.S.S.R. to desist from its intervention in the internal affairs of Hungary, to withdraw its forces from Hungary, and to cease its repression of the Hungarian people;

"Recalling also those provisions of the Resolutions of Nov. 4 and Nov. 21 calling for permission for U.N. observers to enter Hungary, to travel freely therein, and to report their findings to the Secretary-General;

"Having received the Secretary's report of Nov. 30 stating that 'no information is available to the Secretary-General concerning steps taken to establish compliance with the decisions of the General Assembly which refer to a withdrawal of troops or related political matters,' and his report of Dec. 7;

"Noting with grave concern that there has not been a reply to the latest appeal of the General Assembly for the admission of U.N. observers to Hungary as contained in its Resolution of Dec. 4;

"Considering that recent events have clearly demonstrated the will of the Hungarian people to recover their liberty and independence;

"Noting the overwhelming demand of the Hungarian people for the cessation of intervention by foreign armed forces and the withdrawal of foreign troops;

"(1) Declares that, by using armed force against the Hungarian people, the U.S.S.R. is violating the political independence of Hungary,

"(2) Condemns the violation of the Charter by the U.S.S.R. in depriving Hungary of its liberty and independence and the Hungarian people of the exercise of their fundamental rights;

"(3) Reiterates its call to the U.S.S.R. to desist forthwith from any form of intervention in the internal affairs of Hungary,

"(4) Calls upon the U.S.S.R. to make immediate arrangements for the withdrawal, under U.N. observation, of its armed forces from Hungary, and to permit the re-establishment of the political independence of Hungary; and

"(5) Requests the Secretary-General to take any initiative that he deems helpful in relation to the Hungarian problem, in conformity with the principles of the Charter and the U.N. Resolutions."

The resolution was sponsored by 20 countries, including the U.S.A., all the other sponsors of the resolution of Dec. 4 except Cuba (which refused to co-sponsor the new resolution because it was "not strong enough"), and several other countries, including Spain, Turkey, Chile, Peru, and the Philippines. After a further three-day debate, it was adopted on Dec. 12 by 55 votes to eight, with 13 abstentions and three countries absent. The opposing votes were cast by Albania, Bulgaria, Byelorussia, Czechoslovakia, Poland, Rumania, Ukraine, and the U.S.S.R. (i.e. the Communist bloc), while the abstentions were Afghanistan, Cambodia, Egypt, Finland, India, Indonesia, Jordan, Morocco, Saudi Arabia, Sudan, Syria, Yemen, and Yugoslavia. The absentees were Haiti, Hungary, and South Africa, the Hungarian delegation having walked out of the General Assembly as stated below.

It was commented in the Press that a number of countries of the Afro-Asian group, including two Arab countries (Iraq and Lebanon), had voted for condemnation of the Soviet Union. Apart from the two Arab countries mentioned, they included Burma, Ceylon, Laos, Liberia, Nepal, Pakistan, Persia, Siam, and Tunisia.

The debate was marked by bitter exchanges between Mr. Cabot Lodge (U.S.A.) and M. Kuznetsov (U.S.S.R.), and by a suggestion from the Irish delegate (Mr. Boland) that the Assembly should eject the Hungarian delegation—which he described as "these impostors"—or, if that were not possible for procedural reasons, that it should "at least refuse to listen to them." Mr. Krishna Menon (India), though abstaining from voting, reiterated that Soviet troops should be withdrawn from Hungary and that the Hungarian people should be free to choose their own form of government.

The Hungarian delegation walked out of the General Assembly on Dec. 11 after M. Horvath had protested against the Assembly's "series of attempts to interfere in Hungary's domestic affairs." After declaring that the Hungarian delegation had been "rudely and disgracefully offended . . . in a manner incompatible with the national honour of the Hungarian people," he announced that it would take no further part in the current session of the Assembly "so long as the discussion of the Hungarian question does not proceed in the spirit of the U.N. Charter."

Mr. Cabot Lodge said that "all else having failed, the Assembly now comes to a solemn climax." Since Nov. 4, when the first U.N. resolution had been adopted, the Soviet Government and "their Hungarian agents" had persistently ignored the reiterated U.N. demands for the withdrawal of Soviet troops from Hungary, the entry of U.N. observers, and free elections—"an unparalleled example of the flouting by a single State of the wishes of the overwhelming majority of the rest of the world." Moreover, this "continuing and complete obstruction by the Soviet Union" had been accompanied by "a complete wall of silence" with regard to Dr. Hammarskjöld's proposed visit to Budapest. After declaring that Hungary had suffered at the hands of Russia precisely what many small nations had suffered at the hands of Hitler, Mr. Lodge declared: "There is no essential difference between what is being done by the Soviet Union today and what was done by Nazi Germany in its day."

M. Kuznetsov repeated the arguments made in the earlier debate by M. Shepilov, and described the resolution as "a gross interference in the domestic affairs of Hungary." In the course of a violent attack on the United States he described Radio Free Europe [the private radio station in Western Germany which is supported by contributions from donors in the U.S.A.] as a principal centre of "counter-revolutionary espionage."

Dr. Hammarskjöld's Proposal for U.N. Committee to collect Evidence on Soviet Intervention in Hungary. - Fact-Finding Committee established by General Assembly. - Soviet Attack on Dr. Hammarskjöld.

In view of the continued refusal of the Kadar Government to admit U.N. observers or to co-operate in implementing the U.N. resolutions, it was announced on Dec. 27 that the three-man investigating committee previously appointed by Dr. Hammarskjold had decided to suspend its operations, with the Secretary-General's agreement. Señor Lleras (the Colombian member of the committee) explained that he and the other two members—Judge Gundersen (Norway) and Mr. Lall (India)—had agreed with Dr. Hammarskjold that it was useless for the committee to continue its work as long as direct observation in Hungary was not permitted.

On Jan. 5, 1957, Dr. Hammarskjold presented a further report to the General Assembly proposing the setting-up of a five-member fact-finding committee with powers to "take testimony, collect evidence, and receive information" on the Soviet military intervention in Hungary. M. Kuznetsov (the Soviet representative at the U.N.) issued a statement on Jan. 9 protesting against the proposed establishment of such a committee, expressing his regret at the "singular procedure" proposed by the Secretary-General, and accusing Dr. Hammarskjöld of acting "not as an international official but as a party in a dispute among members of the United Nations."

By 59 votes to eight, with 10 abstentions and three countries absent, the General Assembly adopted on Jan. 10 a 24-nation resolution—introduced by the Irish delegate (Mr. Boland) and sponsored by the U.S.A., Great Britain, and a number of other countries which had sponsored the earlier resolutions—creating the fact-finding committee proposed by Dr. Hammarskjöld and worded as follows:

"The General Assembly,

"Recalling its previous resolutions on the Hungarian problem;

"Reaffirming the objectives contained therein and the continuing concern of the United Nations in this matter;

"Having received the report of the Secretary-General of Jan. 5, 1957;

"Desiring to ensure that the General Assembly and all members of the U.N. shall be in possession of the fullest and best available information regarding the situation created by the intervention of the U.S.S.R., through its use of armed force and other means, in the internal affairs of Hungary;

"(1) Establishes for the above-mentioned purpose a special committee, composed of representatives of Australia, Ceylon, Denmark, Tunisia, and Uruguay, to investigate and to establish and maintain direct observation in Hungary and elsewhere, taking testimony, collecting evidence and receiving information as appropriate, in order to report its findings to the General Assembly at its present session, and thereafter from time to time to prepare additional reports for the information of members of the United Nations and of the General Assembly if it is in session;

"(2) Calls upon the U.S.S.R. and Hungary to co-operate in every way with the Committee and, in particular, to permit the Committee and its staff to enter the territory of Hungary and to travel freely therein;

"(3) Requests all member-States to assist the Committee in its task by making available to it relevant information, including testimony and evidence, which members may possess, and assisting it in securing such information;

"(4) Invites the Secretary-General to render the Committee all appropriate assistance and facilities;

"(5) Calls upon all member-States promptly to give effect to the present and previous resolutions of the General Assembly on the Hungarian problem; and

"(6) Reaffirms its request that the Secretary-General continue to take any initiative that he deems helpful in relation to the Hungarian problem, in conformity with the principles of the Charter and the resolutions of the General Assembly."

The eight opposing votes were cast by Albania, Bulgaria, Byelorussia, Czechoslovakia, Poland, Rumania, Ukraine, and the U.S.S.R., while the ten abstaining countries were Afghanistan, Cuba, Egypt, Finland, India, Jordan, Saudi Arabia, Sudan, Syria, and Yugoslavia. [Cuba abstained from voting on the ground that the resolution was tantamount to "burying the Hungarian question and relegating it to the archives."] The three absent delegations were those of Hungary, South Africa, and Yemen.

The Kadar Government sent a memorandum to the U.N. on Jan. 11 protesting against the creation of the fact-finding committee and declaring that "no committee of any kind" had the right to conduct an investigation into Hungary's "internal affairs."

Fact-Finding Committee takes Evidence from Miss Anna Kethly, General Kiraly, and M. Kovago.

The Fact-Finding Committee, under the chairmanship of its Danish member (Hr. Alsing Andersen), met at U.N. Headquarters on Jan. 28-29 to hear evidence submitted by three prominent Hungarian exiles: Miss Anna Kethly (67), the veteran Hungarian Socialist leader, and Minister of State in M. Imre Nagy's Government before its overthrow by Soviet military intervention; Major-General Bela Kiraly, C.-in-C. of the Hungarian Army at the time of the uprising; and M. Jozsef Kovago, Lord Mayor of Budapest at the time of the uprising.

Miss Anna Kethly contrasted the Soviet Government's "clamour for freedom for African colonies" with the fact that for the past 11 years it had itself subjected Hungary to "colonial exploitation" and military occupation which had left the country "morally and economically bankrupt." She described how the U.S.S.R. had exploited Hungary in the 11 years since the war by instituting forced labour, reducing wages, forcing farmers to give up their land, "bleeding the country of its economic resources," and appropriating Hungarian industry as its own "booty"—e.g. by securing control of Hungary's bauxite deposits, uranium mines, and oil fields through so-called "joint" Soviet-Hungarian enterprises. The Communist regime in Hungary had been based on an elaborate system of terror, conducted by the secret police (the AVO) through brutal murder and torture. This "terror apparatus of 200,000" had "fulfilled its norm to such an extent that there is hardly a family in Hungary which has not suffered directly or indirectly from the AVO's ruthlessness."

It was against this background that on Oct. 23, 1956, a student demonstration had turned into an open revolt in which the entire country and all sections of the people had joined the national freedom movement and demanded the immediate withdrawal of Soviet forces and free elections. After stressing that the coalition Government formed by M. Imre Nagy was based on the social reforms and revolutionary achievements of the immediate post-war period 1945-47, Miss Kethly declared: "It is not true that the [Nagy] Government wished to restore the pre-war social order. Its aim was to replace the dictatorship by a democracy, to terminate Hungary's dependent colonial status, and to bring her into the ranks of the sovereign, peace-loving countries in accordance with international law, the U.N. Charter, and the [Hungarian] Peace Treaty." The Soviet armed forces, however, had prevented the realization of these aims by invading the country, overthrowing the Government, abducting M. Nagy himself, and establishing a puppet regime.

After protesting at the presence of the Kadar "puppet" delegation at the U.N., and asking that she, as the only representative of the legal Hungarian Government on free soil, should be recognized as Hungary's delegate at the U.N., Miss Kethly specifically requested: (1) that free elections should be held in Hungary under U.N. supervision; (2) that a United Nations Force should be sent to Hungary as it had been sent to Egypt; (3) that the position of M. Nagy should be discussed by the U.N. [M. Nagy, who had taken refuge in the Yugoslav Legation, had been abducted by the Russians after leaving the Legation and was said to have been sent to Rumania]; (4) that Dr. Hammarskjöld should be permitted to visit Hungary; (5) that the U.N. should press for the withdrawal of Soviet armed forces from Hungary; (6) that the U.S.S.R. should pay reparations for the damage caused by its military intervention.

General Kiraly reviewed in detail the developments during and after the rising, and presented maps and diagrams showing the location of the numerous airfields built by the Russians in Hungary during the past eight years. He stressed that the "feverish modernization of airfields and the rapid construction of new military airfields" indicated that the Russians intended to use Hungarian territory as "a military air base against the West." In the course of his statement General Kiraly told the Committee that "if a more resolute stand had been taken [by the U.N.] and more effective moral support given, the Hungarian revolution could have been victorious and the Hungarian people could have retained the freedom which they momentarily gained." He reiterated that M. Nagy's Government was the only legal Government of Hungary, and urged that Miss Kethly should replace the present Hungarian delegation at the United Nations.

M. Kovago laid special emphasis on the "bitter disappointment" of the Hungarian people that the United Nations had done "so much in Suez and so little in Hungary." During the Hungarian revolution it had been "heart-breaking to watch a heroic nation fight on with the unflinching determination of the condemned, almost to national suicide," while anxiously awaiting help from the United Nations which never came.

The Kadar Government sent an 11-page memorandum to the U.N. on Feb. 6 complaining that the Fact-finding Committee had received a "distorted view" of the Hungarian situation from those who had given evidence, and protesting at the "slanderous" statements made during the hearing. The U.S. delegation asked why, if the Kadar regime had complained that "only one side of the case was being presented," it had barred U.N. observers from entering Hungary.

A. UNITED KINGDOM. — Warwick and Bristol By-elections. - Seats retained by Conservatives.

Polling took place on March 7 at Warwick and Leamington, in the by-election caused by the resignation of Sir Anthony Eden (see 15301 A), and at Bristol West, where the by-election was caused by the conferment of a peerage on Sir Walter Monckton (now Viscount Monckton of Brenchley), the former Paymaster-General (see 15313 A.) Both seats were held by the Conservative Party with reduced majorities, the results being as follows:

Warwick and Leamington.

Hobson, John (Conservative)	24,948
Wilson, William (Labour)	22,791
No change. Conservative majority	2,157

Figures at the general election were: Sir Anthony Eden (C.) 29,979, W. Wilson (Lab.) 16,513 - Conservative majority, 13,466. Sir Anthony Eden had represented the constituency for 33 years.

Of the votes cast in the by-election, the Conservative candidate received 52.3 per cent and the Labour candidate 47.7 per cent, whereas at the general election Sir Anthony Eden had received 64.5 per cent of the votes and his Labour opponent 35.5 per cent. The Conservative proportion of the poll thus dropped by 12.2 per cent and the Labour proportion rose correspondingly. Of the total electorate of 61,315 (an increase of 2,286 since the general election), 77.8 per cent went to the poll, compared with 78.8 per cent at the general election.

Bristol West.

Cooke, Robert G. (Conservative)	24,585
Rodgers, W. T. (Labour)	10,423
No change. Conservative majority	14,162

Figures at the general election were: Sir Walter Monckton (C.) 32,767, W. H. Johnson (Lab.) 10,766 Conservative majority, 22,001.

Of the votes cast in the by-election, the Conservative candidate received 70.2 per cent and the Labour candidate 29.8 per cent, compared with respective percentages of 75.3 and 24.7 at the general election. The Conservative proportion of the poll thus dropped by 5.1 per cent and the Labour proportion rose correspondingly. Of the total electorate of 57,304 (a decrease of 1,055 since the general election), 61.1 per cent went to the poll, compared with 74.6 per cent at the general election.

Mr. John Hobson (44), the new Member for Warwick and Leamington, is a barrister, and chairman of Rutland Quarter Sessions. Mr. Robert Cooke (26), the new Member for Bristol West, is a schoolmaster, and a member of Bristol City Council. The youngest member of the present House of Commons, he had unsuccessfully contested Bristol South-East at the general election.—(Times - Daily Telegraph) **(Prev. rep. 15404 B.)**

B. SWEDEN - SOVIET UNION. — The Wallenberg Case. - Swedish Reply to Soviet Note.

It was announced in Stockholm on Feb. 20 that the Swedish Government had replied to the Soviet memorandum of Feb. 6 in which the Soviet Government had admitted the death of Hr. Raoul Wallenberg, the Swedish diplomat, in a Moscow prison, but had put the blame for Wallenberg's fate on the late M. Abakumov, the Soviet Minister for State Security, who was executed in 1954.

The Swedish Note, after referring to the "public indignation" in Sweden at the Soviet Government's statement, maintained that, contrary to Soviet assertions, the Soviet Government could not have been ignorant of the imprisonment of the Swedish diplomat. "Through its excuses in this matter," the Note said, "the Soviet Government has also admitted its responsibility. If the Soviet security service was able to act in such an autocratic manner as to make a diplomat from a neutral country a prisoner and to keep him in prison for 2½ years without reporting the case to the Soviet Government or to the Foreign Ministry, this fact is not in itself a circumstance for which the Soviet Government can claim disresponsibility. To this is added the fact that while Wallenberg was confined in a Moscow prison, the Soviet Government cannot, considering the numerous Swedish appeals, have been unable to obtain reliable information in the matter if they had really undertaken the thorough investigations which they have repeatedly assured the Swedish Government that they had made." The Note stressed that on the day before Wallenberg's death the Swedish Ambassador in Moscow had once again reminded the Soviet Government of the Wallenberg case, and that the Soviet Government had previously been "reminded of this matter some 20 times."

The Note concluded by saying that the Swedish Government found it "difficult to believe" that all further documentation concerning Wallenberg, except the doctor's report of his death, should have been "completely obliterated." It called upon the Soviet Government to provide more information and to make further investigations.—(Svenska Dagbladet, Stockholm) **(Prev. rep. 15380 D.)**

A. UNITED KINGDOM. — Reorganization of Local Government Finance. - The Rating and Valuation Bill.

Mr. Henry Brooke, the Minister of Housing and Local Government, announced in the House of Commons on Feb. 12 that, after lengthy discussions with representatives of local authorities, the Government had decided to introduce legislation to provide for a major recasting of the financial relationship between the Exchequer and local government. The proposed changes, which formed part of the Government's general plans for a strengthening of the local government system, and would apply to Scotland as well as to England and Wales, would include (1) the raising of the rates payable by industry and freight-transport from 25 per cent of the net rateable value (as at present) to 50 per cent; (2) the replacement of grants to local authorities by a general grant of a fixed amount (i.e. fixed for a short term of years) to be spent by them at their discretion.

Mr. Brooke spoke as follows:

"The Government's proposals for the reorganization of local government in England and Wales . . . are designed to strengthen the local government system. In doing this it is essential to improve the financial relationship between the Central government and local authorities. The ratio between Exchequer grants to local authorities and their revenue from local rates, which 30 years ago was 1 to 2, is now 6 to 5. Not only has this shift reduced the financial independence of local authorities and their degree of direct responsibility to their own ratepayers; in addition, much of this Exchequer aid is on a percentage basis towards the expenditure incurred on specific services. Percentage grants, whatever their merits, carry two disadvantages. First, there may be a danger of an excessive degree of detailed central supervision over the spending of money. Secondly, there is no certainty from year to year what the Exchequer may be called upon to contribute.

"I am sure that the greater the independence of local authorities in the raising and spending of their money, the better for the good health of local government. The Government, after a thorough investigation do not think it practicable to devise a satisfactory new source of local revenue. Nor do they believe it right to earmark for the direct benfit of local authorities any tax that is now levied nationally. Rates are in this country a well-established instrument of local taxation. There are still some difficulties to be overcome in the rate system, but it provides a sound basis for local finance, and no better system of local taxation has been propounded.

"In 1929, when unemployment was widespread, it was decided in the light of economic conditions as they then were to de-rate industry and freight-transport from 100 per cent to 25 per cent of net annual value. Against the radically different economic background of the present day the Government have thoroughly re-examined this matter, taking into account all the arguments in both directions, and have decided that it is now right to raise the rate contribution of industry and freight-transport from 25 per cent to 50 per cent. In addition, further changes will be made in the sytsem of pool payments to local authorities by the nationalized industries, including the direct rating of electricity properties and the separate assessment of electricity and gas show-rooms used as shops, so that all payments now included in the pool are taken into account as rates. In Scotland the necessity for changes on these lines will not arise during the period up to 1961, for which the existing valuations are frozen.

"At the same time the Government intend a major recasting of the financial relationship between the Exchequer and local authorities. This will entail a radical revision of the structure of Exchequer grants, as well as some reductions of the grants to take account of the new rate income. With a few exceptions, where technical considerations make it not possible or desirable, specific grants will be replaced by a general grant of an amount fixed in advance for a short period of years, though not necessarily at the same level for each year of the period. This general grant will be distributed to all County and County Borough Councils in England and Wales, and to County and Town Councils in Scotland, by reference to objective factors (mainly of weighted population) which are readily ascertainable and afford a fair and reasonable measure of the relative needs of each authority.

"With this change, local authorities will acquire a great increase of responsibility in determining the money to be spent on the various services, in accordance with local needs. Local government will become more truly local. Our aim is to foster and stimulate a vigorous and independent local government, and to give members of councils a greater incentive to take a lively interest in their local expenditure by placing much more of it under their own control. Under the proposals the Government have in mind, the amount of general grant-in-aid, not tied in any way to individual services, will, at present levels of expenditure, rise from less than one-sixth to close on two-thirds of the total Exchequer grants to local authorities.

"It is also proposed to revise the system of Equalization grants, on the basis of recommendations made in 1953, including the payment of grants direct to county district councils. In Scotland the arrangements for Equalization grants were amended by the Act of 1954 and also by last year's Act, which provides that a further review must be held before 1963."

Mr. Brooke added that the Government also proposed to revise the existing system of Highway grants—it being intended, so far as practicable, to bring all the changes into operation on the same day, though some transitional grants would naturally be needed for a period afterwards. The proposals would be discussed with local authority representatives and other organizations affected, after which legislation would be introduced "as soon as practicable."

An explanatory memorandum published by the Ministry of Housing and Local Government gave the following breakdown of the sources of local authorities' current revenue: Exchequer grants, £581,000,000; rates, £490,000,000; rents, fees, and other charges, £436,000,000.

Of the Exchequer grants, £73,000,000 was distributed to the poorer areas by way of equalization grants, with the remaining £508,000,000 made available to local authorities in aid of specific services (mostly in the form of a percentage of actual expenditure). The rateable value of industrial and freight transport hereditaments totalled at present about £41,000,000, of which £36,000,000 obtained the benefit of de-rating. There had, however, already been a large increase in industrial rates as a result of the recent revaluation of the various classes of ratepayers; in this revaluation industry had suffered much the largest increase, and its share of the burden had risen by nearly 50 per cent of the pre-1956 amount.

Specific grants which it was intended to absorb into the general grant [the memorandum continued] included the main Education grant, and the grants for child care, the fire services, and local authority health services. The total to be distributed by way of general grant, with no "strings" attached, would amount to about £280,000,000 (plus the £73,000,000 Equalization grant). Since it would be difficult to distribute the Highways grant fairly by reference to a population formula, it was not intended to absorb this into the general grant, but the basis of distribution would be reviewed. The general grant would be fixed for a certain period—probably two years in the first instance, and perhaps three years thereafter. It would not, however, necessarily be at the same level in each year of the period, and allowance would be made for rising expenditure where this was probable.

In conclusion, the memorandum stated that the Exchequer equalization grant would be retained but the system would be revised on the basis of recommendations made in 1953, which included payment of part of the grants direct to District Councils, instead of, as at present, all to the County Councils.

Mr. Duncan Sandys (then Minister of Housing and Local Government) had announced on Dec. 20, 1956, that the Government proposed to introduce a short Bill to deal with three problems arising from the recent revaluation for rating purposes. These problems were:

(1) The need to adjust the rate contributions from the nationalized gas, electricity, and transport industries to offset the loss of revenue which would otherwise be suffered by local authorities as a result of the revaluation.

(2) The fact that the method of calculating Exchequer equalization grants took no account of the relief from rates given to charitable and educational bodies. In consequence, certain areas—for example Cambridgeshire—where property owned by such bodies (e.g. Cambridge University) formed an appreciable proportion of the total rateable value, had been losing substantial amounts of grant.

(3) The unduly heavy burden placed by the revaluation upon occupiers of shops and other commercial property. It was proposed to deal with this by a reduction of 20 per cent in rateable values according to current valuation lists.

The provisions of the Rating and Valuation Bill, implementing the Government's decision, were published on Dec. 21, as follows:

(1) The rateable value of shops, offices, and certain other commercial premises would be reduced by one-fifth, and that of similar premises used partly as private dwellings by one-seventh.

(2) The amounts payable by the Central Electricity Authority, the British Transport Commission, and the Gas Council would be increased as follows: C.E.A., from £11,250,000 to £18,280,000; B.T.C., from £1,810,000 to £2,600,000; Gas Council, by 70 per cent.

(3) The Exchequer equalization grant to local authorities would be stepped up to take account of the rateable value of charitable and other institutions which received relief from the rates.

The Bill, if enacted in time, will come into operation on April 1, 1957.—(Ministry of Housing and Local Government - Times - Daily Telegraph - Manchester Guardian)

B. MOUNTAINEERING. — Nepalese Charges for Future Himalayan Expeditions.

It was announced in Khatmandu on Feb. 25 that all future expeditions to Everest or to the seven other highest peaks in the Himalayas (Lhotse, Makalu, Cho Oyu, Manaslu, Kanchenjunga, Annapurna, and Dhaulagiri) would be required to pay a royalty of 3,000 rupees (£225) to the Nepalese Government before permission was given to ascend any of these mountains. Payments of 2,000 rupees would be required for ascending other peaks above 25,000 feet, and of 1,000 rupees for peaks below 25,000 feet. Compensation for deaths of Nepalese liaison officials and porters attached to expeditions was fixed at 3,000 rupees and 1,600 rupees respectively, payable to the families concerned. (Daily Telegraph - The Statesman, Calcutta)

A. INDIA - UNITED STATES. — Mr. Nehru's Visit to Washington. - Discussions with President Eisenhower. - Visits to Ottawa, London, and Düsseldorf.

Mr. Nehru, the Prime Minister of India, visited the United States from Dec. 16-21, 1956, travelling from London in President Eisenhower's personal plane. During a brief stay in London he had a meeting on Dec. 15 with Sir Anthony Eden (then Prime Minister) at 10, Downing Street.

During Mr. Nehru's stay in Washington (Dec. 16-19), and at a meeting at the President's farm at Gettysburg (Virginia) on Dec. 17, President Eisenhower and Mr. Nehru had private and informal talks on current international affairs. Mr. Nehru also saw Vice-President Nixon, Mr. Dulles, Mr. Stassen (the President's special adviser on disarmament questions), and other members of the U.S. Administration. The following communiqué was issued on Dec. 20:

"Prime Minister Nehru and President Eisenhower had long anticipated a personal meeting to discuss current world problems. In three days in Washington and a day at the President's farm at Gettysburg they were afforded, in a completely informal atmosphere, the opportunity for full and frank talks on a wide range of problems of interest and concern to both countries.

"The talks confirmed the broad area of agreement between India and the United States, which are bound together in strong ties of friendship deriving from their common objectives and their adherence to the highest principles of free democracy. The principles and policies of the Governments of India and the U.S.A. have evolved on the basis of respect for the dignity of man and of the need to improve the welfare of the individual.

"The Prime Minister and the President are convinced that the greater understanding of their respective policies reached at these talks will facilitate the constant efforts of India and the U.S.A. toward the achievement of peaceful and friendly intercourse among nations in accordance with the principles of the United Nations."

In a nation-wide television and radio broadcast on Dec. 18 Mr. Nehru said that he had "greatly profited" by his talks with the President, and dwelt on India's policy of non-alignment in military pacts or alliances.

After referring to President Eisenhower's "humanity and devoted services to the cause of peace," which had "won for him a unique place among statesmen of the world," Mr. Nehru continued:

"Nine years ago we won our independence through a bloodless revolution in conditions of honour and dignity both to ourselves and to the erstwhile rulers of our country . . . Although your revolution in America took place long ago and conditions were different here, you will appreciate the revolutionary spirit which we have inherited and which still governs our activities. Having attained political freedom, we are earnestly desirous of removing many ills that our country suffers from, eliminating poverty, and giving our people full and equal opportunities of growth and advancement.

"India is supposed to be given to contemplation, and the American people have shown by their history that they possess great energy and dynamism. Something of the contemplative spirit still remains in India. But at the same time the New India of today has also developed a certain dynamism and a passionate desire to raise the standards of her people. But with that desire is blended the wish to adhere to moral and spiritual aspects of life. We are now engaged in the gigantic and exciting task of achieving a rapid and large-scale development of our country . . . We completed our First Five-Year Plan eight months ago, and we have now begun on a more ambitious scale our Second Five-Year Plan . . .

"But many other countries in Asia tell the same story, for Asia today is resurgent. These countries, which long lay under foreign yoke, have regained their independence and strive toward new ideals. To them, as to us, independence is as vital as the breath of life, and colonialism in any form is abhorrent.

"The vast strides that technology has made have brought the new age, of which the U.S.A. is the leader. Today the whole world is our neighbour, and old divisions of continents and countries matter less and less. Peace and freedom have become indivisible, and the world cannot continue for long partly free and partly subject. In this atomic age, peace has also become the test of human survival.

"Recently we have witnessed two tragedies which have powerfully affected men and women all over the world—the tragedies of Egypt and Hungary . . . But these tragedies have one hopeful aspect, for they have demonstrated that the most powerful countries cannot revert to old colonial methods or impose their domination over weak countries. World opinion has shown that it can organize itself to resist such outrages. Perhaps, as an outcome of these tragedies, freedom will be enlarged and will have a more assured basis.

"Preservation of peace forms the central aim of India's policy. In pursuit of this policy we have chosen the path of non-alignment in any military pact or alliance. Non-alignment does not mean passivity of mind or action, or lack of faith or conviction. It does not mean submission to evil. It is a positive and dynamic approach to the problems that confront us.

"We believe that each country has not only the right to freedom, but also to decide its own policy and its way of life. Only thus can true freedom flourish and people grow according to their own genius. We believe, therefore, in non-aggression and non-intervention by one country in the affairs of another, in growth of tolerance between them, and in peaceful co-existence . . . We therefore endeavour to maintain friendly relations with all countries even though we may disagree with them in their policies or governmental structure. We think that by this approach we can serve not only our country but also the larger causes of peace and good-fellowship in the world.

"Between the United States and India there existed friendly and cordial relations even before India gained her independence. No Indian can forget that in the days of our struggle for freedom we received from your country a full measure of sympathy and support. Our two Republics share a common faith in democratic institutions and the democratic way of life, and are dedicated to the cause of peace and freedom . . . We wish to learn from you, and we plead for your friendship, co-operation, and sympathy in the great task that we have undertaken in our own country.

"I have had the privilege of long talks with the President, and we have discussed many problems which confront the world. I have greatly profited by these talks. I shall treasure their memory, and they will help me in many ways in my thinking. I sincerely hope that the opportunity may be given us before long to welcome the President in our own country and to demonstrate to him the high respect and esteem in which we hold him . . ."

After addressing the U.N. General Assembly in New York on Dec. 20, Mr. Nehru flew to Ottawa for discussions on Dec. 22-23 with Mr. St. Laurent, the Canadian Prime Minister, and Mr. Lester Pearson, the Minister for External Affairs. No communiqué was issued on these talks.

On Dec. 24 Mr. Nehru arrived back in London and had further talks with Sir Anthony Eden at Chequers before visiting Lord and Lady Mountbatten at their Hampshire home.

In a brief press statement before leaving London on Dec. 27, Mr. Nehru said that the first problem to be solved in the Middle East was the clearance of the Suez Canal, and the second a Suez settlement generally. After that, "broader questions" could be discussed, for which preliminary informal approaches were advisable. In reply to a question he said that he did not envisage himself in the role of mediator, but that India might be "helpful."

Mr. Nehru arrived in Dusseldorf on Dec. 27 and had a 2½-hour talk with Dr. Adenauer at the airport. Before leaving for India, Mr. Nehru said that he and the Federal Chancellor had discussed developments in the Middle East, Central Europe, and elsewhere.

After his return to Delhi on Dec. 28, Mr. Nehru announced that he had invited President Eisenhower to visit India, and that the President had expressed the wish to do so.
(New York Times - New York Herald Tribune - Indian High Commissioner's Office, London - Times - Montreal Star)

B. AVIATION. — Brussels-Paris Helicopter Service.

The first regular helicopter service between Brussels and Paris was inaugurated on March 3 by eight Sikorsky helicopters of the Sabena company (Belgian Airlines). The helicopters took off in formation from the *Allée Verte* (five minutes from from the centre of Brussels) and arrived an hour and 55 minutes later at the new Paris heliport at Issy, near the Place Balard. The machines taking part in the inaugural flight were drawn from the Sabena company's helicopter services linking 12 cities in Belgium, the Netherlands, France, and Germany. [There are at present three heliports in the Netherlands, four in Western Germany, two in Belgium, and two in France—at Lille and Paris.]

The Brussels-Paris helicopter service will operate twice daily in each direction until mid-April. Thereafter there will be five services a day each way, and one on Sundays. The helicopters used can seat 12 passengers in addition to the crew, have a range of slightly over 280 miles, and cruise at about 108 m.p.h., with a maximum speed of about 130 m.p.h. The 200-mile journey between the French and Belgian capitals will take 115 minutes. - (La Nation Belge - Le Monde, Paris)
(Prev. rep. 13180 C.)

C. ETHIOPIA. — Emperor Haile Selassie's Accusations against Egypt. - Charges of fomenting Subversion among Ethiopian Moslems.

In a statement issued on Feb. 15 in Addis Ababa, the Emperor Haile Selassie accused Egypt of fomenting unrest among the Moslem population of Ethiopia with the aim of dismembering the country and incorporating the Moslem areas of south-eastern Ethiopia into a "Greater Somalia" subservient to Egypt. [The Italian territory of Somalia will become independent in 1960, when the U.N. trusteeship ends.] In November 1956 Ethiopia had demanded the recall of the Egyptian military attaché in Addis Ababa (Lieut.-Colonel Hilmy, who has not yet been replaced) after it had been alleged that Colonel Hilmy had sought to recruit Ethiopian Moslems for the Egyptian Army.—(New York Times - Daily Telegraph)

A. BRITISH COMMONWEALTH. — The Duke of Edinburgh's Commonwealth Tour. - Change in Style and Title of Duke of Edinburgh. - The Duke's Study Conference on Industrial Relations. - Youth Award Scheme.

A 35,000-mile world tour by sea, land, and air was made by the Duke of Edinburgh between Oct. 16, 1956, when he left London, and Feb. 6, 1957, when he arrived at Gibraltar preparatory to joining the Queen for their State visit to Portugal (see 15416 E). In the course of his tour, which was largely of an informal character and in the nature of a "fact-finding" mission, the Duke visited many countries and territories of the Commonwealth and Empire, including a number of remote island dependencies in the Southern Ocean. All the sea voyages were made on board the Royal yacht *Britannia*.

The Commonwealth countries and territories visited by the Duke were: the Seychelles (Oct. 19), Ceylon (Oct. 25-27), Malaya (Oct. 31-Nov. 1), Australian New Guinea, Papua, and New Britain (Nov. 8-13), Australia (Nov. 14-Dec. 10), New Zealand (Dec. 11-17), the Falkland Islands (Jan. 7), South Georgia (Jan. 13), Gough Island (Jan 16), Tristan da Cunha (Jan. 17), St. Helena (Jan. 22), Ascension Island (Jan. 25), Gambia (Jan. 31) and Gibraltar (Feb. 6).

The Duke flew from London Airport to Mombasa (Kenya), where he embarked in the *Britannia* for the Seychelles. The subsequent stages of his Commonwealth tour are summarized below:

Ceylon. During his three-day visit to Ceylon the Duke visited Colombo, Kandy, Trincomalee, the Nalanda Oya dam (at present under construction), and the R.A.F. base at Katunayake, in addition to attending an official reception given by the Governor-General, Sir Oliver Goonetilleke. The Duke of Edinburgh met the Prime Minister, Mr. Bandaranaike, and his predecessor, Sir John Kotelawala, and was the guest of Mr. Bandaranaike at the latter's country residence at Horagolla, near Kandy. While in Colombo the Duke addressed a conference of the Engineering Association of Ceylon, held at the Ceylon Technical College, at which he stressed the need for trained Ceylonese scientists and technicians to develop the country's resources.

Malaya. From Colombo the Duke sailed for Malaya on board the *Britannia*, disembarking on Oct. 30 at Langkawi Island (15 miles off the Kedah coast) where he was welcomed by Tengku Abdul Rahman, Chief Minister of the Malyan Federation, and Sir Donald Macgillivray, the High Commissioner. He flew to the mainland for visits to Kuala Lumpur and Penang, and also visited a rubber plantation and a military camp outside Kuala Lumpur serving as a base for British troops operating against the Communist terrorists. The Duke, who was warmly welcomed by all sections of the Malayan population, had to cancel a projected visit to Singapore because of civil disturbances then affecting the city.

Australian New Guinea and Papua. From Port Swettenham (Malaya) the Duke sailed in the *Britannia* to Port Moresby, where he was greeted by the Governor-General of Australia, Field-Marshal Sir William Slim. During his visit to Australian New Guinea, Papua, and New Britain, the Duke visited Rabaul and other centres, met numbers of officials, settlers and tribesmen, and inspected plantations and local industries, in addition to visiting Manus Island, the principal Pacific base of the Royal Australian Navy. While in New Guinea he drove 30 miles into the Owen Stanley range, the scene of bitter fighting against the Japanese during World War II. On Armistice Day (Nov. 11) the Duke visited the war cemetery at Lae, where many Commonwealth soldiers who fell in the New Guinea campaign are buried.

Australia. The Duke flew from Manus Island to Darwin (Nov. 14) and on the following day visited Rum Jungle, the important uranium-producing area in the Northern Territory, where he went down a big uranium mine and inspected a secret ore-treatment plant.

On Nov. 16 the Duke flew 600 miles to Alice Springs, in the heart of the continent, breaking his flight *en route* at Brunette Downs, one of the largest cattle-raising stations in the Northern Territory, and Tennant Creek, the centre of a rich copper and goldmining area. While at Alice Springs the Duke inspected two institutions in which Australia is a world pioneer—the Royal Flying Doctor Service (see 14106 B) and the recently developed School of Air; at the latter institution he saw teachers giving lessons to invisible pupils living hundreds of miles in the "outback," and heard the children's replies coming back over the radio network through which the service operates.

From Alice Springs the Duke flew to Canberra, where he was welcomed by the Prime Minister of Australia (Mr. Menzies), the Leader of the Opposition (Dr. Evatt), and the presidents of the Federal Senate and House of Representatives. His two-day visit to the Federal capital included visits to the Royal Military College, the Australian National University, and the Commonwealth Scientific and Industrial Research Organization. After an extensive two-day inspection of the Snowy Mountains hydro-electric project, the Duke opened the Olympic Games in Melbourne on Nov. 23 and had an informal meeting with Commonwealth athletes at the "Olympic Village" near the city. He subsequently visited Sydney (Nov. 30), returning to Melbourne on Dec. 3 to receive the Freedom of that city from the Lord Mayor, Sir Francis Sellick. The Duke of Edinburgh became the first Freeman of Melbourne, a civic honour which had never previously been conferred. On Dec. 3 the Duke travelled to Morwell (103 miles from Melbourne), in the Gippsland area of Victoria, to inaugurate the new £10,000,000 brown coal gasification project (see 15412 C).

New Zealand. The Duke of Edinburgh flew from Melbourne on Dec. 12 to Wellington, where he was welcomed by the Governor-General of New Zealand (Lieut.-General Sir Willoughby Norrie), the N.Z. Prime Minister, Mr. Holland, and the Leader of the Opposition, Mr. Walter Nash. During his two days in Wellington he visited cold-storage plants and meat factories, watched the loading of meat and dairy produce on board ship, inspected plans for civic development, and mingled informally with the great crowds assembled to welcome him. He flew from the capital to Rotorua and drove from there to Kawerau, on the Bay of Plenty, where he visited New Zealand's new £30,000,000 newsprint plant established by the Tasman Pulp and Paper Company. The Duke also visited the Wairakei geo-thermal project while touring the Rotorua area.

After an informal visit to Auckland the Duke flew 600 miles on Dec. 16 to visit Norfolk Island, which is situated midway between Australia and New Zealand and is under Australian sovereignty. [The population, less than 1,000, is largely descended from the *Bounty* mutineers who left Pitcairn Island for Norfolk Island a century ago.] After returning to Christchurch, the Duke ended his New Zealand tour on Nov. 17 at Lyttelton, where he visited the N.Z. Antarctic ship *Endeavour* and talked with Sir Edmund Hillary, the leader of the New Zealand section of the British Antarctic Expedition which is to take place during the International Geophysical Year.

Southern Ocean, Falklands Dependencies, etc. From Lyttelton the Duke completed his world tour on board the *Britannia*, which sailed across the South Pacific, rounded Cape Horn, and stopped at many Antarctic dependencies of the Falkland Islands. During its voyage across the South Pacific—from which the Duke broadcast a Christmas message to the Queen and their children (see 15284 A)—the *Britannia* crossed the Antarctic Circle and skirted the shores of the Antarctic continent for a considerable distance. While in the British Antarctic territories the Duke visited a number of scientific and meteorological bases and went on board the survey ship *John Biscoe* and a whaling vessel.

The *Britannia* touched at Gough Island and Tristan da Cunha—among the most remote and inaccessible islands in the world—before proceeding northwards to St. Helena and Ascension. After a visit to Bathurst, capital of the Gambia, the Duke disembarked at Gibraltar on Feb. 6 after completing his world tour of 35,000 miles in less than four months.

In a speech at the Mansion House on Feb. 26, after the Queen and the Duke had returned from their State visit to Portugal, the Duke of Edinburgh spoke of his Commonwealth tour, saying *inter alia* that he had been "forcibly reminded of the unifying power of the Crown and the relative smoothness of political progress which is possible within the Commonwealth system." After speaking of the great economic progress being made in Australia and New Zealand, and paying tribute to the work carried out by British scientists in the Antarctic dependencies, the Duke mentioned the possibility that the Antarctic continent "might be used as a gigantic germ-free cold store where the periodic world food surpluses might be stored against lean years and famine."

Change in Style and Title of Duke of Edinburgh.

The *London Gazette* announced on Feb. 22 (*a*) that the Queen, acting on the advice of the Prime Minister, had granted to the Duke of Edinburgh "the style and titular dignity of a Prince of the United Kingdom"; (*b*) that the Duke would henceforth be known as Prince Philip, Duke of Edinburgh.

It was stated in *The Times*: "The Prime Minister and his senior colleagues felt that the services which the Duke of Edinburgh has rendered to the country and to the life of the Commonwealth, culminating in the long tour which he has just completed, should receive some significant mark of recognition. Mr. Macmillan accordingly proposed to the Queen that the Duke should formally be given the title and dignity of a Prince . . ." In giving effect to it . . . the Queen has confirmed a title already widely accorded to the Duke by common and affectionate usage. The effect of the announcement is merely to establish the Duke's dignity and title. It does not in any way affect the succession to the Throne. It signifies the appreciation of the Queen and her Ministers alike of the Duke's devotion to the public interest."

The change in the Duke's style and title was announced to the Canadian House of Commons on the same day by the Federal Prime Minister, Mr. St. Laurent, and was warmly welcomed by all parties. In the course of his speech Mr. St. Laurent paid high tribute to Prince Philip's services to the Crown and the Commonwealth in recent years.

Duke of Edinburgh's Study Conference on Industrial Relations.

In addition to his interest in Commonwealth problems, as exemplified by his recent tour, and his work for youth, as shown by the creation of The Duke of Edinburgh's Award (see 14744 E), the Duke had sponsored during 1956 a Study Conference on Industrial Relations—the first of its kind—which was held at Oxford from July 8-28 and attended by 300 employers, managers, trade unionists, and rank-and-file workers from all parts of the Commonwealth.

The purpose of the Duke's Study Conference was "to conduct a practical study of the human aspects of industrialization, and in particular those factors which make for satisfaction, efficiency, and understanding, both inside industrial organizations and in the every-day relations between industry and the community around it."

In his presidential address (at the Sheldonian Theatre on July 9) the Duke of Edinburgh said that there were "four basic ideas" behind the conference, which he outlined as follows:

(1) Whether there were any lessons from the past which could help overcome the present problems of industrialization. For example: "Could industrial Scotland help Knob Lake? Could the Midlands help Kitimat? Could the experience of the industrial North help Africa?"

(2) Whether the new industries of the Commonwealth could help each other—e.g. "Could Jamshedpur help Rum Jungle? Could the Nigerian tin mines help the Rhodesian copperbelt?"

(3) To try and discover those things which would make for "a good works, a happy community, and a satisfied individual," on which he hoped the conference would form some conclusions.

(4) A study of the "bewildering variety of shapes" assumed by the simplest industrial problem "when viewed from the different standpoints of the board room, the shop floor, research, production and personnel departments, or the trade union." In this connexion the Duke stressed that the members and speakers at the conference had been chosen in such a way that all these viewpoints would be put forward.

The work of the conference was carried out by 20 Study Groups, each of 14 members, diversified in geographical origins and race and representing managements, trade unions, and operatives. The groups were chosen so as to mingle variety of industrial experience with as many nationalities as possible—e.g. a typical group had four U.K. members and one each from Australia, Canada, India, Kenya, Mauritius, New Zealand, Northern Rhodesia, Pakistan, South Africa, and Trinidad. Each group worked throughout as a team, with its own chairman, and devoted itself to a particular theme or aspect of industrial relations, in which connexion extensive visits were paid to industrial centres throughout the country. At the end of the conference the 20 Study Groups presented their reports and conclusions, which were discussed by the conference.

Addresses on specific problems of industrial relations were given by a number of leading industrialists, trade union leaders, and representatives of the nationalized industries.

Duke of Edinburgh's Youth Award Scheme.

Further details of the Duke of Edinburgh's scheme for the development of character and physical fitness among young people were announced on July 26, 1956, by Brigadier Sir John Hunt (the leader of the successful British Everest Expedition of 1956), who had retired from the Army to assist and advise in promoting the scheme.

Sir John Hunt pointed out that the Awards were designed to provide "incentives and opportunities for young people to achieve a balanced development of their character and physique, in preparation for citizenship." Although youth organizations would supply most of the training, in co-operation with local authorities, schools, etc., the "lone wolf" type of boy would also be encouraged to compete.

The Awards, designed "to encourage a balanced personality rather than a specialized record-breaker," would be given when required standards were reached in four sections of activity: (1) rescue and public service training; (2) expeditions by a group of boys to promote the spirit of adventure; (3) pursuits in the form of arts, crafts and sciences; (4) physical fitness, involving performance standards. There would be three grades, respectively for boys in the age-groups 14-15, 15-16, and 16 upwards, which would have to be accomplished in succession. Those passing the second-grade tests would receive a badge bearing the Duke of Edinburgh's cypher in silver, while those passing the third-grade test would receive a badge with the Duke's cypher in gold.

All candidates would take tests in "rescue and public service training" (e.g. first aid, life saving, or training to help the blind); fitness (running, jumping, etc.), and hobbies (drama, creative writing, model-making, gardening, or gliding). They would also have to go on an "expedition" involving walking across open or rough country, camping, and cooking. For the 14-year-olds the expedition would last 24 hours, whilst the oldest group would have to cover 50 miles of wild country on foot in five days—on the moors of Devon and Cornwall, or in the Welsh mountains, the Pennines, the Lake District, or Scotland.

The Duke of Edinburgh's Youth Award Scheme came officially into operation on Sept. 1, 1956.—(Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - New Zealand Government Office, London) **(Prev. rep. Duke of Edinburgh, 14744 E.)**

A. UNITED STATES. — New Chairman of Republican Party.

Mr. H. Meade Alcorn jr., a Hartford (Connecticut) lawyer, was unanimously elected chairman of the Republican Party on Jan. 22 in succession to Mr. Leonard W. Hall, who had resigned on Jan. 11. It was stated at the White House that Mr. Hall would be appointed later to "a high Federal post." (New York Herald Tribune) **(Prev. rep. 12880 A.)**

B. UNITED KINGDOM.—Royal Navy. - Appointment of "Rear-Admiral Nuclear Propulsion." - Britain's First Atomic Submarine (H.M.S. "Dreadnought.").

The Admiralty announced on Feb. 18 that Rear-Admiral Guy Wilson had been appointed to the new post of Rear-Admiral Nuclear Propulsion and Deputy Engineer-in-Chief (Nuclear Propulsion), with responsibility for nuclear propulsion in its application both to the Royal Navy and the Merchant Navy.

The announcement said: "The Admiralty has given tangible expression to its belief in the vital importance both to the Royal and Merchant Navies of the early development of nuclear propulsion for ships. This officer will act as the focus within the Admiralty of the operational and material aspects of nuclear propulsion, and will keep in touch with developments by the Atomic Energy Authority and by industry in the application to ships of this revolutionary form of power. He will also be the link in these matters between the Admiralty and other Government Departments, Ministries, and Services, and between Commonwealth Navies and foreign Navies, as appropriate."

Rear-Admiral Wilson (50) served as engineer officer in H.M.S. *Berwick* from 1940 to 1943, when he joined the Department of the Engineer-in-Chief and became responsible for the design of machinery in aircraft carriers. His connexion with aviation was continued as Deputy Director of the Department of Aircraft Maintenance and Repair. On his promotion to Rear-Admiral in 1955 he became Deputy Engineer-in-Chief for Fleet Maintenance and Administration. He has served in the aircraft carriers H.M.S. *Ark Royal* and H.M.S. *Eagle*.

Vickers Nuclear Engineering Ltd. (a subsidiary of Vickers-Armstrong) disclosed on Feb. 27 that they had been working for a year on the project to build a British atomic-powered submarine, and that "good progress" was being made. The Financial Secretary to the Admiralty (Mr. Soames) disclosed on March 5 that H.M. the Queen had approved the name *Dreadnought* for Britain's first atomic submarine. (Times) **(Prev. rep. 14869 A.)**

C. AUSTRALIA. — Inauguration of the Latrobe Valley Gasification Project.

The new £10,000,000 brown coal (lignite) gasification project, based upon the extensive brown coal deposits of the Latrobe valley (Victoria), was inaugurated on Dec. 3, 1956, by the Duke of Edinburgh during his visit to Australia as part of his Commonwealth tour (see 15411A). The plant is situated in the Gippsland area of Victoria, 103 miles from Melbourne, and is the only one of its kind in the world outside Eastern Germany. It uses superheated steam, compressed oxygen, and briquetted brown coal which, under a pressure of 400 lb. to the square inch, produces crude gas which is purified before passing through a 100-mile pipeline to Melbourne. The pipeline at present supplies 40 per cent of the city's average daily consumption of gas, and will eventually meet Melbourne's full requirements.

The plant will be progressively extended with the aim of making Victoria self-sufficient in gas production within 20 years. In addition, it is planned to make synthetic petrol and oil from the residue of the gasification process. The present initial capacity is about 5,200,000,000 cubic feet of gas, 1,210,000,000 gallons of brown coal tar, 560,000 gallons of benzole motor spirit, and 438,000 gallons of oil - all these quantities being expected to be doubled by 1960.
(Times -Australian News and Information Bureau) **(11799 A.)**

D. TUNISIA. — Death Sentence "in absentia" on Former Secretary-General of Neo-Destour Party.

M. Salah Ben Youssef, the former secretary-general of the Néo-Destour party, was sentenced to death *in absentia* on Jan. 24 on charges of plotting against the internal security of the State. Six of his followers were also sentenced to death on similar charges (four of them *in absentia*), 41 others received terms ranging from 20 years' hard labour to suspended sentences of five years' imprisonment, and eight were acquitted. M. Salah Ben Youssef had been granted political asylum in Libya after his flight from Tunisia following the "Youssefist" conspiracy against M. Bourguiba's Government at the end of 1955. (Le Monde, Paris) **(Prev. rep. 14812 A.)**

E. FRANCE. — National Institute of Applied Sciences.

A *projet de loi* for the establishment of a National Institute of Applied Sciences (*Institut national des sciences appliquées*) at Lyons was approved on Feb. 5 by the French National Assembly. The Institute will train engineers, technicians, and research workers for public and private industry, scientific laboratories, etc., in which connexion the Assembly's Committee of National Education pointed out that France needed 12,000 engineers, 3,000 to 4,000 teachers of science, and 1,000 research workers every year.—(Le Monde, Paris)

A. NORTHERN IRELAND - IRISH REPUBLIC. — Continuation of I.R.A. Terrorist Activities in Northern Ireland. - Further Counter-measures by Northern Irish Authorities. - Trials of I.R.A. Members in the Irish Republic. - Mr. Costello's Denunciation of I.R.A. - Mr. McBride's Call for "Positive Policy" on Partition.

Throughout January, and to a lesser extent in February, terrorists of the Irish Republican Army continued their campaign (initiated on Dec. 12, 1956) against objectives in Northern Ireland. The main incidents are summarized below:

(1) On Jan. 3 a hut at Newry, belonging to the Special Constabulary was wrecked by an explosion, no-one was injured, the hut being empty at the time. The midnight explosion was followed by dawn raids by the R.U.C. on the homes of suspects in the Newry area, seven men being taken into custody—three local men, three natives of Dundalk, and one native of Dublin.

(2) An R.U.C. hut at Upperlands, Co. Londonderry, was damaged by an explosion on Jan. 14. On the following day two men giving Dublin addresses were arrested. Wide areas of Counties Londonderry and Tyrone were combed for other men believed to have taken part in the incident.

(3) On Jan. 16, a number of fuses were found beneath the Carnalea bridge at Fintona, on the road between Fintona and Omagh, Co. Tyrone. It was presumed that the men attempting to blow up the bridge had been disturbed and had fled.

(4) On the same date an explosion occurred at the Northern Ireland Electricity Board's step-down transformer at Waterside, Co. Londonderry. Some of the heavy insulators were broken and electric power and light was interrupted for a time in an area between Eglinton (Co. Londonderry) and Donomana (Co. Tyrone). Sticks of gelignite which had failed to explode were found in the area.

(5) On Jan. 18 the Territorial Army barracks at Dungannon (Co. Tyrone), recently completed at a cost of £40,000, were badly damaged by explosives laid by a group of about 13 armed men. The barracks—headquarters of the 5th Support Company, Royal Inniskilling Fusiliers, T.A.—were one of the targets listed in the document which had been read in the Dublin District Court on Jan. 12 [see below]. The raiders kidnapped the caretaker and released him later outside the town. Police conducting a search throughout Co. Tyrone subsequently found a stolen taxicab which had apparently been used and later abandoned by the raiders. Twelve men were detained for questioning but most of them were later released.

(6) A Special Constabulary hut at Straidarron (Co. Londonderry), seven miles from the border, was damaged by explosives on Jan. 21.

(7) Ranagh Bridge at Fallagloon, on the main Belfast-Londonderry road, was damaged on Jan. 21 by an explosion. The bridge was among the targets listed in the document read in the Dublin District Court on Jan. 12.

(8) The first private property to be attacked in the present series of raids (Mountfield Lodge, near Omagh, Co. Tyrone), was set on fire on Jan. 22. Most of the building, the property of Brigadier D. G. Moore (a former commanding officer of the Royal Inniskilling Fusiliers), was destroyed.

(9) Doravil Lodge, Co. Tyrone, was destroyed by fire on Jan. 23. The building, situated in the middle of a 6,000-acre estate of grazing land, and owned by Major C. A. M. Alexander, was unoccupied at the time.

(10) The Favour Royal and Lismore bridges on the main Belfast-Enniskillen road were badly damaged by explosions on Jan. 24. The bridges carry the main water supply from the Clogher valley, but there was no serious interruption in supply.

(11) Cara House, an unoccupied mansion 500 yards from the border in the Newtownbutler area of Co. Fermanagh, was set alight on Jan. 27, but firemen succeeded in saving most of the building.

(12) An unsuccessful attempt to blow up the bridge over the River Blackwater at Augher, on the main road to Ballygawley in South Tyrone, was made on Feb. 12; unexploded charges of gelignite were found afterwards on the bridge, which was not damaged. Since the blowing up of the Favour Royal and Lismore bridges, on the main Belfast-Enniskillen road [see (10) above], the road over the bridge at Augher had been the only direct route from Belfast to Fermanagh *via* Dungannon or Armagh.

Earlier the same day a transformer near Moneymore (Co. Londonderry) was damaged by an explosion.

(13) Two attempted raids on the Territorial Army camp at Duncroggan (on the outskirts of Londonderry) were made by terrorists during the night of Feb. 13-14 but were foiled by the camp guards, who opened fire.

(14) A terrorist raid on a Territorial Army camp at Coleraine in the early hours of Feb. 16 was foiled by a sentry who opened fire.

(15) Two bridges in Co. Tyrone, one carrying the railway line from Belfast to Londonderry over the Dungannan-Pomeroy road, and the other carrying the same road over the railway at Tremogue, about two miles from Pomeroy, were blown up in the early hours of Feb. 17. The railway bridge was extensively damaged and all main-line traffic from Belfast to Londonderry blocked; the road bridge was damaged but remained passable to traffic. Extensive searches for the raiders were made by the police, troops, and spotter aircraft in the mountainous areas of Co. Tyrone. The damaged railway line was reopened to traffic four days later.

(16) Four armed men tried to burn down the linen factory of the Phoenix Weaving Co. Ltd. at Ballymena in the early hours of Feb. 20. The storekeeper and watchman gave an alarm to the police and the fire was quickly put out, causing only negligible damage.

(17-19) Electric transformers at Maghera (Co. Londonderry), Rathfriland (16 miles from Newry), and Strabane (Co. Tyrone), were damaged by explosives during the nights of Feb. 21, 22 and 26 respectively. An Army hut near Newry was blown up during the night of Feb. 21 but no casualties caused.

(20) Two attempts to cause destruction in Londonderry were made by terrorists in the evening of March 1. A fire at the goods station of the Great Northern Railway caused extensive damage to the office, which was completely gutted, but the fire services prevented the blaze from reaching the goods yard. Shortly afterwards a home-made bomb was thrown at the County Courthouse, but failed to explode. A widespread search for suspects and arms dumps was carried out by the police.

(21) In the early hours of March 2 a goods train from Enniskillen (Co. Fermanagh) to Londonderry was stopped by three armed terrorists in Co. Donegal, on the Eire side of the border, and the driver, fireman and guard removed at the point of the gun. The gunmen then drove the train to a point four miles from Londonderry, where they jumped off after turning the engine regulator to full speed. The unmanned train continued at a speed of 25 m.p.h. and crashed through the buffers at Londonderry Central Station (a terminus), embedding itself 20 ft. into the concrete platform. Seven coaches were wrecked, but no-one was hurt. The damage was estimated at about £20,000.

Just before the gunmen jumped off the train a signalman had noticed that one of the men on the footplate wore a mask, and telephoned to the main signal box at Londonderry. The signalman switched the train to the main passenger platform (which was empty at the time) to prevent it crashing at the goods station, where it would have blocked the entire siding.

Thefts of explosives occurred in the Irish Republic during January and February, obviously in connexion with the I.R.A. raids. On the night of Jan. 1-2 eleven rifles were stolen from army stores at Kittorglin, Co. Kerry, and on Jan. 7 nearly 600 lb. of gelignite, 2,500 detonators, and a large quantity of fuse wire were stolen from a Board of Works store at Toullaheady, Co. Tipperary. One of the largest explosives magazines in the Irish Republic, owned by Imperial Chemical Industries, at Moorestown, Co. Dublin, was broken into on Jan. 12 and about one ton of gelignite stolen. In the case of the two latter incidents, statements were issued by the I.R.A. disclaiming responsibility.

Counter-measures in Northern Ireland.

In the course of the month the Northern Ireland authorities intensified their security measures against the terrorists, whilst troop reinforcements were sent from Britain.

At a conference held at Stormont on New Year's Day and attended by Mr. Topping, Minister for Home Affairs, Lt.-General Sir Brian Kimmins (G.O.C., Northern Ireland) and Sir Richard Pim, Inspector-General of the Royal Ulster Constabulary, it was decided that increasing use of military patrols should be made in the border areas, subject to the approval of the British War Office. Accordingly, Army headquarters at Lisburn announced on Jan. 7 that the detachment of the Royal Northumberland Fusiliers stationed at Gough Barracks, Armagh, was being brought up to company strength, and that another company of the battalion was being moved to Londonderry. At the same time the company of the Royal Warwickshire Regiment stationed at Enniskillen was equipped with a number of armoured cars for patrol duties. The British War Office announced on Jan. 14 that the 61st Field Regiment, R.A., numbering about 650 men, was being sent for internal security duties (without its guns) to Northern Ireland, where it would be stationed near Omagh.

Following the attack on the Territorial Army barracks at Dungannon on Jan. 18, it was decided at a conference on Jan. 21 between the G.O.C., Northern Ireland, and representatives of the Territorial Associations in Counties Londonderry, Tyrone, and Fermanagh that T.A. personnel would take over from the Constabulary the responsibility of guarding their 50 buildings throughout Ulster.

It was announced on Jan. 9 that the N.I. Government had taken measures, in co-operation with the local authorities, to have street lighting kept on all night in some of the border towns, so as to foil raids carried out under cover of darkness. On Jan. 11 the R.U.C. announced that hundreds of roads and lanes between Northern Ireland and the Republic had been blocked or made impassable by trenches, craters, and barbed-wire fences; some of the "concession" roads extending for a short distance into Northern Ireland between two points in the Republic had also been blocked, whilst the remaining 18 unobstructed roads were under police and military guard. Later in the month, soldiers added barbed-wire fences to obstructions on unapproved roads in the Londonderry area.

It was announced on Jan. 14 that Mr. Topping had made further regulations under the Civil Authorities (Special Powers) Act empowering civil authorities and, in the case of (2) and (3) below, any person duly authorized by them:

(1) to "prohibit, restrict, or regulate in any area the use of vehicles or any class of vehicles on highways, or the use by vehicles of specified roads or classes of roads, either generally or in such circumstances as may be specified";

(2) to " enter any land, buildings, or other property whatsoever " ;

(3) " (*a*) to take possession of any land and to construct works, including roads, thereon and to remove any trees, hedges and fences therefrom ; (*b*) to take possession of any buildings or other property ; (*c*) to take such steps as may be necessary for placing any buildings or structures in a state of defence ; (*d*) to cause any buildings or structures to be destroyed, or any property to be moved from one place to another or to be destroyed ; (*e*) to do any other act involving interference with private rights of property."

On Feb. 14 it was announced that a flight of five Auster " spotter " aircraft would be sent to Northern Ireland and stationed at Aldergrove R.A.F. Station to assist in the operations against I.R.A. terrorists.

Arrests and Court Proceedings in Northern Ireland.

In addition to finding a number of arms dumps, explosives, and detonators in various areas of Northern Ireland, the N.I. police detained many suspects during January, a number of them being interned and others being committed for trial by the courts.

Seven men were arrested on Jan. 4 on a farm at Clontifleece, Co. Down, four of whom gave addresses in Eire ; the police also found a number of weapons. Another six men were seized in their homes in different parts of Co. Fermanagh on Jan. 7, while 25 men from the Belfast and Lurgan areas were detained on Jan. 12. Seventeen men, including members of the banned Sinn Fein party (among them Thomas Hoenan, secretary of the Belfast branch), were arrested in Belfast on Jan. 25, and another seven men were detained in Armagh and one in Belfast on the following day. Of those detained in police round-ups since December, 50 had been served with internment orders by the end of January.

At the magistrate's court at Ballymoney (Co. Antrim), three young men from Cork were sent for trial on Jan. 16 to the Spring Assizes at Belfast ; they had been involved in the attack on the radar station at Torr Head on Dec. 12 [see 15200 A], the charges against them including one of attempted murder of four policemen. On the same date (Jan. 16), at Armagh magistrate's court, two men from Co. Armagh were committed for trial at the Armagh Spring Assizes ; they had been arrested shortly after the attack on Armagh barracks on Dec. 12, the charges against them including one of attempted murder of a member of the Special Constabulary.

Another four men (three from Northern Ireland and one from the Irish Republic) were sent for trial to Belfast City Commission on Feb. 6 ; they had been arrested on Dec. 30 in an outhouse of a farm near Dunamore, Co. Tyrone, which belonged to the father of one of them, and had been found in possession of arms and ammunition which were British Army property.

Seven men, three from Newry and four from the Irish Republic, were committed for trial in Belfast on Feb. 8. They had been arrested by police at a farmhouse near Warrenpoint (in the Mourne mountains area of Co. Down) on Jan. 3, and were charged with possessing arms, ammunition, detonators, and handbooks of guerrilla warfare, and with being members of an illegal organization. During the hearing, handbooks were produced which had been found on two of the men ; one of them was called a " Handbook for Volunteers of the I.R.A., issued by G.H.Q. 1956," while others referred to a " flying column," assembly areas, and the use of explosives.

Anti-terrorist Measures in the Irish Republic. – Prison Sentences on I.R.A. Suspects.

Throughout January the Eire police made many arrests of I.R.A. suspects who were subsequently charged in the courts under the Offences Against the State Act. In a number of trials the majority of them were sentenced on one or several of the following charges : refusing to give an account of their movements, membership of an illegal organization, possession of incriminating documents, or possession of ammunition and weapons without a firearms certificate. Most of those arrested refused to answer the charges, while at many of the trials documents captured by the police were read giving particulars of I.R.A. terrorist plans and activities. The principal sentences imposed are summarized below :

(1) In the Dublin District Courts on Jan. 14 six men arrested in Co. Cavan on Dec. 31, eight men arrested on Jan. 2 in Co. Monaghan, and one man from Dublin were all sentenced to six months' imprisonment. The eight men arrested in Co. Monaghan had been intercepted by Eire police and troops as they were crossing the border into the Irish Republic from Northern Ireland ; four others were also arrested but sent to hospital, two being seriously wounded.

(2) In the Dublin District Courts on Jan. 17 two men (Sean Cronin and Robert Russell) arrested at Belturbet, Co. Cavan, on Jan. 8 were each sentenced to three months' imprisonment. They were both found guilty of failing to give an account of their movements and of membership of an illegal organization, while Cronin was also convicted for possession of an incriminating document.

This document, entitled *General Directive for Guerrilla Campaign*, was read to the Court. Believed to be the " master plan " for I.R.A. activities in Northern Ireland, it suggested the selection of five training organizers for Londonderry, Tyrone-Fermanagh, Armagh, Down, and Belfast-Antrim. Four columns of 25 men each were to be organized for training, and bases for these columns were to be established in various isolated mountain areas.

During the first phase, lasting one month, certain targets were to be destroyed, including the oil refinery, the two railway stations, the B.B.C. relay station, the Customs House, and the Tax Office at Londonderry, certain Territorial Army and Royal Ulster Constabulary posts in various areas, the Territorial Army camp at Dungannon, the Magherafelt power plant, a radar station in North Antrim, and a number of bridges. In " phase two," lasting three months, the terrorists would build up their forces and continue guerrilla attacks. Operations would be extended by raising local " flying columns," and activity would be intensified in the " eastern sector " Counties Armagh, Down, and Antrim. In " phase three " there would be a " continuation of the struggle on to a higher level, where we can co-ordinate our tactics on a more perfect communications basis."

The document also said : " Our mission is to maintain and strengthen our resistance centres throughout the occupied area and also to break down the enemy's administration in the occupied area until he is forced to withdraw his forces. Our method of doing this is use of guerrilla warfare within the occupied area, and propaganda directed at the inhabitants. In time, as we build up our forces, we hope to be in a position to liberate large areas and tie these in with other liberated areas that is, areas where the enemy's writ no longer runs."

In an " analysis of the situation " the document said : " The resistance of the people [Irish Nationalists] can be built up by clever propaganda on top of guerrilla success. From the point of view of guerrilla warfare, the co-operation of the people is essential. If this is lost or never received the guerrillas cannot win."

A second document found in Cronin's home, entitled *Outline of Operations to Date*, dealt with the lessons to be drawn from the opening phases of the " guerrilla activities." It stated : " From the Fermanagh experience we can prove that where guerrillas are active and aggressive the enemy grows scared and confused. If we had Fermanagh's activities all over we would be in a tremendously strong position in the Six Counties. We still hold the initiative in all areas and our limited supplies in most cases remain intact. We got more gelignite than we ever hoped for. Among the lessons we have learned are : The training of our men is still very spotty . . . Men are quite close to panic during the withdrawal stage. There is lack of battle discipline. Too many shout orders. Too many act without an order at all . . . All unfit men, or mentally unfit, for a hard campaign must be dropped from the columns. Local communications and intelligence must be built up by the locals in combination with the organizer who has been in the area before the campaign. Each area should have people on the lookout . . . We also suffer from lack of understanding on the part of some of our local volunteers and the people as to the purpose of the campaign."

(3) At a special court at Nenagh, a farmer (Daniel Gleeson) was sentenced to one month's imprisonment for possession of incriminating documents, and concurrently to three months' imprisonment on a charge of membership of an illegal organization. The judge added, however, that the sentences would be suspended if Gleeson entered into personal bail of £50 to be of good behaviour for one year.

(4) At a special court at Ballinamore (Co. Leitrim) on Jan. 24, a publican was sentenced to two months imprisonment for membership of an illegal organization and to one month (concurrently) for possession of incriminating documents.

(5) In the Dublin District Courts on Jan. 24 three men were each sentenced to three months' imprisonment. Documents found in the possession of two of the accused and read to the court included one which contained an appeal for volunteers to operate against the Six Counties, another in the form of an " intelligence report " on the movements of a certain person, and one headed " Irish Republican Army General Headquarters " and issued on Dec. 12, 1956, by " The Army Council, Irish Republican Army."

(6) In the Limerick District Court on Jan. 25 five men were sentenced to three months' imprisonment each. A letter found on one of the defendants (MacKillican) and read to the court was addressed to " O.C. each unit " and began : " In pursuance of the Army policy of a full-scale campaign against the British forces of occupation in the Six Counties, active service units early today attacked a number of enemy targets in the occupied area. Our campaign has now entered a decisive stage and every effort of the army units throughout the country must be directed to ensuring that they are able to maintain it." It added that nothing should be done which might provoke the authorities within the Republic, and went on to appeal for efforts to acquire much-needed supplies of ammunition and explosives from " friendly sources."

(7) At Ballymahon District Court on Jan. 25 a railway fireman was sentenced to three months' imprisonment.

(8) At Navan District Court on Jan. 25 a suspect was sentenced to three months' imprisonment.

(9) At Dundrum Court on Jan. 25 a foundry worker was sentenced to three months' imprisonment.

(10) At Tullamore on Jan. 25 two men were sentenced to three months' imprisonment on charges of being members of an illegal organization, and concurrently to two months on a charge of possessing incriminating documents. Nine documents found in the possession of one of the accused (Patrick Bolger) related to guerrilla warfare, battle morale and discipline, intelligence, sabotage, ambushing, and instructions concerning machine-guns, Bren guns, and Sten guns.

(11) At Cork on Jan. 26 two men were sentenced to three months' imprisonment.

(12) At Waterford on Jan. 29 four men were sentenced to two months' imprisonment on charges of possessing incriminating documents and being members of an illegal organization. Two of them (William Ronayne and Peadar Jones) were also sentenced concurrently to three months' imprisonment each for possessing considerable quantities of ammunition.

(13) In the Dublin District Courts on Jan. 29 five men were each sentenced to three months' imprisonment after being found guilty of possession of incriminating documents and membership of an unlawful organization. They included Tomas MacCurtain, a son of the former Lord Mayor of Cork of the same name who was shot by British forces in March 1920.

(14) Two men were sentenced at Dundalk on Jan. 30, one to four months' imprisonment for possession of a pistol and ammunition, and concurrently to two months for membership of an unlawful organization and possession of incriminating documents. The second man received two months' imprisonment.

(15) At Limerick on Feb. 1 a journalist was sentenced to two months' imprisonment for refusing to give a full account of his movements.

(16) In the Dublin District Courts a man was sentenced on the same charges to two months' imprisonment on Feb. 12.

On Jan. 23 it was officially announced by the Minister of Justice that Mr. Justice Teeran, a High Court judge, would hold an inquiry into the conduct of Mr. Justice Lennon, of the Dublin District Courts.

The matter arose from the trial before Mr. Justice Lennon of a certain Anthony Magan, who had appeared on Jan. 22 on a charge of possessing ammunition without a firearms certificate; after hearing the case, Mr. Justice Lennon had stopped the proceedings on Jan. 23 and ordered the firearms to be returned to Magan. During the trial the prosecution had produced in evidence a notebook detailing receipts of U.S. dollars over the period May 1954-July 1955 totalling $16,649, as well as a letter found on Magan which was addressed to a Thomas McGuigan of Philadelphia and which acknowledged receipt of a cheque for £35. 15s. 9d. received by Magan from McGuigan on behalf of the Tyronemen's Association in the United States.

Condemnation of I.R.A. Activities by Mr. Costello and Mr. de Valera. - Mr. MacBride's Criticism of Government Policy.

Mr. Costello, in a broadcast on Jan. 6, again condemned the I.R.A.'s terrorist activities in Northern Ireland and the use of force in trying to end partition.

Referring to the fact that two raiders from Eire and one Northern Irish policeman had been killed during the previous week, Mr. Costello declared: "The consequences that would follow a continuance of these attacks must now be clear to the whole nation. So far as they are directed from within the territory under our jurisdiction, it is the duty of the Government of this State to prevent their continuance. That duty we are resolved to perform . . .

"It is the deep and earnest conviction of my colleagues and myself that partition cannot and never will be ended by force. We believe that even if it were practicable to subdue by arms and hold in subjection those Irishmen who now wish to remain apart from us, the resentment which they would feel would thereafter divide us more deeply and lastingly than ever before. Our Constitution affirms Ireland's devotion to the ideal of peace and her adherence to the principle of the peaceful settlement of international disputes . . . War, therefore, is not the way chosen by the people of Ireland, or by their representatives, for the ending of partition; and no self-appointed group has any shadow of right to impose that decision in disregard of the people's wishes.

"What is happening is that a small group, with no basis of legitimate authority, is seeking to embroil our country in war. I want to bring clearly before the minds of all our people what that means, and what is involved in this evil and undemocratic pretension. Young men, some of them hardly more than boys, have been led by a small minority group of older men—experienced and ruthless men—to believe that they can end partition by destroying the lives of others and endangering their own lives and liberty in violent forays into the Six-County area. If they were permitted to continue in that course, there is no telling what evil might result. There would be all the bitterness and hatred that bloodshed causes. There would be a hardening of resolve among Irishmen in the North-East to remain divided from this part of the country . . .

"The men who are trying, as they say, to bring about unity, and who are pursuing their objective of creating strife, are not even united among themselves. I said over a year ago that we had not merely one but two rival groups contending for the privilege of being the authors of civil war. Now the splintering has gone even further and there are three or four groups, hostile to one another and having in common only their defiance of the authority of the Government and of *Dail Eireann*, and their willingness to set Irishmen in arms against one another . . ."

Referring to the allegation made by two members of the Dail [see below] that the Eire police and defence forces were being used to maintain partition, Mr. Costello declared: "I cannot too strongly condemn the wicked misrepresentation that our Irish forces are being used to help maintain partition. They are, on the contrary, acting on the instructions of an Irish Government responsible to a freely-elected Parliament—a Government which is working for Ireland and for Ireland alone." In giving those instructions the Government was merely carrying out its duty of seeing that the Constitution was respected; that the laws made by the Irish Parliament were observed; and that the will of the majority of the Irish people was not "flouted by a minority acting without authority or a mandate, human or divine."

After referring to the condemnation of the I.R.A.'s terrorist activities by the Roman Catholic Church, the Prime Minister made a strong appeal to parents, clergy, and others who might be in a position to influence or guide the young men "to induce them to cut themselves adrift from terrorist activities before it is too late." There should be "no word, act, or gesture" that could give the men responsible for the raids in Northern Ireland a pretext for claiming that they had popular approval or support, and it was "vitally important" that the men who were directing this violence, as well as those actively engaged in it, should have "no opportunity of deluding themselves or others into the belief that the people sympathize with their actions"

Rejecting comparison between the present activities of the I.R.A. and the struggle that had led to Irish independence, Mr. Costello concluded: "In the past men struggled to establish an independent, democratic Parliament and Government. Their efforts cannot be allowed to be frustrated by a self-appointed, unrepresentative group who seek to decide national policy according to their own undisciplined will, to seize powers which belong to the Dail and the Government, and to impose upon us all the tyranny of a few."

In a statement after Mr. Costello's broadcast, Mr. de Valera (Leader of the Opposition) expressed his "entire agreement" with what the *Taoiseach* had said.

Mr. de Valera added "The problem of partition cannot be solved by force, and were force to be used for any purpose it would have to be under the authority of *Dail Eireann*. To allow any military body not subject to *Dail Eireann* to be enrolled, organized, and equipped is to pave the way to anarchy and ruin. No responsible Government could permit it, and no thinking person can support it."

Other members of the Government expressed similar condemnation of the I.R.A.'s terrorist activities, notably Mr. Cosgrave, the Minister of External Affairs, Mr. Sweetman, the Minister of Finance and Mr. Everett, the Minister of Justice.

The motions criticizing the Government, to which Mr. Costello referred in his broadcast, had been tabled on Jan. 3 by Mr. McQuillan (Ind.) and Mr. P. Finucane (*Clann na Poblachta*), who asked the *Taoiseach* to recall the Dail to discuss resolutions:

(1) to instruct the Irish Republic's permanent delegate at the U.N. "to demand of the Secretary-General the immediate despatch of U.N. observers to the occupied part of the national territory";

(2) to ask the Government to "discontinue immediately the use of the Irish Army and the *Garda Siochana* (Civic Guard) as instruments of British policy in helping to maintain partition," and to release forthwith "the men recently taken into custody as a result of such use."

Both the Government's and the Opposition's policy in the matter of partition was strongly criticized in a message sent by Mr. Sean MacBride, leader of the *Clann na Poblachta* (one of the parties supporting the Government), to a party meeting held in Dublin on Jan. 18.

Mr. MacBride said that "one of the foremost essential requirements" for undoing partition was "the harnessing of the people behind a definite policy capable of achievement." He added: "Internal divisions . . . can only retard our national advance. But in order to achieve the unity of effort required, there must be a positive and constructive policy which, as far as the major parties are concerned, has been lacking." The recent "tragic events" had their origin "in the absence of policy and leadership on the part of the Government and the Opposition in regard to the enforced partition of the nation." The *Clann* had "urged time after time that this lack of positive policy was bound to lead to disillusionment on the part of young people," and it was "this complete absence of policy and leadership" that had "caused a section of the people to lose patience with the slowness and ineffectiveness of the democratic process."

As first steps to ending partition, Mr. MacBride suggested the enlargement of the Dail to include elected representatives from Northern Ireland, as well as the creation of an Irish Common Market. Steps should be taken to make a "realistic assessment of the economic barriers which would have to be overcome to provide for reunification," and they should work toward the economic reintegration of the two parts of the country. He stressed the importance of economic problems, not only because "the lifeblood of the nation is being drained away as a result of the lack of economic development," but also because they had "an important bearing on the ultimate reunification"

Statements by Northern Ireland Ministers.

Lord Brookeborough (Prime Minister of Northern Ireland), speaking in the N.I. Parliament on Feb. 5, claimed that the terrorists responsible for the recent raids in Northern Ireland were linked with the Communists.

Lord Brookeborough said that there was "a very close link between the recent outrages and the Communist Party," and that the outrages constituted "an obvious chance for the Communist Party to raise trouble." The Roman Catholic Church was opposed to Communism, but many of the people who carried out the outrages had disobeyed their Church. "It is significant," he went on, "that the Communists have given the I.R.A. steady encouragement since the outrages began. The official Russian newspaper *Pravda* describes them as 'the Irish people's national liberation movement,' and states that the

'popular masses' are alarmed by the threat which 'the presence of foreign military bases in the northern part of Ireland creates for Ireland's security.' The Red Army newspaper *Red Star*, the Soviet trade union newspaper *Trud*, *Izvestia*, and even the London Communist *Daily Worker* have all published accounts giving encouragement and support to the gunmen. There have been many misrepresentations about the real nature of the I.R.A. movement. It is conducting unprovoked armed aggression against us from a neighbouring State. It is not a 'broadly based national liberation movement' as alleged in the Communist press."

Continuing, Lord Brookeborough said the Communist interest in the I.R.A. was "twofold": first, their hope that I.R.A. activities could jeopardize the industrial progress of Northern Ireland and reduce the standard of living and prosperity, thereby creating "conditions in which Communism can thrive." Secondly, they had a more strategic aim in mind—to make Northern Ireland ports and facilities inaccessible to the forces of the North Atlantic Alliance. This was "the chestnut which the Communists hope the I.R.A. will pull out of the fire." It was therefore "not surprising that the I.R.A. should enjoy the friendship and support of the Communists, for there have been contacts between the two in the past and it is only the Communists who can have any worry about the presence of NATO military bases here."

The stand taken in the Irish Republic, both by Mr. Costello's Government and the Opposition, in condemning I.R.A. armed raids into Northern Ireland, and in particular Mr. Costello's broadcast of Jan. 6, was welcomed by Mr. Topping, the N.I. Minister of Home Affairs, on Jan. 22 and by Mr. Maginess, the N.I. Attorney-General. The latter described Mr. Costello's warning as "a courageous statement of the position," and expressed the hope that the policy announced by Mr. Costello would be "implemented by deeds."

Lord Brookeborough and Mr. Topping visited London on Feb. 14 for talks with British Ministers about the situation in Northern Ireland; they saw Mr. Macmillan and Mr. Butler, the Home Secretary, while Mr. Topping also had discussions with Sir John Nott-Bower, Commissioner of the Metropolitan Police, with whom he discussed security measures on the strength of documents captured in Belfast which indicated the danger of I.R.A. attacks in Great Britain.

A. WESTERN POWERS. — Four-Power Working Group on German Reunification.

It was announced on Feb. 15 in London, Washington, Paris and Bonn (1) that the British, U.S., French and German Federal Governments had agreed "to embark on a review of the problem of German reunification in relation to European security on the basis of the proposals made at the Foreign Ministers' conference in Geneva and in the light of subsequent developments"; (2) that this review would be initially undertaken by a working party consisting of officials of the four Powers, meeting in Washington; and (3) that the matter would subsequently be considered by the North Atlantic Council. The working group held its first meeting in Washington on March 6.

A spokesman of the German Federal Government said that the working party would make no attempt to prepare for another conference with the U.S.S.R., nor would it be concerned with the matters raised in Marshal Bulganin's recent letter to Dr. Adenauer (see 15370 A). A statement from the *Quai d'Orsay* said that the French Government had taken a leading part in setting up the four-Power working group and had been in close touch on the matter with Italy and the Benelux countries.—(Times - Le Monde, Paris - New York Times - Frankfurter Allgemeine Zeitung) **(Prev. rep. Geneva Conference of Foreign Ministers, 14537 A.)**

B. ISRAEL. — Suspension of Soviet Oil Deliveries.

A Moscow broadcast of Feb. 7 announced that the Soviet Government had halted the delivery of Soviet oil supplies to Israel because of that country's "aggressive action" against Egypt, and had cancelled the two-year contract signed between the two countries in July 1956. The Israeli Foreign Ministry announced on Feb. 19 that a Note had been sent to the U.S.S.R. accusing the Soviet Government of breach of contract and reserving the right to claim damages.—(New York Times) **(Prev. rep. 15010 A.)**

C. EASTERN GERMANY. — Flights of Refugees to Western Germany in 1956.

The West German Minister for Refugee Questions (Professor Oberländer) announced on Jan. 7 that 279,189 refugees from Eastern Germany had entered the Federal Republic in 1956, the highest number for any year with the exception of 1953. Nearly half were under 25 years of age, and 2,170 were members of the "people's police" in the Eastern zone.
(Frankfurter Allgemeine Zeitung) **(Prev. rep. 15267 A.)**

D. UNITED KINGDOM. — Rise in Gold and Dollar Reserves. - February Figures. - Signing of Agreement on U.S. Export-Import Bank Credit to Britain.

The Treasury announced on March 4 that the sterling area's gold and dollar reserves had increased by $63,000,000 during February, after taking into account (*a*) $20,000,000 received from the E.P.U. in part settlement of the January surplus, (*b*) $4,000,000 received in U.S. defence aid, and (*c*) $3,000,000 paid to creditor countries in the E.P.U. under bilateral agreements. As a result, Britain's gold and dollar reserves stood at $2,147,000,000 on Feb. 28.

It was stated in the Press that the February figures had also been favourably influenced by the Indian sale to the sterling area's central reserves of $59,000,000 which India had borrowed from the International Monetary Fund, out of a total amount of $200,000,000 made available by the Fund to India early in February.

Provisional figures for the E.P.U. February settlement showed that Britain had a surplus of £8,000,000, three-quarters of which will be settled in gold or dollars and the remaining quarter by the reduction of the U.K.'s debt to the Union.

The Chancellor of the Exchequer, Mr. Thorneycroft, announced on Feb. 26 that the formal agreement with the U.S. Export-Import Bank establishing a $500,000,000 line of credit in favour of the United Kingdom had been signed in Washington on the previous day.

Mr. Thorneycroft explained that the credit would make it possible to recoup at any time up to Feb. 28, 1958, a substantial part of Britain's dollar expenditure on goods and services from the beginning of 1957. "Whether, and if so when," the Government would draw on the credit would be "a matter of judgment to be decided in the light of the circumstances." The rate of interest would be 4¼ per cent on the actual drawings. Mr. Thorneycroft added: "We are not pressed for this loan. There is no immediate need for it. What is wanted, and the help it gives, is to provide a substantial reinforcement to the reserves."

It was stated on the same day that, under the terms of the agreement, the U.K. Government would deposit $120,000,000 of British-held dollar securities as collateral for every $100,000,000 borrowed. If the market value of the collateral securities fell during the period of the loan, the British Government would only have to make up the collateral's value if this should fall below 100 per cent of the actual loan amount. If, on the other hand, the market value of the collateral securities rose beyond 120 per cent of the actual loan amount, the British Government would be free to draw back some of the securities. Interest on the collateral securities would still accrue to Britain.

Unlike normal loans by the Export-Import Bank made solely for the purchase of U.S. goods and services, the present loan will permit the United Kingdom to purchase oil from any part of the dollar area.—(Financial Times - New York Times)

E. PORTUGAL. — State Visit by Queen Elizabeth II and the Duke of Edinburgh.

Queen Elizabeth II and the Duke of Edinburgh paid a four-day State visit to Portugal from Feb. 18-21 at the invitation of President Craveiro Lopes, who had visited Britain in 1955 (see 14527 A). The Queen flew from London and was reunited at Montijo Airport, near Lisbon, with the Duke of Edinburgh, who had been staying at Gibraltar after completing his four-months' Commonwealth tour (see 15411 A).

During their three-day stay in Lisbon (Feb. 18-20), where they resided at the Queluz Palace, the Queen and the Duke attended a number of official functions, including a State banquet given by President Craveiro Lopes, held a reception at the British Embassy, and were the guests of the Lord Mayor at the Lisbon City Hall. They also visited a number of places of historic interest and attended a gala performance at the São Carlos Opera House, while the Queen visited a housing estate at Restalo, on the city's outskirts.

In the course of a 210-mile motor tour on Feb. 20 the Queen and the Duke of Edinburgh visited the towns of Santarem and Vila Franca, the fishing village of Nazaré, and the monasteries at Batalha (where the Queen laid a wreath on the Tomb of the Portuguese Unknown Warrior of the First World War) and Alcobaca. They ended their State visit on Feb. 21 with a visit to Oporto, returning to London by air the same evening.

The Queen, who was enthusiastically welcomed by great crowds in Lisbon and the other places visited, was the first British sovereign to pay a State visit to Portugal since King Edward VII, who visited Lisbon in 1903.

F. EGYPT. — Ending of State of Emergency.

The state of emergency proclaimed at the outbreak of the Suez hostilities was lifted on March 6, together with the black-out and other restrictions imposed at the time.—(Times)
(Prev. rep. 15173 A.)

MARCH 9—16, 1957

A. UNITED STATES. — Congressional Approval for "Eisenhower Doctrine" on Middle East.

President Eisenhower's proposals for American military and economic aid to Middle Eastern countries threatened by Communism (see 15305 A) were finally approved by the Senate on March 5 by 72 votes to 19, and by the House of Representatives on March 7 by 350 votes to 60. The Congressional resolution to this effect was signed by the President on March 9.

The protracted Congressional hearings on the Administration's resolution had begun in the Senate on Jan. 14, and continued for many weeks before the resolution (amended in certain respects, as described below) was finally adopted by both Houses and signed by the President. Strong criticisms of the Administration's policy in the Middle East were voiced during the hearings by leading Democratic senators.

The Administration's Resolution.

The "Eisenhower doctrine" was formally embodied in a resolution, submitted to Congress on Jan. 5, in which the President asked for Congressional authorization "to undertake economic and military co-operation with nations in the general area of the Middle East in order to assist in the strengthening and defence of their independence." The resolution was worded as follows:

"Whereas a primary purpose of the United States in its relations with all other nations is to develop and sustain a just and enduring peace for all, in accordance with the U.N. Charter; and

"Whereas the peace of the world and the security of the United States are endangered as long as international Communism and the nations it controls seek by threat of military action, use of economic pressure, internal subversion, or other means to attempt to bring under their domination peoples now free and independent; and

"Whereas such danger now exists in the general area of the Middle East;

"Therefore be it resolved by the Senate and House of Representatives of the United States of America:

"(1) That the President be, and hereby is, authorized to co-operate with and assist any nation or group of nations in the general area of the Middle East in the development of economic strength dedicated to the maintenance of national independence.

"(2) The President is authorized to undertake, in the general area of the Middle East, military assistance programmes with any nation or group of nations of that area desiring such assistance.

"Furthermore he is authorized to employ the armed forces of the United States as he deems necessary to secure and protect the territorial integrity and political independence of any such nation or group of nations requesting such aid against overt armed aggression from any nation controlled by international Communism;

"Provided that such employment shall be consonant with the treaty obligations of the U.S.A., the U.N. Charter, and actions and recommendations of the United Nations; and, as specified in Article 51 of the Charter, that measures pursuant thereto shall be immediately reported to the Security Council and shall not in any way affect the authority and responsibility of the Security Council to take at any time such action as it deems necessary in order to maintain or restore international peace and security.

"(3) The President is authorized, when he determines that such use is important to the security of the United States, to use for the purposes of this resolution, without regard to the provisions of any other law or regulation, a sum not exceeding $200,000,000 from any appropriations now available for carrying out the provisions of the Mutual Security Act of 1954, as amended . . .

"(4) The President shall in January of each year report to Congress his action under this resolution.

"(5) This resolution shall expire when the President shall determine that the peace and security of the nations in the general area of the Middle East are reasonably assured by international conditions created by action of the United Nations or otherwise."

Mr. Dulles' Statement to Foreign Affairs Committee of House of Representatives.

Mr. Dulles, the Secretary of State, appeared before the Foreign Affairs Committee of the House of Representatives on Jan. 7, when Congressional hearings opened on the Presidential resolution. In the course of a lengthy statement he appealed for prompt Congressional action on the resolution, and gave warning that "any long delay or division [of opinion] would be disastrous" as far as the Middle East area was concerned. Part of Mr. Dulles' statement was made in public and part in secret session.

Mr. Dulles said that it would be a "major disaster" for the peoples of the Middle East, and indeed of the whole world, if the area should fall "within the grip of international Communism." In such an eventuality the Middle Eastern nations would lose their national independence like those of the East European "satellites," and "the disaster would spread far beyond the confines of the Middle East itself." As the economies of many Western European countries depended to a large extent upon the natural products of the Middle East, and upon transportation through the area, "the vast sacrifices which the U.S.A. has made for the economic recovery and military defence of Europe would be virtually nullified if the Middle East fell under the control of international Communism."

The Secretary of State continued: "The [Middle East] area is much divided within itself. There is a high degree of disunity between the Arab States and Israel, a disaccord which has been heightened by the recent Israeli military action in Egypt. There is much disunity among the Arab States themselves. There is suspicion against any outside force lest it be a device to reimpose colonialism . . . No single formula will solve all the problems in the Middle East. They will have to be attacked in a variety of ways, as we have steadily sought to do and will continue to do. But the evolution of events now requires us to add a new element to reinforce our other actions in the area.

"The danger [of Communism in the Middle East] can take any one or more of several forms. There is the possibility of open armed attack. There is the possibility of subversion—a danger which is increased if there be a sense of insecurity. There is the danger that economic conditions may be such as to make Communism seem an attractive choice. Any programme, to be adequate, must be prepared to meet all three of these dangers and any combination of them. Also, they cannot be met under present conditions unless we make clear now, in relation to the Middle East, what we have already made clear in relation to so many areas—namely, that armed Communist attack would have to be met, if need be, by the armed force of the United States . . .

"You may feel that there is in fact no doubt as to what Congress would do if international Communism set out on piecemeal conquest of the world by war. But until Congress has actually spoken, there is doubt in the Middle East, and there may be doubt in the Soviet Union. If those doubts persist, then the danger persists and grows. If we elect to wait and see, and then decide, the waiting period will greatly heighten vulnerability to both direct attack by overwhelming force and to indirect aggression. And we shall not have deterred the aggression. Only if Congress quickly dispels doubts, only if it puts the stamp of its approval upon a rounded programme of economic and military assistance and reassurance for the Middle East, will it have done the maximum it can do to preserve peace and freedom.

"The purpose of the resolution is not war. It is peace. The purpose, as in the other cases where the President and Congress have acted together to oppose international Communism, is to stop World War III before it starts."

It was officially disclosed on Jan. 12 that Mr. Dulles, in that part of his testimony given to the House Foreign Affairs Committee in secret session, had expressed the "definite belief" that the Middle East area would be "lost" to the Communists without prompt U.S. economic aid as well as military backing. "And if it is lost," he added, "it will be the greatest victory that the Soviet Communists could ever have gained, because if they could get into this area they have, in effect, gotten Western Europe without war." It was also disclosed that Mr. Dulles had affirmed that the "Eisenhower doctrine" would operate in the event of overt aggression by "volunteers" from the Soviet Union or Communist China, and that he had defined the Middle East as "that area lying between and including Libya on the west, Turkey on the north, Pakistan on the east, and the Arabian peninsula on the south"—the term "Arabian peninsula" being designed to include Ethiopia and the Sudan.

Hearings in Senate Committees. - Senator Fulbright's Attack on Mr. Dulles. - Demand for White Paper on U.S. Middle East Policy.

On Jan. 14 Mr. Dulles gave testimony before the Senate Foreign Relations and Armed Services Committees, which met as a joint committee and which took evidence until Feb. 11.

Mr. Dulles was closely questioned on Jan. 14-15 by a number of Democratic senators—notably Senator Hubert H. Humphrey (Minnesota), Senator J. William Fulbright (Arkansas) and Senator Richard B. Russell (Georgia)—on the economic and military implications of the "Eisenhower doctrine." In reply to these and other questions, the Secretary of State pointed out *inter alia* that there was "no present plan" to station American troops in the Middle East; that nothing in the Administration's resolution would authorize the use of atomic weapons in any conflict or hostilities originating in the Middle East; and that, if it came to defining an aggressor country "dominated by international Communism," the President would consult Congressional leaders before reaching a determination. In the course of his statement—which was on similar lines to that made to the House Foreign Affairs Committee—Mr. Dulles said that possible Communist aggression in the Middle East constituted "the most serious threat we have faced over the past ten years." He also said that there would be "a very great likelihood" of U.S. troops fighting in the Middle East if Congress rejected the resolution, but "very little likelihood" of such an eventuality if the resolution were accepted. The Arab-Israel problem, he pointed out, would remain the concern of the United Nations, and the U.S.A.'s proposed guarantee against Communist aggression would not involve forcible U.S. intervention to keep the peace in the "intra-regional" affairs of the Middle East.

Questioned by Senator Kefauver (Democrat, Tennessee) as to why the Administration had not consulted its British and French allies before announcing its new Middle East doctrine, Mr. Dulles said that he could think of no surer way to turn the Middle East over to international Communism "than for us to go there hand-in-hand with the British and French." In view of the animosity against Britain and France in most of the Arab countries, he felt that any attempt to embark on a joint plan would have been "doomed" from the beginning.

When hearings were resumed by the Senate Joint Committee on Jan. 24, Senator Fulbright delivered the strongest attack yet made on Mr. Dulles by any Democratic leader. After declaring that the "disastrous and remarkable collapse of our relations with our closest allies has taken place under the direction of the present Secretary of State, apparently during the relatively short space of a few months," he proposed that the Senate Foreign Relations and Armed Services Committees should defer action on the Administration's resolution until Mr. Dulles had submitted a White Paper on American policy throughout the Suez crisis. Senator Fulbright's demand was supported by two other leading Democratic Senators—Mr. Wayne Morse (Oregon) and Mr. Hubert H. Humphrey (Minnesota). The chairman of the Foreign Relations Committee (Senator Theodore F. Green, Democrat) ruled, however, that Senator Fulbright's proposal could not be considered until Congressional action on the Administration's resolution had been completed.

Senator Fulbright declared that Congressional approval of the resolution, as had been urged by Mr. Dulles, would be tantamount to a vote of confidence in the Administration's conduct of foreign affairs. He went on: "The resolution is . . . a blank cheque for the Administration to do as it pleases with our soldiers and our money. I should need more convincing evidence than I have received that Mr. Dulles has evolved policies regarding the Middle East which are in the interests of America's welfare. I regard the policies which he has been following as harmful to our interests, as calculated to weaken the influence of the free world in the Middle East, as disastrous to NATO, and as damaging to our friendship with Great Britain and France. I suggest that this Committee ask the Secretary to review his conduct of our foreign relations in the Middle East, at least since the time when he visited General Neguib in Cairo and gave him a silver-plated pistol."

After declaring that it was "common knowledge that our two strongest allies, Britain and France, have been grievously wounded by our policies in the Middle East and the United Nations," Senator Fulbright said that a review of U.S. policy, such as he proposed, should explain why the leaders of the British Government had "concealed from us their plans to take action which they knew would seriously affect our interests in the Middle East." He added: "I have seen no reasonable explanation of why Great Britain and France, the two greatest beneficiaries of our foreign aid programme, should want to deceive us. Surely the members of this Committee should know what motivated this unprecedented action by friendly Governments before we are asked to express our confidence in the conduct of our foreign affairs during this period."

In addition, Senator Fulbright asked that the Committee should be given a full report on the course of the Administration's relations with President Nasser; on how and why the U.S.A. had become involved in the Aswan Dam project; and on what had led to Mr. Dulles's "abrupt withdrawal of the offer just as it was being accepted by Colonel Nasser, a procedure calculated to give the greatest possible offence."

In a statement to the Senate Joint Committee on Jan. 25, Mr. Dulles rejected Senator Fulbright's proposal for an official White Paper reviewing U.S. policy in the Middle East, on the grounds that it would take several months to prepare adequately; that its preparation would raise "almost insuperable difficulties"; that many "vital aspects" of the Suez crisis could only be explained by references to "highly confidential communications" with other Governments; that it would not only be "a slow process" to obtain the consent of those Governments to publication, but in some instances consent might never be granted; and that an inquiry as proposed by Senator Fulbright would do "irreparable damage" to America's association with Britain and France. After reiterating that any prolonged delay in approving the Administration's resolution would make the task of keeping Communism out of the Middle East "infinitely more difficult," and that speed was essential, Mr. Dulles said that the Administration had received "desperate" appeals from Turkey, Iraq, Persia and Pakistan for assurances that the U.S.A. would come to their aid if they were attacked by the Soviet Union. He conceded that U.S. membership of the Baghdad Pact would already have provided such assurances, but explained that the U.S. Government had refused to join that pact because it did not wish to be "embroiled in Arab politics."

Senator Wayne Morse asked Mr. Dulles why America should be left to "go it alone" in the Middle East in the event of hostilities, whereas neither Britain nor France would be committed, despite the fact that both countries were heavily dependent on Middle East oil. Mr. Dulles replied: "Personally as things are today I hope they will change if I were an American boy going to fight in the Middle East, I would not want a British and French soldier, one on my right hand and one on my left hand; I think I would be a lot safer without them."

The State Department spokesman (Mr. Lincoln White) issued the following statement later on Jan. 25: "By no stretch of the imagination could this [Mr. Dulles's remark] be considered as a reflection on British-French forces. As far as valour and training are concerned, there are none we value more highly as allies."

Mr. Dulles himself, at a further private session of the Joint Committee, said that he had spoken "in relation to the present situation, particularly in Egypt, where due to the fact that the British and French forces had been there as enemies fighting Arabs . . . anything indicating that they would be brought back under those present conditions would not be useful." He added that he regarded British and French troops "as among the very best in the world, upon whom we would be very glad to depend if we were in any fighting war."

The American War Veterans' Committee sent the following open letter on Feb. 1 to the British and French member-organizations of the World Veterans' Federation:

"Secretary of State Dulles was not speaking for the broad mass of American veterans when he said that if he were an American soldier he would not want British or French soldiers to be fighting alongside him in the Middle East. We were shocked . . . to read Mr. Dulles's remarks. We are, of course, glad that the Secretary has apologized and indicated that his statement was misinterpreted. Nonetheless the impression may be left that his statement represents a segment of American viewpoint. It does not . . . We have fought shoulder to shoulder with British and French soldiers . . . If American boys have to serve in the Middle East, we are certain they will welcome and never oppose serving with the magnificent soldiers of your nations . . ."

The Senate Foreign Relations and Armed Services Committees ended their joint hearings on Feb. 11. In addition to hearing Mr. Dulles, evidence had also been taken from Admiral Radford (chairman of the U.S. Chiefs of Staff) and General Gruenther (former Supreme Allied Commander in Europe), both of whom expressed full support for the Administration's resolution and urged its early acceptance.

Partial Rewording of Administration's Resolution by Senate Joint Committee. - Acceptance by President Eisenhower. - Definition of "Middle East Area."

The Senate Joint Committee approved the Administration's resolution on Feb. 15 (by 20 votes to 8) with one important amendment namely, the "blanket" authorization for the President to use troops in the Middle East was deleted, and a new text was approved authorizing the employment of U.S. forces "provided that such employment shall be consonant with the treaty obligations of the United States and with the U.N. Charter." No alteration was made in the provisions for economic aid to the Middle East countries.

Those parts of the Administration's original resolution which were deleted were the second and third paragraphs under section (2), dealing with the possible use of American armed forces in the Middle East [i.e. the paragraphs beginning "Furthermore" . . . and "Provided that . . . "—see above]. In their place, the Senate Joint Committee approved the following revised wording for the second paragraph of the resolution:

"The President is authorized to undertake, in the general area of the Middle East, military assistance programmes with any nation or group of nations of that area desiring such assistance.

"Furthermore, the U.S.A. regards as vital to the national interest and world peace the preservation of the independence and integrity of the nations of the Middle East. To this end, if the President determines the necessity thereof, the United States is prepared to use armed forces to assist any nation or group of nations requesting assistance against armed aggression from any country controlled by international Communism; provided, that such employment shall be consonant with the treaty obligations of the United States and with the U.N. Charter."

The deletion of the original wording was moved by Senators Mike Mansfield and Hubert Humphrey (both Democrats) and was adopted by 15 votes to 13. The voting was on party lines, the 13 Republicans voting for the original wording and the 15 Democrats for the new text. Senator Humphrey explained the revised wording thus: "What we are saying is that if the President finds it necessary to take military action, we will support what he does. But the responsibility for the decisions is squarely up to him."

The 15 majority votes were those of Senators Theodore F. Green (Rhode Island), Richard B. Russell (Georgia), J. William Fulbright (Arkansas), Harry F. Byrd (Virginia), John J. Sparkman (Alabama), Hubert H. Humphrey (Minnesota), Estes Kefauver (Tennessee), Mike Mansfield (Montana), John C. Stennis (Mississippi), Wayne Morse (Oregon), Stuart Symington (Missouri), Russell B. Long (Louisiana), Henry M. Jackson (Washington), John F. Kennedy (Massachusetts), and Sam J. Ervin jr. (North Carolina).

The 13 opposing votes were cast by Senators Alexander Wiley (Wisconsin), Leverett Saltonstall (Massachusetts), H. Alexander Smith (New Jersey), Styles Bridges (New Hampshire), Bourke B. Hickenlooper (Iowa), Ralph R. Flanders (Vermont), Margaret Chase Smith (Maine), William F. Knowland (California), Francis Case (South Dakota), George D. Aiken (Vermont), Prescott Bush (Connecticut), Homer E. Capehart (Indiana) and Frank A. Barrett (Wyoming).

Certain other amendments to the Administration's resolution —all of a minor character—were approved by the Joint Committee without opposition, viz.:

(1) Stipulating that the authority granted to the President to spend $200,000,000 on special aid projects in the Middle East free of present restrictions should not commit Congress to any further outlay. (Moved by Senator Byrd).

(2) Stipulating that in spending this money, which would come from funds already appropriated for foreign aid, military assistance projects must be paid for only from existing military funds, and economic projects from existing economic funds. (Also moved by Senator Byrd).

(3) Requiring the Administration to use none of this $200,000,000 until 15 days after it had told Congressional committees where and how it was to be used in the Middle East. (Also moved by Senator Lyndon B. Johnson, the Senate Democratic leader).

(4) Providing that U.S. military action should only be taken after a determination by the President that it would be important to the national security of the United States. (Moved by Senator Case).

A statement was issued from the White House on Feb. 4 saying that President Eisenhower, after consulting Mr. Dulles, agreed to the changes made by the Senate Foreign Relations and Armed Services Committees and felt that the resolution in its revised form was "intended and designed to accomplish the purposes outlined by the President in his message to Congress of Jan. 5, 1957." The President therefore urged the Senate to act promptly and to "approve these purposes by a decisive vote."

The White House statement added: "The President notes that the text adopted by the two Senate Committees differs in some respects from that recommended by the Executive branch and adopted with certain amendments by the House of Representatives [see below]. But the President has no doubt that, since both the Senate Committees' version and the House version seem clearly intended to support the President's programme, final Congressional action will be in terms entirely satisfactory to the President."

The Senate Foreign Relations and Armed Services Committees issued a joint statement on Feb. 15 urging prompt Congressional action on the resolution, and declaring that their refusal to grant the President a "blanket authorization" for the use of troops in no way indicated any "weakening" of the position of the United States. The statement said:

"This language [i.e. the new text] has the virtue of remaining silent on the question of the relationship between Congress and the President with respect to the use of the armed forces . . . At the same time [it] makes clear the importance which the United States attaches to the Middle East and the determination of the U.S.A. to use armed force to resist Communist aggression in the area should any nation request such assistance.

"The Joint Committee rejects the idea that because the agreed language does not deal with the question of the scope of the President's authority, the language therefore may indicate a weakening of U.S. determination. On this latter point let there be no doubt. Although the Joint Committee was sharply divided as to the proper constitutional procedure for the U.S.A. to follow, it was not divided at all as to the substantive policy involved.

"The Joint Committee strongly supports the policy announced by the President of using armed force, if necessary, to help nations in the Middle East resist overt Communist aggression. The Joint Committee has not the slightest doubt that, should such aggression occur and should American help be requested, help would be forthcoming promptly and forcefully.

"On balance, the Joint Committee is of the opinion that the clear statement of policy . . . in the resolution [as amended] is preferable to a blanket authorization to the President to use the armed forces in this area. By declaring the policy of the United States, the resolution is actually stronger in some respects than a simple authorization of the President."

The statement defined "the general area of the Middle East" as lying "between Libya on the west, Turkey on the north, Pakistan on the east, and Saudi Arabia and Ethiopia on the south."

Final Approval by Senate and House of Representatives.

Prior to the hearings in the Senate Joint Committee, the House of Representatives had approved the Administration's resolution on Jan. 30, without any substantial amendment, by 355 votes (188 Democrats, 167 Republicans) to 61 (35 Democrats, 26 Republicans).

The House Foreign Affairs Committee had previously approved the resolution on Jan. 24 by 24 votes to two. Though making no textual alterations, it (*a*) noted that the President's proposals failed to meet such "basic" Middle East problems as the solution of the Arab-Israel dispute, the Suez controversy, the refugee issue, and other matters "of grave importance"; (*b*) called upon the Administration to present to Congress and the United Nations "positive and comprehensive measures for dealing with the fundamental problems of the Middle East"; and (*c*) declared that the United States "should lead in boldly pursuing and implementing policies and programmes to bring peace, security, and economic stability to the Middle East."

The resolution as revised by the Senate Foreign Relations and Armed Forces Committees was approved by the full Senate on March 5 by 72 votes (42 Republicans, 30 Democrats) to 19 (16 Democrats, 3 Republicans), after debates extending over a fortnight. The revised resolution was approved by the House of Representatives on March 7 by 350 votes to 60, and received the Presidential signature on March 9 as stated above.

Mr. James Richards, special assistant to the President on Middle Eastern problems (see page 15307, first column), left Washington on March 12 to explain the "Eisenhower doctrine" to the Governments of the Middle East countries. He stated that discussions would be held "only with Governments who wish them," and that "we will not try to force our views upon others."

Democratic Criticisms of Administration's Policy in Middle East.

Apart from the criticisms voiced by Senators Fulbright, Mansfield, Humphrey, and other Democratic senators during the Congressional hearings, the Administration's policy in the Middle East was also strongly attacked by the Democratic Party outside Congress—notably by the National Democratic Advisory Committee in a statement issued on Jan. 5, and by ex-President Truman and Mr. Adlai Stevenson in public speeches.

After the recent Presidential and Congressional elections, the Democratic Party had decided on Nov. 27, 1956, to establish a National Democratic Advisory Committee as an official party organization. The Advisory Committee came into existence during December, its members including Mr. Adlai Stevenson (Democratic candidate at the Presidential elections), Senator Estes Kefauver (the Democratic vice-presidential candidate), Mr. Harry S. Truman (the former President), Mrs. Eleanor Roosevelt (widow of the late President Roosevelt), Mr. Averell Harriman (Governor of New York), and Senator Humphrey.

The statement issued by the Democratic Advisory Committee on Jan. 5 [i.e. on the same day that President Eisenhower presented his resolution to Congress] charged the President with "brushing aside" the basic problems of the Middle East, and accused the Administration of having "sided with Communist Russia against free Britain and France and with dictator-controlled Egypt against free Israel" during the Suez crisis.

After commenting that the situation in the Middle East had been dangerous for many months, "including the recent [election] campaign months during which the Administration was lulling the public with assurances that the outlook for peace in the Middle East was never better," the Democrats' statement continued:

". . . By Mr. Eisenhower's own admission his proposals do not purport to cope with all the problems of the Middle East. They are, in effect, an effort to partially close the stable door after the horse is partially outside the stable. We hail the announced intention of Democrats in Congress to put Mr. Eisenhower's proposals under close and thorough scrutiny . . .

"Mr. Eisenhower says that the blame for the present danger in the Middle East lies on the Communists. There is little new in this thought. The other perils which we have experienced since World War II can also be blamed upon the Communists. The question remains as to how to turn a dangerous present into a less perilous future. The first step is for our Government to address itself to the root problems of the Middle East—the problems which Mr. Eisenhower brushed aside [in his resolution]. These are the problems of Suez and relations between Israel and the Arab States. American minds can come up with something better than the statement that these problems are before the United Nations and we are behind the United Nations. The responsibility for a programme to deal with these problems rests squarely upon the shoulders of the President. We hope he will move with dispatch to prepare such a programme and submit it to the country.

"The programme Mr. Eisenhower presented to Congress should be looked at in a larger context than in which it was presented in Mr. Eisenhower's speech. Increasing Communist boldness and increasing Communist menace in the Middle East and elsewhere have gone hand in hand with the deterioration of the grand alliance of free nations which stood as a strong and united defender of freedom at the end of Mr. Truman's Administration. Bullying of our allies has eroded our position until we have sided with Communist Russia against free Britain and France and with dictator-controlled Egypt against free Israel.

"Small wonder that the rulers of the Kremlin believe that we are confused, uncertain, and perhaps timid or weak. Small wonder they are emboldened to increase their pressure on free nations . . . And small wonder, in view of these events, that our prestige and influence

have declined in every section of the world in recent years. The case of Hungary is dramatic proof that the Kremlin has been emboldened by the deterioration of our alliances and the weakening of our leadership . . . It is no coincidence that the brutal repression of the Hungarian patriots occurred at a time when our muddling in the Middle East had brought on the Suez crisis.

"It is significant that Mr. Eisenhower appeared [in his resolution] to treat the Middle East crisis as an isolated area problem unrelated to our dealings with the rest of the world. That is the way in which this Administration has conducted foreign policy. It has bounced from trouble-spot to trouble-spot. It has been so occupied with these activities that it has had little time to examine the global picture, and apparently no time to plan a comprehensive, vigorous programme to rebuild our alliance and restore our prestige and leadership. The time has come for Mr. Eisenhower to face up to this larger task and to abandon his present improvisations in favour of a foreign policy programme that faces facts all over the world and seeks to deal with them."

In a speech in Miami on Feb. 6, ex-President Truman described the President's proposals for the Middle East as "too little and too late," and accused the Administration of "hiding behind the skirts of the United Nations" and avoiding the "responsibility of having some policy of our own for the settlement of the conflicts in the Middle East."

Mr. Adlai Stevenson, speaking in California on the same date, strongly attacked Mr. Dulles's handling of U.S. foreign affairs, and said that "the first vacuum that should be filled is in the State Department and not in the Middle East."

Senate Inquiry into American Policy in Middle East.

During the Congressional hearings, the Senate Foreign Relations and Armed Services Committees unanimously decided on Jan. 29 to hold a full inquiry into American foreign policy in the Middle East from 1946 to the outbreak of the Suez crisis in October last. The resolution requested Mr. Dulles to "prepare a chronological statement, together with classified and unclassified supporting documents, telegrams, and the like, of all the events that have contributed significantly to the present situation in the Middle East, with particular reference to the period beginning January 1, 1946.

Senator Knowland (Republican leader in the Senate) told press correspondents that the inquiry was acceptable to both President Eisenhower and Mr. Dulles. As it was the Administration's "understanding" that disclosure of private conversations with Heads of State and personal correspondence with them was "not customary," it was therefore "most unlikely" that the Senate Committees would publish such material.

When Senator Fulbright had proposed a review of U.S. policy in the Suez crisis [see above], Senator Knowland had moved an amendment that such a review should be broadened to include events since 1946 – i.e. during the Truman Administration as well as the Eisenhower Administration. This was accepted by Senator Fulbright, and the above-mentioned inquiry was agreed to without opposition.—(New York Times - New York Herald Tribune) **(Prev. rep. "Eisenhower Doctrine," 15305 A.)**

A. UNITED KINGDOM. — Housing Construction in 1956. - The Housing Subsidies and Slum Clearance (Compensation) Acts.

Figures published by the Ministry of Housing and Local Government on Feb. 1 showed that 300,225 permanent houses and flats were completed in Britain in 1956, compared with 316,995 (revised figure) completed in 1955. Of the 1956 total, 166,267 were built by local authorities, 124,161 by private builders, 2,666 by housing associations, and 7,131 by Government departments. The total number of permanent houses and flats completed in Britain since the end of the war was given as 2,539,875, of which 1,832,043 had been built by local authorities, 606,222 by private builders, 30,837 by housing associations, and 61,773 by Government departments.

The Housing Subsidies Act.

The Royal Assent was given on March 27, 1956, to the Housing Subsidies Bill implementing the Government's decision to cut the general housing subsidies, to maintain them for slum clearance (in order to encourage local authorities to devote a larger proportion of their housing programmes to the rehousing of slum dwellers), and to increase them for the housing of "overspill" populations in New Towns or expanded towns. This decision had been announced by Mr. Butler, then Chancellor of the Exchequer, in his 1955-56 Supplementary Budget speech on Oct. 19, 1955, and was subsequently elaborated by Mr. Duncan Sandys, then Minister of Housing and Local Government, on Oct. 27, 1955.

The principal provisions of the Housing Subsidies Bill were:

(1) The basic Exchequer subsidy on houses built by local authorities for general needs was reduced from £22. 1s. to £10, with consequential adjustments and subsidies for flats.

(2) The subsidy was maintained at £22. 1s. for houses built in slum-clearance areas.

(3) The subsidy was increased from £22 1s. to £24 for houses built "to facilitate necessary movements of the population," e.g. New Town or expansion schemes to deal with "overspill" populations, or housing schemes "to assist the urgent needs of industry."

(4) The existing subsidy rate was retained for houses and flats built on expensive sites, as well as the special subsidies for agricultural dwellings, houses built in areas liable to subsidence, etc.

(5) The Minister of Housing and Local Government was given a limited discretionary power to increase basic subsidies in exceptional cases where necessary housing accommodation could not otherwise be provided without imposing an unreasonable burden on the rates or charging unreasonably high rents.

(6) The Minister was also empowered, after consulting local authorities and with parliamentary approval, to make Orders abolishing or reducing subsidies on houses, the construction of which was approved after the date of the Order - thus implementing the Government's intention that the reduction of the general subsidy to £10 should only be a transitional measure pending its complete abolition.

(7) Local authorities were relieved of their existing statutory obligations to contribute to the cost of housing out of the rates, but were permitted to make contributions to their housing revenue accounts from their general rates fund as they thought fit.

(8) The Minister of Housing and Local Government was authorized to recover from local authorities of congested cities one-half of any payment made by him to the authorities of New Towns, or of "expanded towns," toward the cost of housing "overspill" populations.

The Bill had been given a second reading in the House of Commons on Nov. 17, 1955, and a third reading on Feb. 15, 1956 (by 294 votes to 240), and had received its second reading in the House of Lords on March 6, 1956.

The Slum Clearance (Compensation) Act.

The Slum Clearance (Compensation) Bill, intended to relieve acute cases of financial hardship arising in the course of slum clearance, was enacted on Aug. 2, 1956, having received its second reading in the House of Commons on March 28. The Act:

(1) Provided for assistance to owner-occupiers who, as a result of the war and the housing shortage, had been forced to buy worn-out houses to live in themselves. Under the Act, anyone living on Dec. 13, 1956 in a house which he had bought between Sept. 1, 1939 and Dec. 13, 1955, and which, within 10 years from the latter date, was purchased compulsorily as unfit for habitation, would be compensated at the same rate as if the house had not been declared unfit.

(2) Enabled a person carrying on a shop or business in a house subsequently declared unfit to be compensated for the loss of his business at the same rate as if the house had not been declared unfit.

(3) Permitted the Minister of Housing to adjust from time to time the rates of payment made under the Housing Act to owners or occupiers of houses which, though declared unfit, had been well maintained.

In the Report stage (May 29, 1956) a Government amendment was agreed to (by 208 votes to 173) enabling the Courts to modify or discharge the liabilities of an occupier of a house who had agreed to buy it on a tenant-purchase agreement before it was condemned as unfit.

The Government's intention to introduce the Slum Clearance Bill had been announced by Mr. Sandys on Dec. 13, 1955. A statement was issued by the Ministry of Housing instancing the following as the kind of hardships which the Bill was intended to relieve:

A.—An elderly owner-occupier paid £500 for a house in 1949, and raised a mortgage of £300. At present [i.e. before the Bill was introduced] compensation would amount to about £50 - £14 for the value of the site and £36 for good maintenance.

B.—A working man spent his entire savings of £300 in buying a house in 1953. Since the house was not well maintained he would at present receive site value only—about £10.

C.—Two years earlier a widow paid £800 for a tobacco and newspaper shop. At present she could hope to receive no more than about £100.

D.—An ex-service man spent his gratuity and raised a private loan to buy an electrical and radio shop in 1950—£250 for the business and £250 for a 14-year lease. At present he could expect to receive about £50.

Mr. Sandys announced on Nov. 1, 1956, that the "general needs" housing subsidy of £10 a year would be withdrawn with immediate effect, except for one-bedroom dwellings for old people. The existing subsidies for slum clearance, overspill, expensive sites, and other special circumstances would remain unchanged as laid down in the Housing Subsidies Act. An Order abolishing the £10 subsidy was approved by the House of Commons on Dec. 13 by 275 votes to 241.—(Ministry of Housing and Local Government - Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 1955 Housing Figures, 14714 B; Subsidies, 14500 A, pp. 14502, 14504-5.)**

A. INDONESIA. — Military Revolts in Sumatra, East Indonesia, and Borneo. - Demands for Regional Autonomy. - Masjumi Party leaves Central Government. - President Sukarno's Proposals for All-Party Government. - Resignation of Sastroamidjojo Cabinet. - President Sukarno proclaims Martial Law.

A serious political crisis developed in Indonesia during the second half of December, following military revolts in Central and North Sumatra. Although the Government regained control in North Sumatra within a few days, a military administration was set up in Central Sumatra, while in South Sumatra the local administration decided to withhold all revenues from the Central Government. As a result of these events, the *Masjumi* (Moslem) and two smaller parties withdrew from the Government. To meet the crisis President Sukarno put forward proposals on Feb. 21 for the formation of an all-party Government and a National Council with advisory powers, but this plan, although approved by the Nationalists and Communists, was rejected by the Socialists and the religious parties. Early in March further regional revolts under military leadership occurred in East Indonesia and Borneo, leaving Java and the surrounding area the only part of the country under the full control of the Central Government. Following the resignation of Dr. Sastroamidjojo's Cabinet on March 14, President Sukarno proclaimed a "state of war and siege" (i.e. martial law) throughout Indonesia, and at the same time gave a warning that the military revolts in outlying areas, if allowed to continue unchecked, might lead to the "disintegration" of the State. These and other recent developments are described below under cross-headings.

Military Conspiracy in Java.

The Prime Minister, Dr. Sastroamidjojo, gave details in Parliament on Dec. 12, 1956, of the military conspiracy in Java (see 15272 A), and revealed that an attempt to carry out a military *coup* had taken place on Nov. 16.

Dr. Sastroamidjojo said that the conspiracy had originated at a meeting of officers held on Aug. 10 at the home of Colonel Lubis (the Deputy Chief of Staff), its aims being the arrest of the members of the Government and other political leaders, the dissolution of Parliament and the political parties, and the setting-up of a military junta on the Egyptian model. On Nov. 16, the date chosen for the *coup*, a unit stationed at Bandung had moved towards Jakarta, but the plan had collapsed owing to lack of support among the non-commissioned officers.

Military police carried out house-to-house searches in Jakarta during the second half of January and made a number of arrests of suspected persons.

The Commander of the Jakarta garrison announced on Feb. 1 that 30 people, including four soldiers, had been detained on charges of complicity in Colonel Lubis's plot, relations with the *Dar-ul-Islam* insurgents and "foreign subversive elements," or violation of economic regulations, and that efforts to apprehend Colonel Lubis [who had been in hiding since November] would continue. He claimed that the raids had forestalled a *Dar-ul-Islam* plan to attack Jakarta and other towns in Western Java, details of which had become known to the military authorities.

Military Revolts in Sumatra.

Central Sumatra.

Colonel Ahmad Hussein, commander of the 4th Regiment, deposed the Governor of Central Sumatra on Dec. 20, the civil administration being taken over by the "Banteng Council."

This body, of which Colonel Hussein was chairman, had been formed earlier in the month at a reunion of the Banteng (buffalo) Division which had fought in the war of independence in Central Sumatra. It had sent a delegation to Jakarta to demand that corruption should be stamped out and that a greater share of the revenues derived from Sumatran oil should be allocated to the island for local development purposes. Broadcasts from Padang (the capital of North Sumatra), stated that the Council would control the provincial administration and revenues until its demands were granted, but emphasized that it had no intention of breaking away from the Central Government.

Although the *coup* met with no immediate resistance, a "People's Congress" in the Jambi residency (an area on the east coast) dissociated itself from Colonel Hussein's administration on Jan. 6, proclaimed Jambi a separate province, and announced that it would maintain direct contact with the Central Government. It was subsequently reported in February that the Banteng Council was faced with Communist opposition, and that local Communist and trade union leaders had been arrested.

North Sumatra.

The Commander of the North and Central Sumatra military district, Colonel Simbolon, announced on Dec. 21 that he no longer recognized the authority of Dr. Sastroamidjojo's Government, and would take over the administration of North Sumatra until an "honest and capable" Government was formed. The Indonesian Cabinet dismissed Colonel Simbolon on Dec. 22 and transferred his command to his Chief of Staff, Lieut.-Colonel Ginting. A state of siege was proclaimed in the Tapanuli and East Sumatra areas of the province of North Sumatra, and on Dec. 25 President Sukarno issued an Order of the Day denouncing Colonel Simbolon's action as "a flagrant violation of the oath of the armed forces."

In the early hours of Dec. 27 Lieut.-Colonel Ginting seized control of Medan (the capital of North Sumatra), without opposition and announced that relations with the Central Government would be resumed. Colonel Simbolon fled with some 200 men into the jungle district of Tapanuli on the west coast, and the Commanders of the 1st and 3rd Regiments (stationed in the Atjeh and Tapanuli districts respectively) subsequently declared that they would accept orders only from President Sukarno and General Nasution, the Chief of Staff. Dr. Sastroamidjojo told Parliament on Jan. 21 that Colonel Ginting had relieved several officers of their commands and had disbanded those units found to be disloyal.

South Sumatra.

The Governor of South Sumatra, Mr. Winarno Danuatmodjo, announced on Dec. 27 that the "Provincial Security Co-ordinating Board," consisting of representatives of the provincial administration, the local military command, and the police, had decided to withold from the Central Government all revenues derived from taxes and Customs duties. The money would be used to finance urgent reconstruction projects, such as the building of Army and police barracks, roads, and bridges, in order to end popular discontent at the slow pace at which reconstruction was being carried out. Official spokesmen in Palembang (the provincial capital) said that these measures were being taken to "avoid anarchy and excesses which might be committed by circles dissatisfied with the present situation."

The action taken by the "Provincial Security Co-ordinating Board" represented a serious blow to the Government's finances, as South Sumatra (where the Royal Dutch Shell and Standard Vacuum Oil companies operate Indonesia's two refineries), provides 40 per cent of the country's foreign currency revenue.

Although a state of siege was proclaimed in South Sumatra by President Sukarno on Dec. 31, the Government subsequently maintained a conciliatory attitude in its relations with the ruling groups in Central and South Sumatra, with which it entered into negotiations. The Finance Minister, Dr. Wibisono, announced on Jan. 7 that 20,000,000 rupiahs (about £625,000) had been sent to the Banteng Council, and that South Sumatra had been provisionally authorized to retain revenues derived from taxes and Customs, "pending a solution and provided that officials take good care of the funds."

On March 9 the Military Commander of South Sumatra, Lieut.-Colonel Barlian, deposed Mr. Danuatmodjo and took over administrative power in the province, following the setting-up of a committee representing 21 parties and local organizations.

Broadcasting from Palembang Radio on March 10, Colonel Barlian declared that he wanted "to save the State from disintegration," and claimed that his action was necessary because the smooth running of the administration had been hampered by "critical" political disputes. Colonel Barlian said that they were "fed up" with the Javanese Governor [Mr. Danuatmodjo], who had been installed by the Central Government against local wishes.

A statement was issued by the above-mentioned committee noting the process of disintegration in the country and the "deplorable conditions prevailing in the outer regions," and asserting that the Central Government had failed to attain the national aims expressed in the independence proclamation of 1945. The statement demanded that co-operation between President Sukarno and the former Vice-President, Dr. Hatta, should be restored, and called for the formation of a Senate as well as a Parliament "representative of the regions."

Discussions with Sumatran Military Leaders.

Prior to the latest events in South Sumatra, General Nasution had left Jakarta on Jan. 24 for a tour of the island, during which he had discussions with each district and regimental commander in turn, and also met Colonel Simbolon at Padang. He ended his tour at Palembang, where he presided from Jan. 29 to Feb. 1 over a conference of military commanders, including Colonel Hussein, Colonel Simbolon took no official part in the conference, but by General Nasution's orders he stayed in Palembang while it was in progress in order that he might take part in informal talks if needed. The conference decided that Sumatra, which had previously been divided into two military districts, should in future be divided into four—Achin (North Sumatra), East Sumatra and Tapanuli, Central Sumatra, and South Sumatra. Under this arrangement, Colonel Hussein—who had nominally been under the command of Lieut.-Colonel Ginting—became commander of a separate military district. On returning to Jakarta, General Nasution said that the conference had "solved the military problem in Sumatra but not the political one."

Military Revolt in East Indonesia.

Lieut.-Colonel Sumual, the Commander of the East Indonesia military district (which includes Celebes, the Moluccas, and the Lesser Sunda Islands), issued a declaration on March 2 proclaiming a state of siege in the territory, and announcing that a Military Council had temporarily taken over the administration in East Indonesia.

The declaration, which was signed by 50 leaders representing all political groups in the territory, stated that there was no intention of breaking away from the Republic, but that the East Indonesian Army division had deemed it necessary to take drastic steps "to save the country from a great catastrophe and complete destruction caused by the antagonisms and dissensions among us." The new administration demanded that only 30 per cent of East Indonesia's revenues should be available to the Central Government, instead of 96 per cent as in the past, and the remaining 70 per cent used for the benefit of the territory.

A proclamation was issued on March 4 by Lieut.-Colonel Sumual and his supporters announcing their support for President Sukarno's plan [see below] but proposing that the President and Dr. Hatta should together lead the proposed all-party Government and the National Council. It also demanded full autonomy for the East Indonesian provinces, and denounced the centralized system of government as responsible for corruption, bureaucracy and stagnation in the field of construction.

Military Governors for the provinces under his control were appointed by Colonel Sumual on March 6. On the same day two Army representatives left Jakarta for Macassar to convey to Colonel Sumual certain proposals from General Nasution.

Military Revolt in Borneo.

The revolt subsequently spread to Indonesian Borneo (Kalimantan), where a Revolutionary Council was set up on March 11 headed by Lieut.-Colonel Hasan Basri, the acting Military Commander of Borneo. Colonel Basri announced that the Council would include representatives of the provincial administration and the police.

Indonesian Cabinet Crisis.

The position of Dr. Sastroamidjojo's Government was greatly weakened both by the developments in Sumatra and by allegations of corruption brought against certain of its members. The Cabinet announced on Dec. 22 that it had ordered the Attorney-General to examine charges brought against the Foreign Minister, Mr. Abdulgani, who had agreed to become "non-active." These charges, which were later referred to the Supreme Court, concerned alleged violations of the foreign exchange regulations, and were not connected with the charge of corruption in the running of the State Printing Office, of which Mr. Abdulgani had previously been cleared by a Cabinet inquiry (see 15272 A).

The Minister for Veterans' Affairs, Dr. Ibrahim, resigned on Dec. 26, his duties being taken over by the Second Deputy Premier, Mr. Chalid. Dr. Ibrahim was the only representative in the Government of the Movement for the Defence of Indonesian Independence (IPKI), which issued a statement on the same day declaring that the Government had failed to meet the crisis and that too many Ministers were using their office for personal gain. The IPKI, of which General Nasution was formerly a leading member, is generally regarded as the political mouthpiece of the Army.

The Moslem *Masjumi*, the second strongest party, withdrew its five Ministers on Jan. 9 after its chairman (Mr. Natsir) had failed to secure President Sukarno's agreement to the formation of a new Cabinet led by the former Vice-President, Dr. Hatta. The retiring Ministers were Dr. Rum (First Deputy Premier), Dr. Muljatno (Justice), Dr. Wibisono (Finance), Mr. Tedjasukmana (Communications), and Dr. Noor (Public Works and Power). In the resulting Cabinet reorganization Dr. Rum's duties were divided between Dr. Sastroamidjojo and Mr. Chalid, and the vacant portfolios were provisionally assigned to other Ministers—Dr. Djuanda (Planning) becoming responsible for Finance, Dr. Sunarjo (Home Affairs) for Justice, Mr. Suhardi (Agrarian Affairs) for Public Works, and Mr. de Rosario (Vice-Minister of Communications) for Communications.

The *Masjumi* Executive stated that it had withdrawn its Ministers because it was convinced that the Government's policy was not in the popular interest, and because the party's suggestions had failed to obtain a response. Developments in the Army and elsewhere were proof of the decline in the Government's authority, and the party was convinced that the only solution was the restoration of co-operation between President Sukarno and Dr. Hatta and the formation of a new Government commanding the nation's confidence. The statement emphasized that the *Masjumi's* withdrawal from the Cabinet did not mean the termination of its co-operation with the Government parties, which it hoped would be continued in a different situation and atmosphere.

Mr. Abdulwahid (Minister for General Affairs), who represented the Islamic Party (*Perti*) in the Government, resigned on Jan. 15. The five remaining Government parties the Nationalists, *Nahdlatul-'Ulama*, United Moslem Party (PSII), Christian Party (Parkindo), and Catholic Party submitted proposals to President Sukarno on Feb. 15 for a large-scale reshuffle on which they had agreed; the President, however, expressed the opinion that no Cabinet reshuffle would solve the crisis, and handed them a copy of his plan for an all-party Government [see below] to study. The Cabinet subsequently announced on Feb. 28 that it had decided not to make any change in its composition.

President Sukarno's Proposals for All-Party Government.

President Sukarno gave details of his plan for an all-party government in a broadcast on Feb. 21.

Indonesia, he said, had hitherto followed the Western pattern of parliamentary democracy, but this did not suit the national character and was not "a true democracy in accordance with the ideals of the Indonesian people." During the past 11 years Indonesia had had unstable Governments, all of which had fallen because they had had to solve mounting difficulties and at the same time to fight the Opposition. After saying that the time had come to establish a governmental system "now in every respect," Dr. Sukarno explained that his plan provided for a new Cabinet and the formation of a National Council. The Cabinet would include members of all parties represented in Parliament which had obtained an electoral quotient to be determined later, and which would be based on the *gotong royong* system. [The phrase *gotong royong* is used to describe co-operative effort by peasants in harvesting crops and dealing with natural disasters.] The National Council, of which he would be chairman, would consist of representatives of all groups and strata in the community: workers, peasants, intellectuals, businessmen, religious groups, youth, women, the "1945 revolutionary generation," the armed forces, the police, the Attorney-General, and a number of senior Ministers. Its function would be to give advice to the Cabinet, whether or not it had asked for it, while Parliament would retain its normal functions. Thus the Cabinet would represent Parliament and the National Council would represent the community as a whole.

Defending his proposal to include the Communist Party in the Cabinet, President Sukarno asked: "Can we ignore a party that won 6,000,000 votes in the general elections?" He denied that he was attempting "to bring the Cabinet to the left," as had been suggested, and declared that his only object was the stability of the State. He concluded by inviting the party leaders to consider his plan and to give him their views.

President Sukarno had previously discussed the political crisis in general terms at a press conference on Jan. 17 (the first he had held since 1950), at which he criticized the working of parliamentary democracy in Indonesia and advocated a greater degree of local autonomy.

"Democracy in Indonesia, if left to its present course," he said, "will not achieve the results we hope for, either as a political system or in its economic achievements. To be successful, Western parliamentary democracy requires a certain amount of literacy and a certain degree of prosperity, and Indonesia does not yet possess these requirements. On the other hand, our centuries-old inheritance of democracy as practised in the villages known as *musjawarah*, which means 'discussion,' and *gotong royong*, which means 'collective and mutual help' will be a big asset for the basis of our democracy, at least for this transitional period. To save democracy I must find a way out of the experiment we have been practising in Indonesia for 11 years. In no way will it be a dictatorship. Indonesians cherish their individual liberty more than anyone else. But on the other hand, to allow unfettered opposition to get an absolute majority will only degenerate into a mere struggle for the elimination of political opponents."

A presidential Cabinet led by himself, Dr. Sukarno continued, would under present conditions "only temporarily solve the problem without in any way paving the way for real Indonesian democracy." His recent appeal to political leaders to "bury all parties" (see 15246 A) did not mean that he wanted to "bury democracy" but was intended as "a firm warning to party leaders that they cannot go on in this way, ignoring the needs and desires, hopes and disappointments, of the teeming millions just because there is disagreement among the leaders at headquarters."

In reply to a question on the crisis in Sumatra, the President said that although he did not approve of "military people playing with their guns in political affairs," he knew that there was "every reason to be dissatisfied" and that one reason for discontent was "the progress towards emancipation of the people living in Java compared with those living in other islands." He added: "We have inherited from the Dutch a highly centralized administration. It requires time and complex preparations for the process of decentralization and local autonomy. There is certainly no escape for Indonesia otherwise than by a system of local autonomy for the various regions. The strength of Indonesia must be built upon a prosperous and healthy life in all the islands."

In conclusion, the President denied that there was any danger of the Republic disintegrating, and expressed confidence that "if we can only exploit the indigenous democratic heritage in our political life, then hardships and disappointments on the road toward progress and prosperity will be accepted by the Indonesian people."

When President Sukarno received the party leaders on Feb. 28 to hear their views on his plan, it became evident that political opinion was sharply divided. Those supporting the President's plan included the Nationalists, the Communists, the IPKI, the Islamic Party, and several smaller nationalist and left-wing parties; on the other hand the plan was opposed by the *Masjumi*, the *Nahdlatul-'Ulama*, and the Christian, Catholic, and Socialist parties, all of which objected to entering a Cabinet in which the Communists were represented.

Resignation of Sastroamidjojo Government. - Martial Law proclaimed by President Sukarno.

The Government of Dr. Sastroamidjojo resigned on March 14 and later the same day President Sukarno proclaimed a "state of war and siege" (i.e. martial law) throughout Indonesia, vesting all power in the Chiefs of Staff of the Army, Navy, and Air Force. A statement by the Joint Chiefs of Staff stressed that the declaration of martial law had no connexion with President Sukarno's proposal to set up a National Council, and that martial law would be lifted as soon as the situation had returned to normal.—(Indonesian Embassy Press Office, London - Times - Daily Telegraph - Manchester Guardian - New York Times) **(Prev. rep. Cabinet, 14787 D; President Sukarno, 15246 A; Dr. Hatta, 15312 B; Army, 15272 A.)**

A. WALES. — The "D. J. James Pantyfedwen Trust."

It was announced on March 1 (St. David's Day) that a £500,000 charitable trust fund for the encouragement of religion and education in Wales—the first of its kind—had been established by Mr. David John James, a Welshman with large cinema interests in London, including the *Studio One* and *Studio Two* cinemas in Oxford-street, W. The trust, of which Viscount Tenby (formerly Major-Gwilym Lloyd-George, Home Secretary under Sir Anthony Eden) agreed to become first chairman, will be known as the D. J. James Pantyfedwen Trust—its second name commemorating the Cardiganshire farm where Mr. James spent his youth.

The Trust is intended for (1) the encouragement of religion through grants for the training of intended ministers of any denomination, for the increasing of stipends and relief of ministers, their widows and dependants, and for the establishment of lectureships on religion; (2) the promotion of poetry, prose, and other literary works of a religious or educational nature, and (3) the advancement of education by grants and scholarships at schools or universities in all subjects, including the arts, medicine, and agriculture.

The income from the fund (expected to be about £25,000 a year) will be applied for these purposes for the benefit of male persons, resident in Wales, who were either born in Wales or one or both of whose parents were born in Wales, or who had been students for at least seven years at any educational institution in Wales.

The trustees (in addition to Lord Tenby) include the Moderator of the General Assembly of the Presbyterian Church of Wales (the Rev. C. Lloyd Williams), the Archbishop of Wales (the Most Rev. John Morgan), the Vice-Chancellor of the University of Wales, the librarian of the National Library of Wales, and the president of the Welsh League of Youth (Sir Ifan ab Owen Edwards).

Mr. James, who had previously given about £250,000 for charitable causes, began training for the ministry in Wales when 16, but moved to London to help run a family milk business. In 1918 he opened the first of 10 cinemas in North London, which he sold to Mr. J. Arthur Rank in 1936. (Times - Daily Telegraph)

B. UNITED STATES. — Population Increase.

The U.S. Census Bureau announced on Feb. 15 that "the 170th millionth inhabitant of the United States" had been registered on the electric chart kept by the Bureau in the Department of Commerce, and recording changes in the U.S. population on a minute-to-minute basis. It was explained that these changes were recorded by different coloured lights, viz.—"a blue light flashes every eight seconds to record a birth; a purple one every 21 seconds to show a death; a green one every two minutes records the arrival of an immigrant; a red light every 24 minutes means the departure of an emigrant; and a white light every 12 seconds records a net increase of one in America's population." (New York Times) **(Prev. rep. 15284 E.)**

C. ARGENTINA. — Sentences on Army Officers.

The Army Ministry in Buenos Aires announced on Feb. 16 that Generals Bengoa and Uranga, both of whom had been arrested in November last, would be held in "rigorous confinement for conspiracy to rebellion." The announcement added that the other members of the Army High Command detained in November had been sentenced to periods of arrest varying from 60 to 180 days.—(Times) **(Prev. rep. 15377 A.)**

D. SOUTHERN RHODESIA. — Agreement on Denationalization and Development of Rhodesian Iron and Steel Industry.

The agreement denationalizing Southern Rhodesia's steel industry by the sale of the Rhodesian Iron and Steel Commission to private enterprise was signed on Feb. 28. The contracting parties were, in addition to the Southern Rhodesian Government: the Lancashire Steel Corporation, Stewart & Lloyds Ltd, the Messina (Transvaal) Development Company, the Anglo-American Corporation of South Africa, the British South Africa Company Ltd., the Rhodesian Selection Trust Ltd., and Tanganyika Concessions Ltd. Details were as follows:

(1) The agreement, which largely followed the details announced by the Southern Rhodesian Government on Oct. 17, 1956 [see 15297 B], provided for the setting-up of a new company, the Rhodesian Iron and Steel Co. (Pvt.) Ltd., which would shortly become a public company and would initially have an ordinary share capital of £3,100,000. Of this amount, £2,250,000 would be subscribed for in cash as follows: Lancashire Steel—£500,000; Stewarts & Lloyds—£500,000; Messina (Transvaal)—£500,000, Anglo-American—£250,000; British South Africa Co.—£250,000; Rhodesian Selection Trust—£250,000. In addition, there would be issued £2,750,000 redeemable first debenture Stock carrying a subscription right of 20 per cent in equity shares This issue would be called up in approximately two years' time, and had been underwritten as follows. Anglo-American—£950,000; British South Africa Co.—£950,000; Tanganyika Concessions—£850,000.

(2) The purchase price for the existing assets of the Rhodesian Iron and Steel Commission, based on their book value as at Dec. 31, was fixed at just over £4,000,000. It would be payable to the Southern Rhodesian Government by the issue of £500,000 ordinary shares of the new company at par, and of just over £3,500,000 of 4 per cent redeemable second debenture Stock. The Southern Rhodesian Government would in addition receive a royalty of 6d. a ton on all iron-ore and limestone consumed. Excluded from the purchase were the Redcliff housing estate, mining claims, and certain mining equipment.

(3) The new company would also buy from Messina (Transvaal) the iron-ore deposits contained in a 50-square-mile area surrounding Bukwe, and five blocks of limestone in the vicinity, the purchase price being £600,000. Of this sum, £350,000 would be satisfied by the issue to Messina (Transvaal) of the same amount in ordinary shares of the new company, and £250,000 by equal cash payments during the sixth and eighth year after the coming into effect of the arrangements. In addition, Messina (Transvaal) would receive a royalty of 6d. a ton on all iron-ore and limestone consumed The proved and probable iron-ore reserves in the Bukwe area were given as 134,500,000 tons, averaging 60 per cent iron content.

(4) The purchasers undertook to carry out an expansion programme drawn up by the Lancashire Steel Company and envisaging the completion in four to five years of a unit which would include coke-ovens capable of providing some 150,000 tons of steel a year (compared with the present production of 50,000 tons), and 500-600 tons of pig-iron a week. Lancashire Steel and Stewarts & Lloyds would be responsible to the new company for supervising the execution of this programme. To assist in financing it, the Southern Rhodesian Government agreed to reinvest the interest due to it on the debenture Stock for five years; provision was also made that, generally speaking, no dividends should be declared for five years and that all profits during that period would be used to finance the development programme.

The chairman of the new company will be Sir John Duncanson (Lancashire Steel), while Mr. S. M. Pechey, chairman of RISCOM, will become deputy chairman, representing the Southern Rhodesian Government.

The agreement is subject to ratification by the Southern Rhodesian Parliament and by the Capital Issues Committee in London.—(Federal Information Department, Salisbury) **(Prev. rep. 15279 B.)**

E. RELIGIOUS LIFE. — Church of England. - New Bishops of Ely and Newcastle.

It was announced on Nov. 10, 1956, that the Queen had approved the appointment of Dr. Noel Baring Hudson (62), Bishop of Newcastle since 1941, as Bishop of Ely in succession to the late Dr. H. E. Wynn (67), who had died on Aug. 12. Prior to becoming Bishop of Newcastle, Dr. Hudson had been secretary of the Society for the Propagation of the Gospel (1938-41) and Bishop of Labuan and Sarawak (1931-38). He served as a lieutenant-colonel in the First World War, winning the D.S.O. and bar and the M.C. and bar and being twice mentioned in despatches.

On Feb. 28 it was announced that the Very Rev. Hugh Edward Ashdown (52), Provost of Southwark Cathedral, Rector of St. Saviour's with St. Peter's, Southwark, and chaplain to H.M. the Queen, had been appointed Bishop of Newcastle consequent upon Dr. Hudson's translation to the see of Ely.—(Church Times) **(Prev. rep. 15022 B.)**

A. POLAND. — General Elections. - Victory for M. Gomulka and National Unity Front. - Election of New Council of State. - New Government formed by M. Cyrankiewicz. - Changes in Agricultural Policy.

General elections for a new *Seym* (Parliament) of 459 members, held on Jan. 20, resulted in an overwhelming victory for the National Unity Front led by M. Gomulka and comprising the Polish United Workers' (Communist) party, the United Peasant party, the Democratic party, and a number of organizations such as professional and industrial unions, co-operatives, etc. Out of an electorate of 17,944,081 voters, 16,892,213 (94.1 per cent) went to the polls. The National Unity Front obtained 16,563,314 votes (98.4 per cent of the total), while 58,897 votes were invalid.

Of the 458 deputies elected from National Unity Front lists, 237 (51.7 per cent) were P.U.W.P. members, 119 (26 per cent) belonged to the United Peasant party, and 39 (8.3 per cent) to the Democratic party. The remaining 63 deputies (who included 12 Roman Catholic leaders), though sponsored by the National Unity Front, are not affiliated to any political party. One result is still outstanding (see below).

The Electoral System.

For the first time since the institution of the Communist regime in Poland, and also for the first time in any Communist-controlled country, the elections gave voters a certain freedom of choice and no pressure was exerted on the electorate to vote for the official candidates. All men and women over 18 were entitled to vote.

The elections were held under the new electoral law of Oct. 24, 1956 (see 15242 A), under which the country was divided into 115 constituencies, each electing a number of deputies proportionate to the number of its inhabitants. For each constituency there was a single list of candidates sponsored by the National Unity Front, the number of candidates exceeding the number of deputies to be elected up to two-thirds. Voters had three choices: (i) they could either leave the ballot-paper intact, thereby casting their vote for the leading names on it to the number required to fill the seats in their constituency; or (ii) they could cross out the names of those candidates whom they did not wish to be elected; or (iii) they could spoil their ballot papers. To secure election a candidate needed an absolute majority of the votes cast in his constituency.

While the electoral law permitted the admission of non-Communist candidates within the National Unity Front, no Opposition party as such was tolerated, nor was there any alternative to the single list sponsored by the National Unity Front.

Preparation of National Front Lists. - Former Socialist Premier removed from List of Candidates.

Following the announcement of the elections, the National Unity Front set up on Nov. 26, 1956, a central co-ordinating commission representing its constituent political parties and organizations, with the task of preparing lists of candidates. This body, in its turn, set up local commissions which selected the candidates for each constituency and decided the order of their names on the ballot papers. The latter bodies had to sift a total of 60,000 applications from prospective candidates. The lists were finally submitted to the area electoral commissioners by Dec. 12. Of the 723 candidates, about 50 per cent belonged to the P.U.W.P., 25 per cent to the United Peasant Party, and 10 per cent to the Democratic Party. The remainder were either non-party candidates or represented "progressive" Catholic groupings, and included many distinguished professional men and women who supported M. Gomulka without, however, being members of the P.U.W.P. Only 83 candidates had been members of the previous *Seym*.

On Jan. 17 it was announced that the name of M. Osubka-Morawski, the former Socialist Prime Minister, had been removed from the list of candidates in the Lublin constituency, on which he had occupied the first place.

Only a few weeks earlier (Dec. 8) M. Osubka-Morawski had been admitted to the P.U.W.P. after his enforced retirement from political life since 1947. The action against him was taken at the request of the Central Committee of the P.U.W.P., on the ground that M. Osubka-Morawski's election speeches had shown him to be "in fundamental contradiction" with the programme of the National Unity Front [he was reported to have taken an openly anti-Soviet line in his campaigning.] The exclusion of M. Osubka-Morawski and of another former prominent politician, M. Jerzy Miechov, was based on a decision, taken on Jan. 10 by the Consultative Commission of Political Parties, which had authorized its subordinate bodies throughout the country to delete from the N.U.F. lists those candidates who "failed to observe the principles of the N.U.F. programme," conducted their election campaign in an "irresponsible" manner, or were using "disloyal practices" toward candidates of "allied" parties [i.e. the Communists] and making "demagogic promises."

The Election Campaign.

The electoral programme issued by the National Unity Front referred to the change in Poland's international status, the consolidation of her sovereignty, and the basing of Polish-Soviet relations on the principles of equality, respect for territorial integrity, independence, and non-interference in internal affairs.

The Front's policy in internal affairs [the statement declared] would be based on the sovereignty of the *Seym*, "openness" of political life, freedom of criticism and discussion "within the limits defined by the fundamental interests of the People's State," democratization of all spheres of life, development of workers' and peasants' self-government, the responsibility of all representatives of the people, legality, equal rights and duties for all citizens, and freedom of conscience.

On economic policy the appeal stressed *inter alia* the need for the "harmonious development" of all branches of the economy on the basis of the development of heavy industry and of co-operative and private small-scale production, and of improving agricultural output. In the latter connexion the programme envisaged larger investments in the rural areas, full recognition of the rights of peasant ownership, the restoration of the right to sell or purchase land, the free division of farms, and financial support both to individual farmers and to the co-operative farms.

In cultural matters the programme called for free development of research in all branches of scientific activity, freedom for the creative efforts of writers and artists, and the development of education generally.

In the industrial field the appeal said that it was necessary "to interest the personnel of Socialist enterprises in the development of production by giving them a suitable share in the profits of these enterprises."

As regards foreign policy, the statement emphasized the importance of consolidating the Polish-Soviet alliance and declared: "We will defend our independence and the integrity of our frontiers against the menace of German militarism. We will defend the inviolability of the frontiers on the Oder and Neisse."

The statement also declared that the nation would "repulse all those who would like a return to capitalism, to the times of oppression and exploitation, and to the system of humiliation of the working masses."

The principal speech of the electoral campaign was made on Jan. 14 by M. Gomulka, who gave a warning against the attempts of "irresponsible elements" to bring about a general boycott of the elections as the most effective way of expressing opposition - a possibility which was "causing increasing concern to the Government now that the Polish people no longer felt impelled to vote through fear."

M. Gomulka said that in certain constituencies these "irresponsible elements" had come to the fore at election meetings with "demagogic and reactionary methods." They had been openly calling for a boycott, and rumours had been spread that coal and food would be withheld in areas where voting attendance was small. This was completely untrue, and the irresponsible elements concerned were taking advantage of the "democratic trend of freedom of speech and action to spread anarchy."

Besides the call for a boycott, he said, some people had been advocating that the names of all Communist candidates on the authorized list should be struck out. Some of these candidates had been personally attacked and a "whispering campaign" had also been launched, together with "anonymous letters, threats, and slanders."

M. Gomulka said that the elections were not intended to keep the Government of the country "in our hands," but the party would "on no account hand over the government of the country to reactionary forces." If the Government fell into reactionary hands, it would be a catastrophe for Poland and the result would be "much worse than the worst possible popular government."

Recalling that the elections would be held only three months after the "October events" [see 15161 A], M. Gomulka continued: "After such a shock a different Government could have said: 'The elections should be postponed: we must consolidate our positions first and then go to the country.' But our party, under a new leadership, together with its allied parties . . . took the decision that the elections should be held on the date provided for in the Constitution. We can and must appeal to the patriotism, maturity, and responsibility of the nation, despite all the difficulties of the present period. Mass participation in the elections, a great number of votes cast for the National Unity Front, will prove to the world that the people of Poland are unanimous and united, that they support the policy of sovereignty, socialism, and democracy . . ."

Discussing the Government's achievements during the preceding three months—"a harvest already constituting a great accomplishment, and providing a base for further positive transformations"—M. Gomulka declared:

"Above all, we have strengthened our sovereignty. We ourselves are the sole masters of our destiny. We ourselves have chosen the methods of building Socialism in our country. We have regulated our relations with the Soviet Union on the basis of equality and non-interference in internal affairs . . . By liquidating the abnormal factors harmful to friendship in the relations between our countries, the Moscow talks [of Nov. 15-18, 1956—see 15242 A] have created a firm foundation for the development and strengthening of fraternal relations between the peoples of our two countries.

"That the Soviet Union has a fraternal attitude to Poland stemming from the spirit of this statement is borne out by the fact that the U.S.S.R. has made good the losses which Poland sustained in connexion with disadvantageous economic agreements. It is borne out by the considerable economic assistance offered us—among other things, by the exceptionally valuable grain deliveries on credit terms—and by the settlement of the problem of repatriation of Poles from the U.S.S.R. Many thousands of our fellow-countrymen have already returned to Poland in recent weeks.

"We have concluded an agreement on the legal status of the Soviet troops temporarily stationed in Poland, and this, too, has normalized relations in this field. Certain Soviet military units are stationed temporarily on Polish territory, not only with our consent but in accordance with the requirements of the security of our frontiers. Our desire and consent to the temporary stationing of these troops stem from these requirements . . . It is not the Soviet Union that compels us to express our consent to the presence of these troops on our territory. We are compelled to do so by the policy of imperialist circles which are striving to alter our Western frontiers and to undermine peace in the world . . . That is why we count the temporary stationing of Soviet troops in Poland not among the negative but among the positive aspects of our policy.

"In our internal relations we are consistently implementing the principle of Socialist legality outlined by the Eighth Plenum [i.e. the three-day meeting of the Central Committee of the P.U.W.P. from Oct. 19-21 - see 15161 A]. We have rehabilitated many people who were unjustly convicted. Many wrongs have been righted. Proceedings have been instituted against persons who committed grave offences against legality. We have exonerated from wrongful charges not only Communists, and not only people loyal to the State, but also members of various reactionary underground organizations hostile to People's Poland, who were groundlessly charged with offences. This, however, defines the limits of their rehabilitation. It must be said clearly and unmistakably that no-one has the intention of rehabilitating the reactionary policy of the underground organizations to which these people belonged."

After speaking of the wage increases which the Government had granted in recent months "despite the difficult financial situation of the State," M. Gomulka continued:

"The relations between the State and the Church have been regulated. We have created conditions for the free development of creative and progressive thought, and have abolished the atmosphere in which hypocrisy flourished. We have told the nation the whole truth about the past, and we are telling the nation the whole truth about the present situation.

"We are just at the beginning of the road . . . Many of the things which we have inaugurated must be tested and critically analysed. On many matters decisons have still to be made. That is why we are so concerned that the *Seym* which we are now electing should be composed of enlightened people; that it should be capable of conducting efficient and creative work; that it should be able fully to execute its constitutional functions and its difficult and responsible duties . . .

"We do not and shall not make any easy promises, but we shall consistently and persoveringly implement what we announce and whatever is feasible. Our words are at one with our deeds. If sometimes they sound harsh, this is due to the fact that our life is still harsh and arduous. Not even the best Government in the world can do everything by itself. All material values have to be created by the work of the nation. We shall have as much as we produce. We shall have all the more if we produce more, by the labour of our hands and brains. The Party and the Government assure you that they will do everything in their power to ensure that the results of your labour are not wasted.

"This is the only policy, the only realistic programme, in the present internal and international conditions."

On the eve of the election M. Gomulka made another fervent appeal to the electorate not to follow "the reactionary slogan" recommending them to strike the names of the top candidates off the ballot-paper or to cross out the names of P.U.W.P. candidates.

"This propaganda for crossing out the names of P.U.W.P. candidates on the ballot papers," he said, "is tantamount not only to calling for the liquidation of Socialism in Poland. It means the crossing out of the independence of our country, the erasing of Poland from the map of Europe. [This phrase was taken to imply that the only alternative to the present regime would be Soviet intervention in Poland.] . . . Here and there voices are heard calling for a boycott of the elections or the crossing-out of whole ballot papers. Such voices correspond with the intentions of the reactionaries. Do not listen to them. . . . Listen to this appeal. It is dictated by profound political wisdom, and by concern for the normal development of our life and the political stabilization which is indispensable for Poland. Listen to the voice of reason, so that we shall never have to recall the proverb that a Pole is wise after the harm has been done. Let us be wise on election day . . ."

The elections, which were witnessed by many foreign correspondents, were for the first time held in complete secrecy and without the popular demonstrations and processions with bands, etc., customary in other Soviet-bloc countries. M. Gomulka and all other leading members of the P.U.W.P., as well as the Peasant and Democratic leaders, were elected. M. Gomulka himself receiving 99.5 per cent of the votes in his Warsaw constituency. An important factor in M. Gomulka's victory was believed to have been the support given to the regime by the Roman Catholic Church, which exhorted the population to use their votes and not to abstain from going to the polls.

In a number of cases the electorate showed its preference for non-party candidates—e.g. in one of the Lodz constituencies M. Zambrowski, a member of the Communist Party's politburo, obtained 88.3 per cent of the votes, whereas a non-party lawyer (M. Bierzawski) obtained 97.8 per cent and a Democratic Party candidate 96.2 per cent. In another Lodz constituency M. Loga-Sowinski (also a member of the P.U.W.P. politburo) polled 94.7 per cent, while a non-party Catholic obtained 95.2 per cent. In a third Lodz constituency the non-party candidate, Professor Szczepanski (of the University of Lodz), headed the poll with 97.1 per cent, followed by a candidate of the Democratic Party with 94.9 per cent, whilst the leading Communist candidate (Mme. Tartakowana-Majkowska) polled only 79.6 per cent. Similar majorities for non-party candidates over P.U.W.P. candidates occurred in certain districts of Warsaw and in Silesian industrial cities such as Gliwice and Katowice.

An unprecedented situation occurred in the three-seat electoral district of Nowy Sacy (in the Cracow voivodship), where only two candidates succeeded in obtaining absolute majorities, thus necessitating a by-election to fill the vacant third seat. The first candidate (P.U.W.P.) received 90.6 per cent of the votes, the second (U.P.P.) 79.5 per cent, but the third (also P.U.W.P.) received only 45.8 per cent—i.e. 4.2 per cent less than the legally required minimum percentage of 50 per cent. It was subsequently announced that the by-election would be held on March 17.

Election of New Council of State. - New Government formed by M. Cyrankiewicz.

The new *Seym* met for the first time on Jan. 20 under the chairmanship of its *doyen*, Dr. Boleslaw Drobner. After unanimously electing M. Czeslaw Wycech (the Peasant leader) as its Marshal (Speaker), the *Seym* elected a new Council of State—the body collectively exercising the functions of Head of State—with the following membership:

Chairman—M. Aleksandar Zawadski (Polish United Workers' Party). *Vice-Chairmen*—M. Jerzy Albrecht (P.U.W.P.), M. Stanislaw Kulczynski (Democratic Party) and Professor Oskar Lange (P.U.W.P.). *Secretary*—M. Julian Horodecki (United Peasant Party). *Other Members*—M. Kazimierz Banach (U.P.P.); M. Leon Chain (D.P.); M. Wladyslaw Gomulka (P.U.W.P.); M. Leon Kruczkowski (P.U.W.P.); M. Ignacy Loga-Sowinski (P.U.W.P.); Mme. Alicja Musialowa (P.U.W.P.); M. Roman Mowak (P.U.W.P.); M. Jozef Ozga-Michalski (U.P.P.); M. Boleslaw Podedworny (U.P.P.); and M. Jerzy Zawiejski (non-party Catholic).

For the first time in the history of the *Seym* the voting for members of the Council of State was not unanimous—two deputies voting against the election of M. Horodecki as Secretary, and seven abstaining in the vote on the election of M. Zawiejski.

The principal changes in the composition of the new Council of State were the absence of five "Stalinist" members who had belonged to the previous Council but had lost their *Seym* mandates; and the election for the first time of a non-party member, M. Zawiejski.

The *Seym* accepted the formal resignation of M. Cyrankiewicz's Government, but, on a proposal by M. Gomulka, reappointed M. Cyrankiewicz as Prime Minister, with only one dissenting vote. After hearing a policy statement from M. Cyrankiewicz (on the lines of the N.U.F.s electoral programme), the *Seym* approved the new Cabinet—see below—on Jan. 27, with one dissenting vote and eight abstentions.

In accordance with M. Cyrankiewicz's proposals, the Ministry of Communal Economy was abolished and 10 other Ministries were merged into the following five, as part of a move to "streamline" the administration: the Ministries of Coal-mining and Electric Power; of Metallurgy and Engineering; of Building and Building Materials; of Railways and Road and Air Transport; and of Agricultural Foodstuffs and Purchases.

With these administrative changes, the membership of the new Cabinet was as follows:

M. Jozef Cyrankiewicz (P.U.W.P.)	Prime Minister.
M. Zenon Nowak (P.U.W.P.) ..	Deputy Prime Ministers.
M. Piotr Jaroszewicz (P.U.W.P.)	
M. Stefan Ignar (U.P.P.)	
M. Stefan Jedrychowski (P.U.W.P.)	Chairman of the Planning Commission.
M. Marian Spychalski (P.U.W.P.)	National Defence.
M. Wladyslaw Wicha (P.U.W.P.)	Internal Affairs.
M. Adam Rapacki (P.U.W.P.) ..	Foreign Affairs.
M. Marian Rybicki (P.U.W.P.) ..	Justice.
M. Jan Gorecki	State Control.

M. Tadeusz Dietrich (P.U.W.P.) ..	Finance.
M. Franciszek Wamolka (P.U.W.P.)	Coalmining and Power.
M. Kiejstut Zemajtis (P.U.W.P.)	Metallurgy and Engineering.
M. Stefan Pietrusiewicz (P.U.W.P.)	Acting Minister of Building and the Building Materials Industry.
M. Antoni Radlinski (P.U.W.P.) ..	Chemical Industry.
M. Julian Stawinski (P.U.W.P.) ..	Light Industry.
M. Feliks Pisula (U.P.P.)	Agricultural Foodstuffs and Purchases.
M. Zygmunt Moskwa .. .. (Democratic Party)	Small-Scale Industry and Handicrafts.
M. Jan Dab-Kociol (U.P.P.) ..	Forestry and Timber Industry.
M. Edward Ochab (P.U.W.P.) ..	Agriculture.
M. Ryszard Strzelecki (P.U.W.P.)	Railways, and Road and Air Transport.
M. Stanislaw Darski (non-party)	Shipping.
M. Jan Rabanowski .. . (Democratic Party)	Communications.
M. Marian Minor (P.U.W.P.) ..	Home Trade.
M. Witold Trampczynski (P.U.W.P.)	Foreign Trade.
M. Stanislaw Sroka (P.U.W.P.) ..	Acting Minister of Public Utilities.
M. Stefan Zolkiewzki (P.U.W.P.)	Higher Education.
M. Wladyslaw Bienkowski .. (P.U.W.P.)	Education.
M. Karol Kuryluk (P.U.W.P.) ..	Art and Culture.
M. Rajmund Baranski (Non-Party)	Health.
M. Stanislaw Zawadzki (P.U.W.P.)	Labour and Social Welfare.
M. Jerzy Sztachelski (P.U.W.P.) ..	Minister without portfolio.

The new Cabinet contained no significant changes except that two members of the pro-Russian "Natolin" faction in the Polish United Workers' Party -M. Mijal, hitherto Minister of Communal Economy, and M. Rymynski, previously Minister of the Chemical Industry were not included. On the other hand, M. Nowak (leader of the "Natolin" group), who had been dropped from the party's Politburo in October 1956, was retained as a First Deputy Premier a move regarded in the foreign Press as a compromise between the demands of M. Gomulka's supporters for the ousting of all Stalinist elements in the Government, and of concern for Soviet susceptibilities.

Of the new Ministers, 22 – all holding key positions – belonged to the Polish United Workers' Party; three to the United Peasants' Party, including its leader, M. Ignar; and two to the Democratic Party; whilst three were non-party.

M. Ochab had been appointed to the previous Cyrankiewicz Cabinet on Jan. 9 in the place of M. Kuligowski, in connexion with the introduction of agricultural reforms which had been agreed upon by the P.U.W.P. and the United Peasants' Party [see below].

Before the vote on the new Cabinet, a non-party deputy, Professor Wojtysiak (Director of the Agricultural College at Wroclaw), announced that he would not vote for M. Cyrankiewicz, who, he alleged, had been "responsible for all the abuse of power" during the Stalinist era and therefore shared responsibility for its crimes. Professor Wojtysiak criticized M. Cyrankiewicz's new programme as too general, lacking in up-to-date ideas, and "repeating everything we have all heard before." He said that it had at least been possible, now that newspapers and periodicals were freely available, to gain a picture of what the Western countries had achieved and to realize that the contrast with Poland was "terrible." Nevertheless, Poland had taken a big step forward, and the credit for this had to go to the Polish people. Specifically, Professor Wojtysiak criticized the Government's alleged indifference to the problem of unemployment, their alleged lack of attention to youth welfare and education; lack of planning in the country's food supply; and inadequacies in the housing programme. After describing Polish agriculture as virtually "in a state of collapse," Professor Wojtysiak declared that the most important task of the new Parliament was to set up a Government headed by a man who had proved by his past record that he could stand the test. In his own view, M. Cyrankiewicz was not the correct choice because he had been Prime Minister during the period of the "cult of the individual."

New Agricultural Policy.

As stated above, it was announced on Jan. 9 that M. Kuligowski had been relieved of his post as Minister of Agriculture and succeeded by M. Edward Ochab, a member of the politburo of the P.U.W.P. and, until M. Gomulka's return to power in October 1956, First Secretary of the party. This change was made in connexion with a far-reaching revision of agricultural policy which had been agreed upon by the central committees of the Polish United Workers' and United Peasants' parties with a view to counteracting the dangerous fall in farm production under the previous regime.

Among the changes introduced were (*a*) a reduction by one-third in the grain-delivery quotas of peasants and farmers; (*b*) a 100 per cent price increase granted to them for their grain deliveries; (*c*) tax reductions combined with higher social benefits for peasants and farmers, including a reduction of the upper limit of the land-tax assessment for larger farms from 18 to 10 per cent; (*d*) the extension of social insurance to permanent hired workers employed on individual farms; (*e*) facilities for individual farmers to buy more machinery, although co-operative farms would still have priority; (*f*) possibilities for peasants to develop their own initiative in the production of building materials from local materials; (*g*) the ending of restrictions concerning ownership, leases, purchases, and sales of land acquired by legacy and through division among family members, or of land acquired under earlier agrarian reforms; (*h*) the restoration of the principle of free transfer of private rights in land.

The announcement nevertheless made it clear that, in spite of the reduction of compulsory grain delivery quotas for the coming harvest, peasants were expected to make up for the arrears which had accumulated in their deliveries to the Government, and which amounted to 400,000 tons of grain, 500,000 tons of potatoes, and 60,000 tons of meat.

In connexion with the new agricultural policy it was also announced that the formation of producers' and sellers' co-operatives, specialized co-operatives, and peasant educational organizations would be encouraged on a large scale, and that there would no longer be any compulsion to join collective farms. It was stated that a considerable number of collective farmers had recently left these farms.

[Polish newspapers reported that only 2,500 out of 10,000 such collectives were still in operation, and that the collapse of collective farms had been most marked in the Western provinces.]

New Rules of Procedure for Seym.

On March 1 the *Seym* adopted a report by its Rules Committee introducing important changes in parliamentary organization and procedure.

The rules provided that the *Seym* would be convened at least twice a year for an autumn session not later than Oct. 31, and for a spring session not later than April 1. The *Seym* would form 19 standing and other *ad hoc* committees to examine legislation and other questions, and to supervise the activities of various State organs. Bills would be examined in two readings in plenary session, in addition to the proceedings in the appropriate committee.

It was also laid down (1) that deputies' speeches during debates would be restricted to 30 minutes (or to five minutes on matters not on the agenda), though the time-limit could be extended by the Marshal of the *Seym*; (2) that voting would be open; (3) that the election of the Council of State by the *Seym* would take place by an absolute majority of votes, with a separate election for each post on the Council; (4) that the appointment or recall of the Council of Ministers or of individual Ministers, would be by a simple majority of votes.

Formation of Economic Council.

It was announced in January that M. Cyrankiewicz had nominated the members of the newly created Economic Council, and that its chairman would be Professor Oskar Lange, formerly Polish representative at the United Nations. (Polish Embassy Press Department, London - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris)

(Prev. rep. Poland, 15312 A; 15242 A; 15161 A.)

A. SEAL FISHERIES. — North Pacific Seal Pact.

An international convention regulating the hunting of seals in the North Pacific was signed in Washington on Feb. 9 by the United States, the Soviet Union, Japan, and Canada, after two years of negotiations. Valid for six years, and coming into force on deposit of ratifications in Washington, it established a North Pacific Seal Fur Commission, prohibited seal hunting at sea, permitted the search of vessels at sea in suspicious circumstances, and set up a six-year co-operative seal research programme. Seal-hunting in the North Pacific is mainly carried out in the Kommendatorsky islands (under Soviet sovereignty), off the Kamchatkan coast, and in the Pribiloff islands (under U.S. sovereignty), off the Alaskan coast, where the seals bask each summer. (New York Times)

B. SINGAPORE. — The Kranji War Memorial.

A memorial commemorating 24,346 Christian, Moslem, Hindu, and Buddhist soldiers and airmen of the Commonwealth forces who died during the Second World War "in Malaya and neighbouring lands and seas and in the air over southern and eastern Asia and the Pacific," and who have no known graves, was unveiled in the Kranji war cemetery on March 1 by the Governor of Singapore, Sir Robert Black. The memorial—one of several which the Imperial War Graves Commission is building in the Far East and Pacific, the Mediterranean, and Europe—is in the form of a sheltering aircraft wing with 12 columns on which are inscribed the names of those commemorated.—(Times) **(15117 B.)**

A. GHANA. — Achievement of Independence within British Commonwealth. - Admission to United Nations.

The former British Colony of the Gold Coast became the independent State of Ghana, and a full member of the British Commonwealth of Nations, at midnight on March 5-6. An Order-in-Council establishing the first Constitution of Ghana (see 15365 A) had been signed by H.M. the Queen on Feb. 22 at a special meeting of the Privy Council at Buckingham Palace.

The Prime Minister of Ghana, Dr. Kwame Nkrumah, in a speech to the Legislative Assembly in Accra just before midnight, stressed that Ghana's new association with the British Commonwealth was based on "absolute equality and friendship."

Dr. Nkrumah declared: "Our desire to be within the Commonwealth is inspired by the belief that the Commonwealth countries are dedicated to seeking a solution of their common problems by democratic and peaceful means. So long as the Commonwealth as a whole stands by this avowed policy, our continued association with it is assured . . . The Commonwealth association is of value to us because it unites us to countries which have the same system of law and of parliamentary government as we have. The Commonwealth can, I believe, become a pilot scheme for developing the most effective methods by which colonialism can be ended without revolution or violence, and under conditions in which the former colonial territory retains a close and friendly association with the former imperial Power."

As regards foreign policy, Dr. Nkrumah said: "The Government of Ghana feels that at this particular stage the country should not be aligned with any group of Powers or political blocs. It does not intend to follow a neutralist policy, but it does intend to preserve its independence to act as it seems best at any particular time." After expressing the hope that Ghana might become a centre for discussion of African problems as a whole, Dr. Nkrumah added: "Our aim is to work with others to achieve an African personality in international affairs."

In the course of his speech Dr. Nkrumah announced that he would take over the functions of Foreign Minister and Defence Minister, in addition to the Premiership, with immediate effect.

The Gold Coast Legislative Assembly was prorogued at midnight on March 5-6, and reassembled on the following morning as the first National Assembly of Ghana. Sir Charles Arden-Clarke, the last Governor of the Gold Coast, was sworn-in on the same day by the Chief Justice (Sir Arku Korsah) as the first Governor-General of Ghana. After the Duchess of Kent (representing H.M. the Queen) had read the Speech from the Throne, presented a personal message from the Queen, and received an address from the Speaker (Sir Emmanuel Quist), the National Assembly unanimously adopted an address of thanks to her Majesty, moved by Dr. Nkrumah and seconded by Professor Busia, the Leader of the Opposition.

The Independence celebrations in Ghana (March 5-7) were attended by official representatives of the United Kingdom, Canada, Australia, New Zealand, South Africa, India, Pakistan, and Ceylon, and of many foreign countries, and by the Governors or Governors-General of a number of British and French African territories. Her Majesty the Queen was represented by the Duchess of Kent, and the British Government delegation was headed by Mr. R. A. Butler, Home Secretary and Lord Privy Seal. Foreign representatives included Mr. Richard M. Nixon, Vice-President of the United States, while the United Nations was represented by Dr. Ralph Bunche, Assistant Secretary of the U.N. Organization.

During her four-day visit to Ghana (March 4-7) the Duchess of Kent attended a State dinner given in her honour; took the salute at a parade of British, Ghanaian, Indian and Pakistani naval and military detachments and a fly-past of British and Australian aircraft; visited the Supreme Court and the University College of Ghana; unveiled an Independence Monument near Christiansborg Castle; opened a National Museum of Ghana; and attended a National Durbar given in her honour at Achimota, at which over 100 chiefs from all parts of Ghana were present.

In London, a broadcast was made on March 6 by the Prime Minister (Mr. Macmillan) welcoming Ghana as a full and independent member of the British Commonwealth, and expressing gratification that Ghana "has chosen the path of parliamentary democracy and accepted the political values which we in this country, irrespective of party, hold dear." Mr. Macmillan had announced on the previous day that a thanksgiving service would be held at St. Martin-in-the-Fields on March 14 at which the Queen would be represented by the Duke of Gloucester.

The national flag of Ghana (a tricolour of red, gold and green horizontal stripes, bearing a black star on the gold stripe) was formally hoisted by Dr. Nkrumah in Accra at midnight on March 5-6, similar ceremonies taking place in other centres. The new national anthem of Ghana—entitled *Ghana Arise*, sung to the tune of Edward Carpenter's *England Arise* and written by Mr. Hector Hughes, Labour M.P. for North Aberdeen—was played for the first time at the independence celebrations.

Mr. Hughes explained that although he had never visited Ghana, he knew several Ghanaian Ministers and had been asked by them to compose a national anthem for the new State. He also announced that he had composed "a narrative poem about the history, dignity and future of Ghana" at the request of Dr. Nkrumah. [Mr. Hughes has written a considerable amount of verse, some of which has been printed in periodicals and magazines but not yet collected in book form.]

At a press conference on March 7, at the close of the independence celebrations, Dr. Nkrumah reiterated Ghana's intention of remaining in the British Commonwealth, and said that there were no plans for a republic. In reply to questions, he stated (*a*) that he had had discussions with a view to a conference of independent African States—Tunisia, Libya, Morocco, Ethiopia, Sudan, Egypt, Liberia, and Ghana—to which South Africa might also be invited "as a gesture"; (2) that Ghana would not join the Afro-Asian group on her admission to the United Nations [see below], as she wished "to give Africa an African personality" and "did not want to be submerged in any group"; and (3) that Ghanaian diplomatic representatives would be appointed initially in five capitals—London, Paris, Washington, New Delhi, and Monrovia (Liberia). He strongly criticized the *apartheid* policy of the South African Government, but emphasized that "we cannot interfere in the internal affairs of another country."

An application by Ghana for membership of the United Nations was unanimously approved by the Security Council on March 7, the resolution being sponsored by the two Commonwealth members of the Council—the United Kingdom and Australia. Ghana became the 81st member-State of the United Nations on the following day, when the General Assembly unanimously approved a resolution sponsored by seven members of the Commonwealth—Australia, Canada, Ceylon, India, New Zealand, Pakistan, and the United Kingdom. The South African delegation was absent, having previously walked out of the current session in protest against the Assembly's decision to discuss South-West Africa.—(Times - Daily Telegraph - Manchester Guardian - United Nations Information Centre, London) **(Prev. rep. Ghana, 15365 A.)**

Historical and Demographic Note. The Gold Coast was discovered by the Portuguese in 1471 and was subsequently visited by many European traders—English, Dutch, Danish, Swedish, and German—who built forts which became marts for the slave trade to the American plantations in the 17th and 18th centuries. In the course of time Britain, Denmark and Holland emerged as the dominant powers in the coastal area, but in the early years of the 19th century all three countries outlawed the slave trade and the Danish and Dutch settlements were gradually abandoned. [Christiansborg Castle, the former seat of the Danish governors, later became the residence of the British governors of the Gold Coast and is now the residence of the Governor-General.] In 1820 all the European settlements came under British control, and in 1844 the British concluded a "bond" with a number of chiefs whereby British sovereignty was formally recognized in the coastal area.

The four administrative areas into which Ghana is at present divided—Gold Coast Colony, Ashanti, the Northern Territories, and Transvolta-Togoland—all came under British control at different times during the 19th and 20th centuries. After having been governed from Sierra Leone, the original Gold Coast Colony (i.e. the coastal and southern areas) was first constituted as a Colony in 1874. Ashanti was proclaimed a Colony in 1901, and the Northern Territories a Protectorate in 1902. After the First World War the former German colony of Togo was partitioned between Britain and France, the present territory of Transvolta-Togoland being mandated to Britain by the League of Nations. The two Togolands passed under U.N. trusteeship after the Second World War, Britain and France remaining the administering powers. As a result of the plebiscite held in 1956 under U.N. auspices (see 14988 C), Transvolta-Togoland will form an integral part of the State of Ghana.

Ghana has an area of nearly 92,000 square miles and a population estimated at about 5,000,000 and divided as follows: Gold Coast Colony, 2,500,000 (1955 estimate), Northern Territories, over 1,000,000; Ashanti, under 1,000,000, Transvolta-Togoland, about 400,000. All but 13,000 are Africans. The principal towns are Accra, the capital (135,000), Kumasi, the capital of Ashanti (78,000), and the seaport of Sekondi-Takoradi (44,000). The population of Ghana is highly tribalized, some 50 different languages being spoken. The biggest and most coherently-organized tribe are the Ashanti, acknowledging the Asantahene as their paramount chief. The tribes of Ashanti and the coastal area are culturally similar (though the latter have had longer contact with Europeans), while those of the Northern Territories and Togoland are more primitive.

Christian missions have played a leading part in the development of the country, notably in the field of education, the principal Christian denominations being Roman Catholic (527,000), Presbyterian (180,000) and Methodist (149,000). The vast majority of the inhabitants, however, are fetishists. There are some Moslems in the Northern Territories, though Ghana lies south of the "Islamic belt" in West Africa extending across the French Sudan and northern Nigeria.—(Times - Manchester Guardian)

A. SPAIN. — Cabinet Reorganization.

An extensive reorganization of the Spanish Government—the first since 1951—was carried out on Feb. 25 by General Franco, involving the appointment of 12 new Ministers. The new Cabinet was drawn from the Monarchists, the Falangist Party, non-party members (officers of the armed forces and technical experts), and the Catholic Action movement, the full Cabinet list being as follows:

*Señor Pedro Gual Villalbi (non-party)	Minister without portfolio and President of the Council of National Economy.
*Dr. Fernando Maria Castiella (Monarchist)	Foreign Affairs.
*General Camilo Alonso Vega (non-party)	Interior.
*General Antonio Barroso (non-party)	Army.
*Admiral Felipe José Abarzura (non-party)	Navy.
*General José Rodriguez y Diaz de Lecea (non-party)	Air.
*Señor Mariano Navarro Rubio (Catholic Action)	Finance.
*Señor Cirilo Canovas (Catholic Action)	Agriculture.
*Professor Alberto Ullastres (Catholic Action)	Commerce.
*General Jorge Vigón (Monarchist)	Public Works.
*Señor Fermin Sanz Orrio (Falangist)	Labour.
*Señor José Solis (Falangist)	Secretary-General of the *Falange* and Minister without portfolio.
Señor Antonio Iturmendi (Monarchist)	Justice.
Señor Jesús Rubio (non-party)	Education.
Señor Gabriel Arias Salgado (Falangist)	Information and Tourism.
Señor Joaquin Planell (non-party)	Industry.
Señor José Luis Arrese (Falangist)	Housing.
Rear-Admiral Luis Carrero Blanco (non-party)	Ministerial Under-Secretary of the Presidential Office.

*New Ministers.

Outstanding features of the new Government were (*a*) the appointment of Señor Villalbi, a leading economist, as Minister without portfolio and President of the Council of National Economy (*Consejo de Economía*), in which capacity he will be responsible for general economic co-ordination; (*b*) the creation of a new Ministry of Housing headed by Señor Arrese, the former Secretary-General of the Falangist Party; (*c*) the appointment of Señor Solis as the new Secretary-General of the Falangist Party, and concurrently as Minister without portfolio; and (*d*) the appointment of Dr. Castiella (Ambassador to the Holy See since 1951) as Foreign Minister in place of Señor Alberto Martin Artajo, who had held that post since 1945. Among other former Ministers leaving the Government was Señor José Giron, who had held the portfolio of Labour since 1941.

Dr. Castiella, formerly Professor of International Law in the University of Madrid, negotiated the Concordat between Spain and the Vatican signed in 1953 (see 13201 B), and was Ambassador to Peru before his accreditation to the Holy See. During the Second World War he fought as a volunteer with the Spanish Blue Division on the Russian front. Of the other new Ministers, **General Vega** was formerly head of the Civil Guard; **General Barroso** is head of General Franco's military household; **Admiral Abarzura** is Chief of Staff of the Spanish Navy; **General de Lecea** commanded the Seville Air Base; **General Vigon** is head of the Spanish Civil Defence organization; **Professor Ullastres** holds the Chair of International Economic History in the University of Madrid, and is a leading member of the Catholic *Opus Dei* movement; and **Señor Sanz Orrio** (successor to Señor Giron as Minister of Labour) is a leading official of the Falangist labour syndicates. **Señor Solis** (48), successor to Señor Arrese as Secretary-General of the Falangist Party, is head of the Falangist labour syndicates and one of the most influential of the Falangist leaders. Among the Ministers retaining their former posts, **Rear-Admiral Carrero Blanco** has been closely associated with General Franco since 1951 as Under-Secretary of the Presidential Office.

Under a decree-law issued on the same date (Feb. 25) five inter-ministerial committees were created to deal respectively with defence, economic affairs, transport and communications, cultural activities, and health and social security. Each committee will be presided over by the *Caudillo* (General Franco) or by Admiral Carrero Blanco as his deputy.

In addition, the decree-law created (1) an Office of Economic Co-ordination within the Council of National Economy (for which Señor Villalbi will have special responsibility as Minister in charge of economic co-ordination); (2) an inter-ministerial commission to co-ordinate national defence projects; and (3) a Directorate of Atomic Energy.

It was commented in the foreign Press that the governmental reorganization and, in particular, the emphasis on greater economic co-ordination, reflected increasing concern at the economic situation, which had been marked by progressive inflationary tendencies, increases in the cost of living, and serious housing shortages. In this connexion it was recalled that widespread demands for economic reforms had been voiced in April 1956, when 400,000 workers in Bilbao and the Biscayan provinces went on strike, and that political reforms had been demanded in the student demonstrations earlier in the same year (see 14735 A).

The new Government issued a policy statement on Feb. 28 declaring that it would "intensify its contact with the people through the institutions already existing, into which the Government will endeavour to infuse a greater vitality." In the field of domestic affairs the Government would maintain the purchasing power of the peseta, combat inflationary tendencies, encourage private enterprise, intensify production, ensure a proper balance between prices and wages, improve labour legislation, and intensify the housing drive with the aim of overcoming housing shortages, which were admitted to be "serious." In foreign affairs the policy statement laid special emphasis on the strengthening of Spain's links with the United States, Portugal, and the Arab countries.
(A.B.C., Madrid - Le Monde, Paris) **(Prev. rep. 14735 A.)**

B. UNITED STATES. — President Eisenhower declines Invitation to make Major Speech in Southern City on Segregation Question.

The U.S. Justice Department disclosed on Feb. 1 that the invitation extended by Negro leaders to President Eisenhower to make a "major speech" in a southern city on the racial segregation question (see page 15361, first column) had been declined. The Department also stated that a request for a conference with the Attorney-General (Mr. Brownell) on the extent of the Federal Government's responsibility for enforcing anti-segregation laws and court decrees had also been declined on the ground that such a conference would "not be helpful or appropriate" at the present moment.

At the same time the Justice Department released the text of a letter which had been sent by Mr. Warren Olney (Assistant Attorney-General) to the Rev. M. L. King, of Montgomery, Alabama (one of the Negro leaders who had requested such action) emphasizing that the Federal Government was fully aware of its responsibilities, and adding: "This Department will cause allegations of Federal offences to be investigated, and will act vigorously when such investigations reveal the commission of Federal offences. Notwithstanding our deep aversion to violent acts of the sort you describe [i.e. incidents such as those at Clinton, Tennessee, and elsewhere, to which the Rev. King had referred in his letter] the primary responsibility for the maintenance of law and order is lodged in State and local authorities. The Federal Government has no general police power, and this Department can act only when offences transpire within the purview of existing Federal statutory provisions."

President Eisenhower issued a statement on Feb. 6 appealing for Congressional action on the Civil Rights programme outlined in his State of the Union message (see 15350 A), and reiterating his desire for such legislation.—(New York Times) **Prev. rep. 15359 A).**

C. INDIA.—Military Aircraft purchased from Britain and France. - £20,000,000 Order for R.A.F. Canberras.

It was announced in London and New Delhi on Feb. 3 that a contract for the delivery to the Indian Air Force of 68 *Canberra* jet aircraft had been placed with the English Electric Company, the cost (including spares) being well over £20,000,000. The order was for 54 Mark-VIII bombers, six Mark-IV dual-control trainers, and eight Mark-VII photographic reconnaissance planes. The announcement stated that *Canberras* had been selected in preference to *Ilyushin* aircraft offered by the Soviet Union, and that Indian pilots were taking *Canberra* courses in Britain with the Royal Air Force.

In September 1956 India had bought 25 Folland *Gnat* fighters from Britain, and had also taken a licence to manufacture the *Gnat* and its Bristol *Orpheus* turbo-jet engine at Bangalore.

The Indian Minister for Defence Organization, Mr. Tyagi, announced on Aug. 9, 1956, that a contract had been signed for the purchase of a "certain number" of *Mystère* jet fighters from France.—(Times - The Statesman, Calcutta)

MARCH 16—23, 1957

A. IRISH REPUBLIC. — Dissolution of Parliament. - Fianna Fail Victory in General Election. - Mr. de Valera forms New Government.

On the advice of the Prime Minister, Mr. Costello, the Eire Parliament was dissolved by President O'Kelly on Feb. 12 after the *Clann na Poblachta* (Republican party) headed by Mr. Sean MacBride had decided to withdraw from Mr. Costello's coalition government. In the resulting general election, held on March 5, the Fianna Fail party under Mr. Eamonn de Valera was returned to power with an overall majority of nine seats in the new Dail, after having been in opposition since the last (1954) election.

Clann na Poblachta Withdrawal from Coalition Government.

The *Clann na Poblachta* announced on Jan. 28 that it had withdrawn its support from the Coalition Government because of the latter's "failure" to draw up a long-term development programme for the country, to take the necessary measures to deal with "the grave economic and unemployment crisis," or to "formulate any positive policy calculated to bring about the reunification of Ireland." The statement also criticized the Government's decision to hold an inquiry into the conduct of Mr. Justice Lennon (see page 15415 A, first column), on the ground that it constituted "a thinly disguised attempt to interfere with the independence of a member of the judiciary."

Prior to *Clann na Poblachta's* withdrawal from the Government, the Government's policy on the partition question had been strongly criticized by Mr. MacBride at a party meeting in Dublin on Jan. 18 (see page 15415, second column), during which he had referred to the "absence of policy and leadership on the part of the Government and the Opposition in regard to the enforced partition of the nation."

Although *Clann na Poblachta* had only three members in the Dail, its defection from the coalition imperilled the existence of Mr. Costello's Government, since the Opposition (i.e. Fianna Fail and *Clann na Poblachta*) could muster the same number of votes (72) as the Government parties—Fine Gael, Labour, and the *Clann na Talmhan* (Farmers' party). Moreover, Mr. Costello could not count on the five Independent members for a majority, since several of them had previously expressed strong dissatisfaction with the Government's policy both on the partition question and on economic matters—e.g. Mr. McQuillan, an Independent, had co-sponsored two resolutions in the Dail with Mr. Finucane (*Clann na Poblachta*) attacking the Government on the partition question (see page 15415, second column).

Dissolution of Dail. - General Election Nominations. - Sinn Fein Candidatures. - Dr. Noel Browne stands as Independent.

On Jan. 29 both the *Clann na Poblachta* and the Fianna Fail announced their intention of moving no-confidence motions in the Government, the Fianna Fail resolution declaring that "*Dail Eireann* is of opinion that the Government have lost the confidence of the people and that an immediate general election is essential." After consulting the party leaders, Mr. Costello advised the President on Feb. 4 to dissolve Parliament, and President O'Kelly accordingly issued a proclamation on Feb. 12 dissolving the Dail and proclaiming March 5 as the date of general elections.

The dissolved (15th) Dail had been in existence for just over two years and eight months, the state of the parties at the dissolution being as follows: Fianna Fail 67, Fine Gael 48, Labour 18, *Clann na Talmhan* 5, *Clann na Poblachta* 3, Independents 5. There was one vacancy, caused by the death of Mr. T. Derrig, a Fianna Fail deputy for Carlow-Kilkenny.

Nominations for the general election closed on Feb. 21, when a total of 288 candidates had been nominated in the 40 multi-member constituencies—112 by Fianna Fail (the greatest number ever put up by the party), 82 by Fine Gael, 30 by the Irish Labour Party, 19 by Sinn Fein, 12 by *Clann na Poblachta*, 7 by *Clann na Talmhan*, and 26 Independents.

Although 19 candidates were nominated by Sinn Fein (which had not contested the previous elections), the party's manifesto stated that any Sinn Fein candidates who might be elected would not take their seats in the new Dail.

It was explained (1) that Sinn Fein was "not prepared to enter Leinster House [i.e. the Dail] as a minority group," but only as a majority party; and (2) that it was therefore the party's policy to wait until it had secured "a majority of the elected representatives in the 26 Counties," after which it would establish an All-Ireland Parliament. When this was accomplished, all members of the Northern Ireland Parliament would be invited "to take their seats in the Parliament of the Republic and transfer their allegiance and powers to the National Government."

The manifesto stated that the objectives of Sinn Fein were: "to break the connexion with England; to end the British imperial system in Ireland; to end poverty and insecurity; to abolish the existing partition institutions of government in Ireland; and to replace them by a National Government having complete jurisdiction over the entire territory of the nation."

Of the 19 Sinn Fein candidates, five were serving prison sentences in Dublin under the Offences against the State Act, and two were serving 10-year prison terms in Belfast for participation in armed I.R.A. raids in Northern Ireland. The latter included Mr. Thomas Mitchell (nominated in Dublin North-East), who had twice been elected as Sinn Fein M.P. for Mid-Ulster in the U.K. Parliament, but who had been unseated on a petition (see 14520 B; 14357 C).

The Independent candidates included Dr. Noel Browne, whose resignation as Minister of Health in 1951 (see 11529 A) had precipitated the general election held in that year. Dr. Browne had resigned from the Fianna Fail on Feb. 20 and announced his intention of standing as an Independent for the Dublin South-East constituency.

The Roman Catholic Hierarchy's opposition to his mother-and-child welfare scheme led to Dr. Browne's resignation in 1951 both from the Ministry of Health and from the *Clann na Poblachta*, of which he was then a member. He was re-elected as an Independent at the 1951 election, but during the lifetime of the 1951-54 Dail decided, with several sympathizers, to join Fianna Fail. Although he failed to secure re-election in 1954 (when he stood for Fianna Fail in Dublin South-East), he was subsequently appointed to the party's National Executive and became one of its most active members.

Dr. Browne left the Fianna Fail because of the party's decision not to nominate him as one of their two candidates for Dublin South-East. [The two F.F. candidates chosen for this constituency were Mr. Sean MacEntee, a member of the former Dail, and Mr. Sean Moore, who was selected in preference to Dr. Browne.] In a lengthy statement accompanying his resignation, Dr. Browne alleged that the members of the constituency party organization had been canvassed to vote against his nomination, and that he had been the target of a "despicable slander campaign" of "venomous, false and misleading arguments." In the course of his statement Dr. Browne said *inter alia* that "responsibility for this campaign must not be attributed to the candidate, Mr. Sean Moore, who was chosen in my place"; that he (Dr. Browne) had been "informed that Mr. MacEntee had stated that under no circumstances would he consent to be a candidate if I were nominated"; and that he had previously been asked to withdraw his name from consideration by the executive "to meet Mr. McEntee's wishes." Dr. Browne added: "It will inevitably be said of me that I am a crank and a wrecker, who finds it impossible to accept the discipline of a political party . . . I leave Fianna Fail without bitterness, but with a great despair. It may be that I am mistaken in my firmly-held belief that it is more important to hold to one's principles than to make them subservient to a substituted loyalty to a party or a man."

The Election Campaign. - Mr. Costello's Proposals for Ending of Partition. - Rejection by Northern Ireland Home Minister.

The principal issue in the elections was the economic condition of the Irish Republic—in particular, the high incidence of unemployment (about 93,000) and the decline in the Republic's population as a result of large-scale emigration, as shown by the census returns for 1956 and the report of the Commission which had been investigating this problem (see 14919 A). All the parties laid emphasis on the need to develop the Republic's economic resources, to create new industries, to promote agriculture, and thereby to create the conditions for a flourishing economy and the eradication of unemployment.

The electoral campaigns of Sinn Fein and the *Clann na Poblachta* were particularly concentrated on the partition question. The major parties—Fine Gael and Fianna Fail—also stressed their desire to end partition, but emphasized that this could only be accomplished by peaceful means. During the election campaign considerable interest was aroused by a proposal by Mr. Costello (the Fine Gael leader) for the creation of an All-Ireland Parliament—a proposal, however, which was immediately rejected by leaders of the Northern Ireland Government.

In an election speech in Dublin on Feb. 6, Mr. Costello spoke as follows on the partition question:

"We do not seek a so-called 'united' Ireland in which the people of Belfast and the adjoining areas would fear and hate their fellow-countrymen for generations to come, but a real united Ireland in which those people would willingly and proudly take their place in trust and esteem, and in loyalty to common democratic institutions . . . The object of our policy is a reunion willingly entered into and fully safeguarding the rights of all minority interests. Broadly, this can most readily be achieved by allowing the continuance of a separate legislature either for the Six-County area, or for the smaller area in which those who are at present opposed to reunion form a homogeneous majority. What the area should be is a matter for determination in the light of the reasonable interests and wishes of the people concerned, including, of course, the Nationalists in the Six Counties. The powers in respect of the Six Counties at present reserved by the British Parliament would be transferred to a democratically-elected parliament for all Ireland."

Mr. Costello outlined the following threefold policy for a solution of the partition problem :

" (1) We must convince a majority in the Six Counties that their peace, security, rights and interests will not suffer, but will be more firmly established and better served in a united Ireland than they are under the present arrangements.

" (2) We must convince the British people and the British Parliament that partition is too real and important a problem to be ignored ; that unreserved friendship between the peoples of these two neighbouring islands will be for the good of both peoples ; and that, while partition continues, that unreserved friendship cannot exist.

" (3) We must persuade the Governments of other nations in the free world of what is the truth—that the partition of Ireland is no mere local matter without international significance, but, on the contrary, constitutes a serious weakness at an important part of the free world."

Mr. Topping, the Northern Ireland Minister for Home Affairs, made the following reply to Mr. Costello on Feb. 7, in a speech in the N.I. Parliament :

" We are asked by Fine Gael to exchange our position as a branch member of the greatest company in the world, with branches everywhere of unlimited strength and resources, for a subordinate position in a company with a doubtful past and an even more dubious future. We are not open to offers from those who would take us over. Fine Gael offers us glowing words ; the Republican Party offers us the gun. Up to date we have not yet received the de Valera bid, but we are not in the market."

Fianna Fail Victory in General Election. - Party Gains and Losses. - The New Government.

The elections resulted in a decisive victory for Fianna Fail, which returned 78 members to the new (16th) Dail—an overall majority of nine seats over all other parties combined. The following table shows the party strengths in the new Dail, the first preference votes cast for the various parties, and comparative figures at the 1954 election :

	Members		First Preference Votes	
	New Dail	Old Dail	1957	1954
Fianna Fail ..	78	65	592,998	578,960
Fine Gael	40	50	326,701	427,037
Labour	12	19	111,748	161,034
Sinn Fein	4	-	65,640	.
Clann na Talmhan	3	5	28,005	41,240
Clann na Poblachta	1	3	20,632	51,042
Independents ..	9	5	80,402	75,705

As shown above, all the parties in the Coalition Government suffered a severe setback—Fine Gael losing ten seats and polling 100,000 fewer votes than in 1954 ; the Labour Party losing seven seats and dropping nearly 50,000 votes ; and the Farmers' party (*Clann na Talmhan*) losing two seats and dropping over 12,000 votes. The *Clann na Poblachta*, whose withdrawal from the coalition precipitated the elections, returned only one member to the new Dail and polled 30,000 fewer votes than in 1954, its leader (Mr. Sean MacBride) failing to secure re-election.

Fianna Fail increased its vote by 14,000 and obtained a clear majority of nine seats as stated above. As the four Sinn Fein members will not take their seats in the new Dail, Fianna Fail's majority will thus be increased by default to 13, apart from Independents who might support Mr. de Valera's Government. The Sinn Fein candidates polled in appreciable strength, while the new Dail will have four more Independent members than the former Dail.

The total poll was 1,227,016, representing about 70 per cent of the electorate—a drop of over 100,000 as compared with the 1954 elections, when 1,335,027 voters went to the polls. In certain areas (e.g. south Wexford, north Mayo, Roscommon, and Tipperary) over 80 per cent of the electorate voted, while in Dublin polling generally was about 70 per cent. Fianna Fail secured nearly 50 per cent of the total votes and Fine Gael nearly 30 per cent, the remaining 20 per cent being distributed between the other parties and Independent candidates. The Sinn Fein proportion of the total poll was about four per cent.

The Irish Republic is divided into 40 multi-member constituencies, some of which return five members, others four, and others three (a list of these constituencies is given on page 11532, second column). Voting is by proportional representation, with transferable second preference votes. An analysis of party gains and losses, etc., is given below.

Fianna Fail. The Fianna Fail gained six seats from Fine Gael (in Cork City, Dublin South-Central, Dun Laoghaire-Rathdown, Galway North, Louth, and Wicklow) ; five from Labour (in Carlow-Kilkenny, Dublin County, Dublin North-Central, Meath, and Wexford) ; one from the *Clann na Talmhan* (Mayo North) ; and one from the *Clann na Poblachta* (Kerry North)—a total of 13. As it lost four seats—three to Sinn Fein (in Kerry South, Longford-Westmeath, and Monaghan) and one to Fine Gael (Limerick West) Fianna Fail thus made a nor gain of nine seats.

Mr. de Valera, nominated for the 16th time in County Clare, was re-elected with 16,159 votes the highest in the Republic, and 3,480 more than in 1954. He has represented County Clare uninterruptedly for 40 years, having first been elected for that constituency in 1917. Other prominent F.F. leaders re-elected included the following, all of whom were Ministers in the last Fianna Fail Government—Mr. Frank Aiken (Louth), Mr. Gerald Boland (Roscommon), Mr. Sean Lemass (Dublin South-Central), Mr. Sean MacEntee (elected on the fourth count in Dublin South-East), Dr. James Ryan (Wexford), and Mr. Oscar Traynor (Dublin North-East).

Among other Fianna Fail members in the new Dail are Councillor Robert Briscoe, Lord Mayor of Dublin, who headed the poll in Dublin South-West ; Major Vivion de Valera, son of the party leader, who was re-elected in Dublin North-Central ; and Mr. Noel Lemass, son of Mr. Sean Lemass, who was re-elected in Dublin South-West.

Fine Gael. The Fine Gael's only gain was from the Fianna Fail in Limerick West, as stated above. Elsewhere the F.G. lost seats in Cork City, Cork West, Dublin South, Dublin South-East, Dun Laoghaire-Rathdown, Louth, Galway North, Tipperary North, Tipperary South, and Wicklow to Fianna Fail, Independent, and Labour candidates.

Mr. J. A. Costello, the party leader and former *Taoiseach*, held his seat in Dublin South-East but polled 4,000 fewer votes than in 1954. Other Fine Gael leaders re-elected included Mr. Liam Cosgrave, formerly Minister for External Affairs (Dun Laoghaire-Rathdown), Mr. Patrick McGilligan, the outgoing Attorney-General (Dublin North-Central), General Sean MacEoin (Longford-Westmeath), General Richard Mulcahy, the outgoing Minister of Education (Tipperary South), Mr. Patrick O'Donnell, formerly Minister for Local Government (Donegal-West), Dr. T. F. O'Higgins (Leix-Offaly), and Mr. Gerard Sweetman, the former Minister of Finance (Kildare).

Other Fine Gael members in the new Dail include Mr. Declan Costello, son of the party leader, who was re-elected in Dublin North-West ; Mr. James Dillon, formerly a prominent Independent, who was re-elected in Monaghan ; Dr. A. C. Esmonde, re-elected in Wexford ; Mr. Patrick Byrne, son of the former Lord Mayor of Dublin (Alderman Alfred Byrne), who joined Fine Gael shortly before the elections and was returned in Dublin North-East ; and Miss Brigid Hogan (24), the youngest member of the Dail, who was elected for the first time in Galway South. Miss Hogan is the daughter of the late Mr. Patrick Hogan, onetime Minister of Agriculture, who died in 1936.

Labour Party. Labour lost seven seats to Fianna Fail and Independent candidates in Carlow-Kilkenny, Dublin County, Dublin North-Central, Dublin South-Central, Limerick East, Meath, and Wexford, and gained one seat in Tipperary North from Fine Gael. The Labour vote dropped particularly heavily in Dublin.

Mr. William Norton, leader of the party and outgoing Minister for Industry and Commerce, headed the poll in Kildare. Other Labour leaders re-elected included Mr. Brendan Corish, the outgoing Minister for Social Welfare (Wexford), Mr. James Everett, the outgoing Minister of Justice (Wicklow), Mr. Sean Casey, Lord Mayor of Cork (Cork City), and Mr. Dennis Larkin, a former Lord Mayor of Dublin (Dublin North-East). Mr. Patrick Hogan, the Speaker of the Dail, was returned unopposed in County Clare—the only unopposed return in the election.

Among Labour members of the former Dail to lose their seats was Mrs. Maureen O'Carroll, who was defeated by a Fianna Fail candidate in Dublin North-Central.

Clann na Talmhan. Mr. Joseph Blowick, the outgoing Minister for Lands, was returned in County Mayo. There are only two other C. na T. deputies in the new Dail—Mr. John Beirne (Roscommon) and Mr. Michael Donnellan (Galway North).

Clann na Poblachta. With only one member in the new Dail—Mr. John Tully (Cavan)—the C. na P. virtually disappeared as an effective political force. Mr. Sean MacBride, the party leader, was defeated by an Independent candidate in Dublin South-West.

Sinn Fein. Though Sinn Fein polled about four per cent of the total vote, as stated above, its percentage in certain areas was much higher—e.g. 25 per cent in Kerry South, 20 per cent in Monaghan, and over 15 per cent in Sligo-Leitrim. On the other hand the party polled poorly in Dublin, where Mr. Thomas Mitchell failed to secure election in the North-East constituency.

Three of the Sinn Fein seats were won from Fianna Fail (those mentioned above) and the fourth from the Independents (in Sligo-Leitrim). The successful Sinn Fein candidate in Monaghan, Mr. E. O'Hanlon, is a brother of Fergus O'Hanlon, who died of wounds received in the I.R.A. raid on the Brookeborough police station in Northern Ireland (see 15290 A).

Independents. Independent candidates gained five seats from Fine Gael, Labour, and *Clann na Poblachta* in Cork West, Limerick East, and the Dublin constituencies. The two co-sponsors of the resolution attacking the Costello Government on the partition question—Mr. John McQuillan and Mr. Patrick Finucane—were elected as Independents in Roscommon and Kerry North respectively. Other Independent members of the former Dail to secure re-election included Mr. Thomas Byrne, who was returned in Dublin North-West. [Mr. Thomas Byrne is a brother of Mr. Patrick Byrne, who was elected for Fine Gael in Dublin North-East.]

New Independent members include Dr. Noel Browne, who was elected in Dublin South-East after his rejection by Fianna Fail, Mr. G. E. Russell, the Mayor of Limerick, who won a seat from Labour in Limerick East; Mr. James Carroll, who defeated the *Clann na Poblachta* leader (Mr. Sean MacBride) in Dublin South-West; and Mr. John Murphy, an unemployed man, who won a seat from Labour in Dublin North-Central as an Independent candidate representing the unemployed.

In Dublin South-East, a three-member constituency, Dr. Noel Browne secured second place to Mr. J. A. Costello (the outgoing *Taoiseach*), with Mr. Sean MacEntee (Fianna Fail) third. Dr. Browne polled 6,035 votes—an increase of 500 compared with 1954, when he stood in the same constituency as a Fianna Fail candidate.

Mr. de Valera (74) entered upon his third term as *Taoiseach* consequent upon the Fianna Fail's electoral victory. His first Premiership lasted for 16 years (from 1932 until 1948, with several general elections intervening), while his second lasted for three years—from 1951 to 1954.

In his first press statement after his electoral victory, Mr. de Valera declared that the first objective of the new Government would be to tackle the problem of unemployment "and the other economic ills from which the country now suffers," if necessary by public works. The new Government would also give early consideration to the question of European free trade. On the question of the I.R.A., Mr. de Valera emphasized that no State could tolerate the existence of private armies, which represented a direct threat to the sovereignty of the people. He also stressed that no effective solution of the partition question could be achieved by force, but only by peaceful means.

Mr. Costello issued a post-election statement in which he said that the Government had lost the election "because it did its duty in difficult times and adopted unpopular but necessary policies which, however, will bear good fruit in the coming year." He added that Fine Gael would "play its part as a constructive Opposition" in the new Dail.

The new Dail met for the first time on March 20, when it elected Mr. de Valera as *Taoiseach* by 78 votes to 53 and approved the new Government by 75 votes to 41. Mr. Patrick Hogan (Labour) was unanimously re-elected Speaker (*Ceann Comhairle*) of the Dail.

The 78 votes for Mr. de Valera's nomination as *Taoiseach* comprised 76 Fianna Fail and two Independents; the 53 opposing votes were 39 Fine Gael, 10 Labour, three *Clann na Talmhan*, and one Independent. Eleven deputies did not vote, including six Independents. On the vote approving the Cabinet list, the 75 majority votes were all from the Fianna Fail, while the 41 opposing votes comprised 39 Fine Gael and two *Clann na Talmhan* deputies.

The new Government, drawn entirely from the Fianna Fail, was announced on the same day as follows:

Mr. Eamonn de Valera ..	Prime Minister (*Taoiseach*).
Mr. Sean Lemass	Deputy Premier (*Tanaiste*) and Minister for Industry and Commerce.
Mr. Frank Aiken	External Affairs.
Dr. James Ryan	Finance.
Mr. Oscar Traynor ..	Justice.
Mr. Sean MacEntee ..	Health.
Mr. Patrick Smith	Local Government and Social Welfare.
Mr. Erskine Childers ..	Lands.
Mr. Sean Moylan	Agriculture.
Mr. John Lynch	Education and the *Gaeltacht*.
Mr. Kevin Boland	Defence.
Mr. Neal Blaney	Posts and Telegraphs.

The new Government includes nine of the 12 Ministers who held office in Mr. de Valera's last (1951-54) Cabinet—Mr. Lemass, Mr. Aiken, Dr. Ryan, Mr. Traynor, Mr. MacEntee, Mr. Smith, Mr. Childers, Mr. Moylan, and the *Taoiseach* himself—together with three younger members of Fianna Fail promoted to Cabinet office for the first time: Mr. Kevin Boland, Mr. Lynch, and Mr. Blaney. Mr. Andreas O'Keeffe, S.C., was appointed Attorney-General, which is not a Cabinet appointment.

Mr. Kevin Boland (39), an engineer, is the son of Mr. Gerard Boland (a leading member of Fianna Fail and former Minister of Justice), who was not included in the new Government. Mr. Lynch (40), a barrister, was Parliamentary Secretary to the Government in the last Fianna Fail Cabinet, with special responsibility for the *Gaeltacht* (the Gaelic-speaking areas). Mr. Blaney (34) is chairman of Donegal County Council. Mr. Kevin Boland entered the Dail for the first time as a deputy for Dublin County, but Mr. Lynch and Mr. Blaney (deputies for Cork City and Donegal East respectively) were members of the former Dail.

Mr. Sean Moylan (who had held the portfolio of Education in former Fianna Fail Cabinets) is not a member of the Dail, having lost his seat in Cork North at the general election. It was announced by Mr. de Valera, however, that Mr. Moylan would be nominated as a member of the new Senate and that the portfolio of Agriculture would be held by Mr. Aiken *ad interim* until the Senate elections on May 9. Under the Irish Constitution, the *Taoiseach* has the right to nominate 11 of the 60 members of *Seanad Eireann*, while six are elected by the Universities and 43 are nominated by panels representing cultural, industrial, agricultural and other interests.

A. UNITED KINGDOM. — Civil Service. - Revised Rules of Security Procedure.

The Financial Secretary to the Treasury (Mr. Enoch Powell) gave details on Jan. 29 of the revised procedure which would be followed in cases where a Civil Servant was suspect on security grounds.

Mr. Powell explained in a parliamentary written answer that an individual engaged on work vital to the security of the State would be regarded as unreliable not only if he was or had recently been a member of the British Communist Party but also if, "in such a way as to raise reasonable doubts about his reliability, he is or has recently been sympathetic to Communism, associated with Communists or Communist sympathizers, or is susceptible to Communist pressure." For purposes of convenience and brevity, the term "Communist" would cover Communist and Fascist alike.

The new procedure to be adopted was described as follows: "If the Minister rules that there is a *prima facie* case, the Civil servant is at once to be informed and will normally be sent on special leave with pay, care being taken as far as possible not to disclose the reasons for his absence to his colleagues. The Civil servant will at the same time be given any particulars, such as the date of his alleged membership, or the nature of the alleged sympathies or associations, that might enable him to clear himself. He will not be given such particulars as might involve the disclosure of the sources of the evidence."

It was added that no statement of general application could be made as to what constituted "sympathy" or "association," but that each case would be assessed in the light of the particular facts. [*The Times* pointed out in this connexion that the Conference of Privy Councillors set up after the Burgess-Maclean case—see 14705 A — had laid emphasis on character defects which might make a man unreliable or expose him to blackmail or influence, e.g. drunkenness, drug addiction, homosexuality, or loose living.]

Mr. Powell also announced that the terms of reference of the Three Advisers, set up in 1948 to hear appeals from Civil servants considered unreliable for certain types of public employment, had been revised to take account of the new statement on procedure.

In future (Mr. Powell explained) the Three Advisers would have to answer the following questions in advising a Minister whether his *prima facie* ruling in any individual case had or had not been substantiated: (1) "Are there any reasonable grounds for supposing that the individual has or has recently had Communist sympathies or associations of the type alleged?"; (2) "If in doubt, how do you assess the evidence?"

"In the appreciation of a case," the terms of reference added, "defects of an individual's character should be taken into account when they bear upon his reliability in the general context of Communist associations or sympathies."

The tribunal known as the Three Advisers was set up by the Labour Government in April 1948 (see 9218 C) under the chairmanship of Sir Thomas Gardiner, with Sir Maurice Holmes and Sir Frederick Leggett as its other members.
(Times - Daily Telegraph) **(Prev. rep. 14807 E; Conference of Privy Councillors, 14750 A; Burgess-Maclean Case, 14699 A; 14571 A; Three Advisers, 9218 C.)**

B. PORTUGAL. — Diamond Industry.

A decree establishing a diamond-cutting and polishing industry in Portugal was signed on Feb. 12 by the Minister for Oversea Territories, Professor Ventura. It provided that diamonds mined in Portuguese West Africa by the Angola Diamond Company (*Companhia de Diamantes de Angola*), at present exported direct from that colony to the offices of purchasing firms in London, would be exported instead to Lisbon, where they would be classified, selected and valued. The new Portuguese industry would purchase the diamonds it could use and the remainder would be exported in bulk to the normal purchasing firms. (Times - Daily Telegraph)

C. FRANCE. — Rehabilitation of Communist Leader.

M. Charles Tillon, who was excluded from the politburo of the French Communist party in 1952 together with the late M. André Marty, was re-established in the full rights and duties of party membership on Feb. 18. The announcement stated that M. Tillon (an ex-Minister and a former deputy for the Seine department) had pledged himself to be "faithful" to the party on all occasions. M. Marty—who, like M. Tillon, had been dropped from the politburo for "sectarianism" detrimental to party unity—died on Nov. 23, 1956.—(Le Monde) **(Prev. rep. 12560 A.)**

A. UNITED KINGDOM. — Wage Increases and Trade Disputes in 1956. - Outstanding Wage Claims by Engineering, Shipbuilding and Railway Workers. - Manpower Distribution at end-1956.

A general review of wage increases and industrial disputes in British industry during 1956 was published in the January issue of the *Ministry of Labour Gazette* and is summarized below.

Wage Increases.

The average increase in weekly wages during the year was about 7½ per cent, compared with an average rise in the level of retail prices of about 8 per cent; three-quarters of the average wage increase occurred during the first four months of the year. In 1955 the respective increases were 7 per cent (wages) and 6 per cent (prices).

About 12,633,500 workers received increases totalling £6,599,000 weekly, an average of about 10s. 5d. per worker. The following table shows the approximate number of workers affected in each of the principal groups of industries, and the net amount of the weekly changes in wage-rates:

	£	£
Agriculture, Forestry, Fishing	792,500	466,500
Mining and Quarrying	133,500	289,000
Treatment of Non-metalliferous Mining Products other than Coal	218,000	79,300
Chemicals and Allied Trades	227,000	113,300
Metal Manufacture	220,000	125,700
Engineering, Shipbuilding and Electrical Goods; Vehicles; Metal Goods not elsewhere specified	2,645,500	1,387,700
Textiles	739,500	222,400
Leather, Leather Goods and Fur	50,500	24,700
Clothing	490,500	277,600
Food, Drink and Tobacco	479,500	207,700
Manufactures of Wood and Cork	188,000	74,700
Paper and Printing	327,000	376,600
Other Manufacturing Industries	54,000	25,600
Building and Contracting	1,244,000	786,500
Gas, Electricity and Water	241,000	173,600
Transport and Communications	1,196,000	550,900
Distributive Trades	1,468,000	663,300
Public Administration	952,500	529,000
Miscellaneous Services	666,500	224,900
Total	12,633,500	6,599,000

Of the wage increases granted, £2,654,300 (40.2 per cent) was obtained through direct negotiation, £1,762,200 (26.7 per cent) through joint industrial councils, £1,395,800 (21.2 per cent) through wages councils and other statutory wages boards, £423,900 (6.4 per cent) under sliding scales based on the retail price index, £203,100 (3.1 per cent) by arbitration and mediation, and £159,700 (2.4 per cent) through other joint councils or conciliation boards.

The index figures of weekly rates of wages for each month of 1956 are shown below (June 30, 1947 = 100):

Date*	Men	Women	Juveniles	All Workers
1955				
December	153	158	166	154
1956				
January	154	160	169	156
February	156	160	171	158
March	160	164	175	162
April	162	165	178	163
May	163	165	178	164
June	163	166	178	164
July	163	167	179	164
August	163	167	179	165
September	163	168	180	165
October	163	169	181	165
November	164	169	181	165
December	164	169	181	166

*End of month.

Outstanding Wage Claims.

The principal wage claims outstanding at Dec. 31, 1956 had been put forward by unions representing the engineering, shipbuilding, and railway workers. The history of these claims is summarized below.

Engineering and Shipbuilding. The decision to put forward a claim for further "substantial" wage increases had originally been taken on April 25, 1956, at the annual conference of the Amalgamated Engineering Union at Eastbourne. In spite of a warning by the Engineering and Allied Employers' National Federation on May 31, 1956, that no new wage demands would be considered at the moment, the annual conference of the Confederation of Shipbuilding and Engineering Unions (of which the A.E.U. is the most powerful member) decided on Aug. 25 to instruct the Confederation's executive to proceed with the demand. After a meeting of delegates from the 40 unions represented in the Confederation had been held at York on Sept. 13 to consider the situation, the Confederation presented to the employers on Oct. 25, 1956, a claim for a 10 per cent wage increase for all male engineers, numbering nearly 3,000,000.

After consulting its affiliated organizations, the Engineering and Allied Employers' National Federation rejected the demand on Nov. 29, 1956, its chairman (Mr. F. G. Braby) recalling that the employers had warned the unions in previous years of the danger of too frequent wage increases, and appealing to them to help in maintaining a period of wage and price stability. Mr. B. McCarthy, the Federation's director, stressed in this connexion that engineers' earnings already compared favourably with those in other industries, and that in recent years wages had risen more rapidly than prices or production. As a result British exports were falling, whereas those of Western Germany, the U.S.A., and Japan were rising. Orders for agricultural machinery, boilers, tanks, and gasholders had already been lost because British prices were too high; Britain was being undersold in the overseas markets for bicycles, of which Germany was now the world's largest supplier; and the British share in automobile exports had fallen from 41 per cent of the world total in 1953 to 28.6 per cent in the first nine months of 1956.

A further meeting of delegates from unions affiliated to the Confederation was held at York on Jan. 10, 1957 and decided to make a fresh approach to the Employers' Federation at an early date.

Railways. Notwithstanding the general increase of 7 per cent for all railwaymen, including footplatemen, which took effect from Jan. 23, 1956, the Amalgamated Society of Locomotive Engineers and Firemen decided at its annual delegate conference on May 31 to ask for a 15 per cent increase for its 70,000 members employed by British Railways and London Transport. The claim—estimated to cost about £7,000,000 annually—was put to the British Transport Commission on July 6 and rejected on Aug. 29, 1956. ASLEF thereupon submitted it to the Railway Staffs National Tribunal, arguing in support that (*a*) footplatemen's wages were not in line with the skill and responsibility demanded of them; (*b*) living costs had risen "substantially" since January; (*c*) higher rates were needed to attract recruits to the industry. On Dec. 6, 1956, the Tribunal rejected arguments (*a*) and (*c*), but found that current wage rates did not "adequately reflect the rise in the cost of living since January." It therefore awarded an increase of 3 per cent in place of the 15 per cent asked for by the union. The award, which brought the basic wage (without overtime) of a top-rate driver to £10 14s. 4d. a week, and was estimated to cost about £1,400,000 a year, was accepted by a delegate conference of ASLEF on Jan. 9, 1957, having already been agreed to by the British Transport Commission.

On Nov. 22 the National Union of Railwaymen (which negotiated on behalf of the majority of operating grades, e.g. porters, guards, signalmen, shunters, and permanent way men, as well as for a minority of locomotive men and clerks) submitted a claim for a general 10 per cent increase for its members. On the same day the Transport Salaried Staffs Association, which represents stationmasters, supervisors, booking office clerks, etc., presented a demand for an increase of 7½ per cent. Both claims were still outstanding on Dec. 31, 1956.

Industrial Disputes.

There were 2,643 industrial disputes involving stoppages of work during 1956, compared with 2,419 in 1955. About 507,000 workers (approximately 1.9 per cent of the working population) were affected, the total number of working-days lost being 2,083,000 - an average of about 4.1 working-days for each worker involved.

Stoppages in the various industries chiefly affected by disputes are described below:

Coalmining. The largest number of stoppages (2,076, involving 240,000 workers and causing the loss of 502,000 working-days) again occurred in the coalmining industry, but (as in 1955) were mostly of relatively short duration. The more important stoppages included (*a*) a strike of South Wales miners in March-April over a claim for increased piece-work rates (20,000 working-days lost); (*b*) a further strike in South Wales in protest against the dismissal of two shacklers (16,400 working-days lost); (*c*) a strike in Yorkshire in August in support of a demand that miners' "concessionary coal" should be washed and screened (12,000 working-days lost); (*d*) a second stoppage in Yorkshire in October owing to a dispute over bonus shift payments (10,000 working-days lost).

Printing Industry. A loss of about 370,000 working-days was caused in February and March, 1956 by a stoppage affecting about 15,000 printers employed in periodical and general printing in the Greater London area. The dispute followed the rejection by the employers in January of demands put forward by (*a*) the Typographical Association, representing compositors, machine-minders, and proof-readers outside Greater London and Scotland; (*b*) the London Typographical Society, representing compositors and machine-minders employed in the Greater London area. The T.A. claimed a basic weekly minimum (excluding overtime) of £10 10s. for their members, including men employed by provincial newspapers. The L.T.S. demanded a basic minimum of £12. 12s. weekly for men engaged in periodical and general printing, those employed by national newspapers being already covered by an agreement signed in 1955. The employers' federations maintained that these demands —which represented increases in the basic minima of 31s. 6d. (provinces) and 52s. (Greater London)—were beyond the industry's capacity to meet; instead, they offered an all-round increase of 18s. 6d. to all compositors, machine-minders, and proof-readers throughout the country, subject to the unions' agreeing to relax certain rules and practices.

The two unions reacted on Jan. 17, 1956, by instructing their members to "work to rule" and to refuse to work overtime, a ban on overtime working being also imposed on Jan 28 by the Association of Correctors of the Press, to which most London proof-readers belong. Meanwhile talks between the two sides and Sir Wilfrid Neden (the Ministry of Labour's Chief Industrial Commissioner) had begun on Jan. 27 but broke down on Feb. 10, 1956, and on Feb. 14 employers in the Greater London area dismissed over 7,000 compositors and machine-minders who, in spite of a previous warning, had refused to resume full normal working.

Mr. Macleod, then Minister of Labour, announced in the House of Commons on Feb. 15, 1956, that he proposed to appoint two courts of inquiry to deal respectively with the disputes in the Greater London area and the Provinces. On Feb. 16 he announced that the membership of both courts would be identical and would consist of: Sir John Forster, Q.C., President of the Industrial Court; Mr. A. H. Mathias, British Employers' Federation representative on the National Joint Advisory Council; and Mr. A. G. Tomkins, general secretary of the Furniture Workers' Union.

While the imposition of "work to rule" and "no overtime" sanctions on Jan. 18 had forced many London periodicals and provincial newspapers to reduce their size, the dismissals on Feb. 14 compelled many magazines and periodicals normally printed in the Greater London area to suspend publication, including the *Illustrated London News*, *The Sphere*, *The Listener*, and a number of women's and film magazines. Other publications—notably the *Radio Times*, *London Calling* (the B.B.C.'s publication for overseas listeners), *The Economist*, and the *Investor's Chronicle*, were printed in France, Switzerland, and other European countries and flown to Britain, whilst yet others, including the *New Statesman and Nation*, were produced by a combination of photostat and offset litho processes.

Although the Typographical Association agreed to a resumption of normal working in the Provinces from Feb. 28, pending the recommencement of negotiations as soon as the Court of Inquiry into the London dispute had published its findings, the L.T.S. continued to apply sanctions, and by March 1, 1956, the number of periodicals which had suspended publication had grown to about 100. Attempts by the Printing and Kindred Trades' Federation to bring about a settlement in the Greater London area proved fruitless, and on March 2 a further 8,000 workers, mostly P.K.T.F. men, had to be laid off because there was no work for them.

The Court of Inquiry into the Greater London dispute published its report on March 15, 1956. It recommended a three-years' agreement to provide for (1) a new basic weekly minimum of £10 15s. 6d., or 37s. 6d. more than the existing rate; (2) a new cost-of-living scale rising by 1s. for each point rise in the cost-of-living over the figure at the time of settlement; (3) admission of apprentices according to a programme suggested by the L.T.S.; (4) renewed efforts to fix craft rates and establish negotiating machinery on a national basis.

The publication of the Court's findings was at first followed by the refusal of the L.T.S. and A.C.P. to consider resumption of normal working unless the employers undertook to make any increases retrospective to Jan. 18, 1956, the date when "sanctions" were declared. On March 23, however, Mr. Willis (general secretary of the L.T.S.) announced that the two unions had agreed with representatives of the Typographical Association and the Amalgamated Society of Lithographic Printers to negotiate collectively with the employers "on a craft basis." Meanwhile, the ban on overtime and restrictions on output would be lifted from March 27, 1956, and the dismissed men would be reinstated by the employers in their jobs.

Motor Vehicles and Aircraft. Strikes in the motor vehicles, building and aircraft industries accounted for the loss of 363,000 working-days. The principal stoppages occurred at the Standard works at Coventry in April-May and at the factories of the British Motor Corporation and Briggs Motor Bodies in July-August (see 15084 A), costing 128,000 and 103,000 working-days respectively. A stoppage of about 12,000 aircraft workers at Stockport (August-October) through dissatisfaction with certain pay-rates caused the loss of 47,000 working-days.

Shipbuilding and Ship-repairing. Disputes cost about 324,000 working-days during the year, the most serious stoppage occurring on Clydeside, where about 10,000 men at 28 shipyards ceased work (Sept. 3-18) following the employers' rejection of a demand for guaranteed hourly rates for pieceworkers (120,000 days lost). Smaller disputes in support of wage and bonus claims occurred on Merseyside (July-August, 66,000 days lost); at Belfast (October, 13,000 days lost); and at Aberdeen (August-September and again in December, about 11,000 working-days lost in each case).

Metal Manufacturing. In this group the most serious loss of time (200,000 working-days) was caused by the overtime ban by steelworks maintenance men (March-September) and the consequent local strikes in June (see 15325 A).

Building and Contracting. Stoppages involved a loss of 78,000 working-days, the most serious being a protracted strike (February-March) at a Grangemouth oil refinery owing to the rejection of a demand for an increase in daily allowances (14,000 working-days involved).

Engineering. In this group, where 77,000 working-days were lost, the most important dispute arose at Crawley, where about 700 men employed in the manufacture of process plant and equipment ceased work over the dismissal of two workers on redundancy grounds (12,000 working-days lost).

Manpower Distribution Figures.

The following table shows the manpower position in Britain at the end of 1956, comparison being given with 1955:

	Dec. 31, 1956	Dec 31, 1955†
Total Working Population*		
Men	16,207,000	16,144,000
Women	7,880,000	7,929,000
	24,087,000	24,073,000
H.M. Forces and Women's Services	761,000	779,000
Ex-Service Men and Women on Release Leave	6,000	6,000
Registered Unemployed‡	331,000	235,000
Persons in Civil Employment	22,989,000	23,053,000
of whom: Men	*15,227,000*	*15,221,000*
Women	*7,762,000*	*7,832,000*

*The "total working population" represents the total number of persons aged 15 or over working for pay or gain, or registering themselves as available for such work. It includes H.M. Forces and the Women's Services, those on release leave and not yet in employment, registered unemployed, private indoor domestic servants, and gainfully employed persons over pensionable age. Part-time workers are counted as full units.

†Revised figures.

‡Excluding persons registered as "temporarily stopped," most of whom were in employers' pay-rolls and were therefore included in the numbers shown as in civil employment.

An analysis by industrial groups of the total number of persons in civil employment is given below:

Industries or Services	Dec 31, 1956	Dec. 31, 1955
Basic Industries		
Mining and Quarrying (including coal-mining)	859,000	857,000
Gas, Electricity, and Water	378,000	378,000
Transport and Communication	1,712,000	1,703,000
Agriculture and Fishing	994,000	1,006,000
Number in Basic Industries	3,943,000	3,944,000
Manufacturing Industries		
Chemicals and Allied Trades	528,000	526,000
Metals, Engineering, and Vehicle Manufacture	4,600,000	4,663,000
Textiles	935,000	953,000
Clothing (including footwear)	678,000	679,000
Food, Drink and Tobacco	903,000	912,000
Other Manufactures	1,582,000	1,618,000
Number in Manufacturing Industries	9,226,000	9,351,000
Building and Contracting	1,491,000	1,472,000
Distributive Trades	2,904,000	2,884,000
Professional, Financial, and Miscellaneous Services	4,131,000	4,112,000
Public Administration:		
National Government Service	558,000	562,000
Local Government Service	736,000	728,000
Total in Civil Employment	22,989,000	23,053,000

The largest percentage increases, as compared with 1955, were in building and contracting (1.29 per cent); local government service (1.09 per cent); distributive trades (.69 per cent); and transport and communications (.53 per cent). The biggest percentage decreases were in "other manufactures" (2.22 per cent); textiles (1.89 per cent); metals, engineering, and vehicle manufacture (1.35 per cent); agriculture (1.19 per cent); food, drink, and tobacco (.99 per cent); and national government service (.71 per cent).—(Ministry of Labour Gazette - Times - Daily Telegraph - Manchester Guardian)

A. BULGARIA. — Population Census.

Preliminary results of a population census held on Dec. 1, 1956, were published in Sofia in February. They showed that Bulgaria's population totalled 7,629,254, an increase of 599,905 since the previous (1946) census. It was pointed out that the actual rate of population increase had been higher than shown by the census figures, as considerable numbers of Bulgarian Jews had emigrated to Israel and Bulgarian Moslems to Turkey during the 10-year inter-censal period.

As a result of the growing industrialization of the country and the mechanization of agriculture, the proportion of urban to rural population showed a steady rise—33.47 per cent living in towns and 66.53 per cent in the countryside in 1956, compared with 25.85 per cent and 74.15 per cent respectively in 1946, and 23.31 per cent and 76.69 per cent respectively in 1934.

The three largest towns are Sofia, Plovdiv, and the Black Sea port of Varna.—(Bulgarian Legation Press Office, London)

A. BRITISH COMMONWEALTH. — Formation of British Commonwealth International Newsfilm Agency.

It was announced in London on Feb. 26 (*a*) that the B.B.C., the Rank Organization, the Canadian Broadcasting Corporation, and the Australian Broadcasting Commission had established a British Commonwealth International Newsfilm Agency Trust; and (*b*) that the Trust had in turn formed the British Commonwealth International Newsfilm Agency Ltd. to provide a service of international news films for subscribers anywhere in the world operating television services, producing cinema newsreels, or requiring newsfilm for other purposes. The Trust would ensure that the company remained under British control and that the newsfilm would be supplied "impartially and free of all restrictions as to the way it is to be cut or presented in the subscribers' individual newsreels or programmes." It was hoped that the Agency would eventually have a similar standing in television news to that which Reuters had in newspaper and sound radio news.

It was also announced that Mr. Kenneth Dick, formerly assistant head of the B.B.C.'s television news department, had been appointed managing-editor of the company, which would have its headquarters in London.

The members of the Trust will be Lord Radcliffe, as chairman; Sir Edward Benthall, a Governor of the B.B.C.; Sir Ian Jacob, Director-General of the B.B.C.; Mr. H. Carleton Greene, Director of Administration, B.B.C.; Mr. J. Arthur Rank, chairman of the Rank Organization; Mr. John Davis, managing director and deputy chairman of the Rank Organization; Mr. R. G. Leach, partner in Messrs. Peat, Marwick, Mitchell and Co., chartered accountants; and Mr. J. A. Ouimet, general manager of the C.B.C.

The directors of the company will be Mr. T. R. P. Hole (Editor, News Division, B.B.C.), Mr. C. McGivern (deputy Director of Television Broadcasting, B.B.C.), Mr. S. G. Williams (Controller of Television Administration, B.B.C.), Mr. K. Winckles (joint assistant managing director of the Rank Organization), Mr. H. Norris (joint managing director, J. Arthur Rank Overseas Film Distributors), Mr. A. I. Callum (of the Rank Organization), and Mr. W. H. Hogg (Chief News Editor, Canadian Broadcasting Corporation).

The names of the trustee for the Australian Broadcasting Commission, and the A.B.C.'s director in the company, will be announced later.

It was stated that the company's authorized share capital was £176,000, of which £128,000 had been issued £18,000 each to the B.B.C. and the Rank Organization, and £16,000 each to the A.B.C. and the C.B.C. The founder-members of the Trust had agreed that they would consider from time to time whether other British or Commonwealth concerns should be invited to subscribe for shares of the company.

The statement said that the founder-members, in creating the Newsfilm Agency, had been "actuated by the importance of ensuring in a world of rapidly expanding television services a supply of film of an impartial and unbiased nature from a British Commonwealth source."

The Agency started its operations on Feb. 26, with technicians and editors taken over from British Paramount News, and with 12 cameramen - two in Britain and 10 overseas. It was announced that the Agency would also use the existing facilities of C.B.C., A.B.C., and the Rank Organization overseas, and would employ "large numbers" of freelance cameramen and correspondents. It was intended that coverage should be comprehensive throughout the world except in the United States, where only the "biggest" events would be covered. (Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - Montreal Star)

B. PERU - BOLIVIA. — Joint Project for harnessing Waters of Lake Titicaca.

Agreements were signed in La Paz on Feb. 19 between the Peruvian and Bolivian Governments providing (1) for a joint survey of the possibilities of harnessing the waters of Lake Titicaca (the world's highest lake) for hydro-electric and irrigation purposes; (2) for the construction of a road between La Paz, the Bolivian capital, and Desaguadero, in Peru, each Government to finance its own section of the road; and (3) for the construction of pipelines to carry Bolivian oil to Peruvian ports.—(Bank of London and South America, Fortnightly Review - Manchester Guardian) **(Prev. rep. 7973 C.)**

C. DENMARK. — Expulsion of Soviet Diplomat.

It was announced in Copenhagen on Feb. 27 that the Danish Government had asked Captain Mikhail Rouditchev, the Soviet assistant naval attaché, to leave Denmark immediately. In a statement handed to the Soviet Ambassador, the Danish Foreign Ministry alleged that Captain Rouditchev had "tried in an irregular way to obtain secret information about Danish defences" and had thus shown "conduct incompatible with his diplomatic status and his continued presence in Denmark." (Berlingske Tidende, Copenhagen) **(Prev. rep. 15376 D.)**

D. JORDAN. — Termination of Anglo-Jordanian Treaty. - Jordanian Payments to Britain.

The Anglo-Jordanian treaty of 1948 was ended on March 13, when Notes to that effect were signed in Amman by the Jordanian Prime Minister, Mr. Suliman Nabulsi, and the British Ambassador, Mr. Charles Johnston. In addition to terminating the 1948 treaty, the Notes provided for (1) the withdrawal of all British troops from Jordan within six months; and (2) the purchase by Jordan of British-owned land, military buildings and installations, as well as British arms and stores in the country, against a payment of £4,250,000.

The first instalment payable by Jordan £1,250,000 will be due on May 1, while the other £3,000,000 will be settled in instalments of £500,000 on May 1 of each year during the next six years. Of the first instalment, however, Jordan will in fact remit only £652,000, the other £598,000 being set off against the £838,000 which Britain owed on the last subsidy payment to Jordan for February. The remaining £240,000 of the £838,000 owed by Britain will go into a fund which will be used by the U.K. Government (i) to meet claims by British officers and employees formerly in the service of the Jordanian Government, including compensation for the unexpected termination of their services for those who were summarily dismissed from their posts, such as General Sir John Glubb; (ii) in payment for certain goods and services provided by Britain for the Jordanian Government.

In a speech at the signing ceremony Mr. Nabulsi paid tribute to the "friendly atmosphere," "sincere co-operation" and "good spirit" in which the negotiations had been conducted. He expressed the hope that, with the termination of the treaty, "an atmosphere of friendliness" would continue to prevail between the two countries "to their mutual benefit."

It was pointed out in the Press that the question of British loans for the economic development of Jordan had not been dealt with in the negotiations. (Times - Daily Telegraph) **(Prev. rep. 15340 A.)**

E. AVIATION. — Señor Binaghi elected President of I.C.A.O. Council. - Proposed Navigation Improvements in North Atlantic Region.

The Council of the International Civil Aviation Organization elected Señor Walter Binaghi (Argentina) as its President on Feb. 20 in succession to Dr. Edward Warner (U.S.A.),

Señor Binaghi (38) studied civil engineering at the University of Buenos Aires before entering the Argentine Air Ministry. He had been Argentina's permanent representative at ICAO since 1947, had served as chairman of the Air Navigation Commission since 1949, and had presided over the Assembly's eighth session in Montreal in 1954.

Dr. Warner, who had announced his intention to retire during the 1956 session of the ICAO Assembly at Caracas (see 15122 A), had served as President of the Council since the creation of the Organization in 1945.

The special Panel of Experts set up by the ICAO Council, in accordance with a resolution of the Caracas Assembly, published recommendations on Jan. 9, 1957, for future improvements in air navigation facilities in the North Atlantic Region.

The Panel noted that the main causes of the difficulties encountered were (*a*) the irregularity of fixed service communications between Gander, Greenland, Iceland, and Shannon-Prestwick; (*b*) the unreliability and overloading of air-ground communication channels; and (*c*) the inadequacy of position reports from aircraft in flight. For these reasons, the Panel recommended the improvement of communications by the introduction of the V.H.F. "forward scatter" technique and the establishment of new ground wave-stations.

The multilateral agreement on non-scheduled air services in Europe was signed on Jan. 23 by Italy and Sweden. The agreement had already been signed by 13 other countries: Austria, Belgium, Denmark, France, the German Federal Republic, Iceland, the Irish Republic, Luxemburg, the Netherlands, Norway, Spain, Switzerland, and Turkey. (International Civil Aviation Organization, Montreal) **(Prev. rep. 15281 A; 15122 A).**

F. BURMA. — 200-million Rupee Loan from India.

Under a financial agreement signed in New Delhi on March 12, the Government of India granted a loan of 200,000,000 rupees (£15,000,000) to the Government of Burma, bearing interest at 4½ per cent per annum and repayable in 24 half-yearly instalments starting on April 1, 1960. It was provided that, at the wish of the Burmese Government, any part of the loan amount could be paid either to Burma herself or to any other sterling area country.

A loan of 200,000,000 rupees had earlier been granted by India to Burma in October 1955, but the Burmese Government had not drawn any part of it during the stipulated period. (Indian High Commissioner's Office, London) **(14486 C.)**

A. INDIA. — General Election. - Party Manifestos.

Voting in India's second general election began on Feb. 24, and was scheduled to be completed on March 14 except in certain snow-bound regions of Himachal Pradesh and Uttar Pradesh, where it was expected that it would have to be postponed until the spring. Polling took place simultaneously for 494 of the seats in the *Lok Sabha* (House of the People) and for 2,906 seats in the State Legislatures. In Andhra Pradesh, although elections to the *Lok Sabha* were held as elsewhere, the 196 members of the former Andhra Legislative Assembly elected in March 1955 retained their seats; in the Telengana area, however, which had been transferred from Hyderabad to Andhra Pradesh under the States Reorganization Act, 105 members were due to be elected to the State Assembly. In Kashmir it was proposed to hold elections in March for a new Legislative Assembly which would select the State's six representatives in the *Lok Sabha*.

Since the previous general election in 1951-52, the electorate had risen from 173,200,000 to 193,129,024. Apart from the natural increase of the population, two causes contributed to this rise. In 1951 some 2,800,000 women had been omitted from the electoral registers, as they had refused to give their own names and had insisted on being enrolled as a certain man's wife or daughter; this prejudice, however, had since been overcome through the co-operation of women's organizations, and almost all women qualified to vote were included in the registers. In West Bengal, thousands of displaced persons from East Pakistan who had been registered as Indian citizens since 1951 were included in the electoral rolls, under a Bill passed by the *Lok Sabha* on Sept. 7, 1956.

The voting procedure was the same as that followed in the previous election—a distinctive symbol being allotted to each party or candidate, and the voter being required to place his ballot-paper, without marking it, in the ballot-box bearing the symbol of the candidate of his choice. For the purpose of allocation of symbols, the Election Commission recognized only the four parties which had received more than 3 per cent of the total votes in the previous election as "all-India parties": viz., the National Congress, the Praja Socialist Party, the Communist Party, and the *Jan Sangh*, their symbols (respectively two yoked bulls, a hut, ears of corn and a sickle, and a lamp) being reserved for them exclusively. Eleven other parties (including the Scheduled Castes Federation, the Hindu Mahasabha, the *Ram Rajya Parishad*, the *Ganatantra Parishad*, and the Peasants' and Workers' Party) which had received over 3 per cent of the votes in certain States were recognized as "State parties," and distinctive symbols were reserved for them in the States concerned.

Strict precautions were taken to avoid impersonation and, as in the previous elections, voters were marked on one finger with indelible ink to prevent them from voting twice. In addition, the political parties had been asked to submit names of persons included in the electoral registers whom they believed to be dead or absent. In urban constituencies, where the possibility of impersonation had been found to be greater than in rural areas, voters were required to sign or place their thumbprints against their names before being issued with ballot papers.

Summaries of the election manifestos of the leading parties, and of recent internal developments in certain of the parties, are given below.

Congress Party.

The Congress Party's manifesto, written by Mr. Nehru, was published on Dec. 29 and was approved on Jan. 6 by the 62nd session of the National Congress, meeting at Indore. It reaffirmed the party's aim of "a fully Socialist order of society giving freedom, welfare, and equality of opportunity to all," and stated that "the revolution in India can only be completed when the political revolution is followed by an economic as well as a social revolution." Socialism, it emphasized, involved not only changes in economic relations, but also the abandonment of "old ideas about privilege on the basis of birth or caste or class or money or the hierarchy of office." The objects of the economic plan were that there should be "no exploitation and no monopolies," that "disparities in income should be progressively lessened," and that "a national minimum in the general standard of living" should be established, "so that everyone has the necessities of life and the opportunity for education, for maintaining health, and for productive work."

The rapid growth of heavy industry was essential [the manifesto continued] "if we are to industrialize our country and not be dependent on others," but this must be balanced by small-scale and cottage industries. No nationalization of existing private industries was intended, "except where such is considered necessary in terms of planning or where they occupy a strategic position in the economy of the country." Private industry would be encouraged, but always in the context of the plan. Economic help from any friendly source would be welcomed, but the principal burden of finding the necessary resources for the plan would inevitably fall upon the people of India. It should be spread in such a way as to fall on those best able to bear it, and with this object in view the system of taxation was being reconstructed.

The manifesto advocated the progressive introduction of ceilings on land holdings and the encouragement of intensified methods of cultivation on a co-operative basis, and called for a 30 per cent increase in food production by the end of the Second Five-Year Plan. Effective action should be taken to improve the economic position and social status of landless workers, including extended opportunities for work, the introduction of minimum wages, and housing schemes. In industry the manifesto expressed support for the progressive participation of workers in management, the elimination of unemployment, and the settlement of labour disputes by peaceful and co-operative methods.

The manifesto emphasized the importance of moral values and the maintanance of high standards in public as well as in private life, declaring that "those who lead the people in various parts of the country have to set an example." It deprecated "provincialism," but recommended guarantees for religious and linguistic minorities which would enable them to play their full part in the national life; reiterated the party's aim of establishing a casteless society; and advocated the progressive introduction of prohibition in those parts of India where it was not yet in force.

In international affairs the manifesto reaffirmed India's support for the "Five Principles" (*Panch Sila*), its policy of friendship and co-operation with all countries, and its avoidance of military pacts and alliances. On the Goa question it declared that it was impossible for India to "tolerate a colonial *enclave* in any part of its territory," but that attempts would continue to solve the question by peaceful methods. India would also adhere to peaceful methods in its attempts to achieve a solution of the Kashmir question. Support was expressed for the admission of Communist China to the United Nations, and attempts to deal with the Asian and African countries "in the old colonial way" were condemned.

Praja Socialist Party.

The Praja Socialist Party's manifesto, issued on Dec. 28, condemned the "increasing trends towards authoritarianism in the Government and the Congress," as a result of which, it alleged, the Government's authority was being "freely used to further party ends." To ensure "a self-government broadening down from the higher to lower levels," it called for a "complete overhaul of the administration, above all at the lower levels," involving a wide increase in the powers and resources of local government bodies. Redistribution of the land, with a ceiling on holdings, should be carried out through the Village Councils. Other measures advocated for the benefit of the peasantry included the encouragement of co-operative marketing, credit, and development societies; the introduction of crop insurance; and a policy of price support. Industrial workers should be guaranteed the rights of association and collective bargaining, and the right to strike. Trade unions and factory committees should be granted a status as leading organs of planning, production, and development, and should be entrusted with responsibility for operating and extending the social services.

The manifesto proposed the nationalization of banks, mines, the mineral oil industry, large plantations, and wholesale and foreign trade in selected commodities. It also proposed that an Economic Civil Service, drawn from trained workers, technicians, independent businessmen, and Government servants, should be established to run the State enterprises as "a model of efficiency, honesty, and economic democracy," and that all possible assistance should be offered to small and medium private enterprises. The burden of the taxes needed to check inflation should be placed on big business; a graduated annual tax on wealth and capital gains should be introduced, together with taxation of excess profits; and the privy purses of the Princes should be abolished and their personal income and property made subject to the general tax laws of the land. Tax evasion should be dealt with as "a crime of the highest order."

On foreign policy, the manifesto said that an attempt should be made to settle all differences with Pakistan in a friendly spirit, but that "firm and even stern action" should be taken if the flow of refugees was not stopped. It condemned the Government's "inflexible opposition to popular efforts" to settle the Goa problem, and expressed regret that in the cases of Hungary, Algeria, and other peoples struggling for independence the Government had preferred "expediency to the claims of freedom and justice."

Communist Party.

The Communist Party's manifesto, published on Jan. 3, agreed with the objectives of the Five-Year Plan, but maintained that they could not be realized under the Government's major proposals. It demanded that priority should be given to heavy and basic industries, that all these industries should be in the State sector, and that the location of industries in general should be such as to ensure the development of economically backward areas. The demand for more consumer goods should be met by maximum utilization of the capacities of existing industries and by encouragement of small-scale and cottage industries. The manifesto continued: "The Communist Party recognizes that, in the present stage of our development, patriotic-minded Indian capitalists can make an important contribution toward the economic development of our country. The party desires that Indian industries should be protected against foreign competition, that all legitimate rights of capitalists should be ensured, and that their active co-operation should be secured for implementing the plan of national reconstruction."

The manifesto proposed that a ceiling should be imposed on exports of profits and on the profits of all large industries and commercial concerns; and that the excess should be taken over as a compulsory loan which, together with the reserves of large companies, should form a "national development pool" to be invested in the State and private sectors in accordance with national needs. The State should have a monopoly of foreign trade in the principal commodities, and State trading inside India should also be developed,

Heavier taxation should be imposed on profits and capital gains, and a ceiling imposed on personal and family incomes. The payment of compensation to large landlords should be postponed, and the Princes' privy purses should be abolished and their hoarded wealth requisitioned as a compulsory loan.

The manifesto demanded an immediate 25 per cent increase in wages, pending the establishment of a national minimum wage. In the field of agriculture, all land holdings exceeding a fixed area, together with all Government-owned cultivable waste land should be distributed among poor peasants and agricultural labourers. The peasants should be guaranteed fair prices, and agricultural workers a minimum wage. Education up to the age of 14 should be free and compulsory, and adequate provision should be made for technical and scientific education.

In addition, the manifesto called for the abolition of Upper Houses in the State Legislatures; wide powers for the States, especially in the field of finance; separation of the judiciary from the Executive; and the introduction of proportional representation in all elections. It also urged the repeal of the Preventive Detention Act, and restriction of the powers of the police to resort to shooting and *lathi* charges. The Communist Party approved the main features of the Government's foreign policy, but demanded the severance of relations with the Commonwealth and "effective intervention" in the Goa question. It advocated the establishment of friendly relations with Pakistan and an increase in trade, cultural, and other relations between the two countries. In conclusion, the manifesto condemned "the tendency of the ruling party to equate the interests of the State and the nation with its own partisan interest," and appealed for unity of "all democratic parties and elements."

The tone of the manifesto reflected the policy adopted at the party's fourth congress, held at Palghat from April 18-29, 1956. This congress approved the views of Mr. P. C. Joshi, the party's former general secretary and leader of its moderate wing, who was elected to the Central Committee after a period in which he had held no party office. The political resolution adopted by the congress approved many aspects of the Government's foreign and economic policy, and promised to support any Government which would carry out a minimum programme of reforms. The general secretary, Mr. Ajoy Ghosh, said after the congress that the party's membership had grown from 90,000 to 125,000 since 1954.

In an article published on Nov. 22, Mr. Ghosh stated that the Communist Party was "determined to abandon" the attitude of "idealizing everything in the Soviet Union" which it had adopted in the past. One of its "gravest failings," he admitted, had been its failure to act in accordance with the principles that "Socialism will be realized in each country through a movement which, while basing itself on the principles which are common to all countries, also recognizes the specific features and traditions of each country," and that "the Socialist society itself will reveal a variety of forms." The party believed in the possibility of achieving Socialism in India "without resort to violence and civil war," and was working to attain this end. The events in Hungary, he added, had revealed "the enormity of the mistakes, misdeeds, and even crimes committed by the Government of Hungary both in the internal sphere and in its relation to the U.S.S.R."

Jan Sangh.

The *Jan Sangh's* manifesto, published on Dec. 31, called for the annulment of partition and the restoration of "undivided India" (*Akhand Bharat*), to be achieved not by force but by "psychological change." While India and Pakistan remained separate, however, India should apply the provisions of the Constitution to Kashmir, "liberate" the Pakistani-occupied areas of Kashmir, demand territory from Pakistan for resettling Hindu refugees, and introduce compulsory military training. "Police action" should also be taken for the "liberation" of the Portuguese settlements in India.

The manifesto advocated the establishment of "a new economic order" in which economic power should not be allowed to be centralized in a few hands or the State given unlimited power. Maximum and minimum salaries of Rs. 2,000 and Rs. 100 a month, and maximum and minimum land holdings of 30 and 5 acres of irrigated land, should be fixed. Basic and defence industries should be nationalized, and industries mainly in foreign lands, such as tea, mining, coffee, and rubber, should be "Indianized." A compulsory loan should be imposed on multi-millionaires to provide capital for industrial development. Employees' contributions to State insurance should be abolished, provision made for the unemployed and the aged, and free medical aid introduced. Primary and secondary education should be free and compulsory, and free higher education provided for poor students. Other proposals included a reduction in indirect taxation and in Government expenditure; a maximum salary of Rs. 500 a month for Ministers; repeal of the Preventive Detention and Hindu Marriage and Succession Acts; and a ban on cow slaughter.

Hindu Mahasabha.

The All-India Hindu Mahasabha's manifesto, issued by its Working Committee on Dec. 16, advocated, *inter alia*, India's secession from the Commonwealth; the immediate introduction of military training in schools and colleges because of the "risk of aggression by Pakistan against India and Kashmir"; and a foreign policy of strict adherence to the basic principles of morality," avoiding any "kow-tow to the machinations of one powerful bloc." It denounced *Panch Sila* as "a crude attempt to cover up the cruelties and vagaries of a totalitarian Power intending to crush the freedom movement in Hungary," and said that there could be no peaceful co-existence "with naked aggression or blatant vandalism."

In economic affairs the Mahasabha called for a "progressive and dynamic" policy; the liquidation of unemployment by providing work or maintenance for the unemployed; the encouragement of large-scale co-operative farming; and the elimination of uneconomic holdings. It deprecated the "artificial fixation of ceilings on land holdings" while allowing "capitalists to own any number of properties in urban areas without fixing a maximum."

Socialist Party.

The Socialist Party was founded on Dec. 28, 1955, by a section of the left wing of the Praja Socialist Party which broke away under the leadership of Dr. R. M. Lohia, a former general secretary of the latter (see 14054 A). Its manifesto, issued on Jan. 13, 1957, demanded the nationalization of the iron and steel, engineering, sugar, textiles, cement, mining, electric power, and chemical industries, and of all foreign-owned industries and plantations. Maximum and minimum land holdings should be fixed, co-operative farming encouraged, and more land brought under cultivation. Differences of income should be narrowed down to a ratio of 10 to 1, which should progressively decrease as production increased, by means of a reduction in indirect and an increase in direct taxation. In both nationalized and privately owned enterprises, workers should be represented in the management and should be given a share of the profits. All restrictions on the right to strike and on peaceful picketing should be removed.

The manifesto also proposed that the Administration should be decentralized and "democratized" by increasing the powers of the Village and District Councils, which should be given control of the police, a share of the revenue, and powers of legislation and planning in certain fields.

The Council of the Moslem League adopted on Oct. 22 a resolution approving the Government's foreign and economic policies, but protesting against the refusal of Congress to recognize the Moslem League as "the political organization of the Moslems of India." In view of this fact, the Council decided not to support Congress in the elections but to put forward its own candidates in certain constituencies, and in other constituencies to support independent candidates and those of parties which were prepared to grant the League such recognition. (The Hindu, Madras - The Statesman, Calcutta - Times of India, Bombay - Indian High Commissioner's Office, London) **(Prev. rep. 1952 Elections, 12081 A; Congress, 14044 A; Praja Socialists and Communists, 14124 A; Jan Sangh, 14054 A.)**

A. HUNGARY - UNITED KINGDOM. — Expulsion of British Military Attaché in Budapest. - Hungarian Military Attaché expelled from Britain.

Budapest Radio announced on Jan. 18 that the British military attaché in Hungary, Colonel James Cowley, had been declared *persona non grata* and had been asked to leave the country within 48 hours.

The broadcast alleged that Colonel Cowley had maintained "active and direct contact with several leaders of the counter-revolution during the events of October"; that he had helped "the reactionary forces which came out against the interests of the Hungarian people"; that he had given "expert advice" to the "counter-revolutionary forces" on how to hide their arms and other equipment after those forces had been "subdued"; and that he had engaged in "extensive espionage operations."

The allegations against Colonel Cowley were strongly denied by the British Minister in Budapest (Mr. L. A. Fry) and by the Foreign Office in London, which pointed out that Colonel Cowley had returned to Britain some days earlier in the normal course of his duties. On Jan. 23 the British Government announced that the presence of the Hungarian military attaché in London (Lieut.-Colonel Bela Nagy) was "no longer desired in the United Kingdom," and gave him 48 hours to leave the country. (Times - Daily Telegraph - Manchester Guardian)

B. WESTERN GERMANY. — Charlemagne Prize.

It was announced in Aachen on March 10 that the Charlemagne Prize for 1956 would be awarded to M. Spaak, the Belgian Foreign Minister and Secretary-General designate of the North Atlantic Treaty Organization. The prize, consisting of a silver medal, a certificate, and 5,000 Deutschemarks (about £420), is awarded annually by the City of Aachen for services to the cause of European unity. Sir Winston Churchill was last year's recipient.—(Frankfurter Allgemeine Zeitung) **(Prev. rep. 14875 A.)**

C. VENEZUELA. — Canberra Bombers purchased from Britain. - $10,000,000 Order for English Electric Co.

It was announced on Feb. 4 that the Venezuelan Government had placed a $10,000,000 order (over £3,500,000) with the English Electric Company for *Canberra* jet bombers (Mark-VIII and Mark-IV) for the Venezuelan Air Force, together with spares. The machines will be powered by Rolls-Royce *Avon* engines (deliveries beginning in 1957), and Venezuelan ground crews will be trained in England.—(Times) **(14991 C.)**

A. BRAZIL. — New Federal Capital (Brasilia).

A law was signed by President Kubitschek on Sept. 20, 1956, authorizing the Federal Government to take preliminary measures for transferring the capital of Brazil from Rio de Janeiro to a new site in the interior of the country, situated in the State of Goiás. The name Brasília was chosen for the new Federal capital.

The law provided for (1) the creation of a joint-stock company, the *Companhia Urbanizadora da Nova Capital do Brasil* (CUNCB), with a share capital of 500,000,000 cruzeiros, wholly subscribed by the Federal Government; (2) the construction of a transport and communications system to connect the future capital with other parts of the country, including roads linking the new city with São Paulo and Belo Horizonte; and (3) the installation of the necessary administrative services in the new capital.

Shares may be acquired from the Federal Government by public institutions and other official and semi-official bodies but may only be resold to the Federal Government, which must always own a minimum of 51 per cent of the capital. All buildings and services required by the Federal Government will be erected by the company free of charge to the Government. It was subsequently announced that the CUNCB had decided to launch a loan of 700,000,000 cruzeiros to defray the initial expenses connected with the construction of Brasília.

It was announced from Rio in February that the State of Goiás had sold an area of 1,500 square kilometres (380,000 acres) of land to the Federal Government for the sum of 18,000,000 cruzeiros, the land representing about one-quarter of the future area of Brasília and its surrounding Federal District. On the occasion of the signing of the transfer deed, President Kubitschek announced his intention of inaugurating the new capital within 3½ years, and stated that the preparatory work was well advanced. He announced also that he would inaugurate the new airport at Brasília (which will be the biggest in Brazil) within a few weeks, and that he intended to inaugurate the Presidential palace in the new capital in February 1958. Tenders for a master-plan for Brasília—on which some 60 prominent architects and town-planners will be engaged—were opened on March 10.—(Bank of London and South America, Fortnightly Review) **(Prev. rep. 8549 B.)**

B. RHODESIAN FEDERATION. — Proposed Sale of State Cotton Industry to Private Enterprise.

The Federal Ministry of Commerce and Industry announced on Feb. 2 that the Federal Government had decided to throw the Central African cotton industry open to private enterprise, and to sell its Gatooma mills and processing plant to a suitable purchaser.

"It is now thought," the announcement said, "that the pioneering stage in the industry is over, and that this Government enterprise should give way to private enterprise." The Government had therefore made three decisions affecting the future of the cotton industry: (1) the processing capacity of the Gatooma mills would not be increased; (2) the Government would consider making arrangements for any private spinner to open a spinning factory in competition with Gatooma, with access on competitive terms to the Federation's cotton crop; (3) so long as the industry was safeguarded the Government was prepared to sell the Gatooma plant if a satisfactory offer was made, on condition that the interests of the cotton industry, including textile manufacturers who had relied on Gatooma for their supplies, were protected.

The Gatooma mills were established by the Southern Rhodesian Government in 1948 and have been the foundation of the Federation's textile industry.—(Federal Information Department, Salisbury) **(Prev. rep. Denationalization of Steel Industry, 15423 D; 15279 B.)**

C. BENELUX. — First Meeting of Consultative Inter-Parliamentary Council.

The first meeting of the Benelux "Parliament"—the "Consultative Inter-Parliamentary Benelux Council"—was held in Brussels on Feb. 22 under the chairmanship of M. van Cauwelaert, Belgian Minister of State and a member of the Belgian Chamber of Representatives.

The Council, which consists of 49 members representing the three countries (20 each from Belgium and the Netherlands and nine from Luxemburg), will advise the three Governments on problems arising out of their co-operation in Benelux, especially the furtherance of all measures which would help toward the realization of full economic union between them. The Council will also deal with cultural relations, co-operation in foreign policy, and the unification of the laws in the three member-countries.—(La Nation Belge - Netherlands News Agency) **(Prev. rep. Benelux, 15323 A.)**

D. UNITED KINGDOM.—Beckenham and Newcastle By-elections. - Seats held by Conservatives.

Polling took place on March 21 at Beckenham and Newcastle-upon-Tyne North, both seats being held by the Conservatives. The Beckenham by-election was caused by the conferment of a peerage on Mr. Patrick Buchan-Hepburn (now Lord Hailes), the former Minister of Works, and the Newcastle by-election by the elevation to the peerage of Major Gwilym Lloyd-George (now Viscount Tenby), the former Home Secretary—see 15313 A. Results were as follows:

Beckenham.

Goodhart, Philip (Conservative)	29,621
Sandelson, Neville (Labour)	17,445
No change. Conservative majority	12,176

Figures at the general election were: P. G. T. Buchan-Hepburn (C.) 38,614, C. F. A. Culling (Lab.) 17,377—Conservative majority, 21,237.

The Conservative candidate received 62.9 per cent of the votes in the by-election and the Labour candidate 37.1 per cent, compared with respective percentages of 69 and 31 at the general election. The Conservative proportion of the poll thus dropped by 6.1 per cent and the Labour proportion rose correspondingly. Of the total electorate of 73,516 (an increase of 339 since the general election), 64 per cent went to the poll, compared with 76.5 per cent at the general election.

Newcastle North.

Elliott, Robert (Conservative)	19,017
MacDonald, Thomas (Labour)	12,555
No change. Conservative majority	6,462

Figures at the general election were: Major G. Lloyd-George (L. and C.) 25,236, B. Chisholm (Lab.) 14,303—Liberal and Conservative majority, 10,933. Major Lloyd-George stood as a Liberal and Conservative candidate.

The Conservative candidate received 60.2 per cent of the votes in the by-election and the Labour candidate 39.8 per cent, compared with respective percentages of 63.8 and 36.2 at the general election. The Conservative proportion of the poll thus dropped by 3.6 per cent and the Labour proportion rose correspondingly. Of the total electorate of 49,240 (a decrease of 1,715 since the general election), 64.1 per cent went to the poll, compared with 77.6 per cent at the general election.

Mr. Philip Goodhart (31), a journalist on the staff of the *Sunday Times*, is the son of Dr. A. L. Goodhart, Master of University College, Oxford, and formerly Professor of Jurisprudence in the university. Though his father is an American by birth, Mr. Goodhart is a British citizen and served with the Parachute Regiment in the war. Mr. Robert Elliott (37) is a farmer at Morpeth, Northumberland.—(Times - Daily Telegraph) **(Prev. rep. By-elections, 15408 A.)**

E. RUMANIA. — General Election.

General elections were held in Rumania on Feb. 3 for a new Grand National Assembly of 487 members—one for every 40,000 electors. As in the last (1952) elections, a single list was presented by the People's Democratic Front (the Rumanian Workers' party and affiliated trade union, agricultural, and youth organizations) and no opposition parties were permitted. It was officially announced in Bucharest (*a*) that 11,593,690 voters (99.2 per cent of the electorate) had gone to the polls; (*b*) that 11,424,521 (98.9 per cent) had cast their votes for the candidates of the People's Democratic Front; (*c*) that 115,880 votes had been cast against the P.D.F. lists; (*d*) that 13,289 ballots were invalid; and (*e*) that 67 of the newly-elected deputies belonged to national minorities in Rumania.

The elections were carried out under the electoral law of 1952 (see 12708 A), which, however, had been amended by the former Assembly by abolishing the clause which had excluded from the franchise all "former landowners, industrialists, business magnates, *kulaks*, and war criminals."
(Agerpres, Bucharest) **(Prev. rep. Elections, 12703 A.)**

F. JAPAN. — Cultural Agreement concluded with German Federal Republic.

A cultural agreement between Japan and the German Federal Republic was signed in Tokio on Feb. 14. The agreement was the seventh of its kind to be concluded by Japan in recent years, similar agreements having been signed with France, Italy, Siam, Mexico, India, and Brazil.
(Japanese Embassy Press Office, London)

G. ETHIOPIA - VATICAN. — Diplomatic Relations.

It was announced in Addis Ababa on March 19 that diplomatic relations had been established between Ethiopia and the Holy See at legation level.—(Times)

A. UNITED KINGDOM. — Railways. - The Transport (Railway Finances) Bill. - Government Loans up to £250,000,000 to meet Railway Deficits. - Parliamentary Approval and Enactment. - Progress of Fifteen-year Rail Modernization Plan.

Mr. Watkinson, the Minister of Transport and Civil Aviation, announced in the House of Commons on Oct. 25, 1956 that, after carefully considering the financial position of British Railways, the Government had decided to make available to the British Transport Commission loans up to a limit of £250,000,000 to cover the annual deficits in railway operation, which were expected to continue until 1961 or 1962. The loans, which were intended to cover the period until the beneficial effects of the railway modernization plan began to be felt, would be repayable after a period to be specified and would carry interest, but for a limited period this interest would be covered by an additional special advance, which would also be repaid in due course.

A White Paper explaining the Government's proposals and embodying a memorandum on railway policy, prospects, and finances, submitted by the Commission to the Minister of Transport, was published on the same day under the title: *The British Transport Commission: Proposals for the Railways.*

Stressing the Government's belief that the Transport Acts of 1953 and 1956 "provided the right framework in which the transport industry should operate," the White Paper maintained that in organization, purpose, and status the B.T.C. today resembled a large-scale commercial corporation which had "to a large extent inherited the position in which it finds itself." For 30 years, it pointed out, the railways had been unable to undertake any large scheme of modernization, or even to keep up an adequate replacement programme. Although it was intended to remedy this state of affairs by the present modernization plan, the railways would continue meanwhile to suffer from poor equipment, whilst at the same time remaining liable to severe competition which limited their ability to impose higher charges without driving away profitable traffic.

Higher charges would therefore not offer a satisfactory or lasting solution of the Commission's dilemma. Moreover, it remained the Government's view that every effort to avoid continued cycles of price increases was essential in order to break the inflationary spiral, and that therefore any general increases in railway charges should be avoided if at all possible. On the other hand the national interest required the railways' future to be assured, for as carriers of passengers over long distances and of suburban passengers in large numbers to and from work, as well as carriers of bulk freight, they were essential and would continue to be so as long as could be foreseen. The Government therefore shared the Commission's view that the rate of railway investment in 1957 should be increased to about £120,000,000, with further increases in later years.

The Government also considered that the Commission, in its memorandum (see below), had clearly shown that it could overcome past handicaps within a reasonable time and provide the country with a modern and up-to-date transport system which would pay its way. It would, however, inevitably take time to overcome "decades of under-investment" and to achieve the "planned revolution of the railway system," the immediate problem being to find a satisfactory basis for the Commission's finances in the intervening period. The alternatives facing it were either to carry substantial, though diminishing, annual deficits until 1961 or 1962; or to place on the heavy bulk traffics substantial additional charges which, even if they could be imposed without driving further traffic off the railways, would be a serious addition to industrial costs. The Government considered that it would be against the broad national interest to adopt the second alternative, and accepted the Commission's view that in the long run it would be unsound commercially.

This did not mean [the White Paper went on] that the Commission should not impose selective increases in its charges, and if it was to overcome its present financial difficulties it was vital that it should be able to take advantage of the freedom which the Government had given it to vary its charges in accordance with sound commercial principles. Equally, the Government believed that the Commission's passenger services should be run at reasonably remunerative rates wherever possible, and this might involve fare adjustments in certain areas. Apart, however, from selective increases of this kind, the Government hoped that general increases in freight charges and fares might be avoided, although the Commission could not be expected to hold this position if faced with further increases in costs which were not counterbalanced by improved efficiency and output.

In conclusion, the White Paper stated that the Government agreed with the Commission's view that the railways would in due course be able, not only to pay their way, but to earn an adequate surplus, and believed that it would be financially sound to provide the Commission with the further finance it required to achieve this result.

The memorandum submitted by the Commission to the Minister of Transport explained that the Commission believed that the "considerable saving and additional revenue" expected to result from the railway modernization plan would enable the accumulated deficit (estimated to amount to £120,000,000 by Dec. 31, 1956) to be wiped out and the present annual loss to be converted to a profit by 1960 or 1961. A summary of the memorandum is given below under cross-headings:

The Financial Position of the Railways.

The memorandum stressed that the rehabilitation of the railways was "a matter not of rescuing a moribund concern from ruin, but of enabling an undertaking with a sound future to pass through a difficult period without being thrown into hopeless disarray." It pointed out that in every year of its existence the Commission had earned a working surplus, whilst in the first seven years its accounts had been "more or less in balance." In 1955, however, there had been a railway strike and many increased expenses, and this had been followed by a further deterioration in 1956. The present rate of deficit was about £45,000,000 and was steadily growing, the losses arising mainly on British Railways, but also on London Transport and inland waterways. To allow the budget to remain unbalanced and the deficit to accumulate, relying in effect upon an indefinite subsidy, would undermine financial discipline within the organization and be disastrous to its self-respect and urge towards efficiency, as well as to its relations with other parties. Moreover, the aggregate deficit would soon become unmanageable, and ultimately a default on the Commission's undertakings would be inescapable.

Four-Point Plan for Railway Reorganization.

After pointing out, as illustrating the railways' importance in the national economy, that the Southern Region alone carried almost as many passengers annually as the total of "Class I" railroads in the U.S.A., the memorandum recalled that the Commission's proposals to achieve profitable railway working included (1) modernization; (2) the elimination of redundant services and the utmost possible development of the remainder; (3) greater productivity; (4) the relaxation of statutory and similar obligations, and greater freedom in fixing fares and charges generally. The progress made under these heads was outlined as follows:

(1) *Modernization.* As part of the Commission's plans for replacing steam traction by electricity and diesel power, coaching stock was being redesigned to make it more attractive to passengers and there were being introduced (*a*) a new type of diesel train with high speed and special amenities; (*b*) diesel multiple-unit trains for stopping services; (*c*) small diesel rail-cars for rural areas. The main savings were expected to be achieved under (*b*), whilst the measures under (*a*) and (*c*) would lead to economies on suburban services and enhance the profitability of long-distance services. The Commission estimated that a total improvement of about £30,000,000 might eventually result from this reorganization of passenger services, whilst the financial improvement from freight service modernization might ultimately reach "at least £55,000,000 annually." Thus passenger and freight services together would show a total improvement of about £85,000,000.

The Commission stated that although expenditure on modernization might slightly exceed the £120,000,000 originally planned, there seemed no reason to alter the annual charge of £40,000,000 for interest. The "inevitable delay between sowing and reaping," however, would mean that during the first stage ending in 1960 or 1961—the financial charges on the borrowings, added to the inevitable costs of dislocation, "must be expected to exceed the improvements in revenue." After this period the Commission's finances would be strengthened by a rapidly increasing net benefit, which should amount to at least £70,000,000 by 1970. The memorandum stressed that "alongside physical improvement there must be a change in organization, methods, and outlook," adding that there were "already signs of a fresh outlook and a new determination which will be of decisive importance."

(2) *Elimination of Redundant Services.* Services to be withdrawn or under review included 20 to be withdrawn completely or in part in the London Midland Region and 20 now under review in the Western Region; where prospects were more hopeful, diesel traction would be substituted for steam. The withdrawal of unremunerative services should yield a net saving of about £3,000,000 a year by 1962 (when the process should be about completed), and it was hoped that the reorganization would lead to an expansion of traffic.

(3) *Greater Productivity.* It was expected that the Commission's plans for improving productivity by mechanization and work study would bring an improvement in net revenue of over £5,000,000 a year by 1962.

(4) *Fixing of Fares and Charges.* After recalling that the full commercial freedom in fixing fares and charges, which it had asked for when submitting its last fare increase proposals, had been appreciably restricted by an interim decision of the Transport Tribunal, the Commission estimated that "a less restricted and more aggressive selling policy, with such alterations in fares and charges as may be feasible within the ambit of charging policy," might bring a total improvement of £20,000,000 a year by 1961-62.

Discussing charges' policy in general, the Commission emphasized that it was essential that it should be free to adjust its charges to meet rising costs and also to make local or selective increases where justified. It believed, however, that for the near future "the wiser policy to pursue would be one of price restraint, in the knowledge that the result of this policy and the goodwill it would bring would substantially improve the railways' position within the next few years and protect permanently the whole scope of their business."

The Position of London Transport.

London Transport was responsible for about £15,000,000 of the Commission's present annual deficit; although certain local adjustments had been made recently, "in future current costs must be met by the current level of fares," as there was no real prospect of financial improvement except by increasing fares.

Anticipated Results of Proposed Remedial Measures.

Provided that the proposed remedial measures were given a proper chance to fructify, the Commission estimated that, after charging all remuneration on capital borrowings (except interest on deficits), its net revenue account would again be in balance in 1961 or 1962, whilst by 1970 there would be an annual surplus of nearly £50,000,000. For the next few years, however, the rise in yield from the measures would lag behind the interest charges on the new capital works involved, and total revenue was not likely to cover interest charges in full. The memorandum pointed out that a commercial concern faced with a similar position would probably ask its shareholders to forego remunerationon their capital during reconstruction. The Commission possessed ample cover (both of revenue and of capital) to justify dealing with the situation in this way, its balance sheet at Dec. 31, 1955 being "of great inherent strength in spite of the accumulated deficit." It could not do so, however, since it was financed by fixed interest capital which must continue to be serviced.

The expected change-over from a deficit to a substantial surplus by 1970 was illustrated in the following table :

	Dec. 31 1956 £	1961 or 1962 £	1970 £
Annual rate of deficit at starting point (i.e. excluding finance of modernization plan)	40,000,000	40,000,000	40,000,000
Add : Interest on modernization borrowings	2,000,000	25,000,000	40,000,000
Total : Initial Deficit and Interest on Borrowings	42,000,000	65,000,000	80,000,000
Improved contributions from British Railways			
(*a*) Modernization ..	—	35,000,000	85,000,000
(*b*) Pruning of Services	—	3,000,000	3,000,000
(*c*) Improved Productivity	—	5,000,000	10,000,000
(*d*) Freedom of charging	—	20,000,000	25,000,000
		63,000,000	123,000,000
Improved contributions from the Commission's other activities	—	5,000,000	5,000,000
Total of Improved contributions ..	—	68,000,000	128,000,000
Less : Deficit as above	42,000,000	65,000,000	80,000,000
Position as result of proposals : (surplus +, deficit −)	- £42,000,000	+£3,000,000	+£48,000,000

These figures did not provide for interest on accumulated deficits, which, at 5 per cent, would amount to about £6,000,000 a year in the deficit at the end of 1956, rising to about £20,000,000 for 1961 or 1962, and falling again to about £10,000,000 for 1970.

Stressing that the "satisfactory prospects" shown above were dependent on railway modernization, the memorandum explained that the movement cost of a multiple-unit diesel train was only about one-third of that of a steam stopping train (which had a movement cost of about 10s. a mile). It added that the financial expectations of the modernization plan "had not been falsified by any of the development projects tackled since 1954."

In conclusion the memorandum emphasized that "there is ample cover for an operation by which the Commission's revenue account, during the next few years of reconstruction, would be relieved temporarily of the obligation to meet the exceptional charges (partly of a quasi-capital nature, partly legacies from the past) falling on it during this time." The Commission, it stated, urgently recommended the adoption of some financial plan which, while avoiding subsidy, would place its organization on a sound basis during the critical years of reconstruction. It expressly requested, however, that "any relief temporarily accorded in relation to immediate obligations should be strictly limited in time and amount."

The House of Commons gave an unopposed second reading on Dec. 3, 1956 to the Transport (Railway Finances) Bill, which provided (*a*) for Government loans not exceeding a total of £250,000,000 to meet railway deficits and for a temporary extension of the purposes for which the B.T.C. might borrow money; (*b*) for the temporary modification of the Commission's statutory duty to secure that its revenue was sufficient to meet revenue charges.

Under the Bill the Commission may receive from the Minister of Transport special advances from the Consolidated Fund to meet any deficit on revenue account incurred by British Railways in any year between 1956 and 1962, less any surplus on revenue account of the remainder of the Commission's undertaking. The Commission may also receive similar special advances to meet interest payable on these advances, for a period of up to five years from the end of the year in which each advance was made, but no advance to meet interest would be available after 1964. The Bill required the Commission to begin repaying the special advances not later than in the seventh year after that to which the advance related, and thereafter as directed by the Minister of Transport, though it did not preclude the Commission from repaying the advances earlier.

The Bill was given a third reading on Dec. 13, 1956, and, after passing through the House of Lords (second reading, Feb. 7, 1957) was enacted on Feb. 26, 1957.

Progress of Railway Modernization Plan.

Sir Brian Robertson, chairman of the B.T.C., announced on March 6, in the course of a review of the progress of the 15-year modernization plan announced in 1955 (see 14024 A), that the first of the regular 100 m.p.h. trains provided for in the plan were expected to come into service on the London-Manchester, London-Birmingham (Snow Hill), and London-Bristol routes by 1958, and would reduce the journey times by at least 20 minutes. The construction of five diesel-electric *de luxe* trains for these routes had been approved; they would provide a Pullman-type service, with meals served at every seat.

Sir Brian explained that the plan was "gathering pace rapidly," with signs that the major electrification projects might be completed "well before 1970," and that it might be possible to undertake additional electrification—e.g. the present plan to electrify from London to York might be extended to Edinburgh. During 1957 there would be a big increase in multiple-unit diesel trains and 1,000 coaches would be put into service, whereas there were only 450 such coaches in use at the end of 1956. Important developments in 1957 would include (*a*) suburban schemes in the Manchester and Birmingham areas; (*b*) the replacement of steam trains by multiple-unit diesels on the London-Tonbridge-Hastings route; (*c*) new "inter-city" services from Edinburgh and Glasgow to Birmingham and Swansea-Cardiff-Birmingham.

Over a third of the £1,200,000,000 to be spent under the 15-year plan, Sir Brian continued, was already committed to developments in progress or authorized, including £92,000,000 for electrification, £33,000,000 for diesel main-line and shunting locomotives, £32,000,000 for diesel multiple-unit trains, and £46,000,000 for major works such as track widening, new junctions, and station and depot reconstruction schemes. The Commission hoped that work completed in 1957 would exceed that completed in 1956 by 50 per cent, with a still greater increase in 1958.

The main features of the 1957-58 programme were summarized as follows :

Electrification. Expenditure would total about £7,500,000 in 1957 and £11,500,000 in 1958. Work would begin in 1957 and finish in 1958 on the Colchester-Clacton-Walton lines, which would be used as a proving ground for the new standard high-voltage overhead system (see page 14999). Preliminary work had begun on the Liverpool Street-Enfield-Hertford-Bishop's Stortford suburban line (scheduled for completion in 1960) and on the Manchester-Crewe line. About £1,500,000 would be spent on "stage one" of the Glasgow suburban electrification and about £7,000,000 on "stage one" of the extension of Southern Region electrification, covering the lines from Gillingham, Maidstone East, and Sevenoaks to Sheerness, Margate, Ramsgate, Folkestone, and Dover. Both these electrifications were expected to be completed by 1962.

Other Civil Engineering Works. These would include (*a*) "flyovers" to enable through trains to by-pass congested junctions at three important points on the main line from Euston northwards; (*b*) new lines (primarily built for freight traffic) at Stratford-on-Avon, Edinburgh, in the South Wales industrial area, and between York and Northallerton; (*c*) further modernization of goods depots and marshalling yards; (*d*) station improvements at Birkenhead, Chichester, Coventry, Crawley, Gatwick, Leeds (City), Liverpool (James St.), Macclesfield, Manchester (London Rd.), Port Talbot, Stoke, Sunderland, and the Bank station of the Waterloo and City Railway.

Rolling Stock. Deliveries were expected in 1957-58 of 20 electric and over 160 diesel main-line locomotives, 500 diesel shunters, over 100,000 freight and service vehicles, and over 13,000 road-rail containers. In addition, 200,000 freight vehicles would be built or would be converted to continuous braking.

Discussing the effect of petrol rationing on railway receipts, Sir Brian stated that since November, 1956, railway passenger traffic had increased by over one-fifth. It had been fortunate that alterations to London stations with heavy "commuter" traffic had been completed to the extent where 10-car trains were possible, and further work was now in hand at Cannon Street to enable 12-car trains to be accommodated by mid-1958. There had also been a big increase in freight traffic, and the greater use of continuous-braked freight trains had led to a notable improvement in transit time. The Commission hoped that the railways would be able to retain the additional traffic they were now carrying, and believed that new charging arrangements (based on the actual cost of carrying the goods rather than on their value, as at present) coming into force on July 1, 1957 would "free them from the clutter of archaic restrictions which has hampered them in the past," and enable them to handle business on a more competitive basis.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

A. UNITED KINGDOM - CANADA - UNITED STATES. — Revision of U.S. and Canadian Loan Agreements. - Provisional 1956 Interest Payments returned to U.K. Gold and Dollar Reserves.

Mr. Thorneycroft, the Chancellor of the Exchequer, announced in a parliamentary written answer on March 6 that agreement had been reached with the U.S. and Canadian Governments for a revision of the U.S. and Canadian loan agreements of 1945 and 1946. Under the revised terms the existing provision for a waiver of interest, which Britain had sought to invoke for 1956, had been superseded by new arrangements. These would allow the U.K., if she found it necessary in view of the present and prospective conditions of international exchange, and the level of her gold and foreign exchange reserves, to defer payment of up to seven annuities, including both capital and interest, until after the year 2000 (i.e. the end of the present schedule of payments).

The main provisions governing the eventual repayment of any deferred annuity payments—which are of approximately $176,000,000 per annum— were :

(1) The first of the seven deferred instalments would have to be paid on Dec. 31, 2001, and the others would be paid annually thereafter, in order.

(2) In addition, the instalment of interest for 1956 was deferred in lieu of any right of waiver hitherto existing. This instalment would have to be paid on Dec. 31 of the year following that in which the last of all other instalments was due.

(3) Deferred instalments would bear interest at two per cent p.a., payable on Dec. 31 of each year following that in which deferment occurred.

(4) Payment of deferred instalments might be accelerated, in whole or in part, at the British Government's option.

In connexion with the new arrangements, the British Government gave an assurance that it would not be their intention to avail themselves of the major part of the potential deferments in the years immediately succeeding the date of the agreement.

Mr. Thorneycroft said that the U.K. Government regarded the agreements as " fulfilling in a satisfactory manner the aim that appropriate modifications of the language of the existing agreements should be made to carry out the spirit of their original intention." The new agreements were subject to the approval of the U.S. Congress and the Canadian Parliament, but no legislation was required in the U.K. Parliament to ratify the agreements, which would be presented to Parliament in a White Paper.

The Chancellor continued : " Under the new arrangements H.M. Government will pay all the annuities in full and with interest even if it claims any deferments. No question can therefore arise of any default in our obligations. Furthermore, a potential source of misunderstanding between the Canadian and U.S. Governments and the British Government is removed. While H.M. Government have the right to defer any annuity within the limits stated, it is their responsibility to satisfy themselves before doing so that such a deferment is necessary in the light of the conditions."

The original agreements concluded with the U.S.A. and Canada provided for loans of $3,750,000,000 from the U.S.A. and $1,250,000,000 from Canada. So far Britain has repaid to the U.S.A. $350,000,000 of the principal and $506,000,000 in interest, and to Canada $88,000,000 of the capital and $138,000,000 in interest; these figures include the interest instalment of $104,000,000 which was paid into special accounts on Dec. 31, 1956, pending a decision on the British request for a waiver, and which will now be returned to the U.K.'s gold and dollar reserves.

An important feature of the original agreements was the provision that in certain defined circumstances the U.K. Government should be entitled to a cancellation of the interest element of the annuities payable in the years 1951 to 2000 by way of amortization of the credits. In the American loan agreement the conditions laid down to secure the waiver were : (i) the U.K. Government were to find that a waiver was necessary in view of the present and prospective conditions of international exchange and the level of their gold and foreign exchange reserves; (ii) the International Monetary Fund was to certify that the U.K.'s income from exports and net invisible transactions was less on the average over the five preceding calendar years than was sufficient to buy the pre-war average annual amount of imports into the U.K., due adjustment being made for changes of price; (iii) the aggregate of the releases or payments of sterling balances accumulated by oversea non-colonial official holders was to be reduced in proportion to the reduction on the annuity which the waiver of interest involved.

In order to obtain a waiver under the Canadian agreement, a waiver had to be obtained under the American agreement—the latter containing a similar requirement in respect of the Canadian loan.

It was pointed out in the British press that the main effects of the revised agreements would be (*a*) that the U.K. would find it far simpler in future to arrange a postponement of the annual payments than hitherto; (*b*) that the decision would now rest entirely with the U.K.; and (*c*) that all the complex and abstruse calculations of British exports by the International Monetary Fund, and other complicated effects on holders of sterling balances, had been removed.

The arrangement completed the Government's recent efforts to strengthen the gold and dollar reserves. Together with the drawing of $561,000,000 from the I.M.F. in December, the " stand-by " arrangement for a further $739,000,000, and the agreement with the Export-Import Bank for a $500,000,000 line of credit signed on Feb. 28, the transfer back to the reserves of the $104,000,000 will bring total reinforcements, both actual and potential, to some $1,904,000,000 an amount almost equivalent to a doubling of the reserves. -(Times - Daily Telegraph - Financial Times) **(Prev. rep. 15416 D; 15307 A; 15239 A; U.S. Loan Agreement, 7605 A; Canadian Loan Agreement, 7769 A.)**

B. SOVIET UNION. — Repatriation of Deported Caucasian and Kalmuck Peoples. - Restoration of Autonomous Republics.

A decree for the repatriation to the Caucasus and Lower Volga regions of five minority peoples whose wholesale deportation had been ordered by Stalin in 1943-44, on the ground that they had collaborated with the Germans, was approved on Feb. 11 by the Supreme Soviet. The nationalities concerned were the Balkar, Chechen, Ingush, and Karachai peoples formerly living in the mountains of the Northern Caucasus, and the Kalmucks formerly living in the steppe between the Volga and the Caspian Sea. The five peoples —of whom the Kalmucks are Buddhists and the four Caucasian peoples Moslems—had been deported *en masse* during the war to Kazakhstan and other areas in Central Asia.

The Secretary of the Presidium of the Supreme Soviet (M. Gorkin) described the wartime deportation of the above-mentioned peoples as a " gross violation of the fundamental principles of Soviet national policy." He announced (1) that the repatriation of the Balkars, Kalmucks and Karachais would be completed during 1958; (2) that the repatriation of the Chechen and Ingush peoples, because of their larger numbers, would not be completed until 1960; (3) that citizens of the nationalities concerned who wished to remain in their present homes would be allowed to do so. M. Gorkin pointed out that the repatriation would necessarily take several years since it would involve the provision of housing, industries, and cultural amenities, and large outlays of money and materials. In view of this, the repatriation programme would be organized in small groups according to a definite timetable and procedure.

It was also announced that the Soviet Government had decided to revive the former Autonomous Republics which were abolished or merged with other areas when the Caucasian and Kalmuck peoples were deported. The Kabardino-Balkar, Chechen-Ingush, and Kalmuck Autonomous Republics would accordingly be restored (most of these areas had been merged with the Soviet Republic of Georgia), while the Karachais would be merged with the neighbouring Cherkess minority to form an autonomous Karachai-Cherkess *oblast* (province).

No figures were given of the numbers to be repatriated. According to the 1939 census, the total population of the five nationalities was about 750,000, divided as follows : Chechens 408,000, Kalmucks 134,000, Ingushes 92,000, Karachais 76,000, Balkars 43,000.

The repatriation decree did not affect two other large minority groups deported during the war for alleged large-scale collaboration with the Germans—viz., the Volga German community, numbering about 500,000, who were deported to Tajikistan and other parts of Central Asia in 1941-42; and the Crimean Tartars, numbering some 200,000, who were resettled in Siberia.

In his speech to the 20th congress of the Soviet Communist Party, made in February 1956, M. Khrushchev had described the deportation of the above-mentioned minority peoples as " monstrous " (see page 14995, first column) and had attributed the responsibility to Stalin.—(Soviet Weekly - Le Monde, Paris Times - Manchester Guardian - New York Times)

C. URUGUAY. — New Chairman of National Council of Government. - Ministerial Changes.

In accordance with the Uruguayan Constitution, Señor Arturo Lezama became chairman of the National Council of Government on March 1 for the year 1957-58 (ending Feb. 28, 1958) in succession to Dr. Zubiria, who had held that office in 1956-57.

It was also announced in Montevideo that Dr. Ledo Arroyo Torres, who had earlier succeeded Dr. Malet as Minister of Finance, had resigned that portfolio and had been succeeded by Dr. Amilcar Vasconcellos, previously Minister of Livestock and Agriculture. The latter portfolio was taken over by Señor Joaquin Aparicio.—(Bank of London and South America, Fortnightly Review) **(Prev. rep. 14939 A; 14762 A.)**

MARCH 23—30, 1957

A. MIDDLE EAST. — Israeli Withdrawal from Gaza Strip and Gulf of Akaba. - Political Developments.

The Israeli forces in the Gaza Strip and the Sharm-el-Sheikh area (the west coast of the Gulf of Akaba) were withdrawn on March 6-7, after the Foreign Minister of Israel (Mrs. Meir) had informed the U.N. General Assembly on March 1 that Israel was prepared to withdraw completely from these areas on the basis of certain assumptions and assurances. The Gaza Strip and the Sharm-el-Sheikh area were taken over by the U.N. Emergency Force simultaneously with the Israeli withdrawal, and an Egyptian Civil Governor was subsequently appointed for the Gaza Strip. Developments since the General Assembly's resolution of Feb. 2 (see page 15357) are summarized below under cross-headings.

Dr. Hammarskjöld's Report to General Assembly. - Implied Rejection of Israeli Request for Guarantees. - Warning against Imposition of Sanctions on Israel.

The Israeli representative at the U.N. (Mr. Eban, who is also Ambassador in Washington) presented an *aide-mémoire* to Dr. Hammarskjöld on Feb. 6 asking (1) for an assurance that Egypt would agree to "mutual and full abstention of all belligerent acts by land, sea and air" after the complete withdrawal of Israeli troops; and (2) whether, on the withdrawal of Israeli forces from the Sharm-el-Sheikh area, "the U.N. Emergency Force will be so deployed as to ensure freedom of navigation in the Straits of Tiran and the Gulf of Akaba until a permanent and agreed arrangement has been reached."

In a report submitted on Feb. 11 to the General Assembly, Dr. Hammarskjöld in effect rejected the Israeli request for an assurance of non-belligerency by Egypt before Israel withdrew behind the armistice lines. He pointed out, however, that any attempt by the General Assembly to impose "collective measures" (i.e. sanctions) against Israel might only introduce "new elements of conflict" into the situation.

Referring to the *aide-mémoire* presented by Mr. Eban, the U.N. Secretary-General said that he had asked Mr. Eban "whether, with regard to Gaza, it is understood by the Government of Israel that the withdrawal must cover elements of administration as well as military forces." [This referred to the civilian administration set up by Israel in the Gaza Strip.] Clarification of this point, Dr. Hammarskjöld added, was "pre-requisite to further consideration of the Israeli *aide-mémoire*." As regards the second point raised by Mr. Eban, the General Assembly's resolutions had made it clear that UNEF units could only be stationed on the Gulf of Akaba with Egyptian consent. In this connexion Dr Hammarskjöld said that he (the Secretary-General) considered it important "to learn whether Israel itself consents in principle to the stationing of UNEF units on its territory," in view of the fact that the Assembly's resolutions stipulated that the UNEF should be stationed "on the armistice demarcation line."

"Thus [Dr. Hammarskjöld continued] it is still an open question whether Israel . . . accepts full implementation of the resolution which requires the withdrawal from the Gaza Strip of Israel's civil administration and police, as well as of its armed forces. Further, it is still an open question whether Israel accepts the stationing of the UNEF on its side of the armistice line . . . Israel's request for an assurance from Egypt concerning the cessation of belligerent acts has been put forward while Israel itself, by continued occupation, maintains a state of belligerency which, in the case of Gaza, it has not indicated its intention fully to liquidate."

The report went on to make the following points: (1) the U.N. resolutions were designed at ensuring "progress toward the creation of peaceful conditions in the area"; (2) as an initial step to this end, the resolutions required Israel to withdraw her forces behind the armistice lines; (3) thereafter, the resolutions required both Egypt and Israel to observe the armistice agreement scrupulously, so that each party would have "security and freedom from fear of attack by the armed forces of the other." As regards the last point, Dr. Hammarskjöld stated that the Egyptian Government had "reaffirmed its intention to observe fully the provisions of the armistice agreement" and its "desire to see an end to all raids and incursions across the armistice line in both directions."

The report continued: "The relationship between the resolutions on withdrawal and on measures to be carried out after withdrawal affords the possibility of informal explorations of the whole field covered by the resolutions, preparatory to negotiations. Later, the results of such explorations may be used in negotiations . . . toward the peaceful conditions sought. However, such explorations cannot be permitted to invert the sequence between withdrawal and other measures, nor to disrupt the evolution of negotiations toward their goal . . . Peaceful conditions in the Middle East must be created in the interest of all countries in the region and of the world community. The basic principles of the Charter must be asserted and respected in the same interest. Neither one of these imperative demands can be met at the expense of the other. The fulfilment of the one will make it easier to meet the other, but . . . adherence to principle and law must be given priority and cannot be conditional. In the present case, efforts to meet the two requirements stated have so far been frustrated . . ."

In conclusion, Dr. Hammarskjold commented as follows on the question of enforcing U.N. resolutions: "The Charter has given the Security Council means of enforcement and the right to take decisions with mandatory effect. No such authority is given to the General Assembly, which can only recommend action to member-governments, which, in turn, may follow the recommendations or disregard them. This is also true of recommendations adopted by the General Assembly within the framework of the 'Uniting for Peace' resolution. However, under that resolution the General Assembly has certain rights otherwise reserved to the Security Council. Thus it can, under that resolution, recommend collective measures. In this case, also, the recommendation is not compulsory.

"It seems, in this context, appropriate to distinguish between recommendations which implement a Charter principle, which in itself is binding on member-States, and recommendations which, although adopted under the Charter, do not implement any such basic provision. A recommendation of the first kind would have behind it the force of the Charter, to which collective measures recommended by the General Assembly could add emphasis without, however, changing the legal character of the recommendation A decision on collective measures referring to a recommendation of the second kind, although likewise formally retaining its legal character, would mean that the recommendation is recognized by the General Assembly as being of such significance to the efforts of the U.N. as to assimilate it to a recommendation expressing an obligation established by the Charter. If, in some case, collective measures under the 'Uniting for Peace' resolution were to be considered, these and other important questions of principle would require attention. This may also be said of the effect of such steps which, while supporting efforts to achieve peaceful solutions, may perhaps, on the other hand, be introducing new elements of conflict."

Mr. Dulles's Memorandum to Israel. - Statement of U.S. Policy on Gaza and Gulf of Akaba. - Counter-Proposals by Israeli Government.

The U.S. Secretary of State, Mr. Dulles, presented a memorandum to Israel on Feb. 11—in the form of a U.S. policy statement, previously approved by President Eisenhower—which (1) urged her to withdraw "promptly and unconditionally" from the Gaza Strip so that the future of the area could be worked out by "the efforts and good offices of the United Nations"; and (2) upheld the right of free navigation by all nations in the Gulf of Akaba, called upon Israel to withdraw from the entrance to the Gulf, and said that the U.S.A. was prepared to join with other countries to secure the right of "free and innocent passage" in the Gulf. It also called for the entry of the U.N. Emergency Force into the Gaza and Sharm-el-Sheikh areas after the withdrawal of Israeli forces. The memorandum was worded as follows:

"With respect to the Gaza Strip, it is the U.S. view that the General Assembly has no authority to require of either Egypt or Israel a substantial modification of the Armistice Agreement, which gives Egypt the right and responsibility of occupation. Accordingly, we believe that Israeli withdrawal from Gaza should be prompt and unconditional, leaving the future of the Strip to be worked out through the efforts and good offices of the United Nations. We recognize that the area has been a source of armed infiltration and reprisals . . . and is a source of great potential danger because of the presence there of so large a number of Arab refugees. Accordingly, we believe that the U.N. Emergency Force should move into this area and be on the boundary between Israel and the Gaza Strip.

"With respect to the Gulf of Akaba and access thereto, the U.S.A. believes that the Gulf constitutes international waters and that no nation has the right to prevent free and innocent passage in the Gulf and through the Straits giving access thereto . . . In the absence of some overriding decision to the contrary, e.g. by the International Court of Justice, the United States, on behalf of vessels of U.S. registry, is prepared to exercise the right of free and innocent passage and to join with others to secure general recognition of this right. It is of course clear that the enjoyment of free and innocent passage by Israel would depend upon its prior withdrawal in accordance with the U.N. resolutions. The United States has no reason to assume that any littoral State would under these circumstances obstruct the right of free and innocent passage. The U.S.A. believes that the U.N. Emergency Force should move into the Straits area as the Israeli forces are withdrawn . . ."

In its reply (Feb. 15) the Israeli Government welcomed "the affirmative approach of the United States to the question of free navigation in the Gulf of Akaba and the Straits of Tiran," but emphasized that there were still no guarantees that Egypt would not reimpose the blockade in the Gulf after the Israeli withdrawal, or utilize the Gaza Strip as a base for future aggressive action against Israel. The Israeli *aide-mémoire* stressed the fact that Egypt continued to regard herself as in a state of war with Israel, and that she had defied the United Nations for five years by banning Israeli shipping from the Suez Canal. The *aide-mémoire* was worded as follows:

". . . The Government of Israel is conscious of the danger which would arise to the freedom of Israeli shipping in the Gulf and to peace in the area if Egypt were to resume occupation of the Straits of Tiran before a settlement. For many years Egypt has maintained restrictions in the Suez Canal contrary to the Convention of 1888 and to the

decisions of the Security Council. These policies, together with corresponding restrictions in the Gulf of Akaba, have cut Israel off from her freedom of commerce with large parts of the world; have inflicted enormous losses and burdens upon Israel's economy; and have constituted a danger to peace and security in the Middle East.

"Despite the disapproval of the United Nations and of the maritime community, including the U.S.A., no effective steps were taken to ensure the termination of these practices. Recent expressions of Egyptian policy give ample grounds for the belief that, if no preventive measures are taken, the Egyptian restrictions in the Gulf of Akaba and the Straits of Tiran will be resumed, with consequent peril both to Israel's national interests and to peace in the area.

"To meet this danger, Israel supports the suggestion that UNEF should move into the Straits as Israeli troops withdraw. But it holds that these units should be stationed along the western coast of the Gulf of Akaba until a peace settlement is achieved, or until an agreed and permanent arrangement for freedom of navigation is secured. Failing such an arrangement for the stationing of UNEF, the Government of Israel suggests that a precise guarantee be afforded for the specific protection of Israel-bound shipping exercising rights of passage in the Straits and the Gulf.

"The Gaza Strip, occupied during the invasion of 1948, was never Egyptian territory. The Armistice Agreement under which Egypt occupied the Strip was continuously broken by Egypt. In violation of the U.N. Charter and of the decision of the Security Council against belligerency, Egypt conducted hostile acts against Israel. These actions were based on a doctrine of 'a state of war' with Israel which Egypt still declines to relinquish, despite the fact that this doctrine and any actions arising therefrom were repudiated by the Security Council in 1951. In these circumstances there is no basis for the restoration of the *status quo ante* in Gaza by the return of Egypt to an area which she used exclusively for the purpose of establishing an aggressive base against Israel.

"Israel's stand on the Gaza question is influenced by three problems:

(1) The security of Israel, and especially that of its villages and settlements in the south and the Negev;

(2) The welfare and economic situation of the local population;

(3) The problem of the refugees.

"Israel is prepared to make a supreme effort to help raise the standard of the residents of the area from the fearful poverty which grew increasingly disastrous during the Egyptian occupation. She is prepared to make a contribution to a U.N. programme for settling the refugee population of the Gaza Strip. Israel's contribution, within this framework, will consist both in the payment of compensation and in the settlement of a part of the refugee population of Gaza.

"In view of the vital importance of the Gaza problem and of the contribution envisaged by Israel toward its solution, it is suggested that an effort be made to find a suitable arrangement which might be submitted to the United Nations . . . The steps immediately envisaged are the withdrawal of Israeli forces and the discussion of a suitable relationship between the U.N. and the local and Israeli administrative services. Israel believes that it is necessary to prevent a recurrence of the turbulent conditions out of which the recent hostilities arose . . .

"While no context of withdrawal arises in the case of the Suez Canal, the Government of Israel emphasizes its hope for U.N. support in securing Israel's rights under the 1888 Convention. The U.N. has devoted great effort to the clearance of the Suez Canal for navigation . . . It is inconceivable that the Canal can be opened by the U.N. and remain closed to any of its member-States . . ."

In a statement on Feb. 17 from Thomasville (Georgia), where he was on holiday, President Eisenhower said that the U.S. Government believed that Israel had been provided "with the maximum assurances it can reasonably expect at this juncture or that can be reconciled with fairness to others." The President appealed to Israel to withdraw from Gaza and the Gulf of Akaba "in accordance with the repeated demand of the United Nations," and to "rely on the resoluteness of all friends of justice to bring about a state of affairs which will conform to the principles of justice and international law and serve impartially the proper interests of all in the area." He added that this "should provide a greater source of security for Israel than an occupation continued contrary to the overwhelming judgment of the world community."

The President's statement was issued after consultation with Mr. Dulles and Mr. Cabot Lodge (U.S. permanent representative at the U.N.), both of whom had flown to Thomasville for talks with the President. Mr. Dulles had had several meetings with Mr. Eban during the previous week.

U.S. Congressional Opposition to Sanctions against Israel. - Statements by Senate Republican and Democratic Leaders.

Prior to the developments described above, Mr. Dulles had stated at a press conference on Feb. 5 that the U.S. Government would give "very serious consideration" to economic sanctions against Israel if the General Assembly called for them. This statement was strongly criticized by Senator William F. Knowland (Republican leader in the Senate), who demanded that the U.S.A. should not support U.N. sanctions against Israel unless the General Assembly was also prepared to take similar action against the U.S.S.R. for persistently ignoring the U.N. resolutions condemning Soviet aggression in Hungary. To punish Israel while "sidestepping the larger aggression" of the Soviet Union in Hungary, Senator Knowland declared, would be both "immoral" and "unsupportable," and would mean the application of a "double standard."

In a further statement on Feb. 7, Senator Knowland pointed out that nations which had demanded "speed" in condemning Britain, France and Israel for their action in Egypt had "abstained from voting on the resolutions aimed at stopping Soviet aggression in Hungary." He added: "Nations which failed to show the slightest interest in applying either moral or economic sanctions against the Soviet Union, which has failed to respect any of the ten resolutions passed on the Hungarian issue, now urge sanctions against Israel, which has at least partially conformed to the U.N. resolutions relative to the Middle East.

Senator Lyndon B. Johnson (the Democratic leader in the Senate) sent a letter to Mr. Dulles on Feb. 19 saying that he had been "disturbed" by press reports that "serious consideration is being given in the U.N. General Assembly to imposing economic sanctions against Israel." He added: "The U.N. cannot apply one rule for the strong and another for the weak; it cannot organize its economic weight against the little State when it has not previously made even a pretence of doing so against the large States. I have seen no suggestions in the U.N. of the application of economic sanctions against the U.S.S.R. Israel has in large part complied with the directives of the United Nations; Russia has not even pretended to be polite . . ."

After pointing out that one of the root causes of tension in the Middle East had been "the hostile activity against Israel on the part of Egypt from the Gaza Strip and the threat of [hostile] activity in the Gulf of Akaba," Senator Johnson wrote: "I think it is not unreasonable for Israel to request guarantees by the U.N. that these attacks against her will not once more be prevalent, once she has withdrawn her troops from these two areas. Yet I have seen no suggestion in the U.N. that economic sanctions should be applied against Egypt to force that State to agree to permanent cessation of hostile activities from those areas."

The Senate Democratic Policy Committee, meeting on Feb. 19, unanimously approved Senator Johnson's letter to the Secretary of State and called upon President Eisenhower to resist any United Nations attempt to impose sanctions upon Israel.

President Eisenhower's Discussions with Senate Leaders. - The President's Broadcast. - Renewed Appeal to Israel to withdraw from Gaza and Gulf of Akaba. - Support for U.N. "Pressure" on Israel.

President Eisenhower, who had flown back to Washington from Georgia, had a conference at the White House on Feb. 20 with 26 Republican and Democratic senators, headed respectively by Senator Knowland and Senator Lyndon Johnson. Vice-President Nixon, Mr. Dulles, and Mr. Cabot Lodge were also present at the talks. Both Senator Knowland and Senator Johnson reiterated their opposition to U.N. sanctions against Israel, and re-stated the positions of their parties on this question. Senator Knowland also presented a memorandum urging that the U.S.A. should not take part in U.N. sanctions against Israel unless sanctions were also imposed on the Soviet Union, India, and Egypt for non-compliance with the U.N. resolutions on Hungary, Kashmir, and the Suez Canal respectively.

In a subsequent press statement, Senator Knowland again denounced the "double standard of morality" in the United Nations whereby sanctions were envisaged against Israel, a small nation, but no such action was contemplated against the U.S.S.R. for its aggression in Hungary; against India for having annexed Kashmir in defiance of the U.N.; or against Egypt for her five-year defiance of the Security Council's resolution calling upon her to open the Suez Canal to Israeli shipping. He disclosed that his memorandum (in the form of a proposed resolution to be submitted by the U.S.A. to the General Assembly) contained the following points: (1) the Assembly should reaffirm that all member-States were obliged under the Charter to refrain from aggression and respect the Assembly's resolutions; (2) economic, diplomatic, and moral sanctions should be applied against any member-State, "large or small," failing to comply with U.N. resolutions within 30 days of their adoption; (3) the Assembly should call on Israel to withdraw from the Gaza Strip and the Gulf of Akaba, and these areas should be administered by the U.N. "until (*a*) a majority of the members of the General Assembly determine that international peace and order would be served by their withdrawal, or (*b*) a treaty of peace is entered into between Egypt and Israel, whichever is sooner"; (4) a neutral belt, to be patrolled by UNEF, should be established between Israel and her Arab neighbours until the armistice agreements were superseded by a peace treaty."

After the meeting between the President and the Congressional leaders, it was announced from the White House that the President would make a sound and television broadcast the same evening (Feb. 20) "on the present situation in the Middle East and the refusal of Israel to withdraw its forces." The President spoke as follows in this broadcast:

". . . In the four months since I talked to you about the crisis in that area [the Middle East] the United Nations has made considerable progress in resolving some of the difficult problems. We are now, however, faced with a fateful moment as the result of the failure of Israel to withdraw its forces behind the armistice lines as contemplated by the U.N. resolutions on this subject . . . When I talked to you last October [see page 15210] I pointed out that the U.S.A. fully realized that military action against Egypt resulted from grave and repeated provocations. But I said also that the use of military force to solve international disputes could not be reconciled with the principles and purposes of the United Nations. I added that our country could not believe that resort to force and war would for long serve the permanent interests of the attacking nations, which were Britain, France and Israel . . .

" Since that time much has been achieved and many of the dangers implicit in the situation have been avoided. Britain and France have withdrawn their forces from Egypt. Thereby they showed respect for the opinions of mankind as expressed almost unanimously by the 80 members of the United Nations. I want to pay tribute to the wisdom of this action of our friends and allies. They made an immense contribution to world order. Also they put the other nations of the world under an obligation to see to it that these two nations do not suffer by reason of their compliance with U.N. resolutions This has special application, I think, to their treaty rights to passage through the Suez Canal . . .

" The Prime Minister of Israel, in answer to a personal communication, assured me early in November that Israel would willingly withdraw its forces if and when there should be created a U.N. Force to move into the Suez Canal area. This Force was, in fact, created and has moved into the Canal area. Subsequently, Israeli forces were withdrawn from much of the territory of Egypt which they had occupied. However, Israeli forces still remain outside the armistice lines. They are at the mouth of the Gulf of Akaba, which is about 100 miles from the nearest Israeli territory. They are also in the Gaza Strip which, by the armistice agreement, was to be occupied by Egypt. These facts create the present crisis.

" We are approaching a fateful moment when either we must recognize that the U.N. is unable to restore peace in this area, or the U.N. must renew with increased vigour its efforts to bring about the Israeli withdrawal. Repeated but so far unsuccessful efforts have been made to bring about a voluntary withdrawal by Israel. These efforts have been made by the U.N., the U.S.A., and other member-States. Equally serious efforts have been made to bring about conditions designed to ensure that if Israel will withdraw in response to the repeated requests of the U.N., there will then be achieved a greater security and tranquillity for that nation. This means that the U.N. would assert a determination to see that in the Middle East there will be a greater degree of justice and compliance with international law than was the case prior to the events of last October and November.

" A U.N. Emergency Force, with Egypt's consent, entered that nation's territory in order to help maintain the cease-fire which the U.N. called for on Nov. 2. The Secretary-General, who ably and devotedly serves the U.N., has recommended a number of measures which might be taken by the U.N. and its Emergency Force to assure for the future avoidance by either side of belligerent acts. The General Assembly, by an overwhelming vote, adopted on Feb. 2 a pertinent resolution. It was to the effect that, after full withdrawal of Israel from the Gulf of Akaba and Gaza, the UNEF should be placed on the Egyptian-Israeli armistice lines to assure the scrupulous maintenance of the armistice agreement. Also the General Assembly called for the implementation of other measures proposed by the Secretary-General; these embraced the use of UNEF at the mouth of the Gulf of Akaba, so as to ensure non-belligerency in the area. The United States was a co-sponsor of this resolution [and] thus sought to ensure that Israel would, for the future, enjoy its rights under the armistice and under international law.

" In view of the valued friendly relations which the United States has always had with Israel, I wrote to Prime Minister Ben-Gurion on Feb. 3. I recalled his statement to me of Nov. 8 to the effect that Israeli forces would be withdrawn under certain conditions, and I urged that, in view of the General Assembly resolutions of Feb. 2, Israel should complete the withdrawal. However, the Prime Minister, in his reply, took the position that Israel would not evacuate its military forces from the Gaza Strip unless Israel retained the civil administration and the police. This would be in contradiction to the armistice agreement. Also, the reply said that Israel would not withdraw from the Gulf of Akaba unless freedom of passage was assured.

" In a further effort to meet the views of Israel in these respects, Secretary of State Dulles, at my direction, gave to the Government of Israel on Feb. 11 a statement of U.S. policy. It pointed out that neither the U.S.A. nor the U.N. had authority to impose upon the parties a substantial modification of the armistice agreement, which was freely signed by both Israel and Egypt. Nevertheless, the U.S.A., as a member of the U.N., would seek such disposition of the U.N. Emergency Force as would assure that the Gaza Strip could no longer be used as a source of armed infiltration and reprisals. The Secretary of State orally informed the Israeli Ambassador that the U.S.A. would be glad to urge and support also some participation by the United Nations, with the approval of Egypt, in the administration of the Gaza Strip . . .

" With reference to passage into and through the Gulf of Akaba, we expressed the conviction that the Gulf constitutes international waters and that no nation has the right to prevent free and innocent passage in the Gulf. We announced that the U.S.A. was prepared to exercise this right itself and to join with others to secure general recognition of this right.

" The Government of Israel has not yet accepted as adequate insurance of its own safety after withdrawal the far-reaching U.N. resolution of Feb. 2, plus the important declaration of U.S. policy made by our Secretary of State on Feb. 11. Israel seeks something more. It insists on firm guarantees as a condition to withdrawing its forces of invasion.

" This raises a basic question of principle. Should a nation which attacks and occupies foreign territory in the face of U.N. disapproval be allowed to impose conditions on its own withdrawal? If we agree that armed attack can properly achieve the purposes of the assailant, then I fear we will have turned back the clock of international order. We will, in effect, have countenanced the use of force as a means of settling international differences and through this gaining national advantages. I do not myself see how this could be reconciled with the U.N. Charter. The basic pledge of all members of the U.N. is that they will settle their international disputes by peaceful means and will not use force against the territorial integrity of another State.

" If the U.N. once admits that international disputes can be settled by using force, then we will have destroyed the very foundation of the Organization, and our best hope of establishing a world order. That would be a disaster for us all. I would, I feel, be untrue to the standards of the high office to which you have chosen me if I were to lend the influence of the United States to the proposition that a nation which invades another should be permitted to exact conditions for withdrawal.

" Of course, we and all the members of the U.N. ought to support justice and conformity with international law. The first Article of the Charter states the purpose of the U.N. to be 'the suppression of acts of aggression or other breaches of the peace and to bring about by peaceful means, and in conformity with justice and international law, adjustment or settlement of international disputes.' But it is to be observed that conformity with justice and international law are to be brought about by 'peaceful means.' We cannot consider that the armed invasion and occupation of another country are 'peaceful means' or proper means to achieve justice and conformity with international law.

" We do, however, believe that upon the suppression of the present act of aggression and breach of the peace, there should be a greater effort by the U.N. to secure justice and conformity with international law. Peace and justice are two sides of the same coin. Perhaps the world community has been at fault in not having paid enough attention to this basic truth. The U.S.A., for its part, will vigorously seek solutions of the problems of the area in accordance with justice and international law. And we shall in this great effort seek the association of other like-minded nations which realize, as we do, that peace and justice are in the long run inseparable.

" But the U.N. faces immediately the problem of what to do next. If it does nothing, if it accepts the ignoring of its repeated resolutions calling for the withdrawal of invading forces, then it will have admitted failure. That failure would be a blow to the authority and influence of the U.N. in the world, and to the hopes which humanity places in the U.N. as the means of achieving peace with justice.

" I do not believe that Israel's default should be ignored because the U.N. has not been able effectively to carry out its resolutions condemning the Soviet Union for its armed suppression of the people of Hungary. Perhaps this is a case where the proverb applies that two wrongs do not make a right. No one deplores more than I the fact that the Soviet Union ignores the resolutions of the United Nations. No nation is more vigorous than is the U.S.A. in seeking to exert moral pressure against the Soviet Union, which by reason of its size and power, and by reason of its veto in the Security Council, is relatively impervious to other types of sanction. The U.S.A. and other free nations are making clear by every means at their command the evil of Soviet conduct in Hungary. It would be indeed a sad day if the United States ever felt that it had to subject Israel to the same type of moral pressure as is being applied to the Soviet Union.

" There can, of course, be no equating of a nation like Israel with one like the Soviet Union. The people of Israel, like those of the United States, are imbued with a religious faith and a sense of moral values. We are entitled to expect, and do expect, from such peoples of the free world a contribution to world order which unhappily we cannot expect from a nation controlled by atheistic despots.

" It has been suggested that the U.N. actions against Israel should not be pressed because Egypt has in the past violated the armistice agreement and international law. It is true that both Egypt and Israel, prior to last October, engaged in reprisals in violation of the armistice agreements. Egypt ignored the U.N. in exercising belligerent rights in relation to Israeli shipping in the Suez Canal and the Gulf of Akaba. However, such violations constitute no justification for the armed invasion of Egypt by Israel which the U.N. is now seeking to undo.

" Failure to withdraw would be harmful to the long-term good of Israel. It would, in addition to its injury to the United Nations, jeopardize the prospects of the peaceful solution of the problems of the Middle East. This could bring incalculable ills to our friends and, indeed, to our nation itself. It would make infinitely more difficult the realization of the goals which I set out in my Middle East message of Jan. 5 to Congress [see 15305 A] seeking to strengthen the area against Communist aggression, direct or indirect.

"The United Nations must not fail. I believe that, in the interests of peace, the U.N. has no choice but to exert pressure upon Israel to comply with the withdrawal resolutions. Of course, we still hope that the Government of Israel will see that its best immediate and long-term interests lie in compliance with the U.N., and in placing its trust in the U.N. resolutions and in the declaration of the U.S.A. with reference to the future.

"Egypt, by accepting the six principles adopted by the Security Council last October in relation to the Suez Canal [see 15252 A], bound itself to free and open transit through the Canal without discrimination, and to the principle that the operation of the Canal should be insulated from the politics of any country. We should not assume that, if Israel withdraws, Egypt will prevent Israeli shipping from using the Suez Canal or the Gulf of Akaba. If, unhappily, Egypt does hereafter violate the armistice agreement or other international obligations, this should be dealt with firmly by the society of nations.

"The present moment is a grave one, but we are hopeful that reason and right will prevail. Since the events of last October and November solid progress has been made in conformity with the U.N. Charter. There is the cease-fire; the forces of Britain and France have been withdrawn; the forces of Israel have been partially withdrawn; the clearing of the Canal nears completion. When Israel completes its withdrawal it will have removed a definite block to further progress.

"Once this block is removed, there will be serious and creative tasks for the U.N. to perform. There needs to be respect for the right of Israel to national existence and internal development. Complicated provisions ensuring the effective international use of the Suez Canal will need to be worked out in detail. The Arab refugee problem must be solved. As I said in my message to Congress on Jan. 5, it must be made certain that all the Middle East is kept free from aggression and infiltration. Finally, all who cherish freedom, including ourselves, should help the nations of the Middle East to achieve their just aspirations for improving the well-being of their peoples."

The President's broadcast—which was widely regarded as a direct appeal to the American people over the heads of the Congressional leaders—was criticized by many prominent Americans, including ex-President Truman, Mr. George Meany (head of the A.F.L.-C.I.O., representing 15,000,000 American workers), and Democratic leaders.

Mr. Truman, while sympathizing with President Eisenhower in the difficult problems he had to face, said that the President had in effect outlined a policy of "we can't interfere with strong nations but we can make small ones behave." Mr. Meany said that any move for U.N. sanctions against Israel would be "a travesty of justice," and declared that American labour could not understand "how our country ever got manoeuvred into the impossible position" of siding in the Middle East with the Russian and Egyptian dictatorships, "which are the real threat to peace," against the democratic State of Israel.

Mr. Ben-Gurion's Reply to President Eisenhower. – Insistence on Guarantees for Israel in the Gaza Strip and Gulf of Akaba.

In a speech to the *Knesset* in Jerusalem on Feb. 21, Mr. Ben-Gurion reiterated that Israel would not withdraw from Gaza and the Gulf of Akaba without adequate guarantees for the free navigation of her shipping in the Gulf and the security of her territories contiguous to the Gaza Strip. The Prime Minister of Israel also replied to President Eisenhower's broadcast, his speech being as follows:

"Undoubtedly the United Nations is still far from perfect and we have grave and bitter complaints against it which are not confined to the last few days. But we will not on that account reject this great world organization. The vision which is personified in the U.N. is the vision of our Prophets, and the principles on which it is based are the principles of peace, justice, and equality among nations. These principles are no less precious to us than to any other people in the world . . .

"For the first time in eight years we have ensured freedom of passage for Israel and other nations in the Tiran Straits. Israel has announced its readiness to withdraw her Army from the shores of the Straits as soon as free navigation is assured, either by the stationing of the U.N. Force on the Straits until peace is concluded between Israel and Egypt, or in some other way. The Egyptian Government proclaims night and day that as soon as it has the power it will not permit the passage of Israeli shipping either in the Suez Canal or in the Tiran Straits. Israel dare not unconditionally abandon the defence of her rights and security in the Straits.

"Israel is entitled to free navigation through the Tiran Straits by international law. Israel ships voyaged through these Straits over 3,000 years ago, in the days of King Solomon. Israel has no need and no desire to occupy the desolate coastal strip, but she cannot withdraw from the area without effective security guarantees that the Egyptian dictator's acts of violence against her shipping, which the U.N. tolerated for years, will not be repeated.

"Egypt cannot enjoy the benefits of the [armistice] agreement, which for years she has been trampling underfoot, for the purpose of re-establishing in the Gaza Strip her base for aggression, murder and sabotage against Israel. No matter what may happen, Israel will not submit to the restoration of the *status quo* in the Strip . . . She is prepared to withdraw her military forces from the area . . . but . . . it should be made certain that Egypt will not return to the area either directly or indirectly. The United Nations and Israel should arrive at an agreed settlement which will guarantee security for Israel and her settlements in the south and the Negev, provide for the rehabilitation of the permanent residents [of the Gaza Strip] impoverished during the period of Egyptian occupation, and pave the way for a U.N. solution to the refugee problem . . .

"The Government of Israel has declared that Israel does not consider herself in a state of war with Egypt and is prepared to sign a treaty of non-aggression which shall prohibit all acts of hostility on a basis of mutuality. The Government has decided to make a further effort to reach an understanding with the U.S. Government. Ambassador Eban will convey our position to the American Government. We hope the door is not closed to further discussion.

"Yesterday the President of the United States told the American people that the U.N. should exert pressure on Israel to withdraw from the Gaza Strip and the western shore of the Gulf of Akaba. In spite of the painful feelings aroused by some of the President's words, I cannot forget for a moment that President Eisenhower is not only the elected leader of the American nation but one of the most illustrious men of our generation, who headed the forces responsible for the destruction of the most monstrous and terrible régime in human history.

"President Eisenhower's letter a fortnight ago, containing the same demand he uttered yesterday in his message to his people, placed me under a great moral pressure, for I was keenly conscious of the personality and standing of the writer. If I was compelled to reply as I did, I did so only under a still stronger compulsion: the pressure of my conscience as a man and a Jew, the pressure of the justice for which my people are fighting, and the absolute certainty that justice is the source of the strength and survival of my people—a small and poor member of the family of nations, a people that has suffered ignominy and persecution for centuries because of its refusal to deny its faith and its vision of its future.

"It was not with a light heart that I gave the answer I did to the President of the U.S.A., but out of a deep sense of responsibility—the crushing responsibility that rests on the representatives of this small nation in its hard and bitter struggle for survival against the many who seek to destroy it.

"In my reply I tried to explain to the President that we have no intention of holding the coastal strip of the Straits for a single unnecessary moment, and that all we are asking is security for our freedom of navigation in the Straits, of which we were robbed by the piratical actions of the Egyptian dictator without the U.N. lifting a finger to prevent these acts of piracy. I also informed him that we are ready to withdraw our military forces from Gaza without delay, and that we are interested in appropriate arrangements with the U.N. to safeguard peace and stability in the Strip, economic rehabilitation for the residents, and a better hope for the refugees.

"In his speech the President rightly declared that the U.N. must from now onward make a greater effort to safeguard international law and justice. These words clearly imply that up till now the U.N. has not adequately done its duty in this respect . . . For eight years the U.N. has permitted acts of hostility—boycott, blockade, and murder—by the Egyptian Government against Israel. Does it not follow from what the President said that this wrong should now be put right without delay by the U.N. and that Israel should be assured of peace, security, and the observance of her rights on land, sea and in the air? If the U.N. rights this wrong, it would immediately solve all the problems that trouble the President, as well as ourselves, in connexion with the Straits and the Gaza Strip. And the question of compliance or non-compliance on Israel's part will not arise at all. Israel's right to peace and security is no less valid than Egypt's right to war and destruction . . .

"We shall continue to believe in the conscience of humanity. We appeal to the American Government and to all friends of peace and justice in the world to stand by our side and help to secure for the people of Israel their right to sovereign equality, peace, and security."

After a prolonged debate in emergency session, the *Knesset* adopted a resolution on Feb. 25 (by 72 votes to 20) approving Mr. Ben-Gurion's declaration and "re-stating the principles of January 23" [i.e. the declaration made by Mr. Ben-Gurion on that date and the Israeli proposals presented to the U.N. on Jan. 24—see page 15355]. In replying to the debate, Mr. Ben-Gurion said *inter alia* that Israel desired recognition of her right to defend her shipping in the Gulf of Akaba if it were attacked; that she would be ready to accept the proposal that a U.N. Commission should investigate the situation in the Gaza Strip and make recommendations; and that U.N. sanctions against Israel, if imposed, "should not deter us from insisting on our just and vital demands." Mr. Ben-Gurion did not elaborate on the proposal for a U.N. Commission in the Gaza Strip, but it was believed that he was referring to a Canadian plan for a U.N. body to act in that area (see below).

Prior to these developments, mass demonstrations and rallies had been held throughout Israel on Feb. 9 in support of the Government's stand in insisting on guarantees before withdrawing from the Gulf of Akaba and the Gaza Strip. In Jerusalem, Tel-Aviv, Haifa, Tiberias, and other centres, and in agricultural settlements and villages from Galilee to the Negev, hundreds of thousands of people attended open-air meetings at which resolutions were passed pledging full support for the Government, and affirming the people's resolution to stand fast in the face of any sanctions which might be imposed against Israel.

Meanwhile, Mr. Eban, who had returned to Israel for consultations, flew back to Washington on Feb. 22 with " instructions and clarifications " which, he told press correspondents, were aimed at bringing about " a constructive and fair solution." After a meeting with Mr. Dulles on Feb. 24, it was announced (1) that Mr. Dulles had " clarified certain points " in the U.S. memorandum presented to Israel on Feb. 11 ; (2) that Mr. Eban would " communicate urgently with his Government " and would also see Dr. Hammarskjold ; and (3) that it was hoped that " out of these discussions a solution will be found consistent with the principles of the United Nations."

Afro-Asian Resolution for Sanctions against Israel. - Postponement of U.N. Assembly Debates. - Canadian Four-Point Plan for Middle East Settlement. - Proposed U.N. Administration for Gaza Strip.

Prior to the developments described above, the U.N. General Assembly, at the request of the U.S. delegation, had postponed its debate on the Middle East on three occasions—Feb. 12, Feb. 15, and Feb. 20—in the hope that Israel would agree to withdraw from the Gaza Strip and the Gulf of Akaba as requested by President Eisenhower and the U.S. Government. On Feb. 22, however [i.e. after President Eisenhower's broadcast and Mr. Ben-Gurion's reply thereto], the Lebanese Foreign Minister, Dr. Malik, presented a resolution, co-sponsored by five other Asian and Arab nations (Afghanistan, Indonesia, Iraq, Pakistan, and Sudan), which (1) condemned Israel for non-compliance with earlier U.N. resolutions ; (2) called upon all U.N. member-States " to deny all military, economic, or financial assistance to Israel " ; (3) requested them to " provide the Secretary-General with information on the implementation of the resolution " ; and (4) asked Dr. Hammarskjöld " to report on the implementation of the present and previous resolutions of the General Assembly."

During the next few days there were almost continuous private consultations between the delegations at the U.N. on the Middle East question. Whereas the Afro-Asian group was attempting to enlist the necessary support (i.e. two-thirds of the General Assembly) for the sanctions resolution, a group of " uncommitted " nations headed by Canada were attempting to work out a compromise which would ensure Israel's compliance with U.N. resolutions without invoking sanctions against her, which were regarded as injudicious and fraught with grave consequences.

The French and Netherlands Governments made it clear during this period that they would not participate in any form of sanctions against Israel, while the Australian Minister for External Affairs (Mr. Casey), in a statement on Feb. 21 shortly after President Eisenhower's broadcast, said that sanctions against Israel would be " unjust, provocative, and probably ineffective." After pointing out that Egypt had persistently defied the U.N. for five years, Mr. Casey declared that there could " not be one criterion for Israel and another for Egypt," adding that " no fair-minded person " could expect Israel to withdraw from Gaza and Sharm-el-Sheikh without assurances against renewed Egyptian aggression in those areas.

The British Government's attitude had been defined in the following statement made by the Prime Minister (Mr. Macmillan) on Feb. 25 to the House of Commons : " We believe that the Gaza Strip should be evacuated by Israel. We equally believe that it should be made a U.N. responsibility and that U.N. forces should be stationed there. We believe that the Israeli forces should retire from the western shore of the Gulf of Akaba. We equally believe that, coupled with that withdrawal, it should be made clear beyond a peradventure, both by the U.N. and by the leading maritime countries, that they regard access to this waterway as free to the world. Thus we should achieve a solution which would be fair to all and would contribute toward an ultimate settlement of the many problems of an area where peace and stability are of vital importance to the world."

When the General Assembly resumed its debate on Feb. 26, Mr. Lester Pearson (Canadian Minister for External Affairs) made a strong plea for the U.N. to bring about a lasting settlement of the Arab-Israeli dispute. In particular, he called for the building-up in the Gaza Strip of a U.N. civil administration in co-operation with Egypt and Israel. After stressing that the U.N. had " reached the point of no return " and that there could be no question of reverting to the conditions which existed before October last, Mr. Pearson put forward the following four-point plan :

(1) There should be a " firm pledge " by Israel and Egypt to observe scrupulously all the provisions of the 1949 Armistice Agreement.

(2) The Secretary-General and the Commander of UNEF should make arrangements with the Governments concerned for the deployment of UNEF on the armistice demarcation line. This deployment would be for the sole purpose of putting the Force in a position :

(a) To assume certain duties of the U.N. Truce Supervision Organization ;

(b) To assist in preventing incursions, raids and retaliatory attacks across the armistice line in either direction ;

(c) To maintain peaceful conditions on both sides of the line.

(3) It should be " agreed and affirmed that there should be no interference with innocent passage through, nor any assertion of belligerent rights in, the Straits of Tiran. The withdrawal of Israeli troops from Sharm-el-Sheikh should be followed by the entry of UNEF into the area to assist in maintaining peaceful conditions and preventing conflict, in accordance with the purposes laid down by the Assembly for the U.N. Force.

(4) The establishment of a U.N. civil administration for the Gaza Strip in co-operation with Egypt and Israel.

After commenting that the fourth point was " the most complicated and difficult of the arrangements to be decided," Mr. Pearson spoke as follows on the problems of the Gaza Strip and the solution which his Government proposed :

" From the U.N. standpoint this is the key issue : how to provide security on both sides after the Israeli withdrawal . . . The problem is two-fold, and requires for its solution Egyptian, Israeli, and U.N. action. What, then, should be the nature of this action ?

" First in priority, and essential to all other steps, Israel should withdraw from the Gaza Strip in accordance with the previous decisions of the Assembly. At the same time, the Assembly should provide for effective U.N. action to ensure that the area would not be used as a base for raids and incursions against Israel after its withdrawal . . . Immediately the Israeli forces leave, the UNEF should enter. As the Armistice Agreement limits Egyptian forces to ' defensive ' elements only, as the UNEF will already be deployed along the armistice line, and as the Strip is so narrow, the Government of Egypt should not envisage the return of her armed forces to this area after the Israeli troops have withdrawn.

" So far as the civil administration of the territory is concerned, the position is more difficult and complicated. Legally, under the Armistice Agreement the civil administration is to be Egyptian and not Israeli. But there are important practical considerations which qualify this legal position and which cannot be ignored in the replacement of the present administration. It is perfectly clear that we should not simply command the Israeli civil administration to depart in a night. Anyone who believes this is possible should study carefully the report of the Director of the U.N. Relief and Works Agency (UNRWA) on the Agency's operations in the Gaza Strip and ponder upon the situation which exists in that area. We have here an extremely explosive situation, which could very easily get out of control. In this tiny area are crowded over 200,000 refugees and a much smaller native population. They are bitter and frustrated ; administered by strangers, rebellious, riven by frictions, and in a mood, I have no doubt, to erupt in violence and bloodshed once firm control is removed. There has already been more than enough murder in the Gaza Strip, and the U.N. cannot be indirectly responsible for more . . .

" Provision, therefore, must be made for a peaceful transition from Israeli administration to something no less strong and effective and at the same time more generally acceptable. Such a transition can be effected only by negotiation, and such negotiation can only be conducted by direct agents of the United Nations. There is no sense in pretending that, under present circumstances, it could be undertaken between Egyptians and Israelis alone. The good offices of a third party must be interposed, and this can only be the United Nations.

" This is all the more desirable because, after Israel's withdrawal, the U.N. should, in agreement with Egypt, accept responsibility to the maximum possible extent for establishing and maintaining effective civil administration in the territory ; in fostering economic development and social welfare ; and in maintaining law and order. UNRWA is already there, with an experienced and efficient administrative nucleus. The U.N. could also provide other help through the U.N. technical assistance machinery, the resources of its Secretariat, and expert consultants recruited for specific purposes. In this way there would be built up in Gaza, in co-operation with Egypt and Israel, a U.N. civil administration.

" To co-ordinate and make effective arrangements to this end, the Secretary-General might appoint a U.N. Commissioner for Gaza. Working with the Commander of UNEF and the Director of UNRWA, and after consultation with Egyptian and Israeli representatives as well as with refugee and other local Arab leaders, he could arrange to bring about with all possible speed the replacement of the present Israeli civil administration of the area. In this way, and perhaps in this way only, we should be able to effect the withdrawal of Israel with order and speed, and in such a manner as to protect the interests of the inhabitants, and of both Egypt and Israel as well . . . "

The principal speaker in the ensuing debate was M. Sobolev (U.S.S.R.), who announced that the Soviet Union would support sanctions against Israel because the Security Council had been " paralysed by the veto " on the Middle East question. In the course of his speech M. Sobolev bitterly attacked the " Eisenhower doctrine " for the Middle East, alleging that the United States was raising the issue of freedom of navigation in the Gulf of Akaba with the intention of stationing U.S. naval forces there. The U.S. delegate took no part in the debate, but demands for sanctions against Israel were voiced by Czechoslovakia, Syria, and other Communist and Arab countries.

Israeli Decision to withdraw from Gaza Strip and Sharm-el-Sheikh. - Mrs. Meir's Statement to General Assembly. - Assumptions for Withdrawal from Gaza.

When the General Assembly met again on March 1, Mrs. Meir announced that Israel was prepared to withdraw "completely" from the Gaza Strip and the Gulf of Akaba. She emphasized that Israel's withdrawal from the Gaza Strip would be based on the following assumptions:

"(1) That on Israel's withdrawal the UNEF will be deployed in Gaza, and that the take-over of Gaza from the military and civilian control of Israel will be exclusively by the U.N. Emergency Force.

"(2) It is further Israel's expectation that the United Nations will be the agency to be utilized for carrying out such functions as 'safeguarding life and property in the area by providing effective and efficient police protection; guaranteeing good civilian administration; assuring maximum assistance to the U.N. refugee programme; and fostering the economic development of the territory and its people.'

"(3) It is further Israel's expectation that the above-mentioned U.N. responsibilities in the administration of Gaza will be maintained for a transitory period from the take-over until there is a peace settlement, to be sought as rapidly as possible, or a definitive agreement on the future of the Gaza Strip. It is the position of Israel that if conditions are created in the Gaza Strip which indicate a return to the conditions of deterioration which existed previously, Israel would reserve its freedom to act in defence of its rights."

As regards the Gulf of Akaba, Mrs. Meir declared that Israel was ready to withdraw immediately from the Sharm-el-Sheikh area "in the confidence that there will be continued freedom of navigation for international and Israeli shipping in the Gulf and through the Straits of Tiran."

After expressing gratification that the leading maritime Powers had supported freedom of navigation in the Gulf of Akaba, and giving an assurance that Israel would do nothing to impede free and innocent passage in the Gulf by ships of Arab countries bound to Arab ports or other destinations, Mrs. Meir declared:

"Israel is resolved on behalf of vessels of Israel registry to exercise the right of free and innocent passage, and is prepared to join with others to secure universal respect of this right. Israel will protect ships of its own flag exercising the right of free and innocent passage on the high seas and in international waters. Interference by armed force with Israel ships exercising free and innocent passage in the Gulf of Akaba and through the Straits of Tiran will be regarded by Israel as an attack entitling her to exercise her inherent right of self-defence under Article 51 of the Charter, and to take all such measures as are necessary to ensure the free and innocent passage of her ships in the Gulf and the Straits."

In the course of her speech Mrs. Meir said that Israel's decision to withdraw from the Gulf of Akaba had been greatly influenced by President Eisenhower's declaration (in his broadcast of Feb. 20): "We should not assume that if Israel withdraws, Egypt will prevent Israeli shipping from using the Suez Canal or the Gulf of Akaba."

Mr. Cabot Lodge (U.S.A.), after welcoming the Israeli decision, expressed his Government's view that the assumptions mentioned by Mrs. Meir did not make Israel's withdrawal "conditional." He added: "For the most part, the [Israeli] declarations constitute, as we understand, restatements of what has already been said by this Assembly or by the Secretary-General in his reports, or hopes and expectations which seem to us not unreasonable in the light of the prior actions of this Assembly."

Mr. Lodge expressed the view that the future of the Gaza Strip must, from a juridical standpoint, "be worked out within the framework of the Armistice Agreement," as had been pointed out by Dr. Hammarskjöld. The U.S. Government believed that the U.N. and its subsidiary bodies could play a "useful role" in this matter, and that this role "could usefully continue until there is a definitive settlement respecting the Gaza Strip or some final agreement between the parties." As regards the Gulf of Akaba, Mr. Lodge reiterated that the U.S. Government, in the absence of some overriding decision to the contrary (e.g. by the International Court), was "prepared, on behalf of vessels of U.S. registry, to exercise the right of free and innocent passage and to join with others to secure general recognition of this right."

After stressing that there would be no basis for either party to the Armistice Agreement to assert or exercise any belligerent rights once Israel had withdrawn from the Gaza Strip and Sharm-el-Sheikh, Mr. Lodge concluded: "We have reached a turning-point in the long efforts of the U.N. to bring order and stability to this troubled area in the Near East. We have heard Israel's announcement that it will respond to the call of the General Assembly for withdrawal. It is now incumbent upon all members of the U.N., and particularly those directly concerned, to give their full co-operation in carrying out the measures proposed by the Secretary-General and endorsed by the General Assembly."

In the Assembly's further debate on March 1, and also on March 4-5, the principle of free navigation in the Gulf of Akaba and the Straits of Tiran was upheld by Commander Noble (U.K.), M. Georges-Picot (France), Mr. Lester Pearson (Canada), and the representatives of Australia, New Zealand, Italy, Belgium, the Netherlands, Portugal, Denmark, Norway and Sweden. Eight of these countries (the U.K., Australia, New Zealand, Canada, Italy, Norway, Sweden and Portugal) also favoured a *de facto* U.N. regime in the Gaza Strip until a lasting settlement had been reached. On the other hand the Soviet, Indian, Iraqi and Colombian delegates opposed a U.N. administration for Gaza and also spoke against the view that the Gulf of Akaba and Straits of Tiran must automatically be regarded as international waterways. Dr. Fawzi (Egypt), in a short statement, said that the U.N. expected "full and honest" implementation of Israel's decision to withdraw.

Dr. Hammarskjöld, in a statement to the Assembly on March 5, pointed out that "important and difficult administrative problems" would arise "in the present phase of U.N. efforts." He added: "Whether they can be fully resolved on the basis of the authority already granted to the Secretary-General will . . . depend partly on the willingness of the parties and of the Assembly itself to give its previous decisions practical interpretation."

President Eisenhower sent a letter to Mr. Ben-Gurion on March 2 expressing "deep gratification" at Israel's decision to withdraw; recognizing that "this decision has not been an easy one"; and expressing his conviction that "Israel will have no cause to regret having conformed to the strong sentiment of the world community as expressed in the various U.N. resolutions relating to withdrawal."

On the previous day (March 1) Mr. Dulles had given assurances to the representatives of nine Arab nations in Washington that the U.S.A. had made "no promises or concessions whatsoever" to Israel to secure her agreement to withdraw from Gaza and the Gulf of Akaba. A State Department announcement said that Israel's withdrawal "would be predicated wholly upon the decisions of the General Assembly, the reports of the Secretary-General, and the public position of the United States, notably the position expounded by President Eisenhower in his address of Feb. 20."

Mr. Ben-Gurion defends Decision to withdraw from Gaza and Gulf of Akaba. - Votes of Confidence in Israeli Parliament.

After a four-hour emergency meeting of the Israeli Cabinet on March 2, Mr. Eban was instructed to obtain further "clarifications" of the U.S. Government's position on the future of the Gaza Strip. No official statement was issued, but a spokesman of the Israeli Foreign Ministry explained that concern was felt at the speech made by Mr. Lodge to the General Assembly [see above]—"not so much at the things he said but at the things he left unsaid." In particular, Israel had expected Mr. Lodge to make it clear that the U.S.A. would support a U.N. administration in the Gaza Strip and oppose Egypt's return to the area, but Mr. Lodge had given no definite assurances on these points. The spokesman added that no serious disagreements existed with regard to Israel's withdrawal from the Sharm-el-Sheikh area.

A further emergency Cabinet meeting was held on March 3, after which it was announced that the Cabinet had "heard reports on the latest talks of our representatives with the Governments of the United States and France" and had considered a letter sent by the American Ambassador to Mr. Ben-Gurion.

The Jerusalem Correspondent of *The Times* commented as follows: "It is understood that the assumptions put forward by Mrs. Meir in her address to the General Assembly, especially those affecting the Gaza Strip, had received the full approval of Mr. Dulles, who had agreed that there should be 'international rule in Gaza without the Egyptians.' Mr. Lodge's statement that his Government believed the future of the Gaza Strip must be 'worked out within the framework of the armistice agreement' was taken here [in Israel] as contradicting the agreement on this question reached between the American Secretary of State and the Israel Ambassador."

Apart from the widespread dissatisfaction at what was felt to be the ambiguity of Mr. Lodge's statement, Mr. Ben-Gurion's position was further complicated by the fact that two parties in his coalition government, the left-wing *Mapam* and *Ahdut Avoda*, had expressed their opposition to Israeli's withdrawal from the Gaza Strip on the basis of the "assumptions" set forth by Mrs. Meir. It was felt by the two parties that these "assumptions" had lost all their validity in consequence of the statment made by Mr. Lodge, and that Israel was therefore not justified in withdrawing her civilian administration from the Gaza Strip until firm assurances had been given that Egypt would not return to the area.

On March 4, however, Mr. Ben-Gurion issued personal orders for the "full and prompt" withdrawal of Israeli forces from the Gaza and Sharm-el-Sheikh areas, and instructed the Israeli Chief of Staff (General Dayan) to meet the U.N. Commander (General Burns) at Lydda to discuss the withdrawal and the simultaneous entry of UNEF into the evacuated areas. Although Mr. Ben-Gurion issued these instructions on his personal responsibility, and without formal Cabinet approval,

it was understood that he had telephoned his Cabinet colleagues beforehand and had seen the leaders of the *Mapam* and *Ahdut Avoda* parties. Demonstrations protesting at the withdrawal and demanding the resignation of the Government broke out in Jerusalem on the same day, several arrests being made after clashes between the police and demonstrators, who were mainly of the right-wing *Heruth* (nationalist) party.

In a speech to the *Knesset* on March 5, Mr. Ben-Gurion defended his decision to order an immediate withdrawal, and also defended the Sinai campaign undertaken in October last. At the end of the debate (March 6) three censure motions against the Government were defeated by large majorities: (1) a *Heruth* motion of no-confidence, defeated by 81 votes to 25; (2) a motion by the General Zionist (conservative) party calling on the Government to halt the withdrawal, defeated by 85 votes to 25; and (3) a Communist motion condemning the Sinai campaign, defeated by 104 votes to six. The *Mapam* and *Ahdut Avoda* parties voted with the Government on all three divisions.

After recalling the large Egyptian arms supplies from the Communist countries, Egypt's "enormous arms superiority" over Israel, and the tripartite military pact concluded in the autumn of 1956 between Egypt, Syria and Jordan, whose rulers "openly declared that they could now choose the time to wipe out Israel," Mr. Ben-Gurion stressed that the Sinai campaign had become "a condition for our very survival, an action in self-defence in accordance with Article 51 of the U.N. Charter." "In the course of five days," he added, "we defeated three Egyptian divisions in Sinai and the Gaza Strip, destroyed all the *fedayeen* bases, and destroyed or captured large quantities of Egypt's armament. The Sinai operation was essential, justified, and worthwhile if only for this reason . . . It was a campaign of deliverance, for it saved Israel from a direct and immediate danger, crippled the enemy's aggressive capacity for no short period, and in my opinion inflicted a heavy blow on the prestige of the Egyptian dictator . . ."

Mr. Ben-Gurion emphasized that the Sinai campaign had succeeded in bringing the following facts before world opinion: (*a*) that Israel had "acted not as aggressors but in self-defence, and that it was Egypt which for eight years carried out belligerent operations against us"; (*b*) "the *fedayeen* danger and the Egyptian dictator's aggressive plans"; and (*c*) "the vital importance of free passage in the Gulf of Akaba and the Tiran Straits." "Four months ago," he continued, "only a few people were aware of the very existence of the Straits. Little by little public opinion throughout the world came to understand the importance of the Straits for the shipping not only of Israel but of the nations in general, and our right under international law to free passage in this international waterway . . . Most of the free democracies have overwhelmingly recognized our right to freedom of passage, and the importance in general of shipping in the Gulf and the Straits . . . This is an asset of great value that we have won as a by-product of the Sinai operation . . .

"A second point which we have succeeded in bringing before world public opinion in these four months is the danger of the *fedayeen* . . . What *fedayeen* activities spread over seven years—more than 3,000 raids on Israel between 1949 and the end of 1956—could not do (for daily acts of sabotage and individual acts of murder were no sensation for the world Press) was done in the course of the past months, thanks to the repercussions of the Sinai operation.

"We cannot congratulate ourselves on having won over the whole of world public opinion. Almost the whole Soviet bloc has persevered in its hostility to Israel. The Indian Government, too, showed a strange and regrettable indifference to Israel's just claims. But in several Asian countries, including even a few Moslem countries, there was considerable understanding and sympathy for Israel's attitude, although for obvious reasons this was not openly expressed . . ."

Mr. Ben-Gurion went on to give a lengthy review of the discussions with the U.S. Government and the position maintained by Israel throughout the preceding weeks. The speech made by Mr. Cabot Lodge at the U.N. on March 1 had "aroused grave concern," and this concern had not been "entirely erased" by the letter he [Mr. Ben-Gurion] had received from President Eisenhower on March 2. Turning to what he described as "the favourable and unfavourable aspects" of Israel's decision to withdraw from the Gaza Strip and Sharm-el-Sheikh, Mr. Ben-Gurion spoke as follows:

"In regard to Gaza, we have declared that we are evacuating on the assumption that the U.N. Administration will remain in the Strip until a peace settlement, and we said that we would reserve our freedom of action if there is a return to the conditions which existed previously. The President of the U.S.A. and the representatives of other States approved this assumption in various terms. But in spite of all this, I must state that there is no certainty and no clear and authoritative undertaking that the Egyptians will not return or be restored, whether as a civilian administration or through military occupation, relying on the excuse of the Armistice Agreement.

"My heart is with the border settlements of the Negev, who heard with anxiety of the decision to withdraw. But I must shatter an illusion which has taken root among many of us: the Gaza Strip, under any régime and any administration, is a source of trouble so long as the refugees have not been resettled elsewhere. Anyone who speaks of the Gaza Strip without understanding the complications and dangers arising out of the composition of the population is living in a fool's paradise . . . I was certain all along that the least harmful and dangerous régime for Gaza would be a joint régime of Israel and the United Nations. The worst possible régime would of course be an Egyptian régime. But even an Israeli administration alone, or a U.N. administration alone, would involve greater dangers than a joint U.N.-Israel regime, until a solution of the refugee problem and a peace settlement with Egypt are achieved . . .

"As for the Straits, there is no express U.N. decision that the UNEF must remain until a peace settlement and safeguard free passage . . . On the other hand, there is the declaration of all the principal maritime States that the Gulf of Akaba Straits are an international waterway and that all nations have the right to free passage. These States will exercise their right to free passage and send their ships to Elath. They have in addition taken note of our declaration that if our right to free passage is violated by force, Israel will defend herself by force under Article 51 of the Charter. Several States also expressly recorded their recognition of our rights in this connexion.

"Our occupation of Sharm-el-Sheikh has not been in vain . . . It has aroused the public opinion of the world, especially in the great maritime countries in Europe, America and Australasia, to a recognition of the great importance of the Gulf of Akaba, not only for Israeli shipping and trade but also for international shipping and trade. The maritime powers are no longer content to be dependent entirely on the mercies of the Egyptian dictator. If the maritime powers keep the promises they made in the Assembly, the Gulf of Akaba will become an international waterway not only in theory but also in fact. Elath will become a port of international importance. And when a pipeline, larger than the one we have just laid from Elath to Beersheba, is constructed, and when a railway is built to Elath, the entire geo-political position of Israel will be transformed and broad horizons will be opened for economic development in the Negev and the economic independence and progress of Israel."

In conclusion, Mr. Ben-Gurion said that there was "one more reason, more decisive than any of the others," which had influenced him in agreeing to Israel's withdrawal. "The problem of Israel's security," he declared, "has become a question of conscience for very many States, and we were urged to give the family of nations the opportunity to face this moral test—namely, to prevent the renewal of the blockade and the murderous attacks on Israel. Illustrious statesmen have publicly admitted that the U.N. has not fulfilled its obligations towards Israel . . . We fought against the double standard adopted by the United Nations, and this struggle was not in vain. The President of the U.S.A. has assumed a moral responsibility toward Israel, and many other nations have made statements which involve a moral commitment . . . But what was decisive for me was the needs of security and immigration, the hope of the development of the Negev, and a free outlet to the Red Sea and the Indian Ocean. For this reason, although I am keenly aware of the dangers and the drawbacks involved in the settlement we have made, I do not hesitate to advise the *Knesset* and the people of Israel to accept it."

Israeli Forces withdraw from Gaza Strip and Sharm-el-Sheikh. - Take-over by U.N. Emergency Force.

After discussions at Lydda on March 3-4 between General Burns and General Dayan, the Israeli forces began to withdraw from the Gaza Strip on March 6, the withdrawal being completed on the following day. Israeli civilian administrators were also withdrawn from the area at the same time. The Sharm-el-Sheikh area on the west coast of the Gulf of Akaba was evacuated by Israeli forces on March 8. Sixty-five Arab families in the Gaza Strip abandoned their homes and left with the Israeli forces rather than remain under Egyptian administration; they had previously applied for permission to live in Israel and had been granted asylum there.

Prior to withdrawing from the Gaza Strip, the Israeli military authorities had imposed a curfew following an outbreak of Arab terrorism (see below) in which fire had been opened on a train near Rafah and on several Israeli military and police vehicles. After the U.N. Force had taken over the Gaza Strip and sealed it off from Israel, General Burns announced that the curfew would remain in force and issued orders that no Arabs were to carry weapons or explosives. Israeli frontier settlements such as Nahal Oz, which had been free from terrorist attacks since the Sinai campaign, reimposed precautionary measures against *fedayeen* raids for the first time since October, night guards being restored and searchlights re-wired on the perimeter of the settlements.

The UNEF took over control in the Gaza Strip without incident, the area being occupied by some 2,600 Danish, Norwegian, Swedish, Indian and Colombian troops who had been stationed at El Arish since mid-January. In the desolate Sharm-el-Sheikh area, a Finnish rifle battalion took over from the departing Israeli forces. Before evacuating Sharm-el-Sheikh the Israelis had completed the destruction of Egyptian pillboxes and gun emplacements, and had put out of action the two 6-in. naval guns with which the Egyptians controlled the shipping channel through the Straits of Tiran. The island of Tiran, on which the Egyptians had no permanent installations, was left untouched. [The entrance to the Gulf of Akaba is commanded by two small islands, Tiran and Sanafir, respectively under Egyptian and Saudi Arabian sovereignty.]

The first Israeli vessel to pass through the Gulf of Akaba since the withdrawal from Sharm-el-Sheikh—the freighter *Queen of Sheba*—sailed through the Tiran Straits on March 18 without incident *en route* for Massawa (Eritrea). On March 25 the 3,500-ton Danish cargo ship *Brigitte Toft* arrived at Elath with a general cargo after a similarly uneventful passage through the Straits.

Disturbances, during which U.N. troops were forced to use tear-gas and fire over the heads of several hundred Arab demonstrators, broke out in Gaza on March 10 shortly after General Burns had appointed Colonel Carl Ingholm (a Dane) as Military Governor of Gaza and chairman of a five-man committee of prominent Gaza residents empowered to supervise all civil affairs. The rioters, apparently taking this appointment as an indication of prolonged U.N. administration, demonstrated outside U.N. headquarters in Gaza for the return of the Egyptian administration, waving portraits of President Nasser and banners bearing pro-Egyptian slogans. After stoning U.N. vehicles and trying to break into U.N. headquarters, they dispersed when Danish and Norwegian troops fired warning shots over the heads of the crowd. An Arab demonstrator was accidentally killed by a bullet, General Burns issuing a statement expressing his deep regret at the incident.

General Latif appointed Egyptian Civil Governor of Gaza. - Curfew imposed in Gaza Strip.

Colonel Hatem, the Egyptian Director-General of Information, announced in Cairo on March 11 that President Nasser had appointed General Hassan Abdul Latif as Administrative Governor of Gaza [i.e. Civil Governor] with immediate effect. The statement also said (1) that the Egyptian Government had protested to Dr. Hammarskjöld against the "infringement by UNEF of the duties defined for it by the United Nations" and its "firing at civilian inhabitants in the Gaza Strip"; (2) that Egypt had only agreed to the presence of U.N. troops in the Gaza Strip "within the limits fixed by the U.N.—namely, to enforce the cease-fire and follow up the withdrawal of the aggressor forces behind the armistice lines"; and (3) that Egypt "cannot accept that UNEF should perform any functions other than these."

The Egyptian allegation that U.N. troops had fired on civilians in Gaza was denied *in toto* by the official UNEF spokesman in Gaza, who added that the administrative councils of Gaza, Rafah, and Khan Yunis were working with the U.N. Command. Dr. Ralph Bunche (the U.N. Assistant Secretary-General), who had arrived in Cairo the same day for discussions with President Nasser (see below), also described the Egyptian allegation as completely untrue, pointing out that UNEF units had "used tear-gas by hand and fired shots in the air to disperse crowds trying to break through the fence of the headquarters building." He expressed deep regret that one of the demonstrators had been accidentally killed in these incidents.

General Latif arrived in Gaza with his staff on March 13, and on the following day issued a statement declaring that "the Egyptian administration was in power in Gaza with effect from my arrival." On March 20 General Latif ordered a curfew from 10 p.m. to 4 a.m. in Gaza and on the main road between Gaza and Rafah (in the south of the Strip), and forbade the population to approach within 300 metres of the armistice demarcation lines.

The appointment of General Latif as Civil Governor of Gaza was accompanied by renewed anti-Israeli attacks in the Egyptian press and radio, coupled with reaffirmations of Egypt's sovereignty over the Gaza Strip and the Straits of Tiran. Cairo Radio declared on March 13 that any "attempt to transform the international police force at Gaza into troops of occupation" would be "contrary to the spirit of U.N. decisions," while the "Voice of the Arabs" station said on the same date that "the Gulf of Akaba will be closed to Israeli ships and our commandos (*fedayeen*) will continue to sow terror in Israel."

Israeli Reactions to Egyptian Return to Gaza. - Warning by Mr. Ben-Gurion. - Outbreaks of Fedayeen Terrorism.

The entry of General Latif and his staff into the Gaza Strip aroused intense indignation in Israel, where it was felt that the U.S. Government, in sanctioning an Egyptian re-entry into the area, was acting in a manner incompatible with its assurances. In a statement to the *Knesset* on March 13, Mr. Ben-Gurion emphasized that Israel would feel herself justified in using military force if there was any return to the *status quo ante* in the Gaza area and a resumption of *fedayeen* raids.

After declaring that Israel "reserves her freedom of action in case the Egyptians return to the Strip, which never belonged to them and is of use to them only for the purpose of attacks and threats against Israel," Mr. Ben-Gurion added: "If the time comes when that action is appropriate and necessary, the Government of Israel will not, of course, give prior notice of its intention." He emphasized that Israel had not departed from the assumptions on which she consented to withdraw from Gaza and the Gulf of Akaba—one of which was that the UNEF should remain in the Gaza Strip until an agreed settlement had been worked out, and that the Egyptians would not exercise control in the area.

From mid-February onwards *fedayeen* terrorist activities had occurred from time to time both in the Gaza Strip and across the border in Israel, as described below.

Renewed *fedayeen* attacks on road and rail traffic occurred on Feb. 13, when five Israeli soldiers were wounded when their vehicle struck a road-mine near Rafah, and on Feb. 19, when the railway line between Rafah and Khan Yunis was dynamited as a train was passing through the southern sector of the Gaza Strip. Some damage was done to the track but the train was able to proceed. Further incidents occurred inside Israel on March 10, when the driver of a motor-vehicle and a passenger were seriously injured by a road-mine just across the frontier from the Gaza Strip, and on March 27, when three persons were wounded when a band of *fedayeen* ambushed a lorry in the Negev, some 40 miles north of Elath.

The Israeli curfew in the Gaza Strip (referred to above) was imposed on March 6 after a flare-up of *fedayeen* activity in which an Israeli soldier was killed, two others wounded, Israeli Army and police vehicles ambushed, and a train attacked with hand-grenades and automatic fire. An Arab "collaborationist" was also killed in these attacks, which occurred during the Israeli withdrawal from Gaza.

A band of masked *fedayeen* had attempted on Feb. 27 to kidnap the Arab chairman of the Rafah Municipal Council (Haj Shihta Zu'Urub), who had publicly praised the Israeli civil administration in the Gaza Strip and had expressed the hope that the Egyptians would not return. Haj Shihta succeeded in escaping from his captors after they had broken into his home and tried to abduct him. The Israeli authorities described the raiders as Negroes, pointing out that the *fedayeen* gangs included a number of Egyptian Negroes among their members. Threats to take "vengeance" on Arabs who had "collaborated" with the Israeli administration had previously been made by the "Voice of the Arabs" radio on several occasions.

Six armed Arab infiltrators attempting to make their way from Jordan to the Gaza Strip across Israel were killed on March 2 after interception by an Israeli military patrol.

Mrs. Meir's Visit to Washington for Talks with Mr. Dulles. - U.S. Assurances to Israel.

Mrs. Meir flew to Washington on March 15 for conversations with Mr. Dulles, breaking her journey in Paris on March 16 for talks with M. Mollet, the French Prime Minister, and M. Pineau, the Foreign Minister. On her arrival in Washington, Mrs. Meir told press correspondents that the presence of an Egyptian military staff in Gaza was regarded as a dangerous threat to Israel, and that her Government would consider the matter in the light of her conversations with the U.S. Secretary of State.

A joint communiqué was issued on March 18 by Mrs. Meir and Mr. Dulles stating that they had discussed "various aspects of the present situation in the Middle East, particularly developments in the Gaza Strip following the Israeli withdrawal in accordance with U.N. resolutions." The communiqué went on:

"Mrs. Meir expressed her deep concern at the return of Egypt to Gaza, the re-establishment of its control therein, and the reduction of the responsibilities of the U.N. in the Gaza area. She pointed out the gravity with which Israel viewed this situation, and emphasized that it was contrary to the assumptions and expectations expressed by her and others in the U.N. on March 1 and subsequently. She also expressed her anxiety at reports and statements envisaging restrictions against Israeli shipping in the Suez Canal and the Gulf of Akaba, and the maintenance of belligerency by Egypt.

"Secretary Dulles reaffirmed that U.S. policy with respect to these matters continued to be as publicly expressed, notably in the speech of Mr. Cabot Lodge in the General Assembly on March 1 and in the President's letter of March 2 to Prime Minister Ben-Gurion.

"The Secretary said that the U.S.A. was concerned with current developments and was in close touch with the U.N. Secretary-General and other members of the United Nations. He said that the U.S.A. would continue to use its influence in seeking the objectives of peace and tranquillity, and the avoidance of any situation which would negate the great efforts which had been made by the world community to settle the current disputes in accordance with the principles of the U.N. Charter.

"The Secretary said that the U.S.A. stood firmly by the hopes and expectations it had expressed with regard to . . . the exercise of the responsibility of the U.N. in Gaza, free and innocent passage in the Straits of Tiran by ships of all nations in accordance with international law, and the settlement of the Suez Canal problem in accordance with the six principles adopted by the Security Council and accepted by Egypt. A common readiness was expressed for continued consultation on these matters."

Dr. Hammarskjöld's Visit to Cairo. - Discussions with President Nasser.

Dr. Hammarskjöld visited Cairo from March 21-26 for discussions with President Nasser and other leaders of the Egyptian Government. Although there was no fixed agenda, it was understood that the talks dealt with the problems of the Gaza Strip, the Gulf of Akaba, and the Suez Canal. Before

leaving New York for Cairo, Dr. Hammarskjöld had said that his talks with President Nasser would be "exploratory" and for the purpose of "clarification of pending questions to the extent that is possible at this stage."

Dr. Bunche, who had arrived in Cairo some time beforehand, also had talks with President Nasser and was present at some of the conversations between Dr. Hammarskjold and the Egyptian President. In a press statement in Cairo on March 13, Dr. Bunche described his meeting with President Nasser as "friendly and helpful," and said that he had told Colonel Nasser the the U.N. would give "full co-operation" to the new Egyptian civil administration in Gaza. Dr. Bunche also said that the U.N. had no intention of internationalizing the Gaza Strip; that UNEF had the basic responsibility of preventing conflicts between the two parties by establishing itself on the armistice lines; and that most UNEF units were now deployed in this manner. During his visit to the Middle East Dr. Bunche visited the Gaza Strip for talks with General Burns.

In a statement to the General Assembly on March 8, Dr. Hammarskjöld reported Israel's "full compliance" with the U.N. resolution of Feb. 2 calling for her withdrawal to the armistice lines. He added that he would now devote his attention to the futher step envisaged in the U.N. resolution—namely, "action which would ensure progress toward the creation of peaceful conditions in the area."—(U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Israel Government Press Office, Jerusalem) **(Prev. rep. Middle East, 15353 A.)**

A. BULGARIA - SOVIET UNION - ALBANIA. — Soviet-Bulgarian Talks in Moscow. - Soviet Economic Aid to Bulgaria. - Bulgarian Uranium Supplies for the U.S.S.R. - Bulgarian-Albanian Talks.

A Bulgarian Government delegation, headed by the Prime Minister, M. Yugov, visited Moscow from Feb. 15-21 for talks with Marshal Bulganin and other Soviet leaders.

A joint statement issued on Feb. 20 spoke of the "further development and strengthening of all-round co-operation between the two countries"; reaffirmed their allegiance to the Warsaw Treaty; and declared that both Governments would continue their efforts to establish a collective security system in Europe. The Bulgarian Government was "entirely in agreement with the declaration of the Soviet Government on the maintenance of peace and security in the Middle East and on non-interference in the internal affairs of the countries in that area," and also expressed its full support for the Soviet proposals on disarmament. The statement emphasized that both countries were interested in "maintaining friendly good-neighbourly relations among all the Balkan countries based on the peaceful settlement of disputes, the widening of contacts, and mutual trust."

On the same date Bulgaria and the Soviet Union:

(1) Signed an economic co-operation agreement under which the U.S.S.R. granted Bulgaria a 200,000,000-rouble long-term loan for the construction of fertilizer, lead, and zinc factories, and also undertook to give technical assistance in the construction of these plants. In return, Bulgaria agreed to continue to sell uranium ore to the Soviet Union at a "fair and mutually beneficial price," profits from these sales to be used for the improvement of the Bulgarian uranium mines.

(2) Agreed to prepare a three-year trade agreement for the period 1958-60, to be signed in June or July next.

(3) Agreed to conclude in the near future an agreement on the building and repair of ships for the Soviet Union in Bulgarian shipyards during the same three-year period.

(4) Arranged to draft long-term plans for complementary agricultural development up to 1970, particularly for increasing the production and export of Bulgarian fruit and vegetables to the Soviet Union, and of Soviet grain and cotton to Bulgaria.

M. Yugov and other Bulgarian Ministers had previously visited Tirana from Jan. 23-29 at the invitation of the Albanian Government. An official communiqué stated that the talks with Albanian leaders had been held "in a spirit of friendship and complete mutual understanding"; that they resulted in "complete identity of views on all the international questions reviewed"; and that the Bulgarian Government had agreed to grant Albania a long-term credit on "favourable terms" during the period 1956-60. The amount and terms of the credit were not given.—(Bulgarian Legation Press Office, London) **(Prev. rep. Soviet Aid to Bulgaria, 14768 C.)**

B. MONGOLIA. — Chinese Economic Aid.

An agreement was signed in Ulan Bator on Aug. 29, 1956, under which the Chinese People's Republic undertook to provide economic aid to the Mongolian Republic totalling 160,000,000 roubles during the four-year period 1956-59. The programme envisaged the construction in Mongolia of a woollen textile mill, a paper mill, a plywood factory, glassworks, a vegetable farm, a stadium, and other facilities. (Le Monde, Paris) **(Prev. rep. 12492 A.)**

C. NEPAL. — Friendship Treaty with Communist China. - Recognition of Chinese Sovereignty over Tibet. - Chinese, Indian and U.S. Economic Aid for Nepalese Five-Year Plan. - Creation of Planning Commission.

A treaty of friendship and trade between Nepal and the Chinese People's Republic, under which Nepal recognised Chinese sovereignty over Tibet, was signed at Khatmandu on Sept. 20, 1956. The treaty replaced an agreement concluded in 1856 under which the Dalai Lama had paid an annual tribute of 10,000 rupees to the King of Nepal; this tribute, however, had been in abeyance since 1953, when the Dalai Lama discontinued payment.

The Nepalese Prime Minister, Mr. Tanka Prasad Acharya, paid a goodwill visit to China immediately after the treaty had been signed. During his stay in Peking, where he arrived on Sept. 26, 1956 he had discussions with Mao Tse-tung, Chou En-lai, and other Chinese leaders, and on Oct. 7 signed a joint statement with Mr. Chou En-lai.

The statement recalled the "traditional friendship and close ties existing from ancient times between China and Nepal"; reaffirmed the Five Principles (*Panch Sila*) as the basic principles guiding their mutual relations; pledged the two countries to "continue to develop their traditional economic and trade relations on the principles of equality and mutual benefit"; and expressing the wish to strengthen cultural ties between China and Nepal.

On the same day (Oct. 7) the Chinese Minister for Foreign Trade (Mr. Yeh Chi-chun) and the Nepalese Ambassador in Peking signed an economic aid agreement under which China undertook to contribute 60,000,000 Indian rupees (£4,400,000), over a period of three years, toward the cost of Nepal's five-year plan—20,000,000 rupees in cash, payable in two equal instalments during 1956-57 and 1957-58, and 40,000,000 rupees in machinery, equipment, and other commodities.

The agreement (the text of which was published in Khatmandu on Nov. 3, 1956) laid down that China would not send technicians to Nepal, and that Nepal would be free to use the money and materials as she wished. It also provided for the granting of foreign exchange facilities to Nepalese traders in Tibet under the rules of the Bank of China. It was announced in Khatmandu on Feb. 3, 1957 (during a visit by Mr. Chou En-lai to the Nepalese capital) that the first cash instalment of 10,000,000 rupees had been received.

The Government of India had previously announced in August 1956 that it was willing to provide financial aid for Nepal's five-year plan to the extent of 100,000,000 rupees, most of which would take the form of technical assistance and agricultural produce.

It was stated that negotiations were in progress on two projects, sponsored jointly by India and the U.S.A. for road development and expansion of railway track in Nepal—India contributing up to 25 per cent of the cost in the form of technical help and personnel, and the U.S.A. providing the equipment. The Indian Finance Minister, Mr. Krishnamachari, stated on Dec. 11 that India had agreed to meet 25 per cent of the expenditure, subject to a maximum of Rs. 8,250,000, on the project for converting the narrow-gauge line from Raxaul (India) to Amlokhganj (Nepal) into metre-gauge, and extending the line to Hitaura (Nepal).

A Planning Commission was set up by the Nepalese Government in January 1957 to implement the country's five-year economic development plan [see 14716 A], the total cost of which was estimated at 330,000,000 rupees (£24,750,000). In addition to Indian aid of 100,000,000 rupees and Chinese aid totalling 60,000,000 rupees, the U.S.A. had promised 80,000,000 rupees for the execution of the plan.—(Indian High Commissioner's Office, London - The Statesman, Calcutta - The Hindu, Madras - Times) **(Prev. rep. 14417 B; 14716 A.)**

D. BRAZIL.—Purchase of U.S. Surplus Farm Products.

An agreement was signed in Washington on Dec. 31, 1956, under which Brazil purchased surplus farm products from the United States to a total value of $138,700,000.

The commodities covered were 1,800,000 metric tons of wheat and wheat flour ($111,000,000); 15,000 metric tons of lard ($5,000,000); dairy products ($2,200,000); and 4,000 metric tons of vegetable oil ($1,500,000). The purchase price included $19,000,000 for freight.

It was stipulated that the wheat and flour would be delivered over a three-year period and the other products within six months, payment being effected by Brazil either in U.S. dollars or in cruzeiros. About 85 per cent of the cruzeiro payments would be re-lent by the U.S.A. to finance long-term Brazilian development projects (primarily hydro-electric power and railway development), and the balance reserved for U.S. Government expenditure in Brazil.

The agreement—the second largest of its kind made by the U.S.A.—led to a protest by Argentina, which is one of Brazil's traditional wheat suppliers. A protest in principle was also made by the Canadian Government.—(New York Times - Brazilian Government Bulletin - Bank of London and South America) **(Prev. rep. U.S. Loan, 15134 A; U.S. Surplus Farm Products Agreements, 15213 B; 15171 A.)**

A. SAUDI ARABIA. — King Saud's Visit to the U.S.A. - Discussions with President Eisenhower. - Agreement on U.S. Military Assistance to Saudi Arabia. - Continued American Use of Dhahran Air Base. - King Saud's Visits to Spain, Morocco, Tunisia and Libya.

King Saud of Saudi Arabia arrived in New York on Jan. 29 on a State visit to the United States, and on the following day arrived in Washington, where he was met by President Eisenhower at the airport.

During his stay in the U.S. capital King Saud had a number of talks with the President, Mr. Dulles, and senior officials of the State Department. He also met Vice-President Nixon, Congressional leaders, and leading businessmen at a State banquet given by the President.

A joint communiqué issued by the President and King Saud on Feb. 8 stated that they had agreed on certain basic principles affecting the situation in the Middle East; that Saudi Arabia would continue its close co-operation with the United States; and that the U.S.A. would provide military assistance to Saudi Arabia while being permitted the continued use of the Dhahran airfield for another five years. The communiqué was worded as follows:

"His Majesty Saud Ibn Ab-dal-Aziz al-Saud and President Eisenhower have concluded the series of discussions which they held during King Saud's State visit . . . These meetings provided the opportunity to reaffirm the close friendship which has so long existed between Saudi Arabia and the United States. In an atmosphere of cordiality, the King and the President exchanged views on how the two nations might work together to strengthen the peace of the Middle East.

"The two Heads of State reached full agreement on the following:

(1) Saudi Arabia, by virtue of its spiritual, geographical and economic position, is of vital importance in the Middle East. It is in the interests of world peace that this kingdom be strengthened for the maintenance of its own stability and the safeguarding and progressive development of its institutions.

(2) The two Governments will exert efforts to settle justly the problems of the Middle East area by peaceful and legitimate means within the framework of the U.N. Charter. They assert their firm opposition to the use of force from any source as a means of settling international disputes.

(3) The aim of the peoples of the area is to maintain their full independence, live in peace, and enjoy economic freedom and prosperity. Any aggression against the political independence or territorial integrity of these nations, and intervention from any source in the affairs of the States of the area, would be considered as endangering peace and stability. Such actions would be opposed in accordance with the purposes and principles of the United Nations.

(4) His Majesty indicated his purpose to continue close co-operation with the U.S.A., and carried the expressed wishes of other Arab leaders to improve their relations with the United States. President Eisenhower explained the purposes of his proposals to Congress in relation to the Middle East, pointing out that they were designed to supplement the universal non-aggression principles expressed in the U.N. Charter and to promote the independence and proper aspirations of the Arab peoples. King Saud received this exposition with satisfaction and assured President Eisenhower that he welcomed every step that promotes the United Nations principles respecting independence, sovereignty of States, and self-determination of peoples.

(5) With respect to the military defence of Saudi Arabia, including the Dhahran airfield, President Eisenhower assured King Saud of the willingness of the U.S.A. to provide assistance for the strengthening of the Saudi Arabian armed forces within the constitutional processes of the United States. To this end, plans are being made by representatives of both countries for the supply of military equipment, services, and training, for the purposes of defence and the maintenance of internal security in the Kingdom. In the same spirit, King Saud assured President Eisenhower of his intention that the U.S.A. should continue for another five years to use the facilities accorded to it at the Dhahran airfield, under conditions provided for in the agreement concluded between the two countries on June 18, 1951. The U.S.A. agreed to consider the provision of economic facilities that would serve to augment the combined aims and interests of the two countries.

(6) The two Heads of State exchanged views on a number of other matters of common interest."

On King Saud's arrival in New York, the civic authorities, in an unprecedented break with tradition, had declined to accord him the welcome usually reserved for a visiting Head of State.

The Mayor of New York, Mr. Robert Wagner, had publicly stated on Jan. 27 that King Saud was "not wanted" in the city, and had declared on the following day: "King Saud is a fellow who says slavery is legal, that in the Air Force you can't have any Jewish boys, and that a Catholic priest cannot say Mass." President Eisenhower, at a press conference on Jan. 30, deplored what he considered the Mayor's discourtesy, saying that "you don't promote the cause of peace by talking only to people with whom you agree." The President added that he was always obliged to any Head of State who would "come and talk to me when we think we have solutions that might be advanced by this kind of meeting." He stressed, however, that in meeting leaders of countries with whose practices he might not agree, he was by no means giving his approval to the way in which the internal affairs of those countries might be conducted.

It was announced in Washington on Jan. 29 that in future the State Department would relieve the City of New York of all obligations to meet visiting foreign dignitaries.

During his stay in New York on Jan. 28, prior to his visit to Washington, King Saud lunched with the U.N. Secretary-General, Dr. Hammarskjöld, and afterwards addressed the U.N. General Assembly then in session.

While in Washington, King Saud had a meeting on Feb. 6 with Crown Prince Abdul Ilah of Iraq, who had arrived in the U.S. capital two days earlier; no official statement was issued, but the Crown Prince described the meeting as "very cordial." The meeting was generally regarded as indicating a measure of *rapprochement* between the traditionally hostile Hashemite and Saudi dynasties. King Saud also had talks in Washington with Dr. Malik, the Lebanese Foriegn Minister.

Visits to Spain and North Africa.

On Feb. 10 King Saud arrived in Madrid, where he was welcomed by General Franco.

A communiqué issued on Feb. 14, at the end of his visit to the Spanish capital, stated that the King had had several conversations with General Franco and members of the Spanish Government, and that they had discussed questions affecting the relations between their two countries and other questions of general interest, especially the Middle Eastern situation. The two countries would shortly sign a friendship treaty and, as regards the Middle East, had agreed to co-operate "loyally within the framework of the U.N." in bringing about peace and security in that area.

King Saud also had a meeting in Madrid on Feb. 10 with the Sultan of Morocco, who had arrived in the Spanish capital from Naples on a private visit, and who invited the King to visit him in Rabat. Accordingly, after visiting the centres of former Moorish rule in Southern Spain, King Saud visited Rabat from Feb. 17-21 as the Sultan's guest.

A communiqué issued on Feb. 21 stated that King Saud and the Sultan of Morocco had discussed the conversations between the King and President Eisenhower; that King Saud had expressed satisfaction at the understanding he had found on the part of the U.S. Government concerning Arab problems; and that the King and the Sultan had agreed "to support each other in the settlement of questions affecting their two countries and the Arab and Moslem countries in general."

From Rabat King Saud flew to Tunis, where he met the Bey and M. Bourguiba (the Prime Minister) on Feb. 21, while from Feb. 22-24 he visited Tripoli for talks with King Idris.

A communiqué issued on the latter date stated that the two monarchs had discussed the "Eisenhower doctrine" and had agreed to give strong support to the Algerian people in its struggle for independence "with a view to achieving a peaceful and fair solution."

Before returning to Riyadh, King Saud visited Cairo on Feb. 25 to attend a conference of Heads of Arab States. (New York Times - New York Herald Tribune - Le Monde, Paris)

B. UNITED STATES. — Mr. Gates appointed Navy Secretary. - Mr. Stassen's New Duties at State Department as Special Assistant to President Eisenhower.

Mr. Thomas S. Gates jr., a partner in the Philadelphia investment firm of Drexel and Company, was nominated by President Eisenhower on March 1 as Secretary of the Navy in succession to Mr. Charles S. Thomas, who had resigned after holding that post since May 1954. In his letter of resignation to the President, Mr. Thomas gave no precise reason for resigning other than stating that he had been in the Government service for over four years. Mr. Gates's appointment as Navy Secretary was approved by the Senate on March 22.

It was also announced from the White House on March 1 that Mr. Harold Stassen's functions as special adviser to the President on disarmament would in future come under the control and guidance of the State Department. [Mr. Stassen had hitherto headed an independent group reporting directly to President Eisenhower]. The announcement said that Mr. Stassen would function in the State Department with the title of Special Assistant to the President, would continue to have Cabinet status, and would head the U.S. delegation at the London disarmament talks beginning on March 18.

Mr. Dulles explained that as the main tasks of Mr. Stassen's "disarmament group" were now moving into the field of "negotiations with foreign Governments," the President had considered it appropriate for Mr. Stassen to discharge his duties at the State Department under the guidance of the Secretary of State.—(New York Times - New York Herald Tribune)

A. UNITED KINGDOM. — West Indian Immigration.

Statistics published in London on Feb. 6 by the British Caribbean Welfare Service showed that about 78,000 British West Indians were living in the United Kingdom, immigration from the West Indies having amounted to over 26,000 in 1956 as compared with 24,000 in 1955.

The statistics showed that of the 26,000 West Indians entering the U.K. in 1956, over 9,000 were women and 870 children, compared with 7,000 and 300 respectively in 1955. The number of Jamaicans migrating in 1956 was 15,200, compared with 17,900 in 1955, while immigration from Trinidad increased from 770 to 1,400 and from British Guiana from 420 to 1,156. Nearly 2,000 came from Barbados (a slight fall as compared with 1955), though this figure did not include those arriving under sponsored schemes (see below).

The British Caribbean Welfare Service had been established in June 1956 by the Governments of the British Caribbean territories (Antigua, Barbados, British Guiana, British Honduras, Dominica, Grenada, Montserrat, St. Kitts, St. Lucia, St. Vincent, and Trinidad) to deal with problems caused by the increasing flow of West Indian immigrants to Britain. The cost of the Welfare Service is met entirely by the West Indian governments, no costs being incurred by the British taxpayer.

The labour shortages in many sectors of British industry and transport had led to a considerable influx of West Indian workers to Britain in recent years, as shown in the above-mentioned statistics. The great majority of the immigrants had found employment in factories in Birmingham and other industrial cities in the Midlands and the North, as well as in London, where there are a considerable number of West Indians living in the Brixton area. The coloured population of Birmingham was estimated at 30,000 at the end of 1956 (20,000 West Indians and 10,000 Indians and Pakistanis), most of whom are employed in industry.

The shortage of transport workers had led to the recruitment of numbers of West Indians in this capacity, particularly in London Transport services (e.g. the Underground) and the Birmingham bus services. In April, 1956, the British Transport Commission announced that it was recruiting 1,000 men in Barbados for work on the railways and other transport services, in view of serious shortages of staff. [It was stated by London Transport that there were vacancies for 2,400 bus conductors and drivers and 300 stationmen (porters) for the Underground railways.]

Similarly, the shortage of hotel staff led the British Hotels and Restaurants Association to recruit some 200 men and women workers from Barbados during 1955 for work as porters, housemaids, chambermaids, etc., in hotels in different parts of Britain. A number of West Indian nurses have also been recruited during the last two or three years to help overcome the shortage of nurses in British hospitals.

The Chief Minister of Jamaica, Mr. Norman Manley, visited Britain in the spring of 1955 to study the problems of West Indian, and particularly Jamaican, immigration. On his return he appointed a two-man mission to carry out a survey on behalf of the Jamaican Government, consisting of Dr. Clarence Senior (head of the Migration Division of the Puerto Rican Department of Labour, and lecturer in demography at Columbia University, New York) and Mr. Douglas Manley (a lecturer at the University College of the West Indies), son of the Chief Minister. Dr. Senior and Mr. D. Manley accordingly paid a nine-week visit to Britain from July to September, 1955, during which they interviewed West Indian immigrants in London, Birmingham, Liverpool, Manchester, Leeds, Bristol, and Nottingham, as well as British Government and labour officials, trade union leaders, employers, social workers, clergyman, chief constables, and school teachers.

In a press statement in London on Sept. 5, 1955, before leaving for Jamaica, Dr. Senior said that he and Mr. D. Manley had arrived at two principal conclusions as a result of their on-the-spot investigation :

(1) There should be " an orientation programme in the West Indies," under which potential emigrants should be told " by the best modern means of mass communication " of some of the problems which would face them in Britain.

(2) An organization should be created in Britain by the West Indian Governments to continue this " initiation " process and to " help unravel the problems, as and when they crop up, for immigrants in this country."

Dr. Senior said that although he and Mr. Manley had encountered a good deal of colour prejudice in places where there were considerable numbers of West Indians, they were encouraged by the fact that a " large reservoir of goodwill " existed among the British people toward the West Indians. Opposition to the West Indians, where it existed, was due primarily to ignorance of the facts—e.g. the tendency among some British people to exaggerate the extent of West Indian immigration, to blame the immigrants for housing shortages, and to blame newcomers as a whole for the bad behaviour of a small number of individuals. Lack of knowledge in Britain was paralleled by a similar lack of knowledge in the West Indies, where conditions in Britain were often depicted in " too rosy " colours.

Dr. Senior emphasized that the West Indian immigrants had come to Britain because of the labour shortages in the U.K., and would not have come if such shortages had not existed Moreover, the immigrants were not drawn " from the bottom of the barrel " but were predominantly the more skilled elements, notably those from Jamaica. After stressing that it was the higher-skilled, more adventurous Jamaicans who were coming to Britain because they found too little scope for their abilities at home, Dr. Senior emphasized that these were precisely the people who were most needed to develop the West Indian economy, which might be adversely affected by the migration of skilled workers to the United Kingdom.

The report and recommendations of Dr. Senior and Mr. Douglas Manley were issued in Kingston (Jamaica) on Dec. 7, 1955, by Mr. Norman Manley for submission to the British Government and to the Governments of the British West Indian colonies.

The principal recommendations in the report were : (1) a programme of education in Jamaica for intending migrants to Britain, and (2) the development of a Jamaican or British West Indian welfare service in Britain. It was pointed out that " economic conditions in most of the islands, with their heavy and rapidly increasing populations, indicate that demands for additional manpower in the United Kingdom will find a ready response from the West Indies for many years."

The report added that the problems arose principally from a colour difference, different levels of skills of West Indian and British workers, adverse weather, difficulties that were normal to the British economy (e.g. inadequate housing), and, most important, a lack of knowledge on the part of Britons of the background and aims of the West Indian migrant. There was an equal lack of knowledge among the migrants of social and economic conditions in Britain.

These difficulties (the report said) could be reduced by an educational effort at home, and by an expansion in Britain of welfare services in the fields of reception, industrial relations, community and public relations, etc.

The recommendation for a British West Indian welfare service in the U.K. was subsequently implemented by the establishment of the British Caribbean Welfare Service, referred to above.—(Times - Daily Telegraph - Manchester Guardian)

B. NICARAGUA. — Presidential Election. - Ending of Dispute with El Salvador on Extradition of Exiles.

Presidential elections held in Nicaragua on Feb. 2 resulted in an overwhelming victory for Colonel Luis A. Somoza, who had been appointed President in September 1956 for the remainder of the term of his father, the late General Anastasio Somoza, following the latter's assassination. Colonel Luis Somoza stood as the candidate of the National Liberal party and was opposed by Señor Edmundo Amador, the nominee of the Nicaraguan Conservative party.

Prior to the elections, a joint statement had been issued by the Governments of Nicaragua and El Salvador on Jan. 23 announcing that the differences hitherto existing between them had been settled through the mediation of Señor Trabanino, the secretary-general of the Organization of Central American States. The dispute had arisen out of Nicaraguan allegations that Nicaraguan exiles living in El Salvador had been involved in the conspiracy to assassinate General Anastasio Somoza, and were members of an international Communist ring for which the assassin—Rigoberto Lopez Perez—had acted as a tool. Nicaragua had demanded that El Salvador should repatriate certain exiles to stand trial for alleged complicity in the murder of General Somoza—a demand which El Salvador had rejected on the ground that extradition of political exiles was contrary to the Salvadorean Constitution.

C. UNITED STATES.—Supreme Court Appointment.

Mr. Charles E. Whittaker (56), a judge of the Federal District Court of Western Missouri, was nominated by President Eisenhower on March 2 as an Associate Justice of the U.S. Supreme Court in place of Justice Stanley F. Reed (72), whose retirement had been announced a week earlier. Justice Whittaker, a Republican, was born in Missouri and was a lawyer in Kansas City for many years before his elevation to the bench. His nomination to the Supreme Court was approved on March 18 by the Senate Judiciary Committee.
(New York Times) **(Prev. rep. Supreme Court, 15131 D.)**

D. IRAQ. — Ending of Baghdad Pact Boycott.

A Foreign Ministry spokesman in Baghdad announced on March 24 that Iraq had decided to end her boycott of Britain in the Baghdad Pact Organization, the reasons for which had been eliminated, and would resume full activities in the pact. The Iraqi boycott was imposed after the British intervention in Egypt.—(Times) **(Prev. rep. 15201 A, page 15211.)**

A. SOUTH-EAST ASIA TREATY ORGANIZATION. — Council Meeting in Canberra. - Intensification of SEATO Activities against Communist Subversion. - Permanent Military Planning Office in Bangkok.

The Council of the South-East Asia Treaty Organization (SEATO) held its third annual meeting in Canberra from March 11-13 under the chairmanship of Mr. Richard Casey, the Australian Minister for External Affairs. The other delegates were M. Pierre de Félice (French Secretary of State for Foreign Affairs); Mr. T. L. Macdonald (New Zealand Minister for External Affairs); Mr. Amjad Ali (Pakistani Minister of Finance); Señor Carlos P. Garcia (the Philippine Vice-President and Foreign Minister); Mr. Rak Panyarchun (Siamese Deputy Foreign Minister); Lord Home (British Secretary of State for Commonwealth Relations); and Mr. Dulles (the U.S. Secretary of State).

At the end of the meeting a communiqué was published surveying the position in the treaty area and announcing measures which the Council had decided to take, including (*a*) the appointment of a secretary-general and deputy secretary-general of the Organization; (*b*) continued close co-operation between the armed forces of the member-countries; (*c*) intensification of the Organization's activities against Communist subversion in the treaty area; (*d*) the strengthening of the economic resources of Asian member countries; and (*e*) the strengthening of bilateral and multilateral cultural exchanges within the SEATO community. The communiqué was worded as follows:

"Plans to consolidate and enhance the progress made in preserving the freedom of all countries in South-East Asia have been agreed to by the SEATO Council at its third meeting . . . These plans provide for: maintenance of the defensive capacity of treaty members to deal effectively with armed aggression; extension of the programme to detect, appraise, expose, and combat subversion directed from without; and the development of the economic resources of treaty members, particularly the Asian member-States, by measures inside and outside SEATO.

"The Ministers believe that, while the immediate military threat to peace in South-East Asia has diminished, the forces of international Communism are still working for the ultimate objective of world domination. The Council noted that in Asia the Communist so-called 'peace front' is in reality a front of millions of armed men. The military strength of Communist China and of North Vietnam is continually being increased. In the circumstances, the Council agreed that SEATO could not relax its vigilance and must maintain its capacity to deter and repel aggression.

"In face of a threat which is not itself static, the SEATO nations by their united efforts are continually increasing and adapting their capacity to deal with it. The Communists have chosen for tactical reasons to exert their pressure by other than military means for the present. This does not mean that they would not attempt to exploit any weakness in SEATO military preparedness if the opportunity came.

"As a result of the work of the Military Advisers over the past year, the SEATO Governments are agreed upon the nature of the Communist threat in the treaty area and the kind of military measures which would be necessary to defeat it. Military planning is a continuing process and will be helped by the setting-up of a permanent Military Planning Office at Bangkok, with staff representing all member-countries. Close co-operation among the forces of the member-countries is being assisted by realistic training exercises arranged by the SEATO Military Advisers.

Anti-Subversion Programme. "The Council believes that the military threat to the region is deterred by the very existence of SEATO and the collective defence represented by its members. The emphasis in Communist and Communist-inspired tactics in the area has therefore continued to move from the open threat of force to the more flexible tactics of non-violent penetration and the undermining of non-Communist States, still accompanied in some cases by armed insurrection.

"Believing that public knowledge of these tactics—of how and where subversion is occurring—is an essential prerequisite of effective action against them, the Council agreed to direct its civil organization to intensify its work of identifying all phases of subversive tactics; to make known its findings among member-Governments; and to expose them to the scrutiny of public opinion. With this object the Council approved specific projects for the exposure of these activities. Basic material for these projects will come from analyses by the Committee of Security Experts and from information provided by the SEATO Research Service Centre and by member-Governments.

"The Council recognized that in countering subversion the primary responsibility rests with each Government, aided as necessary by its friends. But an important supplementary role can be played by SEATO, and decisions made by the Council at its present meeting will make that role more effective.

Economic and Social Progress. "The Council discussed no economic activities relating to Article III of the treaty. [Article III states:—'The parties undertake to strengthen their free institutions and to co-operate with one another in further development of economic measures, including technical assistance designed both to promote economic progress and social well-being, and to further the individual and collective efforts of the Governments toward these ends.']

"The representatives of Pakistan, the Philippines, and Siam drew attention to economic problems in their countries requiring co-operative action with other members, and the Council discussed what were the most appropriate arrangements by which these problems might be resolved.

"The SEATO expert committees have recommended specific projects to assist in relieving the economic burden of defence and to make a contribution toward the continuation of economic development under SEATO's protective shield. The Council members undertook to consider the implementation of these recommendations.

"The Council noted with satisfaction the progress made in the economic development of the Asian member-States. It also noted that a number of countries, particularly the United States, were providing considerable economic assistance bilaterally as a direct contribution to the treaty objectives. In addition to these bilateral programmes, some assistance is being provided specifically under the auspices of SEATO. For example, the Australian Government is thus providing £2,000,000.

"The Council decided that SEATO cultural activities should include encouragement and assistance to national activity in this this field. It urged member-Governments to foster bilateral cultural exchanges within the SEATO community. In addition, the Council approved a number of multilateral projects in the cultural relations field. This is a new and promising development, which will strengthen the spirit of friendship which already marks the relations between the eight SEATO member-countries.

"A major cultural project approved for immediate introduction is the SEATO fellowship programme, under which scholars of the SEATO countries will be encouraged to undertake study and research in fields of special interest to SEATO.

"Another important project adopted is the convening in one of the Asian member-countries of a 'round-table' meeting to discuss Asian civilizations and cultures. The Council also adopted a French proposal that the competent bodies of SEATO should consider the problem of educational assistance in the treaty area and recommend measures applicable in this field within the framework of SEATO.

Permanent Organization and Budget. "The Council considered the strengthening of the permanent civil organization in Bangkok, and to that end decided to appoint a Secretary-General and Deputy Secretary-General. They directed the Council representatives to determine the terms of reference of these officers and the timing of the appointments, and to consider and report on nominations from member-Governments for these posts.

"The Council approved a budget of $787,175 for the 15 months ending June 30, 1958, to cover the cost of the permanent civil and military headquarters in Bangkok and to help finance certain joint programmes.

General Observations. "Among the topics discussed by the Council was that of neutralism. It was observed with concern that some Governments have in varying degrees adopted the line of active opposition to collective security arrangements, such as SEATO, which are in full accord with the U.N. Charter. It was hoped that as time passed and the value of SEATO became more widely appreciated, those who criticized it today would eventually be willing to welcome it.

"SEATO is not an exclusive organization, but remains open to all those countries in Asia who are willing to share its benefits and responsibilities. Council members wish to stress that it was genuine concern for the security of the area which led to their voluntary association in SEATO. All nations of the area, whether members of SEATO or not, are benefiting from the protection provided by SEATO's collective deterrent strength.

"The members of the Council recorded their abhorrence at the use of Soviet forces to crush the struggle of the Hungarian people for independence. They noted that the Soviet action was condoned and supported by Communist China. They noted the vivid and revealing contrast provided by the policies of certain member-Governments which have already led or are now leading various hitherto dependent territories to fully independent nationhood.

"The Council met in an atmosphere of great friendship, understanding, and mutual trust. As the Organization moves into its new and expanded phase of activity, the Council members are determined that SEATO will work for the enrichment as well as the defence of human life and liberty in accordance with the principles and purposes of the U.N. Charter."

During a secret session of the Council on March 12, Mr. Dulles made a statement on U.S. policy toward China, the text of which was subsequently released.

Mr. Dulles said that the United States adhered steadfastly to the three main aspects of its China policy: (1) to recognize the Republic of China [i.e. the Nationalist Government in Formosa]; (2) not to recognize the so-called People's Republic of China; (3) to oppose the seating of this "people's republic" in the U.N. as the accredited representative of what the Charter called 'the Republic of China.'

Mr. Dulles declared: "U.S. diplomatic recognition of the Chinese Communist regime would serve no useful purpose, but would strengthen and encourage influences hostile to us and to our allies, and further imperil lands whose independence is related to our own peace and security. Our policy on China is not merely an expression of emotional dislike of Chinese Communism, although the creed and practices of Chinese Communists are in fact repugnant to us. Also our policy is not merely an expression of sentimental loyalty to the Republic of China, although we do feel loyalty to a Government which was loyal to the Allied cause throughout the darkest days of the Second World War.

" The United Nations is faced with growing responsibilities. These could not be more readily discharged by giving the Chinese Communists an opportunity to work mischief there. If the Communist régime were allowed to represent the Republic of China, it would presumably sit on the Security Council as a permanent member with veto power. It would be grotesque if that high responsibility were conferred upon a regime which itself stands condemned as an armed aggressor against the United Nations."

Mr. Dulles emphasized that his statement had been made purely for the information of the Council and was not a SEATO policy decision. It was subsequently explained by a U.S. spokesman that Mr. Dulles had made this statement because of rumours in recent weeks that the U.S.A. was considering a policy change in the direction of recognizing the Peking régime.

Second Annual Report of SEATO.

The second annual report of SEATO had been published on March 4, shortly before the Council meeting in Canberra.

The report said that Communist tactics had shifted from armed aggression to " subtle infiltration by political and economic propaganda methods." The Communist armed forces, however, were so disposed as to be ready for instant use if armed aggression again became the main aim. Communism had made no substantial progress in the member-countries [of which Pakistan, Siam, and the Philippines are Asian] during the year, although the situation elsewhere in the treaty area was less satisfactory. In spite of statements emphasizing the feasibility of peaceful co-existence, Communist official statements made it clear that the ultimate objective in the treaty area continued to be the establishment of Communist régimes. Methods of subversion included the use of 'front' organizations to mask Communist activities, and an economic offensive in Asia through trade and aid programmes.

The report pointed out that Communist political activity had been directed toward two objectives : (1) where the Communist party was illegal, it aimed at legislation so that it could re-enter national political life ; (2) where the party was legal, it tried to promote the formation of coalition alliances of " united front " elements with the object of gaining control of Governments. As to their economic aid, the Communists had publicized it out of proportion to its actual volume, which had been far less than that given to Asian countries by SEATO members alone.

The Communists had also tried to infiltrate political, trade union, youth, and cultural organizations, and had tried to subvert the loyalties of minority groups such as the Overseas Chinese. They had tried to identify themselves with the desire of peoples for independence, and had supported the idea that national independence was incompatible with membership of collective defence organizations such as SEATO.

In the field of mutual co-operation between SEATO members, a feature of the past year had been the close collaboration among the police forces in the treaty area, notably the co-operation of the police forces of Siam and Malaya in putting down armed Communist terrorism along the border between the two countries.

On the military side, the report referred to the setting-up of a permanent military planning staff at SEATO headquarters in Bangkok [see below]. On the economic side, member-countries had made available during the year some $620,000,000 to other treaty members for basic economic development projects.

Meetings of Military Advisers. - Permanent Military Planning Office established in Bangkok.

Prior to the Council meeting, the SEATO Military Advisers had held two meetings : the first at Baguio (Philippines) from Sept. 2 - 8, 1956, and the second in Canberra on March 8 - 9, 1957.

It was announced after the Baguio meeting that the Military Advisers had agreed to seek the approval of their Governments for the setting-up in January 1957 of a Permanent SEATO Military Planning Office in Bangkok. The statement said that " the decision to locate this permanent office in Bangkok was influenced by the desire to base it centrally in the SEATO area, and the existence already in Bangkok of a number of SEATO agencies, both military and civil."

It was also announced that the Military Advisers had approved a schedule of combined SEATO defence training exercises, including maritime exercises in the South China Sea in October 1956 and April 1957 ; a combined exercise in Siam for co-ordination of tactical air operations (in January 1957) ; an exercise in the Philippines for co-ordination of naval gunfire support to ground forces (April 1957) ; and an exercise in Siam for the co-ordination of close air support to ground forces (May 1957). These exercises would be " in addition to those bilateral and multilateral exercises which will be carried out through mutual arrangement of the individual SEATO nations."

Brigadier-General Alfredo Santos (Philippines) was appointed head of the SEATO Permanent Military Planning Office established in Bangkok.—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Australian News and Information Bureau - New Zealand Department of External Affairs - Pakistan High Commissioner's Office, London - Le Monde, Paris)

(Prev. rep. SEATO, 14840 A.)

A. UNITED KINGDOM. — Foreign Service Appointments. - New Ambassadors to U.S.S.R. and Japan.

The Foreign Office announced on Nov. 14, 1956, that Mr. [now Sir] D'Arcy Patrick Reilly had been appointed H.M. Ambassador in Moscow in succession to Sir William Hayter, consequent upon the latter's appointment as Deputy Under-Secretary of State at the Foreign Office *vice* Sir Harold Caccia, now Ambassador in Washington (see 15011 A). Sir Patrick Reilly presented his letters of credence in Moscow on Feb. 28, 1957.

Sir Patrick Reilly, upon whom a knighthood was conferred in the New Year Honours (see 15328 A), had been Minister at H.M. Embassy in Paris before his appointment to the Moscow Embassy. A Fellow of All Souls College, he had a distinguished academic career at Oxford before joining the Foreign Service.

Other appointments in the Foreign Service announced during recent months are listed below :

Afghanistan. Mr. M. C. Gillett, Consul-General at Los Angeles, as Ambassador in Kabul *vice* Sir Esler Dening, who was appointed Ambassador to Japan on Jan. 26, 1957 (see below).

Bolivia. Mr. J. T. Henderson, lately Minister at Reykjavik, as Ambassador in La Paz *vice* Sir John Lomax, retiring.

Burma. Mr. R. H. S. Allen, Minister in Guatemala, as Ambassador in Rangoon *vice* Mr. Paul Gore-Booth, who had been appointed a Deputy Under-Secretary of State at the Foreign Office. [Mr. Gore-Booth received a knighthood in the New Year Honours.]

Cambodia. Mr. H. N. Brain, Minister at the Tokio Embassy, as Ambassador in Pnom-Penh *vice* Mr. R. P. Heppel, appointed Minister Counsellor at the Vienna Embassy.

Costa Rica. Mr. D. J. Mill Irving as Minister in San José *vice* Mr. C. N. Ezard, retiring. Mr. Mill Irving subsequently assumed Ambassadorial rank following the decision of the U.K. and Costa Rican Governments to raise their diplomatic missions in the respective capitals to the level of embassies (see below).

Guatemala. Mr. Thomas Wikeley, Consul-General at Jerusalem, as Ambassador in Guatemala City *vice* Mr. Allen, appointed Ambassador to Burma (see above).

Israel. Sir Francis Rundall, Consul-General at New York, as Ambassador in Tel-Aviv *vice* Sir John Nicholls, appointed Ambassador to Yugoslavia (see below).

Jordan. Mr. Charles Johnston as Ambassador in Amman in succession to Sir Charles Duke, now Ambassador to Morocco (see below).

Japan. Sir Daniel Lascelles, Ambassador in Kabul, as Ambassador in Tokio (Jan. 26, 1957) *vice* Sir Esler Dening, retiring.

Morocco. Sir Charles Duke, Ambassador in Amman, as Ambassador in Rabat *vice* Mr. Freese-Pennefather, appointed Consul-General at San Francisco.

Paraguay. Mr. J. W. Wall, Consul-General at Salonika, as Ambassador in Asunción *vice* Mr. J. Robinson.

South Vietnam. Mr. R. W. Parkes, lately Ambassador to Saudi Arabia, as Ambassador in Saigon *vice* Sir Hugh Stephenson, who had been appointed Consul-General at New York.

Yugoslavia. Sir John Nicholls, Ambassador in Tel-Aviv, as Ambassador in Belgrade *vice* Sir Frank Roberts, who had been appointed permanent U.K. representative on the North Atlantic Council in succession to Sir Christopher Steel, now Ambassador in Bonn (see 15168 C).

It was announced on Sept. 18, 1956, that Sir George Young, the head of the Foreign Office News Department, had been appointed Minister at the Paris Embassy in succession to Sir (then Mr.) Patrick Reilly. [As stated above, Sir Patrick Reilly was subsequently appointed Ambassador in Moscow]. Mr. Peter Hope, Counsellor at the Bonn Embassy, succeeded Sir George Young as head of the Foreign Office News Department and, in that capacity, as chief spokesman of the Foreign Office.

During December the Foreign Office announced that the U.K. Government on the one hand, and the Governments of Costa Rica and El Salvador on the other, had agreed to raise their respective diplomatic missions to the status of embassies. The British Ministers in San José and San Salvador, and the Costa Rican and Salvadorean Ministers in London, were accordingly appointed Ambassadors. (Times - Daily Telegraph)

(Prev. rep. 15168 C ; 15011 A.)

B. RHODESIAN FEDERATION. — Appointment of Diplomatic Mission in Washington.

It was announced in Salisbury on Feb. 5 that the Rhodesian Federation would appoint a mission in Washington which would be attached to the British Embassy and would be headed by Sir Edgar Whitehead, formerly Minister of Finance in the Southern Rhodesian Government, who would have the rank of Minister. The Washington mission was the first of its kind to be established by the Federal Government in a foreign country.—(Federal Information Department, Salisbury)

A. MALAYA. — Proposed Draft Constitution for Malayan Federation on Attainment of Independence. - Report of Reid Commission. - Defence and Financial Agreements with Britain. - Guarantees for British Staff in Malayan Public Service.

The report and recommendations of the Federation of Malaya Constitutional Commission, headed by Lord Reid, were published in London and Kuala Lumpur on Feb. 20 in the form of (1) a draft Constitution for the future independent Federation; and (2) draft Constitutions for the Settlements of Malacca and Penang, which are at present Crown Colonies coming directly under the Queen's sovereignty and do not form part of the Malayan Federation.

The Commission's conclusions were based on its investigations in Malaya, starting in June 1956, during which it had numerous meetings with Federal, State, and Settlement officers, took evidence in public, and received memoranda from organizations and individuals "widely representative of all communities and interests and all sections of the population."

In the introduction to their report the Commissioners summarized their conclusions as follows: "We think it essential that there should be a strong Central Government with a common nationality for the whole of the Federation. Moreover, we think it also essential that the States and Settlements should enjoy a measure of autonomy, and that their Highnesses the Rulers should be constitutional rulers of their respective States with appropriate provisions safeguarding their position and prestige. We have made provision for a new constitutional Head of State for the Federation, and for the Settlements becoming States in the new Federation.

"We have adopted without substantial change proposals for the acquisition of citizenship of the Federation which have been agreed by the main parties representing all races. We recognize the need for safeguarding the special position of the Malays in a manner consistent with the legitimate interests of other communities, and we have given particular consideration to this need. We have framed our recommendations on the basis that Malaya will remain within the Commonwealth, and we have found general agreement on this matter."

The proposed constitutional provisions recommended by the Reid Commission are summarized below.

Territory. The independent Federation would comprise the existing nine Malay States (members of the present Federation) and the Settlements of Penang and Malacca, which would become States of their own and over which the Queen's direct sovereignty would lapse.

Head of State. The Head of State of the Malayan Federation (*Yang di-Pertuan Besar*) should be elected for five years by the Malay Rulers from among themselves, and be succeeded by rota based on each Ruler's length of reign in his own State. The senior of the present Rulers would be offered the post first, and as Head of State should be a constitutional ruler bound to accept the advice of a Prime Minister. [The present State Rulers, the Commissioners pointed out, were not constitutional rulers.] The "Conference of Rulers" should also elect a Deputy Head of the Federation.

[This proposal implied that the Malayan Federation would be the first country to become a member of the Commonwealth without the Queen being its sovereign at the time—although the Federation would acknowledge the Queen as Head of the Commonwealth, as India and Pakistan had done. At present the link with the Sovereign takes the form of treaties between the Queen and the Malay Rulers, except for the Crown Colonies of Penang and Malacca which come under the direct rule of the Queen.]

Parliament. This would comprise a House of Representatives and a Senate.

The House of Representatives, consisting of 100 members, would be wholly elected for a maximum term of five years by single-member constituencies on a territorial basis; it could, however, be dissolved by the Head of State at any time.

The Senate would have 33 members—22 elected by the Legislative Assemblies of the States (two for each of the 11 States), and another 11 nominated by the Head of State. Members would hold office for six years, half being elected or appointed every three years.

[Two members of the Commission (Sir William McKell and Mr. Justice Abdul Hamid), in a minority report, considered that the nomination of Senators was out of step with parliamentary democracy. They also opposed the election of Senators by the State Legislatures instead of by the people.]

Legislation would require approval by both Houses of Parliament. However, if the Senate refused to pass a Bill which had been passed by the Lower House, the Bill should become law if, after a lapse of 12 months, the House resolved that it be submitted for the assent of the Head of State. In the case of a money Bill, the period of delay should only be 21 days. The Lower House should not be able to over-rule the Senate on a Bill for amendment of the Constitution.

Prime Minister. The Prime Minister of the Federation should be appointed by the Head of State and should be the person most likely to command the confidence of the House of Representatives. He should then choose his Cabinet Ministers. The Head of State should be entitled to choose the Prime Minister, but in all other matters except the dissolution of Parliament he should be bound to accept the advice of the Prime Minister or the Cabinet.

Citizenship. After pointing out that many residents in the Federation were by birth or descent citizens of the United Kingdom and Colonies without realizing it, the Commission recommended that those having this status should not be required to renounce it on becoming Federation citizens. Instead, they should be recognized as both Federation and Commonwealth citizens, though they would owe undivided loyalty to Malaya.

In this connexion the report said: "Under existing law in the Commonwealth, dual citizenship within the Commonwealth is recognized. For example, a person can be at the same time a citizen of India or Pakistan and a citizen of the U.K. and Colonies. But a person with dual citizenship owes undivided loyalty to the country in which he is residing. The law in the Federation should conform to this practice."

New Federal citizens would have to swear allegiance to the Federation and declare that they would not "exercise any rights or privilege they may have under the nationality laws of any foreign country." The Commission did not recommend renunciation of foreign citizenship because "under the laws of certain countries a citizen has no power to renounce his citizenship" e.g. Britain prohibited such renunciation unless another citizenship had been acquired.

The recommendation that British subjects in the Federation should not have to choose between being British or Federation citizens, but would have both Federation and Commonwealth citizenship, would also apply to British subjects in Penang and Malacca.

The Commission recommended that a person should be a citizen if he was one before Merdeka Day i.e. the date of independence on Aug. 31, 1957—or was born in the Federation on or after that day. If he was entitled before that day to be registered as a citizen, but had not registered, he should still be entitled to do so. [Mr. Justice Abdul Hamid, however, considered that the terms of a clause in the present Federation agreement on which this provision would be based favoured citizens of the U.K. and Colonies—"a large class of people whose status is not easy to define."]

Persons born in the Federation before Merdeka Day should on application become citizens if (i) they were over 17; (ii) they had lived for five of the preceding seven years in the Federation and intended to stay there permanently; and (iii) they had an elementary knowledge of Malay. There would, however, be no test of Malay if application was made within one year of Merdeka Day. [Thus, though *jus solis*—the right of citizenship by birth—was not formally made retrospective from Merdeka Day, it will in fact be retrospective if accompanied by at least five years' residence.]

Persons living in the Federation on Merdeka Day but not born there would be entitled to become citizens if (i) they had lived there for eight of the previous 12 years and intended to stay, and (ii) they had an elementary knowledge of Malay. In this case they would not be tested in Malay if they applied for citizenship within one year and were 45 years of age.

In all other cases the Commission proposed at least 10 years' residence to qualify for naturalization, because it was difficult to infer loyalty to Malaya, and the intention to stay there permanently, from any shorter period.

Fundamental Rights. Guarantees were laid down against discrimination on grounds of religion, race, descent, or place of birth.

The Commission's terms of reference required that provision should be made in the Constitution for the "safeguarding of the special position of the Malays." They stated that they had found it difficult to reconcile the terms of reference if the protection of the special position of the Malays signified the granting of special privileges, permanently, to one community only and not to the others. The Commission agreed, however, that present preferences for the Malays (e.g. land reservation, and quotas against other races for admission to public services and for business licences) should remain, although they should gradually disappear. Accordingly, the quota system should be reviewed completely after 15 years.

Religion. The majority of the Commission were of the opinion that there should not be any declaration in the Constitution to the effect that Islam should be the State religion.

[Mr. Justice Abdul Hamid dissented from this view and proposed that the following Article should be inserted in the Constitution: "Islam shall be the religion of the State of Malaya, but nothing in this Article shall prevent any citizens professing any religion other than Islam from professing, practising, and propagating that religion, nor shall any citizen be under any liability by reason of his not being a Moslem."]

Language. Malay should be the national language, but for a period of at least 10 years English should continue to be used as an official language. For some considerable time announcements and other documents should also be published in Chinese and Tamil.

Judiciary. The present Supreme Court should be retained, and should have the functions of interpreting the Constitution and protecting State rights and fundamental liberties, in addition to its ordinary functions.

The Chief Justice and other Federal judges should be appointed by the Head of State.

State Constitutions. The existing constitutions of the Malay States should be amended so that (1) the Ruler became bound to accept the advice of the *Mentri Besar* (the Chief Minister of the State) or the State Executive Council in the same way as the Head of State was bound to accept the advice of the Prime Minister or Cabinet; (2) the *Mentri Besar* became responsible to the Council of State (to be called in future "the State Legislative Assembly") and would cease to hold office on ceasing to possess the confidence of that Assembly.

Penang and Malacca should have the same status and powers as the other States. Their Governors should be appointed by the Head of State after consultation with the respective State Governments. Because of the deferment of general elections until 1959 (see below), the present Settlement Councils should continue in existence from Independence Day until January, 1959.

Division of Central and State Executive Power. The Commission pointed out that since 1948 the legislative power had rested with the Federal authorities but the executive power with the States. It expressed the opinion that this should not continue and that the two should be vested in principle in the Central Government.

Nevertheless, it was proposed that the disposal and administration of land should remain a State subject, although the Federation Government should have powers to carry out development schemes in the national interest and decide what land was required. There should be a new National Land Code, and with this in view the Federal Parliament should be able to pass Acts on State subjects. These Acts, however, should not come into force until adopted by the State(s) concerned.

The States should have greater financial autonomy, and Federal grants should be fixed for five years after consultation with a National Finance Council consisting of the Federal Prime Minister, the Finance Minister, and one representative from each State. The Federal Parliament, however, would not be obliged to do more than consult this Council.

Parliament would have the right to restore constitutional government in any State, or to introduce the new Constitution in any State which might have refused to do so by Jan. 1, 1959.

Public Services. The principles adopted at the London Conference of 1956 on the impartiality and efficiency of the public services were considered indispensable, and were incorporated in the constitutional draft.

Emergency Legislation. The present emergency regulations should remain in force for one further year, unless then renewed by Parliament. The Federal Government would, however, have special emergency powers, and if the security or economic life of the Federation was "threatened by war, external aggression, or internal disturbances" the Head of State might issue a proclamation declaring a state of emergency. In the event of threats of organized violence against persons or property, the Government would be empowered to take action regardless of constitutional limitations. No preventive detention should last longer than three months unless an advisory board appointed by the Chief Justice found that there was sufficient justification for a longer period of detention.

Next Election. Because large numbers of residents would want to become citizens and voters, and to give them time to do so, it was suggested that no new elections should be held before the beginning of 1959, and that the present Legislative Council of the Federation should continue to function until then. To avoid complicated electoral delimitation problems in the first election, the 52 existing constituencies would be doubled, making 104 seats, but all future Houses of Representatives would have 100 members as stated above. The elections should be conducted by an independent commission.

Entry into Force of Constitution. August 31, 1957 (Merdeka Day) was proposed as the target date for the entry into force of the new Constitution should the proposals be accepted.

Amendment of Constitution. Changes in the Constitution should only be made by the new Parliament (i.e. the one to be elected in 1959) or future Parliaments. A two-thirds majority of the members present and voting would be required in each House.

The members of the Commission (in addition to Lord Reid) were Sir Ivor Jennings, Master of Trinity Hall, Cambridge; Sir William McKell, a former Governor-General of Australia; Mr. B. Malik, a former Chief Justice of the Allahabad High Court; and Mr. Justice Abdul Hamid, of the West Pakistan High Court.

It was announced on the same date (Feb. 20) that a committee comprising five representatives of the Rulers and five of the Federation Government, under the chairmanship of Sir Donald MacGillivray (the High Commissioner), would consider the report in two stages—dealing first with those subjects on which there was unlikely to be opposition, and then those for which a compromise solution would have to be sought so as to achieve unanimity. Tengku Abdul Rahman, the Chief Minister of the Federation, said that there would inevitably have to be many amendments to the report, which in its present form "could never be accepted *in toto*."

U.K.-Malayan Defence and Financial Agreements.

Following discussions in London between the British Colonial Secretary (Mr. Lennox-Boyd) and a Malayan delegation led by Tengku Abdul Rahman and Colonel H. S. Lee (the Finance Minister), it was announced by the Colonial Office on Jan. 10, 1957, that agreement had been reached on (*a*) British assistance for Malaya's external defence and the development of the Malayan armed forces; (*b*) British financial aid to the Federation to enable it to deal with the terrorist problem and to pursue its development programme.

Under the defence agreement, the British Government would assist the Federation in the external defence of Malaya and in the training and development of its armed forces, while the Federation Government would allow Britain to maintain in Malaya the forces necessary for the fulfilment of Commonwealth and international obligations.

Details of the proposed financial assistance by the U.K. were as follows:

(1) Assistance toward the cost of the emergency during the five-year period 1957-61. For the first three years the U.K. Government would provide an annual grant of £3,000,000; thereafter, the two Governments would consider the situation then prevailing and would decide what assistance, subject to a maximum of £11,000,000, was required, either as a grant or an interest-free loan, for the final two years of the period,

(2) Development of the Federation's forces The U.K. Government would seek parliamentary sanction (*a*) to contribute the unspent balance (£6,500,000 on Jan. 1, 1956) of the grant already promised toward the capital cost of expansion of the Federation's Army; (*b*) to make available equipment worth £5,500,000; and (*c*) to provide a grant of up to £1,300,000 for local purchases of equipment and building work for the Federation Navy.

(3) The British Government would make available to the Federation a grant for development equivalent to the unspent balance of the Federation's Colonial Development and Welfare allocations at the date of independence.

It was announced that the agreement would be signed soon after Malaya attained independence in August, 1957.

It was reported in the British press that no undertaking had been given by the U.K. Government in reply to Malayan proposals for a large development loan. On his return to Kuala Lumpur from London, Tengku Abdul Rahman said that Malaya intended to seek help from any country interested in the common anti-Communist cause.

In a statement in the Legislative Council on March 13, the Chief Minister revealed that it had been agreed at the London talks that British forces would be reduced by half; he did not specify, however, whether "British" in this context meant U.K. forces alone or U.K. and other Commonwealth forces. [There are at present about 25,000 Commonwealth troops in Malaya, including 12,000 from Britain.] Tengku Abdul Rahman added that he had sought a guarantee that there would be sufficient Commonwealth troops remaining to carry on the fight against Communism.

Malayanization of Public Service.

A statement on the future of the public service, issued by the Federation Government on Oct. 27, guaranteed minimum periods of continued employment to British personnel; offered them continued eligibility for promotion; and at the same time permitted them to retire with compensation at any date after July 1, 1957.

The statement pointed out that, since a sufficient number of qualified Malayans was not yet available, the various departments of the Public Service would not be completely Malayanized until 1960 in some cases, 1962 in others, and 1965 in yet others. The Government would therefore guarantee employment to British staff until July 1, 1960, in 23 departments, including the police (apart from police lieutenants), immigration, information, and some categories of the agriculture, broadcasting, education, medical and veterinary services. Guarantees up to 1962 would be given to the administrative staff among others. Those who would receive guarantees up to 1965 would include the research staffs in the agriculture and veterinary departments, marine officers, medical officers, engineers, chemists, and town planners.

Officers who would receive no guarantee would include those in the meteorological and civil defence departments, as well as those in the co-operative and labour departments not on the Malayan Civil Service list.

As regards staff on contract, it was stated that existing contracts would be observed, and that many such staff would be required for as long as their colleagues on the permanent establishment.

Educational Policy.

A Bill embodying the Federation Government's educational policy was approved by the Legislative Council on March 7.

The Bill provided for a national system of education which would make Malay the national language and at the same time assist the growth of non-Malay languages and cultures. In the sphere of religious instruction, it provided that, where there were 15 or more Moslem pupils in a school, the Moslem faith would be taught compulsorily and at State expense for at least two hours a week. Instruction in other religions would depend on whether the communities concerned wanted it and could pay the teachers.

The Bill placed all assisted primary and trade schools under local authorities, and assisted secondary schools under the Minister for Education. Assisted secondary schools were defined as schools "providing a five-year course of secondary education in which the national language, the English language, the Chinese language, or the Tamil language, or any two of such languages, are used as the medium of instruction, and in which the national language and the English language are compulsory subjects of instruction when such languages are not used as a medium of instruction."

Tunku Mohammed Bin Tunku Besar Burhanuddin, the first Commissioner for the Malayan Federation in Pakistan, assumed his duties in Karachi at the end of February.—(Times - Daily Telegraph - Manchester Guardian - Pakistani High Commissioner's Office, London) **(Prev. rep. 15153 A.)**

A. MALTA. — Constitutional and Economic Talks in London. - U.K. Financial Aid for 1957-58.

It was announced in London and Valletta on March 8 that U.K. financial assistance to Malta for 1957-58 would amount to £6,077,000, to be allocated as follows :

(*a*) Ordinary budget deficit : £899,000.

(*b*) Capital budget, including war damage works and Colonial development and welfare grants : £4,638,000.

(*c*) War damage compensation : £540,000.

Constitutional and economic talks had opened in London on Feb. 12 between a Maltese delegation led by Mr. Mintoff, the Prime Minister, and a British delegation led by Mr. Lennox-Boyd, the Colonial Secretary. The other members of the Maltese delegation were Mr. J. J. Cole (Minister of Posts and Agriculture), Dr. J. Cassar (Minister of Justice), Mr. E. Cuschieri (Treasurer), and Professor A. J. Mamo (Attorney-General). The first phase of the talks ended on Feb. 27 to allow Mr. Mintoff to return to Malta to present his budget; it was announced at the same time that agreement had been reached on the U.K. contribution to Malta's budget and that the talks would be resumed on March 12.

Prior to the London discussions, the 17 Nationalist members had withdrawn from the Malta Legislative Assembly on Jan. 28 in protest against the fact that they had not been consulted regarding the talks. In a letter to the Colonial Secretary on Feb. 7, the Nationalist Party described its exclusion from the talks as an "unprecedented suppression of its elementary constitutional rights." The Nationalist members resumed their attendance in the Assembly on March 4 after assurances had been received from the British Government that the Opposition would be given an opportunity to express its views on the draft Constitution before any definite steps were taken on it.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. Malta, 15347 A.)

B. SUDAN. — Government takes over Missionary Education in Southern Sudan.

The Sudanese Minister of Education (Sayed Ziada Arbab), announced on Feb. 13 that the Government had decided to take over the majority of all Mission schools in the three southern provinces of Equatoria, Bahr-el-Ghazal, and Upper Nile.

The Minister explained (1) that all village schools run by the Missions would be taken over on April 1; (2) that all Mission boys' elementary schools and the six vernacular teacher training centres would be taken over during 1957; (3) that girls' elementary schools would be taken over at a date to be fixed later. Three technical schools would continue to be run by the Missions for one or two years pending examination of the best means of their taking-over by the Government, and the Missions would also be allowed to continue to run three intermediate schools for the time being. Meanwhile the Government would immediately open three intermediate schools of its own.

The Minister stressed that the Government's decision "in no way implied that the Mission system of education was suspect of being disruptive." On the contrary, the Government fully appreciated the excellent work done by the Missions hitherto, but it felt that it should itself take over full and direct responsibility for education in the Southern provinces. The Missions would still be allowed to continue to give religious instruction in all schools according to the beliefs of the students, and would be given every facility for this. All Sudanese schoolmasters at present teaching in Mission schools would be given the opportunity of enrolling in the Government service.

(Sudan Government Information Centre, Khartoum)

C. JAPAN. — Resignation of Mr. Ishibashi. - Mr. Kishi elected Prime Minister. - The Kishi Cabinet.

Mr. Ishibashi, the Japanese Prime Minister, resigned on Feb. 23 for reasons of ill-health, having held the Premiership for only two months. On the following day Mr. Nobusuke Kishi (the Foreign Minister) was unanimously elected Prime Minister by the Diet, receiving 276 votes against 129 for Mr. Suzuki, chairman of the Socialist Party. Mr. Kishi's appointment was confirmed by the House of Counsellors on the same day by 147 votes to 70.

On Feb. 26 Mr. Kishi announced his Cabinet, the membership of which was identical with Mr. Ishibashi's Administration except that Mr. Kishi retained the Foreign Affairs portfolio in addition to the Premiership. Mr. Kishi was elected president of the Liberal Democratic Party on March 20.

Prior to Mr. Ishibashi's resignation there had been one further change in the membership of his Government—Mr. Akira Kodaki having been appointed Minister of the Defence Forces, a portfolio originally held by Mr. Ishibashi *ad interim*.

(Japanese Embassy Press Office, London) (15372 A ; 15307 C.)

D. PHILIPPINES. — President Magsaysay killed in Air Crash. - Inauguration of President Garcia.

President Magsaysay of the Philippines was killed on March 17, together with 24 other persons, when the presidential airliner in which he was travelling from Cebu City to Manila crashed in dense jungle country on Cebu Island shortly after the take-off. The bodies of the President and the other victims of the disaster were found on the following day by Filipino troops and rescue workers. Among the victims of the disaster were the head of the Philippine Air Force, Brigadier-General Benito Ebuen, and the Secretary for Education, Señor Gregorio Hernandez. The disaster—of which there was only one survivor, a newspaper reporter—was believed to have been due to mechanical trouble.

Ramón Magsaysay (49) was born in 1907 in Zambales Province (Luzon) of mixed Tagalog, Chinese and Spanish descent. Of relatively humble origin (his father was a blacksmith and schoolteacher), he started life as a garage mechanic and at the time of the Japanese invasion was foreman of a provincial bus company. He fought with the Americans until the surrender of the Bataan peninsula, took to the hills with a few U.S. officers, and during the Japanese occupation distinguished himself as an outstanding guerrilla leader, the forces under his command numbering nearly 15,000 by the time the Americans returned to the Philippines in 1944. At the end of the war he was appointed Military Governor of West-Central Luzon by the American authorities.

Following his election to the Philippine Congress in 1950, Magsaysay was appointed by President Quirino as Secretary of Defence, in which capacity he achieved notable success in quelling the Communist-led Hukbalahap rebellion. Though elected to Congress as a Liberal, he left that party early in 1953 in dissatisfaction with its policies (see 13305 A) and joined the Nationalist Party (*Nacionalistas*), which adopted him as its candidate in the Presidential election of that year. In November, 1953, Señor Magsaysay was elected to the Presidency with a majority of nearly 1,600,000 votes over the outgoing President, Señor Quirino.

President Magsaysay, who achieved great personal popularity both in his own country and in the United States, was a strong opponent of Communism and an advocate of close co-operation with the U.S.A. and the free democracies.

Vice-President Carlos P. Garcia (61), Foreign Minister under President Magsaysay, was sworn-in as President of the Philippine Republic on March 18. Born in the Visayan Islands (Central Philippines), he was a school-teacher before entering public life, and Governor of Bohol Province for nine years before his election to the Senate in 1941. During the Japanese occupation he remained consistently loyal to the Allied cause, being hunted by the Japanese for three years and having a price put on his head by the "puppet" regime. A member of the Nationalist Party, he was President Magsaysay's running-mate in the presidential election of November 1953.

(New York Times -New York Herald Tribune)

(Prev. rep. President Magsaysay, 13305 A.)

E. INDIA. — Creation of Family Planning Board.

It was announced in New Delhi on Sept. 5, 1956, that the Ministry of Health had set up a Family Planning Board under the chairmanship of the Minister of Health, Rajkumari Amrit Kaur.

The Family Planning Board will advise the Government on the following matters : (*a*) Research and studies on the inter-relationship between economic, social, and population changes, and on reproductive patterns, attitudes and motivations affecting the size of family planning; (*b*) educating public opinion on matters of family planning; (*c*) advice and necessary services in family planning through hospitals, health centres, and clinics; (*d*) facilities for the training of personnel in family planning; (*e*) formulation of schemes for the improvement of the health of mothers and children, and for bringing about better conditions of family living; (*f*) research on, and the production of, contraceptives; (*g*) literature and periodicals in furtherance of the objectives of the scheme.

The Family Planning Board's recommendations will be implemented by the Ministry of Health. (The Statesman, Calcutta)

F. BAHREIN. — Resumption of Saudi Arabian Oil Supplies. - Reopening of Oil Pipeline.

The flow of oil from Saudi Arabia to the Bahrein refinery was resumed on March 9 for the first time since November, when the pipeline was closed by the Saudi Arabian Government after the Israeli and Anglo-French military operations against Egypt. The reopening of the pipeline followed the withdrawal of Israeli forces from the Gaza Strip and the Sharm-el-Sheikh area on the Gulf of Akaba.—(Times) **(Prev. rep. 15201 A, page 15211.)**

Note. The output of the Bahrein refinery before the stoppage was 200,000 barrels a day, of which 170,000 barrels (85 per cent) came by pipeline from the Saudi Arabian oilfields and the remainder from the Bahrein oilfields. (Daily Telegraph).

MARCH 30—APRIL 6, 1957

A. WESTERN POWERS. — Bermuda Conference between President Eisenhower and Mr. Macmillan. - United States to join Military Committee of Baghdad Pact. - U.S. Guided Missiles for Britain. - M. Mollet's Talks with President Eisenhower, Mr. Macmillan, and Mr. St. Laurent. - Mr. Macmillan's Statement to House of Commons on Bermuda Conference.

A conference between President Eisenhower and the British Prime Minister, Mr. Harold Macmillan, was held in Bermuda from March 21-24, following earlier discussions in Washington between President Eisenhower and the French Prime Minister, M. Mollet (Feb. 26-28) and in Paris between Mr. Macmillan and M. Mollet (March 9). The Prime Minister of Canada, Mr. St. Laurent, also had talks with M. Mollet after the latter's visit to Washington, and with Mr. Macmillan in Bermuda after the conference between the British Prime Minister and President Eisenhower. The various conferences are described below under cross-headings:

Mollet-Eisenhower and Mollet-St. Laurent Discussions.

The French Prime Minister, accompanied by the Foreign Minister (M. Pineau), paid a three-day visit to Washington from Feb. 26-28 at the invitation of President Eisenhower. The Secretary of State (Mr. Dulles) and M. Pineau took part in the discussions, which ended with the publication of a joint communiqué (cross-headings inserted) summarized below:

European Common Market and Euratom. After stating that there had been "a friendly exchange of views in an atmosphere which reflected the long-standing and friendly ties" between France and the United States, the communiqué said that M. Mollet had explained to President Eisenhower "the marked progress which has taken place in the past few months toward the creation of a European Atomic Community (Euratom) and toward a European Common Market which will group together 165,000,000 consumers in six European nations." M. Mollet had also informed the President of "the French Government's interest in the coming negotiations on a European Free Trade Area in which Great Britain would participate."

President Eisenhower had "expressed his personal interest in the success of these treaties on European integration, whose entry into force will represent an important date for all the free world." The President and M. Mollet had "noted that the creation of a united Europe would contribute to the strengthening of relations between the U.S.A. and Europe . . . to the mutual benefit of the European and American peoples."

The Middle East. The President and the Prime Minister had expressed "their common conviction that solutions to the problems of the area can be achieved by peaceful means, in conformity with the principles of justice and international law."

The Suez Canal. As regards the future status of the Suez Canal, President Eisenhower and M. Mollet recalled that the 1888 Convention "contemplated a definite system to guarantee at all times and to all Powers the free use of the Canal." In this connexion they "reaffirmed their adherence to the six requirements unanimously adopted by the U.N. Security Council, and accepted by Egypt last October, which called for . . . free and open transit through the Canal without discrimination, and the insulation of the operation of the Canal from the politics of any country."

African Territories. The President and the Prime Minister had "exchanged views on the political and economic evolution in African territories." In this connexion M. Mollet had stressed "the historical importance of the decision . . . to associate the overseas territories with the European Common Market—a decision which bears witness to the desire of Europe to place its industrial potential at the service of the economic development and social progress of Africa, and to reinforce the inter-dependence of the two continents."

In addition, M. Mollet had informed President Eisenhower of "the profound changes which France has brought about in the political structure of her overseas territories with a view to preparing them for the democratic conduct of their own affairs." [Recent French legislation on this matter will be described in a subsequent issue—*Ed. K.C.A.*] Furthermore, M. Mollet had "reviewed the French programme for Algeria."

The President and the Prime Minister were "in full accord in their views that such objectives are in conformity with the desire of both Governments to improve the living conditions of mankind and to assure, along with a better standard of living, the benefits of essential democratic liberties."

The NATO Alliance. After reaffirming "the vital importance of the North Atlantic Pact as a basic element of free world defence," the President and M. Mollet "noted that free world security requires the maintenance on the Continent of Europe of forces with conventional armaments and modern weapons at such levels and in such balance as to discourage any aggression against the territories of all NATO countries." They also reaffirmed "the importance of continuing to support the early reunification of Germany by means of free elections," and were "agreed that a common approach must be taken with regard to the threat of Communist imperialism in Europe and other parts of the world."

Conclusion. The communiqué ended by saying that President Eisenhower and M. Mollet had "agreed on the value of these frank and direct talks and expressed their pleasure, as old friends, at meeting again."

M. Mollet and M. Pineau visited Ottawa from March 2-4 for discussions with Mr. St. Laurent and Mr. Lester Pearson (Canadian Secretary of State for External Affairs), on which no communiqué was issued. M. Mollet addressed the Canadian Parliament on March 4 and paid visits to Quebec and Montreal before returning with M. Pineau to Europe.

Macmillan-Mollet Discussions.

Mr. Macmillan, accompanied by Mr. Selwyn Lloyd and by Foreign Office and Treasury officials, visited Paris on March 9 for talks with M. Mollet, M. Pineau, and French experts. No communiqué was published, the talks being complementary to the Franco-American discussions in Washington and the forthcoming Anglo-American conference in Bermuda. It was understood that a wide range of subjects was discussed, including the Middle East and Suez Canal problems, the projected European Common Market and Free Trade Area, and, in particular, the question of British troop reductions in Germany, which had given rise to concern in France. Mr. Macmillan made the following statement at London Airport after his return from Paris:

"The French feeling [on the question of British troop reductions in Europe] is not concerned so much with our military dispositions or the precise formation of our armed forces. They are only anxious that anything we should do should not appear to be the beginning of a walk-out . . . On that point we have been able to give them a reassurance. I was able to explain our position to them and to tell them that our reorganization was partly to save our money in our strained economy, but still more to get value for money, and that we wanted to make our military situation as powerful with less expenditure of money and manpower.

The Bermuda Conference.

Prior to the above-mentioned discussions, Mr. Macmillan had informed the House of Commons on Feb. 12 that he was meeting President Eisenhower in Bermuda from March 21-24; that Bermuda had been chosen as the meeting-place at the President's suggestion; and that Mr. St. Laurent would also visit Bermuda on March 25-26 for discussions "on matters of common concern."

The three-day discussions in Bermuda between President Eisenhower and Mr. Dulles on the one hand and Mr. Macmillan and Mr. Selwyn Lloyd on the other—held at the Mid-Ocean Club—ended with the publication of a joint communiqué which was divided into two Annexes: the first listing 11 points on which the President and Mr. Macmillan were in full agreement, and the second dealing with the joint attitude of the two Governments toward nuclear tests and the problem of nuclear radiation.

The first Annexe announced *inter alia* that the United States was willing to "participate actively" in the Military Committee of the Baghdad Pact, and that "certain guided missiles" would be made available by the U.S.A. for use by British forces "in the interest of mutual defence and mutual economy." The second Annexe stated that both Governments were agreed (*a*) that, in the absence of an effective agreement for comprehensive disarmament, the security of the free world must continue to depend on the "nuclear deterrent"; (*b*) that continued nuclear testing was therefore required, at least for the present; (*c*) that both Governments would conduct nuclear tests in such a manner "as will keep world radiation from rising to more than a small fraction of the levels that might be hazardous"; and (*d*) that the U.S.A. and Great Britain would be ready "to permit limited international observation of such tests if the Soviet Union would do the same."

The communiqué said that President Eisenhower and Mr. Macmillan were "well satisfied" with the results of the conference and intended "to continue the exchange of views so well begun." Its text was as follows:

"The President of the United States and the Prime Minister of the United Kingdom, assisted by the U.S. Secretary of State, the British Foreign Secretary, and other advisers, have exchanged views on many subjects of mutual concern. They have conducted their discussions with the freedom and frankness permitted to old friends in a world of growing inter-dependence. They recognize their responsibilities to seek to co-ordinate their foreign policies in the interests of peace with justice.

"Among the subjects discussed in detail were: common problems concerning the Middle East, NATO, European co-operation, the reunification of Germany, and defence. The President and the Prime Minister are well satisfied with the results of this conference, at which a number of decisions have been taken. They intend to continue the exchange of views so well begun.

"The agreements and conclusions reached on the main subjects discussed at the conference are annexed:

Annexe 1.

"(1) Recognition of the value of collective security pacts within the framework of the United Nations, and the special importance of NATO for both countries as the cornerstone of their policy in the West.

(2) Reaffirmation of common interest in the development of European unity within the Atlantic Community.

(3) Agreement on the importance of closer association of the United Kingdom with Europe.

(4) Agreement on the benefits likely to accrue for European and world trade from the plans for the Common Market and the Free Trade Area, provided they do not lead to a high tariff block, and on the desirability that all countries should pursue liberal trade policies.

(5) Willingness of the U.S.A. under authority of the recent Middle East joint resolution [see 15417 A] to participate actively in the work of the Military Committee of the Baghdad Pact.

(6) Reaffirmation of intention to support the right of the German people to early reunification in peace and freedom.

(7) Sympathy for the people of Hungary, condemnation of repressive Soviet policies toward the peoples of Eastern Europe and of Soviet defiance of relevant U.N. resolutions.

(8) Agreement on the need for the speedy implementation of recent resolutions of the U.N. General Assembly dealing with the Gaza Strip and the Gulf of Akaba.

(9) Agreement on the importance of compliance both in letter and in spirit with the Security Council resolution of Oct. 13 concerning the Suez Canal [see 15252 A], and on support for the efforts of the Secretary-General to bring about a settlement in accordance with its provisions.

(10) Joint declaration on policy regarding nuclear tests (see Annexe 2).

(11) Agreement in principle that in the interest of mutual defence and mutual economy certain guided missiles will be made available by the United States for use by British forces."

Annexe 2.

"(1) For a long time our two Governments have been attempting to negotiate with the Soviet Union, under the auspices of the U.N. Disarmament Commission, an effective agreement for comprehensive disarmament. We are continuing to seek such an agreement in the current disarmament discussions in London. In the absence of such an agreement the security of the free world must continue to depend to a marked degree upon the nuclear deterrent. To maintain this effectively, continued nuclear testing is required, certainly for the present.

(2) We recognize, however, that there is sincere concern that continued nuclear testing may increase world radiation to levels which might be harmful. Studies by independent scientific organizations confirm our belief that this will not happen so long as testing is continued with restraint. Moreover, the testing programme has demonstrated the feasibility of greatly reducing world-wide fall-out from large nuclear explosions.

(3) Over the past months our Governments have considered various proposed methods of limiting tests. We have now concluded together that, in the absence of more general nuclear control agreements of the kind which we have been and are seeking, a test limitation agreement could not to-day be effectively enforced for technical reasons, nor could breaches of it be surely detected. We believe, nevertheless, that even before a general agreement is reached, self-imposed restraint can and should be exercised by nations which conduct tests.

(4) Therefore, on behalf of our two Governments, we declare our intention to continue to conduct nuclear tests only in such manner as will keep world radiation from rising to more than a small fraction of the levels that might be hazardous. We look to the Soviet Union to exercise a similar restraint.

(5) We shall continue our general practice of publicly announcing our test series well in advance of their occurrence, with information as to their location and general timing. We would be willing to register with the United Nations advance notice of our intention to conduct future nuclear tests, and to permit limited international observation of such tests if the Soviet Union would do the same."

Mr. St. Laurent, Mr. Lester Pearson, and Mr. C. D. Howe (Canadian Minister of Trade and Commerce) visited Bermuda on March 25-26 for talks with Mr. Macmillan and Mr. Selwyn Lloyd. The communiqué stated (1) that the U.K. and Canadian Ministers had discussed steps "which might be taken to secure an acceptable settlement of short-term problems in the Middle East"; (2) that Britain had agreed to buy uranium worth about £41,000,000 from Canada for peaceful purposes, the purchases to be spread over the next five years.

After stating that their talks had demonstrated the value of "family relationship between Commonwealth peoples," Mr. Macmillan and Mr. St. Laurent added: "While there may from time to time appear to be differences in their approach or reaction to international problems, the two Governments are confident that their special relationship will always enable them to work together effectively with constructive purpose."

Mr. Macmillan's Statement on Bermuda Conference. - House of Commons Debate. - Mr. Gaitskell's Criticisms.

The Bermuda Conference was debated on April 1 by the House of Commons. In a speech describing the results of the conference, in which he emphasized that "no secret engagements" had been entered into at Bermuda, Mr. Macmillan spoke of the various matters mentioned in the joint communiqué and, in particular, of the question of H-bomb tests, with special reference to the forthcoming British thermo-nuclear test to be held at Christmas Island in the Pacific. He also spoke of the hazards due to atomic radiation; emphasized that all possible precautions were being taken to minimize these hazards; and discussed the implications of the supply of U.S. guided missiles to the British forces. The Prime Minister's speech is summarized below under cross-headings:

Mr. Macmillan opened the debate by outlining the general character of the Bermuda talks, which, he recalled, had taken place not at his suggestion but on the proposal of President Eisenhower, who had also suggested that they should be held on British soil. The serious deterioration in Anglo-American relations in recent months had clearly shown the need for this conference, at which "both sides spoke with absolute frankness and sincerity to each other." The fact that he and President Eisenhower were "old friends" had been an advantage, and they had had a number of private talks in addition to the meetings in plenary session.

The Prime Minister continued: "It would be absurd to suppose that in a few days we could find solutions to all of the many problems which confront us. But we covered much ground and reached a number of decisions which are set out in the communiqué. I want to make it clear that there were no secret engagements. Our object was to create a situation in which normal diplomatic machinery can work effectively and smoothly, and this includes visits by senior officials across the Atlantic. There are a great number of problems on which much detailed work remains to be done, but we can claim that the particular agreements reached have given guidance on which progress can be made.

"Nor would I attempt to conceal the fact that in some matters we were not in agreement. That is not to be wondered at, but even so we understood each other much better as a result of the talks. For instance, on China trade we explained our position frankly to the Americans. I think they realized much better what our difficulties are, and further detailed consultations will bring us nearer together.

The United Nations.

"We discussed very frankly the present position and the future of the United Nations. I explained to the President our anxieties about its recent development, which spring from the distortion of the structure originally intended. This is due to the persistent use of the veto in the Security Council. This, in turn, has led to responsibilities being placed on the General Assembly which were not originally contemplated and have brought with them many new problems. I made plain our view that just trusting to the U.N. is not a substitute for a foreign policy, for the U.N., like any other human organization, is no more than the sum of its partners. Even so, as the communiqué recorded, we recognized the value of working through the United Nations and reaffirmed our adherence to the principles of the Charter."

The Middle East.

On the Middle East, Mr. Macmillan said: "The President made it abundantly clear to me that the United States, far from wishing to reduce British influence in the Middle East, is anxious to see it reinforced. It is clear that our basic interests in this area are identical, even if at times there are divergencies as to how to achieve them. Our talks have gone a long way toward reconciling these divergencies, and that process will, I believe, continue. On the Canal, discussion was somewhat handicapped by the Hammarskjöld-Nasser negotiations going on at the time of the meeting. The position was difficult and, as it still is, obscure. But we found that the United States is as convinced as we are that no settlement can be regarded as satisfactory which does not conform fully to the six principles of the U.N. resolution of Oct. 31 and does not take fully into account all the users' interests . . . It is greatly to our advantage that, in dealings with the Egyptian Government, the U.S. Government are taking a positive and leading role."

Mr. Macmillan warmly welcomed the U.S. decision to become a member of the Military Committee of the Baghdad Pact, a decision which constituted "recognition both of the staunch way in which the Pact has held together in recent troubled times, and its role as the northern shield." Both the British and the U.S. Governments intended to strengthen the Baghdad Pact in every possible way.

After disclosing that two projects for increasing the flow of Middle East oil were under consideration, including a new large pipeline through Turkey, Mr. Macmillan said that he and President Eisenhower had "considered the desirability of a policy by which projects of that kind could be given additional protection by a treaty between the interested Governments to reinforce the usual agreements made between the companies and the countries."

As regards the situation in the Gaza Strip and the Gulf of Akaba, Mr. Macmillan said: "The U.S.A. agrees with us that the continued presence of UNEF in the Gaza Strip is essential if any permanent solution is to be achieved. We both consider that the U.N. Force should not leave until its mission has been completely fulfilled. Both Governments agree on the right of innocent passage for all

shipping through the entrance to the Gulf of Akaba, even though it means passing through Egyptian territorial waters. This does not in any way run counter to Egyptian legal rights. Both Governments consider that, under the armistice, this applies equally to Israeli ships and to vessels of other nations plying to Israel. The presence of the U.N. Force at Sharm-el-Sheikh is an added guarantee that this right will be respected . . . "

Nuclear and Thermo-Nuclear Weapons.

The rest of the Prime Minister's speech was devoted to the subjects dealt with in the second Annexe of the Bermuda communiqué—i.e. nuclear bombs and their testing. After recalling that the decision to manufacture the atomic bomb had first been taken in 1947 by the Labour Government, Mr. Macmillan continued: "In 1954 a still graver decision fell to the British Government of the day to take. It was taken under Sir Winston Churchill's Premiership: the decision to embark on the research, development, and limited manufacture of the megaton bomb, commonly known as the hydrogen bomb. This was frankly placed before the House in February, 1955. That it had the support of Mr. (now Earl) Attlee and the majority of his colleagues was clearly shown by the terms of the Opposition amendment to the Government motion . . .

"Nuclear power is the basis on which Britain's defence plans must rest. The only question which remains is whether the process should be brought to fruition, or whether we are to hesitate at this last stage when the necessary tests have to be made before production is carried out.

"Many members of the Opposition, no doubt from sincere and conscientious motives, have been asking me, as Prime Minister, almost daily to abandon the tests. What I should like to know, and what I think the House and the country has a right to know, is whether the Leader of the Opposition, if he had to make this decision to-day, would cancel the tests which are shortly to take place. If so, would he face the consequences to defence? Would he cease to base our defence on the medium bomber and later on the projectile which is to carry the megaton bomb? If he abandons it—and I quite understand he might do so from conscientious motives—what defence does he believe possible, short of a general disarmament agreement covering both conventional and unconventional weapons? Would he accept the logical consequences of abandoning the tests, which would mean abandoning the weapon? These consequences would be, of course, the permanency of conscription, the need to raise far larger armies at home in an attempt to hold the position, and, even so, the acceptance of permanent inferiority both in numbers and in armaments. Every British Government since the war has taken the view that first the kiloton and now the megaton bomb are essential to our defence, short of a general disarmament agreement.

Limitation of Nuclear Tests.

"On the subject of limiting the tests, the Government have always said they were prepared to enter into a general disarmament agreement covering conventional and unconventional weapons. Last year they said that they would consider the possibility, even without a disarmament agreement being finalized, of a limitation, although not of the abolition, of tests of nuclear armaments. Sir Anthony Eden said that even if progress could not be made in the context of a comprehensive agreement on disarmament, the Government did not exclude dealing with it in some other way by itself. Later, on Dec. 20, Sir Anthony said that the Government were working on proposals to that end. These proposals were, in fact, worked out by Sir Anthony, but in practice, I must quite frankly tell the House, the form in which we had thought of them—a simple agreement as to the permissible yield of fissionable material without any detailed arrangements for control—would not work. These proposals were shot down not merely by our American friends but by our own technical advisers." To Opposition cries of "Why?" the Prime Minister replied: "For the simple reason that the scientist is always ahead of the politicians. What might have seemed possible some months ago is now confirmed as not being watertight."

Mr. Macmillan continued: "Scientific advances in nuclear energy and nuclear weapon development have been exceedingly rapid. Only seven years elapsed between the discovery of fission and the use of the atomic bomb in the war. The next seven-year period saw the development of the thermo-nuclear bomb, in a form which not only might produce complete local devastation but also large quantities of fission products which contaminate the atmosphere. We are now in the third seven-year period, and once again we are seeing another profound change—the development of high-yield weapons in which much of the energy comes not from fission but from fusion. This means that the harmful contamination, external and internal, which comes primarily from the fission products is greatly reduced.

"The proposals to which Sir Anthony Eden referred were based on the assumption that the total yield of the explosion was a reasonable measure of the fission products discharged into the atmosphere. It is now clear that this is not necessarily the case; and what is more, I am assured by our own scientists, as well as by the Americans, that there is no feasible method of properly measuring at a distance how much of the yield of a particular explosion is due to fission and how much is due to fusion.

"But this is not all. Our scientists believe that if a deliberate attempt were made to run a test explosion in such a way as to avoid detection, it would almost certainly be successful. So far as we know, no such attempt has been made. On the other hand, there have been instances in which our scientists were unable to be certain whether an explosion had taken place or not.

Radiation Hazards.

"It was for these reasons that we agreed at Bermuda that the approach which we had originally envisaged would not do. But it would be an error to say that the Bermuda communiqué once more attached the concept of test limitation to a comprehensive disarmament agreement. That is not so. We said it must be accompanied by general nuclear control. Such a system would at least have to include watertight measures for the policing of any test limitations which might be agreed upon. While waiting for that, the President and I agreed to go a step further. We said that we would conduct nuclear tests in such a manner as will keep world radiation from rising to more than a small fraction of the levels that might be hazardous.

"So far as our own tests are concerned, I have been asked to say that there will be no perceptible radiation outside the test areas. I am satisfied from the medical and biological point of view that the radiation effects of this explosion will be insignificant.

Mr. Roy Mason (Lab). interpellated: "By inference the Prime Minister has informed us that there can never be any limitation agreement upon thermo-nuclear weapons. Will he categorically state that if there were a thermo-nuclear explosion inside Russia, no seismograph, barograph, barometer, or geiger counter would be able to detect that explosion?

Mr. Macmillan: "No. I think that even my untutored imagination could think of at least two ways in which it would be possible to do so. Our tests must go on. To abandon them now would be to threaten the whole defence strategy upon which our policy is based, and to put ourselves in a permanently weakened position. I am not prepared to recommend this to the House, and I can hardly believe that the Leader of the Opposition, if he held my position, would recommend it himself.

"If our tests must go on, the efforts to achieve general disarmament must continue. But if general disarmament cannot be reached, we are still ready to consider any practical scheme for the limitation of nuclear weapon tests, though not, of course, without conventional disarmament, for to abolish nuclear weapons without dealing with conventional weapons would leave the Western Powers at the mercy of Soviet Russia. But even if we cannot get a limitation of nuclear weapons, we are prepared to consider a limitation of tests Meanwhile we are ready to make a start ourselves. We would agree to file information with the United Nations of any tests to take place We would agree to permit limited international observation. All we ask is that the Russians do the same. That, surely, is not asking a great deal

"Against this, the Russians, and those in this House who appear to constitute themselves as their protagonists, produce an offer of the abolition of all tests, if we will abandon ours. There is something rather hypocritical about the fervour with which this last-minute conversion is reached. I have not seen many protests against the great Siberian explosions all this time. It is a strange thing that the agitation for abolition of tests should come just at the moment when the work of many years of British scientists is reaching fruition.

"On the question of possible dangers to human health, I can assure the House that the Government takes this matter very seriously. We have obtained the best possible advice. The closest watch is kept, and we have regular and up-to-date measurements. It is external radiation which constitutes the main genetic hazard and the possible threat to future generations. But external radiation is not in any sense a new kind of hazard, and only a very small proportion of it is attributable to bomb tests. Ever since creation men have been exposed during the course of their ordinary lives to what are called cosmic rays, and also to radiation from soil and rocks. This has been going on during all our lives, and during all the lives of our fathers and grandfathers back to Adam himself.

"According to the Medical Research Council's report [see 15009 A], cosmic rays—and they are natural sources of radiation which none can avoid—are estimated to give us an average dose of one-tenth of a röntgen a year, or three röntgens during the 30 years of an average reproductive life. I take this phrase from the statisticians. Modern civilized man has added to the amount of dosage he receives in a normal lifetime by his own inventions, especially in recent years. These include X-rays, so much used by doctors and dentists; such things as luminous watches; and now the development of atomic energy in industry, which is so important for our future.

"All these new man-made sources of radiation give us an additional dosage which, in this country, is reckoned to add at least one-quarter to the three röntgens which we already receive from the natural background. Unless, therefore, we are prepared to abandon X-rays for medical treatment and for many other features of our civilization, we must expect to be exposed to about 3¾ röntgens over 30 years; three röntgens from natural cosmic rays, and three-quarters from the inventions of modern life.

"Estimates have been made of the addition to external radiation to which the human race would be subjected if test explosions went on at the same rate as in the past few years. The estimate is that, in the course of time—quite a long time—the external radiation from fall-out would build up to an exposure per generation of not more than one-hundreth part of what man would receive in the same period from natural sources alone.

"It is obvious, therefore, that the explosions we propose to make shortly cannot be more than a tiny fraction of the total explosions already made by Russia and the United States. The position, therefore, of the external radiation hazard is that the contribution to it from bomb tests is very small, almost negligible. And this is important, because it is the external radiation which constitutes the main genetic hazard.

" Apart from the external radiation, to which bomb tests make a very small contribution, there is the internal radiation issue, due to absorption into the body through food and drink of substances like Strontium-90, which is part of the fall-out. It is fair to say that the average levels of Strontium-90 at present measured in human bone in the U.K. are less than one unit. This is a hundred times less than the figure the Medical Research Council gave as the maximum allowable concentration in bone in individuals of the general population. The Government take this matter very seriously, and will keep it under continuous review in the light of any new evidence about conditions in this country or elsewhere. We shall add very little to this danger by the tests we are about to make, and we shall gain enormously in the strength and in the defence of our country . . . "

Mr. Arthur Henderson (Lab.) asked if the Prime Minister would " say a word about the apprehensions expressed by the Japanese Government " at the forthcoming British H-bomb test in the Pacific. **Mr. Macmillan,** in reply, pointed out that the tests would be held 4,000 miles from Japan, and expressed his belief that the Japanese had therefore no need for such apprehensions.

U.S. Guided Missiles for British Forces.

Turning to the general talks on defence at Bermuda, Mr. Macmillan said that he had explained to President Eisenhower the plans already announced for the streamlining of British forces in Germany, and had also reviewed the U.K.'s commitments in other parts of the world and discussed the economic and military burdens these placed upon Britain.

" We made it clear " (he continued) " that the Government intend to carry out their defence responsibilities, and to continue to extend that close and intimate co-operation with their allies upon which the defence of the free world depends. The President agreed that the U.S. Government, for their part, would assist the efficient development of the collective defence effort, in one way by supplying the U.K. with guided missiles being developed in America. These weapons should be available to us here in the fairly near future, and they will make a great addition to the deterrent power based in this country and to the strength of NATO as a whole. From the U.K. point of view it is particularly satisfactory that the U.S. Government is able to provide us with these weapons, because they will be available some years before those we have been developing for ourselves. Therefore, this agreement will save us both time and money, and I hope the House will agree that it is a satisfactory one."

The Prime Minister drew attention to an article in the *Daily Herald* which had stated : ' Does the American control of the nuclear warheads mean that the President—and not the British Government—will decide when these missiles will be launched and at whom they will be launched ? If so, the role of Great Britain in the Anglo-American alliance, which every sane citizen desires to nourish, ceases to be the role of partner. We become the mere instruments of policy made in Washington.'

Mr. Macmillan commented as follows on this matter : " The rockets will be provided under an agreement, full details of which still have to be negotiated. They will be the property of H.M. Government and will be manned by British troops who will receive prior training from American experts. The rockets cannot be fired by any except British personnel. The warhead will certainly be under American control, as everyone knows is the law of the United States. To that extent the Americans have a negative control upon it. But it is absolutely untrue that the President of the U.S.A., and not the British Government, will decide when these missiles will be launched and at whom. That will remain so long as we will rely on the American warhead, and only so long will it remain a matter for the two Governments. The *Daily Herald* says it is the sole discretion of the President of the United States—and that is a lie."

Mr. Paget (Lab.) : " The Prime Minister must realize how many of us feel about this. It is the intense humiliation that we are entrusted by an ally with a weapon but are not to be trusted with the ammunition. Surely no major country has ever accepted such humiliation? "

Mr. Macmillan : " I do not know whether it is humiliation or not. We accept having placed in our country both the bomb and the means of delivery. They are entrusted to our country, and under this system we obtain both the full control of the projectile, thereby putting us ahead, and we are not precluded from making our own warheads. In the meantime we have the American warheads under the same agreement between the two Governments as governs the present bombers " [i.e the agreement concluded by the Labour Government for the stationing of U.S. air forces in Britain].

Mr. Crossman (Lab.) : " Are we to understand that instead of the R.A.F.'s strategic bomber force, with its own H-bombs and H-bombers to maintain our military independence, we are now to have an Anglo-American rocket, which is a joint operation ? If that is so, the Prime Minister cannot deny that it has reduced our independence of America." **Mr. Macmillan** : " I will answer Mr. Crossman exactly as he asked the question ; not ' instead of,' but ' in addition to.' "

" To sum up," the Prime Minister concluded, " the meetings at Bermuda were certainly useful . They could not achieve—and were not intended to achieve—sudden or dramatic decisions of policy. But I think we did some useful work. The President's warmth of emotion and outlook, and real affection toward this country, have never been doubted by those who know him well. But we were able, by putting forward our own views forcibly as well as frankly, to do something to strengthen the friendship between our two countries, and to strengthen it on the only basis that is honourable or likely to be lasting—that is, a partnership founded on mutual confidence and understanding."

The Leader of the Opposition, Mr. Hugh Gaitskell, maintained that only three of the 11 points mentioned in the Bermuda communiqué contained " anything clear and firm "—viz., the U.S. decision to participate in the Military Committee of the Baghdad Pact, and the statements on nuclear tests and missiles. He agreed, however, on " the immense importance of good personal relations between the leaders of the British and American Governments," and welcomed the Prime Minister's assurance that no secret agreements had been concluded.

After commenting that " nothing precise about Europe " had emerged from the Bermuda conference, **Mr. Gaitskell** suggested (1) that Britain should propose the withdrawal of all foreign forces from Western and Eastern Germany, Poland, Czechoslovakia, and Hungary ; (2) that this withdrawal should be associated with a disarmament agreement, or an agreement covering the national forces in those territories ; and (3) that it should also be supplemented by a treaty or mutual security pact underwritten by the great Powers. " I honestly believe (he continued) that this does provide some opportunity of advance in this problem. I realize full well that it is unlikely at the moment that the Russians would give any favourable response. But I urge the Government not to lose sight of this possibility in the longer run, and at least to give the peoples of these territories some hope that they have not been forgotten. A plan of this kind would have to be discussed both with the West German Government and our other allies."

Turning to the question of U.S. guided missiles which would be made available to the British forces, Mr. Gaitskell said : " I understand that we are to have the missiles under our control, apart from the warheads, though any question of using them is a question of joint Anglo-American action. Therefore, although America has a veto on the use of these weapons, so have we. In other words, there is a double veto. That is to some extent reassuring, and disposes of legitimate fears that this was only a way in which America would get these missiles on to their existing air bases."

Pointing out that the U.S. " atomic secrets " legislation constituted " the gravest handicap of all to the proper integration and economic production of both countries," Mr. Gaitskell asked : " Did not the Prime Minister ask the President whether he would try to persuade Congress to change this law? The President's authority with Congress is extraordinary, particularly in matters of defence. Is it really so certain, if he appealed to them, that they would not be prepared to make some change ? "

On the question of H-bomb tests, Mr. Gaitskell said : " These tests may be dangerous to international health. Precisely for that reason, we cannot look at the problem as if it was simply a matter of our own defence. We have the possibility, at least, that tests conducted thousands of miles away may cause the eventual death of civilians in any part of the world decades after the explosion has taken place. The Prime Minister admitted there was reason for real anxiety about Strontium-90. That seems to me the real danger that, as a result of these explosions, there is accumulating in the stratosphere what amounts to a poisonous substance which, over a period of 20 or 30 years, will fall in rain or other ways to the ground, be absorbed in plants and vegetation, and be consumed by the human race, which in consequence will suffer from bone cancer and possibly other diseases. Is it not clear that what really worries the world is not just one more test explosion but the prospect of these explosions going on and on as more and more countries decide to make their own atomic weapons ? If that is the case, the danger from Strontium-90 becomes far more serious. It is for these reasons that we regard this question of the test as unique and urgent, and separate from general disarmament.

" What is the need for the continuation of tests once you have established that you can make the bomb ? Is it really necessary to go on accumulating bigger and maybe smaller and better bombs to blow up the world ? Is not one enough for this purpose, or two, or three ? Is there to be no limit to this process ? We are faced with the prospect of unlimited tests, only to be brought to an end by a general measure of disarmament. It is precisely because we realize the enormous difficulty of getting agreement on general disarmament that this fills us with such depression. It is the apparent unwillingness of the Government to take the initiative in sitting round the table and saying ' What can we do with this problem ? ' that worries us profoundly . . ."

As regards the implications of " going ahead or not going ahead " with the tests, Mr. Gaitskell said that he did not know what the political consequences of either course would be, but asked the Prime Minister " not to think of it as a matter of just getting our explosion over." The danger was that these tests, if persisted in, would grow in number and extend to other countries besides Britain, America, and Russia. There were reports that France had decided to explode an atomic or thermo-nuclear weapon in 1960, and that Sweden had decided to manufacture such weapons. He (Mr. Gaitskell) was not saying that Britain ought to stop these tests " unilaterally and unconditionally," since he doubted whether " that action on its own would be of any real value." On the other hand he would not commit himself to " going ahead with these tests in all circumstances and whatever the position may be." The choice might be that " if we went ahead there might be an endless succession of tests by other countries, with the prospect of great damage to the human race, and that if we stopped this would all disappear." If that were the choice, he would have thought that " any Government in this country would have thought seriously before going on with the tests."

With regard to the Middle East, Mr. Gaitskell expressed the hope that the Government would not listen to President Nasser's latest proposal to link the question of Israeli shipping in the Suez Canal with a settlement of the Arab refugee problem. "I hope," he declared, "that the Government will insist that Nasser abides by the Security Council's resolution of Oct. 31, 1956. Our weapons should not be force but economic pressure, and, if necessary, a boycott of the Canal. If America could be persuaded to use her real power in this respect, I do not think there is much doubt that Colonel Nasser would come to heel . . ."

The debate was wound up by Mr. Selwyn Lloyd, who accused Mr. Gaitskell of having "avoided a plain answer" on the political consequences of stopping the H-bomb tests, but observed that the Leader of the Opposition "did give a plain answer when he suggested that we should not unilaterally stop these tests." With regard to the Suez Canal, the Foreign Secretary pointed out that the Security Council were still "seized of the problem" and that it would be unwise, while the matter was under discussion, to indicate what would be the particular course of Britain and her allies. He added, however, that it was "in the interests of the Egyptian Government to come to some arrangement which would have the confidence of the users of the Canal."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Montreal Star - Canadian Department of External Affairs, Ottawa)

A. SOUTH AFRICA. — Simonstown Base taken over by South African Navy. - South African Naval Strength.

The Simonstown naval base, near Cape Town, was formally transferred from the Royal Navy to the South African Navy on April 2, under the agreement concluded in July 1956 (see 14294 A). The ceremony was attended by Mr. Strydom, Prime Minister of South Africa, Mr. Erasmus, the Union Defence Minister, and Lord Selkirk, First Lord of the Admiralty, representing the Royal Navy. The Simonstown base had been occupied and controlled by the Royal Navy for 143 years.

The South African Navy had been strengthened in November, 1956, by the acquisition from Britain of the 2,100-ton anti-submarine frigate H.M.S. *Wrangler*, which was transferred to the Union Navy at Cardiff and renamed the *Vrystaat*. The *Wrangler*, built in 1944 as a destroyer, was converted in 1952 into a fast anti-submarine frigate with a maximum speed of 34 knots. It has an entirely enclosed bridge as a protection against radioactivity. The Union Government has placed orders in Britain for further vessels of this type.

The other principal units of the South African Navy, in addition to the *Vrystaat*, are the destroyers *Jan van Riebeeck* (ex-H.M.S. *Wessex*) and *Simon van der Stel* (ex-H.M.S. *Whelp*), both of 1,710 tons; three ex-British "Loch" class frigates, the *Good Hope*, *Natal* and *Transvaal*, each of 1,435 tons; and two ex-British minesweepers of 1,040 tons, the *Bloemfontein* and *Pietermaritzburg*. There are also a 900-ton minelayer (*Skilpad*), two small coastal minelayers (*Kaapstad* and *Pretoria*), a survey vessel, boom-defence vessels, and a number of motor-launches.—(Times - Cape Times) **(Prev. rep. 14294 A.)**

B. SURINAM. — Agreement with Aluminium Company of America on Hydro-Electric Project. - Creation of Aluminium Industry.

An agreement was concluded on Feb. 4 between the Government of Surinam and the Aluminium Company of America (ALCOA) providing for (*a*) the joint construction of a dam and power station on the Surinam River; (*b*) the extension of ALCOA's activities in Surinam (hitherto confined to the mining of bauxite) to the actual production of aluminium and the erection of an aluminium factory with an annual capacity of 50,000 tons, which would receive its power supplies from the new station; (*c*) the granting of extensive rights and facilities to ALCOA for the mining of bauxite and the erection of an aluminium plant and an alum-earth factory near Paranam, on the Surinam River.

The scheme (known as the Brokopondo Development Project) provided that the construction of the dam and power-station would be financed by loans, but annual working costs would be shared by the Surinam Government and ALCOA in proportion to the amounts of power used by either. The dam and all buildings and installations connected with it would remain the property of the Surinam Government, and a control board would be formed consisting of representatives of the Surinam and Netherlands Governments, ALCOA, and possibly the financing bodies.

The reservoir at the dam will cover an area of nearly 545 square miles, and the annual electricity output will be in the region of 1,000,000,000 kilowatt-hours and may be increased to 2,500,000,000 kilowatt-hours. (Netherlands News Agency)

C. SOVIET UNION. — Proposals for All-European Co-operation in Atomic Energy and Economic Development. - Attack on Euratom and Common Market Projects.

The Soviet Government issued a statement on March 16 proposing (1) the establishment of a Europe-wide atomic energy research institute or institutes; (2) all-European co-operation in the building of atomic power stations for industrial, scientific, and technical purposes; (3) co-operation in the building of large hydro-electric stations "of interest to several countries"; (4) co-operation in the development of European fuel and power resources; (5) the conclusion of a trade agreement "among all interested European countries"; and (6) mutual economic and financial assistance to promote the development of European countries.

The Soviet proposals were accompanied by a lengthy statement attacking the Common Market and Euratom projects in Western Europe (see 15393 A), which were described as "plans designed to serve the interests of Western circles who want to supply the West German revenge-seekers with nuclear weapons, aggravate the relations between European countries, raise new obstacles to peace and security in Europe, and further complicate the re-establishment of the national unity of the German people."

The statement described the Soviet proposals as aimed at "overcoming the division of Europe into two opposing military groups" and promoting all-European co-operation in the fields of atomic energy and economic development, for the benefit of all countries of the European continent. These proposals, if adopted, would "bring the European countries closer to one another, strengthening their sense of security and confidence in the future." The Euratom and Common Market projects, on the other hand, would be "in manifest contradiction" to these aims, would be "subordinated to NATO," and would "inevitably lead to a further widening of the rift in Europe" and pose "grave new obstacles to German reunification.

The statement went on to allege that "certain circles in the U.S.A. who are actively supporting Euratom are working for the speediest rebirth of German militarism and the equipment of the West German Army with all types of modern weapons, including nuclear weapons. Revenge-seeking West German groups will not fail to utilize Euratom for stockpiling fissionable material in order to start producing their own nuclear weapons as soon as possible." Any hopes in Western Europe that Euratom could "control" Western Germany were "doomed to failure," and neither could the Euratom project reduce West European dependence on the United States. "In reality," said the Soviet statement, "this dependence will increase, since the U.S.A. will actually control Euratom as the chief supplier of fissionable materials and equipment for the atomic industry of Euratom countries."

The Common Market project was also seen as "a grave menace to the peoples of Europe" because it would mean that "the economically stronger countries and, in effect, the big monopolies would be able to impose their terms on the weaker European countries both in the Common Market and Euratom, to the detriment of vital national interests." The statement asserted that "the West German monopolies" stood to gain most from the Common Market, and that "American monopolies" would use the Common Market "to strengthen their position at the expense of the national interests of member-countries."

The Soviet proposals were sent to the diplomatic missions of all European countries in Moscow, the U.S. Embassy, and the U.N. Economic Commission for Europe.—(Soviet Weekly)

D. BRITISH HONDURAS. — General Election.

The second general election in British Honduras, held on March 21, resulted in an overwhelming victory for the People's United Party (P.U.P.) led by Mr. George Price, which won all nine elected seats in the Legislative Assembly—one more than in the previous Assembly. There are three nominated and three official members of the Assembly, in addition to the Speaker.

A split in the P.U.P. had occurred in October last, when Mr. Leigh Richardson (the former party leader), Mr. Philip Goldson, and other leading members of the P.U.P. founded a new party under the name of the Honduran Independence Party. Its programme called for independence within the British Commonwealth and economic association with the British Caribbean Federation, whereas the P.U.P.'s electoral programme called for the complete independence of British Honduras and closer ties with the Central American republics. The H.I.P. failed to return any candidates at the general election.

Mr. Price (who was not a member of the previous Government) declared in a post-election statement that the P.U.P. would seek to break "the trend of concealed but constant drift into a West Indian economic orbit," and to co-operate with the Colony's neighbours on the mainland.

Of the 22,706 voters on the electoral register, only 11,634 (51 per cent) went to the poll, whereas 70 per cent of the electorate voted in the Colony's first general election in 1954. The P.U.P. obtained 59 per cent of the votes cast, representing, however, only 31 per cent of the electorate as a whole.
(Times - Manchester Guardian) **(Prev. rep. 13632 C.)**

A. UNITED KINGDOM. — Revenue and Expenditure Returns, 1956-57. - The Floating Debt.

Exchequer returns for the financial year 1956-57, published on April 1, showed an Ordinary Budget surplus (after charging sinking funds of £36,984,749) of £289,781,587; this compared with an Ordinary surplus of £397,102,092 in 1955-56 and one of £459,815,000 estimated by Mr. Harold Macmillan (then Chancellor of the Exchequer) in his 1956-57 Budget speech. Net capital expenditure "below the line" (i.e. excluded from the Ordinary Budget) amounted to £621,136,000, as against Mr. Macmillan's estimate of £803,000,000. Taking the "above the line" surplus and the "below the line" deficit together, there was therefore an "overall" deficit of £331,000,000, instead of the original estimate of £343,000,000, which was subsequently revised to £471,000,000 through Supplementary Estimates.

The following table gives the actual returns for the year, the 1956-57 Budget estimates, and the returns for the year 1955-56:

	Revenue £	Expenditure £
1956-57 Actual*	5,157,812,652	4,868,031,065†
Budget estimate ..	5,197,500,000	4,737,685,000‡
1955-56 Actual§	4,893,142,564	4,496,040,472‖

* Excluding self-balancing revenue and expenditure amounting to £304,635,000, i.e. £304,036,000 for the Post Office and £599,000 for income-tax deducted from post-war refunds of excess profits tax. † Including Sinking Funds of £36,984,749. ‡ This was subsequently increased to £4,866,000,000 by Supplementary Estimates totalling £128,000,000. § Excluding self-balancing revenue and expenditure amounting to £267,265,000, i.e. £264,900,000 for the Post Office and £2,365,000 for income-tax deducted from post-war refunds of excess profits tax. ‖ Including Sinking Funds of £36,489,125.

Details of the various Revenue items were as follows:

Inland Revenue:	Year ending March 31, 1957 £	Year ending March 31, 1956 £	Increase (+) or Decrease (−) £
Income-tax	2,114,173,000	1,942,902,000	+ 171,271,000
Surtax	158,000,000	138,600,000	+ 19,400,000
Death Duties ..	169,000,000	175,700,000	− 6,700,000
Stamps	63,000,000	70,600,000	− 7,600,000
Profits Tax and Excess Profits Tax ..	195,000,000	192,500,000	+ 2,500,000
Excess Profits Levy ..	5,000,000	18,450,000	− 13,450,000
Other Inland Revenue Duties	640,000	770,000	− 130,000
Customs	1,198,882,000	1,148,598,000	+ 50,284,000
Excise	901,735,000	864,511,000	+ 37,224,000
Motor Vehicle Duties	90,610,000	86,987,000	+ 3,623,000
Post Office (Net Receipts)	4,464,000	- -	+ 4,464,000
Broadcast Receiving Licences	28,400,000	25,800,000	+ 2,600,000
Receipts from Sundry Loans	32,713,852	29,857,743	+ 2,856,109
Miscellaneous ..	196,194,800	197,866,821	− 1,672,021
Total Ord. Revenue ..	5,157,812,652	4,893,142,564	+ 264,670,088

Of the Inland Revenue items exceeding the Budget estimates, Income-tax yielded £28,500,000 more, Surtax £14,000,000, Stamps £4,000,000, and Excess Profits Levy £1,000,000. Death Duties brought £1,000,000 less than estimated, and Profits and Excess Profits tax nearly £32,000,000 less, while other Inland Revenue duties fell short by £360,000. For the first time, Customs and Excise receipts did not reach the estimate, the shortfall for Customs being just over £5,000,000 and for Excise over £51,500,000. Of the other items, Motor Vehicle Duties contributed nearly £1,400,000 less than estimated, net receipts of the Post Office over £5,500,000 less, and Miscellaneous revenue over £3,800,000 less. Broadcasting Licences were £400,000 above the estimate and Sundry Loan Receipts over £2,700,000 more.

The following table shows Ordinary Expenditure:

	Year Ending March 31, 1957 £	Year ending March 31, 1956 £
Interest and Management of National Debt	710,634,000	637,884,353
Sinking Funds	36,984,749	36,489,125
Payments to Northern Ireland Exchequer	66,443,851	59,152,386
Other Consolidated Fund Services ..	9,669,465	10,172,608
Total	823,732,065	743,698,472
Total Supply Services (excluding Self-Balancing)	4,044,299,000	3,752,342,000
Total Ordinary Expenditure ..	4,868,031,065	4,496,040,472

Total Ordinary Expenditure (excluding self-balancing items) was £130,346,065 higher than the original Budget estimate and just over £2,000,000 more than the revised estimate of £4,865,925,000 (including Supplementary Estimates and Excess Votes). The increase was mainly due to higher expenditure for Supply Services in connexion with events in the Eastern Mediterranean. Originally it had been expected that Defence would require £1,548,000,000, less £50,000,000 of U.S. Aid—the figure being subsequently increased to nearly £1,587,000,000 after taking the Supplementary Estimates into account. Actual spending, however, totalled £1,554,850,000, whilst U.S. Aid receipts were only £29,750,000, leaving net Defence expenditure of £1,525,100,000. Civil Votes and Tax Collection were some £38,000,000 higher than originally expected but lower than the revised estimates. The service of the National Debt, at £710,634,000, exceeded by over £40,000,000 the original estimate of £670,000,000, and payments to the Northern Ireland Exchequer were nearly £5,500,000 higher than expected.

The shortfall of £182,000,000 in net expenditure "below the line" (i.e. capital expenditure) was largely due to lower payments.

New loans to the National Coal Board (at £25,870,000) were about £37,000,000 lower than the estimated £63,000,000; loans to other nationalized industries (at £284,100,000) nearly £66,000,000 less than the estimate of £350,000,000; loans to Local Authorities (at £109,400,000) nearly £110,000,000 less than the estimated £220,000,000; loans for New Towns (at £31,616,000) over £3,000,000 less than the estimated £35,000,000; and loans to the Potato Marketing Board (at £2,667,000) over £2,000,000 less than the estimated £5,000,000. On the other hand, loans to British Railways amounted to £52,000,000 (estimate nil); loans to the Film Finance Corporation to £1,157,000 (estimate nil); and loans to the Sugar Board to £13,190,000 (estimate £10,000,000).

Compensation payments under the Town and Country Planning Acts (at £17,350,000) were over £12,500,000 less than the estimate of £30,000,000, and expenditures on Colonial Development (at £6,634,000) over £2,000,000 less than the estimated £9,000,000. Other payment items (estimates in parentheses) were: Export Guarantees £5,170,000 (£7,000,000); Post-war Credits £17,413,000 (£18,000,000); Excess Profits Tax Refunds £731,000 (£2,000,000); War Damage £25,110,000 (£24,000,000); Post Office Capital Expenditure £79,000,000 (£78,000,000); Scottish Special Housing £5,215,000 (£7,000,000); Armed Forces Housing £5,650,000 (£8,000,000); loans to N.I. Exchequer £1,000,000 (£4,000,000); loans to Independent Television Authority, nil (£1,000,000); Development of Inventions £534,000 (nil); and subscription to the International Finance Corporation £5,174,000 (nil).

Interest receipts outside the Budget amounted to £146,726,000 (estimate £150,000,000), the same as payments. Amongst other receipts were repayments from Local Authorities of £42,281,000; under Town and Country Planning Acts of £7,746,000; under Export Guarantees, £2,102,000; from the Raw Cotton Commission, £1,535,000; from Turkey under the Anglo-Turkish Armaments Credit, £1,071,000; and from the Film Finance Corporation, £957,000. Housing receipts from Votes were £7,026,000, and Post Office capital repayments from Votes £3,242,000. Small repayments were made by the Potato Marketing Board (£476,000), the Colonial Development Corporation (£250,000), the Overseas Food Corporation (£96,000), the Northern Ireland Exchequer (£84,000), and the Independent Television Authority (£45,000), while repayments from Scottish Special Housing amounted to £300,000.

Details of the Floating Debt are given below:

	March 31, 1957 £	March 31, 1956 £
Ways and Means Advances Outstanding:—		
Advances by Bank of England ..	—	—
Advances by Public Departments	276,890,000	294,600,000
Treasury Bills Outstanding	4,195,295,000*	4,788,020,000
Total Floating Debt Outstanding ..	4,472,185,000	5,082,620,000

*Includes £76,000, the proceeds of which were not carried to the Exchequer within the period of the Account.

The Floating Debt thus showed a net decrease over the year of £610,435,000. This was explained to the extent of £450,000,000 by the repayment of Exchange Equalization Account loans (resulting from the inflow of sterling during the year), while the rest of the downward movement reflected the inflow of National Savings.—(Treasury Press Office, London - Times - Financial Times) **(Prev. rep. Revenue and Expenditure 1955-56, 14798 A; 1956-57 Budget, 14821 A; Supplementary Estimates, 15397 A.)**

B. ISRAEL. — Assassination of Dr. Kastner.

Dr. Israel Kastner, the central figure in the criminal libel trial of 1955 (see 14808 A), died in hospital on March 15 after having been shot and severely wounded outside his home in Tel-Aviv on March 3. Allegations that Dr. Kastner had collaborated with the Nazis in Hungary during the war, made by a Hungarian Jew (Mr. M. Gruenwald), had been substantially upheld by the Jerusalem District Court in June 1955. An appeal by the Attorney-General against this judgment had been heard by the Supreme Court shortly before Dr. Kastner's assassination.

Dr. Kastner, who had edited a Hungarian-language newspaper in Tel-Aviv, was shot in the street by a man who accosted him outside his home. Four suspects were later arrested. (Israel Government Press Office, Jerusalem - New York Times) **(Prev. rep. Kastner Case, 14308 A.)**

A. CHINA. — Mr. Chou En-lai's Visits to Southern Asia and Eastern Europe.

The Chinese Prime Minister, Mr. Chou En-lai, made an extended tour of southern Asia from Nov. 18, 1956 to Jan. 1, 1957, during which he visited North Vietnam, Cambodia, India, Burma, and Pakistan. He broke off his tour, however, in order to visit the Soviet Union, Poland, and Hungary for talks with their respective Governments, and on Jan. 18 issued a joint statement with the Soviet Prime Minister, Marshal Bulganin, defining the attitude of the Soviet and Chinese Governments toward the "Eisenhower Doctrine" and toward the relations between Communist countries. Subsequently he visited Afghanistan, Nepal, and Ceylon before returning to Peking.

First Asian Tour.

Mr. Chou En-lai visited North Vietnam, where he met President Ho Chi-minh and the Prime Minister, M. Pham Van-Dong, from Nov. 18-22, and then proceeded to Cambodia for a five-day visit during which he and the Cambodian Premier, M. San Yun, initialled on Nov. 27 an agreement reaffirming the Sino-Cambodian declaration of friendship which had been signed in Peking on Feb. 18, 1956.

During his stay at Pnom-Penh, Mr. Chou En-lai told U.S. journalists on Nov. 26 that the time had come to establish better relations between China and the U.S.A., and that American journalists would be welcome to visit China if they could obtain permission from their Government. He suggested that if an agreement were reached between the Communist and Nationalist Governments, General Chiang Kai-shek might be invited to enter the Government with a higher position than that of a Minister; in this connexion Mr. Chou recalled that the General was "an old friend" with whom he had co-operated before 1927. A statement issued after the interview said that "no-one in Taiwan (Formosa) would be excluded from coming back to the Chinese mainland. As for Chiang Kai-shek, it is not a matter of Ministers at the present time but of peaceful negotiations." [Mr. Chou's suggestion that General Chiang Kai-shek might return to China was subsequently described as "nonsense" by Nationalist officials in Formosa].

On Nov. 28 Mr. Chou En-lai arrived in New Delhi, where he was welcomed by Mr. Nehru and by the Dalai Lama and Panchen Lama of Tibet, who were visiting India at the time in connexion with the *Buddha Jayanti* celebrations (see 15069 E). He was received by President Prasad on Nov. 29, addressed both Houses of the Indian Parliament on the same day, and on Nov. 30 was the guest of honour at a civic reception. While in Delhi he had a series of private discussions with Mr. Nehru on political questions.

In his speech to the Indian Parliament, Mr. Chou recalled that his previous visit to India in 1954 had resulted in the formulation by Mr. Nehru and himself of the "Five Principles" (*Panch Sila*) which had since been adopted by an increasing number of countries in Asia, Africa, and Europe, including the 29 countries represented at the Bandung Conference. Throughout their history, China and India had continually influenced but never interfered with each other; although they had achieved their national independence by different methods, it was both possible and essential for them to continue to respect each other's independent development and to draw on what was useful in each other's experience.

Mr. Chou paid high tribute to India's efforts for peace, mentioning in particular her contribution to the restoration of peace in Korea and Indo-China, her role in formulating the "Five Principles" and in initiating the Bandung Conference, and her policy on the question of disarmament and the banning of weapons of mass destruction. Referring to the Anglo-French intervention in Egypt, he expressed complete approval of India's "policy of giving firm support to Egypt in her defence of her territorial integrity and sovereignty," and emphasized that it was necessary to strengthen the solidarity between the peoples of Asia and Africa in order to "destroy one by one the Asian and African countries which have recently attained independence." In particular, the solidarity between India and China, which together had a population of nearly 1,000,000,000, would become "a gigantic moral and material force in stabilizing the situation in Asia and Africa."

Although the two countries did not hold entirely identical views on all current international problems (Mr. Chou concluded), he believed that by adopting the Five Principles as a starting-point they would be able to solve any problems between them, and "thereby to set an example of peaceful co-existence and friendly co-operation which will strengthen universal peace."

When speaking at the civic reception on Nov. 30, Mr. Nehru also stressed the international importance of friendship and co-operation between India and China, which, he pointed out, contained nearly half the world's population. A new force, he declared, had arisen in the world when these two countries attained their independence, and this new force would "influence world events to a very great extent."

After leaving Delhi on Dec. 2, Mr. Chou En-lai visited Bombay, Bangalore, Madras, and Calcutta, being welcomed by great crowds in all these cities. On Dec. 10 he flew to Rangoon for a ten-day stay in Burma. During this period he visited Myitkyina, Taunggyi, and Lashio, accompanied by the Prime Minister (U Ba Swe) and other members of the Burmese Government, and crossed the Chinese frontier in Yunnan for talks with them on the border dispute between the two countries (see 15334 A), which were continued after their return to Rangoon. On Dec. 20 Mr. Chou En-lai flew to Karachi for talks with Mr. Suhrawardy, the Prime Minister of Pakistan.

A communiqué issued in Karachi on Dec. 24, at the conclusion of these discussions, stated that the Chinese and Pakistani Premiers "noted with much concern a considerable change in the international situation since they last met, which requires constant vigilance and constructive action on the part of all peace-loving countries. It is absolutely essential that a climate of peace should be created. The Prime Ministers reiterate their desire that every effort should be made to reduce international tension and promote world peace and understanding. They believe that the difference between the political systems of Pakistan and China, and the divergence of views on many problems, should not prevent a strengthening of friendship between them. They reaffirm their earlier conviction that, with a view to promoting further the cordial and friendly relations existing between Pakistan and China, due importance should be given to commercial and cultural relations. They are happy to place on record that there is no real conflict of interests between the two countries. They are confident that the present visit has further consolidated their bonds of friendship . . ."

At a press conference on the same day Mr. Chou En-lai said that he had discussed the Kashmir dispute both with Mr. Nehru and Mr. Suhrawardy, but declined to comment on this question. Addresses appealing to Mr. Chou to use his influence with the Indian Government to "get the right of self-determination for the people of Kashmir" had previously been presented to him by the Commissioner of the Karachi Municipal Corporation and by leaders from "Azad Kashmir."

Mr. Chou En-lai subsequently visited the former North-West Frontier Province, Lahore, and Dacca (East Pakistan). During a visit to the Batala engineering works in Lahore (from which the Chinese Government had ordered 200 lathes worth £300,000), he stated that a delegation of Chinese technicians would shortly visit Pakistan and that China would be able to supply steel to Pakistan after the completion of her present five-year plan. On leaving East Pakistan on Dec. 30 he returned to Delhi for further private talks with Mr. Nehru, before returning to Peking on Jan. 1, 1957.

It was announced on Dec. 23 that Mr. Chou En-lai would visit Moscow early in January at the Soviet Government's invitation. Mr. Chou told the Indian Press on Dec. 30 that he had decided to curtail his tour (which had originally been intended to include visits to Afghanistan and Nepal) in order that he might return to Peking for a short rest before going to Moscow, but that he would return to India and visit Afghanistan, Nepal, and Ceylon later in January.

Visit to Eastern Europe.

On Jan. 7 Mr. Chou En-lai arrived in Moscow for discussions with the Soviet leaders; he also had informal talks with the Hungarian Prime Minister, M. Kadar, who had arrived in the Soviet capital on Jan. 10. From Moscow the Chinese Prime Minister flew on Jan 11 to Warsaw for talks with M. Gomulka, M. Cyrankiewicz, and other Polish leaders, and afterwards made a tour of the main Polish cities. In a public speech in Warsaw on Jan. 12 he expressed his full approval of the recent developments in Poland.

After saying that "the Chinese nation greeted with satisfaction the joint statement on the talks between Poland and the Soviet Union in November 1956" (see 15242 A), Mr. Chou continued: "These talks bear witness to the fact that all errors in the mutual relations between Socialist countries can be fully corrected through friendly discussion. Now the whole world can see that the clouds overhanging the relations between the Soviet Union and Poland have dispersed, and that certain misunderstandings have been eliminated . . . We know that at the eighth plenum of the Central Committee of the Polish United Workers' Party [i.e. the meeting of Oct. 19-21—see 18161 A] certain errors and distortions committed in the past in political and economic life were brought to light . . . These errors have already been decisively corrected . . . Today we see with great joy that all the sound forces in Poland heading for Socialism are gathered around the Central Committee of the Polish United Workers' Party, with Comrade Gomulka at its head."

A joint statement, emphasizing that relations between Socialist countries should be based on the principle of equality between them, was issued at the conclusion of the Warsaw talks on Jan. 16. It was, however, regarded as significant that the statement made no reference to the Soviet claim to leadership of the Socialist countries, or to Soviet allegations that the uprising in Hungary had been a "counter-revolutionary" movement instigated by the Western Powers, although it expressed support for M. Kadar's Government.

Relations between Socialist countries, the statement said, should be "shaped by the principles of proletarian internationalism" but should also be "based on the principles of respect for their sovereignty, non-interference in internal affairs, equality, and

mutual benefit." Both delegations expressed their satisfaction at the recent improvements in relations between the Socialist countries, and their approval of the Soviet Government's declaration of Oct. 30 (see 15189 A) and the joint Soviet-Polish declaration of Nov. 1 (see 15242 A).

The statement continued: "Both parties hold that the basic principles of Marxism-Leninism should be applied with consideration of the concrete conditions existing in individual countries. The Chinese People's Republic supports the efforts of the Polish People's Republic in strengthening Socialism in Poland on the basis of Leninist principles." On the Hungarian question, the declaration stated that both Governments supported "the Hungarian Workers' and Peasants' Government headed by Janos Kadar," and were determined to oppose "all attempts at interference by the imperialist forces in the internal affairs of Hungary."

Mr. Chou En-lai paid a 24-hour visit to Budapest on Jan. 16-17, at the end of which he issued a joint statement with M. Kadar denouncing the "counter-revolutionary armed uprising prepared by the imperialist reactionary forces," and calling upon the Hungarian people to "stand solidly with the Soviet Union, leader of the Socialist camp." He returned to Moscow on Jan. 17 to resume his discussions with the Soviet leaders.

Mr. Chou En-lai and Marshal Bulganin issued on Jan. 18 a 2,000-word joint declaration, covering the whole field of international affairs, which *inter alia* pledged support to the countries of the Middle East against any "aggression or interference" in their affairs as a result of the "Eisenhower Doctrine." The main sections of the declaration are summarized below under cross-headings.

The International Situation. After referring to the *détente* which had followed the Geneva conferences of 1954 and 1955 and the Bandung Conference, the statement continued: "As a result of the armed attack of the imperialist aggressive forces against Egypt and their subversive activities in Hungary, the tendency toward easing the international situation has run up against the destructive resistance of these forces. With the support of the Socialist States and the other peaceable States and nations of the world, the peoples of Egypt and Hungary have achieved victory in their heroic and resolute struggle. The conspiracies of the imperialist aggressive circles have suffered utter defeat. The imperialists, however, cannot reconcile themselves to this, and continue their aggressive subversive activity . . . All the peace-loving peoples of the world must be constantly on the alert and prepared to wage a consistent and prolonged struggle against the machinations of the aggressive imperialist forces."

The Middle East. "After Britain, France, and Israel have suffered defeat in their aggression against Egypt," the declaration continued, "American imperialism is trying to make use of the situation so as to take the place of the colonialist Powers—Britain and France—in the Near and Middle East, to suppress the movement for national independence, and to enslave the peoples of those countries, and is also trying to step up the policy of aggression and war preparations in this area. This is precisely the essence of the so-called Eisenhower Doctrine. This U.S. colonialist policy in the Near and Middle East creates fresh tensions in this area . . . The Soviet Union and the People's Republic of China resolutely condemn this policy of the United States, and are ready to continue rendering the necessary support to the peoples of the Near and Middle East so as to prevent aggression and interference in the affairs of the countries of this area.

"With a view to completely eliminating the consequences of imperialist aggression in Egypt, both Governments believe that it is necessary to satisfy the Egyptian Government's lawful demand for complete compensation by Britain, France, and Israel for the damage caused by their aggressive actions. Both Governments resolutely oppose any imperialist machinations aimed at placing the Suez Canal under 'international control,' and support the settlement of the question of free passage of shipping through the Suez Canal by way of negotiations between the States concerned on the basis of complete respect for Egyptian sovereignty."

Hungary. "The armed uprising in Hungary," the statement said, "was provoked by imperialist aggressive quarters and Hungarian counter-revolutionary elements, which made use of the dissatisfaction among the Hungarian working people and youth caused by the mistakes of the former leadership. They attempted to destroy the Socialist system in Hungary, to restore Fascist dictatorship, and thereby to create a hotbed of war in Europe. By their conspiracy in Hungary, they tried to make a breach for the realization of their schemes of disuniting the Socialist States and smiting them one by one. The swift defeat of the counter-revolutionary forces by the Hungarian people, led by the Hungarian Socialist Workers' Party and the Workers' and Peasants' Revolutionary Government, and assisted by the Soviet Union, is a major victory for the cause of peace and Socialism . . . The Soviet Union and China are united with all the Socialist States by their fraternal friendship and mutual assistance commitments. Any provocative actions of the aggressive imperialist forces aimed at undermining the Socialist States will meet with the most resolute rebuff."

Relations with the United States. The declaration claimed that the Soviet Union and China had tried to establish "peaceful co-existence" with the U.S.A., but that their efforts had been frustrated by "the claims of American monopoly circles for world domination and their policy of aggression and war preparations."

Relations with Japan. The statement welcomed the restoration of diplomatic relations between the Soviet Union and Japan, and called for the normalization of relations between Japan and China.

Collective Security. "Both parties believe that all exclusive military alignments must be replaced by a system of collective peace and collective security," the declaration went on. "The Warsaw Treaty is a defensive military alliance that the Socialist countries of Europe were compelled to establish after the conclusion of the aggressive North Atlantic Pact. The Warsaw Treaty countries consistently advocate the abrogation of the North Atlantic and Warsaw Pacts and their replacement by a treaty of collective security in Europe. The Governments of the Soviet Union and China also stand for the abrogation of the Manila and Baghdad Pacts and their replacement by a treaty on collective peace in Asia and the Pacific. Both Governments believe that an agreement between the great Powers on disarmament is of prime importance in the present international situation. The Chinese Government expresses its support of the Soviet Government's disarmament proposals."

Relations between Socialist Countries. The declaration condemned "the insidious plans of the imperialists to speculate on chauvinism, narrow nationalistic feelings, and some survivals of national enmity in order to undermine and split the unity of the Socialist countries," and stated that "it is fully possible in their relations to combine the unity of Socialist countries and the independence of each individual country." The principle of the complete equality of the Socialist countries was reaffirmed in similar terms to those of the Warsaw declaration.

Second Asian Tour.

After leaving Moscow Mr. Chou En-lai flew on Jan. 19 to Kabul, where he discussed international questions with the Afghan Prime Minister, Mr. Mohammed Daud Khan. A communiqué issued on Jan. 22 stated that they had agreed to strengthen the ties between their two countries. Mr. Chou proceeded on Jan. 24 to Delhi, where he had a three-day meeting with Mr. Nehru, and then continued his journey on the following day to Khatmandu for a five-day visit to Nepal. At a banquet given in his honour on Jan. 26 by the Nepalese Premier (Mr. Tanka Prasad Acharya), Mr. Chou En-lai gave an assurance that China would continue to assist Nepal to build up her economy and safeguard her independence (see 15449 C).

Mr. Chou En-lai concluded his tour by paying a five-day visit to Ceylon (Jan. 31 - Feb. 5) at the invitation of the Ceylonese Government. Mr. Chou and Mr. Bandaranaike (the Ceylonese Prime Minister) had a number of discussions in Colombo, and on Feb. 5 issued a joint statement calling for a new Asian-African conference at the earliest opportunity.

The statement reaffirmed the two countries' adherence to the principles accepted by the Bandung Conference, and expressed the opinion that "active steps should be taken to implement further these principles, and that another Asian-African Conference should be convened at the earliest opportune moment for this purpose." After emphasizing that nations with divergent outlooks and different social systems could live together in peace, the statement continued: "We therefore record our disapproval of antagonistic military blocs and our support of disarmament, and we stress the need for the prohibition of nuclear weapons and the cessation of tests of such weapons. At the same time it is necessary to strengthen the solidarity of the Asian-African nations to oppose in this area the aggression and expansion of the imperialist and colonial forces that are still trying desperately to thwart the freedom and progress which the peoples of the world are striving to achieve . . .

"With regard to the situation in Egypt and Western Asia, we are of the opinion that the continuance of power politics, or the substitution of one Power for another in the name of filling a so-called vacuum, will not help to solve the problems of this area, whose peoples must be free to work out their own destiny in accordance with their own wishes. Only in this way can collective peace be ensured and international disputes settled peacefully in this area. We are deeply distressed by the unfortunate situation that has arisen between Pakistan and India in regard to Kashmir. We appeal to both parties concerned, in their own as well as in the wider interests of Asian-African solidarity, to strive for a peaceful settlement of this problem. Our two countries [Ceylon and China] have been bound by ties of friendship for many centuries. While recognizing and respecting differences of outlook that may exist between us, we are determined to strengthen those ties and foster co-operation for our mutual benefit."

During his visit to Ceylon the Chinese Prime Minister addressed an informal meeting of Senators and M.P.s; attended an Independence Day rally and a civic reception; and went to Kandy, where he visited the Temple of the Sacred Tooth, one of the most sacred Buddhist shrines. He was conducted into the shrine room of the temple, where he offered jasmine flowers and bowed in reverence; he afterwards made a cash gift to the temple, as well as giving a set of books on Buddhism edited by the Chinese Buddhist Association. A. UNITED KINGDOM. — Agricultural Policy. - Farm Prices for 1957-58. - Long-Term Assurances for Farmers. - Egg and Pig Marketing Schemes. - Reports on Local Administration of Ministry of Agriculture and on Horticultural Marketing. - Agricultural Legislation.

A White Paper published on March 21 announced the new farm prices and production grants for 1957-58, fixed as a result of the Annual Review in February and providing for an increase in the total value of agricultural guarantees of about £14,000,000 in a full year. Price guarantees for fat cattle, sheep, and lambs showed increases compared with 1956-57, and there was also a small rise in the guarantee for milk (though insufficient to cover higher production costs), but a decrease in the price guarantee for eggs. The White Paper explained that while the Government wished to encourage the production of good quality beef and lamb, no more milk, eggs, pigmeat, or wheat should be sought after; indeed, in present circumstances less milk and eggs were needed than the quantities at present in prospect. The new prices (effective from April 1, 1957, except those for cereals and root crops) are given below, with the 1956-57 review prices in parentheses:

Livestock and Livestock Products. *Fat Cattle*: Steers, heifers, and special young cows, 156s. a live cwt. (151s.). *Fat Sheep and Lambs*: 3s. 2½d. an estimated lb. dressed carcase weight (3s. 2d.). *Fat Pigs*: 51s. 11d. a score deadweight (49s. 7d.).* *Milk*: An average of 3s. 2.70d. a gallon (3s. 2.45d.). *Wool*. An average of 4s. 8½d. a lb. (unchanged).

*The 1957-58 and 1956-57 prices were based respectively on feed prices of 31s. 5d. and 31s. 2d. per cwt., the new price therefore representing a net increase of 2s. 1d.

Eggs. An average of 4s. 1½d. for hen eggs (4s. 1½d.) and 2s. 5d. a doz. for duck eggs (2s. 4½d.).

Cereal and Other Crops (1957 harvest). *Wheat*: An average of 28s. 7d. a cwt. (29s. 9d.). *Barley*: 29s. 0d. a cwt. on new basis (26s. 0d., equivalent to 28s. 6d. on the new basis). *Oats*: 27s. 5d. a cwt. (24s. 9d.). *Rye*: 22s. 1d. a cwt. (23s.). *Potatoes*: 225s. a ton (217s. 0d.). *Sugar Beet*: 130s. 6d. a ton (128s. 1d.).

Production Grants and Subsidies. After reviewing existing grants (totalling about £70,000,000 annually), the Government had decided to give further encouragement to the use of nitrogenous fertilizers. From July 1, 1957, therefore, increased subsidies for these fertilizers would be fixed, involving about £3,000,000 yearly at current rates of consumption.

Minor extensions would also be made in the scope of ploughing grants and the lime subsidy.

The White Paper explained that under the long-term assurances announced in November, 1956 (see below) the lower limit for the determination of guarantees and subsidies for 1957-58 would have been an increase of just under £8,000,000 in guarantees and production grants. The Government, however, had decided on an increase of about £14,000,000 in the belief that this would "enable the industry to maintain its progress in improving efficiency and secure a reasonable level of economic production," while at the same time according with "the present stringent requirements of the national economy."

Other important information contained in the White Paper is summarized below:

Net Farm Income in 1956-57. This was estimated at £317,000,000, compared with £325,000,000 in 1955-56, the fall being due to the adverse weather conditions in the summer of 1956. When adjusted for normal weather conditions, these figures were equivalent to £334,000,000 for 1956-57 (i.e. about equal to the 1952-53 record) and £306,500,000 for 1955-56.

Farm Costs in 1956-57. There had been a further increase in costs during 1956-57 equivalent to about £28,000,000 in a full year, but this had been partly offset (to the extent of about £25,000,000) by increased efficiency.

Farm Output in 1956-57. This was estimated at 59 per cent above pre-war figures, compared with 56 per cent above pre-war in 1955-56. The White Paper explained that, but for the bad harvest, the target of 60 per cent above pre-war set for the industry some years back would have been reached or exceeded.

Agricultural Policy for 1957-58. The White Paper gave the main objects of this as (1) the maintenance of an arable acreage of about the current size, but with more emphasis on feeding crops; (2) the maintenance of a large livestock population, with greater reliance on home-produced resources. It estimated the total cost of the support given to agriculture in 1956-57 at about £245,000,000 (compared with about £205,000,000 in 1955-56), adding: "Present production and market prospects, together with the cost of the proposed farm improvement scheme, indicate that this total is likely to rise further. It is therefore essential that, within the scope allowed by the long-term assurances [see below], everything possible should be done to keep down the burden of cost on the taxpayer."

Explaining the Government's policy with regard to milk and eggs, the White Paper said that milk production had increased much faster than liquid milk consumption, while supplies for manufacture —produced at considerable expense in imported feed—now threatened to exceed peak manufacturing capacity. At the same time abundant milk supplies were available from Commonwealth countries, and it was therefore clear that some reduction in output was needed and that this must be sought by a reduction in profitability.

As regards eggs, the substantial increase in output—also achieved at considerable expense in imported feed—had weakened the market at an excessive and increasing cost to the Exchequer, and the aim must therefore be to reduce the output now in prospect at the current guaranteed price.

Mr. Heathcoat Amory (Minister of Agriculture, Fisheries and Food) stated in the House of Commons on March 21 that the price determinations had been agreed with the National Farmers' Unions "with complete unanimity."

Long-term Assurances to Farmers.

The arrangements for long-term assurances to farmers, referred to in the White Paper, had been announced by Mr. Heathcoat Amory in the House of Commons on Nov. 27, 1956, and had been drawn up after consultation with the National Farmers' Unions of England and Wales, Scotland, and Northern Ireland. The arrangements, described by Mr. Amory as "the most massive measure of support for the industry since the 1947 Agriculture Act," and intended to operate from the 1957 price review, were outlined in a White Paper published on the same day and summarized below:

(1) In order to reduce the uncertainty inseparable from annual price reviews, the Government undertook to maintain the total annual value of price guarantees and production grants in any year at not less than 97½ per cent of the total value in the preceding year, with adjustments for increases or decreases in the production costs of review commodities.

The present annual combined value of price guarantees and production grants was given as about £1,150,000,000.

(2) The total of guaranteed prices for review commodities in any year would be maintained at not less than 96 per cent of the total in the preceding year. Moreover, any price reductions in the cases of livestock and livestock products would not be allowed to exceed a total of 9 per cent over a three-year period.

It was claimed that this undertaking would be an improvement on existing arrangements for minimum prices because it would relate the minimum assurances each year to the prevailing level of guarantees.

(3) Annual reviews of farm prices would continue broadly on exisiting lines, but, in order to allow changes in costs to be reflected more rapidly, the crop price guarantees determined after each annual review would apply to the same year's harvest, instead of to the next year's as previously.

(4) Special price reviews would be held only when increases in the production costs of review commodities for the remainder of the current review year exceeded ½ per cent of the value of the guarantees. [This percentage is at present equivalent to nearly £9,000,000].

(5) There would be a new scheme of grants, at the rate of one-third of actual costs, for farm improvements, i.e. the provision of permanent fixed equipment on farms and the long-term improvement of land.

Since any general plan for the re-equipment of agriculture would have to provide for the merging and re-grouping of uneconomic holdings into economically viable units, grants would cover the cost of equipping uneconomic farms as part of an amalgamation scheme with other farms, and would give special help to certain other costs involved in such a scheme.

The new grants scheme was expected to encourage "a great programme of farm modernization in order to increase working efficiency and lower production costs." The cost to the Exchequer might amount to about £50,000,000 over a 10-year period.

In conclusion, the White Paper explained that the Government's long-term policy for agriculture continued to be "to support and assist the industry to achieve maximum economic output," the first objective being "to obtain as much as possible of such output from home resources." After closely examining the possibility of avoiding annual price reviews or of making the procedure more automatic and the outcome more predictable, both the Government and the farmers' unions had decided that this was not practicable, since satisfactory arrangements would have to take account of many changing factors.

On Sept. 18 the three farmers' unions had requested a special price review to take account of the recent increase in farm wages (see 15032 D) and the effect of the poor summer on the 1956 harvest.

Mr. Heathcoat Amory, rejecting this request in a letter to Sir James Turner (president of the N.F.U.) on Oct. 10, explained that after carefully considering it in the light of the industry's condition and of current economic circumstances, the Government had decided that the effect of the wage increase on costs was not sufficient to warrant a special review. The Government had already taken steps to help farmers, growers, and merchants in dealing with the difficulties caused by the bad weather.

[A Ministry of Agriculture report published early in October stated only about 0.3 per cent of the total cereal acreage in Britain was likely to be abandoned as a result of the weather. The loss of yield had been estimated by the N.F.U. at £15,000,000 and the extra cost to farmers owing to the wage increase at £10,000,000.]

Other developments in connexion with agriculture and horticulture during recent months are described below:

Supplementary Guarantee Payments (1956-57) for Fat Cattle. Mr. Heathcoat Amory announced in the House of Commons on Oct. 25, 1956, that in order to bring the estimated average return over the current year approximately to the standard price of 151s., producers of fat cattle would receive supplementary payments averaging about 11s. a live cwt. The cost to the Exchequer would be about £11,000,000.

The Minister explained that the existing guarantee arrangements, based on a 52-week "rolling average," had proved too slow to reflect adequately the sharp fall in prices during the year, and that a "substantial gap" between the average received by producers and the standard price fixed at the 1956 review seemed inevitable.

Egg Marketing Scheme. The House of Commons approved on Dec. 11, 1956, a draft marketing scheme for British eggs, intended to ensure that a supply of graded and quality-tested eggs was available in commercial quantities. The scheme was originally put forward by the three farmers' unions, but was modified by the Government following a public inquiry. As modified, it provided for the setting-up of an Egg Marketing Board of seven members, to which all egg producers having more than 50 head of poultry over six months old would have to sell their eggs. The Board would employ packing stations as agents to handle eggs from the producers and to grade and stamp them, and would fix daily selling prices. It would, however, have no control over wholesale and retail distribution, which would proceed along normal competitive channels.

Producers with fewer than 50 head of poultry over six months old would be able to claim exemption from the scheme, and producers selling eggs by retail or direct to retailers would be free to do so without testing, grading, or stamping them.

Mr. Heathcoat Amory, in moving approval of the scheme on Dec. 11, stated that Britain now produced about 10,000,000,000 eggs a year or about 95 per cent of her consumption, compared with only 70 per cent before the war.

It was announced on April 2, 1957, that a poll of registered egg producers held in March under the Agricultural Marketing Acts had shown a majority of 93.7 per cent for the scheme, which would be brought into effect "sometime after May 14."

Marketing of Pigs and Bacon. - Creation of Pig Industry Development Authority. The Government's proposals with regard to the marketing of pigs, pigmeat and bacon were outlined in a White Paper published on Nov. 26. They comprised:

(1) The setting-up of a Pig Industry Development Authority to draw up and put into effect a comprehensive programme for securing improvements in pig production, processing, and distribution. The Authority would consist of 16 members—six drawn from the processing and distributive trades and seven from farmers and farm workers, with two independent members and an independent chairman. It would be responsible for (*a*) keeping national pig records and supervising progeny tests; (*b*) establishing a national insemination service; (*c*) operating an accredited herd scheme; (*d*) research and development in production and processing; (*e*) establishing improved standards of grading; (*f*) market intelligence and consumer research; (*g*) national advertising and promotion of export sales.

It was estimated that the Authority would require an annual income of £500,000-£1,000,000, to be raised by a small levy on each pig slaughtered.

(2) The retention of a free market in pigs and pigmeat, and the continuation of the existing price guarantee arrangements, subject to a gradual raising of grading standards.

Mr. Heathcoat Amory stated on the same day that it was hoped that the Pig Industry Development Authority would begin operations during the second half of 1957. The Bacon Industry Acts, which had virtually been suspended since 1940, would be repealed and the existing Pig Marketing, Bacon Marketing, and Bacon Development Boards would be wound up.

The establishment of a Pig Industry Development Authority, with the composition and duties set out above, had been recommended by the Reorganization Commission on the Marketing of Pigs and Bacon which had been set up in March 1955 (see 14186 A) and had published its report on July 12, 1956. The Commission's chairman was Dr. C. C. Bosanquet, Rector of King's College, Newcastle-upon-Tyne.

In addition to the setting-up of the Authority, the Commission had recommended that there should be different systems for marketing pigs of bacon weight and pigs sold for pork and other forms of pigmeat. Bacon pigs should be sold under a price-negotiating system, administered by a Marketing Supervisory Commission and Pig Producers' and Bacon Curers' Boards, weekly minimum prices being fixed between the Boards, with recourse to arbitration through the Marketing Supervisory Commission in case of failure to agree. There should, however, be no statutory control over the marketing of pork pigs, and the Commission rejected proposals put forward by the farmers' unions calling for the setting-up of a producers' marketing board to trade in pigs of all kinds.

The Governments' announcement that it proposed to retain a free market in pigs and pigmeat followed an intimation by the three farmers' unions on Nov. 27 that they were "strongly opposed" to the Commission's recommendation that the market for bacon pigs should be operated on a statutory basis while the market for other pigs was left uncontrolled.

Dispossessed Farmers. Mr. Heathcoat Amory stated in a Parliamentary reply on Oct. 31, 1956 that a total of 259 farmers had been dispossessed since Oct. 31, 1951 for bad husbandry, including seven who had been dispossessed in the year ended April 30, 1956. On the latter date a total of 225 farmers were under supervision.

Report of Committee on Regional and Local Administration of Ministry of Agriculture.

The report was published on April 16, 1956 of an independent committee appointed by the Minister of Agriculture in Dec. 1954 (following the Crichel Down case, see 14296 A) to inquire into the Ministry's provincial administration, including the conduct of its transactions in agricultural land. Originally the Committee, whose chairman was Sir Arton Wilson (formerly Permanent Secretary, Ministry of Pensions), had been asked to review the organization for the acquisition and administration of land, but on the recommendation of a select committee on Estimates its terms of reference were widened to include the Ministry's local administration and matters arising from its amalgamation with the Ministry of Food.

The Committee's principal recommendations were: (1) reorganization of the County Agricultural Executive Committees; (2) reduction of the Ministry's 60 county offices to 35-40; (3) transfer of land management from the Agricultural Land Commission to the Ministry. The recommendations are summarized under cross-headings below:

County Agricultural Executive Committees. These should be freed from routine administration and devote themselves to advising the Minister on the shaping and development of policy. The existing sub-committees should be replaced by a single panel to deal with statutory work and to hear appeals from farmers on grants, etc.

Ministry Regional and Local Offices. The existing 60 offices should be reorganized into 35 to 40 units to deal with local executive work, including the functions relinquished by county executive committees (see above). Regional controllers should be appointed.

Agricultural Land Service. This body should transfer its advisory work to the National Agricultural Advisory Service, and confine itself to the functions of land agents engaged in land management.

Milk Organizations. The Ministry's National Milk Testing Service should be disbanded and its work taken over by the Milk Marketing Board.

Veterinary Service. This should be responsible for all technical work on milk and dairies' regulations. A new post of Regional Veterinary Officer should be created.

Pests Services. The existing eight pest services should be reduced to two, dealing respectively with land pests and insect pests.

Fatstock Marketing Organization. This should be reorganized to conform with the Ministry's new regional organization.

Compulsory Land Acquisition. Notifications of decisions to acquire land compulsorily should be unequivocal, and the time limit for appeals should be stated clearly. Former owners of land should be notified of any decision not to give them the first option to repurchase it, and the Minister should appoint representatives to hear and assess their objections to such decisions. Except in the case of sales to former owners, the normal method for reselling land acquired by the Ministry should be by public auction, subject to a reserve price.

Mr. Heathcoat Amory announced on Aug. 12 that the Government proposed to adopt the Committee's recommendation that the Ministry's divisional executive offices should be reduced in number, and that regional controllers should be appointed to bring together ministerial organizations now operating separately at regional level. It had, however, been decided not to make any substantial changes in the structure of county agricultural executive committees or to replace the existing sub-committees by single executive panels, as proposed by the Committee.

Report of Committee on Horticultural Marketing.

The committee set up in March 1955 under the chairmanship of Lord Runciman to inquire into horticultural marketing (see 14186 A) published its report on Jan. 28, 1957.

The committee found that although existing arrangements for marketing and distributing fruit, vegetables, and flowers were "far from perfect," they were "better than any others which could take their place at present." Neither distribution costs nor distributors' profits were excessive, but there was room for improvement in packing and grading, whilst co-operative marketing arrangements [where conditions were suitable] "could do much to improve efficiency and keep down costs." Meanwhile, the efficiency of marketing and distribution was "frequently impaired by inadequate marketing facilities," and market authorities should be urged to rebuild or improve unsuitable premises and to consider introducing longer market hours.

In this connexion the Committee considered (*a*) that Covent Garden market should be given improved facilities to enable it to perform its national functions properly; (*b*) that other markets in the London area—notably the Brentford and Stratford markets—should be expanded; and (*c*) that a new wholesale market should be created for North-West London. It therefore recommended the setting-up of (1) a London market authority to re-organize Covent Garden market, create a new market for North-West London, and co-ordinate action affecting other London markets; (2) a marketing council, representing all sections of the industry, to handle market intelligence, encourage better marketing techniques, promote publicity, and co-ordinate research and educational work.

Agricultural Legislation.

The following Bills dealing with agricultural welfare and development were enacted during 1956:

The Agriculture (Safety, Health, and Welfare Provisions) Bill. This Bill represented the first instalment of the Government's proposed legislation to implement the recommendations of the Gowers Committee on Health, Welfare, and Safety in Non-Industrial Employment, which reported in 1948. It was given an unopposed second reading in the House of Commons on Feb. 5, 1956 and enacted on July 7.

The Bill empowered the Minister of Agriculture, Fisheries, and Food and the Secretary of State for Scotland, after consulting organizations representing agricultural interests, to make regulations for the protection of farm and forestry workers against risks of injury to body or health, including safeguards for workers operating farm machinery, the prohibition of children under 13 from riding on or driving certain farm vehicles or machinery, the provision of suitable sanitary conveniences and washing facilities, etc.

Mr. Heathcoat Amory, moving the second reading in the House of Commons, stressed that British agriculture had become "the most highly mechanized in the world," with 470,000 tractors against only about 55,000 in 1939. About 25,000 farm accidents occurred annually, including about 150 fatal accidents, and some £500,000 was paid out each year in compensation.

The Hill Farming Bill. This Bill, given an unopposed second reading in the House of Commons on July 20, was enacted on Nov. 5, 1956. It (1) extended for a further seven years the period during which land improvement schemes under the Hill Farming Act might be submitted and subsidies for hill sheep and cattle would be payable; (2) increased the total sum available for improvement grants from £20,000,000 to £25,000,000.

The Agricultural Mortgage Corporations Bill. The main purpose of this Bill, which received a second reading in the House of Commons on March 13, 1956 and the Royal Assent on May 17, was to increase from £2,500,000 to £3,250,000 the total of loans which the Minister of Agriculture might make to the Agricultural Mortgage Corporation.

The Agricultural Research Bill. This Bill, which was given a second reading in the House of Commons on Dec. 13, 1955, and enacted on March 14, 1956: (1) unified the administration and direction of grant-aided agricultural research in England and Wales under the Agricultural Research Council; (2) made the Council (instead of the Treasury, as previously) responsible to Parliament for all expenditure on agricultural research, but required it to submit an annual report to the Privy Council; (3) set up a special Agricultural Research Fund.

The House of Commons gave an unopposed second reading on March 25, 1957, to the Agriculture Bill, implementing the policy of long-term assurances to farmers announced by Mr. Heathcoat Amory on Nov. 27, 1956. The Bill also (*a*) provided for the setting-up of a Pig Industry Development Board (see above); (*b*) authorized the payment to Northern Ireland of an annual grant of £1,000,000 for five years, to replace the annual grant made available in each of the past three years.

Mr. Heathcoat Amory, in moving the second reading, announced that he had asked the farming industry to nominate members to an advisory committee to assist him in working out details of the farm improvements and amalgamation scheme which formed part of the long-term policy. The chairman of the committee would be Lord St. Aldwyn, Parliamentary Secretary to his Ministry.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

A. BULGARIA. — Cabinet Changes.

The Bulgarian National Assembly approved on Feb. 1 further changes in the Government headed by M. Yugov, the composition of which became as follows:

M. Anton Yugov	Prime Minister.
M. Georgi Chankov, M. Georgi Traikov	First Deputy Premiers.
M. Raiko Damyanov	Deputy Premier and Trade.
M. Vulko Chervenkov	Deputy Premier and Education and Culture.
General Ivan Mikhailov	Deputy Premier and Transport and Communications.
M. Russi Hristozov	Chairman of the State Planning Commission.
M. Kiril Lazarov	Finance and State Control.
M. Georgi Tsankov	Internal Affairs.
M. Radi Naidenov	Justice.
M. Karlo Lukanov	Foreign Affairs.
General Peter Panchevsky	Defence.
M. Radenko Vidinsky	Construction and Building Materials.
M. Tano Tsolov	Heavy Industry.
Mme. Stanka Tsekova	Light Industry.
M. Stanko Todorov	Agriculture and Forests.
M. Atanass Dimitrov	Food Industry.
M. Kimon Georgiev	Electrification and Water Resources.
M. Peter Kolarov	Health and Social Services.
M. Stoyan Tonchev	Municipal Economy, Amenities and Highways.

B. AUSTRALIA. — Mineral Development in the Northern Territory. - The Humpty Doo Rice-growing Project. - Plans for Large-scale Rice Production.

Figures issued in January by the Federal Department of Territories showed that gold output in the Northern Territory in 1956 had exceeded £A1,000,000 for the first time, that copper production had exceeded £A2,000,000 in value, and that the value of the Territory's mineral production, excluding uranium, was £A3,500,000. In addition the report stated that the output of tungsten was expanding; that tin, mica, and silver were being mined in greater quantities; that an intensive search was being made for gold, copper, silver, lead, uranium, bauxite, tin, and zircon on a scale not previously possible; and that, with the first discovery of gas in a water-bore at Alice Springs, oil-prospecting permits had been issued in this area.

It was commented in the Australian Press that the Northern Territory, which had been virtually neglected until the discovery of uranium at Rum Jungle, had now become the focal point for a vast investigation of mineral wealth. In the past, the Territory had depended for its prosperity mainly on its great cattle herds, except for isolated discoveries of gold at centres such as Tennant's Creek, 300 miles north of Alice Springs.

Details were also given during January of a large-scale rice-growing project which had been inaugurated at Humpty Doo, on the great alluvial plains 30 miles south of Darwin. In 1954 an American, Mr. Allen T. Chase, and other U.S. industrialists had set out to find "an assured source of rice in a stable democratic country" and had formed a company (Territory Rice Ltd.) for the purpose of large-scale rice cultivation on the plains inland from Darwin, where climatic and soil conditions were favourable. On April 11, 1956, the Northern Territories Legislative Council approved an agreement between the Federal Government and the company giving the latter an option on 750,000 acres of the sub-coastal plain, on the conditions (*a*) that the company must take up 500,000 acres of the area within 15 years, and (*b*) that, in return for leases for 30 years, it must sub-divide at least half the area for settlement by potential Australian farmers.

Since then the Humpty Doo project has produced long-grain varieties of the Patna type yielding 2,200 lb. an acre and long-grained Malayan, Burmese and Kenyan varieties yielding from 3,500 lb. to 4,000 lb. an acre. During the current sowing period Territory Rice Ltd. will plant 2,000 acres, with an anticipated yield of 4,000 tons, after which "the sky is the limit." The company's experts believe that, if production can be achieved over large areas, the Northern Territory might become one of the world's major rice-producing centres and might possibly supply much of the needs of the vast markets of Asia.—(Australian News and Information Bureau - Times)

A. CENTRAL AMERICA. — Projected Common Market and Free Trade Area between Central American Republics. - Establishment of Regional Industries.

The Ministers of Economy of the five Central American republics of Costa Rica, Guatemala, Honduras, Nicaragua and El Salvador, meeting in Guatemala City on Feb. 24, approved in principle two treaties designed to create a free trade area in Central America and a system of regional industries. Both documents had been drawn up in draft form during 1954 by groups of experts under the aegis of the U.N. Economic Commission for Latin America. The Ministers recommended the individual Governments to ratify the treaties as soon as possible so that they might come into force at the earliest moment.

The ten-year multilateral trade treaty was designed to eliminate import and export taxes on certain products embracing about 49 per cent of inter-Central American trade on the basis of 1955 figures. In its original form the treaty laid down two lists of member-countries' products : (*a*) those which would have unhindered circulation within the projected free trade zone, and (*b*) those that might be subjected to quantitative export and import controls by member-countries. To this, the Ministers of Economy added a third classification—viz., products whose tariffs might be lowered gradually over several years to lessen the economic impact of the change. While approving the treaty in principle, the Ministers deferred discussion on the products to be included, which was left to the determination of the individual Governments. The treaty stated that the five countries would form a Customs Union after the creation of a free trade zone, " as soon as conditions are propitious."

The second treaty provided for the establishment of regional industries in areas where the most efficient use could be made of local resources and transport, and in such a manner as not to duplicate existing industries. It laid down *inter alia* that the industries concerned would have access to the free trade zone ; that conflicting national interests would be resolved by a separate five-nation pact to be signed for every regional industry established ; and that such pacts would include the specific amounts of tariff reductions, tax-exemptions, fiscal benefits, and subsidies. Industries specifically under consideration are those concerned with petroleum by-products, tyres and inner-tubes, glass, paper, metal, metal and plastic containers, ceramics, and rayon fibres.

A free trade treaty was signed on Feb. 16 between Honduras and El Salvador providing for the exchange of about 200 commodities. Valid for two years, it is automatically renewable for further two-year periods unless either party gives 90 days' notice of termination. It was also agreed to study the possibility of improving road communications between the two countries, with the double purpose of facilitating trade and of providing El Salvador with an outlet to the Atlantic through Honduras.

Measures for the economic integration of the Central American republics had been under discussion since the creation of the Organization of Central American States (*Organización de Estados Centro-Americanos*) in 1951—see 11830 B. The Central American free trade area, when in being, will embrace a common market of about 9,500,000 people—the approximate populations of the five Republics being 3,200,000 in Guatemala, 2,500,000 in Honduras, over 2,000,000 in El Salvador, over 1,000,000 in Nicaragua, and about 800,000 in Costa Rica.—(New York Times - Manchester Guardian)

(Prev. rep. 14439 A ; 14283 B ; 11830 B.)

Note. The five Republics formed themselves in 1823 into a Central American Federation, which, however, was disbanded in 1838.

B. SOVIET UNION. — Nuclear Weapon Tests.

Tests of nuclear weapons in the Soviet Union on Jan. 19 and March 8 were announced by the chairman of the U.S. Atomic Energy Commission (Rear-Admiral Strauss) in statements issued on Jan. 20 and March 9 respectively. Admiral Strauss described the explosion of Jan. 19 as in the range of " less than one megaton," while the explosion of Jan. 19 was described as " in the range of the recent Soviet detonations." On April 6 further announcements were issued by the British Defence Ministry and the U.S. Atomic Energy Commission stating that another nuclear test had been carried out in the U.S.S.R. on April 8. No statements were issued in Moscow about any of these tests, nor did the U.S. and British announcements state whether the tests involved thermo-nuclear (hydrogen) or fission (atomic) weapons.

The Soviet Foreign Ministry spokesman (M. Ilyichev) said on March 26 that the U.S.S.R. was prepared to hold " concrete discussions " with the Western Powers aimed at the " immediate and temporary cessation " of nuclear weapon tests."
(New York Times - Manchester Guardian) **(15212 D.)**

C. JORDAN. — Recognition of Soviet Union.

It was announced in Amman on April 2 that the Jordanian Government had decided to establish diplomatic relations with the Soviet Union at embassy level. (Daily Telegraph)

D. BRITISH EAST AFRICA. — Changes in Membership of Central Legislative Assembly. - Territorial Governments accept Principal Recommendations of Royal Commission on Land and Population.

Changes to broaden and strengthen the representational basis of the East Africa Central Legislative Assembly were announced in Nairobi on Dec. 5, 1956, under which the Council's membership was increased from 24 to 34 members with immediate effect.

Nominated Members. These were increased from three to six, each territorial Governor appointing two such members. One of the two nominated by the Governor of Tanganyika will not need to hold an office of emolument under the Crown.

Unofficial Members. These were increased from 13 to 20, as follows : (*a*) nine selected by the Governors of Kenya, Tanganyika, and Uganda (three for each territory) ; (*b*) nine unofficial members of the territorial Legislative Councils (three from each territory) ; (*c*) two Arab members appointed by the East Africa High Commission. In the case of Uganda and Tanganyika, but not in Kenya, those appointed by the Governor will have to be members of the Legislature. Of the unofficial members not appointed by the Governors, one each will be chosen in Kenya by the three racial groups (Europeans, Asians, and Africans), while in Uganda and Tanganyika they will be elected " from among members of the Council " without reference to race.

In addition to the nominated and unofficial members, the East African Central Legislative Assembly comprises the Speaker and seven *ex-officio* members who are officers of the East African High Commission.

The Colonial Office published on July 25, 1956, dispatches by the Governors of Kenya, Uganda, and Tanganyika, and the Administrator of the East African High Commission, expressing agreement with most of the more important recommendations of the Royal Commission on Land and Population in East Africa. A commentary on the dispatches was also published as a White Paper.

Agriculture. All three Governments agreed with the Commission's recommendations for a " guided revolution " in African agricultural methods based on the abandonment of subsistence farming and the integration of the African cultivator in a modern exchange economy. The Governments also accepted the need to encourage systems of individual land tenure, but recommended caution in establishing such systems in the face of African conservatism, pointing out that such far-reaching changes could not be imposed unless the Africans understood and accepted them.

Marketing and Distribution. In connexion with the Commission's criticism of the conception of self-sufficiency, particularly in regard to food crops and the use of protective devices to encourage local production, the Kenya Government pointed out that it was the present low level of output which sometimes made it necessary to shield producers from outside competition ; as the economy expanded, however, it would become less necessary to do so. To apply this policy, the three Governments had set up a committee for economic co-ordination.

Supra-territorial Institutions. The Commission's recommendations for the creation of certain economic institutions on a supra-territorial basis were rejected by the three Governments. They believed that an East African Prospecting and Mining Leases Board would be economically inefficient, and also rejected the proposals for an autonomous Railways and Harbours Corporation and an East African Road Corporation. On the other hand, they favoured to some extent the proposal for a Colonial Transport Development Fund, provided additional resources were made available for the expansion of East African transport facilities.

Immigration. The Commission's recommendation that the three Governments should exercise direct supervision over immigration, instead of through boards which might reflect the views of sectional interests, would be embodied in new legislation to be introduced in Kenya and Tanganyika.

Labour Policy. All three Governments reaffirmed their belief that trade unionism was a necessary feature of territorial development, provided that British practice was modified to suit local conditions.

The dispatches emphasized that much of the required economic expansion would entail expenditure far beyond local resources. The White Paper estimated in this connexion that during the period 1955-60 about £250,000,000 could be fruitfully applied in support of developments recommended by the Royal Commission. It pointed out, however, that this was " far beyond present resources and prudent expectations of the Governments and the High Commission," and that it would require the provision of external funds considerably in excess of what had so far been made available.
(Times - Commonwealth Survey) **(Prev. rep. 14334 A.)**

E. UNITED KINGDOM. — University of Leicester.

The University College of Leicester assumed full university status on March 18, under a Royal Charter approved by H.M. the Queen. Opened in 1921 as a university college, it has at present 830 students and it is planned to double this number in the next ten years. The first Chancellor of the University of Leicester is Lord Adrian, O.M., F.R.S., Master of Trinity College, Cambridge.—(Times) **(Prev. rep. 14531 D.)**

APRIL 6—13, 1957

A. CYPRUS. — Lord Radcliffe's Constitutional Proposals. - Acceptance by British Government. - Greek and Turkish Reactions. - U.N. Resolution on Cyprus. - Eoka Truce Offer. - NATO Conciliation Offer in Cyprus Dispute. - Release of Archbishop Makarios. - Safe-conduct Offer to Eoka Leader. - Internal Developments in Cyprus. - Terrorist Activities and Counter-Terrorist Measures.

Developments in the Cyprus situation in recent months (in continuation of 15061 A) are described below under cross-headings. The major developments, chronologically, were (1) the publication on Dec. 19, 1956, of Lord Radcliffe's constitutional proposals for Cyprus, and their subsequent acceptance by H.M. Government; (2) the adoption by the U.N. General Assembly on Feb. 26 of a resolution calling for a "peaceful, democratic and just solution" of the Cyprus problem "in an atmosphere of peace and freedom"; (3) an offer by the Eoka organization on March 14 to suspend all terrorist activities if Archbishop Makarios was released; (4) a NATO offer of conciliation between the three interested countries (Britain, Greece and Turkey), made during March by the Secretary-General of the North Atlantic Treaty Organization, Lord Ismay; and (5) an announcement on March 28 by the U.K. Colonial Secretary, Mr. Lennox-Boyd, of the British Government's decision to release Archbishop Makarios from detention in the Seychelles and to allow him to go anywhere he chose, except to Cyprus itself. At the same time Mr. Lennox-Boyd announced that H.M. Government were also prepared to offer a safe-conduct out of Cyprus to Colonel Grivas, the Eoka leader.

The Radcliffe Report.

The constitutional proposals for Cyprus made by Lord Radcliffe were issued as a White Paper (Cmd. 42) on Dec. 19, 1956. His report consisted of a "Covering Note" in which he explained the basis of and reasons for his proposals, and his actual recommendations. In addition to his first visit to Cyprus in July 1956, Lord Radcliffe had visited the island again from Sept. 26 to Oct. 5, 1956.

The terms of reference laid down for Lord Radcliffe had been announced by Mr. Lennox-Boyd to the House of Commons on Sept. 14, 1956, as follows:

"To make recommendations as to the form of a new Constitution for Cyprus which shall be consistent with the following requirements:

(*a*) that during the period of the Constitution Cyprus is to remain under British sovereignty;

(*b*) that the use of Cyprus as a base is necessary for the fulfilment by H.M. Government of their international obligations and for the defence of British interests in the Middle East and the interests of other Powers allied or associated with the United Kingdom;

(*c*) that all matters relating to external affairs, defence and internal security are retained in the hands of H.M. Government or the Governor;

(*d*) that, subject to this, the Constitution is to be based on the principles of liberal democracy and is to confer a wide measure of responsible self-government on elected representatives of the people of Cyprus, but is at the same time to contain such reservations, provisions and guarantees as may be necessary to give a just protection to the special interests of the various communities, religions and races in the island."

Lord Radcliffe's Report is summarized below under cross-headings:

MAY 9 1957

Covering Note.

General Principles. In dealing with two "preliminary points" Lord Radcliffe explained that he had not assumed that his constitutional proposals "could be put into operation in Cyprus as it is today." "It is a Constitution," he went on, "appropriate to a state of affairs in which men may express their will by voting and their views by speaking without fear of terrorism or intimidation: in which, on the other hand, Government does not have to impose or maintain those emergency measures . . . which are the unavoidable counterpart of terrorism itself. In other words, my proposals contemplate a Cyprus in which it had been possible to declare that the present emergency has come to an end . . . Organized murder and violence have thrown a shadow over the island which will lift only with the good will of many people. But it is possible to hope that the prospect of a constitution, with its fruitful possibilities of peaceful self-government, may do something to bring nearer the end of the emergency itself."

As his second point, Lord Radcliffe explained that his proposals referred to "the Constitution of a territory under the sovereignty of the Queen. It is not in the province of such a constitution to provide for or against the possibility of a change in the international status of Cyprus, or to prescribe conditions or guarantees attendant upon the occurrence of such an event. On the contrary, I think it plain law that there is no power in the Legislature of a self-governing dependency to change the status of the territory by union under a different sovereign. Acts or resolutions directed to such a purpose would be null. If such changes were to come about they would have to come about by other means and by instruments designed for the purpose."

In framing his proposals Lord Radcliffe said that they only represented the "general outline" of a Constitution and were "therefore to be read as instructions for a draughtsman, not as a draft itself." On the other hand, too rigid a formulation in a written Constitution was "a positive mischance," and while no Constitution under which political power was divided could provide "answers to all questions or solutions to all problems," in the special conditions applying to Cyprus he felt "firmly" that "the preponderating advantage lies in constructing as precise a framework as is reasonably possible." The reasons for this were that for the last 25 years Cyprus had been governed without political institutions that could be described as responsible or elective, except for certain organs of municipal or local self-government; that, "if one looks further back into the history of the island," no established political tradition had had the opportunity of forming itself; and that the new distribution of political power involved in the very granting of the Constitution was a matter of the gravest concern to the different communities of Cyprus.

Proposed System of Diarchy. "There are two main problems involved in the framing of the constitutional form," the report stated. "The first is how to express the relationship between the control of external affairs, defence and internal security, which are reserved from the local Legislature, and the control of the other matters which fall within the scope of that Legislature. The other is how to impose such restrictions on the local Legislature as to secure effective protection—protection 'with teeth'—for the minorities in the island."

As to the first problem, Lord Radcliffe said, "it results from the reservation of powers that Cyprus will be governed under a system of diarchy. There will be two law-making authorities, their fields distinguished according to their subjects, and two distinct forms of administrative control. The idea of diarchy is familiar enough in the history of the developing relationship between the U.K. as an imperial power and the overseas territories which have come within or pass without her central control . . . In the present case I have come to the conclusion that the most suitable form is that which recognizes most explicity the existence of the diarchy and its consequences. Accordingly I have proposed to invest the Governor with full law-making and executive power for his reserved field, and to leave the local Legislature correspondingly full master in its own field . . . If a public emergency should arise, that must be dealt with by special provisions, but it is better that the Crown should not retain any further reserved or supplemental powers of making laws for Cyprus by Order-in-Council, except the unavoidable power to alter the Order-in-Council itself which sets up the Constitution . . ."

Under his proposals the local Legislature and, as a consequence, the Ministers responsible to it, were intended "to be masters in their own, the non-reserved, field." This was "a fair exchange for the considerable reduction of the full possible scope of responsible self-government which results from the reservation of defence and internal security." Lord Radcliffe said that he had "deliberately rejected schemes of 'phasing,' i.e., the progressive release of selected departments by stages into the hands of the self-governing side." He added: "I do not think such an approach, however appropriate in other circumstances, is appropriate to this Cyprus Constitution. The people of Cyprus are an adult people enjoying long cultural traditions and an established educational system, fully capable of furnishing qualified administrators, lawyers, doctors, and men of business."

Consistently with this, he had pared away from his proposals a number of those features that were often present in Colonial constitutions, even those that represented a comparatively advanced stage of development. He had not proposed the introduction of any official members into the Legislative Assembly. He had proposed so restricted a number of nominated members, six out of a total of 36, that no one could suspect that they represented an obscure attempt to give the Governor a residual influence upon the elected body. On the other hand, nominated members at least allowed the smaller minorities to obtain some representation without the formalities of separate communal rolls. He had also proposed that the categories of legislation on which the Governor should be free to reserve assent for her Majesty's pleasure should be reduced to the bare minimum of four: Bills that sought to alter the constitution in some respect, Bills affecting currency, coinage, or foreign exchange; Bills affecting the Royal prerogative; and Bills affecting the trustee status of Cyprus Government stock.

Discussing the difficulties which might arise in deciding to which field a particular piece of legislation or executive act belonged, since such words as "defence" or "internal security" did not carry a precise connotation, Lord Radcliffe concluded that no good purpose would be served by trying to provide exhaustive definitions. "The truth of the matter," he explained, "is that it is the aspect or context in which a particular question presents itself that determines its relation to such subjects as defence or internal security. This consideration is especially relevant in the case of Cyprus, which contains several large military and air installations dependent for effective operation on some measure of co-ordination with the rest of the island, including its road communications, its ports and harbours, and its water and power supplies."

To meet these difficulties Lord Radcliffe proposed the following:

'(1) The Governor must be the final judge both on the question whether action that he feels it necessary to take in the interests of any of his reserved subjects is properly within their range, and on whether a Bill of the Legislative Assembly presented for assent does or does not trench upon his reserved field . .

" (2) There should be a consultative body, formed on the highest level, for the purpose of keeping each side the reserved and the self-governing – currently informed about what the other is doing and proposes to do. Such a body should meet under the chairmanship of the Governor, and from the start it should aim to meet frequently and to discuss fully. The membership would consist of the Governor and Deputy Governor, the Chief Minister and another Minister nominated by him, the Minister of Turkish Cypriot Affairs, a representative of the Defence forces, the Legal Secretary, and the Attorney-General. This body should be styled the Joint Council of Cyprus . . .

" (3) The Governor should have constitutional power to invite the Legislative Assembly to take over from him any particular piece of law-making which, though formally within his reserved field, he can conveniently commit to the self-governing side . . . "

On this basis, the report went on, " it will be the Governor's duty to promote the most harmonious realtionship that he can achieve between the two sources of authority in the island, sources which unite him in his two capacities: in one as constitutional head, in the other as autocratic delegate of the Imperial Government." In his former capacity he would withdraw from active intervention in the work of self-governing side. He would act on the advice of his Ministers and would not preside at or take part in meetings of the Cabinet or of the Legislative Assembly. On the other hand, certain decisions must be taken and acts performed on his own authority, "as in the case of any other constitutional head."

Communal Relations. Dealing with relations between the Greek and Turkish communities, the report stressed that communal separation remained the general factor. Although the two peoples had often worked well together in the past, he had " no doubt that the circumstances of the past 18 months and the pressure of the Greek Cypriot campaign for *enosis* have done much to sharpen the sense of alienation between the two communities, and any plan for the future must accept the fact of this alienation."

The problem, he added, was essentially one of the political relations between these two communities, since the remaining communities were " too small in numbers for it to be reasonable that they should expect to have anything more than the right to have their views heard in an elected Assembly and the right to share in the protection of any guarantees that limit the powers of the majority in that Assembly ". In fact, the representatives of the Armenian community had told him that they did not desire to have any special arrangements made for their representation as a community, and that their best protection lay in good government for all.

Lord Radcliffe said that he had given his "best consideration" to the claim of the Turkish Cypriot community that they should be accorded political representation equal to that of the Greek Cypriot community, but that he had been unable to accept it, having regard to the fact that it was a claim by 18 per cent of the population to share political power equally with 80 per cent. Such equality could only be put into effect through a federation rather than a unitary State, but he did not think that Cyprus could be organized as a federation.

There was no pattern of territorial separation between the two communities and, apart from other objections, federation of communities which did not also involve federation of territories seemed to him " a very difficult constitutional form." If it was said that what was proposed was " in reality nothing more than a system of functional representation," he felt himself " baffled in the attempt to visualize how an effective executive Government for Cyprus is to be thrown up by a system in which political power is to remain permanently divided in equal shares between two opposed communities." Either there was a stagnation in political life, " with the frustration that accompanies it," or some small minority group would acquire an artificial weight by being able to hold the balance between the two main parties. A third alternative that the Governor should be given some sort of arbitral position had already been excluded by his [Lord Radcliffe's] conviction that the Governor should not be embroiled in the internal controversies of the self-governing side.

Giving his second reason against equality of political representation for the two communities, Lord Radcliffe declared : " To give an equal political strength in a unitary State to two communities which have such a marked inequality in numbers . . . is to deny to the majority of the population over the whole field of self-government the power to have its will reflected in effective action." Although " it might well be right to insist on this denial if the Constitution could not be equipped with any other effective means of securing the smaller communities in the possession of their essential special interests," this was not the case here. " Not only do I think," Lord Radcliffe declared, " that it can be equipped with such means by placing those interests under the protection of independent tribunals with appropriate powers and relying only to a limited extent on direct political devices, but I think that the ' legalist ' solution which this depends on is, in fact, better suited to provide the protection that is required . . . "

Accordingly Lord Radcliffe made the following five proposals " designed to protect the special interests of the Turkish Cypriot community and its political status " :

(*a*) There would be six seats in the Legislative Assembly reserved for members elected on a separate roll of Turkish Cypriot voters, compared with 24 seats for members elected on a general roll—in effect a roll of Greek Cypriot voters.

(*b*) The consent of two-thirds of the Turkish Cypriot members would be necessary before the Assembly could pass any law which altered the existing laws of Cyprus regulating Turkish Cypriot domestic affairs. The Turkish Cypriot community could invite the Governor to make a regulation amending any of those laws if there was no prospect of the Assembly itself being willing to act.

(*c*) There would be a branch of the permanent administration styled the Office of Turkish Cypriot Affairs under a Minister appointed by the Governor from among the Turkish Cypriot members of the Legislative Assembly.

(*d*) The Minister for Turkish Cypriot Affairs would have a seat in the Cabinet *ex officio* and would be a member of the Joint Council of Cyprus.

(*e*) All legislative acts of the Assembly and all executive and administrative actions or decisions on the self-governing side would be subject to the condition that they must not conflict with certain guaranteed rights relating to religion, education, charitable, religious and cultural institutions, and use of languages. Further, there must be no discrimination based on birth, nationality, language, race, or religion. The independent tribunals to whom complaints about violation of these rights could be preferred would be the Supreme Court in the case of legislative acts, and the body styled the Tribunal of Guarantees in the case of executive or administrative actions of the Government.

Lord Radcliffe emphasized that there were in addition other proposals, " minor in themselves," which yet made up " in combination a system under which the community is secure of its place in the conduct of public affairs." He added : " It is my hope that together they will be thought to justify the view that, even under a system which cedes an electoral majority to the Greek Cypriots in the Legislative Assembly, the interests of the smaller community can be effectively protected and that the safeguards offered are not mere ' paper ' guarantees."

Unicameral Legislature. Lord Radcliffe did not consider that a Second Legislative Chamber was required in Cyprus. In his view no sufficient advantage would be gained by a bicameral structure, when there had to be set on the debit side the importance of simplicity, of facing a single Chamber squarely with the responsibility for its own decisions, of avoiding distracting controversies between the two Chambers, and, lastly, of bringing all the available political talent into a single responsible assembly. Nor would a Second Chamber be a good instrument for protecting minority rights.

Franchise. The report proposed that there should be a separate communal roll for Turkish Cypriots, rejecting any more complicated scheme. It also proposed that women should be given the vote equally with men as in the U.K., Greece, and Turkey, and as being in line with " liberal and progressive ideas."

Judiciary. After referring to the " great importance " which he attached to " the contribution that the judicial power can make to the resolution of inter-communal disputes in Cyprus," Lord Radcliffe declared that in order that the judges should " not only achieve the detachment required but also obtain from the public the credit for that detachment," it was essential that the Chief Justice should be appointed from outside Cyprus, and that the number of Supreme Court judges from inside Cyprus should always be equally balanced between Greek and Turkish Cypriots.

Tribunal of Guarantees. To prevent discrimination, Lord Radcliffe suggested the establishment of a Tribunal of Guarantees " a novelty in any constitutional scheme derived from British sources," but " a reflection on a very small scale of the *Conseil d'Etat* in France " to which all complaints could be referred and impartially investigated. The reason why he did not regard this as a suitable task for the Supreme Court was " partly that it would be unfortunate to risk overloading that court with a number of inquiries that are not legal matters in the strict sense, and partly that the experience and the practice and procedure which best suits such a tribunal is rather different from that appropriate to a regular court of law." He stressed, however, the need for an independent chairman of the tribunal.

Broadcasting. While education was largely on separate communal lines, broadcasting did not fit into such a scheme of division as it was " as much a normal internal service for the use of Cyprus as, say, electric power and water, and as such should fall among self-governing matters." On the other hand, it was most important that broadcasting should be kept " secure from the impact of party or political controversies and, above all, from any tendency to favour one community at the expense of the other."

Lord Radcliffe therefore recommended that broadcasting should be turned into a chartered public institution, on the lines of the B.B.C., charged with an independent public responsibility " so to conduct the service as to hold a fair balance between the interests and claims of the different communities." Those in control of the service should be, and should be recognized as being, independent of external control or pressure. For this purpose the governing board should be so formed that Greek and Turkish Cypriots had equal representation upon it. If a difference had to be weighed in the scales, the vote of an independent chairman should decide between them.

Inter-communal Education. This embraced those schools and colleges not confined to any one community, such as the English School for boys, the American Academies for boys and girls the teachers' training colleges for men and women, the projected commercial and technical schools, and the Technical Institute at Nicosia now nearing completion. Lord Radcliffe felt that because these institutions were serving all communities they should be placed under a special board responsible to the Governor, and not to the Legislative Assembly. This board should consist of Greek and Turkish Cypriot members interested in education, under an independent chairman.

Finance. Lord Radcliffe pointed out that the diarchy involved in the reserved powers over defence and internal security would entail two separate public funds for Cyprus—one controlled by the Governor for the purpose of those fields of administration which were retained in his charge, and the other being the produce of the Cyprus revenues which would be appropriated according to the decisions of the self-governing Assembly and Ministers.

As regards defence, the report assumed that the moneys needed for it would be provided from U.K. funds and would not be regarded as a charge on the revenues of Cyprus, except to the extent of the sum of £10,000 which was its outstanding annual contribution to Imperial defence.

As regards the question whether the cost of the police force should be met out of the revenues of Cyprus, although the control of that force, including its strength, equipment, rates of pay, etc., was a reserved matter and not therefore within the range of self-government, Lord Radcliffe expressed the view that the only fair thing would be some sharing arrangement. The total Cyprus revenue for 1956 was about £12,000,000, of which one-quarter would have to be appropriated for police costs if the whole burden were to be thrown on Cyprus. It would, however, be unjust to Cyprus to make such a requirement, whatever the future level of Cyprus revenues. The necessity to create and to maintain a throughly effective police force in Cyprus was in part a recognition that the U.K. must be secure in the use of the base. Lord Radcliffe therefore recommended that a sum should be fixed as an annual contribution from the Cyprus revenues towards the total cost of police and prisons, to be paid into the defence fund, and that the balance should be provided out of U.K. funds. Taking the 1954 figure, the Cyprus contribution would be £750,000.

With regard to broadcasting, the report pointed out that this was a service for the people of Cyprus in the full sense, and recommended that the finance for it, so far as it was not self-financing out of licences and advertisements, should continue to be met out of Cyprus revenues.

Finally, Lord Radcliffe recommended that the cost of inter-communal education should be met from U.K. funds as a supplement to the monies already provided or promised by H.M. Government for the economic development of Cyprus. "It will be a worthwhile gift from the people of this country to the people of Cyprus," Lord Radcliffe declared, "and at a time when such large expenditure has to be incurred in the island for defence, it is not a bad thing that this and other development monies should be visibly expended at the cost of the British taxpayer for the direct benefit of the internal purposes of Cyprus."

Constitutional Proposals.

As explained by Lord Radcliffe's "Covering Note," his actual constitutional proposals provided for a diarchy.

Under this, responsibility for defence, external affairs, and internal security would remain completely under the control of H.M. Government acting through the Governor. Defence matters would cover "the defence of Cyprus, either directly or indirectly, as involved in the fulfilment by H.M. Government of their international obligations and the defence of British interests in the Middle East or the interests of other Powers allied or associated with the United Kingdom." Internal security matters would include control of the police force and prison services.

All other functions of government, subject to certain reservations, would be controlled by a Chief Minister and Cabinet drawn from a Legislative Assembly consisting of 30 elected members (six Turkish and 24 Greek) and six unofficial nominated members, of whom one would be chosen to represent the non-Cypriot British residents, and one the Maronites.

The Chief Minister would be chosen by the Governor from the Legislative Assembly, and would recommend to the Governor who the other Ministers should be, except that the Governor would have the duty of choosing a Minister for Turkish Cypriot Affairs from among the Turkish Cypriot elected members of the Assembly. The Turkish Cypriot Minister would be guaranteed a place in the Cabinet.

The Governor would be entitled to legislate by ordinance in reserved matters. The Assembly would make laws in all other matters, but laws affecting Turkish Cypriot affairs (including Turkish education) would be subject to a special majority in the Legislature, and, in common with other laws affecting so-called "fundamental rights," would be capable of being submitted to the Supreme Court of Cyprus, at the instance of the Governor. The Court would then determine whether or not they were valid in the light of certain restrictions and guarantees. In the case of other acts of government which might be thought to infringe the guarantees, it would be possible for complaining parties to bring their cases before a Tribunal of Guarantees [see below].

To co-ordinate the actions of the Governor's side and the self-governing side there would be a Joint Council of Cyprus over which the Governor would preside. The Council would consist of the Chief Minister, one other Minister recommended by him, the Minister for Turkish Cypriot Affairs, and representatives from the Governor's side. The Council's primary purpose would be "the consideration and discussion of matters of common concern to the retained side and the self-governing side of Government," and it should "endeavour to harmonize the relations between the two sides of Government and to eliminate occasions of conflict by anticipating and discussing them." The Governor would invite the views of the Council and would give due weight to them, but would "not be under an obligation to act in accordance with them or in accordance with any particular preponderance of views."

There would be a Standing Legal Sub-committee of the Council, consisting of the Legal Secretary and the Attorney-General, one of whose functions would be to settle which prosecutions for criminal offences were to be conducted by the Legal Secretary as affecting Governor's matters and which by the Attorney-General as affecting self-governing matters.

The Legislative Assembly would have a Speaker and a Deputy Speaker appointed by it by majority vote. Members of the Assembly could use English, Greek or Turkish, provided an immediate oral translation into either or both of the other languages would be made available if requested by the member or directed by the Speaker. All Bills and records would be printed in English, Greek and Turkish, with the English text as definitive in case of doubt. The privileges and immunities of members would be prescribed by law. The normal term of office of the Assembly would be four years, but the Governor would have power to prorogue or dissolve it at his discretion, after consultation with the Chief Minister.

The Chief Minister might be relieved of office by the Governor at any time if the Governor was satisfied that the Chief Minister did not enjoy the general support of a majority in the Legislative Assembly or that his removal was "urgently required by the public interest." If he was so satisfied, the Chief Minister would be entitled to request the Governor to dissolve the Legislative Assembly for the purpose of general elections, and the Governor would act accordingly unless he decided "that for some special reason which bears upon the public interest it would not be right for him to accede to this request."

There would be (*a*) a Supreme Court consisting of a Chief Justice and two other judges appointed in accordance with Lord Radcliffe's explanations; (*b*) a Judicial Service Commission; (*c*) a Cyprus Broadcasting Corporation; (*d*) a Board of Inter-communal Education (consisting of a Greek Cypriot, a Turkish Cypriot, and a chairman who must be neither); (*e*) a Public Service Commission; (*f*) an Auditor-General; and (*g*) an Attorney-General.

Fundamental restrictions on the powers of self-government to be granted by the Constitution, and guarantees which could not be interfered with by any law, regulation, or official action, were outlined as (*a*) the right to the free exercise in public or private of any creed, religion, or belief the observance of which was not incompatible with public order and good morals; (*b*) the right of all persons "acting individually, in association, or as a community," to establish, maintain, manage, and control at their own expense any charitable, religious, or cultural institutions and any schools or other instructional establishments, provided that these were so conducted as to be compatible with public order and good morals, with the right to use their own language and to exercise their own religion freely in such institutions and establishments; (*c*) the right to the free use of any language in private, in commerce, in religion, in the press or other publications, and at public meetings; (*d*) no discrimination against any person on account of birth, nationality, language, race, or religion; (*e*) a guarantee that compulsory expropriation of property would only be permitted for public purposes and against the expeditious payment of just compensation, with the right of access to the Supreme Court for the determination of any compensation amount; (*f*) equality of access to the law courts, subject only to legal rules concerning proceedings by enemy aliens in time of war; and (*g*) the exclusion from the Legislative Assembly's purview of any legislation repealing or altering certain Turkish family and religious laws, as well as any law dealing with Turkish Cypriot educational, religious, charitable, and cultural institutions or activities or any other matter exclusively of Turkish Cypriot concern, unless such legislation was supported by the votes of not less than two-thirds of the Turkish Cypriot members of the Assembly.

The Tribunal of Guarantees would have authority to enquire into any act of government alleged to be in violation of these fundamental rights guaranteed by the Constitution, but its jurisdiction would not extend to laws of the Legislative Assembly, the validity of which might be determined by the Supreme Court alone, or to Ordinances made by the Governor. It would, however, have jurisdiction over Orders and Regulations having the force of law, as well as executive acts. Complaints might be preferred to the Tribunal by individuals, associations, or corporations. There would be no appeal from its decisions, which would be taken by a majority of the members sitting. If the Tribunal found a complaint well founded it would have power in its discretion either to make a declaration of right alone or to annul the governmental Act complained of, or to refer it to the Department or Office concerned with recommendations as to remedial action. It could also award compensation out of public funds. The Tribunal's membership would include an equal number of Greek and Turkish Cypriots under a neutral chairman, but no Minister and no person holding a post in the Public Service other than the Judicature could become a member. Members would be appointed by the Governor after consultation with the Chief Minister and the Chief Justice.

Finally, the outlines of the Constitution made provision for the amendment of special Turkish family and religious laws by the Governor; the Governor's powers of pardon; financial matters in the way explained by Lord Radcliffe's Covering Note; and emergency legislation. In the last-named respect Her Majesty would be entitled by Order in Council at any time "(*a*) to declare that a public emergency exists in Cyprus; (*b*) to make provision for such measures as might appear necessary for dealing with the security of public safety or order and of supplies and services during the period of such an emergency." Such an Order in Council might suspend all or any of the provisions of the Constitution or empower the Government to do so, including the power to make laws generally in self-governing matters and to take executive action in respect of them.

British Government's Acceptance of Radcliffe Recommendations.

The Colonial Secretary, Mr. Lennox-Boyd, announced on the same date (Dec. 19, 1956) that the Government fully accepted Lord Radcliffe's recommendations, his statement being as follows:

"H.M. Government, after consultation with the Governor of Cyprus, accept as a whole the proposals which Lord Radcliffe has made. In our view they represent a fair balance between the different and often conflicting interests which are involved The Government will be prepared to introduce such a Constitution as soon as we are satisfied that a situation exists in Cyprus in which genuine elections can be held free from violence and intimidation. A start is at once being made with the drafting of the necessary constitutional instruments so that elections may be held as soon as conditions allow.

"The terms of reference given to Lord Radcliffe envisaged a Constitution for a self-governing Cyprus under British sovereignty. As for the eventual status of the island, H.M. Government have already affirmed their recognition of the principle of self-determination. When the international and strategic situation permits, and provided that self-government is working satisfactorily, they will be ready to review the question of the application of self-determination.

"When the time comes for this review, that is, when these conditions have been fulfilled, it will be the purpose of H.M. Government to ensure that any exercise of self-determination should be effected in such a manner that the Turkish Cypriot community no less than the Greek Cypriot community shall, in the special circumstances of Cyprus, be given freedom to decide for themselves their future status. In other words, H.M. Government recognize that the exercise of self-determination in such a mixed population must include partition among the eventual options.

"H.M. Government will keep in close touch with the Greek and Turkish Governments on the international aspects of the problem. I hope we are on the eve of a new and happy chapter in the long history of Cyprus. It is the intention of H.M. Government to do all that they can to bring this about."

Mr. Callaghan (Lab.) expressed agreement with the Colonial Secretary's hopes that the proposals would open a new chapter. He asked, however, whether the Constitution provided what might be called "built-in guarantees" for the Turkish Cypriots, and if so, why it was thought necessary to introduce at this stage "the irritant of partition." He also asked whether the Government considered the Constitution as being negotiable and whether they would be willing to discuss modifications with other interested persons, including Archbishop Makarios. Would it not be wise to permit the Archbishop to see persons and documents and to have consultations, as he had such great influence in this matter?

Mr. Lennox-Boyd replied that Mr. Callaghan was right in suggesting that the Constitution did provide carefully built-in guarantees for the Turkish community and other communities in Cyprus. He had been able to explain that in considerable detail to the Turkish Prime Minister two or three days earlier. Referring to "the natural anxieties of the Turkish people about the long-term effect of the application of the principle of self-determination," he added: "I cannot see how it is anything other than logical to grant to a community with such close interests with Turkey, which is only 40 miles away, the same rights as we are prepared to recognize and grant to the Greek community in the island."

On the question of possible amendments to the proposals, Mr. Lennox-Boyd said that while he had explained to the Greek and Turkish Prime Ministers that the Government would give all possible consideration to any suggestions that might be made by them, and in the same way to suggestions from the people from Cyprus or from the House, the proposals represented a balanced whole and it would be difficult to disrupt that balance in any considerable way without spoiling the plan as a whole.

The constitutional proposals were being shown the same afternoon to Archbishop Makarios, and Lord Radcliffe's secretary and a senior Greek-speaking officer of the Cyprus Government would arrive in the Seychelles to explain the proposals to him. If the Archbishop wished to talk to someone from Cyprus or from Greece, the British Government would provide the necessary facilities.

In reply to a question by **Mr. Clement Davies** (Liberal) the Colonial Secretary pointed out that he had not said that there was any question of the Government or the Governor reopening negotiations with Archbishop Makarios. What he had said was that the Archbishop would be free to have consultations with representatives from Greece or Cyprus, and that the Government would provide the necessary facilities.

Mr. Bevan (Lab.) asked if it was essential to make the reference to the possibility of partition in relation to Lord Radcliffe's proposals. Was there not a danger, he asked, that that addendum would poison the atmosphere once more and prevent a settlement in the island, and that in winning the acquiescence of the Turks the Colonial Secretary would once more lose the support of the Greeks, so that in the matter of self-determination the Government would once again be where they were originally? In view of the recent unsatisfactory experience with Cyprus as a base during the Suez operations, would it not be possible to make it a NATO base, without any of the political difficulties involved in the present situation?

Mr. Lennox-Boyd replied that it was still the Government's strong view that the strategic position in Cyprus was essential for the performance of their defence obligations in the Middle East. He hoped there would be no misunderstanding about partition as an eventual possibility, among the possible solutions.

It was the Government's intention that there should be this Constitution for Cyprus. After it had been found to be working satisfactorily, and when the international and strategic situation permitted, the Government would be willing to consider the application of self-determination, but during the intervening period there should be an opportunity for the Constitution he hoped with the good will of both sides of the House to get well under way. At that later stage, when those circumstances had arisen, and the conditions had been fulfilled, there would be a test of public opinion in Cyprus. If that test was in favour of a change of sovereignty there would be a second test for the Turkish population. They would be entitled to the same right to choose their destiny as the majority of the island, which was the logical consequence raised by self-determination.

Replying to **Mr. Gaitskell,** who asked whether the partition proposal had been discussed with the Greek and Turkish Governments, Mr. Lennox-Boyd emphasized that there were no proposals for partition, that he was not suggesting at this moment that there should be any partition, and that none of them would consider partition in Cyprus or in many other parts of the world as the best solution for the many existing problems.

Mr. Elliot (C.) said that while everyone would deplore partition in itself, self-determination was obviously one of the ends or solutions the statement must lead to. What was being envisaged was full *enosis* with Greece of a large portion of Cyprus, and in those circumstances some reference to the position of the minority was inevitable in a full authoritative statement by the Government.

Mr. Lennox-Boyd, after expressing approval of Mr. Elliot's comments, said in answer to further questions that one of the six members nominated by the Governor would be specially charged with looking after the Maronite interests, and that it would be the responsibility of one of the members chosen by the Governor to represent the interests of the British community in the island. He concluded by saying that both he and Sir John Harding detested being responsible for emergency regulations of any kind, and "the sooner they could sweep them all away the better pleased they would be."

As mentioned by Mr. Lennox-Boyd, Lord Radcliffe's Secretary (Mr. D. L. Pearson) and the former Attorney-General in Cyprus (Mr. C. G. Tornaritis) visited the Seychelles from Dec. 21 - Jan. 1, and during their stay at Mahé explained Lord Radcliffe's proposals to Archbishop Makarios. No statement was issued about these discussions.

In Cyprus the Governor, Field-Marshal Sir John Harding, outlined the proposals in a broadcast on Dec. 19, asking the Cypriot people to study the proposals "calmly and soberly," offering to discuss them with any leaders of opinion in the island, and referring to the forthcoming visit of Mr. Pearson and Mr. Tornaritis to the Archbishop. Sir John also mentioned that the British Government would give the necessary facilities for a representative party of Greek Cypriots to consult with the Archbishop if they so desired, though it could not agree to the Archbishop's return until tranquillity was restored.

Greek and Turkish Reactions to Lord Radcliffe's Recommendations.

Prior to the publication of the Radcliffe Report and his announcement of the British Government's acceptance of its proposals, Mr. Lennox-Boyd had visited Greece and Turkey from Dec. 13-16 to acquaint the Greek and Turkish Governments with Lord Radcliffe's recommendations and to tell them the gist of the statement he was going to make. In Athens he had a long talk with M. Karamanlis, the Greek Prime Minister, on Dec. 14, while he met the Turkish Prime Minister, M. Adnan Menderes, in Istanbul on Dec. 16, the discussions dealing also with the Cyprus issue in general.

The Greek Government announced on Dec. 19 that in its view neither Lord Radcliffe's Report nor Mr. Lennox-Boyd's statement to the House of Commons offered "a basis for a solution of the Cyprus question."

The statement added that the Radcliffe Constitution was aimed at "continuing a Colonial status for Cyprus" which was "incompatible with the post-war spirit and the high grade of civilization of the Cypriots"; that it "did not create the prerequisites for the exercise of self-determination rights"; and that Mr. Lennox-Boyd's statement regarding the eventual partition of the island "complicates still further the Cyprus issue." The Greek Foreign Minister (M. Averoff) also complained that the questions of releasing Archbishop Makarios and the granting of an amnesty, which were "basic elements" for a solution of the Cyprus dispute, had been ignored.

In view of a statement by the U.S. State Department (see below), the Greek Government issued a further statement on Dec. 29 on its reasons for rejecting the Radcliffe proposals.

The statement asserted that the Radcliffe Constitution was "illiberal and undemocratic" because it gave far-reaching powers to the Governor, who could regulate at his own discretion the limits of his jurisdiction, could decide at his discretion whether the Government enjoyed the confidence of the Legislative Assembly, possessed

the unlimited right to dissolve the Legislature, and had exclusive control of the Civil Service. Furthermore, the Greek Government had not obtained satisfactory answers from Mr Lennox-Boyd to its questions about Archbishop Makarios's release, about the British attitude to self-determination, and about the possibility of using the British proposals as a basis for further discussions. The Colonial Secretary had stated that Britain would listen to any suggestions but was unwilling to embark on fresh negotiations with Cypriots and Archbishop Makarios. In these circumstances the British proposals, which had not been submitted as a basis for negotiations, were not considered by Greece to be worth further examination.

The Turkish Prime Minister, in a statement issued on Dec. 20 through the official Anatolian News Agency, declared that after a preliminary study of the Radcliffe Report, and in the light of Mr. Lennox-Boyd's statement in the House of Commons, the Turkish Government regarded the Report as "a reasonable basis for discussion," and that after a detailed study of the whole matter they would probably communicate "some suggestions" to the British Government.

M. Menderes put emphasis on two main points raised by Mr. Lennox-Boyd, viz., self-government and self-determination. As regards the first, it was "noteworthy" that the British Government had made it quite clear that the proposed Constitution would not be applied until terrorism had definitely ended. As to self-determination, M. Menderes underlined the Colonial Secretary's statement that any exercise of self-determination should be effected in such a manner that the Turkish Cypriot community no less than the Greek Cypriot community should be given the opportunity of deciding for themselves their future status, and that self-determination in such a mixed population must include partition among the eventual options.

In conclusion, M. Menderes said that Mr. Lennox-Boyd's statement contained "points of departure which could lead to a final settlement of the Cyprus question" and that the Turkish Government would continue their discussions with Britain "on this basis."

In a further statement in the Turkish National Assembly on Dec. 29, M. Menderes declared that his Government was in favour of partition of Cyprus. Only partition or the *status quo*, however, were acceptable to Turkey, which could not accept the proposals of the Radcliffe Constitution providing for a unitary State. "Partition of Cyprus half and half," he added, "is a self-sacrifice for Turkey, and we will never consent to a greater sacrifice than that."

Following talks in Ankara between the Turkish Government and the leaders of the Turkish community in Cyprus (Dr. Kütchük and Mr. Faiz Kaymack), a Turkish constitutional expert and former Deputy Premier, Professor Nihat Erim, visited London from Jan. 25-28, where he discussed with Mr. Ormsby-Gore (Minister of State for Foreign Affairs) and Lord Radcliffe the Turkish views on the constitutional proposals and made a number of suggestions with regard to them.

U.S. Views on Radcliffe Proposals.

In Washington the State Department spokesman, Mr. Lincoln Wright, said on Dec. 27 that the Radcliffe proposals might be a "possible first step" towards a solution of the Cyprus problem.

The U.S. Government, he stated had noted with sympathetic interest the long and earnest labours of Lord Radcliffe to find a formula for self-government for Cyprus, and "the making by the U.K. of proposals for self-government could be the first step toward an eventual peaceful and generally acceptable final solution of the Cyprus problem." He added: "The formula now produced by Lord Radcliffe seems to be unacceptable in certain respects by some who are concerned with this matter. Nevertheless, the U.S.A. still hopes that our three allies, who, together with the people of Cyprus, are deeply concerned with this issue, will strive to agree upon a way of moving together toward a solution, which is so important to themselves and to the entire free world."

United Nations Resolution on Cyprus.

After a five-day debate, the U.N. General Assembly adopted on Feb. 26, by 55 votes to nil and with Afghanistan abstaining, an Indian resolution which (1) stated that the solution of the Cyprus problem "requires an atmosphere of peace and freedom of expression"; and (2) expressed "the earnest desire that a peaceful, democratic and just solution will be found in accordance with the purposes and principles of the U.N. Charter, and the hope that negotiations will be resumed and continued to this end."

Two resolutions, one Greek and one British, had been presented in the Political Committee when it began its debate on the Cyprus question on Feb. 18. They were worded as follows:

Greek Resolution. "The General Assembly:—

"Recognizing the right of the people of Cyprus to self-determination in accordance with the purposes and principles of the U.N. Charter;

"Considering that the situation in Cyprus has gravely deteriorated;

"Considering that the establishment of conditions of freedom and peace in the island is not only of vital importance to the people of Cyprus, but is also of concern to all peoples in the Eastern Mediterranean;

"Considering further than an equitable solution of this question will contribute to peace and stability in that area;

"Expresses the wish that the people of Cyprus be given the opportunity to determine their own future by the application of their right to self-determination."

British Resolution. "The General Assembly:—

"Considering that it is inherent in the U.N. Charter that States shall live together as good neighbours and refrain from intervening in the internal affairs of other States;

"Noting the complaint of the U.K. Government that over a considerable period terrorist organizations in Cyprus have received support from Greece in the form of arms, ammunition, and money;

"Noting the fact that, in spite of repeated representations by the U.K. Government, Athens Radio has regularly broadcast special programmes containing incitements to insurrection and violence;

"Calls upon the Greek Government to take effective measures to prevent support or encouragement from Greece for terrorism in Cyprus."

The respective resolutions were presented by M. Averoff, the Greek Foreign Minister, and Commander Noble, the British Minister of State for Foreign Affairs.

M. Averoff denied that the Greek Government had ever despatched arms to the "patriots of Cyprus," and said that it had in fact taken all possible measures "to prevent Greeks from sending arms to their brothers in Cyprus" and that assistance had only been given to the Cypriots on "the political level." After declaring that Greece was not asking for political union with Cyprus but for self-determination for the Cypriot people, he charged that Britain, in the case of Cyprus, was "failing to respect the U.N. Charter, which embodies the principle for which Greece fought in two great wars at the side of the British people." He also accused Britain of breaking her pledge to initiate direct negotiations to resolve the Cyprus problem, made at the last U.N. Assembly, and of "using the respite granted by the U.N. to crush the people of Cyprus once and for all beneath the weight of its military machine." In the course of his speech M. Averoff bitterly attacked Sir John Harding, whose name, he said, would be "written in the history of the people of Cyprus in letters of blood and tears."

As regards the British complaints of broadcasts from Athens Radio, M. Averoff conceded that the radio station was owned by the State but pointed out that it was administered by an independent organization. Government intervention, though "not impossible," would be "very difficult" and, if imposed, would be regarded by public opinion as "an interference with freedom of speech." Referring to the British jamming of Athens broadcasts to Cyprus, M. Averoff commented: "In occupied Greece during the war we were able to unravel the B.B.C. broadcasts jammed by the Nazis, but in Cyprus it is impossible to make out a single word transmitted by Radio Athens."

After stressing that Greece had raised the Cyprus issue "not in an aggressive but in a constructive spirit," M. Averoff repudiated the charge that Greece sought territorial expansion, declaring that "countries which nurture designs of territorial expansion, as we well know, do not address themselves to the United Nations." He maintained that the ethnic character of Cyprus had been predominantly Greek for 3,000 years, and that foreign occupations of the island, including the British domination of the past 80 years, had been "nothing more than episodes" which had not seriously altered the ethnic composition of the population. In this connexion he recalled that the latest census in Cyprus, taken in 1946, had shown the population to be 80.2 per cent Greek and 17.9 per cent Turkish.

Commander Noble, in reply, began by referring to the historic friendship and wartime partnership between Britain and Greece. "If, 12 years later, Greece can raise her voice freely here at the U.N." he added, "it is because we stood by her in the time of her greatest need. It is therefore doubly regrettable that we should be having to bring before the U.N. a most serious complaint against Greece. The quarrel between my country and Greece can be summed up in one word—*enosis*. It is the pursuit by Greece of this ambition that has caused such havoc in the relations between Greece and my country and which has also dangerously weakened the defences of the free world in South-East Europe."
